

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. POSTAL SALARIES.

THURSDAY, OCTOBER 9, 1919.

JOINT COMMISSION ON POSTAL SALARIES,
Washington, D. C.

The commission met at 10.40 o'clock a. m., Hon. John H. Bankhead (chairman) presiding.

Present: Senators Bankhead, McKellar, Gay, Sterling, Moses; Representatives Moon, Rouse, and Steenerson.

The CHAIRMAN. Gentlemen, as you all know, this meeting is for the purpose of presenting to the Joint Commission on Postal Salaries, appointed for the purpose of investigating the matter, the claims of the post-office employees with regard to salaries. This commission has been laboring under difficulties, and we have not been able, perhaps, to devote as much time to this work as, I am sure, the commission would like to, on account of conditions in Washington. The members of the Senate have been unable to get away, and therefore we had to postpone some of our meetings scheduled to take place before this hearing.

Of course, this commission, like every other body of busy men, will have to insist upon a limit of time, which we hope will be sufficient to allow the different groups that will appear here to present their case. I believe, on this program made out by the secretary, that the carriers will be heard first, and Mr. R. F. Quinn, of Philadelphia, seems to be the first speaker. We will hear from Mr. Quinn on behalf of the carriers.

CITY LETTER CARRIERS.

STATEMENT OF MR. RICHARD F. QUINN, PHILADELPHIA, PA.

MR. QUINN. Honorable commission, the committee representing Pennsylvania have presented the facts in the form of a brief. That brief starts in with the time a letter carrier enters the service. He takes a physical examination, after which he is required to take the civil-service examination. Then he is placed on the register for appointment, and the brief follows him through the various stages. A substitute now gets 40 cents an hour.

We are representing here 225 individuals, representing 48 cities of Pennsylvania. We have a statement here showing the cost of eight different items, and the cost of living is presented in the brief.

Then the brief deals with the regular man—after becoming a regular, and various facts are brought out in the statement, showing how he has to meet a deficiency that will run from \$300 to \$500. Other facts and features of the regular carrier are fully described in the brief. The nature of the work that is not very often thought about by the average citizen is dealt with. A letter carrier in the performance of his duties requires the closest thought, the quickest thought,

the quickest speed, and the quickest activity, particularly in preparing his mail. He must get his mail ready for the first trip in the morning with the highest speed. He starts out then with a heavy load, and schedules are made up both for the time of leaving the office and the time of returning to the office, and these schedules are very exacting and irksome. I do not propose, gentlemen, to dwell on these facts, as there are other localities represented here which will bring out the different conditions in those different localities.

I desire, however, to lay before the honorable commission a brief statement as to the conditions in the service as reviewed by practical men who have been in the service for over a quarter of a century and while it is not reflecting at all upon the department those conditions are there and it is well for us to review it in presenting our statements.

They are taking men off the street and the efficient, trained letter carrier can realize at once the differences and difficulties in the service of the mail, because these men taken right off the street and put into the service—it may sound humorous, but it is a fact—don't know how to pick up a letter, that is, in the letter carrier's way, because there is in that work an exactness necessary in order to handle your mail quicker and expeditiously, and it requires a particular way, a particular system of handling the mails.

I desire, on behalf of the letter carriers of Pennsylvania—in fact of the entire country—to take this advantage of presenting before your honorable body these facts. I feel that it will do us a great deal of good; it will bring us closer together and make for a better understanding between Congress and the employees, and that is a valuable fact, in my estimation. Gentlemen, I thank you.

(Mr. Quinn submitted the following statement:)

STATEMENT SUBMITTED BY MR. QUINN FOR THE LETTER CARRIERS OF PENNSYLVANIA.

REQUIREMENTS FOR ENTERING THE POSTAL SERVICE AS A LETTER CARRIER.

First. Passing a physical examination, a civil-service examination; applicants are required to take an open competitive examination from which the eligible register for appointments is made up according to percentages. Appointments are made in rotation to the position of substitutes. Substitutes are paid at the rate of 40 cents an hour for actual time they are employed. Substitutes serve for an indefinite period of time, during which their earnings are meager and uncertain. The approximate time served by substitutes in Pennsylvania is about three years and six months. Average earnings, \$35.50 per month. When appointed to regular positions they are required to start at the lowest rate of salary. Letter carriers work an average of 10 years before they reach the highest grade.

We are reporting from 225 individuals representing 48 cities.

Estimate average living cost annually of a regular letter carrier.

Clothing	\$2
Fuel	1
Rent	2
Wear and tear on household effects	1
Table	8
Insurance	1
Organization	1
Other necessary expenses	1

We will not take your time to go into the matter of high cost of living, as that has been well established, only to refer, first to the case of the substitute, where the average salary is about \$35.50 per month. Not only the living makes it arduous, but also the work, being a cat-a-ch-as-catch-can position, diversified from day to day in serving different routes, causing an exceptionally trying strain on the mentality.

The regular man, having passed through the foregoing substitute service, with all its vicissitudes, we will now embrace his position as a regular.

We have established an average rate for living cost. This is established as what may be termed a minimum, as conditions and circumstances to some of the individuals raise the living cost to a higher basis, running up to over \$2,000.

Clear and strong statements coming from different carrier regarding this matter and how they have been able and compelled to meet the situation, are as follows:

Endeavoring to work at some other kind of work.

Their wives working.

Their children being turned out to work.

By borrowing money.

By going into debt.

This statement speaks for itself, without further dwelling on the material points.

A few more facts regarding the life and position of a letter carrier. He has to rise earlier in the morning than the average citizen. His family are disturbed by this at an early hour, preparing his morning meal for him. Reaching the post-office at an early hour and every morning in the year he is exacted to be there on the moment as scheduled. Starting in his work with the highest speed possible as the time limit is required, whether the mail is light or heavy, for him to leave promptly. He is then required to speed up again to reach the office after delivery on the scheduled time.

We learn that the skilled and unskilled individual is receiving a greater compensation than is the letter carrier, and sometimes with less effort and less inconvenience.

RICHARD F. QUINN, *Philadelphia, Pa.,*

JOHN J. SCULLY, *Pittsburgh, Pa.,*

THOS. J. CARPENTER, *Harrisburg, Pa.,*

ROBERT H. BRIDGES, *Johnstown, Pa.,*

Committee.

The CHAIRMAN. There are about 15 names on the program, and it appears there is some agreement among you that you would occupy about five minutes each. I presume that most of you have prepared a statement which you can file with the secretary, in addition to the remarks which you care to make. I make this suggestion because you can see how important it is that you do not go very far afield as to time, because there are others to follow. The next speaker will be Mr. J. J. Scully, of Pittsburgh.

STATEMENT OF MR. J. J. SCULLY, PITTSBURGH, PA.

Mr. SCULLY. Mr. Chairman and gentlemen: I do not want to dwell upon the high cost of living and the conditions existing at the present time here. You all know that. We feel that in Pittsburgh the cost of living is as high as it is any place in the country. We believe that under the conditions a permanent salary should be established with three grades, namely: \$1,800, \$2,100, and \$2,400. We figure that injustice has been done us, especially the substitutes, in having them sub for a period of three to five years and not receive any credit for that time. We believe, in order to overcome that, that the substitutes should receive 80 cents an hour, and not be required to serve any more apprenticeship than one year. We be-

lieve that after one year they should become regulars in second grade. We also believe that the old men in the service should be taken care of, which I hope will be done by this session of Congress.

I will say in relation to the speed-up system, that the outside public have no idea of what the duties of a letter carrier consist of. A great many think he simply has to carry a heavy load or something of that character, but I want to tell you from my own personal experience in the business district of Pittsburgh that every morning, without having the time to look at the route book, I have to mark at least 400 pieces of mail to different routes, stations, boxes etc. Gentlemen, I thank you.

Mr. ROUSE. How many carriers have you in the Pittsburgh office?

Mr. SCULLY. Five hundred and fourteen, I think.

Mr. ROUSE. How many substitutes?

Mr. SCULLY. I believe they are very short of substitutes.

Mr. ROUSE. About how many?

Mr. SCULLY. Well, they haven't any that I know of. They have only men temporarily that they bring in.

Mr. ROUSE. Recall back three or four years, how many did you have on the list at that time?

Mr. SCULLY. It used to run in the neighborhood of a hundred substitutes.

Mr. ROUSE. Under your recommendation, you suggest that a substitute, after a year's service, be made a regular.

Mr. SCULLY. That's right.

Mr. ROUSE. Suppose you had 200 substitutes, how would you work it?

Mr. SCULLY. If I had my way, I would do away with this speed-up system, and not have the men break down from nervous strain the way they are doing. In vacation period they double up; put more territory on the older men. Instead of an older man being rewarded for his faithfulness to the service, it seems he is penalized. The older he gets in the service, it seems he is demoted. The custom is to demote him on account of loss of efficiency.

Mr. ROUSE. I just wanted to get your idea as to what you would do with these substitutes.

Mr. SCULLY. That's what I would do. Put them in the regular service after a year. When a man serves the regular time, he gets the position. As it is a substitute goes on call and can be on call for 24 hours and not get any credit for it.

Mr. ROUSE. Here is the situation; if you have 500 carriers and over 200 substitutes, and, after a year's time, you propose to make these 200 substitutes into regulars, what would you do with the 700 men you would then have?

Mr. SCULLY. You wouldn't have that many substitutes.

Senator STERLING. When you speak about a substitute being on call for 24 hours, what do you mean? That he has received notice and is subject to being put on duty for that 24 hours, or is he on actual work?

Mr. SCULLY. A man who is on call would go there in the morning and maybe there would be no work for him. He will stay around there, and will have to be there at noon. He would be on call any

time, at their disposition, and then they would send him, perhaps, to a station 5 or 6 miles off, and he don't receive any credit for the time he is traveling to that station.

The CHAIRMAN. What does he receive for the time he is on call?

Mr. SCULLY. Nothing.

The CHAIRMAN. He is on call and reports to the office?

Mr. SCULLY. He is supposed to report at 6 o'clock in the morning.

The CHAIRMAN. He reports at 6 o'clock in the morning and remains until 12, or 10, we will say——

Mr. SCULLY. He has to be around the neighborhood.

The CHAIRMAN. He has to be around there where they can reach him if they want him; and if they don't want him, he spends that time, say, from 6 to 12, and don't get any compensation?

Mr. SCULLY. That's the idea.

Senator STERLING. Must a substitute report every day?

Mr. SCULLY. Yes, sir. He is supposed to report every morning.

Senator GAY. Does a substitute get work every day, or are there days when he don't get any work at all?

Mr. SCULLY. They use to average about \$30 a month.

Senator GAY. Then there are days that go by that he is not called at all?

Mr. SCULLY. Yes, sir.

Senator MOSES. Or it might be that he would work only an hour or two a day?

Mr. SCULLY. Yes, sir.

The CHAIRMAN. He is paid by the hour?

Mr. SCULLY. Yes, sir; 40 cents an hour.

The CHAIRMAN. I think we understand that. Now, then, the next gentleman is Mr. Halberstadt.

STATEMENT OF MR. CHRIS. J. HALBERSTADT, PHILADELPHIA, PA.

Mr. HALBERSTADT. Mr. Chairman and gentlemen of the commission: Of course, quite a number of the questions I would like to dwell upon have already been taken up by the previous speakers. In representing the Philadelphia letter carriers, it is our intention to be as brief as we can.

There is one proposition I would like to call attention to, and that is that of the letter carriers being burdened with parcel post. The letter carrier in Philadelphia is obliged to take out all parcel post under four pounds. While one package of 4 pounds isn't much, still it is a fact that in the city of Philadelphia a carrier will carry 20 and 25 pounds and sometimes more, until they can hardly move the load. We feel that this is not a good condition for the carriers and is not good for the service. A man burdened with weight like that can not proceed with the speed necessary to give good, efficient service in the city.

Mr. MOON. What do you think of changing from mounted carriers to bicycles; would that be a means of saving expense?

Mr. HALBERSTADT. A mounted carrier in Philadelphia, at the present time, is obliged to take out all of the parcel post, and sometimes the work would be more than could be handled on a bicycle.

Mr. MOON. Do you think anything could be saved in changing from a horse to a bicycle, or some other means of carrying it?

Mr. HALBERSTADT. A bicycle wouldn't fit the situation at all.

The CHAIRMAN. How about those fellows that have a car on the side: what do you call them?

Mr. HALBERSTADT. Motor cycle? Those social affairs?

The CHAIRMAN. How would they do?

Mr. HALBERSTADT. I don't think they are large enough. They wouldn't do in Philadelphia.

The CHAIRMAN. They could carry as much as a man could carry on horseback, couldn't they?

Mr. HALBERSTADT. Oh, yes; but our mounted carriers are not on horseback. They call them mounted carriers, but they have a carriage, a little carriage or road cart.

The CHAIRMAN. Oh, well; if they have some sort of vehicle, that's different.

Mr. HALBERSTADT. Yes, they have a vehicle.

(Mr. Halberstadt submitted the following paper prepared by himself, Amos J. Eggleton, and Benedict C. Snyder:)

STATEMENT SUBMITTED BY MR. HALBERSTADT, ET AL, ON BEHALF OF THE LETTER CARRIERS OF PHILADELPHIA.

In representing the Philadelphia letter carriers, it is our intention to be as brief and concise as possible; we will endeavor to explain what we believe is for the best interests of the Postal Service as well as justice for the letter carriers.

We will first call attention to the substitute who comes into the service under the impression received from the newspaper advertisements that he will receive a minimum wage of \$1,000 per annum at once, but promptly learns that he will receive 40 cents per hour while assigned to actual duty, and must be subject to call at all times, without compensation. And he further learns that this period of substitution will last from three to five years before the minimum salary of \$1,000 is reached, and a further five years before the maximum salary is reached.

These conditions do not attract good men to the service, and those who get in without learning the conditions soon leave it. In Philadelphia for the year ended June 30, 1919, 59 substitutes were appointed and 53 resigned. The result of these conditions is that the class of men coming into the service is not of the same standard as years ago.

We believe a one-year probationary period at 60 cents per hour to be sufficient. Substitutes should then be eligible for appointment to the regular grade, which we feel should be \$1,800 for the first year, \$2,100 for the second year and \$2,400 as the maximum.

We are submitting facts and figures showing what it has cost the average letter carrier during the past year. This was obtained by striking an average from the itemized statements of 200 letter carriers taken at random from all parts of the city. In these statements carriers emphasize the extreme economy and self-denial that was necessary to keep within these figures, and right here we desire to call attention to the conspicuous fact that trolley conductors and motormen in Philadelphia received 23 cents per hour in 1910 and are now receiving 51 cents per hour.

We also desire to call attention to the mounted carriers who are allowed \$500 for horse hire, this sum being entirely inadequate to pay for the maintenance of the horse. No liveryman in the city will contract to furnish an outfit for less than \$1,000 per annum.

We are submitting statement of the average cost of maintenance where carrier takes care of his own outfit, and this does not allow for cost and upkeep, nor for service rendered, and we believe the mounted men should be allowed not less than \$700 per annum:

Caring for one horse and outfit.

	Per month.
Hay-----	\$6. 00
Straw-----	1. 50
Grain-----	20. 00
Blacksmithing and repairs-----	10. 00
Rent-----	7. 00
Veterinary and livery-----	3. 00
	<hr/> 47. 50

12 months, \$570.

In relation to the chauffeur carriers, we believe on account of the extra hazard of their position, they should be allowed an additional \$300 over the maximum salary allowed for carriers, and further they should be relieved of all responsibility in case of accident where it can not be clearly proven that there was contributory negligence.

We herewith submit for your consideration the average expenditures of a letter carrier in our city together with the necessities to which they were compelled to resort to maintain their families under existing conditions; and in all cases making sacrifices beyond what was healthful and therefore detracting from their efficiency in the postal service.

Average annual expense of Philadelphia letter carriers (average family of five).

Clothing-----	\$252
Fuel-----	109
Rent-----	300
Wear and tear of household necessities-----	114
Table-----	913
Insurance-----	78
Organization, church expenses, etc.-----	70
Doctor, medicine, car fare, and other expenses-----	100
	<hr/> 1, 936

We desire to call the attention of the commission to the following outstanding facts in relation to the carriers' endeavor to remain loyal to the Post Office Department, notwithstanding the opportunities that have been presented in other lines or occupations, and we might say 50 regular carriers have resigned since July 1, 1918.

Five per cent of the carriers of Philadelphia have withdrawn from their savings to the extent of about \$250, and the small percentage who have withdrawn their savings is due to the fact that most of the carriers have spent theirs in the three years previous to 1918, and this includes carriers who were purchasing their own homes on the installment plan and have been compelled to sacrifice them.

Forty-four per cent of the carriers have earned additional money doing other work outside the Postal Service. This in spite of the fact that it is contrary to the postal rules and regulations, and further it is detrimental to their health as well as detracting from their efficiency.

Thirty-four per cent of the carriers were compelled to have their wives earn additional money to help maintain their families, to the extent of an average of \$190 per year. This is not to the best interest of the home life nor the proper rearing of children.

Twenty-six per cent of the carriers have borrowed money to the extent of an average of \$225. This is one of the most serious conditions. No corporation or individual would tolerate their employees holding a position of trust and borrowing money to maintain their families, as this must, of necessity, lead to a very trying condition in the year to come when they not only have to maintain their family, but pay up their debts.

Thirty-two per cent of the carriers have taken their children from school to earn money to assist in maintaining the family, to the extent of an average of \$540 per year. This is one of the saddest features of the salary condition, and one of the most conspicuous points is the fact that no children of letter carriers have graduated from the high school in the past year. This, not because of the fact that the children of carriers are of inferior intelligence, but

on account of necessity of earning money to help their parents maintain their families, thereby depriving them of the right and privilege that is the duty of every American citizen to give to his children—a good education.

In the consideration of the question of salary for postal employees, we do not believe that the question of receipts and disbursements of the post office should be a deciding factor, believing that the postal employees should be worthy of their hire and should be paid for the work performed.

The postal expenses of the whole Government are a considerable item charged to the Post Office Department, and the question of postage on first and second class matter are ones that should have no bearing on the salary question.

If it is to the best interest of all the people to have a one, two, or three cent letter rate, this is a matter for Congress to decide and the whole people should bear the burden, and in the case of second-class matter, if it is to the best interest of the whole people for the enlightenment and education of the masses, then the whole people should bear this burden, and it should not be settled upon the shoulders of the postal employees to the extent of depriving them of the ordinary comforts of the American citizen and their children of a common-school education.

The CHAIRMAN. The next man on the program is Mr. W. C. Woods.

STATEMENT OF MR. W. C. WOODS, NEW CASTLE, PA.

Mr. Woods. Mr. Chairman and gentlemen of the commission: I am filing a brief, from which I will read.

I want to accompany this brief with three newspaper clippings—one signed by the postmaster, stating that substitutes are scarce, and another an advertisement for carpenters at \$1 an hour, and another with reference to the pay of the milkmen in Chicago.

In presenting this brief I will endeavor to confine myself to the more important points. First, the qualifications necessary to take a civil-service examination:

The applicants should be American citizens of good character and physical ability and have at least a good common school education. The applicants should take an open competitive examination, and an eligible register for appointments made up according to percentages, and appointments to the position of substitute be made in rotation and without favor to any one. Substitutes often have to remain on the list for years before receiving a regular appointment and therefore some provision should be made to pay them a regular stated salary in addition to what they can earn as a substitute.

Substitutes always have to find some other employment in order to live because what they receive from substituting would not pay their board, let alone buy any clothes. I will submit you an actual case from an office. The substitute is a barber by trade. He served two years before receiving a regular appointment. He was often called on to report in the afternoon for duty. He closed up his shop and doing so lost probably \$3 or \$4. He received 90 cents for his afternoon's work in the post office. How long do you think a sub could keep that up to-day? At the present the Post Office Department is having a hard time getting substitutes. Nobody wants the job at the price paid when he can earn from \$4 to \$10 per day at other work. The service is crippled to-day on this account. So if you wish to have the service kept up to standard, provide a salary that will make the position attractive.

During the last five years the cost of living has increased anywhere from 80 to 100 per cent. During that time the regular car-

riers have only received a temporary increase of 25 per cent since 1907. And right here let me say, I don't believe that there is a man in the service to-day, but what is not in debt as the result.

Mechanics and laborers are better paid to-day than trained employees in the Postal Service. Here are a few of them:

Carpenters, 85 cents per hour, at eight hours a day.

Painters, 81 cents per hour, at eight hours a day.

Plasterers, \$1 per hour, at eight hours a day.

Bricklayers, \$1 per hour, at eight hours a day.

Hod carriers, 75 cents per hour, at eight hours a day.

Plumbers, 90 cents per hour, at eight hours a day.

Sheet metal workers, 75 cents per hour, at eight hours a day.

Tire builders, 45 cents per hour to start and in two weeks' time are earning from \$6 to \$10 per eight hours.

Electricians, 87½ cents per hour, at eight hours a day.

Laborers in tin mills receive 49 cents per hour.

Tin workers received anywhere from \$6 to \$30 and \$40 per eight hours.

Boys, 18 years old earn \$4 and \$5 per 8 hours.

Policemen in tin mills receive \$166 per month.

Compare these wages with what we receive.

Now, you can see why the present salary schedule is too unattractive to hold efficient employees or to recruit new ones. Again we pay for the bare necessities of life out of our present salary and we are lucky if we are not in debt.

Where our monthly salary goes: Rent, \$30; groceries, \$45 to \$55; light bills, \$3 to \$4.50; water bills, \$1.50 to \$4; gas bills or coal, \$2 to \$4; insurance, \$5 to \$10; clothes, \$10 to \$50; shoes, \$6 to \$10; telephone, \$2; and you are lucky if you don't have a doctor's bill. What have you left for pleasure or to save for future years?

In view of the facts, it is suggested that the commission give earnest and serious consideration to the enactment of a reclassification law for letter carriers as follows: First grade, \$1,800; second grade, \$2,100; third grade, \$2,400; and that all promotions be made following the expiration of one year's service in the next lower grade. That substitute service be limited to a period not to exceed one year; that substitutes be paid at the rate of 80 cents per hour, and that substitutes be guaranteed earnings of not less than \$100 per month, and that the time served as substitute shall be reckoned as a factor when appointed to regular position.

(The newspaper clippings referred to are as follows:)

NO SUBSTITUTE CARRIERS IN CITY.

Examinations are being held to-day at the local post office for the positions of clerk and carrier. The number taking the examinations, however, is much smaller than usual.

Because of the small salary which is paid starting in for clerks and carriers in the post office, the number of persons taking the examinations for these positions is growing smaller with each examination date, and difficulty is being experienced in many cities in securing men for these positions.

"There is not a substitute available to-day," Postmaster Henry M. Good stated, "and we would be hard pressed, in case one of the regular carriers was taken sick, to get the mail delivered."

CARPENTERS SCARCE AT DOLLAR AN HOUR—CONTRACTOR ALBERT DAHL HAS TROUBLE IN GETTING HANDS TO PUT UP FORMS.

Albert Dahl, who has the contract for concreting the Ellwood-Wampum road, is experiencing trouble in getting carpenters to put up concrete forms according to County Commissioner R. M. Leslie, who visited the scene of operations yesterday. Dahl is offering \$1 an hour for rough carpenters, but it seems that even that price fails to bring the workmen.

Work of grading the road is progressing rapidly. Dahl has one steam shovel at work, and will put on another next week.

CHICAGO MILKMEN GET \$56 A WEEK AND UP; SOME RECEIVING \$80.

CHICAGO, October 7.

No need to speculate longer upon the widely discussed wage of the lordly milkman in Chicago. He receives \$56 a week.

Federal Judge Alschuler, acting as arbiter in the stockyards wage controversy, got the facts to-day when G. R. Fitchie, president of the Milk Wagon Drivers' Association, took the stand to testify in the labor hearing.

"Drivers in the city are working on an average wage now of \$35 a week," he declared, "and commissions bring the wage up to about \$56. Of course the men who drive the automobile trucks which deliver the large consignments to hotels, restaurants, manufacturers, and the like, can make more. Some of them make as high as \$80 a week."

STATEMENT OF MR. WILLIAM UTZ, WILLIAMSPORT, PA.

Mr. Utz. Mr. Chairman and honorable commission, we are not here asking for a salary increase as it is popularly understood; we are asking for salary restoration. In 1907 you considered \$1,200 a just and equitable wage and all we ask is to restore to the dollar the purchasing power it had in 1907.

The letter carriers of Williamsport have been loyal, and they are determined to stick to the ship, in the firm belief that Congress must quickly see the justice of their claims. The wages paid in the outside world are away above the wages paid to us. You, no doubt already have lots of figures and there is no use giving them again to you, but there is an ad running every day in our daily papers for construction work in the southern part of our city, advertising for laborers, and offering 65 to 75 cents an hour, with few takers.

We had to start in 1916 to cut out all amusements, and I guarantee that all of the fellows who have two to four children in their families have not spent \$10 for amusement in that time. As for vacations, in the last three years the majority of the fellows in the city of Williamsport have worked during their vacations. Three years ago I was compelled to work during my vacation. I was then drawing, as a letter carrier, 41 cents an hour. I obtained a position driving a truck, hauling lumber, and at the end of my time I received 50 cents an hour for a 10-hour day, as compared with the 41 cents for an 8-hour day that I received in the Postal Service. That gives you an idea of the conditions 3 years ago.

We are compelled to cut out most all reading matter. As you all know, a certain amount of the best reading matter is absolutely necessary to the well-being of a family. The average letter carrier and his family gets little reading matter at all except, possibly, the Ladies Home Journal, which is made to do for the whole family.

They are compelled to cut out metropolitan newspapers, because of the cost, and many of them are not able to pay the \$6 a year necessary for the local daily newspapers.

As our clothing wears out we are not able to replace it. It is not a case of having two or three sets of clothing for the children, but a question of having one good set. My children go to school with patched clothing and, unfortunately, they go in a section where the majority of the people have been getting high wages in their work, some of them have gone away and done war work for the Government and now they are coming back and buying automobiles; they have been getting from \$8 to \$14 a day in the shipyards and their children ridicule my children because they do not dress better: they are facing ridicule all the time owing to the fact that they are insufficiently clothed. We are not asking for expensive clothing; we are just asking for money to buy sufficient decent clothes so that the children will be presentable when they go to school.

As for myself, I have not been able to get a suit of clothes for five years, and my wife is compelled to have her clothes remade and relied until there is hardly anything left of them. That is the actual condition that exists among the fellows in my town.

After facing all these privations, we were still unable to meet our obligations. I made a canvass among the fellows who have families of from four to seven, and they told me that they didn't have meat more than three times a week and then only in a limited amount. It is necessary to buy food which affords the biggest bulk for the money regardless of nutriment. You all know the effect of undernourishment and lack of a properly balanced diet upon a family. You know that medical researches, in centers of population, have proven that most ailments of childhood are due to malnutrition. They will tell you that most of the children who are mentally or physically weak are afflicted because of undernourishment resulting in malnutrition.

Again, it was a case of borrowing money. The fellows borrowed all the money they could. I know eight fellows in our office who borrowed on their life insurance, mortgaging it to the hilt, which means, if they die, their families would have no protection whatsoever. I was a collector for a sick and accident company, and many of the fellows have been forced to drop that.

As to the tradesmen, it isn't a question of which one you are going to pay: it is a question of to which one you are going to give two or three dollars in order to stave him off until the next time. It is humiliating to have to do that, and even after doing that we found that the majority of the fellows were still up against it, and had to obtain extra employment on the outside. Some of the fellows worked in the rubber shops during the shortage of labor, some in the foundries, some in the street cars, and some of them did Y. M. C. A. work, as I am doing every night. They have worked from 5 until 11 every night for the last two years, going to work at 6 o'clock and working until 11, getting home about half past 11 and to bed about 12, again getting up the next morning only to have a repetition of the previous day.

You can readily see how that would undermine the life of the men and the effect it would have on his family life; it absolutely destroys

all family connections. In fact, gentlemen, my baby, 2 years old scarcely is acquainted with me. I am gone from home most of the time, and it is sleeping when I am there, and honestly, gentlemen when that baby was 8 months old, it was not acquainted with its father. Picture the effect that has upon the home life of a carrier the discipline of his children, having no time to talk with them or correct them. Picture the effect that is going to have upon their after life.

All of us, as I have said, worked during our vacations. Now then, some carriers' wives were also compelled to work; two of them worked in factories, and several of them sewed. A few of them did washing for others, and some of them were compelled to take in boarders, thus sacrificing entirely the sanctity of home life.

The CHAIRMAN. Your statements are very interesting, but I must warn you that your time is short.

Mr. Utz. A particular point I wish to bring out is the lack of medical attention. We all know that dental and medical attention are all important to child life, and we have been unable to give our children the dental and medical attention they need. My children and several of my fellow carriers' children have adenoids and tonsils that should have been removed, and we are unable to get that done. Their teeth are greatly in need of attention, as they now are reaching the vital period of life, when all surplus energy is needed.

I want to impress upon the commission that we stuck to the ship during the war, because we believed that an efficient postal service was necessary and would help to carry on the business of the war. We felt that we would be deserting the fellows in the trenches if we did not stick and back them up. It was very hard for us, earning the minimum salary, and seeing others making the large wages; but we felt, as we do now, that your commission would see that we were taken care of properly.

Now, a word for the substitutes; we have five substitutes in our city. They have been subbing for a period of three to five years. The condition of these fellows is deplorable. They averaged about \$60 a month during the last year and four of them are married. They have been compelled to try and keep their families on that \$60 a month, being subject to call during the period from 6 o'clock in the morning until 4 in the evening; they have now reached the stage where they must either resign or have some relief.

We must also replace our house furnishings. Many of the floors are bare, the rugs having long ago worn through, a fact that I know from my collecting visits, and we certainly hope that this commission will see fit to grant us a salary thoroughly adequate to purchase as much as it did in 1907; and I hold that it should be \$1,800, \$2,100, and \$2,400, and that the substitutes should receive a fixed salary after one year of substitution and put on as a regular carrier but not allotted to a regular route. I thank you.

The CHAIRMAN. How long have you been a carrier?

Mr. Utz. I have been a carrier in the city of Williamsport for eight years.

The CHAIRMAN. What is your salary now; your yearly compensation?

Mr. Utz. \$1,500, including bonus.

Senator BANKHEAD. What do you think fair compensation would be under the conditions that prevail? What do you think you ought to be allowed?

Mr. Utz. Under the present prevailing conditions and the prevailing prices, I think a fair compensation to meet the American standard of living for a family of my size would be about \$2,300 or \$2,400.

The CHAIRMAN. That is an increase of \$800 or \$900 a year?

Mr. Utz. It is.

The CHAIRMAN. That's all; that is what I wanted to get your idea on.

(Mr. Utz submitted the following brief:)

The letter carriers of the city of Williamsport, Pa., herewith beg to submit facts and figures for the information and consideration of your honorable commission in connection with the reclassification and readjustment of salaries in the Postal Service.

The public demands an efficient Postal Service, as the Postal Service, above all other Government institutions, directly affects the welfare, comfort, and progress of every citizen of the United States. We can not have efficiency with an underpaid, overworked, and dissatisfied force of employees.

The efficiency of the service has been impaired by the resignations of a large percentage of letter carriers. To fill these vacancies the department has been compelled to lower the requirements, and in many cases entirely eliminate the examinations, with the result that inefficient men have been added to the service.

In order to maintain an efficient carrier force it will be necessary to increase the compensation of said force, making it equal to or above that paid workers in the industrial and commercial world.

Before the emergency, applicants for the position of letter carrier were compelled to pass difficult competitive examinations. They also were required to produce a physician's certificate showing them to be in excellent physical condition. They must be men of high moral character and temperament.

They are required to be courteous and polite in all business transactions, regardless of existing circumstances. Personal injury is a constant menace due to heavy loads carried on crowded thoroughfares. They are exposed to all climatic conditions, which lowers the power of resistance, and often they are required to work all day in wet clothes which makes them susceptible to diseases resultant from such exposure. They must memorize all removals and additions to their route and keep a directory of the same.

We are compelled to deny ourselves and families all except the bare necessities of life. The family has been denied the proper nourishment and well balanced diet that is necessary to preserve health. They also have been denied the proper medical and dental work that should have been done to keep them mentally and physically fit. We cite, as proof of the foregoing, the statement of United States medical examiners who say that the surprisingly low percentage of men physically fit for service in the Army was due principally to malnutrition, defective teeth, defective vision, adenoids, and diseased tonsils.

We have been unable to clothe our children properly, thus subjecting them to the ridicule of their schoolmates. We have not been able to make any replacements in the house or any repairs on our property in the last three years, and have been compelled to borrow money or undermine our health and efficiency by seeking extra employment during the night.

Many carriers have been forced to remove their children from school, or as an alternate, make them work after school thus lessening their efficiency as students. Our wives were compelled to be seamstresses and laundresses in addition to doing their household work, because of insufficient funds to hire such things done.

We are now against the peculiar situation of having to make replacements in our homes and clothing that we were unable to make and are still unable to make under existing circumstances.

We were loyal and self-sacrificing during the war, buying Government bonds, with borrowed money, cheerfully selling War Savings Stamps, Liberty bonds, and aiding the Red Cross and other like causes. While we had a steady in-

crease in the amount of mail handled we had no increase to the carrier for. At the same time all other lines of occupation, including the railroad employees temporarily under Government control, had their salaries readjusted several times to meet the increased cost of living.

We received no increase between the years 1907 and 1918, with the exception of the automatic increase, and since then only 24 per cent. Industrial and commercial workers in the city of Williamsport, Pa., have received an average increase of 76 per cent. The cost of living has advanced 140 per cent and the living expenses for a family of four in our city is \$2,265 a year.

In accordance with the above facts, we request a reclassification of salaries for letter carriers covering three grades, namely, \$1,800, \$2,100, and \$2,400 a year, promotions to be made annually after one year of satisfactory service.

That substitute service be limited to a period not to exceed one year; that substitutes be paid at the rate of 80 cents an hour; that substitutes be guaranteed earnings of not less than \$100 per month; and that the time served as substitute shall be reckoned as a factor in regulating the initial salary when appointed regular.

In proof of the foregoing, we cite the fact that after three years of apprenticeship in most occupations in civil life the man becomes a journeyman with full salary in his craft. Under present conditions it requires 10 years for the average letter carrier to attain the maximum salary, during which time the average yearly wage is \$924.

STATEMENT OF MR. BENJ. F. METZ, PITTSBURGH, PA.

Mr. METZ. Mr. Chairman and gentlemen of the commission, when I was advised I was to appear before your honorable commission to urge an increase in the salaries of all postal employees I wanted to be convinced beyond all doubt that our claim for an increase in salary was meritorious. I therefore made a thorough investigation and obtained many convincing facts, which I will submit to you in brief form. I base these facts on data I received from 53 towns in western Pennsylvania. I found the substitute received an average of \$30.32 a month while employed as a substitute; I found the postal employee who had been in the service longer than five years had received an average of \$75 a month since he has been in the employ of the Government of the United States as a postal employee including substitute service.

I found that 11 of the most essential necessities that must be had by the average family cost the family of the postal employee \$1,593.96. These figures were derived from questionnaires submitted by 1,380 families.

Further figures from these questionnaires showed that these men were in debt to the total of \$346,755, and that 420 of the wives of these men had earned in the last fiscal year \$112,435. We find that 175 men report their saving of \$23,290. By adding the debt of 1,000 men and that earned by the wives of 420 of them, we get a total of \$459,190 above salaries paid by the Postal Service. Deducting the savings of the 175 men, which is \$23,930, we found that they expended \$435,260 during the fiscal year of 1918-19, which amount divided among 1,380 families, will give an expenditure for each family of \$315.40 that has not been paid or that their wives have earned, but that has been spent to maintain the family. By adding the actual expenditure of the 11 specified essentials to the amount of the average debt of each family, we get the total cost of maintenance of the average family for the fiscal year of 1918-19, or \$1,909.30, which figure does not mention the money employees have earned outside of working hours.

I tell you, gentlemen, the present conditions existing on account of the salary paid to postal employees is causing you thousands of resignations yearly. Pittsburgh is the biggest office in western Pennsylvania, and its records show at the end of 1918 1,040 resignations from the service, and for the first seven months of this year, even after the war is over, there are 997 separations from the service.

The CHAIRMAN. You mean that for the city of Pittsburgh alone?

Mr. METZ. Yes, sir. The Pittsburgh post-office pay roll numbers about 1,400 employees.

Senator MOSES. Out of a total force of 1,400 you have had all those separations from the service?

Mr. METZ. Yes, sir. In 19 months that would total 2,037 separations. There is a very sad feature, about the saddest feature I found in the investigation made, and that is: Out of the 1,380 families 210 children were withdrawn from school, their education stopped. They were denied the privilege of receiving an education to compete in future life with the children of the men engaged in industrial lines who receive a salary that permits their children to receive an education to take care of themselves in future life. That is not only a detriment to the children of the postal employees, but it has a reactionary effect upon the entire citizenship and future of the country.

The CHAIRMAN. Why were they deprived of school privileges? Because they couldn't clothe the children? They had the free schools, did they not?

Mr. METZ. These men had large families and they were not able to earn any more than was allowed by the Government. Their wives couldn't work, and as soon as the children reached the necessary age required by law they withdrew them from school, denying them the right and privilege of going to high school or finish grammar school and put them to work.

The CHAIRMAN. What do you mean by reaching the required age?

Mr. METZ. In Pennsylvania a child can not go to work until he is 14 years of age.

The CHAIRMAN. When he has reached that age, then, he is put to some gainful pursuit?

Mr. METZ. Yes, sir. That is what was done with these 210 children, so they could help feed and clothe the family, on account of low postal wages and high living costs.

The CHAIRMAN. To help support the family?

Mr. METZ. Yes, sir. I would also call attention to the rents. I might say that people are daily stopping the postmen on the street and offering them \$25 or \$50 reward if they get them a house. Many people live in furnished rooms, being unable to get a house; rents are sky high. In one particular case that I know of a man lived in the cellar of his house and rented the upstairs of the house out to make both ends meet. In many cases they live in an undesirable section. You know what it is to bring children up in an undesirable district, an ex-red-light district.

The CHAIRMAN. You don't have any red-light district in Pittsburgh now?

Mr. METZ. We have rough districts in Pittsburgh. An ex-red-light district has its name and for many years these districts hold the aftermath.

The CHAIRMAN. I thought you had broken them up and scattered them; that's what they have done in Washington.

Mr. METZ. One man testified that his family had lived in a tent the greater part of the winter. Gentlemen, I asked a friend of mine who is identified with a large Pittsburgh bank what he would do if he wanted a new employee, and he said the first thing he would do would be to seek a man of reference; he would want to know whether the man had the ability, whether he was made of the proper material to become an important part of the institution even though he was engaging him in a small position. Gentlemen, when we compare that with the present practice in the Postal Service you will find that they have reduced the standard of admission to the Postal Service, and to-day they are getting a class of men who cannot produce efficient service, and as a result of that every efficient man who has been in the service for any time must bear the burden. I have been in the service 12 years and know whereof I speak. We are not getting the standard type of men in the service to-day, and we are not getting men who in future years you can ask to manage the Post Office Department, men who will be the future supervising officials. You can not get these men when you take into consideration what the Government has to offer compared with the industrial world.

The CHAIRMAN. How long have you been in the service?

Mr. METZ. Twelve years.

The CHAIRMAN. What was your salary in 1914?

Mr. METZ. Last year?

The CHAIRMAN. No; in 1914? Before the war began.

Mr. METZ. Twelve hundred dollars.

The CHAIRMAN. How much is it now?

Mr. METZ. Fifteen hundred dollars at the present date.

The CHAIRMAN. When you were getting \$1,200 salary you purchased about twice what you can purchase now?

Mr. METZ. I wouldn't say twice as much, but almost that much.

The CHAIRMAN. Now, your idea, and the idea of the other gentlemen, is that the increase ought to be sufficient to equalize the purchasing power of the dollar between that time and this?

Mr. METZ. I consider also that we must look forward to laying something by for a rainy day—for sickness and death and old age.

The CHAIRMAN. I am not going into that; I am trying to get what you are trying to fix as a fair compensation for your service under the conditions that exist. That is what I think the commission would like to know.

Mr. METZ. In my position as a letter carrier I think \$1,800 minimum, a second grade with \$2,100, and a \$2,400 grade as a maximum is what we should have. I believe I have exceeded my time. I will submit a brief. I thank you.

(Mr. Metz filed the following brief:)

BRIEF SUBMITTED BY MR. METZ.

The United States Postal Employees' Association of Western Pennsylvania composed of supervisory officials, letter carriers, city post-office clerks, railway mail clerks, rural free-delivery carriers, and laborers, respectfully submit the following brief, which we believe will furnish your honorable commission with valuable information to assist you in making the proper recommendations to the Congress.

of the United States, with the purpose in view of placing the salaries of the postal employees on a par with those in the industrial world that are at the present time being paid 40 to 120 per cent higher rate and require in many cases less intelligence than that required of the postal employees by the Government, a list of which is herewith submitted:

Coal miners, carpenters, electricians, mill laborers, plumbers, street-car conductors, railroad car inspectors, Pullman conductors, railroad baggagemen, railway brakemen, painters, riveters, city firemen, hod carriers, bricklayers, shipping clerks, janitors, garbage-wagon drivers, ditch diggers, policemen, molders, paper hangers, machinists, puddler's helpers, wire pullers, blowers, flat-ironers, stonemasons, stonecutters, butchers, heaters, glass blowers, factory workers, tile layers, broom makers, chauffeurs, plasterers, structural ironworkers, bread-wagon drivers, milk-wagon drivers, laundry drivers, shearers, milk-keepers, street repairmen, glassworkers, spring makers, window cleaners, teamsters, truck drivers, shoe repairers, lathers, furniture packers, railroad clerks, ice handlers, steam fitters, mine workers, cigar workers, trunk makers, cable drivers, sawyers, stenographers, railroad-shop laborers, typists, tea and coffee wagon salesmen, pick-and-shovel men, saw-and-hatchet men, blacksmith's helpers, grocery clerks, insurance collectors, galvanizers, boiler inspectors, and painters.

Salaries of the above-named positions range from \$4.50 to \$20 per day.

No doubt your honorable commission has had a variety of reasons advanced by the whys and wherefores of the high cost of living, therefore we will not dwell upon that phase of the salary question other than to remind your honorable commission that the prices have been on a steady rise since the enactment of the salary law of 1907. A list of the following chief essential commodities and their comparative prices in 1907 and 1919, here submitted, will be sufficient to make the comparison on that phase of the increased cost of living:

	October, 1907.	October, 1919.
Butter-----pound--	\$0. 35	\$0. 66
Eggs-----dozen--	. 35	. 75
Cheese-----pound--	. 16	. 55
Flour-----49-pound sack--	1. 95	5. 00
Sugar-----pound--	. 06	. 11
Coffee-----do-----	. 20	. 60
Peas-----bushel--	1. 00	2. 40
Beans-----quart--	. 05	. 16
Wheat-----pound--	. 60	1. 80

We would further ask your honorable commission to carefully study the following information relative to the average substitute service of the various classes of post-office employees of the great industrial district of western Pennsylvania, and relative to the starvation wage that is paid them on an average while serving this apprenticeship, and subject to call for duty at all hours of the day and night, and also the average wage paid them since their connection with the Postal Service, proving conclusively that it is an impossibility to save a mere pittance from one's salary for sickness, death, old age, or any other emergency. This average is attained from 1,722 questionnaires of postal employees over five years in the service:

Railway mail clerks, average substitute service, 1 year 3 months.

City post-office clerks, average substitute service, 1 year 1 month.

City letter carriers, average substitute service, 2 years 9 months.

City clerks, average pay as substitute, \$32.76 per month.

City carriers, average pay as substitute, \$30.17 per month.

Railway mail clerks, average monthly salary since appointment, \$86.66 per month.

City post-office clerks, average monthly salary since appointment, \$75.46 per month.

City letter carriers, average monthly salary since appointment, \$76.50 per month.

That your honorable commission might realize what some of the expenditures necessary to be made from the pay envelope of a married postal employee are, we have prepared the following table that itemizes the expenditures of the average family of the 11 most essential necessities, which figures are

derived from 1,380 questionnaires submitted by postal employees who are supporting families:

Clothing -----	\$18
Doctor and medicine -----	8
Food -----	70
Insurance -----	7
Education of children -----	5
Light and heat -----	6
Car fare -----	4
Rent -----	30
Shoes -----	4
Recreation -----	3
Taxes -----	1
Total (annual average per family) -----	1,59

Further statistics from the 1,380 questionnaires of men supporting families show that 1,055 of these men are in debt \$346,755. Four hundred and two of these men declare their wives assisted them in the support of their families by earning \$112,435 in doing other than their household duties. One hundred and seventy-five men report their saving of \$23,930. By adding the debt of 1,055 men, and that amount earned by 420 of their wives, we get a total of \$459,190 above salaries paid by the Postal Service. Deducting the savings of the 175 men, which is \$23,930, we found that they expended \$435,260, which amount, divided among 1,380 families submitting questionnaires, "from which these figures are taken," we found each family expended \$315.40 that has not been paid or that their wives have earned. By adding the actual expenditure of \$1,593.96 on the 11 essentials to the average debt of each family of \$315.40 we get the total cost of maintenance of the average family for the fiscal year of 1918-19, or \$1,909.30. It might be well to call the attention of your honorable commission to the fact that this provides for no luxuries, for no article of furniture, charity, etc., which are properly due the families of men holding responsible Government positions and entitled to live on a par with those engaged in the industrial world.

We would further call your attention to the fact that the greatest hardship born out of low salaried employees is shown by the 1,380 families who have been forced them to withdraw 210 children from school, their education stopped for the purpose of assisting to maintain a family that the Government should assist rather than they. This not only has a direct effect on the child's future life but is injurious to the citizenship of this Nation.

There are many other convincing facts that might be enumerated for the information of your commission to convince them of the many sad features connected with poorly paid postal employees but this association does not believe it necessary to submit them at this time, however, it must be taken into consideration when Government employees are forced to send their wives to work to assist in maintaining the family and when these postal employees themselves do such things as working in chain mills, hauling coal, selling insurance, hanging paper, doing janitor work, cleaning windows, etc., after working hours that unbearable conditions must exist. It has come to our attention that postal employees have bought shoes for their children from the Salvation Army, have lived in the cellars of their homes in order to rent the upper part of their house for a few dollars, to live in a disreputable district and rear their children among undesirables, to drop insurance, and to live in a tent through extremely cold weather, and have done other things that this Government surely does not expect their employees to do to exist.

When we are brought to realize that the above enumerated conditions actually exist among employees in the postal service it is not hard to realize why there are thousands of resignations annually in this great industrial center of the United States. We say thousands annually because in the year of 1918 we found 1,040 resignations from the post office at Pittsburgh, alone, the largest office in western Pennsylvania. We further find that the same office shows 997 resignations for the first seven months of 1919 even though the war is over and base our proof that the present wage paid by the Government is insufficient at the present time by the fact that there are names on the eligible roster of that office and that 125 vacancies exist in the Pittsburgh post office at the present date.

We pray that your honorable commission will give this brief the most sincere consideration and to answer our prayer for a substantial increase to place us on a par with the industrial world and aid us to maintain a proper standing in our communities as employees of the Government of the United States. We assure you this is necessary to save this great governmental machine and maintain an efficient postal service.

For your further information we wish to inform you that the above information was obtained from 1,981 questionnaires from the following towns in western Pennsylvania:

Pittsburgh, McKeesport, Beaver Falls, Erie, Clarion, Turtle Creek, Monessen, Monongahela, Bradford, Munhall, Canonsburg, Swissvale, Bellevue, Rankin, Pottsville, Ridgway, New Brighton, Butler, Oil City, Somerset, New Kensington, Reynoldsville, East Pittsburgh, Jeannette, Allison Park, Crafton, Millvale, Wilmerding, Coraopolis, Springdale, Uniontown, Sewickley, Sharon, Kittanning, Indiana, Meadville, Blairsville, Sharpsburg, Monaca, Etna, Waynesburg, Vandergrift, Evans City, Brackenridge, Homestead, Carnegie, Stoystown, Clearfield, Ben Avon, Avalon, Emsworth, Aspinwall, and Wilkinsburg.

STATEMENT OF MR. WALTER L. WILLIS, WILMINGTON, DEL.

Mr. WILLIS. Mr. Chairman and gentlemen, I want to assert on the start that I do not think \$2,400 would be too much pay for a postman at this time. The reason I say that is because the prices we have to pay for food and wearing apparel have increased 100 per cent. In 1913 I could buy an all-wool garment of underwear for \$1.50. Now, the price of these articles to-day is listed at \$6. Take the Sears-Roebuck catalogue and an 80 per cent wool garment is listed at \$4.50; so that, I think, we are making no extravagant claims.

Senator MOSES. You mean you have to pay \$9 for that which you paid \$3 in 1913?

Mr. WILLIS. No; \$12 per suit. An all-wool garment in the Philadelphia stores to-day is listed at \$6. The Sears-Roebuck 80 per cent woolen garment is \$4.50. They are good, reliable distributors of general merchandise.

I want to say that I do not believe in any grading system. I think a man who is able to do his work efficiently after having served as a substitute should have full pay right at the start. Take my own case: When I became a regular carrier I had memorized 45 routes, and I consider that I was more efficient in every way than a regular carrier.

Senator MOSES. If you do that, then the substitute would be eligible for the second grade as soon as he had finished his apprenticeship?

Mr. WILLIS. Yes. Our claim is for a hundred dollars a month for the substitute. Substitutes in the street railway service—those who, in their vernacular, are "bucking the list" receive a guaranty of \$22.50 a week.

Senator MOSES. You mean you would have no promotions within the service?

Mr. WILLIS. No, sir; I would give him \$2,400 at the start. I think he is a more efficient carrier than he ever will be again. Suppose there is a name of an unknown party called out—we have a lot of misdirected mail that is traced by this method—and an experienced substitute will be more likely to know the correct address than the older regular carriers. The claim for a hundred dollars a month is not extravagant; the substitutes in the street railway service are guaranteed twenty-two fifty a week.

Senator MOSES. Of course, you have an abnormal situation in Wilmington.

Mr. WILLIS. That is true; but in rating the wages of the post employees the claim has always been made by the Postal Department that the carrier is paid about the same average wages as the craftsmen in other trades. In Wilmington we have morocco workers, mostly pieceworkers, some of them—stakers, glazers, and assorters—of no greater average intelligence than the postal men, who receive as high as a dollar and a quarter an hour. You have also heard of wages in the building trades, etc., and the high rates they are receiving, but there are stakers, glazers, and assorters in the leather industry receiving far greater pay, and the men who help the head tanner in the cellar receive about \$35 a week. The same rate has prevailed during this present war and carriers have received only a 25 per cent bonus during the same period.

Senator MOSES. Haven't the wages of these men in the tanning industry been increased?

Mr. WILLIS. Oh, yes; they have been doubled, and prices I realize have kept two or three jumps ahead of wage increases, but at the same time——

Senator MOSES (interposing). You say their wages are relatively higher than they were before the war?

Mr. WILLIS. No; not as a whole. I can take the Du Pont Co. and the American Hard Fibre Co. Those corporations pay their clerical help on an average of \$125 a month. They established a mailing division in the Du Pont office building where they formerly had office boys serve the mail, but they took a man out of the post office at Wilmington, Del., to establish an efficient system, and we have had men resign from their places in the Post Office Department to take positions with them. We had a man named Charlie Houck who resigned and is getting \$1,600 a year; another clerk is getting \$1,200 for the very same grade of work they performed in the post office. And the Du Pont people aren't more liberal than any other corporation. They don't pay any more than they have to. Here is a clipping I want to read:

DU PONT'S BOOST WAGES—AVERAGE INCREASE FOR SALARIED EMPLOYEES OF 15 PER CENT EFFECTIVE OCTOBER 1.

E. I. du Pont de Nemours & Co. will next month increase the payments to all salaried employees who are now receiving cash bonus and who were on the company's rolls prior to July 1, 1919. The present base salary rate and cash bonus paid to such employees will be combined and will form a new base or regular salary. A new temporary cash bonus, to be known as "extra salary" will be put into effect and will consist of 20 per cent on the first hundred dollars, 10 per cent on the second hundred dollars, 10 per cent on the third hundred dollars, and 5 per cent on the fourth hundred dollars on all salaries where the cash bonus now applies.

The average increase amounts to about 15 per cent. The increase is largest among lowest salaried employees and gradually diminishes as the salary increases.

The increases arranged for are given to meet the increased cost of living.

Mr. STEENERSON. You claim that this is in the nature of skilled labor?

Mr. WILLIS. Oh, yes. It puts a man's memorizing faculties to a cruel test at times.

Mr. STEENERSON. How long does it take before a man can become efficient?

Mr. WILLIS. Oh, a year's time. I should say that the average man can do it in a year.

Mr. STEENERSON. You think a year is sufficient?

Mr. WILLIS. Yes; I think a year is long enough.

Mr. STEENERSON. How long an apprenticeship does it require in these lines of skilled labor in the factories?

Mr. WILLIS. Take the morrocco trade; that is mostly machine work. They can learn that in six months' time.

Mr. STEENERSON. You think the apprenticeship in those lines of skilled labor is about six months?

Mr. WILLIS. About.

Mr. STEENERSON. They get full compensation at the end of six months?

Mr. WILLIS. Maybe before; it depends on how much they turn out.

Mr. STEENERSON. It is piecework?

Mr. WILLIS. Yes; and the morrocco industry is a great one there. The leather industry of the city of Wilmington turns out about 10,000 dozen skins a day, and employs a great body of craftsmen.

Mr. STEENERSON. That is the reason you think the man should get \$2.400 as soon as he gets to be a carrier? The apprenticeship consists of his substitution period.

Mr. WILLIS. That is my view of the matter.

STATEMENT OF MR. W. H. R. WOODROW, BALTIMORE, MD.

Mr. WOODROW. Gentlemen of the commission, we will file a brief covering all the phases of this situation as we see it, and I presume this commission not only desires to know conditions as they exist, but I also believe that this commission desires to do something to make the service attractive, so attractive that it will draw men who will be the proper kind of men to conduct post-office affairs. I notice you have taken particular interest in the substitutes. I would like to call attention to the substitute life as lived in our city. I will have to refer to the notes on this, as the substitutes have reported to me, and after investigation I have decided they are the facts in the case.

Substitutes are required to learn how the various delivery districts are worked by the regular carrier, particularly the business districts, so that when he is assigned to work one he may be able to do the work in the same time as it takes the regular carrier.

He must familiarize himself with the work of cart, foot, and automobile collectors—nearly all substitutes are now required to learn how to drive automobiles—parcel-post collection and delivery, and the routing of mail for business districts by what are known as "night routers." In addition to this he is assigned to day or night delivery of special letters and other matter.

Your attention is called to certain obnoxious features connected with the night delivery of special mail. The departmental regulations provide for the delivery of specials between the hours of 7 a. m. and 11 p. m. Despite this regulation, substitutes making the last delivery of specials at night are required to deliver same regardless of the time. It has been a frequent occurrence for them

to awaken patrons as late as 2 o'clock in the morning and in many cases being roundly scored for doing so.

As these "outs" cover from 5 to 7 miles, and no cognizance is taken of where a substitute may live, it very often happens that he finishes several miles from home, and as he is required to report at 6.30 in the morning it is readily seen that he gets very little sleep.

As before stated, substitutes are required to report at 6.30 a. m. for assignment if needed. When assigned to work at one of the stations he must pay car fare, and his time does not begin until he "rings in" at the station. It appears that the Post Office Department is almost alone in this practice, as in private industry it is the general rule to allow car fare and to commence time at the moment of assignment, when the employee is sent away from the main office.

Should the substitute receive no assignment he must remain in the swing room, subject to call. Often he is not called for work during the day; sometimes he may get two hours' work; sometimes he may be assigned to a night cart.

He is liable to be called out of bed after midnight, to take the place of a "night router."

At the present rate of 40 cents per hour, it is impossible for substitutes to meet their obligations and live decently, and as most of them are married and have families they must either incur debt or secure better-paying positions elsewhere.

The low rate of pay for substitutes is the reason for so many leaving the service. From August 1, 1914, to October 2, 1919, there has been 75 resignations of substitutes, which does not include those who did not take the trouble to resign and only appear upon the records as "dismissed."

Senator MOSES. What do you mean by that; that they just left their jobs?

Mr. WOODROW. They failed to report and were marked "dismissed."

Many of the things I have in my brief have been covered by the previous speakers. I have listened to the statements of Brother Metcalf as to the increased cost of living, and his statements are practically in accordance with ours. We have prepared a budget covering all the necessities of life which we can have and those which we should have, page 6, brief. We find that for those necessities which our present salary will not permit us to have we have to go in debt or draw on some moneys we have saved in the last 20 years, or we have had to do without these things.

We find we are three dollars and fifty cents a month short on the necessities of life, according to the first part of this budget; and we find that we should have about two hundred dollars a month, according to second part of budget, and urge favorable consideration for the eighteen hundred dollar minimum, twenty-one hundred dollars for the next grade, and twenty-four hundred dollar maximum salary. We also would urge eighty cents an hour for the substitutes and substitutes to be made regulars after a period not exceeding one year, and that the substitute time be counted on the regular period. For instance, if a sub had subbed one year before being made a reg.

ular, he would be put in the twenty-one hundred dollar grade, and so on.

Senator MOSES. That would tend toward the elimination of the eighteen hundred dollar grade that way, wouldn't it?

Mr. WOODROW. It would; yes, sir.

Senator MOSES. That would then be merely a paper grade?

Mr. WOODROW. I believe that if a man has substituted one year in this service he is efficient. I think that this idea of requiring a man to serve a long apprenticeship as a substitute and then starting him in at the bottom of the grade is wrong. I think that is not in accordance with a proper view of the situation. If a man will ever be efficient, he will be efficient after he has subbed one or two years.

Senator MOSES. Then why bother about the eighteen hundred dollar grade? Why do you suggest it?

Mr. WOODROW. We have suggested that in a national way, because it has been the custom to start men at these lower salaries and work them up over five or six years. We believe this is not the proper form, but we can not, just at the moment, get away from that. It is within the power of the commission to make a recommendation. I believe if a man is not efficient after he has been a substitute for a couple of years, that he will not be in the service very long before he will start to become inefficient.

Mr. STEENERSON. You spoke of special-delivery mail being worked by substitutes.

Mr. WOODROW. Yes, sir.

Mr. STEENERSON. Do they make special deliveries?

Mr. WOODROW. They do in our office.

Mr. STEENERSON. I thought that was done by contract.

Mr. WOODROW. We have about thirty-five boys who work in conjunction with the substitutes. We have two crews. The substitutes are assigned, so many in the morning, to assist in carrying special-delivery mail, and they have so many assigned on night specials.

Mr. STEENERSON. The special delivery of letters?

Mr. WOODROW. Yes, sir.

Mr. STEENERSON. Well, does your office require them to go out all hours of the night?

Mr. WOODROW. It requires them to report something like 3 o'clock in the afternoon for the night specials, to work up until 11 o'clock. They get all the mail that comes in up to 11 o'clock, and sometimes they do not finish until after midnight.

Mr. STEENERSON. In some cities they told us that this work of delivering special deliveries was let out on contract.

The CHAIRMAN. Don't they pay each one of those boys who deliver special-delivery letters so much a letter?

Mr. WOODROW. They do; yes, sir.

Mr. STEENERSON. They aren't paid by the hour, then?

Mr. WOODROW. No; not by the hour.

Mr. STEENERSON. Neither the boys or the substitutes?

Mr. WOODROW. No, sir; they are paid so much a letter.

Mr. STEENERSON. Well, their compensation, then, may be a great deal more than 40 cents an hour?

Mr. WOODROW. Their compensation might be, but the report from the substitutes is that they don't average more than \$50 a month.

Mr. STEENERSON. I think in Boston, they told us that some of these men doing special-delivery work were making as high as \$300 a month. They got so much a letter.

Mr. WOODROW. We have one man in our office who carries out special-delivery packages by automobile. He makes over \$50 a month; probably \$150, but that is only one man.

Mr. STEENERSON. Are you sure he don't make more than that?

Mr. WOODROW. He might have made more; I am not sure about that.

Mr. STEENERSON. That is a matter of contract with the post-office authorities. Your city is Philadelphia?

Mr. WOODROW. Baltimore.

Mr. STEENERSON. It is a matter of contract; to be delivered at so much.

Mr. WOODROW. No; the substitute is simply assigned to deliver these special-delivery packages, and he has an automobile to do that.

Mr. STEENERSON. And he gets special-delivery compensation?

Mr. WOODROW. Eight cents.

Mr. STEENERSON. And if he delivers a hundred packages he gets \$8, and if he delivers a thousand packages he gets \$80.

Mr. WOODROW. But he is not under contract. He is simply assigned to do that work, at the same rate that any number of other men get to do it.

Mr. STEENERSON. He is not paid by the hour, but by the piece?

Mr. WOODROW. Yes; but that is only one man.

Mr. STEENERSON. Have you got the figures as to what these special-delivery workers earn?

Mr. WOODROW. I have not; only that the substitutes as a whole make about \$50 a month.

Mr. STEENERSON. Our information has been that those who do that special-delivery work are well paid.

Mr. WOODROW. My information, in my city, is that they make an average of about \$50 a month. You can't call that well paid.

Mr. STEENERSON. Our information has been that it is very much more than that.

Mr. WOODROW. I thank you very much, gentlemen.

(Mr. Woodrow filed the following brief:)

The undersigned have been instructed to appear before you and present facts and arguments that would convince you of the necessity of recommending an increase of salary for letter carriers, sufficient to maintain themselves and families on a higher plan than a mere animal existence, and in a manner befitting an American citizen in the service of the greatest Government in the world.

The undersigned were further instructed to prepare a brief, setting forth such facts, data, and arguments as would, in our judgment, prove the validity of our claim for an adequate increase in compensation.

In order to become a letter carrier, the applicant must fill out a form showing that he fulfills certain requirements; he must submit recommendations from prominent citizens relative to his character and ability, and undergo a rigid physical examination.

The applicant then takes the civil service examination. If successful, his name is placed on the eligible register according to the percentage he obtains. As appointments are made in rotation from the eligible register, he waits until his name is reached, when he is appointed as a substitute.

As a substitute he receives 40 cents per hour for such time as he may actually

be employed. While the period of time during which he serves as substitute is indefinite. It generally averages about four years. During this time his earnings are very uncertain; if he averages \$50 a month he can call himself fortunate.

When the time comes for him to be made a regular carrier, he is required to start in at the lowest grade salary. If his service is satisfactory, he is advanced a grade each year until he reaches the highest grade. By that time he has served approximately 10 years.

* For your information it will not be amiss at this time to give a short synopsis of the duties of a carrier; some of the handicaps imposed on him, and a statement showing his value in correcting the errors of other branches of the service, and why he is often made the "scapegoat" for the mistakes of others for which he is not responsible.

It is to be understood that this comparison is not intended in any way to cast any reflection on any other branch of the service, or rather the employees in such service, but is rather intended to show that the carrier from the nature of his work is the logical one to correct errors, and for that reason makes himself more prominent, and to that extent more easily reached, than others who handle the mail before it reaches him.

As a matter of fact, the carrier is the "clearing house" of the Postal Service.

The general duties of a carrier are as follows: To "pull" his mail; to case same; to "buy" rated matter; to sign for registered mail; to sign for and collect money due on C. O. D. parcel-post matter; to purchase thrift and war-saving stamps for patrons on his route; to transfer and forward mail; to enter transfers and forwarding orders in route book; to keep his route book "posted" and answer communications, and to deliver and collect mail.

There is a vast difference between theory and practice as it relates to the duties of a carrier. Theoretically, all mail is correctly distributed to the various routes; practically, every carrier receives a large number of "misfiled" pieces of mail. If the carrier did not see that the bulk of these "misfiles" were distributed to the proper routes, it would cause serious delay and, in consequence, much dissatisfaction and many complaints on the part of the public.

Although this work is in effect the work of a distributor, the carrier receives no credit for same. No matter how many errors are made by others who handle the mail before it reaches the carrier, he must not let any of them pass him. Should he do so, he is held responsible and receives demerits for his failure. When complaints are made by the public on account of delay in the delivery of mail, the carrier is called on to give an explanation as to the cause, although he may not be at fault and may not have the slightest idea of the real cause of delay. Should his answer not be satisfactory, he is given demerits even though he may not be to blame.

Fortunately, the greater number of complaints are made direct to the carrier, enabling him by diplomatic handling of the matter to satisfy the complainant.

The carrier is often called on to give valuable assistance to post-office inspectors through his ability to furnish information that can not be obtained from any other source. As proof, see "unknown list" attached at end of this brief.

A carrier must endure many physical hardships, as he is compelled to be at work regardless of weather conditions. He is also required to purchase two uniforms a year, which is not required of any other branch of the service. Sometimes he may have a uniform passed for further use.

Congress has provided that carriers shall be eligible for promotion, but the Post Office Department has made regulations that virtually nullify the law. In fact, carriers in Baltimore have been told that it is against the policy of the department to promote carriers. During the last 29 years only three carriers in this office have been promoted and in each case the promotion was made for personal or political reasons and not for merit.

As the carrier must take the same mental and physical examination on entering the service as are taken by the clerks, this discrimination against the carrier causes a deep-seated feeling of dissatisfaction with those responsible for this injustice. This feeling is accentuated by the fact that a carrier substitutes for a much longer period than a clerk, during which time he acquires more practical knowledge by actual experience than is possible for the clerk, even though he does study route schemes. The carrier believes his position is just as necessary for the success of the service and is second to none. Again, your attention is called to the fact that there is no intention

to reflect upon or detract from the work performed by employees in other branches of the service; they are just as loyal and efficient as the carriers but the discrimination against the carrier in favor of the clerk, in promotions should be discontinued.

During the last five years the cost of living has increased more than 80 per cent. In a report of the Bureau of Labor Statistics of the United States Department of Labor recently made public, it was shown that for Baltimore the average increase in cost of 22 main articles of food in June, 1919, over the average cost for the year of 1913, amounted to 94 per cent, and the average of everything that enters into the cost of living had increased 83 per cent.

The following article is copied from the Literary Digest, issue of September 20, 1919, page 27:

" LIVING COSTS DOUBLED IN FOUR YEARS.

"According to the results of an investigation just completed by economists of the War Trade Board, the cost of living has gone up 102 per cent in the United States, * * * since the beginning of the war. The inquiry was begun soon after the signing of the armistice in an effort to determine the effect of the war upon living costs in the United States and also in the principal European countries. Prices in all the leading industries in this country were analyzed and a comparative study was made of fluctuations during the war in countries abroad. In connection with the reported advance of 102 per cent in the United States during the four years from 1914 to 1918, it is worth noting that Bradstreet's index number of wholesale commodity prices advanced 111 per cent from August 1, 1914, to November 1, 1918."

Despite the efforts of the Federal, State, and municipal Governments, the cost of living seems to be on the increase, according to the following article copied from the Baltimore News of September 24, 1919:

[From the New York Evening Sun.]

August food prices show an increase of 1 per cent over July in spite of the Government campaign. No broom has yet been found capable of sweeping back the ocean tides.

During the last five years the wages of employees in private industry were advanced as the cost of living increased.

Since 1907 letter carriers have only received a temporary increase of 25 per cent. To place them on a prewar basis will require an increase of not less than 60 per cent to the present salary scale.

It is a well-known fact that mechanics (and even unskilled laborers) are far better paid than the well-trained and efficient postal employee, averaging as they do \$7 or more per day.

On account of the inadequate (and temporary) salary scale now in force it is almost impossible to obtain the requisite number of new employees necessary to maintain the proper standard of efficiency in the Postal Service. In place of the annual civil-service examination for carriers and clerks it has been found necessary to hold weekly examinations. Where formerly anywhere from 100 to 200 took the annual examination, at the present time about 5 to 20, occasionally more, take the weekly examination. Formerly it was a rare thing for a substitute to resign; it now is the usual thing for the greater number appointed as substitutes to report for several days, and finding earnings very meager, to then resign. Some do not even bother to resign; they simply get employment elsewhere. Inquiry has developed the fact that the examinations have been simplified in order to get more eligibles.

According to a late report of the Bureau of Statistics of the Department of Labor, it requires an income of at least \$1,800 to purchase the actual necessities of life for the average family of five. Your attention is called to the following comparative budget of the monthly expenses of a family of five. This budget shows the average amount spent by a carrier receiving \$1,500 for each item, ascertained by actual investigation, and also the amount really necessary to maintain himself and family as becomes an American citizen and an employee of the United States Post Office Department:

	Present sa ary.	Needed.
H ouse rent.....	\$40.00	\$40.00
for light and cooking.....	4.00	5.00
.....	45.00	60.00
.....	4.50	6.00
.....	10.00	25.00
.....	9.00	12.00
.....	6.00	8.00
.....	5.00	8.00
..... (compu sory).....	3.00	6.00
..... dental, and optical service.....	2.00	8.00
.....		6.00
..... obligations.....		3.00
..... (children).....		5.00
..... matter, lost time, etc.....		8.00
Total.....	128.50	200.00

¹ Including family.

In calculating the amount needed to enable a carrier to maintain himself and family properly, the utmost care has been exercised to be as conservative as possible, and it is believed that not one of the items is in any way too large. If the estimates above are correct (and every care has been taken to make sure that they are), what is the condition of the lower salaried carriers? Surely it is not necessary that men should be compelled to beg for justice.

You will note that the average carrier is spending \$3.50 more per month than he is earning. Many of them are using the savings of years in order that they may make both ends meet. Many are compelled to do something on the outside to earn some extra money. The majority have been compelled to sell liberty bonds that they purchased hoping to derive some benefit from the interest on them as well as helping the Government to win the war "to make the world safe for democracy." All have made sacrifices innumerable and are denying themselves many things actually necessary for the welfare of themselves and family.

In view of the foregoing statement of facts, you are requested to give your most earnest and serious consideration to the advisability of recommending the enactment of a reclassification law for letter carriers, as follows: First grade, \$1,800; second grade, \$2,100; third grade, \$2,400; with automatic promotion at the expiration of one year's service in the next lower grade.

Substitute service to be limited to not more than one year; substitutes to be paid at the rate of 80 cents per hour; substitutes to be guaranteed not less than \$100 per month in earnings, and that the time served as substitute shall be reckoned as a factor in regulating the initial salary when appointed to a regular position.

A substitute serves approximately four years before he is made a regular carrier, and he is then appointed to the lowest grade, thus requiring about nine years before he can attain the highest grade.

It is suggested that credit should be given for the time served as substitute in determining the entrance grade when made regular; for example, after one year of service as substitute, if made regular, to be appointed to the first grade; after two years, to the second grade, and so on.

It is also suggested that the pay of substitutes be increased to 80 cents per hour in order that a high grade of employees may be maintained in the Postal Service.

INEQUALITY OF THE PRESENT RECLASSIFICATION LAW.

Your attention is particularly called to the accompanying statement which shows how inequitably the present temporary reclassification law has worked with the lower grade carriers. While this statement has been prepared by those affected in the Baltimore post office, it is equally applicable to every office in the United States. Although it is believed that Congress will correct this inequity in due course, the principal reason for bringing it to your attention at this time is that it may help you to avoid a similar inequity when you make your recommendations for reclassification to Congress. The statement in question is attached at the end of this brief.

SUGGESTIONS.

Although the following suggestions may not be exactly pertinent to the subject under investigation, it is believed that if they could be made effective by suitable legislation it would result in retaining efficient employees and bringing into the service a higher class of young men than is the case at the present time.

It would appear reasonable to suppose that if private industry finds it advantageous to look out for the welfare of its employees by providing recreation, rest, and lunch rooms, swimming pools, bowling alleys, and many other things of like nature, that it would be of greater advantage for the Government to do the same for its employees.

However that might be, the following suggestions are offered for your consideration, with the desire of advancing the best interests of the Postal Service.

A whole day off on all holidays, or, if work be necessary on any holiday, whole day be given within 30 days, whether the carrier works the entire holiday or a fractional part of same.

A limit of weight carried on any trip, of 40 pounds on residential districts and 50 pounds on business districts.

The distance covered by a foot collector to not exceed 15 miles for a period of 8 hours' duty.

That carriers be given the benefit of State and local holidays.

That all schedules of work shall contain no swing of less than 30 minutes or where swings of less time are necessary such time shall be credited as working time for the carrier.

Weekly payment of salaries.

Thirty days' vacation and 30 days' sick leave with pay.

Amendment of compensation law to provide for vocational illness.

Double time for all overtime.

Adequate retirement legislation.

Restoration of rights of citizenship that have been abrogated by departmental regulations.

A half holiday on Saturdays; four hours to constitute a full day's work and such half holiday to commence not later than 1 o'clock.

Permitting transfers between carriers and clerks without examination; supervisory positions only to be filled by examination open to all postal employees.

Abolition of the present obnoxious speed-up system.

A court of review or appeals for civil service employees and recognition of their official representatives.

It may not be out of place at this point to mention an incident that occurred within the last 10 days, in the Baltimore Post Office, that may explain why so many of the younger men resign, and also, how the speed-up system is sometimes employed. One of the younger carriers was assigned to work the district of a carrier on sick leave. After working the district for a number of days, he was cited to appear before the superintendent of mails.

He was informed that it had been reported that he was slow in his office and street work and requested to give a reason why this was so. Immediately the carrier asked for a piece of paper.

"Why do you want a piece of paper," he was asked.

"I intend to resign," he answered.

"Oh, no; we do not want you to resign," he was told.

"If I am too slow in my office and street work, I am too slow for the post office, and I am going to resign," he replied, and suited the action to the word, by resigning at once.

In conclusion, regardless of what the press may publish and what anyone may say, even though he may have the ear of the President, there does not seem any reasonable prospect of any appreciable reduction of the cost of living for several years, and every reason in the world why the salaries of letters carriers should be increased to a point where it may be possible for them to live as becomes Government employees, and not merely exist as is the case at the present time.

WM. H. R. WOODROW, *Chairman.*
CHAS. A. JOHNSON.
RICHARD S. SUTTON.

STATEMENT OF MR. R. B. TAYLOR, RICHMOND, VA.

Mr. TAYLOR. Mr. Chairman and members of the joint commission, and delegates. I have the honor to come from Richmond, Virginia. We have 105 letter carriers and 40 substitutes. I have come to give evidence in my humble way of the fact that we believe the position of letter carrier is not sufficiently compensated, for the reason that it is a very important part of the Government. They represent a certain dignified position of the Government and therefore we believe that the first grade of \$1,800 for the minimum, \$2,100 for the second grade, and \$2,400 for the maximum and the same should be applied to the letter carriers for the reason that the importance of the office demands said compensation. A man must receive certain conditions to the position, otherwise he is not able to contribute the required efficiency in his work. The letter carrier has a very burdensome position; he is consumed head, body and foot, and unless he is able to contribute sufficiently to maintain a certain thermometer of physical health, mental ability, and walking power, he doesn't measure up to the required service in the Government. He is under certain climatic conditions, he has to go out in all kinds of weather; therefore, there is a change of temperature in his health, by virtue of the fact that he can not stop. No man can fill his place. He either must work with pay or without pay, and to maintain a certain standard of efficiency, he must be in a certain condition.

The obligation of a letter carrier causes him to lead a very strenuous life. He is constantly called upon to keep his body ready for service. That means a pretty big drug bill, and if a man is intelligent enough to fill a letter carriers' position, he naturally has a taste for other things that goes with that intelligence. A man who is not intelligent enough to pass the letter carriers' examination, would not know enough to keep himself to the necessary standard of service.

Another thing; a letter carrier must be honest as well as efficient. He must be above the temptations of the hour. If a sufficient salary, as a maintenance, is given him, he is not tempted. He must be 100 per cent honest. His environment should place him above temptation, and the high cost of living in all departments makes it very hard upon him, with the other classes of work receiving increased pay above his.

Therefore, I maintain that the job is not attractive, and if a man has to stay in the service a number of years and can not lay by anything, nobody wants him when he gets too old to serve. If he has not laid away anything, he is not fit to serve. We can not measure up to good citizenship unless we have certain conditions around us. Ordinary men are not fitted to serve the Government. It is a big thing to have a Government job, but the honor is lost in the strenuous life and the effort to maintain and make ends meet, and therefore I hope it will be the pleasure of these gentlemen to give the request of the letter carriers their most earnest consideration. The dignity of the Government and the personnel of the men is at stake.

As I said before, a letter carrier is compelled, in a way, to live in harmony with his position, not in an expensive way, but he must be in a position to handle mail at all times and under all circumstances and thus the letter carrier has a mental strain on him. He comes home from work in the afternoon wholly unfit for social or fraternal duties, and he is unfit. He must have some recreation. He ought to be able to lose a day and a half or two days a month to help him recuperate from the monotony of his work. Therefore it does seem to me, gentlemen, in the consideration of this question that you will help to compensate the employees of the Government whose services reach to the rank and file of the whole Nation.

As it is now, the service is not very attractive. A man would rather not have a job of so much importance while other positions less responsible have a higher salary. There are lots of things a letter carrier can not do. He is circumscribed, but if he is sufficiently compensated to meet this limitation, then his job is not so strenuous. He will be able to lay aside some money. The order of the day is preparedness, and it is earnestly hoped in this condition of responsibility and demand on the letter carriers that the commission will give favorable consideration.

Our substitutes are paid 40 cents an hour. We have 40 there, and I believe it will be of great benefit if you gentlemen recommend to Congress that this be increased to 80 cents an hour for substitutes.

Senator STERLING. You and the other speakers have spoken about these three grades; a minimum of eighteen hundred, another twenty-one hundred and maximum of twenty-four hundred. Now, what is the basis? Do you take eighteen hundred as the entrance and then promotion to the twenty-one hundred and then a further promotion to the maximum?

Mr. TAYLOR. Yearly grades by meritorious promotions.

Mr. MOON. I notice all of you agree upon eighteen, twenty-one and twenty-four hundred. Is that the result of your organizations acting on the question, or do you just happen to do that?

Mr. TAYLOR. If I am informed properly, it is the result of our organizations asking that.

The CHAIRMAN. We will next hear Mr. Diggs from Norfolk, Va., and, unpleasant as it is, I will have to ask you gentlemen to conform to the program, so far as the time limit is concerned.

STATEMENT OF MR. M. E. DIGGS, NORFOLK, VA.

Mr. DIGGS. Mr. Chairman and gentlemen of the commission, I am not going to follow the lines that the other men have followed, because most of these things along the line of economics have been pretty thoroughly brought out and you have figures and statistics.

It seems to me that when the question of salaries is brought up the majority of the Members of Congress seem to fear the effect upon the revenues of the Government in granting increases in salaries to those men who justly deserve them. It seems to me, and I believe, that these salaries can be raised to the point deserved by the letter carriers without any extra expense to the Government. If certain changes are made in the personnel and the administration offices of the Pos-

tal Department I think that the salaries can be equalized and those men who do the real work of the service can get proper compensation.

I am going to stick to just a few things in this brief and submit the rest. The city from which I come is rated as the highest city in this country. The cost of living is classed as 87 per cent, and the cost of living during the last 12 months in Norfolk has raised 12 per cent. The cost of 22 necessary articles is \$691.30 for white families, and I estimate that some of the articles would cost the colored families at least 25 per cent more. I can prove that, gentlemen, if you want, later on.

We are submitting clippings with this brief to show conditions in Norfolk at the present time. Profiteering is going on and there is an immense labor turnover in the Norfolk post office. At the present time we have not one substitute on the list. We have about 18 or 19 on the auxiliary list that we picked up from the street. To-day there are about four or five routes in Norfolk upset because they let me off to come here. It seems to me that we ought to be as liberal as the private employers and the soulless corporations who have raised the wages and given bonuses to the employees. We must pay salaries from the standpoint of justice and righteousness.

We have submitted from Norfolk, mindful of the conditions there, a little different scale from the others. First year two thousand, second year, twenty-two hundred; third year, twenty-four hundred; promotions to be semiannually and automatically to a clerical position after six years' service. Thirty days' annual leave and 30 days' vacation with pay; a full day's compensatory time for all holidays, double time for overtime, official recognition and collective bargaining, promotion on merit and tests without discrimination for all letter carriers.

Here is a way we think the salaries could be raised without injury to the service: The office of postmaster, except in cities of metropolitan size, might be abolished and that salary given to the men who do the work; have district postmasters, if necessary. This would be a distinct saving and enable salaries to be raised without extra revenue.

After all, gentlemen, it seems to me that while the question of salaries means a good deal, what we want in this country is an improvement in the service, an improved Postal Service, a service that will be satisfactory to the general public, and this can be done by making the changes suggested by the men who actually do the work. They have certain ideas that would be beneficial to the service and would show you they are worth the salaries they are asking you to give them. I do not think the question of Government salaries ought to depend entirely upon the amount of expenses. The post office could be self-supporting—

The CHAIRMAN. The time of the gentleman from Virginia has expired.

STATEMENT OF MR. G. F. FARRELL, HUNTINGTON, W. VA.

Mr. FARRELL. It gives me great pleasure to appear before this commission. I have prepared a brief and will read part of it. The

working conditions in Huntington we have no complaint about. We have a brand-new office there and are satisfied along that line, but the wail that is going on all over this country is as to the treatment the postal employees are getting at the hands of Congress. When you take into consideration the treatment we have received at the hands of Congress during the last four years the wonder is that the department hasn't busted entirely.

Mr. STEENERSON. You claim that Congress hasn't treated the employees right?

Mr. FARRELL. They have not given us the increase they should have done.

Mr. STEENERSON. We have given more than the department has ever asked for. It is generally necessary to give what an administration wants for its employees. It seems to me you ought to blame those that manage the service instead of blaming Congress.

Mr. FARRELL. I have that in my brief.

Mr. MOON. Congress hasn't anything to do with the fixing of the compensation.

Mr. FARRELL. We asked for it, but the department didn't. Everybody knows, at least, that the Post Office Department isn't what it should be. That is due entirely to the inadequacies of the salaries paid to the postal employees. The salaries are not enough to attract or hold the service of the big, wide-awake, red-blooded American. In Huntington we have lost three foremen from the office in the last three years, who have resigned and gone into the real estate business and each one of them would make affidavit that they are making four times as much as they made in the Post Office Department. Ninety per cent of the employees are now looking for positions and unless something is done by this commission and by Congress by next July something is going to happen. The department has been suffering from the loss of thousands of the most skilled employees. Subs are not going to work for 40 cents an hour in the post office when they can go two blocks away and get anywhere from 72 to 75 cents an hour. Hod carriers get 68 cents, 28 cents more than the substitute letter carriers, and 8 cents per hour more than the letter carrier in the highest grade. In 1917 Congress passed a law granting all Government employees a 10 per cent increase with the exception of the postal employees. We think the Postal Department, above all others, should have had the benefit of this increase.

Then, again, in 1918 Congress did grant us an increase of \$200 a year, but at the same time, under the direction of the Government, the Department of Labor issued a statement that a family required the sum of \$1,800 to provide the necessities of life, yet this Government is compelling its workers to work for anywhere from \$40 a month to \$1,400 a year, the highest paid employee in the post-office department. Here is a state of affairs, gentlemen, which I hope will be remedied by this Congress. The morale of the department is at a low ebb, due to the uncertainties of existing conditions at this time.

It has been gone over about the sub and what he must do to get a regular position, but the report shows that the sub substitutes on an average of four years before he gets to be a regular. Then he goes to work at \$1,000 and then works six years before he

gets to the highest position at \$1,500. During the past four years the cost of living has increased 100 per cent.

I desire to call your attention to the following table of increase in private industry: Iron and steel, 90 per cent; boot and shoe, 122 per cent.

Mr. MOON. During what period of time?

Mr. FARRELL. Since the war started in Europe. Cotton finished goods, 65 per cent; automobile, 57 per cent; men's clothing, 87 per cent—this is increase in wages, not increase in the price of these articles. Cotton manufacturing, 74 per cent; railroad employees, 76 per cent; postal employees, a temporary increase of 25 per cent. The following will be found to be the wage scales of city employees: Electricians, \$1; bricklayers, \$1; plumbers, 95 cents; plasterers, 91 cents; carpenters, 85 cents; hodcarriers, 68 cents; postal employees, an average of 52 cents an hour.

Mr. MOON. What do you say the postal employees' increase has been?

Mr. FARRELL. Twenty-five per cent. It runs from 20 to 25.

Mr. MOON. Since the act of 1912?

Mr. FARRELL. In the last 12 years; the act of 1907.

(Cries of "seven years.")

Mr. FARRELL. I have a table of the salaries paid steel corporation men who are now on a strike, and they make from \$12.85 to \$21.12 per day.

The CHAIRMAN. I am sorry, but your time has expired. You can file your brief with the clerk.

Mr. FARRELL. I thank you, gentlemen.

(Mr. Farrell submitted the following paper:)

BRIEF SUBMITTED BY MR. G. F. FARRELL.

It gives me a great deal of pleasure to appear before your honorable body in this capacity on behalf of the hardest worked, most oppressed, and least paid class of employees in the United States, the postal employees.

In view of the fact that this commission is to deal with salaries of postal employees only, and not with working conditions, I shall confine my remarks to that point alone.

However, I desire to state that as to the working conditions of the employees of the Huntington, W. Va., post office, they are all that could be desired. We have no fault to find or complaint to make against the postmaster or any man in a supervisory position. They are all gentlemen, with the spirit of the second commandment, "Thou shalt love thy neighbor as thyself." Their conduct toward us is all that could be desired.

The huge wall that is ascending up from every post office in the United States is caused by the treatment that postal employees are receiving from the Congress of the United States, of which you gentlemen have the honor of being Members.

When we take into consideration the man at the head of the Post Office Department, and his assistants here in Washington, and the treatment that postal employees have received at the hands of Congress during the last four years, the wonder is that the department has not busted up entirely.

Everyone in the United States knows that the Post Office Department is in a dilapidated state of affairs. This condition is due almost entirely to inadequacy of salaries paid postal employees, thereby forcing all the brainiest, most skilled, and most efficient postal employees to seek more remunerative employment in other walks of life.

The salary is not sufficient or attractive enough to hold the services of an educated, wide-awake, ambitious, red-blooded American. Therefore, the post offices are being filled by mediocres of the less educated and less ambitious sort who can not hold down a position elsewhere.

We have a concrete example of this statement in Huntington, W. Va., where I have the pleasure of residing (which, by the way, is the best city on earth) wherein three foremen of the office have resigned within the last four years in order to accept other positions where they could make a decent living for their families, and each one of them is now making four times as much as they received at the hands of Congress. Therefore, the force is being continually depleted by the resignation of the skilled and efficient only to be filled by the unskilled and inefficient. Ninety per cent of the postal employees are right now looking for other positions, and unless something is done by this commission, and by Congress before next July, something is going to happen. The department is bound to suffer by the loss of thousands of its most skilled employees. Does Congress suppose that bright, intelligent, ambitious educated young men are going to accept positions as substitutes in the post office at the paltry sum of 40 cents per hour, when they can walk one or two blocks and get a position which is a lot easier, less exacting, and requires less skill at anywhere from 72 cents to \$1.35 per hour? That is exactly what you are asking them to do, but they are not doing it, and they would be fit subjects for the home of the feeble-minded if they did. Why, the hod carrier now walks the streets of our city with head erect and shoulders thrown back with the air of a prince, poking fun at the letter carrier because he receives 25 cents per hour more than the substitute letter carrier, and 8 cents more than the regular letter carrier in the highest grade.

When other classes of employees want and need an increase of salary in order to meet the ever-increasing cost of living they simply set a date to strike, and usually get what they are demanding whether they really need it or not; but postal employees go on the even tenor of their ways, suffering and depriving themselves of part of the necessities of life and all the comforts of life, hoping that Congress will some day right the wrong that they have done and come to the rescue of the Post Office Department.

I desire to call your attention to the Adamson law, which Congress was compelled to pass at the demand of the railway employees. They demanded an increase of salary at the hands of Congress and set a day for Congress to act; and it acted, giving them just what they were demanding. A great many railway employees are now receiving more than twice as much, and some of them three times as much, as postal employees, yet they are right now laying their plans to demand of Congress another increase of salary, or strike. I take meals with railway employees who receive more than three times as much salary as I get. Their check for two weeks is more than mine for one month.

Postal employees have been shamefully dealt with for the last four years. As proof of this statement, I desire to call your attention to the law passed by Congress in July, 1917, giving all Government employees 10 per cent increase, but expressly excepting postal employees from its operation. Just why this was done no member of Congress has ever been able to explain to anyone's satisfaction. They, above all others, should have had the benefit of this law granting a 10 per cent increase.

Then, again, in July, 1918, Congress did loosen up a little, granting postal employees a \$200 increase, making the salaries to range from \$1,000 to \$1,400 per year, but at the same time this Government, under the directions of a bureau of the Department of Labor, issued a statement declaring that a family of five required the sum of \$1,800 to provide the necessities of life. How are we to reconcile this dual state of affairs? This great Government declaring that a family must have at least \$1,800 per year, yet compelling postal employees to labor for anywhere from \$40 per month (the average salary of a sub) to \$1,400 a year, the highest paid to any employee. Gentlemen, here is a state of affairs that must be remedied by this commission and by Congress before next July, or the future of the post office is uncertain. The morale of the department is at a low ebb, due to the uncertainties existing at the present time. Give us what we ought to have, and you will see the department put on its old-time "pep" and march forth to victory, bringing order and efficiency out of chaos and inefficiency.

In order to get a position in the post office applicants must pass a rigid physical and mental examination, from which the eligible register for appointments are made up according to percentages. Appointments are made in rotation to the position of substitute. Subs work on an average of four years on an average salary of \$50 per month before they get a regular position. They get 40 cents per hour for the actual time employed. Finally they get

a regular position starting at the lowest grade salary, which is now \$1,000 per year. Six years longer the sub probably reaches the highest position, \$1,500 per year, making 10 years in all.

During the last five years the cost of living has increased more than 100 per cent. Then why should not the salaries of postal employees have been increased 100 per cent? During the last five years the wages of employees in private industries were raised as the cost of living increased; but not so with the wages of postal employees.

I desire to call your attention to the following table of the increase of wages in private industry:

	Per cent.
Iron and steel industry-----	90
Boot and shoe industry-----	122
Cotton finishing industry-----	65
Automobile industry-----	57
Men's clothing industry-----	87
Cotton manufacturing industry-----	74
Gear manufacturing industry-----	69
Railway employees-----	76
Postal employees-----	25

It is plainly evident from the above table that postal employees have not had a square deal. They should have at least 60 per cent increase to put them on an equal footing with employees of private industry.

Below will be found the wage scale for other classes of employees in the city of Huntington, W. Va.:

Electricians, \$1.35 per hour, \$11.04 per day; bricklayers, \$1 per hour, \$8 per day; plumbers, 95 cents per hour, \$7.60 per day; plasterers, 91 cents per hour, \$7.28 per day; carpenters, 85 cents per hour, \$6.80 per day; shop employees, 72 cents per hour, \$5.76 per day; hod carriers, 68 cents per hour, \$5.44 per day; postal employees (average), 52 cents per hour, \$4.16 per day.

It will be seen by the above table that all classes of employees, the hod carrier not excepted, receive larger salaries than the postal employees, yet they are not required to pass any physical or mental examination.

Below will be found salaries of employees of the Steel Corporation, who are now on strike:

Heaters-----	\$21. 12	Skelp heaters-----	\$18. 18
Rougher:-----	11. 92	Skelp-mill rollers-----	21. 78
Catchers-----	11. 92	Lap welders-----	16. 08
Steel pourers-----	12. 85	Blowers-----	13. 76
Vessel men-----	14. 65	Regulators-----	13. 52
Mill heaters-----	17. 92	Postal employees-----	4. 80

It will be seen by the above table that these steel mill workers receive from three to five times more than postal employees. Here is a state of affairs that must be remedied.

We were told during the war, when a large number desired to resign and seek other positions where they could make a great deal more, that it was our patriotic duty to remain on the job and assist the Government and that Congress would soon do something for us, but so far our hopes have been in vain. Postal employees have only received a temporary increase of 25 per cent during the past 12 years, whereas all other classes of employees have received from 57 per cent to 122 per cent increase. Uniforms that five years ago cost letter carriers \$15 now cost them \$36. Pants that then cost \$4 now cost \$9.75. In fact everything costs more than 100 per cent more to-day than five years ago. How, then, are we going to meet this increase on a 25 per cent increase of salary? It can not be done. Therefore thousands of postal employees have been forced very much against their will to very materially lower their standard of living. They have been forced to move into cheaper houses and among undesirable citizens; they have been forced to take their children from school and put them to work to help support themselves and the rest of the family, thereby depriving them of the advantages of life; unmarried employees have been compelled to seek cheaper quarters and find cheaper board; they have been forced to drop insurance, resign from lodges, stop paying church dues, and cut all pleasures of all kinds in order to provide the necessities of life.

I copy the following editorial, which appeared in the Cincinnati Post September 20:

" WHY YOUR MAIL IS LATE.

" Scores of bags bursting with mail lie unopened for days at a time in many post offices throughout the country. Newspapers, traveling between Cincinnati and Cleveland, for instance, often arrive from 5 to 10 days late. The post office muddle is costing the business world millions of dollars in slow communication and in time limit mail, such as price lists, which arrive so late that they might better never have been sent. All this cost is added to the ultimate consumer. A formidable factor in high prices is the congestion of mail, those arteries that carry the blood of commerce. Low wages and the difficulty of getting ahead have caused many experienced postal workers to seek other work and are keeping men from entering the post office service. After passing the civil service post office examination, before you can become a substitute you must learn 20 routes, devoting three days to each route without pay before you go to work. Finally you get a job, you work on an average of four years at the magnificent sum of 40 cents per hour before you get on regular. Then you go to work for \$1,000 per year.

" The meager salaries paid postal employees is directly responsible for the collapse of the mail service. Increase the salaries and order may yet be brought out of chaos."

That in view of the above statement of facts it is suggested that the commission give earnest and serious consideration to the enactment of a reclassification law—first grade salary, \$1,800; second grade, \$2,000; third grade \$2,400.

Our final prayer is the first petition in the Lord's prayer, " Give us this day our daily bread." Grant us this one request and we will continue to be the happiest and most contented bunch that the sun ever shone on.

STATEMENT OF MR. J. A. O'NEILL, WASHINGTON, D. C.

Mr. O'NEILL. Mr. Chairman and gentlemen of the commission, I won't rehearse the general conditions explained by the other carriers, perhaps more ably than I could, but I will discuss the condition in Washington, where you gentlemen can come down to the office and verify my statements.

Of course, the standard of examinations for letter carriers was in previous years very high. That standard has been lowered; in fact it has been lowered 50 per cent. In the past it was customary for men to take this examination, and they had hundreds of applicants and a man had to attain a very high average before he had a chance of appointment. At the present time we have in the Washington post office 367 letter carriers. We have 70 substitutes. In those 70 substitutes we have only 9 civil-service substitutes.

Now, gentlemen, there is an examination held every Saturday for post-office clerks and carriers in Washington, D. C. They have been held for the past eight months. The average number of men appearing for those examinations is about 14. It has been impossible to recruit the normal force we need in this city from these examinations. The consequence of this has been that they have been compelled to go outside and bring in any men they could get, and boys, and the spectacle has been presented in Washington of men delivering mail without the semblance of a uniform. Schoolboys have been delivering mail. Schoolboys work on Saturday, and that condition created such comment about boys in short pants delivering mail that there has been a regulation issued that the boys must, at least, put on long pants to get into the post office. It is a man's job, and you are paying boy's pay for it. That is why you get boys. You take the unusual number of cases that have happened during the past year or two, where men have been unfaithful to their trusts,

and you will find it has been exclusively among this temporary force.

Now, we come to the financial condition of the employees. In Washington City we have in the different grades 44 men in the thousand-dollar grade, 62 in the eleven hundred, 7 in the twelve hundred, 8 in the thirteen, 20 in the fourteen, and 226 in the fifteen-hundred grade. We have 106 men in the combined ten and eleven hundred dollar grades. The average salary paid in Washington is \$1,357. Now, we have canvassed this office pretty thoroughly, and as a result of personal interviews with the men and averaging expense accounts have found that these men have spent on an average more than \$2,000—that is, all classes of men, the eleven-hundred-dollar men and the fifteen-hundred-dollar men. Now, in the eleven-hundred-dollar grade these men have been in the service on an average of five years, and the thirteen-hundred-dollar men seven years, and so on through the other grades.

Well, they have spent on an average of \$2,000, and the result of that is that every man—the average letter carrier, not every man—the average letter carrier is in debt, hopelessly in debt, and by hopelessly in debt I mean that he owes four or five hundred dollars, and when he is living up to his salary of \$1,500 he can never get out of debt.

Now, we have another proposition; we have the rent proposition. It is absolutely impossible to rent a house in Washington. If a man wants a house, or is dispossessed, as some have been—one instance in particular; over a year ago a man was forced out of his house; it was sold over his head, and he had to go and live with his brother-in-law, and he and his wife and two children had to live in one room for over a year. If you want to rent a house you have to buy somebody's furniture when they are leaving town, at an exorbitant price, in order to get that lease, or you can buy a house at an inflated value, paying \$1,000 down on a house that sells for \$5,000 and is worth \$3,000.

The questionnaire asked what outside work the men did. Last year they called for volunteers among the letter carriers to work on the clerical force. A great many of the letter carriers volunteered, but the office recognized the fact that they could not do this clerical work every night and carry their routes too, the work was from 6 to 10, and they were only allowed 2 or 3 nights a week. We have had men on the street cars, we have had musicians, in fact, every occupation in civil life. These men have worked on the outside, but they found they could not continue that, because they go to work in this city at 6 o'clock and get through at 4, and with these outside occupations they wouldn't get through until midnight, and that only gave them four or five hours rest. The wages on the outside averaged about 95 cents for skilled mechanics; bread-wagon drivers got \$50 a week; laundry and ice-cream drivers got \$35; the man who delivers milk to me gets \$55 a week; the man who delivers bread makes more than \$50 a week; the trashman makes more money than I do, and gentlemen, I can fill any of those jobs to-morrow, and I think any man of average education could.

I wish to thank you gentlemen for the privilege of appearing before you, and I know the courtesy you have extended us means we will receive due consideration at your hands.

(Mr. O'Neill submitted the following brief:)

BRIEF SUBMITTED BY MR. J. A. O'NEILL.

It is our purpose to go directly into the aims of your honorable body, and to aid you by means of facts and figures in arriving at a just conclusion concerning the urgency for an early and generous increase of pay for the letter carriers of Washington, D. C.

It is also our design to cite specific instances emphasizing to what extent the salaries now obtaining are inadequate in meeting current living expenses.

The following tables show the difference in hourly wage scale of mechanics, skilled, unskilled, and ordinary laborers, as compared with that of letter carriers:

Bricklayers, per hour	\$1. 00
Carpenters, per hour	. 87½
Cement workers, per hour	. 90
Lathers (wood), per hour	1. 00
Painters, per hour	. 87½
Paperhangers, per hour	. 87½
Plasterers, per hour	. 90
Plumbers, per hour	. 87½
Steamfitters, per hour	1. 00
Skilled laborers:	
Plumbers' helpers	. 50

Ordinary laborers	. 50
Hodcarriers	. 62½
Plumbers' laborers, per hour	1. 00
Motormen, per hour	. 48-. 51
Conductors, per hour	. 48-. 51
Drivers:	
Milk wagon	per week 35. 00
Ice cream	do 38. 50
Ice cream helpers	do 31. 50
Bread wagon	do 50. 00
Laundry	do 35. 00

HOURLY WAGE SCALE OF LETTER CARRIERS.

Grade 1, 35 cents; grade 2, 38 cents; grade 3, 42 cents; grade 4, 45 cents; grade 5, 49 cents; grade 6, 52 cents.

Substitutes, 40 cents per hour for actual time employed.

To show the impossibility of striving to make the above table cope with present-day living standards, your attention is respectfully directed to the following 13 cases, culled at random from among the letter carriers of Washington, D. C. Case No. 1 is given in detail.

No. 1. Carrier, \$1,500 grade; married; six dependents:	Per year.
Food	\$1, 300
Clothing	250
Payment on home	240
Laundry	130
Shoes	100
Fuel	100
Light	50
Insurance	73
Taxes, etc	48
Doctor bill	50
Car fare	28
School	15
Church	25
Newspapers	7
Total	2, 396

Owes debts amounting to \$390.

Allows nothing for recreation and amusements.

No. 2. Carrier, \$1,500 grade; married; four dependents; annual expenditures, \$2,074.60.

No. 3. Carrier, \$1,500 grade; married; four dependents; annual expenditures, \$2,483.08. Income of \$180 per year from room rent. Going in debt on average of \$250 per year.

No. 4. Living expenses, fiscal year July 1, 1918, to July 1, 1919, \$2,856.05. Seven dependents. Salary and bonus, \$1,400; deficit, \$1,456.05.

No. 5. Carrier, \$1,300 grade; married; five dependents. Annual expenditures, \$1,674. In one year made 937 hours' overtime. At present owes hospital and doctor bills. Lost one child for lack of medical attention. Children at present are in need of dental work, medical attention for tonsils and eyes, and are delicate from lack of nourishing food. Special attention is directed to this case.

No. 6. Carrier, \$1,100 grade; wife; no children; annual expenditures, \$2,306.08.

No. 7. Carrier, \$1,100 grade; four dependents; annual expenditures, \$1,579.28.

No. 8. Carrier, \$1,100 grade; two dependents; annual expenses, \$1,549.

No. 9. Carrier, \$1,100 grade; four dependents; annual expenses, \$1,918.

No. 10. Carrier; \$1,100 grade; four dependents; annual expenses, \$1,950; owes doctor bills; owes for uniforms.

No. 11. Carrier, \$1,000 grade; married; three dependents. Annual expenses \$1,449.

No. 12. Carrier; married; six dependents. Annual expenses \$2,309.60.

No. 13. Temporary substitute; married; three dependents. Salary 40 cents per hour when employed. Average monthly pay \$50, or \$600 per annum. Besides with people-in-law, paying \$480 board per year. Will not take civil-service examination on account of inability to live on entrance salary of \$1,000 per year.

While time did not allow a canvass of the entire carrier force, the committee feels assured that the deplorable conditions noted in the foregoing cases are general.

This is wholly due to a wage scale based on old traditions; notwithstanding an 80 per cent increase in the cost of living in five years, letter carriers have only received a temporary increase of 25 per cent in 12 years.

It requires an income of \$1,800 to purchase the actual necessities of life for a family of five.

The average salary paid on October 1, 1919, was \$1,357 per year.

According to a late report of the Bureau of Statistics of the Department of Labor it requires, as stated above, \$1,800 a year to get actual necessities for a year for a family of five.

As a result the local post office is now in a serious situation due to wholesale resignations and a consequent lack of trained men.

Despite the fact that for almost a year weekly examinations have been held by the Civil Service Commission to fill vacancies in the post office at Washington, D. C., not more than 10 or 12 take advantage of the opportunity. Appointees resign in short order after comparing the pittance received with the work involved.

For the past three years the local post office has been unable to obtain a working quota of substitute carriers from the roster of eligibles. To counteract these undesirable conditions and to do full justice to all concerned, the committee recommends a reclassification law for letter carriers as follows:

First-grade salary, \$1,800; second-grade salary, \$2,100; third-grade salary, \$2,400. All promotions after one year's service in previous grade. That substitute carriers be paid at the rate of 80 cents an hour, with guaranteed earnings of not less than \$100 per month, and that the time spent as substitutes shall be reckoned as a factor in regulating the initial salary when appointed a regular carrier.

In summarizing we add that it is our firm belief that if these recommendations are not acceded to all efforts to place the post office on a prewar footing and attract capable and efficient men into the service will prove entirely futile.

Yours, truly,

JOHN A. O'NEILL, *Chairman.*
DENIS A. LANE,
HARRY S. BARRICK,
The Letter Carrier Committee.

BRIEF SUBMITTED BY WILLIAM H. BIRD, SCRANTON, PA.

I wish to submit to your honorable committee the following brief statement showing that the present wage of letter carriers is not sufficient to supply the actual necessities of life.

None of the carriers of our office have been able to live on their salaries during the past three years, some have been able to eke out an existence by working at other occupations evenings, holidays, Sundays, and during their vacations, but in doing this they have robbed themselves of the rest they badly needed, and are making themselves prematurely old; some have had to draw on whatever reserve fund they might have had, but all face a deficit ranging from \$300 to \$700; many have had to give up their life insurance; some have had to take their children out of school and put them to work, thus depriving their children of a chance to get an education, and of having an equal chance with their neighbors' children. Unless there is some relief soon others will have to do the same thing.

During the period of the war we all made sacrifices, and did all we could to "help the cause," and none did it more willingly than the postal employees; they stayed at their work, although all of them could have made far more money at other occupations. In addition to this many of them, on their own time, sold Liberty bonds and war stamps aggregating many thousands of dollars.

Under existing conditions postal employees can have none of the luxuries of life, neither can they have any of the pleasures such as is enjoyed by other people, because of insufficient salaries; few, if any, have been able to buy new furniture or other household supplies during the past four years, and as a consequence everything is decidedly shabby, and must be replaced soon, and at a cost of over 100 per cent greater than 10 years ago, with prices still soaring.

The amount of money expended for clothes by our carriers and their families during the postal fiscal year ending June 30, 1919, amounted to less than \$5 per capita. As this amount is very much less than they can be clothed for it shows that they are wearing all of their old clothes; perhaps some of them have been discarded long ago, and that new clothes will have to be procured in the near future, at prices 100 per cent greater than in 1907, with a promise (by the clothing and drygoods stores) of a 15 per cent advance on January 1, 1920.

Letter-carriers' uniforms have advanced 100 per cent since 1907, and will increase more than 10 per cent on November 1, 1919.

Coal prices have advanced more than 110 per cent in the last 12 years, and the coal sold to-day contains at least 20 per cent more impurities than that sold in 1907.

Doctors' services cost 100 per cent more than 12 years ago. This is a large item to letter carriers, as they are especially liable to sickness, being exposed to all kinds of weather.

The cost of food has advanced at least 100 per cent over the prices of 1907 while the prices on a few food articles are less than last July the general movement is upward, the cost of 22 principal articles of food is 93 per cent higher in our town now than in 1913. See report of United States Department of Labor. The above-mentioned articles are: Sirloin steak, round steak, rib roast, plate boiling beef, pork chops, bacon, hens, milk, butter, cheese, eggs, bread, flour, cornmeal, rice, potatoes, sugar, tea, and coffee.

A Federal board of inquiry has found that a family of five can not live on less than \$1,800 per annum. This covers bare living expenses of the average family and leaves nothing for proper education of our children, nothing to put aside to be used in case of sickness (which we certainly have our share of), nothing for pleasure, and nothing for use in our old age, to ease us along to the grave. Postal workers of this great Government are certainly entitled to something more than a bare living.

We are certainly "up against it," and earnestly solicit your help.

BRIEF SUBMITTED BY CHARLES H. GRAY ON BEHALF OF THE LETTER CARRIERS OF ROANOKE, VA.

After passing the required civil service examination and receiving a sufficient rating, an applicant is certified from the eligible list and appointed a substitute carrier. The duties of a substitute are varied and uncertain. There is no regular salary and an uncertain income.

After a period of substitution and a probation period of six months, a man is appointed a regular carrier at an entrance salary of \$800 (temporarily \$1,000) per year.

The duties of a carrier are arduous, laborious, and monotonous, carriers taking out heavy loads in any and all kinds of weather. No matter how cold, hot or how hard it rains or snows the carrier is expected to be and is always on the job. No private corporation employing as many men can show anything like as good record as is shown by the records of the carriers, especially when it is considered that to shoulder 50, 75, or 100 pounds and start out with it is no easy task for a man.

After the termination of the day's work a carrier is exhausted, and is unfit to employ his afternoons in extra work to increase his income, or in pleasure or study. Therefore, it is necessary for him to earn enough during his day's work to live. Often clerks and men in other walks of life whose work is not so strenuous can work extra hours at their regular work or in other positions, thereby increasing their income. Not so with the carrier. Eight hours with a load on his back has unfitted him for further efforts.

Congress has seen fit to pass laws granting vacations and holidays to the carriers, but of recent years where it is at all possible, those on duty do the work of those on vacation and invariably work harder in the summer than in the winter months. Eight hours of substitution for vacation would remedy this. The practice is to double up and eliminate delivery trips and in many instances no additional help is allowed.

In addition to the severe mental and physical test of a carrier there are varied responsibilities. Millions of dollars in money, likewise millions in negotiable securities and valuable packages pass through the mails with almost a negligible amount of loss. Then the carrier is himself responsible for the safe handling of this mail and must pay for such losses as an inspector sees fit to charge up to him.

Besides the delivery of ordinary mail there are the following special classes which require extra and careful attention the improper handling of which may mean great loss to the addressee: Registered mail, pension checks, allotment checks, also special, official and confidential inquiries of various kinds requiring tact and discretion in their treatment.

It is a mistaken idea of the clerks that they should be a higher type of men than the carrier. Rather the opposite. It is true that the carrier goes out laden with loads that sometimes make him look like a beast of burden, but at the same time he is performing work all the time, in addition to carrying his load, as difficult as any which falls to the lot of the clerk.

Letter carriers, as representatives of the Government, are obliged to conduct themselves at all times in a manner which will reflect credit upon the service. In fact, the reputation of the Postal Service is largely made by the letter carrier. He meets all the people face to face each day and his ability, tact, sense, and judgment in handling all the different classes and types of people and keeping them satisfied with the service goes far in keeping down complaints. Therefore, it is necessary to have as carriers a high class of men—men with education and honor—to meet the various requirements, and to do this, there must be an increase in salaries. There is no other class of postal employees who come in such close contact every day with the public and require such a high standard of intelligence.

Carriers must meet their obligations promptly, live decently, and while on duty present a neat appearance in uniforms purchased out of their own salary. These uniforms have increased 100 per cent in the past five years. They must possess and wear other apparel which the ordinary citizen does not require, and their financial outlay in this respect is far in excess of that of post-office clerks or that of employees in other occupations.

It seems hardly necessary to mention the increase in the cost of living to a committee of Congress. But the fact that it has doubled in the past five years, mechanics of all classes having had their salaries increased enormously to meet the conditions, even common labor having been and is now being paid more than postal employees, it becomes necessary to emphasize the needs of this class of Government employees.

In nearly all trades and occupations, other than postal employees, workmen are now paid time-and-one-half or double time for overtime, having an additional greater opportunity for better conditions. In many instances, in order to meet expenses, the wife and children are compelled to work. Many have

had to sell their Liberty bonds and draw on their savings of former years or go in debt to meet expenses.

The head of a family ought to receive a salary sufficient to support his children until they have passed school age.

Government investigations have found that it requires \$2,500 per year to keep the average family.

Careful investigations of the present conditions prove that a salary of \$1,500 per year is not sufficient to maintain the average family if they are to live as decent citizens of the United States ought and desire to live.

The CHAIRMAN. I want to say that at 12 o'clock the post-office bill is to be taken up, which provides for an increase for the postal employees. Of course, you would rather have us over there than here, so I am going to take the liberty of not hearing these other gentlemen here, and if they have anything they want to say, they can file it with the clerk. Now, we will hear the rural carriers at 2 o'clock and the commission stands adjourned until that time.

(Whereupon, at 12 o'clock noon, the committee recessed until 2 o'clock p. m. this day).

AFTER RECESS.

The commission met, pursuant to recess, at 2.20 p. m., Hon. John H. Bankhead presiding.

The CHAIRMAN. We will continue these hearings by giving the Rural Delivery Service an opportunity to present their case to the commission. I am going to ask Mr. W. W. Hunt, of Greenville, Pa., to speak. According to the program, Mr. Hunt has 10 minutes.

RURAL DELIVERY CARRIERS.

STATEMENT OF MR. W. W. HUNT, GREENVILLE, PA.

Mr. HUNT. Mr. Chairman and gentlemen of the commission, I am representing the Pennsylvania rural letter carriers, and no doubt a great deal that I say will be just repetition of what you have already heard, but perhaps I may be able to strengthen some of the things already stated, or give you some new thought. I am not going to take up your time by talking about the high cost of living and the resignations in the service and the inefficiency of the service, because you have heard all about that. What applies to the city carrier applies also to the rural-carrier situation.

I will also say this: That I am not going to say one word that will carry the impression that I am opposed to a good increase in salary for the other men, because I am not, but if their condition is such that it is necessary to have an increase in salary to make a decent living, what is the condition of the rural carriers? Their condition is, to a certain extent, pitiful.

I wish to call your attention, first, to what has sometimes been called unjust discrimination against the rural carriers in legislation. By that term I do not mean to create the idea that we think our friends in either branch of Congress have been unkind to us, or that the department officials have wronged us, or anything of the kind, but we believe they have never been able to quite understand just what the rural carrier was up against. In the first place, our basic salary for a 24-mile route is \$1,200 a year. At the present time we have a bonus amounting to \$300—amounting in all to \$1,500 for this year. That is somewhere near the city carriers' salary, but

in addition to that, we have an item that varies from six to seven, and even as high as eight hundred dollars, in expenses, which the city carriers do not have, and our object in coming before you at this time is to ask you to recommend such legislation as will put us on an equal footing with the city carrier.

I wish to call your attention to a letter I received not long ago from a carrier in Bradford, Pa., in which he stated he had a 24-mile route, which at that time—previous to July 1—was paying \$1,440 a year, out of which he was paying nearly \$700 to maintain his equipment, leaving him about \$700 for his work. Right beside him, where they could touch elbows almost, was a mounted city carrier who was drawing \$1,500 a year and receiving an allowance of \$1,050 to maintain his equipment, making him \$2,550 for practically the same service as the rural carrier was getting \$1,440. That is why it has sometimes been termed unjust discrimination against the rural carrier, which, of course, we do not say is intentional. The statement has often been made that the income did not pay expenses—the increase from that source did not pay the expenses of the service; that the increase in revenues that came about by the establishment of the rural services was not very much. I would not dispute that, but I think you will concede that the additional revenues brought in from the rural service are fully as great, in each community, if not greater, than when city service is first established in a town when it gets large enough for that service—large enough to have it established.

I think that a man who lives 5 or 10 minutes' walk from the post office is just as apt to do as much mail business before the establishment of a service that brings it to his door as he is afterwards. He certainly is more apt than the man who lives 5 or 6 miles out in the country and can not get to the post office more than once a week or once every two weeks. There is a point where I think the city service is just as lacking in bringing about any increase in business as is the rural service.

Along this line, I will say that the rural carrier does a lot of work for which he is given no credit. I wish to call your attention to the counting and weighing of the mail on which the postage is computed on the mail matter we deliver and collect. That is done in July of each year. That is done at the very lowest ebb of the postal business, and that is the only record we have of the postage on the mail delivered and collected.

Mr. ROUSE. That has nothing to do with your salary.

Mr. HUNT. No; but the argument is made that we are not paying expenses, and it is based on that count. Another thing that the rural service receives no credit for is the second-class matter. That is not counted in our counting period. No count is made of the postage on second-class matter.

Mr. ROUSE. Is it your opinion that postage on second-class matter should be increased?

Mr. HUNT. I wouldn't like to declare myself on that particular.

Mr. ROUSE. You know that if Congress gives to the employees an increased salary, they have got to make some arrangement to get that revenue. What suggestion would you make to this commission?

Mr. HUNT. If I was to make a suggestion along that line, I would suggest the restoration of the 3-cent postage on letters. I think it would work out to a better advantage to all concerned.

Mr. ROUSE. And let the postage on second-class matter remain as it is?

Mr. HUNT. I think I would. It would be an advantage to the farmer, because it brings the daily papers to him at a less price than if the postage was increased.

Mr. MOON. Do you think any class of mail should be carried for less than half the cost of transportation?

Mr. HUNT. No.

Mr. MOON. Then you wouldn't think that second-class mail should remain at the same figure.

Mr. HUNT. I would qualify that statement and make it all classes of mail. It seems to me, on first-class mail, if the postage was increased to 3 cents, that the revenue derived from that source would offset the deficiency in the second-class mail.

Mr. ROUSE. What is the difference in the cost of transporting first-class mail and second-class mail? Do you know what that is?

Mr. HUNT. No, sir; I do not.

Mr. MOON. Do you think that the people ought to pay 3 cents a ounce, or 48 cents a pound, for carrying that mail when newspapers and magazines pay less than 2 cents?

Mr. HUNT. I look at it in this way—that the consumers have to pay for it anyway. The cost of the newspapers to the farmers at the present time is as high as they can stand. It seems to me if the postage rate was raised they would have to pay more for their paper.

The CHAIRMAN. The rate on papers isn't so material as on the magazines. The farmers get their papers free as far as that is concerned.

Mr. HUNT. The daily papers from the city are an item. There are practically no dailies in the country.

Mr. MOON. You put the burden on the masses of people who send mail, instead of making the magazines pay something like what it costs to carry it, would you?

Mr. HUNT. I would say that I have never taken that matter into consideration very much.

The CHAIRMAN. That hasn't very much to do with the pay of the rural carrier, has it?

Mr. HUNT. No; not very much.

Mr. MOON. But it has a great deal to do with where we are going to get the money to pay the rural carriers.

Mr. HUNT. Another thing I want to call attention to that the rural carrier doesn't get any credit for is the delivery of relay mail to the city carriers—out to the storage boxes along the street. Undoubtedly that work saves the department thousands of dollars in extra help in the city service. The rural carrier gets no credit for it and he gets no pay for it.

Mr. ROUSE. Do you perform any of that work?

Mr. HUNT. I do.

Mr. ROUSE. Do you object to doing that work?

Mr. HUNT. Not what I do; but I know of carriers who have their carriage full, and I know of carriers who have to walk out to these boxes to find room for this mail in the wagon, and it certainly saves

the department a lot of money. We have seven carriers from our office and six of them deliver that mail. I don't think any of them carry it to exceed half a mile, and probably it won't average over perhaps 50 pounds a day.

Mr. ROUSE. How many miles do you travel a day?

Mr. HUNT. Twenty-eight and one-tenth miles.

Mr. ROUSE. What kind of a vehicle?

Mr. HUNT. Horse and wagon.

Mr. ROUSE. You couldn't use an automobile?

Mr. HUNT. I could a few months in the year, but I find it would not be to any advantage in the expense. That question brings up to the point about automobiles——

Mr. MOON (interposing). Let me ask you this: What is your salary now?

Mr. HUNT. Fifteen hundred and ninety-six dollars, including bonus.

Mr. MOON. What was your salary in January, 1914?

Mr. HUNT. Twelve hundred dollars. No; eleven hundred dollars.

Mr. MOON. You have got an increase from eleven to fifteen hundred dollars?

Mr. HUNT. I think that is when the routes were lengthened. At that time I had a 24-mile route. Now I have 28.10 miles.

Mr. MOON. What would you get now for a 24-mile route?

Mr. HUNT. Fifteen hundred dollars.

Mr. MOON. And you drew eleven hundred in 1914?

Mr. HUNT. Yes, sir.

Mr. MOON. You have had an increase of \$400 in four years.

Mr. HUNT. I think in 1914 the law was enacted giving us \$1,200. We were getting \$1,100 then.

The CHAIRMAN. Do you use one horse or two?

Mr. HUNT. Two horses; it is impossible to do the work with one horse. I wish also to call your attention to the extra mileage above 24 miles. In Pennsylvania I think that 90 per cent of the carriers would prefer a 24-mile route to the extra mileage, even if they were given the full rate of pay for the extra.

Mr. ROUSE. How would you serve the people on the extra miles?

Mr. HUNT. When the routes were lengthened out, the service was curtailed. There were 11 routes taken out of our county and the work put on the other carriers.

Mr. ROUSE. How many hours do you spend on your route?

Mr. HUNT. I think that the time averaged in my questionnaire was a little more than eight hours on the route.

Mr. ROUSE. That doesn't include separating your mail or making a report when you come in?

Mr. HUNT. I am making that approximate; I don't remember just the time. In the summer time, we are through sooner, and in the winter time we are often 10 or 12 hours on the route.

Mr. ROUSE. Do any of these routes out of your office use an automobile?

Mr. HUNT. Yes, sir.

Mr. ROUSE. How many miles do they have?

Mr. HUNT. Practically the same length.

Mr. ROUSE. How many hours does it take them to serve their patrons?

Mr. HUNT. Usually four or five hours on the route. What I say about my post office is probably true all over Pennsylvania. We could use an automobile probably six months in the year; some years, not more than five. This year we didn't get to using automobiles until about the first of June on account of the mud, but the automobile, in our section, is of no advantage whatever except that it saves a little time. A man must invest more money and his expenses are more with an automobile than with a horse. He simply gets in a little bit earlier, and it seems to me if he wants to go to that extra expense he should not be penalized for it.

The CHAIRMAN. How many boxes are there on your route?

Mr. HUNT. One hundred and twenty-six.

The CHAIRMAN. Approximately how long does it take you to serve each box? Suppose you had mail to deliver to each box, what length of time would you say it would take?

Mr. HUNT. I would estimate seven hours.

The CHAIRMAN. I don't mean that. I mean each box.

Mr. HUNT. That would be a hard question to answer.

The CHAIRMAN. I know you can't answer exactly. What I want to know is, your route is so long and it takes so long to travel it. I would like to know how long you are traveling; how long you are using the team?

Mr. HUNT. The service of the boxes doesn't require more than a half minute or three-quarters of a minute to stop the horse and put the mail in. If you have to sell stamps or issue a money order, it will take, perhaps, five minutes or more.

The CHAIRMAN. What I was trying to get at is how many miles an hour you will have to travel while you are traveling. That would give some idea.

Mr. HUNT. Approximately 4 miles an hour.

The CHAIRMAN. Going straight along?

Mr. HUNT. Going straight along.

The CHAIRMAN. Then it would take you two hours to serve your boxes?

Mr. HUNT. I would say about that.

The CHAIRMAN. You would have to drive at least 5 miles.

Mr. HUNT. Another point I wish to call attention to is the extra mileage. The last mile on the route is the hard mile, gentlemen, when the horse is exhausted, or nearly so, and the man, too, and he is still 4 or 5 miles from home. They are the hardest miles he has got, and they take more out of his equipment than any other miles on the route, yet we are only getting \$24 for these extra miles, and I believe that such a ruling creates a tendency to lengthen routes to an undue length in the matter of economy. Another point I wish to call your attention to is the deductions of pay when a man is not able to serve his full route. That, it seems to me, should be left absolutely to the discretion of the postmasters. You can rest assured if the people are not getting reasonably good service, that they are going to kick to the postmaster. But if conditions are such, as they often are, that a man can not serve his route in a day, and in serving part of it he does, perhaps, more work than he would ordinarily do

in two days, and he comes in and his pay is reduced because he doesn't get all over his route, it doesn't seem right. Sometimes he doesn't get in until after dark with no more than half his route served. I believe that has a tendency to make the rural carrier dishonest, because if he has done a big day's work and knows he won't get more than a half day's pay, he knows he had better say nothing about it.

The CHAIRMAN. He is apt to fudge.

Mr. HUNT. Speaking personally, I had a little instance of that myself. I went out on my route, got into a snow bank and was thrown out of the sleigh and hurt to an extent that I was sick and couldn't complete the route. I went back home and said to the postmaster, "I will stay here in the office, and if anybody comes into the office I will give the mail out to them if I possibly can." I stayed at the office all the day and I put all the facts in my report and it went to the department, and about six months' later a letter came from the department asking the postmaster to deduct \$2.46 from my next month's check. Those things can not be avoided. It was nobody's fault, and yet it was the law to deduct that from me.

You hear so much about the carriers being able to make a trip in 3 or 4 hours, but you don't hear so very much about the 8, 9, or 10 hour trips in the bitter cold. We had a carrier in our county three or four years ago that actually froze to death on his route. I was out in the same storm myself.

Senator McKELLAR. Where are you from?

Mr. HUNT. Greenville, Pa.

The CHAIRMAN. I am sorry to interrupt you, but your time is up.

Mr. HUNT. I have a brief partly prepared; I will file that with your secretary after I get home.

(Mr. Hunt subsequently filed the following paper:)

STATEMENT FILED BY MR. W. W. HUNT, GREENVILLE, PA.

I wish to add the following brief to the statements made before you on October 9, 1919. The statement calling your attention to the wide difference between the net salary of the rural carrier and that of the city carrier is, to my mind, the strongest argument in favor of an increase in salary for the rural carriers. I call your attention to the fact that the rural carrier is required to pass exactly the same civil-service examination and to measure up to the city carrier in education and intelligence. His duties require even more clerical work than do those of the city carrier. He must sell money orders, register letters, sell stamps, receive C. O. D. packages, deliver and collect for them; in short, he must conduct a post office on wheels, and practically any business which can be done at the post office can be transacted with the rural carrier. The rural carrier is exposed to all sort of weather conditions and must make his trip every day, if possible. He can not quit when he has worked eight hours and he gets no pay for overtime. I ask you, gentlemen, is it fair to ask the rural carrier to perform his duties for the same or less salary than the city carrier and then compel him to pay half that salary for the maintenance of an equipment to do the work, and at the same time pay the city carrier who uses a horse (mounted carriers, as they are called) ample funds to maintain their equipment. The city carriers and clerks are clamoring for more pay, and I think it is conceded by most people that they should have it, but before they are entitled to another cent of pay I believe that the 44,000 rural carriers in the United States, who are working for practically one-half the salary of the city carrier, are entitled to consideration. I appeal to your sense of fairness, gentlemen, and ask you to recommend such legislation as will place the rural carrier on an equal footing with his city brother.

To illustrate the condition of the rural carrier at the present time, I call your attention to a letter just received from a carrier in an adjoining county in which he gives an itemized statement of his living expenses, including maintenance of equipment, during the past year, and they amount to \$2,067.18. Salary, \$1,524, leaving \$543.18 to be earned after working hours or else go behind that much. Another gives his living expenses and upkeep at \$1,973.68, but does not state salary. Another states that he sold a small farm a few years ago and entered the rural service, had \$1,800 in cash when he started, all of which is now gone and he is \$900 in debt. Another states that his wife is obliged to take in washing in order to make a living for the family. Is it any wonder that there are so many resignations and that it is so hard to get carriers to fill vacancies?

Regarding postage rates and the raising of revenues to carry on the Postal Service, my answers to these questions were not intended as authoritative. I have never given the matter sufficient study to enable me to answer with any degree of accuracy. I consider that is outside my scope of duty.

Considering the delivery of relay mail belonging to the city carriers to storage boxes located along the route, while in some cases the work is not so hard, but there is this point to consider: the heaviest load comes when the rural carrier has a heavy load of his own mail, and in bad roads he needs to get away as early as possible, and if compelled to wait for the city carrier's sack of mail he is delayed in getting started, and must also stop and unlock the storage box and lock it again. This work undoubtedly saves the department a large amount of money in the city service, but as it is done by the rural carriers, they should be paid a reasonable amount for doing it. This could be done by allowing each office where such service is performed a certain amount of money for that service, to be divided in an equitable manner by the postmaster among the carriers performing the service. As stated in my remarks before you, the use of automobiles in my State is not worth consideration, as they can only be used a few months in the year, and their use calls for extra expense, and therefore the fact that those who use them can make their trips in shorter time than with horse-drawn vehicle should not be considered. Where climatic and road conditions are such that a motor car can be used the year around, the present law covering motor routes solves the problem.

The plan of paying rural carriers on a basis of the amount of mail handled has been suggested as the proper basis. In regard to this plan I would say that the item of upkeep expense, to my mind, makes it impractical, as a general rule. The carrier driving 24 or more miles and handling eight or ten thousand pieces of mail a month has the same expense for upkeep as does the carrier handling 20,000 pieces; the only difference would be the time required to route the mail, and that would depend a great deal upon the kind of mail it was. A carrier might route 20,000 pieces of one kind of mail as quickly as he could 15 pieces of another kind.

There are, however, cases where a carrier has a very heavy mail on a short route, a route below standard length and therefore not entitled to full pay of a standard route. Some provision should be made for the relief of such carriers where it is shown that they are doing as much or more than the average standard carrier, or an amount of work in excess of the average route of that length. I think that the amount of excess pay could best be computed by the local postmaster. He is the man on the ground and more conversant with the facts than anyone else, and would be in a position to recommend such excess compensation as would be fair to the carrier and the department.

I call your attention to the fact that the rural carrier is paid \$24 per mile for each mile traveled in excess of a standard route of 24 miles. I believe that the most efficient service can be given on routes not exceeding 24 miles in length. Longer routes require an excessive burden upon the horse at a time when he is least able to do the work, being tired from the long day's drive. Routes 24 miles in length are as long as can be served efficiently every day in the year without overworking a horse. But if it is necessary for any reason to make the routes longer than 24 miles the carrier should be paid pro rata. It is worth just as much to carry the last mile as it is the first.

As stated in my remarks before you, I believe that the matter of deductions in pay of carriers when entire route is not covered should be left to the discretion of the local postmaster, who knows the conditions better than anyone else. If a carrier willfully shirks his duty he should be penalized for so doing. But if he makes an honest effort to cover his entire route and is unable to do

so on account of conditions over which he has no control he should not be penalized, especially as the effort he has made in covering part of his route under such conditions is usually greater than would have been required to cover the entire route under normal conditions.

In consideration of the above statements I ask you to recommend the following salary legislation for rural letter carriers on horse-drawn routes, and a proportionate salary for motor routes. Entrance salary, \$1,500 per annum on standard routes of 24 miles; extra mileage at same rate per mile. A gradation of \$100 per year for three years; \$600 per annum for maintenance of equipment; extra pay for relay and lock-pouch mail, and no deductions in pay for inability to cover routes.

I notice that some carriers favor a plan whereby the department shall pay the exact amount of upkeep of equipment. It seems to me that such a plan would involve a lot of clerical work and unnecessary expense. While there is some difference in the cost of horse feed in different sections at a given time, I think that, taking one year with another, it will not amount to much, and therefore I believe that a flat rate of allowance for upkeep would be the best plan. I believe that \$600 a year would be a fair allowance; surely it is not too high, and probably less than the majority are obliged to pay; yet I think the carriers, as a whole, would be satisfied with that amount.

STATEMENT OF MR. F. J. BARCROFT, VIRGINIA BEACH, VA.

Mr. BARCROFT. Gentlemen of the commission, in appearing before you on behalf of the 1,100 carriers in Virginia and the forty-odd thousand carriers in the United States, I want you to feel that I am not appearing before you as a man asking alms or as a sinner asking charity, but as a laboring man asking justice. We are a class of men who perform arduous duties under adverse conditions, and if you gentlemen were fully conversant with them I am sure you would not think that one thing we are asking for is in excess of what we deserve.

If you will allow me to digress, I made my departure from home yesterday. I had made all preparations to attend this meeting here before you gentlemen on behalf of my fellow carriers. I had a horse that was taken severely ill with spinal meningitis. I live at Virginia Beach, about 18 miles from Norfolk. I phoned to the city and got the services of a veterinary. He came up and labored very faithfully—I in conjunction with him—until just a few minutes before my train time, when I left, so that I could catch the train and appear before you gentlemen. When I left, my horse was lying on the ground, apparently lifeless, and, in the opinion of the veterinary, would be dead probably before I reached the city of Norfolk. That horse entails a loss to me of about \$150, which it is necessary for me to replace on my return to my vocation. In the circumstances under which I have been laboring during the past few years, it will be a hardship for me to replace that horse. I think if you were familiar with our conditions you would not think that we are asking anything unreasonable.

If you would give us an entrance salary of \$1,500 a year, I think it would be what is justly due us. As to maintenance allowance, give us an allowance that will not penalize us for performing the duties of the Government—the duties the Government places upon us—and I think we will be thankful to you and consider ourselves in a measure justly paid. There isn't a branch of the service that I know that performs work for the Government that is penalized to the same extent that the rural carriers are.

We are getting a salary, say, of \$1,500 on a standard route of 24 miles, which includes our bonus. If we work overtime—and I mean by overtime if we traverse a route in excess of 24 miles—instead of being paid overtime in excess of the regular work we perform we are penalized to the extent that we have a deduction made for every extra mile of the difference between \$62.50, which is the regular rate per mile for the regular route, and if we have to cover a longer distance you make a deduction of the difference between \$62.50 and \$24. I ask you, gentlemen, in all justice is that right?

We are working, the same as any other laborer, overtime. The longer the road and the more miles the more arduous our task becomes. Then we have our team to care for, and in addition we have to keep our equipment in up-to-date order. No man is merciless enough to perform his duties for the Government and then come home with his team, throw the lines over the dashboard and say to the horse, "You have performed your duties; now go shift for yourself." We have to curry and groom our horses, feed and water them, and care for them, and that is as much performing our duties as when we are in our offices and on the route. We are performing our duties when we traverse the distance from our homes to the office as much as when we are performing the work in that office. In the interval between the time when we leave home and on returning we are performing our duties, just as much as when we are performing the duties imposed upon us in the office. After we get home frequently we are tired and worn out, but we have our team to care for. It has to be stabled, fed, and watered. All these hours that we put in do not appear on our report. You gentlemen don't understand that situation. You see a report that states that we report at the office at 9, leave at 9.50, return at 5.40, close at 6, and that is all that is stated. Frequently when we leave at 6 we have 2 miles to drive to get home. Then after we get home we have to care for our teams—water and feed it.

All these things enter into our daily occupation just as much as though we were in the office performing our duties, and while we are making no claim for that outside work we are performing, at the same time we do think, in justice to ourselves, that it should be brought to your attention, and we think we should be given some consideration for this labor that we have to perform in order to get in condition to do our duties and do them accurately and well.

Senator McKELLAR. What is the length of your route?

Mr. BARCROFT. Thirty-five and twenty-four hundredths miles; I have a triweekly route.

Senator McKELLAR. How many horses have you?

Mr. BARCROFT. Two; I drive double every trip.

Senator McKELLAR. And one wagon?

Mr. BARCROFT. I have a wagon and a cart. There are times when I can not use a wagon, and I drive a two-wheeled cart.

Senator McKELLAR. How many hours a day are required to serve your route?

Mr. BARCROFT. Usually 9 or 10; sometimes 15 or 16, and frequently I do not return until the next day.

Senator McKELLAR. What do you get?

Mr. BARCROFT. I get, including bonus, \$1,182.

Senator McKELLAR. How much does it cost you to keep your team?

Mr. BARCROFT. On an average of \$65 a month for the two horses.

Senator McKELLAR. Let me ask you one other question. It takes nine hours a day three days, and you have the other three days off?

Mr. BARCROFT. I have the other three days to work on my equipment. There is a condition on my route where it means, on account of those unusual conditions, replacement of my gear every three months. Last summer I had an entire new equipment; this October 8th, I made an order for replacement of the gear. That is due entirely to the salt water conditions under which I perform my labors. My route is on the sea coast and it traverses the Virginia beach, right on the coast. If you gentlemen know anything at all about the action of salt water, you know that it is of such a corrosive nature that all the iron bolts and iron parts have to be replaced. That is an unusual condition that exists with me, and I do not have anything to say in that connection as prevailing with the other carriers, but I want to assure you that in individual cases, even, there are lots of things that arise that you gentlemen are not conversant with, and those things, I think, should have some consideration.

What I would lay stress on is that you give us some equipment allowance. If you give us a salary, do not take 50, or 60, or 75 per cent of that salary away to make us perform the duties you impose upon us. If you are going to pay us, pay us a salary that we are going to have some assurance that we will receive net, and not be at the mercy of the whims of the feed man, and the blacksmith, and the harnessmaker for replacement of articles used in the service of the Government. I ask you gentlemen, any of you, if you were to accept a job for twelve hundred dollars tomorrow, and then the employer would impose upon you an expenditure of seven hundred dollars of that twelve hundred dollars to perform your duties, do you think he would be treating you exactly right?

Mr. STEENERSON. Who do you think could get the feed and the blacksmith work cheaper, the United States or yourself?

Mr. BARCROFT. That is a hard question. It is a hard proposition. I think, if you will allow me to express an individual opinion, the rural carrier can, because I think the tendency always is to put it over on the Government whenever occasion arises, and I think if you gave us a compensation that would be somewhere commensurate with the expenditure we put on our equipment, it would help us more than any one item you could give us.

BRIEF SUBMITTED BY FRED J. BARCROFT FOR THE RURAL CARRIERS OF VIRGINIA.

In presenting what requests I wish to make on behalf of my fellow carriers of the State of Virginia, I shall try to be brief, and state in as few words as possible what I construe to be the desires of a large majority of the carriers whom I have the honor to represent.

First, we would ask for an entrance salary of \$1,500 for a standard route of 24 miles, with the same pay for mileage over standard, as is deducted for less than standard.

Give us an equipment allowance of \$600 on standard routes, and fix an allowance in proportion for routes above and below standard.

We would also ask for just compensation for carriers who carry lock pouch, loop route, or city carriers' mail compensation based on weight and distance for which same is carried.

While there are many things pertaining to our work which we feel are justly entitled to consideration in fixing our compensation, we feel that to dwell

upon them a length would impose upon you gentlemen, and we therefore ask that you give due consideration to the few requests that have been made in this brief, and we feel sure that after looking at the matter simply from a standpoint of common justice to a hard-working, faithful, competent set of Government employees, you will see the necessity for granting our request. Our brother carriers in the city service who are doing work similar to ours, although not near so arduous, who do not suffer the exposure or road conditions under which we have to labor, do not perform the many tasks of issuing money orders, registering, or insuring mail, receive full pay for all equipment expenses, while we who perform all these tasks mentioned, and many others not enumerated here are compelled to take from our insufficient salary to the extent of about 60 per cent of the entire amount to maintain our equipment, after we have furnished same for use of the Government in the discharge of our duties.

Gentlemen, I ask, in all fairness and justice, grant us an adequate equipment allowance, and I feel sure, that after your very hard and difficult task has been brought to a conclusion, you can each say from your hearts in all sincerity and truth that you have rendered a just verdict to the faithful, loyal, hard working rural carriers of this, the grandest Government on the face of the globe.

I wish to thank you gentlemen for your kind patience and uniform courtesy on the occasion on which we have had to approach you.

STATEMENT OF MR. FRED. S. RUSSELL, CHESTERTOWN, MD.

Mr. RUSSELL. Mr. Chairman and honorable members of the board. I do not think there is very much left for me to say.

Senator McKELLAR. Where are you from?

Mr. RUSSELL. Chestertown, Md. I do feel that these carriers who serve loop routes or deliver pouch mail should have extra compensation for their labor.

The CHAIRMAN. It has been authorized, has it not?

Mr. RUSSELL. Some of them do not get it.

Senator McKELLAR. What is the length of your route?

Mr. RUSSELL. Twenty-five and nine-tenths miles.

Senator McKELLAR. And your compensation is how much?

Mr. RUSSELL. Fifteen hundred and forty-eight dollars.

Senator McKELLAR. How many are in your family?

Mr. RUSSELL. Well, in my immediate family there are four. I have an invalid brother and sister and help to support them; but that is not in my immediate family.

Senator McKELLAR. How much of your time is taken up in carrying mail?

Mr. RUSSELL. Well, on the route it is an average of four and a half to five hours a day. In the office, performing my duties prior to going out, and after returning, I am frank to say about six and one-half hours a day altogether. It takes one to two hours a day keeping equipment in shape.

The CHAIRMAN. You don't mean to say that you make that route with horses?

Mr. RUSSELL. No, sir; I use an automobile about eight months of the year.

Senator McKELLAR. Do you keep an automobile and horses, too?

Mr. RUSSELL. I did keep a horse until I found I could economize a bit by hiring a horse. I can hire a horse during the winter months at \$2.50 a day, furnishing the harness and wagon. I do that for about three months of the year. I figured that that was cheaper for me than keeping a horse all the year round.

Senator McKellar. So you just keep and maintain an automobile for about nine months of the year, and then the other time you hire a team?

Mr. Russell. Yes, sir. There have been times when I used a horse four months.

Senator McKellar. Are you enabled to engage in any other business?

Mr. Russell. Yes, sir; I do.

Senator McKellar. What kind of business?

Mr. Russell. I get my mail at noon. In the morning, I have a brother who runs a newspaper. I am a printer by trade, and I assist him before going to the post office. I get in an hour or two there a day. Then I am happily situated in other respects, because of my brother. He runs a moving picture theater, and at night when I am able to get back in time from my work I assist him there and get a little compensation for that.

We have carriers in my State—there is one about 12 miles from my home office, serving an intermediate post office, lock-pouch mail, a distance of about 5 miles, for which he gets no compensation. That is an extra burden he should be compensated for. We have two routes out of Westminster who serve loop routes, a distance of 6 and 8 miles, that they get no compensation for. That is another burden that is placed on the rural carrier for which they get no compensation.

Still another burden on the rural carrier that the city carriers do not have is the C. O. D. system. Of course, I can not recommend anything to you gentlemen about revision of the C. O. D. system, but about a week ago I was obliged to drive about a mile off my route with a C. O. D. package. This party for whom it was intended was not home. I asked his wife to take the package. The amount due on it was twenty-one dollars and something, and she said, "I haven't got the money; can't you leave the package?"

Mr. Moon. Ought there be any difference between the pay of a carrier who traverses level country with an automobile and can perform his duties in four or five hours a day and a carrier who has the same length of route in a mountainous, rough country, where it would take him 9 or 10 hours a day to serve it?

Mr. Russell. I would say yes, personally. Yes, sir. That is the way I feel about it.

Mr. Moon. How much difference ought there to be?

Mr. Russell. It should be a pro rata per hour for the extra service.

Mr. Moon. You would then reduce the man with the automobile to about half what the other man would get, so far as compensation outside of maintenance of the team is concerned, wouldn't you?

Mr. Russell. I don't just get you.

Mr. Moon. I say that a man who has an automobile has to keep that up and the man who has a wagon and a team has to keep that up, but it takes the man with the wagon about nine hours and the man with the automobile about four hours a day.

Mr. Russell. There are automobiles that travel these hilly countries, too.

Mr. Moon. I know they do, but some of them have very level countries. The point that I wanted to make is that you stated a man ought to be paid according to the service they render and the expense

they incur. Now, there is a good deal of difference in the length of time necessary to perform that service by one method and the other and there may be some difference—I don't know which way—in the expense incurred, but that can all be considered and met in fixing the compensation.

Mr. RUSSELL. I would say, personally; yes, sir. I feel that is the just way. It is not my privilege to say how you gentlemen should fix this, but it is my belief that it should be an allowance of so much per mile. Our national convention asked for \$600, regardless as to mileage, but I believe a man traveling 36 miles, or even 30, should have more than a man serving 24. I have practically 24 miles.

Mr. MOON. Is that regardless of the country he travels over and the method of traveling?

Mr. RUSSELL. Yes, sir. I figure in my State, from the figures I have been able to obtain, that it is approximately 11 cents a mile for an automobile, and for a horse about 10 cents a mile, so that the difference in the expense of the two methods of conveyance is about equal.

Mr. MOON. Is what?

Mr. RUSSELL. Practically equal.

Mr. MOON. You wouldn't make any difference with regard to the means of transportation employed; you wouldn't make any difference due to the fact that one man has about nine hours to perform his duties? You would make that the same as a man on a level route?

Mr. RUSSELL. That's hard for me to say.

Mr. MOON. In other words, if you could perform all of the duties of the day in four hours and a half, ought your pay be the same as a man who takes all day to perform his duties, due to the rough roads?

Mr. RUSSELL. Well, if he doesn't cover any more miles, I don't think that he should have any more.

Mr. MOON. In one case, the man is engaged all the time, and in the other case, the man is engaged only half the time, and the other half is working at something else. You think the pay ought to be the same whether they work four and a half or nine hours a day?

Mr. RUSSELL. I think the only just and equitable way is to pay a man according to the miles he travels.

Mr. MOON. Without any regard to the means of travel and the section he is in?

Mr. RUSSELL. I believe that is the just way.

Mr. MOON. I just wanted to get your views.

Mr. RUSSELL. We have a carrier in our town that has a 31-mile route. The road conditions are such that for about four months in the year he employs a substitute to serve about 6 miles of that route to enable him to get back before dark. Our facilities down there are different from lots of carriers. We don't get our mail, at the best, before 11 or half-past, and it is 12 or half-past before we can get away on our routes, and through the long winter months it is very rarely that we can get in before 7 o'clock. This carrier who has a 31-mile route employs a substitute to serve about 6 or 7 miles and pays him out of his own pocket.

Mr. MOON. Your theory, as I understand it, is that a man who travels 36 miles a day should have so much money for each mile he travels?

Mr. RUSSELL. Yes, sir.

Mr. MOON. And the man who travels 24 miles a day should have so much per mile for the amount he travels, although it might take the man who has 36 miles, by reason of the fact that he has good, smooth roads, only four hours to perform his duties and it may take the other man nine hours to perform his duties. You say the pay ought to be the same?

Mr. RUSSELL. We ask that he be given extra pay for this extra mileage.

Mr. ROUSE. He didn't understand you.

Mr. MOON. Maybe you didn't understand what I meant. For instance, you have a route 36 miles long. You want so much per mile. It only takes you four or five hours a day, on account of the advantages of your route, to comply with the duties fully. Now, another man has 24 miles, and he has a very rough country, and it takes him nine hours a day to do his duty. Do you think the man with the 36 miles ought to be paid the same as the other man—as he would be under that state of affairs, if it is paid by the mile—as the man with the 24 miles?

Mr. RUSSELL. I am not in a position to answer that question.

Mr. MOON. In what?

Mr. RUSSELL. I am not in a position to answer that question.

The CHAIRMAN. Do you carry any closed-pouch mail?

Mr. RUSSELL. No, sir; I do not.

The CHAIRMAN. I understood you to say you carried closed-pouch mail but didn't get any pay for it.

Mr. RUSSELL. I said there was in my neighboring county, about 10 miles from my home, a carrier who serves an intermediate post office, and he has never received any pay for carrying this locked-pouch mail.

The CHAIRMAN. What distance does he carry it?

Mr. RUSSELL. About 5 or 6 miles. There are two carriers in Westminster who carry it 7 or 8 miles.

Mr. STEENERSON. The law authorizes the Postmaster General to pay in his discretion.

Mr. RUSSELL. Exactly so. That law should be mandatory.

Mr. STEENERSON. That is the reason they are not paid?

Mr. RUSSELL. Exactly so; and that is the reason I am asking you gentlemen to make it mandatory.

Mr. STEENERSON. If a carrier had a light route and was not employed an unusual length of time, it would seem fair that he should do that work without extra pay.

Mr. RUSSELL. But I feel that I can frankly say that these gentlemen are carrying on an average every day—

Mr. STEENERSON (interposing). Congress intended to vest that discretion in the Postmaster General, to exercise it where it was thought best.

(Mr. Russell submitted the following brief:)

BRIEF SUBMITTED BY MR. FRED S. RUSSELL, CHESTERTOWN, MD.

While being fully persuaded that you have at your command, aside from the evidence gleaned during your hearings of the past eight weeks, and your own personal knowledge of the advanced cost in living, statistics, which are proof positive, such as will warrant your recommending on behalf of the rural letter

carriers of these United States a very material increase in compensation for their hire. Yet, as the chosen representative of the carriers of the State of Maryland to present their plea for relief before your honorable board, I deem it my duty to supplement the few meager and interrupted remarks made at your hearing in Washington, D. C., on October 9, to submit for your further consideration a detailed brief of conditions as they exist in this State.

I shall, in the hereinafter presentation of facts and figures, compiled from bona fide statements furnished by the carriers throughout this State, endeavor to show wherein a certain body of American laborers, serving an American people, for an American Government, are insufficiently compensated and unjustly discriminated against; and sincerely trust that the same will in an appreciable degree suffice to justify the very liberal allowance which I am constrained to believe, in your final summing up, you shall recommend.

Before entering into details with reference to conditions as they exist in the State of Maryland I beg leave to invite your attention to the fact that the ever-upward trend in prices of foodstuffs and materials, with respect to the life of a rural carrier, a twofold problem, which requires solution, is presented. Not only does the paltry salary received by the carrier feel the added levy in procuring the necessities of life, with which to sustain and clothe himself and his dependents, but the equipment—the means with which he renders daily service to his patrons—and the upkeep thereof, which by law must be adequate and admit of rigid inspection, being wholly financed by the carrier, at advanced prices, thus lessening the purchasing power of the dollar and likewise decreasing the daily wage of this body of Government employees, and in your wise and earnest deliberations I am hopeful that this phase of a rural carrier's plea for justice will be given due consideration.

DUTIES OF THE RURAL CARRIER.

In no branch of the Postal Service are the duties of an employee so manifold as that of the rural carrier. At post offices in the cities and larger towns the tasks which the rural carrier is called upon to perform are by a well-devised system expedited in various departments, with the duties of an employee or set of employees confined to his or her or their special department. The same is also true of the city carrier, and the railway post office clerk, each in his daily toil performing only such labors which by law his position requires; while the boys in the rural service, each and every one practically moving post office, being compelled, almost without exceptions, to transact any or all of the duties which, as stated above, are functioned in the various branches.

Upon reporting at the post office the rural carrier is not only obliged to separate and case up the various classes of mail and prepare same for his journey down through the valleys, up the rugged, hilly highways, combating the elements, be they such as the All Wise One deems best to send. Yet again, once in every quarter he is called upon to count and weigh each class of mail matter separately, and keep an accurate record thereof, and at least once in every year, the department demands that in addition to the counting and weighing of the various classes of mail the correct amount of postage affixed to each class of mail be compiled for the month.

While enroute the carrier is obliged, for the convenience of his patrons, to have on hand at all times, a supply of stamps, cards, envelopes, etc.

He is required to register a letter, collect from the boxes the mail deposited therein; receive any C. O. D. or insured parcel, affix the proper amount of postage; issue receipts for money orders, taking the cash, and upon returning to the post office see that the same is properly taken care of. He is also obliged to dismount and open half a dozen gates in order to present in person a special delivery or registered letter. To the patron's door he is called upon to convey a C. O. D. parcel, and should the consignee be in a distant field, he patiently whiles away the time until he can be sent for and returns with the necessary cash to relieve him of the valuable package. Should a patron by fortune or misfortune be upon the pension list of Uncle Sam, at intervals of three months duration he is visited by the carrier with a check covering his or her quarterly allotment, comparing the number on check with that of the voucher to ascertain if they tally. If a money order is presented with a request that the carrier have the same cashed, he cheerfully conveys it to the post office, has it redeemed, returning on his next visit the hard cash. Thus you will note that the rural carrier the latest addition to the postal family, must be equipped and qualified to perform any or all of the duties of the various branches of the postal service.

Notwithstanding these cold facts the rural carrier is the lowest-paid employee in the Government's postal department.

EXTRA BURDENS IMPOSED WITHOUT COMPENSATION.

In substantiating the claims of the rural carriers that they are unjustly discriminated against, I cite on behalf of the rural carriers of the State of Maryland, a few of the burdens added to the carriers' daily toil for which compensation, though authorized, is withheld; and I earnestly beseech that in your deliberations you will accord the following your most careful consideration:

First, I would invite your attention to a condition at my own office, that of Chestertown, Md., from which five routes emanate. Carrier Charles E. Hadaway, on route No. 5, which is 29.6 miles in length, is at present delivering parcel post within the city limits, to Washington College. This institution, with upward of 100 students, principally nonresidents of the town or county, who are recipients of many parcel-post packages which Carrier Hadaway is compelled to deliver; while the first-class mail is served by the city carrier. The amount of mail handled will average 10 to 15 packages a day varying in weight from 2 to 50 pounds per piece. Bro. Hadaway gives as a conservative estimate, from 9 to 12 pieces, with a daily average of 50 pounds weight. He carries this mail matter a distance of one mile and then is obliged to dismount, without regard to weather condition, and deposit same in a receptacle some 8 or 10 feet from the road side. For this added burden he receives no compensation.

Another evidence of the department's inclination to discriminate against the rural carrier, and about which I made a few remarks at your Washington hearing, is a condition existing at Millington post office, one of the larger towns in the county, lying about 14 miles northeast of the county seat. Carrier N. A. Wallen, on route No. 1, is performing star-route service in addition to rural service. I am quoting in full his letter to me under date of October 28, which will give you first-hand information of the unjust burden imposed on this carrier. His letter is as follows:

MILLINGTON, Md., October 28, 1919.

FRED S. RUSSELL,
Chestertown, Md.

BROTHER FRED: Received yours of the 23d instant, and in reply will try to state the conditions as asked.

I serve the Crumpton (Md.) post office with the mail that arrives on 10.26 a. m. train, which amounts to from two to four pouches per day (one being a closed pouch for first-class mail), with numerous outside packages not handled in pouches, the weight of same running from 20 to 170 pounds per day.

The distance being $5\frac{1}{2}$ miles to Crumpton for the delivery of same.

On my return I leave Crumpton post office with two closed pouches (one being a locked pouch first-class mail) and also outside packages consisting of crates of eggs, regular boxes or canned tomatoes, baskets of fruit, etc., the weight running from 10 pounds to 180 pounds per day, the distance carried being $8\frac{1}{2}$ miles.

The post office at Crumpton is eight-tenths mile from the main rural route now traversed by me, causing me to travel $3\frac{1}{2}$ miles extra daily to deliver morning mail for the 3.06 p. m. train.

I do not get paid for carrying closed-pouch mail as per law of July 28, 1916.

I use a Ford car (touring), and at times it puts me to guessing as to how to load to carry all of the mail.

It is not always the quantity or the weight but the bulk of the fragile mail.

For instance, I have two millinery stores to serve and have at times four to six large pasteboard boxes of hats, which fill the back part of the car without the heavier mail.

I do not know just how to figure the time it takes to handle the pouch mail, because I hardly know what you mean.

But, anyhow, it takes me from 25 to 30 minutes to run to Crumpton to deliver and about 50 to 60 minutes returning from Crumpton with the collection, and it takes about 30 minutes outside of the time mentioned above.

If I did not use the Ford touring car, I could not begin to handle the mail on my parcel-post wagon on a majority of times.

I have never kept the actual expense of this part of the service, but you can readily see what $3\frac{1}{2}$ miles travel daily will mean for the year.

Yours,

M. A. WALLEN.

Then, again, there are carriers handling loop-route mail, and for which service no pay is received. At Westminster, Md., post office two carriers, each with more than standard-length routes, are serving loop-route carriers, each conveying this extra mail between 6 and 8 miles. There are many other such incidents, and I am more than persuaded that you have heard of thousands of such cases, during your hearings and mention these only to show the variety of duties imposed upon the rural carrier which rightly belong somewhere else, or he should receive a just reward in compensation for this extra toll.

As a further evidence that the rural carriers are discriminated against, and I might say, very grossly so, is, when we consider the mounted carriers in the city service are receiving an equipment allowance, which in amounts, I am informed, vary. While I have heard it stated that some were allowed the total expense for use of conveyance, though it amounted to \$1,000 or more, I personally heard a city carrier, representing the State of Pennsylvania, remark at Washington that some of them were receiving \$500, which was inadequate and they (the carriers) were asking for an allowance of \$750. Gentlemen, may I ask, is it just that the city carrier, who, almost without exception, has the advantages of paved streets or otherwise improved highways, have all of the greater part of the expense of equipment and up-keep allowed, while the rural carriers, the boys who are obliged to fight their way through the mud and snow, rain or shine, over rough, hilly highways and unimproved byways bear the burdens and expense of maintaining an adequate and suitable equipment without one penny allowance whatsoever?

In concluding this portion of my brief I wish to refer but briefly to the recently established parcel-post or motor-truck routes. The carriers or drivers of these trucks receive, as an entrance salary \$4 per day, and also are granted a material increase after a short period of service. I have in mind a driver on the route which passes through Chestertown who at present, after six months' service, is receiving \$4.50 per day, or a total of \$27 per week. And for this salary he is obliged to perform but three days' service each week. While his hours for these three days are long and his labors arduous, yet he consumes but from 36 to 40 hours per week. His salary is every cent net, as the department furnishes the truck and the expense of upkeep and running the same attached thereto.

CARRIERS ASK AN EQUIPMENT AND MAINTENANCE ALLOWANCE.

On behalf of the carriers of my State I most earnestly appeal to your honorable board to include in your recommendations a just and liberal recognition of the plea of our national organization for an equipment allowance. The amount petitioned for by our national association, as you are aware, was a flat sum of \$600 per annum; while this amount in some instances would prove fully adequate, and in others, I feel free to say that, in my opinion, it would more than cover the actual expense incurred, yet I am equally as frank to state that, in many cases, this amount would be far from sufficient. As stated in my remarks at Washington, after giving the matter much serious thought, that the only just and equitable way to meet this situation would be an allowance of so much per mile, said sum to be arrived at from the various statements you have gathered at the various hearings and figures as given in the questionnaires which the carriers were required to fill and file.

From figures furnished by carriers throughout my State, where the number of miles traveled were given, the expense incurred varies from 8½ cents to 12½ cents per mile, the same applying to horse-drawn routes as well as when carrier uses auto, also where both were used a portion of the year. The questionnaires, however, will show the number of miles each carrier traveled and the expense incurred in maintaining his equipment.

I desire right here to make reference to a question asked me by Mr. Moon at the Washington hearing wherein he compared a 36-mile route, where the road conditions were such as to permit the carrier to perform his duties with an automobile in 4 to 5 hours, with a carrier on a 24-mile route, over rough hilly roads, using horse and buggy, and consuming 9 hours per day. Now gentlemen, I hardly think this a fair and just comparison, for we all know better time can be made with an auto than by the horse-drawn vehicle. And as stated at Washington, I knew of no such condition in my State. After giving this question much serious thought I am still convinced that the pay for equipment should be upon the mileage basis, regardless of the time consumed. In support of this conviction I will state that, to my mind, it is im

possible for a carrier to assort, pack, and deliver mail over a 36-mile route with an automobile in 4 or 5 hours; admitting this is possible, should the carrier be penalized for benefiting so many extra patrons, such as you would expect to reside along the extra 12 miles traversed? Should he be made to suffer by his Government for rendering for it, and, as its employee, this better service? Then, again, gentlemen, is it not the better judgment, to assume that the expense incurred in thus rendering this higher grade of service, greater than by the use of horse and wagon? Does it not cost for each additional mile over and above the 24 just as much per mile as beneath it? Isn't the amount invested in equipment greater? Then, gentlemen, I must state, in my opinion, he is justly entitled to additional pay for these extra miles.

As an additional evidence of the needs of such relief by the rural carriers, I am giving below the actual monthly average per carrier from counties in various sections of the State. The figures show average for whole country, not any special route:

County.	Routes.	Average per month.
Montgomery.....	30	\$55.96
Frederick.....	12	50.00
Carroll.....	45	52.75
Prince Anne.....	15	60.00
Stafford.....	18	50.00
Prince George.....	14	52.50
Kent.....	15	55.00
Washington.....	32	50.00
Howard.....	8	45.00

I also have statements from individual carriers in other counties where no county average is given, yet the figures run in about the same proportion as the above.

STATEMENT OF MR. L. H. WOLFINGER, HAGERSTOWN, MD.

Mr. WOLFINGER. I think it would be wise for me to file my brief and say "Amen," to what the other brothers have said. I want to mention, however, that we have a carrier in our country traveling 19.9 miles, and he only gets paid for 18 miles, due to the fact that they are based on 18 and 20. He travels one-tenth of a mile less than 20 and only gets paid for 18.

I think we are entitled to a maintenance over and above the regular salaries, which should be the same as the city carriers and clerks. Our expenses and living expenses are just as great as theirs. I use an automobile a portion of the year and have about \$1,200 invested in equipment. The only reason I use an automobile is that it gives me extra time to put in on other work.

Senator McKELLAR. What is the upkeep?

Mr. WOLFINGER. It runs me close to \$50. My main trouble is tires; I can never get the guaranteed mileage out of tires. I suppose that is because I have a very hilly country and going up the hills and down is extra hard on the tires.

Senator McKELLAR. Where do you live?

Mr. WOLFINGER. In Hagerstown, Md. Only about a third of my route is piked, the rest is slate ground, and in the winter the bottom drops out of the roads and you have to use a horse. I have a regulation mail wagon and a buggy and a sleigh.

Senator STERLING. In that locality do they have the two equipments—the other carriers?

Mr. WOLFINGER. There is only one other carrier out of Hagerstown that has an automobile.

Senator STERLING. Do you have to keep a horse?

Mr. WOLFINGER. I have two horses, but I have a place of about 2 acres where I can raise corn and feed, and it helps to cut down the expenses a little bit.

Senator McKELLAR. What is the upkeep on your horses?

Mr. WOLFINGER. It amounts to about \$50 a month.

Senator McKELLAR. What is your salary?

Mr. WOLFINGER. \$1,572.

Senator McKELLAR. How many in your family?

Mr. WOLFINGER. One child, my wife, and myself.

(Mr. Wolfinger submitted the following paper:)

As representative of the rural letter carriers of Washington County, Md. I desire to present a few facts for your consideration, with a view to an adjustment of the salary of rural carriers.

All postal employees are poorly paid as compared with other liens of employment, and I believe you will find that the rural carriers receive less pay than any other class of postal employees, this because the rural carrier is required to furnish and maintain the equipment necessary for the proper delivery of mail on his route.

Our pay has not been increased from 1914 to June 30, 1918, when it was increased 20 per cent. Last year we received an increase of 5 per cent in pay making a total 25 per cent increase, which we are now receiving.

Clerks and city carriers received the same percentage of increase, but a large part of our increase was required to pay the advance in cost of our equipment and maintenance of the same, and because of this expense which we have to bear the increase which we received made but little change in our living conditions, and no matter how much we and our families were required to make sacrifices our equipment had to be maintained regardless of expense in order to deliver the mail on our route.

Other employees work only eight hours and receive extra pay for overtime. We are required to do the work on our routes no matter how long it takes and are cut in our pay if we do not cover the entire route, however long we work.

During the last three years two extra employees have been added to the Hagerstown post-office force, where I am employed to take care of the work and, although the rural carrier's work has been increased in the same proportion, there has been no increase to our force since the routes were first established, many of the routes having been greatly increased in length also since then.

We feel that we should be paid for the actual mileage traveled in the same proportion as amount received for the standard route of 24 miles. One carrier in our county travels 19.9 miles every day and is paid for but 18 miles. We only ask for what we believe to be fair and proper—the same rate of pay as city carriers and clerks; in addition an amount sufficient to cover the maintenance of the equipment used on our routes, and you will agree that it costs the rural carrier just as much to live as it does any other employee. We submit, therefore, that if it is right and proper to give at this time the mounted city carrier \$100 per month in addition to his regular salary for the use of his equipment on the city streets it is a gross injustice to the rural carrier to be required to do his work, traveling all kinds of country roads, in all kinds of weather, doing the work he is now doing for the same rate of pay as the city carrier, with no extra compensation for use and maintenance of his equipment.

We also ask for extra compensation for routes on which the mail is extremely heavy. One carrier handles as high as 12,000 pieces of mail per month.

The condition of the roads should also be considered, and routes cut down to 24 miles in length, particularly in the spring and winter months.

Substitute carriers, we believe, should be appointed in the same manner as substitutes in the city delivery service, preference being given them in appointment in case of vacancy. They should also receive their pay at least once a month instead of each quarter, as at present.

We also request that rural carriers be paid at the post office where they are employed. At present we are paid from the Baltimore post office and it takes three days, sometimes much longer, after signing our vouchers on the last day of the month, to receive our checks.

We trust you will grant us a substantial increase in pay, which will enable us to earn a fair and comfortable living as a rural carrier, without being obliged to do extra outside work. Some of the carriers have grown old in the service, many of whom have rejected other good offers of employment, in the hope, each year, to receive a fair and reasonably adequate compensation for their work. Living conditions have become such that we can not longer delay our request for better pay. We feel that we are doing an important and valuable work, and should, therefore, receive a competent and reasonable compensation for our services.

We will appreciate your early and favorable consideration of the above.

STATEMENT OF MR. J. C. STAMBAUGH, YORK, PA.

Mr. STAMBAUGH. Mr. Chairman and members of the commission, I want to be just as brief as possible, because I feel that it is not worth taking up your time by recapitulating what has already been said, but I have just been wondering whether you know of the thousands of vacancies occurring in the rural service right now; how many rural carriers have been literally forced out of the service because it took every cent of their salaries to keep their families going and to pay the maintenance of their equipment, which will wear out, and when it does wear out at the end of three or four years, these men simply do not have the wherewithal to purchase the new equipment needed in the performance of their duty and are literally forced out of the service through that.

Those are the conditions; just like one of the men appearing here has testified of the unfortunate position that will confront him when he gets back home. There are plenty of carriers, when this position confronts them, who must go into debt, and, as a consequence, they either resign or are loaded down with debts, and that really is the average condition of the rural carriers to-day.

In that particular, I just want to make one recommendation to you gentlemen, and that is this: I think our monthly salaries should be divided, a certain amount should be stipulated for salary and the other portion should be expressly for maintenance of equipment. The proposition is just this: Suppose you have in mind a bill giving relief to the postal employees; you feel that the lower-grade men should receive the greater relief, and naturally you will make the greater appropriation for the lower-grade men, so that the highest-grade men receive the lowest increases. Now, we, unfortunately, through that arrangement are classed with the higher-grade men, but our net salaries are lower than the lower grades.

Take my own salary, for instance; I receive \$1,596 a year. When I have my expenses paid it amounts to something like \$1,000, and yet I am probably in the most peculiar position of any that have testified before you. I have heard the testimony at New York and Boston and here, and I do not believe there is a carrier who has testified he has expenses that are lower than mine. I pay only \$40 a month for my equipment, although I have heard some mumblings and grumblings from the livery men with regard to raising the amount we pay, which is \$40.

In my own county—and we have something like 90 carriers—we determined to find out what the facts were, and we learned that the average amount paid for maintenance of equipment is something like \$55 or \$60 a month, because the letter carriers are not all situated in first-class offices, where there are liverymen from whom to hire a team, and the consequence is that they have to invest from \$500 up to \$1,500. Lots of them imagine because the gross salaries are large that it is a good position. They have no idea what the expenses are before they come in and put a debt like that on their shoulders, and they imagine that in a year or two years they can pay it off. They don't know that when they come in they will be continually going deeper and deeper into debt. It is an astonishing thing, but every month a rural carrier finds that about 90 per cent of his personal mail is of that character that carries the urgent request, "Please remit," and he finds that he is more the custodian of a large part of his salary than the possessor of same.

In regard to the extra mileage, I would say that a 36-mile route in some sections of the country may be all right. It may be a great deal easier to carry a 36-mile route in some sections of the country than a 24-mile route in another section, but it will be the exception where those conditions hold true. I would say that the closer a route can be kept to 24 miles the better service can be rendered on that route. I find the unanimous sentiment among the rural letter carriers is that the extra mileage over and above 24 miles should be compensated at the same rate as is paid for the original 24 miles. Now, there is a great deal to be said, but I believe you will feel the justice of that statement, because it will do away with the longer routes eventually and especially during the winter months the rural carriers will be able to give a more satisfactory degree of service on these routes.

There is another thing that I believe should be given deep consideration by this commission, and that is the compensation to substitutes on rural routes. There are many rural carriers unable to take the annual vacation granted them by Congress for the simple reason that they can not find substitutes to take their place while they are off duty. I have had numbers of letters from rural carriers in different States who have written to me stating that they could not do this or could not do that, after they had made some arrangement to go to a certain place or attend a convention, because they could not get substitutes. I have been placed in that position myself.

The whole trouble is that the substitute carrier is not given the preference when it comes to making appointments to the regular places. Any civilian can come in and take the examination and will bear an equal chance with the substitute who has given some years to the performance of that service. I think that is an unjust condition and I believe there should be some remedy for that. I know there can be a remedy provided and I think it should be done.

I believe in every county there should be a certain number of substitutes available, and these substitutes, according to their standing on a permanent roster, could be appointed as vacancies occur. I believe that would go a great ways toward improving the service and, certainly, the condition of the men.

There are, unfortunately, a great number of vacancies in the Rural Delivery Service right now. I have been informed that there are places where examinations have been called at stated times and you can not get any one to take the examinations, because after the people have learned what the rural carrier has left at the end of the year, the positions are not desirable, and that is why there are no applicants for these vacancies, and that is something that will bring on a condition where you will get a lower grade of employees. The higher grade men will not take the examination.

There is one other thing I want to call attention to, and I will close with that. It is with regard to deductions from the salaries of rural letter carriers who are unable, through weather conditions or route conditions, to perform complete service on their routes. For instance, a man will be confronted with a severe snowstorm in winter, and I have seen conditions where we could not get out of town, the railroads being blocked and no mails coming in and, by the way, I have had friends from the Senator's State, if you will permit me, who have said that for over a week they have not received any mail and could not send any mail because no trains were coming in. These men have to provide for their families and feed their horses during that time. They report to the office ready to give their services. It is no fault of theirs that they can not give that service, no fault of theirs that they can not go out and combat the elements and perform that daily service. Naturally, there should be some leeway so that the carriers could not impose upon the department and say that conditions were bad when they were not.

Senator STERLING. Under the law, the department acts on a statement by the postmaster that the road conditions or the weather conditions were such as to prevent the delivery of the mail. Will the department not, under those conditions, allow the pay?

Mr. STAMBAUGH. That is practically true, and yet I have heard of cases where the carriers say the conditions were such that they were unable to get through certain districts, and that in that particular district happened to be living Farmer Smith or Farmer Brown, and Farmer Smith or Farmer Brown was more interested in Farmer Smith or Farmer Brown than the rest of the people on that route. The result is that Farmer Smith or Farmer Brown would make a desperate effort to get through a small part of that 24 miles that the carrier has to cover, and then Farmer Smith or Farmer Brown will send conflicting reports back to the postmaster, and those things are what govern the recommendations that go in to the department. I have received many statements from rural carriers who claim they have been unjustly deprived of pay just through that, and it seems to me there should be just a little more discretion left with the postmasters.

I want to thank you very much for the time I have taken, and I believe the statements that have been rendered by the rural carriers, the lowest-paid branch of the service, will convince you that theirs is only a case of simple justice.

STATEMENT FILED BY MR. W. S. KEESLING FOR THE RURAL CARRIERS OF
BRISTOL, VA.

The rural carriers at Bristol, Va., wish to call the attention of this commission to the fact that while they are paid at the present time \$1,500 for their

services, and that this amount looks large, but when we tell you that we must pay out of this to feed either one or two horses and keep up a buggy and harness at the rate of about \$35 each month, or \$420 for the year, we only have left for our work and to live on and to save, the sum of \$1,180, while other employees of the service do not have this extra expense to pay out of their salaries.

We also wish to state that we must go out in all kinds of weather, such as the intense heat of summer and the rains and snow of winter, for the 300 days in the year, and go over roads that are rough and muddy.

We desire also to say that in addition to our routing of the mail for our routes and placing same in the several boxes along the route we have the care of the horses and buggy and this means that we must feed three times each day, clean out the stables, hitch and unhitch every day. This in itself is quite a lot of work in addition to our regular work. We believe the above reasons are sufficient to entitle the rural carriers to more pay.

The CHAIRMAN. Now, gentlemen, we will take up the supervisors, and the first gentleman on the list is Mr. John J. Diamond.

SUPERVISORY EMPLOYEES, INCLUDING SPECIAL CLERKS, AT FIRST AND SECOND CLASS POST OFFICES.

STATEMENT OF MR. JOHN J. DIAMOND, PHILADELPHIA, PA.

The CHAIRMAN. The number of you that are to be heard will compel the chairman to hold you down to the time upon which you yourselves have agreed.

Mr. DIAMOND. Honorable Chairman, I represent Philadelphia and the other parts of the State of Pennsylvania. I am presenting on behalf of Philadelphia a brief outlining conditions there.

With regard to the condition of the supervisors, I would say that much has been said about taking credit for the loyalty of the men during the period of stress of the war. I maintain that no credit is due whatever to the members of the supervisory force in America for any loyalty they displayed. We naturally expected that, as American citizens, they would do so, and bend their every energy to aid this country in time of war and give every service they possibly could.

In the first place, I wish to call attention to the lack of uniformity of titles in the different post offices throughout the country. Conditions may vary in the different post offices, but the work is the same. Men in one town are classified as special clerks and are performing supervisory duties, and in another town it is just the opposite. I know of instances where men are performing supervisory duties, are not receiving pay for supervisory duties, and are simply classified as clerks. I would urge that you give that some consideration for the purpose of making some uniformity throughout the country.

Senator STERLING. Won't you just say what the supervisory duties are?

Mr. DIAMOND. Supervision of men and finances, I should say. Any man who has charge or supervision over men performing work.

Senator STERLING. Whether it is one or more men?

Mr. DIAMOND. Yes, sir. I have also known of instances where men have practically refused the position of supervisor, because the salary was not commensurate with the position. We realize to-day, and at all times have realized, the fact that supervisory positions have not been paid according to the services rendered. We realize and believe that the salaries of supervisors should be based wholly

upon the financial and service responsibility. In former days and before the strict enforcement of the civil-service law the position of station superintendent was a political appointment, but the growth of the service and the necessity of close supervision now requires a trained man for such position.

I am a superintendent, having 50 letter carriers and 18 clerks under my supervision, and responsible for the handling of war saving and thrift stamps, money orders, stamps and registry, parcel post, delivery, collection, and dispatch of mails.

We do not wish at any time to say that we feel that these salaries should be increased on account of the cost of living. I have tried to make it plain that these salaries should be increased on account of the work we are performing.

The men in the supervisory forces are at all times responsible and are compelled to work overtime. They are not scheduled to any certain hours as a rule. They receive no pay for overtime and no compensatory time for work on Sundays and holidays. There are many contentions on the part of men who are supervisors that consideration of some nature should be given them for overtime service performed.

In reference to Philadelphia, I can recall when I entered the post-office service there were two big positions there from the standpoint of the mails—the superintendent of the mails and the superintendent of city delivery. In Philadelphia at the present time we have the two-division plan, and to my mind the two-division plan is rather too cumbersome to be of good service because of the multiplicity of duties the superintendent of mails would have to contend with. The position is so big that it is hardly possible for one man to handle it and give satisfactory service to the public. We are of the humble opinion that the two-division plan is unsatisfactory, and we would urge you to extend that to the five-division plan. It has been the opinion of the supervisors, in convention, that the five-division plan would be more equitable and that better results could be obtained.

Mr. ROUSE. Would you make that applicable to all the post offices of the first class?

Mr. DIAMOND. I am speaking of the large post offices like Boston, New York, Philadelphia, Chicago, and St. Louis. I want to say to these gentlemen that I have no practical knowledge of smaller offices.

Another thing that comes up is the caliber of the men coming in to-day. The standard of the examinations has been lowered to a great extent, and that possibly brings in a class of men who have not reached the intellectual standard of former times. There seems to be a different atmosphere among the men coming in to-day. When I entered the service there seemed to be a spirit of cooperation, a desire to be of real service to the department and to the Government. At the present time that spirit is not present, and there seems to be a lethargy among the new men coming in. We have quite a number of temporary employees and sufficient men, but not of the right caliber. The men who have been perfected in the system of clerical work are going out of the service to accept positions where they can get a higher salary.

Mr. ROUSE. How many men in the Philadelphia office are receiving more than \$2,000 a year?

Mr. DIAMOND. Not more than 10.

Mr. ROUSE. How long have these men been in the service?

Mr. DIAMOND. Anywhere from 20 to 30 years. We have five station superintendents in the city of Philadelphia whose average service is 29 years. Their average basic salary is \$1,600. We have 10 supervisors in the central office whose average service is 28 years.

Mr. ROUSE. What is their salary?

Mr. DIAMOND. \$1,616.

Mr. ROUSE. How many are there above sixteen hundred in the list of those that have resigned?

Mr. DIAMOND. There has not been so many resignations above the \$1,600 grade.

Mr. ROUSE. Do you know how many have resigned?

Mr. DIAMOND. I haven't those exact figures. To my knowledge, I don't believe there has been any during the last six months.

Mr. ROUSE. How many in the last year?

Mr. DIAMOND. I haven't those figures. I have the total amount of men throughout the service.

Mr. ROUSE. I had reference to the men in the supervisory positions and foremen.

Mr. DIAMOND. I want to say that I have none in mind at the present time that have resigned. We didn't take the trouble to investigate that feature.

Believing that man is a victim of habit and that men who have been in the Postal Service for so many years have a natural fear of going out into other walks of life—to my mind there is no service where the men have become so much attached to it as Postal Service. I have often said that they are the greatest “shop talkers.”

Senator STERLING. What are these men with a basic salary of \$1,600 actually making?

Mr. DIAMOND. Eighteen hundred dollars; that is, according to the last legislation passed by Congress, providing that no basic salary for supervisors be less than \$1,600.

I would suggest a higher class of examinations for the purpose of bringing a better grade of men into the service.

The post office at Philadelphia is not large enough for the amount of work performed there. Throughout the central office building we have had to erect mezzanine floors, and during the summer months they are very hard on the health of the men. During the very hot weather last year there were times when the temperature in that section was 115 degrees. You can realize that it is not a healthful condition. You can also realize that in wintertime the conditions will be such as do not make a man enamored of his position. We are not saying that to find fault. We are satisfied that every effort is made to make conditions congenial.

I just want to leave one word with you with regard to retirement. I have supervision over an office where we have a letter carrier 74 years of age. I would earnestly suggest that you take this matter into consideration as a matter of economy to the Government. The employees have labored long for the success of the department they represent. I realize that you men, coming more into contact with men than I do, know that efficient service can not be performed after reaching a certain age. I would suggest that you give that consideration, so that these men in their later life may be in a position to enjoy just a few years of contentment.

Senator STERLING. You mean by that, civil service retirement?

Mr. DIAMOND. I surely do; yes, sir.

(Mr. Diamond filed the following paper:)

BRIEF FILED BY MR. JOHN J. DIAMOND FOR SUPERVISORY OFFICIALS OF THE PHILADELPHIA OFFICE.

This brief is respectfully submitted for the purpose of outlining the general working conditions and salaries of the supervisory employees of the Philadelphia, Pa., post office. It is almost 30 years since any attempt has been made to properly classify the supervisory post-office employees, and general conditions at this time demand that practical consideration be given to the regrading of their salaries on the basis of financial and service responsibility.

Financial business—Comparative growth.

Total receipts for postage at this office in 1900-----	\$3, 481, 343. 28
Total number of money orders issued and paid in 1900-----	1, 001, 882. 00
Cash receipts for money orders issued and paid in 1900-----	9, 921, 968. 43
Total receipts for postage at this office year ended June 30, 1919--	12, 872, 998. 11
Total number of money orders issued and paid during same period -----	3, 788, 245. 00
Cash receipts for money orders issued and paid during same period -----	36, 750, 331. 71
Total receipts for postage at this office during month of July, 1919 -----	971, 263. 10
Increase in receipts July, 1919, over July, 1918-----	19, 970. 97
Increase in receipts August, 1919, over August, 1918-----	59, 344. 08

The national postal receipts since July, 1914, as compared with July, 1919, show an increase of 29 per cent. Since that time the following have been added to the duties of the Postal Service:

Parcel post, motor vehicle service, airplane service, rural motor truck service, war savings stamps, internal-revenue stamps, central accounting office, and branch dead-letter offices.

These additional duties indicate a wonderful expansion of activities with greatly increased business on the part of this service.

EFFICIENT POSTAL ADMINISTRATION A BUSINESS NECESSITY.

One of the most vital necessities of the business interests of this country lies in a capable administration of the Postal Service, owing to the fact that business at large bears such a close relationship to the service. Through the medium of the post office the business interests extend their activities to all parts of the country, some to all parts of the world. The success of business depends in a measure on good service and for this reason the business interests rightly demand an efficient postal administration.

Post office business however, is not confined to the business interests, but is an absolute necessity in the every day life of every citizen, in the social affairs of communities, in bringing city and country into closer communication, and in fact it enters into every phase of our modern civilization.

In order that the service might be better fitted to handle these interests and to work out other important economic questions, the additional duties heretofore mentioned were added to the Postal Service. The successful working of this complete organization requires a trained force of supervisors graduated from the ranks of clerks and carriers and dedicated to the necessity and advantage of capable supervision.

HIGHER ENTRANCE SALARIES NECESSARY.

In order to induce intelligent young men to enter the service the entrance salaries should be adequate for such inducement. The future success of the Postal Service entirely depends on the class of men attracted to the service at this time. The report of the secretary of the third United States civil service district, which district comprises Pennsylvania, Delaware, and New Jersey, except the Counties of Bergen, Essex, Hudson, Middlesex, Monmouth,

Morris, Passaic, Sussex, and Union, shows that in examinations widely advertised from May 24th to July 12, 1919, only 136 applicants appeared for examination. It is evident from these figures that the Postal Service, with the salaries paid, is not attractive to the class of men the service seeks.

RESIGNATIONS.

Fiscal year ended June 30, 1919: Seventy-three clerks, receiving salary of \$1,000; 3 clerks, receiving salary of \$1,100; 1 clerk, receiving salary of \$1,200; 4 clerks, receiving salary of \$1,300; 32 clerks, receiving salary of \$1,400; 2 clerks, receiving salary of \$1,500; 1 clerk, receiving salary of \$1,600.

From July 1, 1919 to September 18, 1919: Nine clerks, receiving salary of \$1,000; 2 clerks, receiving salary of \$1,100; 1 clerk, receiving salary of \$1,300; 6 clerks, receiving salary of \$1,500; 1 clerk, receiving salary of \$1,600.

The total number of resignations of regular clerks during the period from July 1, 1918, to September 18, 1919, was 135, representing a labor turnover of 9 per cent. It was also necessary to use over 3,000 temporary employees during the past fiscal year.

When the fact is taken into consideration that it takes approximately four years to properly train a post-office clerk, it can be realized that this large labor turnover becomes a serious factor in post-office operation.

If proper inducements are not offered to attract first class men to the service, it will only be a question of a few years until there will be a dearth of capable men to fill supervisory positions. Salary increases of supervisors in the past have been governed generally by the promotions of clerks and carriers.

GENERAL GROWTH OF THE SERVICE.

In the year of 1900, there were 28 stations in Philadelphia and at this time there are 47, including a large parcel-post station. This shows an immense increase in business, a similar increase in the number of employees, a much greater financial responsibility for supervisors, and increased work and activity in all departments.

RELATIVE ADVANCES IN WAGES.

During the year 1914, at the commencement of the war, Philadelphia being the largest manufacturing and shipbuilding section of the United States caused a large increase in the population with 100 per cent increases in salaries of industrial workers.

This in conjunction with the shortage of food and wearing apparel and other necessities of life, put post-office employees under a great disadvantage. As the wages of industrial workers increased, the buying power of their (post-office employees) money correspondingly decreased, until at the present time statisticians state (see W. C. Foster's Dollar Index, excerpt attached) the buying power of \$1 in Philadelphia is 42 cents as compared with the year of 1898 which is equivalent to a like reduction in salary, so that a supervisory officer receiving a salary of \$2,000 at this time has the purchasing power of only \$846 as compared with the year of 1898.

SUPERVISORS' SALARIES IN INDUSTRIAL ESTABLISHMENTS.

Salaries of supervisory employees in the Philadelphia post office have not kept pace with the business growth of the service, nor with the cost of subsistence which is the reverse of conditions in industrial establishments. The average salary of supervisors in the Division of Mails at this office is \$1,725 per annum. In the year of 1879, the superintendent of mails at this office received a salary of \$3,000 per annum, and the superintendent of delivery a salary of \$3,000 per annum. At this time the two positions are combined under the heading of a superintendent of mails at a salary of \$3,200 per annum.

In 1879, the superintendent of registry at this office received a salary of \$2,100 per annum, while the supervisory officer in charge of the registered mails at this time receives a salary of \$1,800 per annum.

A comparison of statistics gathered shows that the salaries paid in industrial plants in this locality to supervisors averages \$3,500 per annum for supervision of 70 men.

The figures of the National Labor Board state that \$1,800 per annum is the minimum wage that an industrial worker can exist on.

For your consideration we submit the following, representing five superintendents of stations in this city, showing their length of service, and their present basic salaries:

	Basic salary.
One station superintendent, in service 29 years-----	\$1,600
One station superintendent, in service 29½ years-----	1,600
One station superintendent, in service 29 years-----	1,600
One station superintendent, in service 25 years-----	1,600
One station superintendent, in service 33 years-----	1,600

Average length of service, 29 years; average basic salary, \$1,600.

Also submit for your consideration the following list, representing supervisory employees in the Division of Mails, showing their length of service and their present basic salaries:

	Basic salary.
One assistant superintendent, in service 24 years-----	\$1,800
One foreman, in service 25 years-----	1,600
One foreman, in service 28 years-----	1,600
Five foremen, in service 29 years-----	1,600
One foreman, in service 32 years-----	1,600
One foreman, in service 33 years-----	1,600
One foreman, in service 41 years-----	1,600
One foreman, in service 51 years-----	1,600

Average length of service, 31 years; average salary, \$1,616.

Supervisory employees receive no pay for overtime and pay is deducted when obliged to be off on leave of absence other than vacation.

FINANCE CLERKS.

It is recommended that the employee assigned to receiving, counting, and sorting the moneys received as surplus postal funds from the stations, be rated as an assistant cashier in offices of the eight to twenty million class. You will note in Exhibit "A" provision regarding standing recommended for finance clerks.

PERCENTAGE INCREASE.

The percentage increase of salaries of supervisory employees excluding bonuses since July 1, 1914, to July 1, 1919, is 14.6 per cent.

PRESENT POPULATION SERVED.

It is estimated that the population at present served by the Philadelphia post office is 2,400,000.

PROPOSED CLASSIFICATION MEASURE.

There is attached herewith copy of classification measure Exhibit A, agreed upon by the supervisors of the United States in convention assembled, and respectfully submit same for your favorable consideration.

Very respectfully,

THOMAS W. LEISTER,
JAMES J. BANEY,
JOHN J. DIAMOND,
Committee on Briefs.

STATEMENT OF MR. J. E. BRUMBAUGH, ALTOONA, PA.

Mr. BRUMBAUGH. Gentlemen of the commission, I represent the assistant postmasters of the States of Pennsylvania, Virginia, West Virginia, and Maryland. The assistant postmaster in the post office is the direct representative of the postmaster in the post-office organization. He must be capable, efficient and competent to interpret the orders of the Post Office Department. He must be informed on all postal matters and have a thorough knowledge of the Postal Law.

and Regulations for information to the postal employees and the public. He must meet all emergency conditions arising in the service and be prepared to give decisive answers to all questions affecting the service.

I want to state the duties of the assistant postmasters in the first class post offices. He has general supervision of all employees, numbering up into the thousands at the larger offices; he has direct charge of all finances, consisting of postal, money order, postal savings, war savings, Treasury saving certificates, war revenue and proprietary funds. He makes up all pay rolls, keeps the postal and money order cash books, and other bookkeeping records of war savings, proprietary and war revenue accounts; monthly and quarterly accounts, and at central accounting offices audits district postmasters' accounts. The financial responsibility amounts from \$3,000,000 to \$4,000,000 annually at offices having gross receipts of \$200,000 or more, and which are depository offices for other money order offices. He collects, handles, and banks these funds each day, the average deposit ranging from \$7,000 to \$25,000 daily.

In the second-class post offices the assistant postmaster is the only supervisory official in that office. There is no superintendent of mails. He looks after the finances, makes up the accounts and reports, assists in the general post-office work in all its divisions. He arises early in the morning and opens the office and is generally the last one at night to leave the office. He very frequently remains late at night to close up his accounts. His hours of duty extend over a period of from 10 to 12 hours.

In looking over the individual briefs of the assistant postmasters of the second class, I find that the majority of these men range in service from 12 to 30 years. In fact, I had a brief from one assistant postmaster who has been in the service a period of 45 years and who has had a varied postal experience in the different branches of the service and who was receiving a salary of \$1,700, including the bonus.

Now, as to the salaries of these men. I want to say that the salaries of assistant postmasters and superintendents of mail were enacted into law March 3, 1883, more than 36 years ago. No change has been made in that time, except the \$200 bonus which Congress provided for the last fiscal year.

Think, for a moment, gentlemen, of a business concern operating for 36 years under the present and existing conditions without change of salary to the officials of that business who are responsible for its growth and success.

Take, for instance, my own individual case. Our postal receipts were over \$200,000 last fiscal year, and that is about the average size of the first-class post offices of Pennsylvania. My salary in 1904 was \$1,600; in 1912 I was advanced to \$1,700. That is my present basic salary. I received \$200 bonus, making my salary \$1,900. The average increase in my salary in 16 years was 11½ per cent. For many years back I have handled on an average of \$3,000,000 annually. During my service I have handled and banked more than \$50,000,000.

I desire to call the attention of the commission to the various postal duties added to the service since 1911—postal savings, parcels

post, distribution of post-office supplies, sale of war savings, war revenue, documentary, and proprietary stamps, sale of Treasury certificates, central accounting, and redemption of war-saving certificates.

The Postal Savings System was established in 1911, a regular banking system, and most of the first-class offices have active accounts of five to twelve hundred with deposits ranging from \$200,000 to \$500,000.

The parcel post was established January 1, 1913. Since that time the C. O. D. and insurance features have been added with increased size and weight limits.

Many of the first and second class offices are depositaries for other offices for surplus money-order funds. Deposits are received from 100 to 200 offices at such times when their surplus funds amount to more than \$50. Receipts are issued to the postmasters and individual money-order accounts are kept for each postmaster and submitted to the auditor at the end of each quarter in complete form, practically audited.

During the war many of the assistant postmasters were either the county chairman or assistant county chairman for the sale of war savings and thrift stamps. As assistant postmasters we were very glad to carry on and promote any war activity suggested by the department, and these duties were faithfully and loyally performed without any thought of consideration.

Senator STERLING. What relief would you suggest?

Mr. BRUMBAUGH. In the way of salaries? I would suggest a basic salary for the assistant postmasters at an office my size, based on what the other employees in civil life are getting, which is from \$3,000 to \$3,500.

Mr. MOON. What does the postmaster get?

Mr. BRUMBAUGH. \$3,500. I get 50 per cent of that, graded in even hundred dollars.

Senator STERLING. Then you would get as much as the postmaster gets now?

Mr. BRUMBAUGH. Yes; I would get as much as the postmaster gets now.

Senator STERLING. What would you suggest as to him?

Mr. BRUMBAUGH. His compensation should be increased. As the postmasters of the first and second class offices are to appear before the commission, I would prefer that they set their rate of compensation.

Mr. MOON. Do you want him to have double your amount?

Mr. BRUMBAUGH. That would depend on the views of the commission. Many postmasters were business men and held positions paying more salary than they are receiving as postmasters.

Senator STERLING. Your idea is that the postmaster should have \$7,000 and the assistant \$3,500, carrying out the law as it is now?

Mr. BRUMBAUGH. No; I wouldn't make that statement.

Mr. MOON. Then you say you would make it \$3,500 for the assistant?

Mr. BRUMBAUGH. I said \$3,000 to \$3,500.

Mr. MOON. Then, what would you pay the postmaster?

Mr. BRUMBAUGH. I wouldn't like to answer that question for them, as they are to appear before the commission for that purpose.

Mr. MOON. Wouldn't he be performing the same service as he is now?

Mr. BRUMBAUGH. Yes; he would.

Mr. MOON. Well, if you ought to be remunerated for your services to that extent, ought not he to be remunerated?

Mr. BRUMBAUGH. Yes, sir; to such extent as recommended by the commission and Congress.

Senator McKELLAR. But you think that the assistant postmaster should have more than 50 per cent. no matter what they get?

Mr. BRUMBAUGH. Yes; 80 or 85 per cent. for the reason that in my home city the chief clerks of the leading industries, who grew up with me, are receiving from \$250 to \$300 per month, and I do not consider their duties of as an exacting nature as mine or bearing the financial responsibility.

Mr. ROUSE. Taking your own office, who performs the more labor, you or the postmaster?

Mr. BRUMBAUGH. We divide the responsibility. The postmaster assuming general supervision and myself, as assistant postmaster, taking active charge of the work.

Mr. ROUSE. Does he do as much work as you do?

Mr. BRUMBAUGH. He is there about the same length of time during the day.

Mr. ROUSE. Has he any other business?

Mr. BRUMBAUGH. No; he has not.

There is another statement I want to make regarding central accounting offices: In each county there is established a central accounting office for the district post offices to report to monthly and quarterly. These offices in some counties number more than 100. The assistant postmaster generally handles these accounts, and at the end of each quarter long hours of service are necessary to audit the accounts and properly prepare them for the auditor at Washington, D. C.

Mr. STEENERSON. How many offices do you take care of?

Mr. BRUMBAUGH. Twenty-five; but they number as high as 116 offices in counties in Pennsylvania.

Mr. STEENERSON. How much do you think you ought to be paid for that central accounting work for these 25 offices?

Mr. BRUMBAUGH. There should be additional compensation. I can not say just exactly how much; but I think from the information the commission has they will be able to set an equitable rate.

Mr. STEENERSON. I would like to have your views on it.

Mr. BRUMBAUGH. The salary should be two to three hundred dollars additional, because of the additional time and technical nature of the work required of the assistant postmasters.

The CHAIRMAN. Do you give a bond?

Mr. BRUMBAUGH. Yes, sir.

The CHAIRMAN. What is the size of the bond?

Mr. BRUMBAUGH. Seven thousand dollars.

The CHAIRMAN. Do you pay the premium?

Mr. BRUMBAUGH. Yes, sir.

There is another fact I want to present to the commission. In the second-class post office, and in many of the first, I find that the assistant postmaster in many instances is getting less than clerks that get paid for overtime. The assistant postmaster puts in the overtime, but he does not get paid for it. We are not asking for overtime pay, but we are asking that our salaries be put on a higher basis.

Mr. STEENERSON. We put in a bill that a supervisory employee should get \$100 more than the highest-paid clerk.

Mr. BRUMBAUGH. Notwithstanding that, with the overtime, the clerk gets, he makes more than the assistant postmaster.

Mr. ROUSE. That bill hasn't anything to do with overtime.

Mr. STEENERSON. The supervisor gets no overtime?

Mr. BRUMBAUGH. No; and the clerk does.

Mr. STEENERSON. Although he may work more overtime than the clerk?

Mr. BRUMBAUGH. He works more overtime and is financially responsible and has the responsibility of the success of the office on his shoulders.

(Mr. Brumbaugh submitted the following paper:)

STATEMENT FILED BY MR. J. E. BRUMBAUGH, ALTOONA, PA.

The supervisory employees and special clerks of the Altoona (Pa.) post office, desiring to comply with the request of the Joint Salary Commission, submit the following brief regarding reclassification of salaries and working conditions as affecting their positions.

In the Altoona (Pa.) post office there are four supervisory officials and three special clerks performing duties of a supervisory nature, composed of the assistant postmaster, superintendent of mails, assistant superintendent of mails, superintendent of station, and special clerks.

The assistant postmaster is responsible for the policy and management of the office in all its departments and takes charge from an executive to a detailed standpoint, assisting in the supervision of 115 employees. He is charged with the supervision of all finances, which total more than \$3,000,000 annually. He has charge of all sales of stamped paper to retail clerks and district postmasters, of war savings stamps, of documentary and proprietary stamps, and of Treasury saving certificates.

He counts, handles, and banks all moneys received from all sources in the post office, answers official correspondence, investigates cases, makes up all pay rolls, monthly and quarterly accounts, and has charge of all central accounting work affecting 25 district post offices; keeps postal and money-order record books.

The assistant postmaster entered the service through competitive examination as clerk and was promoted to the position of assistant postmaster. He has been in the service a period of 18 years and receives a basic salary of \$1,700 and \$200 bonus, making a total of \$1,900, or an increased percentage of 11½. From July 1, 1904, to July 1, 1912, he was advanced from \$1,500 to \$1,700, and has remained at that rate of pay since that time.

The superintendent of mails is responsible for the receipt and dispatch of mails and the actual operation of the post-office working force in the distribution and delivery of mail. He supervises 100 employees engaged in the operation of postal work. He also has charge of the rural delivery service, screen-wagon service, motor-vehicle service, and the delivery of all parcel-post matter. His duties are diversified and it requires exceptional ability to handle all classes of employees engaged in this work.

He entered the service through competitive examination 21 years ago, and his basic salary is \$1,500, with a bonus of \$300, making a total of \$1,800. He was promoted from clerk to assistant superintendent of mails and then to superintendent of mails.

The assistant superintendent of mails and superintendent of station also perform supervisory work of an exacting nature. The former entered the service through competitive examination and has been in the service 16 years and has a basic salary of \$1,400 and \$400 bonus, making a total of \$1,800. The latter entered the service through an Executive order of the President and has a service record of 28 years; his basic salary is \$1,400 with \$400 bonus, making a total of \$1,800.

The special clerks, who are considered specialists in their line of work, have attained the highest degree of efficiency in the distribution of mails and such other post-office duties in the different positions which they hold. Their work is of a supervisory nature, and each one has charge of a number of employees in one of the following divisions: mailing division; city delivery division; money order, postal savings, war savings, and registry division.

These men also entered the service through examination and have respective service records of 19, 17, and 17 years. Their basic salary is \$1,400 and \$200 bonus, making a total of \$1,600. These men should be paid \$200 to \$300 more than the highest-paid clerk, and it is hoped that the commission will recommend to the department the continuance of this title, which gives an opportunity to the clerical force for promotion.

These supervisory officials and special clerks have almost an average of 20 years of service record, and it will therefore be seen that the best years of their lives have been devoted to the building up of the greatest and most efficient organization of our Government. We respectfully call attention of the commission that, notwithstanding the loyalty and fidelity of these employees, a number of them are still paid under the salary act of March 3, 1883, a salary law which was enacted more than 36 years ago.

Upon investigation in this city we find that positions of a similar nature regarding supervision and financial responsibilities are being paid from 50 to 100 per cent more salary, while the length and character of service required to reach these positions in most cases are not as long as the length of service required to reach a supervisory position or that of a special clerk in the post office. Chief clerks, accountants, foremen, and assistants in the operating departments of the Pennsylvania Railroad are receiving salaries from \$200 to \$325 monthly, and similar salaries are commanded by paymasters and bookkeepers for coal operators and clerks in charge of departments in the larger stores.

In a post office the size of this office, having gross receipts of \$200,000 and money order and postal savings and war savings transactions amounting to \$3,000,000, and employing 100 employees, there are problems regarding the mail service in all its branches, and the meeting of emergencies almost daily presented for proper action, and it is essential that supervisors be capable of giving intelligent decision and information in accordance with the constantly changing postal laws and regulations.

The handling of employees, especially during the past three years, requires the greatest tact on the part of the supervisors, on account of the working conditions and wages outside the Postal Service being so attractive that postal employees, with their low-salaried positions after many years of service, were difficult to retain and prevent their resignations.

The attention of the commission is also called to the duties required of the supervisor having charge of the central accounting work of district postmasters. This work requires accuracy, exceptional good judgment, and application to duties in the performance of this work. Consideration should be made of the supervisor for the performance of this work, as well as adequate help.

Supervisors and special clerks, not alone in this office but generally, have stood faithfully with the Government, especially during the past three or four years, believing that as conditions became known to the Post Office Department and Congress that adjustments in salary to meet the increased cost of living and to provide means for the proper support and education of our children would be granted and that our positions would be placed on a level with positions of similar responsibilities on the outside.

Long hours of hard, exacting work is performed by the supervisors, and in many instances have deprived themselves of home pleasures for the good of the service in being present when emergencies arose and remaining steadfast to their posts of duty until the service was again placed on the normal basis be-

and the criticism of the public and the department. These employees also have a large amount of overtime to their credit each year.

In our statement we have quoted basic salaries because of the temporary nature of the last increases, and we rest our case strictly on its merits, believing that when you have made extensive examinations in this matter you will be convinced that labor should have its just reward and that the employee who gives his best efforts during the greater part of his life to the Government should be compensated to a fair degree, and by so doing the Postal Service would attract to it better and more efficient men, who at this time can do much better in commercial and business occupations.

For the information of the commission there is appended herewith a copy of the business transacted at this office, also a plan for the reclassification of the salaries of supervisory post-office employees as adopted at their national convention held at Atlantic City August 19 and 20, of which the supervisors and special clerks of this office approve.

J. E. Brumbaugh, assistant postmaster; J. C. Brallier, superintendent of mails; S. S. Stonerook, assistant superintendent of mails; F. F. Brunell, superintendent of station; C. J. Glenn, special clerk; W. A. Loudon, special clerk; J. H. McAllister, special clerk.

Gross postal receipts, Altoona (Pa.) post office.

BRIEF ON BEHALF OF SUPERVISORY EMPLOYEES OF WILLIAMSPORT, PA., FILED BY MR. J. E. BRUMBAUGH, OF ALTOONA, PA.

To the Chairman and members of the Joint Commission on Postal Salaries:

We, the undersigned, supervisory employees and special clerks of the Williamsport, Pa., post office beg to submit herewith a brief statement of facts for the information and consideration of your distinguished Commission on Postal Salaries, in connection with the reclassification and readjustment of salaries in the Postal Service.

The supervisory employees of the above named office are not unmindful of the great privilege afforded them by the Congress of the United States to present such data to your commission, affecting their conditions.

The Postal Service is the greatest business organization in the country, and the one department of the Government which is nearest to the people, and its efficient management means more to the business life of the Nation and to each individual citizen than that of any other department of the Government.

The successful administration of this service depends largely upon the efficiency of the supervisory personnel of the various post offices.

Supervisory employees must be men of integrity and character, of good judgment, energetic, and possessed with executive ability, and likewise be able to properly handle men.

The supervisory force of the Williamsport, Pa., post office consists of six employees, as follows: The assistant postmaster and cashier, upon whom devolves the financial responsibility of the office; the superintendent of mails and the superintendent of delivery, charged with the responsibility of the dispatch and receipt of mails, and local delivery of same; the superintendent of money order, charged with the proper conduct of the money order, registry, and postal savings business; the superintendent of Newberry Station (independent) charged with the responsibility of the proper conduct of said station.

This office is also a central accounting office, requiring the auditing of accounts received from 46 third and fourth class offices, adding to financial responsibilities of the assistant postmaster.

SPECIAL CLERKS.

This office has three special clerks, who are very proficient in their particular line. Being a grade above that of clerk, it is an incentive for the ordinary clerk to aspire to promotion to these special clerkships.

These special clerks likewise put forth greater effort to become more efficient in order to become eligible for promotion to a supervisory position in case of a vacancy.

The compensation of special clerks should be at least \$200 greater than that of the ordinary clerk.

OVERTIME.

It is very often the case under present conditions that the clerk or carrier who makes necessary overtime receives as much or more compensation than his immediate supervisor (when perhaps the supervisor has put in as many hours or more of service than the employee). This is unjust and is another of the many reasons for an increase in the salary of the supervisor.

COMPENSATION OF SUPERVISORS.

Aside from the high cost of living, which fact is established beyond question, it is absolutely imperative that the compensation of supervisory employees be increased and the same should be commensurate with services performed and responsibility attached to the position. These salaries should also be equivalent to those paid for similar service in the commercial and industrial world.

No business can be conducted successfully unless the employees are interested in their work, and salaries lower than the worth of the employee tends to destroy that interest more than anything else.

That the standard of efficiency essential to good service may be maintained, the thought of financial burden, due to obligations which cannot be met owing to inadequate salaries, should be eliminated from the mind of the employees.

The salaries of supervisory employees should not be based upon a percentage of the postmaster's salary, as at present, but upon the receipts of the post office, and according to the responsibility, financial and otherwise, of the position held.

We therefore most earnestly appeal to your honorable commission to carefully consider the plan for the reclassification and readjustment of salaries of supervisors.

It will be noted by Exhibit A that the supervisors of this office have served ranging from 11 to 33 years, giving the best years of their lives to the Postal Service at a very nominal salary.

We beg to invite your attention to Exhibits A, B, C, D, E, F, herewith attached.

Respectfully submitted.

W. Stans Hill, assistant postmaster; W. A. Zahn, jr., cashier; M. Dunbar Frey, superintendent of mails; Hayes H. McEwen, superintendent of delivery; Adam Belter, jr., superintendent money order; Herman S. MacMinn, superintendent Newberry Station; William F. Keys, special clerk; D. J. Drameker, special clerk; Chas. W. Williams, special clerk.

WILLIAMSPORT, PA., October 6, 1919.

EXHIBIT A.

Gross Postal Receipts, Williamsport, Pa.

	Amount.		Amount.

SECRET

THE STATE OF TEXAS, COUNTY OF DALLAS, ss. I, the undersigned, a Notary Public in and for said State, do hereby certify that the foregoing is a true and correct copy of the original of the same, as the same appears from the records of said County.

WITNESS my hand and seal of office, this 1st day of May, 1901.

NOTARY PUBLIC IN AND FOR THE STATE OF TEXAS.

	Year ending June 30, 1908.	Year ending June 30, 1919.	Percentage increase.
Postal receipts.....	\$89,587.27	\$336,911.72	3.81
Salaries:			
Postmaster.....	3,100.00	3,500.00	.13
Assistant postmaster.....	1,500.00	1,700.00	.13
Other supervisors.....	1,300.00	1,600.00	.23
Special clerks.....	1,000.00	1,400.00	.40
Maximum clerk.....	900.00	1,300.00	.44
Maximum city carrier.....	850.00	1,300.00	.53
Railway postal clerk.....	1,200.00	1,800.00	.50
Rural letter carrier.....	720.00	1,500.00	1.08

The average annual compensation of the post-office employees at York, Pa., amounts to \$1,494, which sum is less than statistics claim necessary for the ordinary family requirements to cover the cost of living, and \$206 less than the highest paid supervisory employee, whose salary is fixed at \$1,700, exclusive of the war bonus, and it must therefore be very obvious to the Congress that every supervisory official and special clerk at this office is inadequately paid. The compensation should be sufficient to allow supervisory employees to live in keeping with their respective positions and the renewal of former associations with industrial, commercial, and professional employees whose salaries have increased from 50 to 600 per cent during the period of the war, and who have not been deprived of those things which make for the American standard of living as has been the case with postal employees.

Appended hereto kindly note comparison of salaries paid commercial, industrial, and financial supervisors with the compensation paid post office employees performing similar work with regard to financial responsibilities, and the number of men supervised:

Bank cashier.....	\$2,500—\$5,000
Factory manager.....	2,500—5,000
Store manager.....	3,000—5,000
Factory superintendent.....	2,000—4,000
Department manager.....	1,800—3,500
Factory foreman.....	1,800—3,500
Office manager.....	1,800—3,000
Post-office supervisor.....	1,600—1,900

(Mr. Brumbaugh also submitted statements respecting the postal business, number of clerks, and salaries paid at the offices of Bradford, Lancaster, Carlisle, Chambersburg, Chester, Coatesville, East Pittsburgh, Lebanon, Sunbury, and Tyrone, Pa., which are on file but not published.)

STATEMENT OF MR. ERNEST GREEN, BALTIMORE, MD.

Mr. GREEN. My colleague, Mr. W. Howard Gibson, and myself appear before you on behalf of the supervisors of the Baltimore post office, and also those in the first and second class post offices in the State of Maryland, and inasmuch as the hour is getting late and as the general points have been so thoroughly covered by the preceding speakers I will only trespass upon your time for a few minutes.

There are two points which I desire to touch upon, that of the inadequate salaries paid to supervisory employees, especially in the financial section of post offices, and the personnel of the employees who are now entering the Postal Service.

Notwithstanding the fact that in recent years many new features have been introduced in the Postal Service of a character involving the handling of large sums of money, and which has consequently increased the duties and responsibilities of supervisory employees, their basic salary has only been increased 10 and 5 per cent, respec-

tively, over and above that which they have received during the past 30 years, when the present reclassification measure was enacted in law.

Of the 1,200 or 1,300 employees in the Baltimore post office, all I speak of that office because I am more familiar with the conditions there, and as it is one of the larger offices and in the group next to the five largest offices in the country, there are only 66 supervisory positions paying basic salaries from \$1,600 to \$3,000, only 4 of that number being assigned to the financial section of the office. We have a superintendent in charge of finances who has supervision over the combined financial transactions at the main post office and over a hundred stations, whose salary is \$2,855, including a bonus of 5 per cent; a postal cashier who handled last year approximately \$4,100,000 in postal receipts, \$1,000,000 in war savings, and who disbursed two million and a half dollars and whose salary is \$2,730, including bonus of 5 per cent. We have a money-order superintendent or cashier who handles approximately \$5,000,000 in money-order transactions and who received a salary of \$2,600, including the bonus of 5 per cent, and there is a bookkeeper who has under his supervision the bookkeeping section and who receives a salary of \$2,200, including a 5 per cent bonus. These employees have been in the service from 15 to 30 years, are prominent in their duties, and anyone of whom could be found as easily in the commercial world. The increase of 5 per cent and 10 per cent, respectively, in their salary is commensurate with their duties and responsibilities and entirely in line with the present high cost of living.

There is one other matter which I desire to bring to your attention: In 1917 and in the next few years there have been introduced in the Postal Service in recent years and which has increased the duties and responsibilities of the supervisors of the service, there is the increased responsibility of the selection of new men coming into the service. A very few years ago when we held the last competitive examination we had 100 to 150 applicants and most of them were bright, capable, intelligent men who were a credit to the service. Under nearly this condition in recent years. The Postal Service is in a great measure in the young men. In four examinations recently held for the examination of men there were 25 applicants, an average of little more than six for each examination. Of this number 50 per cent were colored and the majority of the remainder were foreigners, some with very poor English and some of whom had not even been examined at the time of filling their examination papers. As I have stated, this is due to the responsibilities of the supervisors in their efforts to secure results from good material, and unless something is done to remedy these conditions and make the service more attractive you will not be able to attract that better class of men who represent the future supervisory force of the Postal Service. I thank you.

(Mr. Green submitted the following paper:

We represent the subject of the bill for the assistant postmaster, in the State of Maryland, and we desire to call attention to the purpose of making an effort to secure the best possible material for the supervisory force of the Postal Service.

The subject of the bill has been brought to the attention of Congress through its own action in several years past, both by

the Post Office Department and the supervisors themselves, and we feel quite confident that you are familiar with the existing conditions which have been rendered more acute during the past three or four years due to the increased cost of living.

Supervisors are at the present time being paid in accordance with the reclassification bill enacted by Congress in 1889, or 30 years ago, and while it is true that additional positions have been added to the various groups of supervisory employees during that period, there has been no increase in the original compensation fixed by that act unless might be mentioned the 10 per cent increase allowed July 1, 1918, for supervisors in the \$1,500 to \$2,000 grade, and only 5 per cent above the \$2,000 grade. You must certainly realize that this increase of 10 and 5 per cent, respectively, is totally inadequate and not in keeping with the increased cost of living, especially in the State of Maryland, where, due to the location of numerous munition plants, cantonments and other war industries, the cost of living according to the Government statistics has increased approximately 87 per cent.

The supervisory force is composed of men of ability who have made the study of the Postal Service their life work and are certainly entitled to the most generous treatment that the service can afford. They have suffered more than their share from an economical administration for 30 years and due to past failure to recognize them, which has caused much discontent, the service has lost many of its valuable employees, and this has naturally had the effect of lowering its standard.

The supervisory force has direct supervision over the clerical and carrier forces, both city and rural delivery, throughout the country and are responsible for the conduct of the Postal Service and for the expeditious handling of the mails. The added features in recent years of postal savings, war savings, parcel post, motor vehicle service, and more recently the sale of food, have greatly increased their responsibilities and duties and have especially resulted in a considerable increase in the volume of financial transactions, involving as it does millions of dollars. Notwithstanding these facts and in the face of most perplexing difficulties, they have been loyal and have remained in the service in a great many instances at personal sacrifice and have consequently not availed themselves of many opportunities for bettering their condition in other lines of work.

The deterioration of the personnel of the employees of the Postal Service in the employment of untrained and unskilled employees has added to the responsibilities and duties of supervisory employees in their efforts to secure the best results under such conditions. The service, it would appear, no longer attracts the young man and the class of men who take the civil service examination for appointment are not up to the standard of a few years ago; and if this condition is permitted to continue the complete demoralization of the Postal Service is bound to result. Business concerns today are paying much higher salaries to those whose duties and responsibilities correspond to those of supervisors in the Postal Service; a condition which you can readily appreciate will eventually result in the loss of this trained and expert group of employees unless some action is taken to ameliorate the existing conditions.

The loss of these trained and efficient men and their replacement by inexperienced and too frequently incapable employees has resulted in a tremendous increase to the Government in the cost of operation aside from the mere turnover of labor, to say nothing of the general dissatisfaction and discontent which prevails among the employees at the present time.

In order to afford adequate compensation we earnestly ask your favorable consideration of the reclassification bill for supervisors which has been submitted to you and which we feel quite confident you will find to be fair and equitable, the adoption of which, it is believed, will afford the needed relief and will, if coupled with adequate provisions for subordinate employees, restore the service to its former efficiency and popularity.

Under the general head of suggestions we wish to emphasize the importance of providing suitable retirement legislation and the granting of 30 days' annual sick leave with pay.

Respectfully submitted.

ERNEST GREEN,
W. H. GIBSON,

Representing Supervisors in the State of Maryland.

STATEMENT OF MR. HARRY H. LAWRENCE, RICHMOND, VA.

Mr. LAWRENCE. I would like to read a brief, gentlemen [reading]:

I represent the supervisory employees of the Richmond post office and certain other post offices in the State of Virginia who have requested me so to do. The special clerks have sent their own representative, whose brief should be considered a part of this.

This brief is prepared, read, and presented in lieu of any other statement, for two reasons, namely, in order that you might have same for perusal and consideration at such time as may suit your convenience, and, again, that our attitude be made perfectly plain, without any possibility of misconstruction or misinterpretation.

By way of introduction, we wish to have it clearly understood that the supervisory officials represent those men of loyalty to the service who have risen from the ranks by dint of extraordinary effort and talent in the handling of post-office affairs. There must be exceptions, but this is the rule. The department relies, and necessarily so, upon the supervisory force for results, and as results mark the man, so therefore from every logical standpoint of reasoning should regulate his salary. The standard of service can be raised or lowered according to the supervision given.

Much consideration has been given to methods with reference to improvement of the service, and rightly so; but I wish to call attention that the most perfectly organized system of methods that could be possibly devised is absolutely worthless unless administered properly.

The supervisors believe that any relief given, resulting from your deliberations, should not be considered as in the light of an increased expenditure and on the wrong side of the ledger, but as an investment made after mature thought, which we pledge you will be certain to bear interest at a higher rate, through increased efforts, made possible by the relief given our minds in connection with our financial obligations.

Not every man is suited to become a supervisor; he should be naturally fitted in disposition, tactful, of calm judgment during times of stress, etc. He should have those characteristics which inspire the confidence of those supervised, so necessary to the best results. Furthermore, no employee is eligible to become a supervisor until years of service and application to duty have passed over his head. The same steadfastness of purpose and effort applied to any other profession or calling with the amount of intelligence required would place him in the foremost ranks of that vocation, where the salary is commensurate usually with the service rendered, presuming always, of course, that there is a market for that service; but what happens to the supervisor? He advances maybe to the highest rounds obtainable, his enthusiasm and ambition have won, but the realization dawns upon him that there is no demand for his knowledge outside of the Postal Service, and he is being inadequately paid. After all, he is merely living, he and his family, with no further opportunity of advancement in salary, no outside market for his wares, and little hope, even with the most careful management of that salary, of ever laying aside an amount sufficient to maintain him even with the necessities of life during that period of old age when his usefulness to the service—and, for that matter, to anyone else—has passed. Truly this is a bright prospect, and one which during those moments when the review of one's whole life is pictured causes him to shudder and to think that, after all, his great mistake was made on the day when he first accepted appointment in the service. I say this is the thought: And if it were not that "hope springs eternal in the human breast," sorry, indeed, would be our prospects. Extraordinary effort by the same token requires encouragement, and the simple necessities do not satisfy that ambition so essential to the making of an efficient supervisor.

We can not continue with enthusiasm, to throw our whole soul into the work and to give the best that is in us while watching each day our salary depreciate in value. Even though you gentlemen grant us now a satisfactory reclassification with salary increase consistent, please do not forget that we have already contributed our sacrifice. We have been struggling against the high tide of steadily increasing expenses for at least two years, with only a very small, noncomparable increase in salary—the mere comforts of yesterday are the luxuries of to-day.

Why should we have an increase? Mr. John C. Koons, our First Assistant Postmaster General, has told you that the supervisors are the poorest-paid

employees, by comparison, in the Postal Service, and no service man questions his knowledge on postal matters, gained from years of experience by actual contact with every phase of our work.

Increased cost of living represents a problem with which you are fully acquainted. Statistics gathered by the Government are proof conclusive of the justice of our request for salary adjustment sufficiently increased to meet present-day needs. It goes without saying that if an employee was worth to the Postal Service on a certain date a given salary and on a date subsequent thereto living conditions had advanced a certain percentage, out of all proportions, then the Government, as a model employer, should pay him a salary commensurate with results accomplished under these new conditions. Other corporations have taken such action.

There are several thoughts which should not be overlooked at the time of your deliberations. The post-office employee in general is loyal and especially the supervisor, and I say this without any intent of reflecting on other employees, but the very nature of his duties require loyalty of him when others are apt to become disgruntled or depressed.

Dealing with the method of reclassification please pardon me when I call attention to the fallacy with reference to the calculations of the bonuses as determined upon effective July, 1918, and continued 1919. Supervisors up to a certain grade are receiving \$200 per annum bonus, the higher grades receive 5 per cent. How does this work out? Why, the first-mentioned employees get theirs, and they should have it, the smallest paid should have first relief; but the employee making \$2,400 on the 5 per cent basis receives \$120 bonus, while the employee making \$3,000 receives \$150 bonus. In other words, those between the lowest and the highest paid employees are caught in the mill.

Salaries and wages outside of the Postal Service have in most cases kept pace with this increase; some given voluntarily, some through representations made by employees to employers, but your postal employee has "stuck to his guns," believing that the time would come, and it has come, when our just claims would be heard and, we believe, will end in fruition.

There is not a sufficient difference between the salaries of the highest grade clerk and the lowest grade supervisor (the foreman) only \$100 in the basic. These men represent the greatest number of any one class in the supervisory grades. They have responsibilities equal to any such bearing similar title outside the service. Compare this salary with a few outsiders. I have in mind a gentleman in one of our department stores who has the supervision of 10 girls, and whose salary is \$50 per week; another who is foreman at the Richmond branch of the American Locomotive Works, who has the supervision of about 40 men, and whose salary is \$300 per month; and still another who is foreman of the roundhouse of the Chesapeake & Ohio Railroad, supervising 23 men, whose salary is \$256.50 per month. These and many other such cases in Richmond could be cited for comparison.

With reference to the higher grades, if you will pardon me, I will cite my own case for example. I am superintendent of mails at Richmond, Va., ranking next to the assistant postmaster. I have general and concurrent supervision over more than 300 employees. I have worked hard and the department and local postmasters have recognized my efforts and have given me approximately about all within their power to give under the existing law; but, even at that, I am receiving per hour just about the same as a bricklayer, or a first-class plasterer, or a number of others that could be mentioned who work with their hands a given number of hours per day without having any other worry or responsibility than the mere perfunctory performance of a routine day's work. These examples, gentlemen, are not imaginary, but are based upon real sober facts, and my condition is identical with that of all other supervisors throughout the Postal Service.

We believe that we should be reclassified and given a salary increase of 100 per cent to meet the same percentage of increase in the high cost of living, less, of course, any bonus or other increase given us during the last three years. Of course, we do not believe that these salaries can be paid under the present postage rates, or without some legislation being enacted increasing the postal revenues, without showing a large deficit; but we do believe that the public at large would not bitterly complain if postage rates were increased to the end that better salaries and better service would result. The public is willing to pay for service it has in other lines, therefore, the question naturally arises, Why should ours be the exception?

In closing gentlemen, this argument, let it be understood that our plea is not based on any desire for sympathetic adjustment, and this is spoken in the best of spirit, but upon the justice of our claim after all of the cold facts are before you and after same have been carefully weighed and careful consideration given, by comparison with men engaged in executive work parallel with ours in other branches of industry, where the knowledge of detail and finance and the handling of men with their varied dispositions is essential. We ask for a reclassification, with upward revision of salaries and an adequate retirement measure. We ask that you do not penalize our loyalty nor capitalize the lack of a competitive market. Hold out hope as an incentive to greater efforts. Give us just compensation and we in turn will devote our lives and our maximum efforts for better service.

If there are any questions you would like to ask, I will endeavor to answer, or if you care to, Mr. John Hirschberg, commissioner of labor for Virginia, who accompanied our delegation, is present, and I have no doubt but that he also will be pleased to be at your service.

STATEMENT OF MR. W. H. HAYCOCK, SUPERINTENDENT OF MAILS, WASHINGTON, D. C.

Mr. HAYCOCK. Mr. Chairman and gentlemen: I will file a memorandum or brief, and I will only take a moment of your time to call attention to one or two special features.

The work of the supervisory officials during the past several years has been performed under great difficulties, owing to the caliber of the men that have come into the service during those years. As you know, a great many of the large offices are operating with a great many temporary employees who have not passed the civil-service examination and they only come in to stay for a short while until they can get another position. They have to be broken in and by the time they are worth something to the service they have obtained a new job and leave. Under those conditions, the supervisors are responsible for moving the mails just the same as under normal conditions. They are expected to render just as efficient service with that character of help as they did with the old-time character of help that came in and made it a profession and stuck for the remainder of their lives.

During the last 10 years there have been increased salaries provided for postal employees, but very little recognition has been accorded the supervisory employees. In 1908, when the classification act went into effect placing the clerks and carriers upon an automatic promotion scale, no promotion was given to the supervisory employees. The only promotion given since that time was last year, when you gave an increase of 5 per cent. when an increase of \$200 was given the clerks and carriers. We are not finding fault with that. We just want to show you that the supervisory have not had the same consideration as some of the other employees. In 1908 the highest-paid superintendent of mails in the country was receiving \$3,200. To-day that salary remains just the same. One of two things, then, is fact: Either the superintendent of mails at that time was very much overpaid or he is underpaid at this time for the responsibility he has had to assume.

The supervisory are the ones upon whom the responsibilities of the service rest. They are the ones who move the mail, and they are the ones who have to develop distributors, who are the backbone of the service. They are the ones to see that the orders of the depart-

ment and their postmasters are carried out, and they are the men who have made it a life study and have been promoted to these positions because they have shown merit and unusual ability.

In the Washington post office we have 60 supervisors, and all these men are actively engaged every day in the supervision of the work under them. Of that number only two are over 55 years of age, and of the sixty 22 have been in the service more than 25 years. A number of them have been in the service under a number of different postmasters and through different administrations, which is indicative of the fact that they have ability and are in these positions only because they can perform the services, so we would ask you to give consideration to the supervisors in framing a reclassification of salaries.

We do not believe, when raising salaries, that it is fair to draw a dead line and make it twenty-two or twenty-four hundred or three thousand, or to say that the men who are getting a salary above a certain amount are getting enough to skin by on and do not need an increase. The cost of their living and their financial responsibilities have been increased and their dollars have been cut in half, the same as the other fellow's.

In considering the Washington office, I want to call one particular feature to your attention, and that is if your commission should recommend a scale of salaries for supervisory employees based on receipts of the office; that you gentlemen should give some special consideration to the Washington office, because the money receipts of the Washington office do not represent the amount of work performed. As you know, there is a large volume of Government mail goes through the Washington office for which no payment is made and which is not reflected in the receipts of the office; and if in drawing up a plan where the salaries of supervisors are based upon the receipts of the office that fact is overlooked, the supervisors of the Washington office will not receive the same compensation as men engaged in other offices handling the same amount of mail. We would like you to consider that feature in your deliberations.

Mr. Haycock filed the following brief:

BRIEF SUBMITTED BY MR. W. H. HAYCOCK, WASHINGTON, D. C.

The supervisory employees of the Washington post office are interested in the first place in having the commission give consideration to the question of an increase in salary for the clerks and carriers, and particularly the desirability of increasing the entrance salary, in order that a better class of men may be induced to enter the Postal Service to maintain a high standard of efficiency. Under the present salary scale young men possessing the intelligence and ability required of a post-office employee are not seeking employment in the Postal Service or manifesting sufficient interest in the work upon receiving appointment to make it their permanent calling, as was the general rule prior to the time the cost of living increased. One of the main reasons for this condition is that those who have the proper qualifications for post-office work are able to obtain positions in the commercial world paying higher salaries and usually more satisfactory working conditions.

The requirement for efficient service confronts the supervisory officials, and unless competent help is procured and placed at their disposal it is impossible to afford the character of service demanded by the Post Office Department and the public. The Postal Service is comparable to a large public utility, and the same degree of efficiency is expected of it by the public as of public utilities, and unless such service is given, severe censure results. While the supervisory officials are expected to maintain efficient and economical service and to apply the same business rules and methods as obtain in large private corporations

[illegible]

superintendents of stations have a dual responsibility in that they are responsible for the performance of service of employees under them and also proper handling of the finances of their stations. The number of employees they supervise is from 3 or 4 to 50 or more, which often includes a large number of letter carriers. The highest salary paid to a superintendent of a station at the Washington Post Office is \$2,000, there being two in this grade, the lowest receiving \$1,800. While some of the superintendents of the smaller stations are sufficiently paid for the character of service rendered, it is obvious that those of the larger stations are entitled to a higher salary.

DIVISION OF MAILS.

The division of mails of the Washington Post Office comprehends the handling of the mails of a city with a population of approximately half a million in addition to the mails of the Executive Departments, the Senate, and the House of Representatives. Over 1,000,000 pieces of mail are handled individually daily.

The Washington office is the medium for the distribution of not only the Government correspondence and printed matter of the Government but also all kinds of supplies for Government business, comprising internal-revenue stamps, postage stamps and stamped envelopes, drawings, blue prints, public documents, scientific instruments, chemicals, samples of soils, etc., pouches, mail sacks and locks, and official supplies such as stationery, envelopes, scales, etc. This character of mail is of such weight and size as to render it difficult to handle.

The Washington office is also a clearing house (or terminal office) for the distribution of circular and parcel-post mail for certain Southern States, the mail being concentrated here for distribution from other post offices and railway offices throughout the country. Such terminal work in itself involves the employment of 75 clerks daily; but as no revenue accrues to the Washington office from this mail it is only just that due allowance be made for the superintendence thereof, particularly as the work is technical and necessitates the employment of a large number of trained distributors.

The following statistics of the Division of Mails of the Washington office for the fiscal year ended June 30, 1919, are submitted to give an idea of the amount of work involved:

Cancellations (letters and postals)-----	228, 473, 185
Sacks dispatched-----	2, 561, 248
Sacks received-----	614, 273
Insured and C. O. D. parcels dispatched-----	771, 549
Parcel-post packages delivered-----	1, 480, 301
Special-delivery pieces delivered-----	1, 448, 213
Number of registered pieces handled-----	4, 476, 946

A comparison was recently made of certain statistics of mail handled during the 19 months following the declaration of war by the United States with the 19 months immediately preceding that declaration, as follows:

	Cancellations.	Pouches dispatched.	Pouches received.	Sacks dispatched.	Revenue.
War period.....	437, 871, 308	422, 295	330, 847	3, 764, 152	\$6, 046, 258. 96
Pre-war period.....	191, 666, 968	206, 742	231, 097	2, 227, 146	3, 404, 012. 16
Increase, per cent.....	129	104	43	69	78

There has been only a slight falling off in the mails since the close of the war, notwithstanding that a decided slump was expected.

In a recent letter from the Comptroller of the Currency to the Postmaster General it was stated that that office had shipped by registered mail through this office, during 16 months, \$344,000,000 in national bank notes, and that the Federal Reserve Board had shipped \$5,000,000,000 in the same way during the four and one-half years of its existence. These figures represent only two bureaus of the Treasury Department. There are others constantly shipping currency through the Washington office, the amount of which is unknown. Besides this, the bonds of the several Liberty loans were practically all shipped through the Washington office.

During the fiscal year ended June 30, 1916 the Bureau of Printing and Engraving expended an aggregate amount of \$4,502,575.107 stamps. In addition to the numerous stamps produced I used through his office.

The responsibilities of the superintendent in charge of the Division of Mails are great. He is required to develop and maintain efficient system for handling of the mail, to maintain it and with the least possible delay and a minimum cost of service to the public. He is also required to see that the superintendent be thoroughly familiar with the workings of all branches of his division, not only theoretically but in a practical manner, so that the best results may be obtained. He receives a salary of \$3,000 plus 5 per cent.

Under former organization there were separate superintendents of delivery, mailing, and register divisions. The vehicle service was under private contract. Under the reorganization of the office in the two-division plan all of this responsibility was transferred to the superintendent of mails.

The number of employees under the jurisdiction of the superintendent of mails are as follows:

Clerks	-----	1
Carriers	-----	1
Motor vehicle service	-----	1
Substitute clerks	-----	1
Temporary clerks and laborers	-----	1
Substitute carriers	-----	1
Temporary carriers	-----	1
Special-delivery messengers	-----	1
Total	-----	1

Eighty-nine auto trucks are required to assist in the transportation, delivery and collection of mail, and the Government mails being transported in vehicles of the various departments.

The assistant superintendents of the Division of Mails receive gross salaries ranging from \$2,000 to \$2,500, their duties being very similar to those of the superintendent except in the case of three such employees, who are assigned to special sections of the division. The assistants are required to possess executive and administrative ability and to have a wide knowledge of postal service. All of them have passed through the various stages of office work and have been promoted to the positions which they occupy because of their ability. The salaries received by them are not commensurate with the salaries paid by private concerns for employees performing work requiring the same knowledge and responsibility.

Foremen of crews are practical men who have passed through the various phases of post office work, and who are selected solely upon their intimate knowledge of the work and ability to maintain proper supervision of their crews ranging from 40 to 200 employees. They should receive from \$400 to a higher salary than the highest-grade clerk.

Consideration should be given the matter of adequate salaries for certain postal employees who are performing constructive work of a high-grade character and who are of very much value to the service because of their ability to perform the technical work required, practically without the assistance of superiors. The clerks referred to are locally designated as schedule, schedule clerks, correspondence clerks, general office clerks, clerks in charge second-class matter, and stenographers. Such employees should be granted salary several hundred dollars in excess of the maximum-grade clerk, according to their ability and the requirements of their positions.

Under this classification are also embraced assistant foremen of crews and supervisors of sections who have the ability, in addition to their special assignments, to supervise the large crews in the absence of foremen.

Attention is called to the fact that there has been slight increase in salaries of supervisory employees during the past 10 years. In 1906, when the salaries of clerks and carriers were reclassified and placed on an arithmetic scale basis the supervisors were not given any increase, the highest pay received by a superintendent of mails at that time being \$3,200 annum, which is the same to-day, with the exception of the 5 per cent increase. It is true that the number of positions in the ranks of the supervisory class has been increased, but this was due to an increase in the service involving both quantity of mail handled and employees.

With the increase afforded clerks and carriers in 1908, and July 1, 1918, such employees have received an appreciable increase over what was paid prior to 1908, and some consideration should be given supervisory employees who carry the burden and responsibility of the work.

As a further evidence of the inequity in the salaries of the employees and supervisors, I wish to invite attention to the fact that during the quarter ended September 30, 1919, 23 employees of the Washington office received salaries in excess of those received by their foremen on account of overtime made by them, the latter not being entitled to compensation for overtime.

While the salaries of the supervisors have remained nearly at a standstill, the responsibilities of such employees have increased. Since January 1, 1913, there have been many innovations in and additions to the service, such as the establishment of the parcel-post service, including insured and C. O. D. features, the establishment of Government-owned vehicle service in place of the contract screen-wagon service, additional terminal work for the distribution of mails, the sale of war-savings stamps, the establishment in post offices of accounting branches in connection with the money-order system, and the establishment of central accounting offices for various States.

There are 60 supervisory officials connected with the Washington post office, every one of which is in active supervision of the division, section, or station to which he is assigned. Only two of these officers are more than 55 years of age, and 22 of them have been in the service more than 25 years. These men have been selected for the positions solely because of their ability, and most of them have served under a number of postmasters and administrations, indicating that they are rendering satisfactory service. The number of supervisory officials throughout the Postal Service is small compared with the total number of employees, and the amount that would be necessary for a reasonable increase in salary for them would be small compared with the total amount appropriated for the maintenance of the Postal Service.

Should the commission decide to recommend an increase in salary for supervisory employees scaled upon the postal receipts of offices, it is requested that special consideration be given the case of such officials in the Washington office, to the end that they may receive salaries commensurate with their duties. Owing to the large quantity of free matter passing through the Washington office, which is not reflected in the receipts of the office, any scale of salaries based solely upon paid receipts would be unjust. If receipts are to be the basis, then a special arrangement should be made to compensate supervisors of the Washington office in amounts equaling salaries paid such employees in other offices handling a similar volume of work; in other words, volume of work at the Washington office should be the controlling factor and not the receipts. These special conditions will be brought to your attention in greater detail at the hearing before your commission for postmasters.

STATEMENT OF MR. W. H. GIBSON, BALTIMORE, MD.

Mr. GIBSON. Gentlemen of the commission, I am chosen to represent the supervisors of the Baltimore, Md., office, but there has been so much said that I will require very little time.

There is one point in particular that has been mentioned, that I would also like to urge, and that is the nonuniformity of titles in the different offices. Here in Washington a man is the superintendent of carriers, in Baltimore he is the foreman of carriers, in Philadelphia he is the assistant superintendent of mails, in Brooklyn, N. Y., he is the assistant superintendent of delivery. That was brought about by the reorganization of the offices on the two division plan, and it seems to me they have all been reorganized on different lines.

As I have charge of the carriers in Baltimore I want to bring to your attention the caliber of the men we are getting in. At the present time we have 75 substitute carriers. Thirty-four per cent of these are colored men and a great many of the others have names that you can not pronounce. We have no substitute clerks, but the

clerks that came into the office last year have been more than 40 per cent colored men, and a great many have resigned, and as those who are entering must necessarily become the bone and sinew of the service, as well as the supervisors of the future, it seems to me that it is necessary at the present time to increase the pay of the supervisors so that these places may become attractive to men entering the service.

Mr. STEENERSON. These substitutes that you have have been selected through civil service?

Mr. GIBSON. Yes, sir.

Mr. STEENERSON. But these auxiliaries are not civil service?

Mr. GIBSON. They are not; no. We have some temporary clerks but we have no temporary carriers at the present time. We carry them through the war, and at the present time we have 75 substitute carriers, which is hardly sufficient.

Mr. STEENERSON. These auxiliary clerks and carriers; they have not gone through civil service, have they?

Mr. GIBSON. They have not.

Mr. STEENERSON. They are simply hired the same as you would hire a day laborer?

Mr. GIBSON. They are subject to being dropped at any time that the postmaster may not need them.

Mr. STEENERSON. Then what is the necessity of increasing the compensation?

Mr. GIBSON. To induce the better class of men to come into the positions. We are only paying 40 cents an hour, and they are paid 50 cents for street car conductors. It is hard to get men. We get those not wanted by the industrial and commercial concerns.

Mr. STEENERSON. You can not retain efficient men with the present salaries?

Mr. GIBSON. We can not. The men come in and stay a little while, and when they see no chance of promotion, they leave.

STATEMENT OF MR. J. C. COOK, BALTIMORE, MD.

Mr. Chairman and gentlemen of the commission: As a representative of the special clerks of the Baltimore post office, I desire to impress upon you the necessity and importance of maintaining the special clerk grade.

Without some such incentive as that offered by this grade, the general effort for expert knowledge and maximum efficiency will be removed; and the result will, therefore, be reflected in the impaired efficiency of the service.

The special clerk is looked upon as one having in a peculiar and distinguishing degree certain characteristics above the ordinary clerk, and, in view of the fact that this title has been attained by him through strict attention to duty, persevering effort, and intelligence, it seems only a question of justice that he should receive recognition in the Postal Service, just as these qualifications are rewarded in the commercial world.

It is not deemed necessary to enumerate here the many different activities or assignments special clerks are called upon to perform; in fact, a special clerk is expected to be able to fill any assignment.

acting at times in the capacity of a supervisor and in many instances regularly assigned as foremen or assistant to the foremen.

In presenting these claims we feel that the special consideration shown our grade in the matter of salaries should be commensurate with the special service expected, and that the difference between the highest grade clerks' salary and that of the special clerks should be not less than \$200.

STATEMENT OF MR. THOMAS V. KEENAN, PHILADELPHIA, PA.

Mr. KEENAN. Gentlemen of the commission, I am not going to burden the commission with a mass of figures, because the town is dry enough, and figures are dry articles to deal with.

"The laborer is worthy of his hire." These words, taken from the Book of all books, like all human truths, ask no special favors, no bonuses; it simply says that the man who does the work must not be denied the reward of his labor, and aptly fits the situation in so far as postal employees are directly concerned.

As to the economic and ethical question as to the "whys and wherefores" of the high cost of living and the reduction thereof to a staple basis, while it is of the utmost importance, is one, nevertheless, that will have to be dealt with elsewhere other than by this commission. However, it is the high cost of living and the inadequate salaries paid postal employees that has been the "germ" of your creation, so therefore a small endeavor will be made to show the increase in the cost of living from July, 1914, prewar period, to July, 1919, the eve of reconstruction.

From the research reports of the National Industrial Conference Board we find that the average cost of living for American wage earners advanced 50 to 55 per cent from July, 1914, to June, 1918, and up to November, when the armistice was signed, 65 to 70 per cent above the average cost in July, 1914. From the United States Bureau of Labor Statistics it is found that the increase in food-stuffs, based on the average retail prices between the year 1913 and June, 1919, was 84 per cent. As to the increase in the price of clothing, absolutely necessary for man, I will submit herewith comparative prices paid in 1914 and the average cost this year (necessary so in my particular case, wherein I have to be most economical by reason of being blessed with a large family).

	1914	1919		1914	1919
Suit.....	\$15.00	\$40.00	Socks.....pair..	\$0.12½	\$0.37½
Undercoat.....	10.00	35.00	Underwear.....suit..	1.00	1.75
Trousers.....	3.50	7.00	Night shirt.....	.75	1.75
Shoe.....	1.00	1.75	Collars.....	.12½	.30
Shoe.....	3.00	7.00	Hat.....	1.50	6.00

As can be readily seen from these prices the advance in necessary clothing has been from 75 per cent to 300 per cent.

The average increase for fuel, heat, and light has been about 57 per cent above the prices prevailing during July, 1914.

From an allocation studied by the United States Bureau of Labor Statistics it is found that food requires approximately 43 per cent, clothing 13 per cent, fuel, heat, and light about 6 per cent of one's salary, and thus it runs ad

infinitum, figures upon figures could be quoted, but why keep on? You members of this commission are representative Americans and in your own individual cases you know the increase in the cost of living, better than I could possibly present it to you. And now, sirs, while this increase in the cost of living has come upon us all alike, the salaries of postal employees were practically at a standstill save the temporary increase provided for in the Post Office appropriation bill for the year ending June 30, 1919, whereby the salaries of postal employees were increased temporarily in the maximum 1 per cent, in the low grade, to about 13 per cent in the high grades or salaries. No specific temporary appropriation, however, being made for the year ending June 30, 1920.

In the face of this it is wonderful, indeed, patriotic I may add, that more men in the Postal Service did not avail themselves of the high rate of wages paid and now being paid, in the industrial walks of life, not to speak of the superabnormal salaries paid shipyard and munition workers, together with the salaries paid the clerical forces at these respective plants.

During the recent hearings in re the unrest of the steel workers, Senator Sterling made the statement that the Steel Corporation increased the wages of their employees 130 per cent according to a report made by the company. These figures were astonishing, and I immediately wrote to the Senator stating that while I did not doubt his word in the matter I would appreciate a copy of the report; however, not having received any reply to my request, I communicated with some of the industrial plants in Philadelphia, asking them that if it was not incompatible with their business interests would they kindly furnish me with the percentage increase in wages since July, 1914, the prewar period, and it is surprising to note that salaries have been increased from 10 per cent up to 227 per cent, thereby enabling their employees to properly cope with the high cost of living.

Congress, in its wisdom, has seen fit to create a grade of postal clerks, known as special clerks, whose salaries are from \$100 to \$200 above the high-grade clerk in salary. Special clerks are required to attain a high grade of efficiency and maintain same, master schemes of distribution, possess executive ability and have some degree of initiative. These same requirements as are necessary in the Postal Service for promotion to the special grade of clerk in the industrial world would at least command a salary of \$2,500 per annum, it is therefore respectfully urged that Congress take cognizance of this fact and grade and pay special clerks accordingly.

Another matter that, in my opinion, comes within the scope of this committee, viz, a retirement law in the Postal Service. Many of the large railroads and corporations of our country, and who, you will agree with me, have at the heads of their executive departments the brainiest men of our country, who have deemed it wise and expedient that, in order to increase the efficiency of their employees, to retire them upon part pay after a certain period of service, and if the commission will bear with me I will quote a few of the corporations that are retiring their employees, as mentioned:

American Sugar Refining Co., retiring from 60 years to 70 years upon 1 per cent of salary paid during the 10 years preceding retirement, and, from a statement of this corporation, the directors thought it unwise to tax their employees by contributions from their wages, as it would be a hardship upon the high cost of living. Consolidated Gas Co. of New York, retirement after 35 years continuous service. International Harvester Co.: Retiring at the age of 55 years for women and 65 years of age for men, after 20 years of service. Mr. George W. Perkins, president International Harvester Co., in re pensioning system of his company, makes the following statement: "The Harvester Co. does not do this out of pure philanthropy. It had no intention of passing around a hat full of money that employees might help themselves. It went into it in a purely business spirit, believing that the plan would so knit this vast organization together, would so stimulate individual initiative, would strengthen and develop the 'esprit de corps' of the organization as to make it possible for the company to increase its business and its earnings, and with the spirit of being willing to share this increased success with its employees. So far, the company has every reason to congratulate itself on the result. In all parts of the company's business, at home and abroad, in the office force, in the factory, in the sales department everywhere, the average interest of the individual in the business is greater than formerly. The employees throughout the organization are vying with one another more and more to improve the respective branches of the business. This means profits for the stockholder

in short, it means cooperation that is real, and therefore beneficial to one and all."

National Electric Light Co.; Provident Loan Society of New York; Public Service Corporation of New Jersey; Standard Oil Co.; Yale University; United States Steel Corporation; Atchinson, Topeka & Santa Fe Railway; Atlantic Coast Line; Baltimore & Ohio Railroad; Bessemer & Lake Erie; Brooklyn Rapid Transit; Buffalo, Rochester & Pittsburgh; Chicago & North Western; Chicago, Rock Island & Pacific; Cleveland, Cincinnati, Chicago & St. Louis; Cleveland Valley & Terminal; Delaware, Lackawanna & Western; Illinois Central; Lake Shore & Michigan Central; New York Central & Hudson River; New York, New Haven & Hartford; New York Railways; Oregon Short Line Railroad; Oregon Railroad & Navigation; Pennsylvania Railroad, east of Pittsburgh; Pennsylvania Lines, west of Pittsburgh; Philadelphia & Reading Railway; Philadelphia Rapid Transit; Southern Pacific; Washington (D. C.) Street Railways Co.

The above corporations and railroads pension their employees after a certain period of service and for permanent and disabled employees after 10 years of service. A retirement system in Postal Service would be one of economy and efficiency and would greatly add to be the means of keeping good, faithful, and competent men in the service. As to the wisdom of what kind of a plan of retirement would respectfully state the above-named corporations and railroads are straight pensioning systems without any deductions from the employees' salaries whatsoever.

I would also respectfully urge that a leave of absence with pay be granted, on account of illness for a certain number of days in each fiscal year, as in the other departments of the Government, save in the Postal Service. As an occasional day off, when one feels a slight attack of illness is far better than the employees working rather than lose the day's pay, reports for duty, endangers his health (and at times those with whom he is working), and in the end he is compelled to report off for a longer period.

These matters are all respectfully presented for your due consideration and deliberation for a better and more efficient Postal Service.

STATEMENT OF MR. JAMES A. McCARTY, PHILADELPHIA, PA.

Mr. McCARTY. Mr. Chairman and gentlemen of the commission, Mr. Keenan has fully covered my case in regard to the cost of living. There are, however, a few points I would like to bring before you gentlemen. One of them is that a rumor is going out, I don't know whether it is the idea of the department or some of the Members of Congress, that the grade of special clerk is to be discontinued. We have been instructed by the Philadelphia special clerks to ask you to use your best offices to nip this rumor in the bud and continue on the rolls of the post office the grade of special clerk. It is very necessary, and it would be an injustice to those men who have attained that grade. I don't care what provision you make to attain the grade of special clerk. I claim there should be some extraordinary ability shown, and I believe in these cases there has been some extraordinary ability shown, but, if you will permit me, I would request that you use your best offices to retain on the roster of the post office the grade of special clerks.

I want to bring to your special attention the clerks working in the large offices and performing the duties of finance clerks. In Philadelphia the clearing-house system has been eliminated; the clerk handling the money orders in Philadelphia alone, in the last 15 days in August, handled over \$1,600,000. I claim that that position should go into the finance clerk's department. The man who is occupying the position to-day is a special clerk receiving a salary of \$1,600.

I also claim there has been a lack of uniformity as to salaries. The \$1,600 grade, which is the basic salary of the \$1,400 grade, in some

cities has been increased to the rank and grade of foreman, making their basic salary \$1,600 and their actual salary \$1,800. In Philadelphia, the largest city in the State, the \$1,400 grade has received compensation, and the \$1,300 grade, actual salary \$1,500, has received \$100 a year. In some cities the \$1,300 grade, actual salary \$1,500, has received no compensation, and I am informed that the law says they should receive compensation. Nevertheless, it exists in some of the cities of Pennsylvania that the \$1,300 grade has received increased compensation for the fiscal year 1919-20.

Mr. STEENERSON. I guess it has not been reached by the department.

Mr. McCARTY. I am informed so.

Mr. STEENERSON. The department has stated that those who have given meritorious service should receive promotion; that it has given meritorious promotion to all who deserved it.

Mr. McCARTY. All those that attained an average of 90 per cent. I would like to say a word in favor of a few men in Philadelphia and throughout the country. I don't know whether there is anybody throughout the country who has not attained an average of 90 per cent, thereby not enjoying promotions, but the gentlemen whom I have in mind and who occupy these positions in Philadelphia hold positions of trust. Every minute of the day they are subject to demerits. Demerits, from one standpoint, are all right; from another they are unjust. Perhaps these men need help, and they receive help that is in no way responsible—men off the street, who have no more idea of the service than somebody in China. These men act in the capacity of special clerks, and any mistakes made by those who give them to help appear on his label. I know of three or four cases in Philadelphia where men have been denied promotion on that account.

Mr. STEENERSON. The record of efficiency is kept by the supervising officer, is it not?

Mr. McCARTY. Yes, sir.

Mr. STEENERSON. In your office?

Mr. McCARTY. Yes, sir.

Mr. STEENERSON. So that there is no injustice done the men by one who is supervising?

Mr. McCARTY. I beg your pardon, but it is done by the system. The system calls for the man to be penalized.

Mr. STEENERSON. Where does that system come from?

Mr. McCARTY. From the merit system.

Mr. STEENERSON. Is it written into the rules?

Mr. McCARTY. Yes; it states that a man shall be penalized for omissions.

Mr. STEENERSON. Yes; but you state they are not his omissions.

Mr. McCARTY. They are on his duties. At times he needs help in that particular position. He asks for help, and he is given the available man. I don't say that under ordinary conditions he would not be given men who know the position as well as he does, but under conditions that exist to-day he is given anybody they can get.

Mr. STEENERSON. Don't you think the men in the supervisory positions can remedy that?

Mr. McCARTY. I don't see how they can unless the system is changed.

Mr. STEENERSON. The complaint you make about these special clerks who were not promoted is that they did not have an efficiency record to warrant promotion?

Mr. McCARTY. Exactly. I claim that there is a sense of injustice to these men under the existing conditions. I agree with you, and everybody else, that there should be some system whereby a man should be penalized for infractions of the law, but I do not think he should be penalized for infractions of the law that are not his own particular fault.

Mr. STEENERSON. So that your complaint is not really against the act of Congress, but with regard to the added restrictions in the demerit system.

Mr. McCARTY. Yes, sir; I claim I would like you gentlemen to look into a modification of the demerit system.

Mr. STEENERSON. That demerit system isn't written into the statute; that is an administrative matter.

Mr. McCARTY. Exactly.

Mr. STEENERSON. You want Congress to revise that order?

Mr. McCARTY. I want you to give it some consideration. I don't want you to think I am here to state there should be no demerit system. I claim there should be. We have seen them more harsher than they are now, but if I could have the time to explain just my particular case you would readily see where a man suffered injustice, although I am not criticizing the postmaster or the supervisory officials, but he has been unjustly treated, and the way the majority of the post-office clerks feel when they have a sheet with 8 or 10 demerits on it, they sign it rather than make a protest.

Mr. STEENERSON. The record as it is made embraces the merit and the efficiency of the men and also the demerits and the deficiencies, and he signs that record. It is submitted to him by the supervisory officials?

Mr. McCARTY. Each omission that he commits, he signs for that omission. Then when the average is computed, he signs for the average.

Mr. STEENERSON. You don't claim there is any injustice in the administration of this system; that they are not perfectly fair in their administration?

Mr. McCARTY. Only in these particular cases where a man is charged with an omission that is not due to any fault of his own.

Mr. STEENERSON. Do you attribute that to the system itself, or to the clerk who carries it out? You don't blame the supervisor; you blame the system under the instructions of the department, as framed by the department.

Mr. McCARTY. Exactly. It is a case where one man is charged with another man's responsibility and is also charged with his demerits.

Mr. STEENERSON. You claim that the rules should be so modified that they can not charge a special clerk with the demerits some one else under him was guilty of?

Mr. McCARTY. Yes, sir; that is my idea. A clerk should not be charged with the demerits some one under him committed.

Mr. STEENERSON. Not in any case?

Mr. McCARTY. No, sir; there is no reason why a man should be charged with the demerits of the men helping him. This man isn't

regularly assigned to that position. He is only helping him for an hour or maybe a half hour, and in that time he commits the deficiencies.

Mr. STEENERSON. But the supervisory officials want to have as few of these mistakes as possible.

Mr. McCARTY. I understand that, but I don't see why the man should be charged with other men's mistakes.

Mr. STEENERSON. That is your contention?

Mr. McCARTY. It is the contention of every clerk.

(Statements were submitted by W. S. Hill, et al, Williamsport, Pa.; A. S. Bodkin, et al, Pittsburgh, Pa.; John E. Milan, Norfolk, Va.; R. H. Bryan, Washington, D. C.; William H. Ham, Richmond, Va.; Charles H. Hoffman, Harrisburg, Pa.; Charles V. Hilton, Washington, D. C., as follows:)

BRIEF SUBMITTED BY A COMMITTEE REPRESENTING THE SUPERVISORS OF THE WILLIAMSPORT POST OFFICE.

We, the undersigned supervisory employees and special clerks of the Williamsport (Pa.) post office, beg to submit herewith a brief statement of facts for the information and consideration of your distinguished Commission on Postal Salaries in connection with the reclassification and readjustment of salaries in the Postal Service.

The supervisory employees of the above-named office are not unmindful of the great privilege afforded them by the Congress of the United States to present such data to your commission affecting their conditions.

The Postal Service is the greatest business organization in the country and the one department of the Government which is nearest to the people, and efficient management means more to the business life of the Nation and to each individual citizen than that of any other department of the Government.

The successful administration of this service depends largely upon the efficiency of the supervisory personnel of the various post offices.

Supervisory employees must be men of integrity and character, of good judgment, energetic, and possessed with executive ability, and likewise be able to properly handle men.

The supervisory force of the Williamsport (Pa.) post office consists of several employees, as follows: The assistant postmaster and cashier, upon whom devolves the financial responsibility of the office; the superintendent of mail and the superintendent of delivery, charged with the responsibility of the dispatch and receipt of mails and local delivery of same; the superintendent of money order, charged with the proper conduct of the money-order, registered and postal savings business; the superintendent of Newberry Station (independent), charged with the responsibility of the proper conduct of said station.

This office is also a central accounting office, requiring the auditing of accounts received from 46 third and fourth class offices, adding to financial responsibilities of the assistant postmaster.

SPECIAL CLERKS.

This office has three special clerks, who are very proficient in their particular line. Being a grade above that of clerk, it is an incentive for the ordinary clerk to aspire to promotion to these special clerkships.

These special clerks likewise put forth greater effort to become more efficient in order to become eligible for promotion to a supervisory position in case of a vacancy.

The compensation of special clerks should be at least \$200 greater than that of the ordinary clerk.

OVERTIME.

It is very often the case, under present conditions, that the clerk or carrier who makes necessary overtime receives as much or more compensation than his immediate supervisor, when perhaps the supervisor has put in as many hours

or more of service than the employee. This is unjust, and is another of the many reasons for an increase in the salary of the supervisor.

COMPENSATION OF SUPERVISORS.

Aside from the high cost of living, which fact is established beyond question, it is absolutely imperative that the compensation of supervisory employees be increased, and the same should be commensurate with services performed and responsibility attached to the position. These salaries should also be equivalent to those paid for similar service in the commercial and industrial world.

No business can be conducted successfully unless the employees are interested in their work, and salaries lower than the worth of the employee tends to destroy that interest more than anything else.

That the standard of efficiency essential to good service may be maintained, the thought of financial burden, due to obligations which can not be met owing to inadequate salaries, should be eliminated from the mind of the employee.

The salaries of supervisory employees should not be based upon a percentage of the postmaster's salary, as at present, but upon the receipts of the post office and according to the responsibility, financial and otherwise, of the position held.

We therefore most earnestly appeal to your honorable commission to carefully consider the plan for the reclassification and readjustment of salaries of supervisors.

It will be noted by Exhibit A that the supervisors of this office have served ranging from 11 years to 33 years, giving the best years of their lives to the Postal Service at a very nominal salary.

Respectfully submitted.

W. STANS HILL, Assistant Postmaster.
W. A. F. ZAHN, Jr., Cashier.
M. DUNBAR FREY, Superintendent of Mails.
HAYES H. McEWEN, Superintendent of Delivery.
ADAM BEITER, Jr., Superintendent Money Order.
HERMAN S. MACMINN, Superintendent Newberry Station.
WILLIAM F. KEYS, Jr., Special Clerk.
D. J. DANNEKER, Special Clerk.
CHAS. W. WILLIAMS, Special Clerk.

BRIEF FILED BY A. S. BODKIN ET AL., A COMMITTEE REPRESENTING THE SUPERVISORS OF THE PITTSBURGH, PA., POST OFFICE.

The supervisory post-office employees of Pittsburgh, Pa., respectfully submit this brief, detailing the reasons for their petition for reclassification and increased salaries for supervisory employees.

The world's demand upon the United States for commodities, causing a large increase in our exports and thereby reducing the supply formerly used for consumption at home, has served to increase the price of all necessities of life. In order to meet the initial increase in the cost of commodities organized labor throughout the United States has demanded and received increases in wages. The increased cost of labor, and consequently the increased cost of production, has served to further increase the price of commodities. Therefore, postal salaries, which do not nearly meet the demands made upon postal employees because of the high cost of living, should be adjusted to compare with those obtaining in commercial and industrial occupations.

During the past four years Pittsburgh, "the workshop of the world," has experienced unusual prosperity. Demands for steel, iron, and glass products and bituminous coal have been so great and such an unusual demand for labor was created that many experienced postal employees, finding their salary insufficient to enable them to live in comfort and rear their children according to true American standards, resigned from the Postal Service and sought employment offering better opportunity.

The Pittsburgh post office has had no eligible male civil-service list for the past three years, there being at present 124 vacancies. During this period there have been over 2,700 resignations and removals among regular and temporary employees. These vacancies are filled by a constantly changing temporary force.

Since January 1, 1918, a period of 20 months, 125 clerks with five years or more experience have resigned in the Pittsburgh post office. These positions are practically vacant to-day, there being that many vacancies. At least three years of study and experience are required to qualify a clerk for distribution. The force of distributors in Pittsburgh is actually less than necessary for efficient service.

It is essential not only to induce a more capable class of men to enter the service than is represented by the caliber of the present temporary help, many of whom are mentally or physically unfit for service, cast-offs from other fields of endeavor, but also to retain the present personnel, gradually diminishing, by the granting of a liberal increase in the salaries of postal employees. The great difference existing between postal salaries and those obtaining in commercial and industrial lines is due to lack of reclassification in past years and to failure to keep pace with the large expansion of the service, and there is no doubt that the Postal Service will be more handicapped by resignations in the near future if prompt action is not taken.

Owing to prosperous local industrial conditions, there is no immediate prospect of relief from the temporary-help problem. This condition of numerous inexperienced employees, combined with insistent public demand for prompt service, has added to the responsibilities of supervisory employees. Also, during the past 10 years many new features have been added to the Postal Service, such as parcel post, C. O. D. and insurance, rural free delivery, postal savings, motor-vehicle service, war-savings stamps, central accounting offices, and distribution of supplies by larger post offices at certain points to other smaller post offices.

Let us call to your attention the saving to our Government the Post Office Department effected in transporting the issues of the Liberty loan bonds from the Treasury Department at Washington, D. C., to the various distribution points throughout the country. The express companies, on account of the financial risk, refused to handle these bonds except at the carrying charges of 1 per cent currency, but the Post Office Department carried all these bonds for a registration fee of 10 cents per package.

Again, the Post Office Department transports from the Treasury Department at Washington, D. C., to the places of business of the various Federal reserve banks all currency shipments at 32 cents per pound, while the express companies charge the currency rate, which is 55 cents per \$1,000 in a radius of about 450 miles, the rate increasing as the distance is lengthened, until it amounts to \$1.65 per \$1,000 transported as far as San Francisco.

It's saving to the Government would alone more than pay the increase in salaries which the post-office supervisors are entitled to when the living conditions are considered and a comparison is made with similar positions in the commercial and industrial world.

Five years ago circular mail was hardly noticeable. To-day it equals 25 per cent of the volume of first-class matter. In the industrial and commercial world the increased volume of business results in accumulated unfilled orders. Public demands permit of no like condition in the Postal Service. Increased volume of mail means increased efforts, and the faithful, long-experienced supervisor, whose motto is "Do it now," is charged with the task of obtaining the desired action. That he has been successful, is attested by the fact that during the late terrible conflict, when the postal service of all nations was disrupted, the United States Postal Service alone maintained service at almost normal, although its experienced personnel had been greatly reduced by war conditions.

Economists are united in the expression that the purchasing power of the American dollar of 1919 is equal to but 50 per cent of the purchasing power of the dollar of 1907. As increases in salaries of supervisory employees during this period have been negligible, a 5 per cent and 10 per cent bonus being added July 1, 1918, and continued July 1, 1919, the present salary is actually less than in 1907.

The supervisor to-day is drawing on his humble reserve; many have increased the mortgages on their homes, and in some instances have been compelled to sacrifice life insurance carried as future protection for the welfare of their dependents.

Prices of building materials, coupled with high wages paid in the building trades, resulted in a dearth of construction of dwelling houses. Six or seven room houses in modest residential sections are renting at from \$45 to \$75 per month, and are so scarce that agents are holding them for sale at greatly increased prices. Many people are offering rewards and other inducements in order to secure houses or rooms.

At a conference, held by milk shippers, wholesale dealers, and the milk commissioner, the price of milk was fixed at 16 cents per quart, effective October 1. This necessity is placed in the luxury class, not many years ago being sold for only 5 cents per quart.

We appreciate the fact that you gentlemen realize that a supervisory employee, harassed with domestic perplexities, is incapable of efficient performance of the arduous and exacting duties his position demands, and that a just and equitable remuneration should be granted to offset the effect of domestic worries caused by the high cost of living conditions, and thus obtain perfect efficiency.

Granting that increased wages is not the final solution of the present stress, we maintain that immediate adjustment of salaries of postal employees is necessary until a more equitable basis of production and distribution is concluded.

For your information we are showing herewith figures covering the receipts, changes, business transacted, salaries paid in other lines of work, etc.:

Receipts of the Pittsburgh post office.

Year.	Amount.	Year.	Amount.
1917.....	\$3,457,149.73	1918.....	\$4,980,792.51
1918.....	4,108,484.60	1919.....	4,960,951.92
1919.....	4,238,215.07		

Postal savings deposits and withdrawals.

Year.	Deposits.	With- drawals.
Jan. 1, 1914, to June 30, 1915.....	\$662,962	\$472,173
Jan. 1, 1915, to June 30, 1916.....	1,157,327	556,492
Jan. 1, 1916, to June 30, 1917.....	2,400,320	1,305,881
Jan. 1, 1917, to June 30, 1918.....	1,996,557	1,560,000
Jan. 1, 1918, to June 30, 1919.....	3,069,399	2,026,636
Total.....	9,286,565	5,921,182

The sales of war-savings stamps from January 1, 1918, to December 1918, amounted to \$9,322,436.34.

Following are some figures showing the number of changes that have taken place in the Pittsburgh post office in various years:

Designations.	1912	1916	1917
Clerks, laborers, etc.....	28	48	142
Carriers and collectors.....	32	37	66
Temporary substitute clerks.....			170
Temporary substitute carriers.....			54
Temporary substitute laborers.....		5	17
Motor-vehicle service.....		40	167
Total.....	60	130	616

Separations in the first seven months of 1919, all classes, were as follows:

January.....	398	June.....	
February.....	100	July.....	
March.....	101		
April.....	78	Total.....	
May.....	110		

It is interesting to note, therefore, that the separations for only seven months of 1919, numbering 997, almost equal those for the whole year 1918, namely, 1,040.

Following is a list of the supervisory officials of the several divisions of the Pittsburgh office, showing their ages, designations, the dates they were appointed regular, their entrance salaries, the date appointed to the present position, present salary excluding bonus, and present salary including bonus and length of service.

Name.	Age.	Designations.	Date appointed regular.	Entrance salary.	Date appointed to present position.	Present salary.	
						Excluding bonus.	Including bonus.
Quinn, D. B.....	40	Superintendent of mails.	\$600	July 7, 1919	\$3,000	\$3,150
Cluley, Robt. E.....	53	Superintendent of finance.	June 1, 1902	2,600	Oct. 1, 1918	3,000	3,150
Foerster, Chas. V....	46	Bookkeeper.....	Apr. 1, 1891	1,100do.....	2,000	2,200
Anderson, James B..	43	Cashier, money order.	Jan. 16, 1899	600	July 8, 1908	2,600	2,730
Bodkin, S. A.....	44	Postal cashier...	Apr. 1, 1897	600	Apr. 1, 1917	2,200	2,400
Sweitzer, Chas. H....	39	Assistant postal cashier.	Sept. 1, 1904	600	Oct. 1, 1918	1,700	1,900
Gallupe, Geo. S., Jr...	56	Assistant cashier, money order.	June 18, 1881	1,200	July 2, 1902	1,800	2,000
Anderson, John W...	37	Finance clerk, postal savings.	July 1, 1901	500	Sept. 9, 1911	1,800	2,000
Cannon, Bruce.....	50	Stenographer, postmaster's office.	Sept. 1, 1899	1,200	Sept. 1, 1899	1,700	1,900

The following figures show the wages and salaries paid in commercial and industrial lines in this city:

Craft.	Per hour.	Per day, 8 hours.	Per year, 300 working days.
Boilermakers.	\$1.12 ¹	\$9.00	\$2,700.00
Carpenters.	.90	7.20	2,160.00
Electricians.	.80	6.40	1,920.00
Engineers.	.90	7.20	2,160.00
Gas fitters.	.74	5.92	1,776.00
Iron fitters.	.83 ¹	6.64	1,992.00
Machine fitters.	.90	7.20	2,160.00
Millwrights.	.75	6.00	1,800.00
Metal workers.	.90	7.20	2,160.00
Painters.	.97 ¹	7.76	2,328.00
Plumbers.	(1)	8.00	2,400.00
Roofers.	.50	4.00	1,200.00
Welders.	.70	5.60	1,680.00

¹ 70 cents to 85 cents per hour.

This table covers 32,000 employees, is for an 8-hour day, no overtime, no Sunday work. Supervisors in these trades receive \$1 per day and upwards in excess of the per diem wage shown in the foregoing table. In comparison with post-office supervisory employees' present salaries a wide margin is shown in favor of the mechanic.

Following are some of the salaries paid by our city and county government to their employees. These employees, in addition to drawing larger salaries than post-office supervisory employees, work shorter hours, have no Sunday work, and do not work on all holidays, and have off all Saturday afternoons.

The average salaries paid to supervisors in the smaller national banks of Pittsburgh, Pa., are: Cashiers, \$5,000; assistant cashiers, \$3,600; auditors, \$3,000; paying tellers, \$2,400; receiving tellers, \$2,000.

Scale for street car motormen and conductors: First year, 42 cents per hour; second year, 48 cents per hour; third year, 54 cents per hour. Employees involved, 6,000. Many of these employees have runs covering 10 hours per day, 7 days a week, making an annual wage of \$2,000.

The following list of daily earnings of employees in the steel mills of the Pittsburgh district was given for publication by officials of the United States Steel Corporation to the Pittsburgh daily papers:

	Per day.		Per day.
Rough labor	\$4. 95—\$5. 50	Engineers, manipulators, etc ..	\$12. 63
Semi-skilled labor	8. 26— 9. 00	Blooming mill heaters	17. 92
Sheet rollers	28. 16	Skelp mill heaters	18. 18
Sheet heaters	21. 12	Skelp mill rollers	21. 73
Roughers	11. 92	Lap welders	16. 08
Catchers	11. 92	Blowers	13. 76
Steel pourers	12. 84	Bottom makers	12. 91
Vessel men	14. 65	Regulators	13. 52

There are a few men in the larger steel plants who earn as high as \$65 and \$70 per day. These are the highest type of skilled men. The foregoing table

covers about 120,000 employees of steel mills in the Pittsburgh district. Added thereto are the many thousand employees of the Westinghouse electric, air brake, and machine plants, where the wages parallel those paid in the steel mills. The Westinghouse corporation conducts lectures and engineering courses for the benefit of employees, and prizes and scholarships are granted for proficiency.

To obtain employees to maintain the Postal Service as a going institution the Post Office Department must compete with these industrial corporations. The many lucrative positions offered by these corporations for energetic, reliable young men is the logical explanation of the table of employees of the Pittsburgh post office as included in this brief, showing that of the total of 1,607 employees, 448, equaling 28 per cent, are temporary employees, with no civil-service status.

Civil-service examinations for post-office positions have been held weekly in Pittsburgh during the past summer with faint results, the majority of those qualifying rejecting the tender of appointment.

The demands for steel from both foreign and domestic sources augurs prosperity in this district for an indefinite period. This means an increased volume of mail. We desire to emphasize the statement previously made in this brief: "That the present force of distributors is actually less than necessary for efficient service." Also, it requires at least three years of study and experience to develop sufficient ability for this class of work; and as this necessary class of clerks can not be developed from a constantly changing group of temporary help with no civil-service status, we respectfully solicit your careful consideration of the statements and data submitted herewith, in the hope that in your wise deliberations you may evolve a measure that will prove a just solution of postal conditions.

In conclusion we respectfully submit a copy of the reclassification bill for post-office supervisory employees, as presented and unanimously adopted at their convention held in Atlantic City, N. J., August 18, 19, and 20, 1919, as an expression of a just measure of compensation for post-office supervisory employees.

Respectfully submitted.

A. S. BODKIN,
J. B. ANDERSON,
E. V. RILEY,
GEO. W. GASSEN,
ROBERT QUIN, *Chairman,*
Brief Committee.

BRIEF SUBMITTED BY MR. JOHN E. MILAN, REPRESENTING THE SUPERVISORY OFFICIALS AND SPECIAL CLERKS OF THE NORFOLK, VA., POST OFFICE.

I am one of the assistant superintendents of mails in the Norfolk, Va., post office. I entered the Postal Service on July 1, 1901, as a substitute post-office clerk, and since that time I have been continuously employed at that office. At a representative meeting of the supervisory employees of my office, attended by 36 of the 39 supervisory officials, the subject of the reclassification and readjustment of salaries on an equitable basis, so far as it concerned the supervisory group, was fully and earnestly discussed, and I was chosen by the unanimous vote of those assembled to endeavor to secure the privilege of appearing before this distinguished commission and place before you the scale of salaries, together with certain data and information in support thereof, which was adopted by the National Association of Supervisory Post Office Employees at the annual convention of that association held at Atlantic City, N. J., on August 20, 1919.

It was the sense of this meeting that the plan for the reclassification of the grades and salaries of supervisory post-office employees adopted by the national association is eminently fair and just if the reclassification and readjustment of salaries is to be consummated on an equitable basis.

I do not wish to take up the time of the commission by reading the whole scale which is a sliding one and according to which the salaries of the various supervisory officials are adjusted in relation to the receipts of the office with which they are associated, but I desire to take up the salaries for one office only, for example, an office like Norfolk, Va., which during the last fiscal year transacted a business of from \$800,000 to \$1,000,000. If the Congress should enact legislation carrying out the plan of salaries proposed by the supervisors' association the plan

Minimum salaries of the supervisory officials of an office transacting a business of approximately \$1,000,000 per annum would be as follows: Assistant postmasters, \$4,000; superintendents of mails, \$4,400; assistant superintendents of mails, \$3,400; cashiers, \$3,600; assistant cashiers, \$3,000; bookkeepers, \$2,800; superintendents of stations, \$2,500; foremen, \$2,400 to \$2,800; examiners of stations, \$2,400; stenographers, \$2,400; chief stamp clerks, \$2,400; finance clerks, \$2,400 to \$2,800; special clerks, \$2,200.

MOTOR-VEHICLE SERVICE.

Superintendents, \$3,200; assistant superintendents, \$2,800; chief mechanics, \$2,800; assistant chief mechanics, \$2,400; statisticians, \$2,400.

In connection with the item relative to special clerks I desire to state that the salary scale as adopted by the National Association of Supervisory Post Office Employees contained no provision for special clerks, the association having adopted the scale before the official announcement that for the purpose of this investigation special clerks would be included in the supervisory group, therefore it was the sense of the meeting of the supervisors of the Norfolk office that the salary of a special clerk ought to be fixed at \$200 per annum less than the salary of a foreman.

If I may be permitted to make a comparison of the salaries which I have just enumerated with the salaries which those officials are drawing at the present time, the result will show that the percentage of increase which we are petitioning your commission to recommend averages from 35 per cent to 75 per cent.

The question therefore presents itself, Is this increase in salaries justified, and if so, on what circumstances or conditions is it based? To prove this question it would seem to be necessary first to define just what the purpose of a salary is, and then to demonstrate, if possible, that that purpose is not being fulfilled. The chief purpose of a salary is unquestionably to provide the means for a man to live and support his family on a scale in keeping with the dignity of the position which he occupies. Therefore I can not help but believe that when the Congress of the United States reclassified and graded the salaries of the supervisory officials of post offices by the appropriation act for the fiscal year 1914—and no reclassification has been made since that time—its action was based on the assumption that the salaries provided at that time were only sufficient to enable the recipient to live happily and support his family in conformity with the American standard of living. If such is the case, and since that time conditions have arisen under which the purchasing power of a man's salary has been practically cut in half, does there not rest on the employer at least a moral obligation to increase the salary commensurately, so that that man may continue to live in a manner befitting the station he has been accustomed to occupying?

In consideration of the great publicity that has been given to the question of the cost of living, and the almost unlimited data put forward to prove that since the years 1913 and 1914 the cost of practically every essential commodity that enters into the living of all mankind has, with very few exceptions, more than doubled. It would seem to be unnecessary to take up your valuable time and burden you with a repetition of such data. But I would like to direct your attention to the changes in the cost of living during the period from December, 1914, to June, 1919, inclusive, for 18 shipbuilding centers on the Atlantic, Gulf, and Pacific coast and on the Great Lakes. My purpose in submitting this particular data is because I believe that the increase in living costs has been greater in shipbuilding and shipping centers than in other places, and further to show that the percentage of increase for all items has been greater at Norfolk, Va., than at any other city mentioned in the table. As shown, the lowest percentage of increase for all items is 65.07 per cent for Los Angeles, Calif., as of June, 1919, and the highest percentage of increase for all items is 87.05 per cent for Norfolk, Va., as of June, 1919.

I beg to submit also for your consideration some data which I have secured relative to salaries and wages paid at Norfolk by the municipality, various mercantile establishments, and in the building trades. We believe that our case has been fully proven, if it is admitted as it must be, that the purchasing power of our salaries has diminished to the same extent that the cost of living has advanced, that the purchasing power of \$1,000 to-day is only equivalent to that the purchasing power of \$500 or \$600 was in 1913 and 1914. The data is submitted for the purpose of showing that the city of Norfolk, Va., and the

various mercantile establishments mentioned therein, have generously recognized what my Government itself has yet to recognize, the imperative need of adjusting salaries and wages on the basis of present living costs.

A policeman of the city of Norfolk draws a salary of \$1,890 per annum, nearly \$100 in excess of the salary paid some of the supervisors of the Norfolk, Va., post office and \$200 more than is paid the executive in charge of the Government-owned motor vehicle service in operation in my city. The official who has charge of this service has direct supervision over 40 employees, the operation of and the maintenance of 31 trucks, is responsible for the prompt and efficient transfer of the mails for a population of approximately 250,000 people, yet he draws the entirely inadequate salary of \$1,610 per annum. In 1914 a policeman and a fireman of the city of Norfolk drew a smaller salary than a fifth-grade post-office clerk in a first-class post office, but the salary paid these men to-day exceeds that paid to a number of our supervisory officials.

I have endeavored to secure some data as to the salaries paid various executives in mercantile establishments located in my city, but I have experienced considerable difficulty in getting this data, for the reason that it seems to be the policy of most of the establishments which I have visited to hold the question of salaries paid to executives as confidential. However, my efforts were rewarded to a certain extent, and from the information I received I am convinced that in no representative Norfolk establishment requiring executives of relative ability were those executives so poorly paid as in the Postal Service.

I visited the plant of one of the most progressive newspapers of the State of Virginia, a concern that carries on its pay roll more than 100 employees, and I was granted an interview with the business manager of that concern. He told me that every executive of that concern, from the highest to the lowest, was credited with a drawing account of \$50 per week, and the ultimate annual salary of each executive depended entirely on the amount of business transacted by the concern during the year. Excepting the assistant postmaster there is not a supervisory official in my office drawing a salary which equals the drawing account credited to the lowest executive of this publishing concern.

I was also accorded an interview by a high official of the largest department store in my city. This establishment employs more than 500 people, transacts a considerable business, and naturally requires a greater number of executives. The salaries of the executives of this establishment, excluding the owners of the business, who hold the highest executive positions themselves, range from \$2,600 to \$5,200 per annum. The gentleman who was kind enough to give me this information also told me that a salesman possessing little more than ordinary experience commanded a salary of \$40 per week, or \$2,080 per annum. I know of two concerns, ordinary business concerns, transacting just an ordinary business, who pay their bookkeepers \$60 per week, and the system of bookkeeping used by these firms differs, in my judgment, in no material way from the ordinary system of bookkeeping, nor requires men of exceptional training and ability. These firms are T. C. Hurst & Son and the Fox Welding Co., both of Norfolk, Va.

I want to invite your attention also to the scale of wages paid to the various craftsmen engaged in the building trades at Norfolk, Va., and I want you to observe that the craftsman himself in the majority of these trades draws a wage of approximately \$2,200 per annum, which is greater than the salary of any supervisory official in my office, excepting the assistant postmaster and the superintendent of mails, yet a postal employee can not hope to obtain an executive position except by showing marked ability over his fellow employees, which, as a general rule, is acquired only by diligent application to the work and long years of experience.

Only a few years ago the colored laborer, particularly known as a hod carrier, who supplies the brick mason with the material with which to do his work, was paid a wage of from \$2.50 to \$3 per day. That particular class of labor is paid to-day 75 cents per hour, or \$6 per day, and time and half-time for overtime. And when I take into consideration the changed conditions under which these laborers are forced to live, I can not believe that they are paid more than they actually earn; nor, by the same process of reasoning, can I believe that they are entitled to be paid more for their unskilled labor than an experienced distributor in a post office is paid for his labor, much less a post-office executive.

In speaking on the question to which this commission is devoting so much of its valuable time, the substance of my argument has been that the reclassification and readjustment of salaries ought to be made on the basis of living costs of the present day. I do not wish to be understood, however, as advocating a

salary only sufficient to enable a man to eke out a bare existence. Unless the salary of a man is sufficient to enable him to put away a certain percentage of his earnings, with which he may by the practice of reasonable frugality purchase for himself a home, or gratify the ambition which is in the heart of every father—to give his boys particularly every possible educational advantage, so that when the time came for those boys to go out into the world and seek success for themselves they would be fully equipped to meet the competition confronting them—he is an industrial slave. A man is entitled to a reasonable profit on his labor, so that when he grows old and becomes disabled by the length of years, he will have been able to put by a sufficient sum to relieve him from care and worry for the balance of his days.

There is a great spirit of unrest spreading over this country from one end to the other. The distinguished Senator from Idaho, in a magnificent speech made in the United States Senate only a few days ago, voiced this opinion when he said: "This America is not the America which I have known and loved." And from what I know of my own knowledge, together with what I have gathered from other sources, that spirit of unrest has pervaded the Postal Service; and, in my humble judgment, the fundamental cause of that condition is dissatisfaction. I can see it; I can feel it; I can sense it, every day, among the employees as I come in contact with them on the workroom floor of my office. I do not mean to say that they are rebellious; they are not rebellious in any sense of the word. But somehow that old-time spirit of enthusiasm, of alacrity, is lacking. That spirit of initiative, so characteristic of the American workman, whatever occupation he may be engaged at, is not present. The morale of the force is not so high, and as a natural consequence there is a materially reduced efficiency. And do you think that the weakened morale may be elevated, and postal efficiency restored to what it formerly was by conciliation, or perhaps, by measures of coercion? I do not. All of these things which I have mentioned are, in my judgment, but the effects of a cause. Remove the chief cause of dissatisfaction, inadequate salaries, and the effects will vanish of themselves.

To-day 48 per cent of the clerical force of the Norfolk, Va., post office are temporary clerks, without a civil-service status, and totally inexperienced in post-office work. These employees as a general rule are young men of from 18 years to 21 years of age. As a rule they are there to-day and gone to-morrow. I pledge you my honest word that at times the changes in the personnel of this force of temporary clerks has been so rapid I have experienced the greatest difficulty in keeping myself informed as to who they were and to what particular section of the office they were assigned. The necessity for the employment of this class of employees, as you no doubt are aware, has been caused by the depletion of the regular clerical force. The regular men have left the Postal Service because of inadequate salaries, and partly because of unsatisfactory working conditions, and have sought and secured more lucrative employment elsewhere.

BEFORE PRESENTED BY MR. R. H. BRYAN, SPOKESMAN FOR SPECIAL CLERKS,
WASHINGTON, D. C.

TECHNICAL AND ASSISTANT SUPERVISORY CLERKS HAVING THE TITLE OF SPECIAL CLERKS.

There are in the division of mails of the Washington post office employees between the grade of clerk and supervisor who are engaged in work closely allied with the administration of the division of mails. These employees, as a rule, are highly technical men who have graduated from the class known as distributors and have been selected for their present positions because of marked ability shown as distributors and their adaptability for work of a higher grade, their selection being made from the entire force because of their knowledge and efficiency. They are engaged in constructive work of a high-grade character, and are of very much value to the service because of their ability to perform the technical work required, practically without the assistance of supervisors. The clerks referred to are locally designated correspondence clerks, general office clerks, clerks in charge of second-class matter, and stenographers. Their duties involve work which would otherwise devolve

upon supervisors, and which could not be handled by the present supervisory force without weakening the supervision of the office.

The duties of these clerks are as follows:

Correspondence clerks.—Two are employed, one to cover correspondence pertaining to matters involving incoming mails and the other the outgoing mails. Both of them are high-grade stenographers and typists. Their duties require tact, initiative, accuracy, and responsibility, acquired after years of practical schooling in the post office. They are also required to have a comprehensive knowledge of the postal laws and regulations on all matters pertaining to their respective duties. Their work includes constructive correspondence with the public, Railway Mail Service, Post Office Department, and the various Government bureaus and departments, which would otherwise devolve upon supervisors.

Stenographers (2).—In addition to being competent stenographers and typists, these clerks perform constructive work of a technical character without assistance from their supervisors. The duties of one of them consists in part in the preparation of intricate schedules, and the other one is very adept in the search of registry records, having charge of the files of the registry section.

General office clerk.—The duties of this clerk are of a very miscellaneous nature, requiring an extensive knowledge of postal regulations and post-office practice. He is well informed in the classification of mails, and is able to furnish applicants for information, in person or by telephone, such as is desired by them, in most instances without referring them to the supervisors. He is also head clerk of the New York distributors, and was selected for his present position solely on account of his ability.

Clerk in charge of second-class matter.—This clerk has charge of the records of mailings of second-class matter, which involves bookkeeping, handling of money, and constructive correspondence on all subjects pertaining to this class of matter.

Assistant foreman, inquiry section.—It is the duty of this employee (designated as special clerk) to assist the assistant superintendent of the section in the supervision of the force of this section and the handling of all correspondence pertaining thereto. His duties involve also a comprehensive knowledge of the postal laws and regulations. This section, which includes 70 employees, covers all work pertaining to nixie, directory, box, general delivery, and incoming C. O. D. matters, each of which line of work is a subdivision of the section.

In lieu of the present designation of special clerk, it is asked that the local designations herein indicated be officially recognized in future appropriation bills, as these employees are graduates from the floor work of the post office; also that these employees be granted from \$300 to \$700 more salary than the maximum grade of clerk, according to their ability and the requirements of their position.

(Mr. Bryan also submitted the following resolutions:)

RESOLUTION PRESENTED BY MR. R. H. BRYAN, WASHINGTON, D. C.

Whereas we, as special clerks of the mailing section, Washington City post office, have been called upon to elect a spokesman to represent us as a body at a meeting called by the Reclassification Committee for the Postal Service: Therefore, in order to give an intelligent and correct statement of our views as to reclassification, we beg to present the following resolutions: Be it *Resolved*, That we indorse the following:

First. Increased compensation, minimum, \$2,500 per annum; 20 per cent for night work, and time and a half for overtime.

Second. Inasmuch as first and second class post offices are auxiliary to the Post Office Department, we recommend that we be granted the same privileges in regard to the number of working hours, annual leave, Sundays, holidays, and Saturday half holidays.

Third. We indorse the Sterling-Lehlbach retirement bill.

Fourth. We recommend that owing to the onerous duties performed at the office special clerks be not required to prepare for more than one examination annually, the time consumed to be compensated for in some way. This peculiar service precludes a special clerk entering any other business.

Fifth. We recommend the elimination of night work as far as possible.

BRIEF SUBMITTED BY WM. H. HAM, RICHMOND, VA.

The Joint Commission on Postal Salaries has suggested that employees be grouped in the following classes: Supervisory officials, including special clerks. . . . In order that statements concerning salaries may be viewed from various angles, this brief has been prepared by the special clerks and forms part of the brief of the supervisory officials.

The mere fact that the Congress has appointed a committee to investigate the salaries of the postal employees would indicate that Congress, at least, realizes something must be wrong with the present salary scale. The men in the postal service do not believe the Congress would be led into a useless investigation requiring much time and labor unless there has been evidence produced which would indicate clearly the necessity of such an undertaking.

The special clerks at this office are 29 in number. An examination of the office records reveals these men have served faithfully for a combined period of 44 years, or for an average of 16 years each. It has been stated repeatedly by executive heads that the first period of service or training is often given at a loss to the corporation. It is only after years of experience along particular lines when men become valuable assets. This is equally true in the professions. Then, if this be true in corporations, professions, banks, and business houses, there can be no argument to gainsay it being equally applicable and true to the Postal Service. The work peculiar to this service can not be mastered in months. It is expert opinion that years of service and application must be required for efficient service. With few exceptions these men entered the service between the ages of 18 and 20, and at the present time are in their period of greatest productivity.

The special-clerk group of any office is the training school in which the supervisory officials are taught. The department in establishing this grade has already set its seal of approval upon the work of these men. In our office we find them holding the most responsible positions; many are in charge of subdivisions. The expert knowledge of the various mail separations is only acquired by constant application; the scheme changes and time schedules must be read and studied as often and more thorough than your daily paper. Millions in currency, bonds, and securities must be handled daily. On actual count by a bank of this city it was learned that in one day there was shipped by registered mail \$700,000 in currency and bonds, and on the same day \$3,000,000 was received. (These figures were furnished with the understanding that they would not be made public.) When the shipments of other banks in this city are added to the above figures one can secure some conception of the daily shipments. The missending of one package of currency often entails a loss of \$25 to \$50 to the bank, and very often a greater loss to the department in its subsequent investigations. The handling of millions in the cashier's office and money-order division prove the efficiency and responsibilities of these men. Yet, with such responsibilities and handling of mails our salaries do not compare with those paid for similar duties performed in other fields.

We find that a large percentage of the work in the post office by this class of employees must be performed during the night hours. While we realize this feature can not be eliminated, yet we do feel that shorter hours of service should constitute a night's work. Then, again, there is the subject of overtime. The cashier's records of this office indicate that 28 special clerks (one being in the A. E. F. postal service, not counted) performed during the fiscal year July 1, 1918, to June 30, 1919, 1,206 days of overtime service. Thus it will be seen that each clerk worked on an average of 43 days extra during the year, or an average of 1½ hours daily. We learn this service was performed with a double purpose. First, as the Government could not procure through its regular channels sufficient workers to carry on the work, it was thought loyal to assist in any manner possible. Second, as long as the men remained in the service it was necessary to supplement their regular pay in order to partially meet the rising cost of the necessities of life. We find that the men do not desire overtime. We ask that only a living wage be paid and the overtime eliminated. However, when it becomes necessary for the men to be called upon for extra hours of service, we feel that it is only proper and just that time and a half be allowed.

If the schedule of salaries be studied, it will be noted that overtime is based on the 28, 29, 30, and 31 day schedule, and work so performed is paid on this basis. In a 30-day month, in which there would be only 25 or 26 actual working days, overtime made is not paid on a 25 or 26 day basis, but is based on a

full 30-day period. Thus it will be readily seen that overtime pay, instead of being the higher pay, as in the greater number of industries, is at a lower rate than regular time.

Although the Postal Service is called upon to render service for each dollar of its receipts, besides carrying tons of mail for other branches of the Government free, yet we find the receipts of other branches of the service are based not upon actual service performed, but merely upon collections made. As salaries are mostly based upon the receipts of any office, we can readily see that in this respect the Post Office Service is at a decided disadvantage. We find that salaries paid in the Internal Revenue and Customs Service are invariably higher than salaries paid in the Postal Service for similar work and responsibilities. Thirty days' vacation and 30 days' sick leave are granted in other branches, while the Postal Service is only allowed 15 days' vacation.

In private industries, banks, and corporations we find our salaries do not compare favorably. In the banks we are informed that average salaries paid tellers and senior clerks holding positions similar to ours will range from \$1,600 to \$2,685. We have purposely given these figures, referring to the banks, because we wish to stress the fact that clerks in other fields of endeavor are much better paid. Statistics showing salaries and wages paid various groups of workers are embodied in the brief of the supervisory officials. From all figures obtainable it is clearly shown that the skilled post-office worker is the lowest paid of the skilled or unskilled workers.

Frank expressions from former employees giving their reasons for resignations clearly indicate many men who have become trained clerks no longer desire positions in the post office. A reading of these letters on file with the commission will further advance the argument that the Post Office Service has not kept abreast of the times in salary increases, as not one man failed to enter private industry at a higher rate. Not only can the argument be advanced from the standpoint of resignations, but to this may be added the failure of men to qualify for entrance into the service.

For the period October 1, 1913, to July 1, 1919, inclusive, the special clerks at this office were given increases (including the bonus of \$200 on July 1, 1918, and the increase of \$100 on July 1, 1919) averaging 34.8 per cent. During the same period, May, 1913, to June, 1919, the Department of Labor states that foodstuffs have advanced almost double in the last six years. We find from their figures that in Richmond, Va., the advance has been 97 per cent. Increases from 1918 to 1919 in this city were 14 per cent. Without argument we accept these figures as correct. Clothing and other necessities of life have mounted in like proportion. Therefore, even assuming our salaries were equitable and just in 1913, and further, not taking into consideration any extra compensation for increased responsibilities of length of service, it would appear our salaries at the present time must be 62.2 per cent below normal.

In conclusion, we respectfully request of your honorable commission:

1. In consideration of the extra responsibilities and length of service and our loyalty to this service in its time of stress when many sacrifices were made by the men in this service, we would suggest that the lowest special clerk grade be made \$200 per annum above the maximum clerk grade.

2. The early passage of a fair and just retirement bill.

3. Overtime be computed on a basis of time and a half.

4. Leave of absence to include a sick leave.

5. Future appointments in the supervisory force be taken from the special clerk class.

BRIEF PREPARED BY THE SUPERVISORY EMPLOYEES OF THE HARRISBURG, PA.,
POST OFFICE AND PRESENTED BY CHAS. H. HOFFMAN.

The supervisory employees of the Harrisburg (Pa.) post office desire to record their appreciation to the Congress for the opportunity to bring to their direct attention some things which we believe to be vital to the success of the postal establishment as well as to submit a plain statement of facts relative to salaries and working conditions. It has always been said and admitted by those who knew, even by Members of Congress in debate, that the employees of the Postal Service were the poorest paid class of Government employees. These admissions have not been made without serious thought, but have been founded upon facts presented from time to time and substantiated by figures

and records of the respective post offices and the department. We do not come to you gentlemen crying poverty and we would not for a moment have you think we are endeavoring to take advantage of our opportunity by betraying your confidence. Never before in the long years of service rendered to the Government has so liberal a spirit been shown the employees by the Congress and we trust there will be no hint of selfishness on our part in the presentation of what we believe to be just and equitable in the matter of salaries and working conditions.

Throughout the period during which our country was at war with foreign powers it goes without saying that the employees of the Postal Service were loyal beyond a doubt, and anything we might have done in that emergency we hope will not be referred to in any readjustment Congress may see fit to make in connection with our salaries and working conditions. We feel that anything we have done or any sacrifice we have made should be laid on the altar of patriotism. During the strenuous times of 1917 and 1918, when the service was taxed to the breaking point at times, the men of the Postal Service, as a whole, stood by the department and Congress for the sake of the Nation which we have been taught to love.

As a result of this war, however, there has come some conditions which vitally affect the home life and environment of every postal employee, as well as men and women of every vocation in life. With these conditions has come the high cost of living and this feature is paramount above all others. You gentlemen need not be told anything regarding the high cost of living. The Congressional Record has been full of it; Members have discussed it from all angles, and the result is that it exists and there is no doubt about it. Although it has been promised that relief will come, there appears to be no immediate result in this direction, and, therefore, men are compelled to seek such a standard of wages as will enable them to meet the conditions which confront them. To enable us to live in keeping with the nature of our positions as supervisory employees of the Postal Service, we are compelled to ask that our salaries be readjusted to meet the new conditions. We feel that we are entitled to live in an atmosphere that encourages rather than discourages. We are taught that we are expected to possess a degree of intelligence higher than the ordinary because of the peculiarities of our positions. As supervisory officials, we are expected to assume the responsibility of meeting new conditions as they present themselves in the administration of the office. It is our duty to plan, not only while actually on duty but at our homes, for the things that make up an efficient service.

In order to give efficient service and secure the best results from our efforts, we feel that we can not in justice to the Government engage in outside work, because to do this means some sacrifice of interest in the work of the post office. Therefore, a man can not maintain his standard of efficiency without deliberate thought and study, and to render this efficient service he must be able to dismiss from his mind any thought of financial burden by reason of inadequate salary. We do not mean to convey by this that a man must be necessarily extravagant to maintain a decent standard of living or be disposed to wastefulness in order to spend a salary commensurate with the work performed, but we do believe that every man and woman is entitled to a just compensation for service rendered.

In the Harrisburg, Pa., post office to-day we have eight supervisory officials and eight special clerks performing duties of a supervisory nature. Since July 1, 1914, these supervisors have received increases in salary ranging from 14 per cent to 43 per cent, not including the bonus granted by Congress, effective July 1, 1918. The highest-paid supervisor receives \$2,200 salary and the lowest-paid supervisor receives \$1,800, the special clerks receiving \$1,400 each. These men have rendered service to the Government averaging 19 years for each supervisor and special clerk, the oldest in point of service serving 31 years and the youngest serving 10 years. These men have given the best years of their lives to the service which they have helped build and make efficient. They are a part of the intellectual machine which supervises the work of over 150 employees in an office having gross postal receipts exceeding \$700,000 and a money-order business running into the millions, and which directs the distribution of supplies to 1,000 post offices in the State of Pennsylvania and a sub-agency for the distribution of stamped envelopes and postal cards which has recently shipped stamps as far west as Iowa. There are many things too numerous to mention that are performed in a day's work in the post office, but

It should be considered above everything else that with every operation of the Postal Service comes the corresponding responsibility.

The great postal machine, operated as a part of our great Government, vitally affects the business and social life of the Nation, and it is absolutely necessary therefore that the men employed in its service, especially those who direct its affairs, be men of undoubted loyalty, who are honest in their desires to render the very best service possible, and it is believed that this class of men to-day occupy the supervisory positions in post offices. The United States Department of Labor has gathered statistics which prove conclusively that the salaries paid men in supervisory positions in post offices are wholly inadequate and do not measure up to salaries paid for like or similar positions paid in the commercial world.

The salary paid the superintendent of mails in the Harrisburg post office, namely, \$2,200, is far below that paid managers of business concerns in this city whose responsibilities are not to compare with those of superintending the division of mails in a post office. He not only plans but takes part in the execution of the work of the office and is not provided with the same number of assistants in proportion to that allowed in the commercial world.

It appears useless to present in this brief a comparison of salaries paid in the commercial and governmental establishments. These statistics have been officially gathered and printed for the information of Congress by the Department of Labor and are practically the same the country over, although some statistics have been prepared and furnished by the National Association of Supervisory employees and more will no doubt be presented during the course of the hearings now being conducted by the Salary Commission.

In the financial world men responsible for the same amount of money as that received and disbursed under the direction of the superintendent of finance in a post office receive salaries in many cases double that received by the Government employee charged with the same and greater responsibilities. The multiplicity of duties with which supervisory employees are charged entitle them to consideration. It should be remembered that the business of a post office does not consist alone in the arrival and dispatch of mails and the mere selling of postage stamps. There are many things welded together to make the great Postal Service a reality and a success, and in this the supervisory employees play the important part. The postmaster as the directing head of a post office relies on the supervisory employees to conduct the office with credit. The handling of men is a problem not easy to solve, especially where conditions are unsatisfactory as regards salary and environment. In this the diplomacy of the supervisory official receives a severe test. It is believed that the commission will be able to form some idea of the duties and responsibilities of a supervisory official from some things referred in this brief. The postal business of the Harrisburg post office has increased by leaps and bounds, as will be shown in Exhibit A. A gain of almost 100 per cent in postal receipts is shown from 1914 to 1919, while the gain in salaries of supervisory employees has been from 14 per cent to 43 per cent.

An enormous gain is also shown in the money-order business, as shown in Exhibit B.

While the war-savings and revenue work is not purely that of the post office, yet it seems that it has come to stay, and will continue to be a part of our daily labor, and it seems only fair that the commission should know what the responsibility of handling these funds amounts to and this is shown in Exhibit C.

In considering permanent salaries for supervisory employees the commission is respectfully asked to observe that no general reclassification of supervisory salaries has been made for years, and that promotions each year depended entirely upon the pleasure of Congress and the department. It is believed that in the reclassification merit should be made the prerequisite for promotion, and that every official should be promoted to the maximum based upon his record for faithfulness and efficiency. It is believed to be bad practice to allow only a certain number of promotions in the supervisory grades, and then apportion them to postmasters, through the department, for their discretion as to who shall be promoted and who shall not, and thus put a premium on political favoritism. We believe beyond a doubt that special clerks should receive at least \$200 in excess of the salary paid the highest grade clerk in the automatic grades, and that they should be promoted successively to the highest grade of special clerks, to the minimum grade of supervisors, and thereafter promoted to supervisory positions based upon their capacity and efficiency to perform the duties required of such supervisory officials. We also believe that some plan

should be adopted whereby the employees should become something more than mere workers in the service. In the commercial world employees are given a voice in the management of commercial enterprises, limited, of course, to certain proportions, but encouraging them in the thought that their advice and years of service are worth something in shaping the future course of their policies. We believe that Congress should make it mandatory upon the department to fill vacancies where they exist, and that promotions should not be permitted to lapse, but deserving employees should be given an opportunity to qualify to the higher positions so long as they are necessary and provided for.

It is our firm belief that the personnel of the supervisory force of postal employees to-day have the right spirit and that they are not asking for anything but what they believe to be right. We do not for a moment presume that we can deceive Congress and compel legislation that would be entirely unfair to the public, for, after all, they must pay the cost of the service. We want to be fair and render service of which we can be proud. The press of the country is almost unanimous in its appeal in our behalf. Petitions by the tens of thousands have been circulated and presented to Congress by constituents at home because they believe we are advocating a just cause. We ask you to consider our case carefully. Think of us as men trying to do our best for a service we love, trying to render the very best we know how, and in the end we believe you will agree with us that the salaries now paid are exceeding small as compared with the commercial world and what, in your judgment, you think we are entitled to. We ask your careful consideration of the plan for the reclassification of supervisory post-office employees adopted at their last annual convention.

We believe that if the standard of salaries set by the Government for all branches of the service were equal to those paid for like positions in the commercial world, it would have the effect of inducing better men to enter the service, and in this event it would seem that the service would be conducted with less men than at present, due to a higher degree of efficiency.

EXHIBIT A.

Gross postal receipts of the Harrisburg (Pa.) post office.

Calendar year:	Gross receipts.
1900	\$103, 790. 13
1910	270, 738. 51
1911	327, 142. 84

BRIEF SUBMITTED BY CHAS. V. HILTON FOR THE SPECIAL CLERKS OF WASHINGTON, D. C.

The Postal Service can not be revived except by an improvement in the condition of the employees. The service has become inefficient, in that mails are unduly delayed; trains on which mails were formerly worked have been eliminated; an additional handling of the mail has been made necessary by the installation of a primary separation for temporary clerks; carrier trips have

been reduced in number; an enormous amount of mail is misassorted by green men in the service. For the week, May 20 to 26, 1919, carriers of the delivery section, Washington, D. C., post office, reported misassorted letters to the number of 47,306, or approximately 8,000 per day.

The Postal Service should not be administered for the purpose of making a profit, in that it is a carrier of news and knowledge; second-class matter, which is a medium of education, is carried at less than cost. In some cases, as many as 200 separate pieces of mail are carried for 1 cent; free matter, the Government's correspondence, represents profit for the Government which never enters into the statistics of profit and loss. Approximately three-fourths of the mail handled by the Washington, D. C., post office is free official matter. The revenue for Washington office for year ending June 30, 1918, was \$3,085,193.12. If frank matter were given a place in these statistics, the revenue would have been approximately \$12,000,000.

The salary classification of 1907 (entrance \$600, maximum automatic grade \$1,200), has been disarranged and salaries reduced, in that the dollar has been consistently depreciating in value; according to the Department of Labor the dollar of to-day is worth 50 cents as compared to the dollar of 1913, and it is worth 37 cents as compared to the dollar of 1896.

The feeling is general in the Postal Service that there is discrimination against postal employees, in that they do not receive 30 days' leave as do all others in the Government service. They do not receive any sick leave, while all other departments give 30 days.

They do not receive Saturday half holidays as is customary in the other departments.

They are compelled to work much overtime, but they do not receive pay for time and one-half as is the custom to-day.

Persons are appointed to departmental positions in the Post Office Department without any postal experience. These positions should be open to postal employees as an advancement from their present positions. It is urged as a good plan to allow 30 points in the civil-service examination for postal experience.

Supervisory positions should be open to postal employees only.

The number of postal employees is kept at a minimum, causing the work to be a continual grind, making it inconvenient to secure leave and with every temporary increase in the volume of mail necessitating overtime work.

Night work (6 p. m. to 6 a. m.) is a serious objection and approximately two-thirds of the employees must work it, yet they do not receive any additional compensation as is provided for the Government Printing Office employees, where 20 per cent additional is paid.

The opposing views are as follows:

Postal employees claim that they should receive automatic salaries, \$1,800, \$2,100, and \$2,400, with special clerkships at \$2,500 and 2,600, and that substitutes should receive 75 cents per hour.

The department is opposed to general increases in salary.

The department claims that the present price level is only temporary and that this is a bad time to fix salaries.

The postal employee is worth from \$1,800 to \$2,600, for the Postal Service is a trade or profession, for it requires approximately five years to become an expert. The period of apprenticeship is actually from 6 to 10 years, for it requires that time to reach the maximum salary.

The distributor must have between 5,000 and 10,000 facts at his finger tips while performing his work. (See Exhibit B, the schemes of one postal employee.)

He must develop a degree of accuracy that will insure the distribution of at least 25 letters per minute.

Much study on his own time is required to learn and keep up with schemes of distribution.

The present salary has failed to hold in the service the greater part of the employees, for resignations have been almost wholesale. In the last fiscal year in the Washington Post Office, carriers, regular and substitute, to the number of 78, resigned; clerks, regular and substitute, to the number of 291. Resignations among temporary carriers and clerks in the last two years have reached approximately 1,000 and 3,000. This is in an office with 1,300 employees.

Other trades are better paid, though most of them require an apprenticeship of only four years, and the inconvenience of night work is unknown to them; the following list of trades and rate of pay in Washington, D. C., will show it: Bricklayers, \$1 per hour; electrical workers, \$1 per hour; sheet-metal workers, \$1 per hour; hod carries, \$5 per day; street-railway men, 0.51 per hour; painters, \$1 per hour; carpenters, \$0.84 per hour; tile layers, \$6 per day; steam fitters, \$1 per hour; plumbers, \$1 per hour; first grade, 0.35 per hour; postal employees, sixth grade, \$0.50 per hour.

We are facing a permanently higher price level, for the quantity of currency is permanently increased—that is, for years; gold will not return to circulation, for the people have learned to use paper money and to leave their gold in the bank.

There will be no great outflow of gold through international trade, for the United States is now a creditor instead of a debtor Nation; the United States must extend further credit to Europe for material during reconstruction; though it has been said that when trade is resumed "low-priced European goods" will flow over here in such enormous volumes that they will liquidate all annual obligations to us; yet European goods are not low priced, for prices in Europe since the war began have risen more than they have in the United States.

A reduction of outstanding credit will not take place for many years, if at all, for vast issues of war bonds are bases for future credit expansion; the new bonds are unrivaled security for further borrowings from banks for commercial purposes.

Postal salaries should be reclassified and fixed at an advance of approximately 75 per cent; efficient postal service demands it; if a profit must be shown, the public should pay it, not the postal employees; the depreciation of the dollar has been recognized practically everywhere except in the Postal Service; the Postal Service is a trade or profession requiring long apprenticeship; the present salary has failed to hold the best employees in the service; other trades are far better paid; prices generally are not coming down but are likely to increase further.

(Whereupon the committee adjourned at 5 o'clock p. m.)

POSTAL SALARIES.

FRIDAY, OCTOBER 10, 1919.

JOINT COMMISSION ON POSTAL SALARIES,
Washington, D. C.

The commission met at 10 o'clock a. m., Hon. John A. Moon presiding.

Mr. Moon. The commission will come to order and resume the hearings.

The first witness this morning is Mr. Davenport, of Virginia.

CLERKS IN FIRST AND SECOND CLASS POST OFFICES.

STATEMENT OF MR. J. B. DAVENPORT, FORTRESS MONROE, VA.

Mr. DAVENPORT. Mr. Chairman and gentlemen of the committee, I have a brief, which, with your permission, I will read. [Reading:]

I appear before this committee to present a few facts and relate conditions affecting postal clerks in Newport News, Hampton, Phoebus, and Fortress Monroe, Va.

That the prices of commodities has so vastly increased as to make it well nigh impossible for clerks in the postal service to maintain a decent standard of living, is so well assumed that I shall not go further at present than to say that this particular community has suffered from war-time activities, probably more than any other locality. The population grew from maybe 30,000 souls to possibly and assuredly at times 200,000. This boosted prices to an almost unbelievably high rate.

That this condition of affairs seriously affected postal clerks is shown by the following tables:

Newport News, Va.:

Regular clerks appointed since July 1, 1917.....	10
Substitutes and auxillary clerks appointed since July 1, 1917.....	290
Regular clerks resigned since July 1, 1917.....	14
Substitute and auxillary clerks resigned since July 1, 1917.....	275
Regular carriers appointed since July 1, 1917.....	16
Substitute and auxillary clerks appointed since July 1, 1917.....	130
Regular carriers resigned since July 1, 1917.....	11
Substitute and auxillary carriers resigned since July 1, 1917.....	123

Fortress Monroe, Va.:

Regular clerks appointed since July 1, 1917.....	7
Regular clerks resigned since July 1, 1917.....	4
Substitute and auxillary clerks appointed since July 1, 1917.....	32
Substitute and auxillary clerks resigned since July 1, 1917.....	22

Hampton, Va.:

Regular clerks resigned since July 1, 1917.....	6
Regular carriers resigned since July 1, 1917.....	7

Of the original seven clerks and nine carriers in the office, three clerks and three carriers remain. All other clerks and carriers are new. New clerks have come into the office only to resign in a short while—as soon as something better presented its self.

Phoebus, Va.: This office came into the classified service on July 1, 1919. Up to this time it was almost impossible to get clerks and carriers to stay in the service owing to the small salary.

At one time it was seriously thought of discontinuing the free delivery.

The clerks and carriers of this office at present are only receiving \$1,000 per annum.

Especial attention is invited to the appalling number of resignations. In the Newport News post office the number of resignations of regular clerks exceeds the number of appointments. The number of carriers resigned is almost as great as the number appointed. Of 290 substitute clerks appointed, 275 resigned. Of 130 carriers appointed, 123 resigned.

• In view of these facts I ask you what kind of a business man would attempt to run his business in any such 'suicidal way as this, and how could a business run on such lines long keep out of bankruptcy? We ought to be fair to Uncle Sam, who foots the bills in such matters, and give him a fair show to keep competent help.

The comparison of wages paid mechanics and laborers with that of postal employees in this vicinity is about as follows: Unskilled laborers' wages have advanced from 75 cents, or \$1 a day to 40, 50, and even 60 cents an hour. Some colored riveters in the ship yards, by working overtime, have been making as much as \$200 a week—as much as they formerly earned in half a year; these are facts, as the pay rolls will show. Laborers on the ship-yard pay roll have been making as much as \$100 a week. Other jobs, due to 10 per cent contracts, show like conditions. These facts have caused a phenomenal rise in the prices of commodities in this vicinity. On account of the war activities most business men in this locality have been making money so fast that they hardly had time to count it. Due to the high wages, everybody bought everything they cared for, no matter what the price, which was all very well for those whose wages had been vastly increased, but which worked a positive crime on postal employees who were compelled to exist on about the same wage scale as that before these conditions existed.

I shall be pleased to place statistics before you, but hesitate to bore you with them in the face of what you already know about increased prices and increased percentages and decreasing purchasing powers of a dollar.

I will briefly state what I consider essential points:

1. Six hours night work to be equivalent to eight hours day work.
2. Time allowance for scheme work, or extra pay when this is not possible.
3. A strict observance of the 8-hour law.
4. Time and a half for overtime, with double pay for Sundays and holidays. This is an endeavor to cut out overtime.
5. Thirty days' leave of absence, with additional 30 days' sick leave in case of illness.
6. Seventy-five cents per hour for substitute work.
7. A civil-service court of appeals.
8. Voluntary retirement at 60 years after 30 years' service, compulsory retirement at 72, with liberal pension.
9. Postmasters and supervisory officials must be made to recognize seniority in promotion and working conditions of employees, provided in all cases that efficiency is maintained.
10. A decent living wage, that good men may be induced to remain in service. See list of resignations for this vicinity.
11. Reclassification: First grade to be \$1,800; second grade, \$2,100; third grade, \$2,400; special grade, \$2,500 and \$2,600.

It is only fair that you give an increase in salaries somewhat commensurate with the increased cost of living, and I do not think I will plead in vain with your committee for this concession, nor do I think you will turn a deaf ear to the other suggestions I offer.

In conclusion, I invite your special attention to what in my mind is the most essential points I make, and that is in regard to promotion and assignment of work and working conditions. This should not in any event be left to the whim of postmasters and supervisory officials, but should be rigidly controlled by law.

On July 1, 1915, my salary was increased to \$1,100. On July 1, 1919, it was increased to \$1,200—a percentage of 9 in four years. With the bonus of \$200, the percentage of increase has been 27 in four years. Board alone costs me as much now as I used in taking care of three persons in 1915. This is an actual statement of indisputable facts.

One clerk has three children to support. This clerk has to be assisted by relatives, otherwise it would be impossible to give them the necessities of life.

Another clerk has a wife and child to take care of. The wife has to work in order to meet the expenses of the family.

Another clerk has had to take the children of age old enough to work out of school, to help support the family. The last two mentioned clerks are so proficient in their line of work that they make 99.7 per cent on examinations; if they were in any other class of business they would be considered at the top, and command wages accordingly. It seems to be the Post Office Department only that does not recognize proficiency.

Mr. Moon. Thank you very much, Mr. Davenport. The next witness is S. J. File, of Delaware. Is Mr. File here? As he does not seem to be present, I will call the next witness, Mr. Mohler, of Harrisburg.

STATEMENT OF MR. J. T. MOHLER, HARRISBURG, PA.

Mr. MOHLER. Mr. Chairman, honorable members of the commission, in behalf of the clerks of the 78 offices in central Pennsylvania, I want to present, in a humble way, our case before you to-day.

Our position is that we believe that we are underpaid. Take a man in the commercial world that we grew up with, invariably he is getting twice as much money as we are, working for the Government. This works a handicap on us when we attempt to go into the markets of the country and buy the necessities that we must have in order to live.

When it comes to educating the children and clothing ourselves, we are handicapped from the fact that the man who has been working in the commercial world has more money to spend than we have, and a man that has goods to sell makes no distinction whether we work for the Government or whether we work for an individual; and that, of course, works a handicap on all men in our line of work.

Another thing, our work is very exacting, and it takes considerable time to prepare for the work of a post-office clerk. It takes four or five years training, of routine work, to make a clerk, and during the war there were many, of course, who quit the service. Many of us stood by the department, not from the fact of patriotic motives exactly, but that we hoped that some time there would be something better in store for us; that our needs would be given consideration, and we feel that this commission will recommend for us an adequate salary, something that we can go into the markets of the world with our fellowmen, and buy necessities that we must have. That, of course, will work a hardship on Congress, in the way of this advanced pay that we are asking for, but I would make the suggestion that a raise be made in the rates of postage. The public is paying more for everything else; why should they not pay more for postage?

Mr. ROUSE. What class of postage do you mean?

Mr. MOHLER. All classes. I think to-day the parcel post is handled too cheap for the amount of work and space that it requires.

Mr. ROUSE. You know there is good profit in the parcel post?

Mr. MOHLER. That there is good profit? I don't know that; no, sir.

Mr. ROUSE. How many men in your office have resigned in the last year? How many clerks?

Mr. MOHLER. I should say not over five.

Senator MOSES. Out of how many?

Mr. MOHLER. In round numbers, about 60.

Senator MOSES. What grade were they?

Mr. MOHLER. Well, perhaps fourth and fifth. Maybe one or two of them were in the sixth grade.

Senator MOSES. Was there any difficulty in replacing them?

Mr. MOHLER. Yes; there was considerable difficulty in replacing them. We are working short handed, under handicaps at all times for lack of help; and the help that we are getting to-day, is not as desirable as it might be. That is the consensus of opinion, that there are not the class of men that came in years ago, because the inducements that the department offered at that time are not what they were some time ago. When I entered the service, eight or nine years ago, \$1,200 looked like a good job. I was a boy off the farm, and naturally, I thought \$1,200 working for the Government was a mighty good thing; but to-day it is inadequate. It is no fault of the department; it is the fault of conditions.

Mr. ROTSE. I want to ask one more question. Do you think you reflect the sentiment of the men in your office when you make the statement that you suggest an increase in postage on all classes of mail matter; or is that your private opinion.

Mr. MOHLER. That is my private opinion.

(Mr. Mohler submitted the following brief:)

BRIEF SUBMITTED BY J. T. MOHLER, HARRISBURG, PA.

First of all, I want to extend our sincere thanks for this opportunity to present our facts to this distinguished commission. It gives me great pleasure to say we have no special grievances of a local nature to submit. Our only complaint is that we think we have been for years, and are to-day, very poorly paid. It was a conceded fact before the war that all post-office clerks of the country were underpaid, and now, since the purchasing power of a dollar is so much less, our condition is very much worse.

We don't ask anything unreasonable from this great and glorious Government, that we are glad to serve, but we do think that we should receive as much for our services from the Government as we could command in the commercial world for a like position requiring the same amount of knowledge.

Our wages have been raised 25 per cent—including 16½ per cent war bonus in the past several years; living, as you know by referring to the Government statistics, have advanced 100 per cent, or thereabouts, so you can readily see the disproportion of affairs as they affect post-office clerks. This condition applies all over our grand country.

Wages in the commercial world have advanced by leaps and bounds, and these same men are our competitors in the buying markets of the country.

We think we are a disfavored lot of men and are not receiving the compensation due us.

We are not going to ask anything unreasonable, but think, all things being in proportion, the man that was receiving the maximum salary four years ago should be getting at least \$2,300 or \$2,400 to-day, to keep abreast with the present cost of living.

I shall not attempt to try to burden you with any statistics of conditions. You know you have plenty such information in hand to base your opinions upon, but will only ask that you recommend for us a salary commensurate with the work we perform, namely, a minimum of \$1,500 and a maximum of \$2,300, special clerks to receive \$2,400 and \$2,500, respectively.

Mr. MOON. The next gentleman on the list is Mr. Harry E. Feis of York, Pennsylvania.

STATEMENT OF MR. HARRY E. FEISER, YORK, PA.

Mr. FEISER. Gentlemen of the commission, I wish to bring one important thought to your attention, and that is the Merit System. I am one of the three representatives from central Pennsylvania. We have had two cases brought to our attention by the clerks at a conference in Harrisburg on September 14. I will give one as an example. Harry A. Garner, my fellow representative from Pennsylvania vouches for the accuracy of the statement.

A clerk in the Reading office, second grade, was reduced for a slight infraction of the law. The infraction was this: A resident of Shillington, a post office near Reading, was expecting a bundle of fish, perishable goods, and he called up the Reading postmaster at his home, and the postmaster said, "No, we can't give you any mail in transit. It is a direct violation of law." He went to the post office and saw this inexperienced clerk and said to him, "I have a bundle of fish addressed to my home, and I thought by coming here I could get them." The clerk in his ignorance thought he was advancing the mail and saving the parcel from perishing and delivered it to him, and he was given a demotion of three months (which is the law), but up to October 1, 1919, that clerk has suffered a monetary loss of \$616. Now, the details of that will be covered in the brief that we will present.

Another thing I wish to call your attention to is the unfair wage condition of the finance clerks, stamp clerks, and money-order clerks in the offices of cities ranging from 50,000 to 150,000. We are placed in charge of the finances—in my office I am in charge of the entire stock and cash, with an office title of postal cashier. Last year I personally handled \$1,244,000 in stamp sales, and the money derived therefrom. At the present time I am responsible for between two and three hundred thousand dollars' worth of stock, and there are two or three other clerks who have access to that stock, which can not be helped on account of the eight-hour law. We have 66 district postmasters under the central accounting system, 16 contract stations, and 3 general delivery clerks which are supplied from my department. Now, all that finance work was handled at an expense to the Government of \$1,400. In other walks of life the salary would have been much more.

Mr. MOON. How much are you bonded for?

Mr. FEISER. I am bonded for \$2,000.

Senator MOSES. How much are these two other clerks bonded for that have access to the stock?

Mr. FEISER. One is bonded for \$1,500. The superintendent of mails, who also has access to it, is bonded for \$2,000, and I don't know what the assistant postmaster's bond is at the present time.

(Mr. Feiser submitted the following paper:)

BRIEF SUBMITTED BY MR. HARRY E. FEISER, YORK, PA.

In conformity with the suggestions contained in the announcement of the hearing of the Joint Commission on Postal Salaries, the clerks of central Pennsylvania met at Harrisburg, Pa., on September 14, 1919, and selected Harry E. Feiser, York, Pa.; Harry A. Garner, Reading, Pa.; and John T. Mohler, Harrisburg, Pa., to represent them at the hearings of this commission and present oral statements and data pertaining to the salaries of post-office clerks.

A review of the facts set forth in this brief will show you that the clerks have been underpaid and were compelled to retrench from their former mode of living and sacrifice all pleasures and luxuries; and, in fact, many of the necessities of life, to keep within the purchasing power of the salary received from the Government. Many of the post-office clerks augmented their salaries by outside employment, while others were compelled to go into debt to secure the necessities of life, as shown by statements contained in this brief. Outside employment was condemned by one of the representatives at Harrisburg meeting, who stated that a clerk employed outside of the post office could not give his full man power to his post-office work and the efficiency of the office suffered thereby, while on the other hand, post-office clerks should not be compelled to seek outside help to meet living conditions when they are employed by the best Government in the world, a Government operated for the whole of the people whose interests should be uppermost in the minds of all, and which should compensate its employees in keeping with that paid by private enterprises and the larger corporations.

The following resolutions were presented at the meeting at Harrisburg and unanimously adopted:

"That our representatives recommend to the joint commission that the entrance salary for post-office clerks should be not less than \$1,500 per annum with yearly automatic increases of \$200, until a maximum of \$2,300 be attained, with 'special clerks' at \$2,400 and \$2,500. That 40 per cent of the sixth-grade clerks in all first and second class post offices be advanced to the grade of 'special clerk.' It was further recommended that the department dispense with substitutes, and in their stead appoint regular clerks at the minimum grade, thus assuring better postal service."

AVERAGE EXPENDITURES FOR LIVING NECESSITIES.

In presenting these tables of costs we are assured by the clerks furnishing them that they represent their actual living conditions and that they show a much lower standard of living enjoyed under normal condition. In presenting the table of Clerk Kirkpatrick, Sunbury, we find the extreme cost, and the largest family, consisting of seven:

Salary received from Post Office Department.....	\$1, 400. 00
Expenditures for year year ending June 30, 1919:	
Rent.....	240. 00
Life insurance.....	120. 00
Taxes and other insurance.....	10. 00
Education.....	15. 00
Papers, books, and magazines.....	15. 50
Gifts, churches, charities, war work.....	120. 00
Doctors and dentists.....	90. 00
Drugs and toilet articles.....	5. 00
Postage and expressage.....	3. 00
Entertainment and recreation.....	None
Shows and motion pictures.....	None
Clothing.....	89. 25
Shoes and repairing.....	95. 00
Coal and wood.....	52. 00
Gas and electricity for lighting.....	21. 80
Gas for heating and cooking.....	47. 00
Ice.....	8. 00
Liberty bonds.....	50. 00
Laundry.....	2. 00
Foodstuffs.....	847. 00
Railroad and trolley fares.....	5. 00
Total expenditures.....	1, 835. 60
Deficiency not accounted for.	

In selecting the two tables below we accepted them from a group of at least 10, and as they ranged about \$1,700 to \$1,750, and the average of five persons to the family, considered them representing the average living conditions of post-office clerks in this district.

Submitted by Clerk Feiser, York, Pa.:

Expenditures:

Liberty bonds.....	\$51. 00
Insurance premiums (sick, life, accident, fire).....	140. 32
Taxes on home.....	43. 55
Payment on home in lieu of rent.....	200. 00
Interest on mortgage.....	77. 00
Water rent.....	23. 00
Gas for cooking and water heater.....	47. 03
Electric light, not including lamps.....	21. 83
Telephone (now \$21 per annum).....	18. 00
Doctor and dentist fees, including medicine.....	18. 30
Magazines and newspapers.....	15. 50
Clothing.....	89. 60
Ice.....	16. 00
Milk (average 1½ quarts daily, with extras).....	89. 44
Repairs to home.....	3. 55
Coal and wood (heating only, 3 tons below normal).....	66. 50
Contributions to church and Sunday school.....	36. 40
York County war chest.....	12. 00
Dry goods, notions, etc., from department store.....	104. 25
Shoes and repairing.....	81. 20
Recreation, including picnics, vaudeville, and motion pictures.....	25. 00
Foodstuffs, petty purchases, gifts, sundries, etc.....	551. 53

Total expended..... 1, 721. 00

Salary from Government.....	1, 400. 00
Sunday-school orchestra.....	46. 00
Secretary of lodge.....	194. 00
Rental of dance library.....	81. 00

Total receipts..... 1, 721. 00

Submitted by Clerk Campbell, Sunbury, Pa.:

Expenditures—

Clothing.....	\$125. 00
Rent.....	240. 00
Insurance (life and personal effects).....	170. 07
Taxes.....	2. 26
Light.....	18. 00
Water rent.....	5. 00
Fuel (coal, wood, gas).....	83. 00
Papers and magazines.....	7. 50
Shoes and repairing.....	90. 00
Sewing for family.....	20. 00
Doctor, drugs, and dentist.....	75. 00
Furnishings for home.....	100. 00
Ice.....	15. 00
Soaps and toilet articles (laundry and bath).....	15. 00
Miscellaneous foodstuffs.....	650. 00
Sundries including hair cutting, notions, gifts, contributions, lodge dues, recreation, etc.....	100. 00

Total expended..... 1, 715. 83

Salary from Government.....	1, 400. 00
Additional funds by outside employment and investment.	

Clerks from Chambersburg submitted report in bulk as follows:

Total expenses of nine clerks.....	14, 039. 18
Total salary of nine clerks.....	11, 953. 00

Deficiency.....	2, 186. 18
Liberty bond purchased.....	901. 00

Total bills owing by nine clerks..... 1, 285. 18

Service in my community, which I judge are the same all over the country.

I don't know that I can add anything in the statistical line outside of the regular statistics of salaries and commodities, which are practically the same the country over. I have a brief touching on those things, but I would like to say that it seems to me that the whole argument regarding the increase in postal salaries, the whole discussion, bears on nothing else but the increase in salaries and the attitude that has been taken. Of course increases in salaries of employees would help the Postal Service the same as it would a business institution. The Postal Service has grown to tremendous proportions, and we who are in the post offices more readily realize this enormous increase in the mail, especially in third-class matter. We are simply flooded with it. The problem is becoming so pressing that if we do not draw a better type of men into the service than what these salaries will naturally induce, the Postal Service in the future will be demoralized for the lack of capable officials to carry on the business. I don't say that unadvisedly, because you realize that it is the policy of our biggest and best corporations in America to-day to draw the very best brains right down to the lowest man. Take our big rubber companies, nobody but a college man can go into their sales force. They had it up to that standard until the war, but during the war they opened it to high-school men.

Now, we want to draw into the Postal Service college men and we want to draw in high-school men; and what could possibly induce a college man to enter the Postal Service to-day? You need the trained type of man; you need the man trained to think. The ordinary clerical duties can be performed by a person of average intelligence and industry with a little education, provided they try to perform them. But we have got to build for the future; we have got to look forward to the time 10 or 15 years from now, when the inefficient can be weeded out and we can come up then to the standard of the few who are the survival of the fittest. To-day we are going along on the work, you might say, of the men who came in 20 or 30 years ago, when civil service was first initiated. These men are still bearing the burden; they have the knowledge and they have the ability. The men that came in in the old days were men of considerable ability, but those men are dying out; they are resigning; they are being forced out by age; and the time is coming when we will have to have new men to take their places; and this problem is becoming so great, the mail service is becoming so large, that it assumes the proportions of a large corporation. In my opinion, I think it would be better if the Government went into the Postal Service more thoroughly and did not just touch it from a distance. For example, if this service was completely revolutionized by the introduction of the methods of, say, the Ford automobile factory. Mr. Ford established a minimum wage there of \$5 and later of \$6 a day, and he set that almost \$3 above the average minimum wage; yet he drew into his service the best type of workmen in America and to-day that shows in what he has gained.

(Mr. Grogan submitted the following paper on behalf of the clerks of West Virginia:)

STATEMENT FILED BY JOHN J. GROGAN, WHEELING, W. VA.

In bringing before this commission the proposition of providing adequate salaries for persons engaged in the United States Postal Service in the capacity known as "clerk," it will be necessary to provide, for purposes of comparison, statistical data concerning the prices of commodities at the present time and the approximate prices 10 years ago, when our present salary law first went into operation. By way of comparison, the wages of persons engaged in civilian occupations of a skilled nature at the present time should also be shown. On attached sheets is shown the above-mentioned data; these figures are indicative of the wages earned in the Wheeling district; the prices of commodities also represent those prevailing in that district. What applies to the Wheeling district also in a general manner can apply to the entire State, as it is essentially a State whose cities are mainly manufacturing centers. As no city or State or country, for that matter, can live unto itself, the whole world being interdependent, it is obvious that conditions prevailing in one section of the country are very likely to be the same in other sections. The great social and economic upheaval taking place the world over is, of course, the cause of the present unrest. Economists tell us that we are suffering from the wastes of war, which brings about inflated currency, which in turn deflates the unit of value. They tell us that the dollar has shrunk in purchasing power to less than half its prewar value. We find that to be true when we are compelled to pay \$2.75 for a 25-pound sack of sugar, which five years ago could be purchased for 90 cents; when we are charged \$2 for a bushel of potatoes, which formerly retailed for 90 cents, also when we pay \$50 for a suit of clothes which we used to get for 25, and when we find that rents have greatly increased in all the cities, we are forcibly brought face to face with the fact that the economists are correct, and not only that, but in spite of the fact that prices must naturally decline some with the completion of the era of reconstruction and the restoration of the world to something like normal, that we are on a permanently high-price level. In such case, the remedy is simple—increase the income of all proportionately to meet the increased costs. As further evidence that the world is flooded with cheap money, I mention the fact that five years ago there was in circulation all over the world \$13,000,000,000 in money, \$4,000,000,000 of which was gold; to-day there is in circulation \$32,000,000,000 in money, \$20,000,000,000 of which is paper and not backed by gold. In the face of this it is obvious that the world is to suffer from depreciated money for a number of years, and it is equally obvious that incomes must rise in proportion to counteract this.

It is perhaps unnecessary to go into any further detail as to the prices of this or previous times, and I presume the gentlemen of this commission are fully aware of the depreciation of money and its causes; and I am certain that enough evidence has been gathered to show that ample compensation is not being paid in the Postal Service, considering the nature of the duties, the skill and responsibility and general knowledge required, and the fact that occupations in civilian life for which like qualifications are demanded are being more highly compensated. The large number of resignations from the service in many cities is the most impressive argument in this matter. The law of supply and demand governs Government service just as it does civilian service. Obviously the Government is not paying adequate salaries in the Postal Service as the comparison shows, and the remedy is a complete revision upward of salaries. I say it with sincerity that if this is not done that the next several years will see the complete demoralization of the service. It is going along at present on those who have given it the best years of their lives, and who are by necessity compelled to remain, inasmuch as their knowledge is marketable nowhere else.

The business of the Post Office Department is assuming tremendous proportions. The mail is increasing enormously, and with the return of prewar postal rates and an era of unbounded prosperity ahead of us, the volume of mail will be simply overwhelming. The service will be calling for men of great executive ability to handle its problems in the future, but where are they to be obtained when salaries, working conditions, and lack of opportunities compensated highly enough prevent men of education from entering. The Postal Service needs the services of the college man and the high-school man—it needs the trained thinker just as certain as does the modern American business corporation. I ask what incentive is there under present conditions for men of this type to enter the service? None whatever; and, what is more, they are not coming in. The Postal Service is too near to the hearts of the American people,

and it is of too vital importance to American business to have the safe, speedy and accurate dispatch, transportation, and delivery of its important and valuable messages to underpaid, which means incompetent, employees. A letter from a Federal reserve bank to a branch, containing perhaps \$50,000 in checks of which interest is accumulating is too valuable to be placed in the hands of a man who has not sufficient sense of responsibility to care whether he dispatches it to perhaps San Francisco or Paris. Men of responsibility must be paid for at a high rate, or what might be considered high in comparison with ordinary occupations.

It would seem that the ordinary duties of a post-office clerk could be performed by any person of ordinary intelligence. In the Postal Service, as in any line requiring skilled help, there are three qualifications which distinguish the efficient employee—education, intelligence, and industry. It would seem that plenty of persons could be found possessing these requirements, but such is not the case, and naturally the employer providing the better salaries and working conditions secures the majority of them. Witness the case of a certain automobile manufacturer who provided a minimum wage of \$5 a day when the average was much lower, and thereby gained profits for his corporation which have been the sensation of the business world.

Salaries must be as large in the Postal Service as elsewhere if the Government is to keep it efficient. They must compare at least with those in the trades such as bricklayer, plasterer, plumber, carpenter, or machinist, who are earning from 75 cents to \$1 an hour. The wages of these workers are up to stay, not that collective bargaining will hold them up, as economic law will sooner or later force the prices of labor and commodities to their proper level but because these trades and callings require a degree and skill of knowledge which will make these workers unobtainable only at such compensation. A post-office clerk who is in the service a few years acquires skill and knowledge which places him in this class. Competition for these positions will naturally eliminate the inefficient, with the result that productivity and efficiency will be increased and overhead costs reduced.

	Compensation per hour.	Total average per month.	Total per year.
First year.....	\$0.65	\$132.60	\$1,591.20
Second year.....	.70	142.80	1,713.60
Third year.....	.75	153.00	1,836.00
Fourth year.....	.85	173.40	2,080.80
Fifth year.....	.90	183.60	2,203.20
Sixth year.....	.95	193.80	2,325.60

Two special grades at \$1 and \$1.05, respectively. Substitutes, 60 cents.

I feel that the foregoing table of salaries, if adopted, would go a great way toward stabilizing the service, removing discontent, and providing sufficient inducement to draw into the service the young man of education and ambition especially the young married man. One of the principal objects of the Government or a civilian employer should be to attract into their service young men who intend to make of the occupation or business they enter their life work. We all know that the worst feature of American industrial and commercial life is the large labor turnover. It is expensive to the employer and to the employee, also affecting the economic life of the Nation. I do not say that our Government should be a paternalistic Government, but I do say that it should set the example as an employer. I do not say the Government should assume ownership of any industry, but the Postal Service is a vital part of the Nation's life and should be brought to the very highest standard.

As to some features of the Postal Service which hamper its efficiency, one of the worst drawbacks is the large amount of overtime, evening, and night service. This, to my mind, could be largely eliminated or equalized by providing that 45 minutes' service be counted as one hour's time on all overtime and service from 6 in the evening to 6 in the morning. Vacation time should be equalized with that of other departments of the Government to remove discontent. Some sort of retirement plan would greatly improve the efficiency of the service. Also seniority of service should be provided, whereby the senior

clerk would have the preference for any vacancy which might arise in any department of a post office.

I have endeavored to be conservative in my suggestions, and I sincerely hope that this commission will take all the factors into consideration and make such recommendations as will make the American Postal Service the most efficient in the world.

The CHAIRMAN. We will now hear Mr. Hilton.

STATEMENT OF MR. CHARLES V. HILTON, WASHINGTON, D. C.

Mr. HILTON. Mr. Chairman, I am interested in seeing the Postal Service revived, as it were. The Postal Service has been made inefficient in a number of ways. One of those ways was by the elimination of mail trains on which mail was worked between terminals. It has been made inefficient by the installation of primary distribution, thus necessitating an extra handling of mail. This was done for temporary clerks, because they could not be expected to learn the regular distribution scheme inside of a year or two. It has been made inefficient in another way by these green clerks making so many errors. In the week of May 20 to 26, 1919, in the delivery section of the Washington City post office, the carriers of that section made a count of the number of errors that were made of mail misassorted to them, and for that week there were 47,306 misassorted letters, making an average of about 8,000 per day.

In addition to that, I might say that I think the primary cause of the condition that exists is the effort of the Government to make a profit out of the post office. Now, there are two reasons why the Government should not try to make a profit. One is the free matter that goes through the mails, and the other is second-class matter, which does not pay for itself. There are certain kinds of second-class matter where 200 pieces of mail go for 1 cent. I have in mind the Park College Record. Free matter for the Washington City post office would certainly amount of \$9,000,000 revenue a year if it were paid for.

Mr. ROUSE. What do you think about the postage on second-class matter?

Mr. HILTON. It might be increased somewhat, but I should say, being for educational purposes, it should be carried for less than cost.

Mr. ROUSE. How much less?

Mr. HILTON. Well, I am just a distributor; I am not prepared to say.

Mr. ROUSE. But we want to get your ideas. We have got to have ideas from all you postal men. This money has got to be raised from some source if these increases are to be given, and we would like to get it from the postage rates if possible.

Mr. HILTON. I would say you should make it as near cost as possible, but you could increase first-class matter to 3 or 4 cents.

It must be borne in mind that the depreciation of the dollar is one of the conditions back of postal inefficiency. The Bureau of Labor Statistics will show that the dollar of to-day is worth just about 50 cents as compared to the dollar of 1913. If you go back further than that, you will find that in 1896 the dollar of then is worth 37 cents to-day, so that this depreciation has continued all

through, and consequently the salary classification of 1907 has become changed and out of date.

The Postal Service is a trade. It requires about five years to learn this trade. It requires from 6 to 12 years even to reach the maximum grade. Most of the special clerks did not reach that grade under 10 years.

The resignations will show that the salary is inadequate. The resignations in the Washington City post office for last year among the carriers, regular and substitutes, were 78. Among the clerks the resignations were 291.

I tried to get some statistics on the temporaries, because we depend on temporaries, and for the two-year period there were about 1,000 resignations of temporary carriers and 3,000 resignations of temporary clerks. That in an office of only 1,300 employees, showing that the salary is not drawing nor holding the men.

I would recommend that a minimum salary of \$1,800 and a maximum salary of \$2,500 be paid and automatic grades be established.

Senator MOSES. Did you find that the help rendered by these temporary assistants was efficient?

Mr. HILTON. Far from it. But it was absolutely necessary, because we haven't enough regular employees to do the work.

Senator MOSES. Did the Postmaster General's Chinese cook render great assistance to you? [Laughter.]

Mr. HILTON. I don't know the gentleman. I have heard the story but I don't know him.

The comparative salaries of other trades will show the inadequacy of postal salaries. For example, bricklayers in Washington D. C., are getting \$1 an hour. They only had to serve an apprenticeship of four years, while a postal clerk has to serve an apprenticeship of at least five years. Plumbers are getting \$1 an hour. Tile setters are getting \$6 a day. Men on the street cars are getting 51 cents an hour after one year's service. Postal employees in the first grade are getting 35 cents per hour and in the highest grade 50 cents per hour.

Senator MOSES. How long have you been in the service, Mr. Hilton?

Mr. HILTON. Twelve years in November.

Senator MOSES. What salary are you now drawing?

Mr. HILTON. \$1,600. I am a special clerk.

Senator MOSES. Do you find that as you advance in the service you become unfitted for work in other lines of activity?

Mr. HILTON. Well, I don't say that I could get out into another line and make as much money as I am making now, because I haven't the training to go into it. It is true, I could take a job on the street cars and make nearly as much money, because that doesn't require any training, but at the same time I feel that a postal clerk is entitled to more money; I think he will get it eventually, and I think it is worth holding on to for that reason. I think a postal clerk who has served his apprenticeship, is efficient, making 95 to 98 per cent, is worth under present monetary conditions, \$2,500 per year.

The CHAIRMAN. We will now hear Mr. David MacArt, of Scranton, Pa.

STATEMENT OF MR. DAVID MacART, SCRANTON, PA.

Mr. MACART. Mr. Chairman and honorable members of the joint commission on postal salaries, in northeastern Pennsylvania, taking Scranton as the hub, the cost of living has increased 93 per cent. There is only one city in the 39 largest cities, as reported by the Federal Trade Commission, that exceeds Scranton, and that is Baltimore. In Scranton the electric-light company, which operates through several counties, pays laborers 54 cents an hour. The ash man gets 58 cents an hour, and they get treble time for Sunday work and double time for holiday work, and time and a half for overtime.

The excessive night work is one of the most unnatural conditions in the post office. We know it is necessary in a great many of the post offices to have night work, but about 50 per cent of the night work could be done during the day, when there would be greater efficiency, and at the same time it would argue well for the health of the men in the Postal Service.

Senator MOSES. How do you establish that fact, Mr. MacArt? Isn't it a fact that the great bulk of the mail is deposited in the post office late in the afternoon or early in the evening?

Mr. MACART. I refer to second and third class mail, circular matter, magazines, etc. The great bulk of it is, but there are lots of firms who could put it in in the morning when there is not so much work to do, and it should be handled in that way and save the Government very large sums of money in the lighting expense that is paid for handling this matter that most people don't care whether they get to-day or next week. My experience as a carrier before I became a clerk was that many of my people would tell me: "Take that back with you." It was second-class matter that they didn't want at all, and about 50 per cent of the work in the post office at night is working on second-class matter.

In Scranton the scheme separation has 2,850 separations, in our city section alone. We also study Pennsylvania with 4,000, New York 3,500, and New Jersey 800; so you see it takes a man some years to become thoroughly competent to handle that line of work. We work the cities of Philadelphia and New York just the same as they do in the cities of Philadelphia and New York. I worked four years in the Philadelphia post office, and I naturally work Philadelphia when I am working nights in Scranton.

Another great demoralizing feature of the postal service is the lack of a seniority system, which should be established. While it is probably not the purpose of this commission to take up this matter, if we had a seniority system in the postal service similar to the seniority system adopted under Ex-Director General McAdoo, of the United States Railroad Administration, it would be one of the finest things for the postal clerk, and would show the greatest advancement in the Postal Service—that is, in the working conditions—in its history, and I urge upon you, gentlemen, while that will probably be considered a matter of administration, if it should be adopted you would certainly gain the heartfelt thanks of every clerk in the Postal Service.

I think that clerks working nights should have an increase in salary of at least \$25 a month for the time they lose from their

families and social life, which they are denied entirely, and about three-quarters of their life is spent working nights.

I also want to appeal on behalf of the motor vehicle employees. Scranton about a year ago established motor-vehicle service. We have 24 employees. Most of them are ex-service men, and the way they handle the mail matter coming from the stations to the post office and back and forth is wonderful. Those men take great interest in their work, but I can assure you that if they do not soon get relief we will not have the same class of men in the motor-vehicle service. They are a fine type of men and certainly save the Government thousands of dollars in the city of Scranton alone.

Mr. ROUSE. Does the Government operate the machines there in Scranton?

Mr. MACART. Yes; it was established about a year ago.

Mr. ROUSE. What kind of service are you receiving now in comparison with the old system under contract?

Mr. MACART. There is no comparison at all. It is excellent.

Mr. ROUSE. Is it much better now?

Mr. MACART. It is wonderful to see the way those fellows get to the post office, back and forth, from the railroad stations, and the interest they take in handling the mail properly so they won't destroy it; and they won't put one sack with 150 pounds of mail down on another sack with only 25 pounds.

The CHAIRMAN. You have a brief there, haven't you?

Mr. MACART. Yes, sir.

The CHAIRMAN. You can file that, if you will. We can then have the benefit of it. I am sorry we can not give you more time.

(The paper referred to follows:)

STATEMENT SUBMITTED BY DAVID MACART.

On behalf of the postal clerks of northeastern Pennsylvania, I have earnestly urged you to give immediate relief in the matter of higher wages.

The trying conditions of a postal clerk, certainly are not overdrawn. From Scranton and northeastern Pennsylvania, many clerks are in debt to the extent of \$200 to \$1,000, due to abnormal conditions and from sickness.

The excessive night work which denies a clerk from three-fourths of his evenings at home, with his wife and children, or friends, certainly with the unnatural times for his meals, should be given additional compensation of \$300 per year, for night work.

This would also have a tendency to abolish the unnecessary night work and save the Government large sums of money in light bills. The unnatural night work trying to sleep days in the heat and noise, is very hurtful to the health of the clerk.

Scranton stands second city showing foodstuff increases in the United States of 39 principal cities; these figures are taken from the United States Department of Labor reports.

Scranton's city scheme has 2,850 separations. Pennsylvania 4,000 offices New York 3,500, and New Jersey 800 offices. We surely have cause to consider that we are highly trained workers. In our office we had eight resignations so far this year. In the two civil service examinations held in the past six months only 20 people took the examination that was held October 4 and 40 April 1. Years past from 100 to 250 were taking these examinations.

The above clearly shows the need of adequate salaries and better working conditions.

There should be a promotion and seniority rule for clerks, similar to the one granted by the United States Railroad Administration, under ex-Director McAdoo, to stop the disgraceful manner in which promotions to-day work, and better positions in the post office. This is one of the most demoralizing con-

ditions in the post office service to-day. Many clerks are working nights --from 13 to 35 years—and clerks just appointed are getting day work.

Clerks' wages in first-class offices should be increased from \$1,800 to \$2,200 a year, and \$300 additional for night work, and in second-class offices, from \$1,500 to \$2,000. These are the lowest salaries that should be paid to meet the skill required and the cost of living at the present time.

I also appear in behalf of the motor vehicle employees of Scranton, Pa. The best type of chauffeurs are employed; also machinists and clerks; they save the Government thousands of dollars by the care they show in their work. Superintendent of the Scranton garage was offered \$2,400 to go to Detroit, Mich., but still stays in Scranton as he hopes to get a substantial increase from you, gentlemen. He is one of the best mechanics in Scranton, and was considered such in the United States Army.

So, gentlemen, I earnestly urge that you will give the increases asked, as the above figures are based on the lowest possible standard of living, plus skill in our work.

The CHAIRMAN. We will now hear Mr. Murphy, of Pennsylvania.

STATEMENT OF MR. JOSEPH D. E. MURPHY, PHILADELPHIA, PA.

Mr. MURPHY. Mr. Chairman and gentlemen, I think in order to gain a clear impression of our reasons for asking an increase in salary, it would not be amiss to go over a little bit of the detail work connected with the Postal Service.

Now we will take a man as substitute clerk. After passing the examination, he is appointed a substitute clerk at no salary. He reports in the morning, we will say, at 8 a. m. Of course, it is different in different offices, but in Philadelphia he reports in the morning at 8 a. m., and he has to wait on call until about 11.30. If at that time he has not received an assignment he leaves with the understanding that he is to report again at 3.30. At 3.30 he comes back and sits and waits until 6 o'clock. Perhaps at 6 o'clock he receives an assignment to work the 6 to 3 tour, 6 p. m. to 3 a. m. He then has to go and do that work. At 3 o'clock he is through, and after being on call for 18 hours he receives eight hours' pay, or \$3.20. That is one feature about the system that I would like to call your attention to. That man is on duty but he has no fixed salary.

Now, after serving from one to three years as a substitute clerk, he is then appointed a regular clerk at a salary of \$1,000 a year, and immediately upon his assuming the responsibility of a clerk, he is presented with a scheme to study, consisting of anywhere from 1,000 to 5,000 offices, according to the State that he receives. He must qualify on this scheme the same as the man who works on the distribution case. If he does not, he does not receive an increase in salary. After that perhaps he may be sent to the city delivery section to work. Now, in the city delivery section they have 38 separations—that is, 38 stations. They have 93 separations on the carriers' case; they have 1,999 lock boxes; that is, the names of the principal business firms of the city of Philadelphia who have lock boxes. He must memorize all those names and when he receives a letter for that person or firm he must know that they have a box. Now those lock boxes change quite frequently and he must keep in touch with the changes that are made. There is a sheet issued by the department that comes out about once every week, that has an average of 90 changes on it, and he must learn them.

Now, perhaps this same gentleman, instead of being sent to the city section, is sent down to the mailing section, as in my own case—

I was appointed a clerk on the New York State letter case. They have 3,000 post offices in the State, 225 separations, and there is a dispatch time for every one of those post offices that you must memorize. This man after serving six years reaches a maximum grade of \$1,500. Now, I want you to bear in mind that this maximum grade in the post office is reached after six years, and any man that learns a trade is usually finished in four years.

The gentlemen of the House of Representatives have indorsed the Nolan minimum-wage bill of \$3 a day, a very good bill, and I hope the Senate will follow suit. The \$3 a day minimum-wage bill pays a salary of \$1,080 a year, plus the bonus of \$240, making the salary for the fiscal year, if it passes, \$1,320. Now, you start your post-office clerk in at \$1,000 a year—very unfair to him—you take a man that will be touched by the Nolan \$3 a day minimum wage bill. He is appointed, we will say, a cleaner in one of the post offices. He comes in and takes his broom and starts to work, getting \$1,330 a year. The post-office clerk goes through the six years that I am telling you about, the time that he substitutes, from one to three years, and at least it is five years more before he gets above the man who comes under this Nolan bill.

The CHAIRMAN. Your time is up, Mr. Murphy. If you have a brief there, you can file it.

(Mr. Murphy submitted the following brief:)

BRIEF SUBMITTED BY JOSEPH D. E. MURPHY.

To properly understand the need of increased salary for the post-office clerks it is necessary to first gain an idea of the duties performed and then to compare the salary received for said duty with the salaries paid by the firms and corporations throughout the country.

The post-office clerk first enters the service as a substitute (after passing his entrance examination) and is then compelled to report in the morning and in the evening; in the event of his not receiving an assignment he must report again in the evening; perhaps he will then be assigned to fill a tour of night work, say p. m. until 3 a. m., and after being on call for about 18 hours he receives compensation for 8 hours or \$3.20 in money. As a substitute he receives no salary and is frequently unemployed for days at a time.

After serving as a substitute for from one to three years he is then made regular clerk at a salary of \$1,000 per year, and is given a scheme to study consisting of between 1,000 and 5,000 offices, together with dispatch time routes, etc.

If assigned to the city section, he is required to familiarize himself with a city scheme of 37 separations covering Philadelphia and its outlying district of thousands of residences and business firms, also a carriers case scheme of 9 separations covering Philadelphia's central business sections. In addition to this, this clerk must know the lock-box scheme consisting of 1,999 business firms or individuals having lock boxes in the central office, and a printed change of address sheet issued by the department weekly, this sheet averaging 95 removals per issue.

The clerks work three tours, 8 a. m. to 4.30 p. m., 6 p. m. to 3 a. m., and 11 p. m. to 8 a. m. Alternating each week working practically every other Sunday or part of a Sunday; as, for example, the only week he has a full Sunday off is the 8 a. m. tour.

The clerks are compelled to work a tour of eight hours or longer, continually on his feet, under an artificial light, in drafts and other unsanitary conditions.

In addition to this he must qualify each year on his schemes, which he must study on his own time.

In the mailing section the conditions are about the same, except that a man must memorize a State scheme of from 1,000 to 5,000 offices, about 225 title mailing directions for same and time of dispatch.

The mailing clerk must also qualify on his scheme once a year in order to obtain promotion.

The responsibilities of the post-office clerks are many, as, for example, the stamp clerk is graded in salary with the clerk not having the financial liability entailed in the stamp clerk's daily work. One example is a clerk receiving \$1,500 July 1, 1919, carrying a due bill of \$12,000 in stock at all times and selling approximately \$1,500,000 worth of stock yearly, working in a division that does a business of over \$25,000,000 annually.

It has been repeatedly stated by the Post Office Department that it requires about five years to become proficient as a distributor, as when compared to five years' study at a trade or a profession, the salary is very little and far below the present-day standard.

The salary paid to post-office clerks is not enough upon which to live decently and as an employee of the Government should live. Considering the class of men employed in the post office and the desire upon the part of the department to uphold the character of the service it has now become necessary either to increase the salary or allow the service to depreciate, as it is impossible to obtain the class of men the department desires under the present scale of wages.

In a statement compiled by about 100 men in one station the following are the average advances in the cost of living.

Rent, 46 per cent; light, 6 per cent; food, 84 per cent; doctors and coal, 69 per cent; clothing, 95 per cent; average in family, 3; medicines, 92 per cent.

In the case of everything the advance is placed upon the consumer regardless of his salary.

The following table is a conservative example of the expenses attending the proper bringing up of a family of four under present living conditions, allowing nothing for recreation or amusement:

Rent	\$264
Coal and wood for fuel—5 tons at \$12 and \$5 for wood.....	65
Gas (stove and light)	25
Food at \$15 per week.....	780
Clothing	200
Insurance	90
Doctors, dentist, church dues and incidentials.....	200
Total	1,624

And the maximum grade clerk is only receiving \$1,500, so as is the case very often something must be cut out or else go into debt. This is, indeed, shameful, that our great Government would allow such condition to exist especially when it is admitted by all authorities upon the subject that living costs have advanced from 75 per cent up to 300 per cent upon staple articles of food and clothing. Bradstreet quotes the advance in the cost of living from June, 1914, until September, 1918, as being 117 per cent, and the wage of the post-office clerk has increased in that same time only 25 per cent.

If the salary of the post-office clerk was increased to a fair figure it would tend to attract the most desirable element of our citizens to the service and its opportunities and also reward its faithful employees for their years of hardship which they have endured uncomplainingly.

As regards suggestions we respectfully recommend the following:

1. That the substitute grade be abolished and that a man entering the service receive as an entrance salary the sum of \$1,500, and that there be five grades—\$1,500, \$1,700, \$1,900, \$2,100, and \$2,300—and that a clerk be promoted successively to the \$2,300 grade after serving one year in the next lower grade. Also to have a \$2,400 and \$2,500 grade of special clerks and to arrange for the promotion of 40 per cent of the clerks in the fifth grade to the title of special clerk in the \$2,400 grade and to promote 40 per cent of the special clerks in the \$2,400 to special clerks in the \$2,500 grade. All clerks to be automatically promoted to the corresponding grade in the new classification.

2. A retirement measure providing for retirement with half pay after serving 25 years regardless of age.

3. Forty-five minutes to be considered the equivalent of one hour in computing time worked after 6 p. m. and until 6 a. m.

4. Time and one-half for all work performed in excess of eight hours, with double time for Sunday and holiday work. All overtime to be voluntary.

5. Thirty days vacation and 30 days sick leave, thereby placing the Post Office Department upon the same footing as other departments of the Government.

per day for a period of 30 to 40 days. Such scheme examinations must be repeated every six months until the appointee has completed his allotted distribution, which takes from three to four years, after which he must review at least once a year. Thus it can be seen that from four to five years' time is required to make a thoroughly efficient clerk. For this large amount of extra study and work the clerk receives not one additional penny or one minute of time off duty; all must be performed on his own time. Small wonder then that the officials are finding it increasingly hard to keep men even after they are appointed. The remedy for this is a reasonable time off duty for the purpose of scheme study or additional pay for such extra time required in study.

If appointed in the division of finance, he enters at once on a career of responsibility which would eclipse that of the average bank clerk and of which the public has not the slightest conception; yet, of all the countless millions handled by these faithful workers, the Government has not suffered the loss of one cent. This emphasizes the type of men employed.

From one-half to two-thirds of the post-office clerks' work is performed at night or in the very late evening hours, a time when those who have families most enjoy being with them, and a time when those young men whom the service needs most can best enjoy their recreation. This disagreeable feature in the absence of any future to which one may look forward, is turning away the best and most promising material. It is realized, of course, that a great portion of the night work is absolutely necessary if the postal machine would operate smoothly and efficiently; however, this disagreeable condition could be greatly alleviated by the application of a time differential which would place it on a more equitable basis with the daywork.

By far, the greatest complaint, both from older clerks and those whose services are sought, is the matter of salary which is at present paid the postal employee. The salary question is the most acute and unless remedied immediately and materially will not only fail to draw the men sought but will drive from the service a large number of the trained workers who are loath to give up a position to which they have dedicated the most fruitful years of their lives and who are holding on with a feeling of certainty in their hearts that some remedial legislation will be passed making it unnecessary for them to go back to the trade or calling which many of them left years ago and which are to-day far ahead of the Postal Service, both as a remuneration for service performed and with regard to general working conditions. There is no line of business outside the Postal Service requiring skill or training of any sort that does not pay from 68 cents to \$1 per hour, with time and a half for overtime, and in some cases double time for Sunday work. How can the Postal Service hope to cope with such a situation as this? Including his temporary war bonus, the clerk in the automatic grades receives from 35 to 52 cents per hour, according to grade, with straight time for overtime. Even the unskilled laborer outside the service fares better than the skilled postal worker. His pay, as a rule, is about the same and in some cases higher than the highest postal worker in the automatic grades, and he is invariably paid time and a half for overtime. We have already lost an alarming number of men, both experienced and inexperienced. What will you do for those who remain? Are you going to keep them, or will you let them go also? If you let them go where will you look for more trained men to fill their places? Will you disregard the exigencies of the case and allow the Postal Service to remain on the toboggan by permitting these men to go, hoping that by lowering the entrance requirements to thereby secure a cheaper grade of labor at the expense of the service? Will business and the public at large stand for this? We think not.

It has been truthfully said that the Government owes a duty to these men whom it has induced to enter the service and devote their lives thereto. They have sacrificed their opportunities of entering other lines of business with an hope of building for the future. They are highly trained, it is true; the Post Office Department sees to that. Their training, however, has fitted them for one position only and for but one employer. They, like their brother workers outside the service, have a commodity to market in the shape of their labor, but while their brother workers have a hundred or a thousand markets in which to offer their labor, the postal worker has only one. He must take what his employer offers, or else get out and throw away the work of his lifetime. Is this fair to him? Some of us are too young in the service to be materially affected by a change. We are just beginning our life work and can very readily turn in some other direction and seek more profitable calling.

others of us are a little older and, of course, the ties that bind are a little stronger. We are, however, young enough to cast our lot in some more lucrative calling with a measurable show of success; others of us are too old to consider a change, therefore we will remain; we will have to, as there is no other course.

The postal service of to-day is on the down grade, and is going fast. The employees are dissatisfied, discouraged, and bid fair to lose all interest in their work. They are not to be blamed for this. Those in the automatic grades have received not more than 25 per cent increase in the last six or eight years, and this includes a war bonus which they automatically lose at the end of the fiscal year. The cost of living has been going forward with giantic strides during that time until it has more than doubled. How, then, under the circumstances, can a man be expected to show any interest in his work? How can he be expected to show any ambition or enthusiasm when he finds it necessary to drag along from 10 to 12 hours a day in the post office or else seek extra work outside in order to provide necessities and comforts for his family? We stuck as a whole during the war, when our country was waging a struggle for freedom and equal rights for the oppressed people of Europe; we look now to our Government for a return to that standard of living which we have been accustomed to but which is being denied us because of the inadequate wage we receive. Give the postal worker a fair return on his labor, that he may improve his living conditions to compare favorably with the great body of American people and to which he is entitled as a servant of the greatest and richest country on the globe, and you will have gone far toward solving the problem of a better postal service.

The special-clerk grade in its present scope is wholly unfair to the majority of the clerks and has gone a long way toward destroying the morale of the more experienced men. It is right in principle, but should be so remedied that all clerks after passing from the highest automatic grade may qualify and compete for this promotion. This would offer inducement to the men to study and perfect themselves and would materially increase the efficiency of the service. At present it is enjoyed by a few, while a majority who are just as competent and in some cases possess greater qualifications must continue in the maximum automatic grade.

The postal worker seeks no favors and wants none. He seeks only a fair return for his labor, a fair living along the standard to which he has been accustomed, with an opportunity of laying aside a little for the education of his children and a little for that rainy day which must come to us all at some time during our lives. This we are entitled to and this we expect as servants of the greatest democracy on the globe, a democracy that stands for justice and equality for all, regardless of his station in life.

This, gentlemen, is our position. It is not necessary to dwell at length on the cost of living in this locality. It is on a par with most of the cities throughout the North and West, as can be seen from the data attached hereto. (Statistics show it has advanced about 97 per cent in the past four or five years.) We are furnishing only what we think necessary, having in mind the limited time and large amount of work of the commission; more will be furnished if desired. We attach also for your consideration letters from a few of those who have found it necessary to leave the service. In conclusion we would sum up the needs of the service, if it would be brought up to the peak of efficiency, as follows:

1. Better working conditions, to wit, discontinue working mail in cellars, coal bins, boiler rooms, and other badly lighted, insanitary, and poorly ventilated quarters.

2. Reduce night work to a minimum; and where night work is necessary, allow a time differential in order to place it on a more equitable basis with day work.

3. Allow time off for scheme preparation where possible. If this is not possible, extra pay should be allowed for time spent on scheme study.

4. Recruit the ranks of the service to the point where it will be unnecessary to work the men more than eight hours except in extreme emergencies. The eight-hour law in its present form is abused to such an extent that it has become a farce.

5. Arrange the special-clerk grade so that all clerks who have reached the highest automatic grade may qualify and compete for the promotions. In its present scope it is a morale destroyer.

6. Pay the postal workers an adequate wage, having in mind their duties and the responsibilities attached to their position as servants of the Government.

7. Give more attention to the higher grades. The average young man, in beginning his life work, looks more to the future than the present. It is poor economy to get men into the service, put them through an expensive training and then let them go.

8. Salary reclassification, \$1,800 to be the first grade, \$2,100 to be known as the second grade, \$2,400 to be the maximum grade, with \$2,500 and \$2,600 as special-clerk grades.

9. Time and a half for overtime, with double pay for Sunday and holiday work.

10. Thirty days' vacation and 30 days' sick leave.

11. Retirement for aged employees, with a liberal pension.

12. Seventy-five cents per hour for substitute work.

13. That clerks be dealt with collectively as a bargaining unit by the Post Office Department.

14. Seniority should prevail invariably, provided efficiency is maintained.

15. A civil-service court of appeals.

16. Adequate wage with improved working conditions will insure efficient service.

The CHAIRMAN. The next speaker is Mr. Pindell, Washington. It seems, Mr. Pindell, that you have been allotted four minutes, and as this is your own arrangement, you, therefore, can not complain about it. We will be very glad to hear you for that time.

STATEMENT OF MR. CHARLES D. PINDELL, WASHINGTON, D.

Mr. PINDELL. Mr. Chairman and gentlemen of the commission. I would like to convince the commission that the trained postal employee is an intelligent and highly efficient employee of the Government.

The number of stamps shipped by the Bureau of Engraving and Printing through the Washington City Post Office and handled by the clerical force of the Registry Division for the fiscal year ending June 30, 1919, was 14,502,000,000 plus.

These are highly trained and very efficient men and should be paid accordingly. Corporations are paying large salaries for the same qualifications. Therefore, the men are leaving the service and going to the corporations to receive higher salaries. The corporations are employing traffic experts who are paid \$5,000 to \$10,000 a year to route a piece of equipment of that corporation to any part of the world by the shortest possible route. The post office clerk picks up a piece of mail or a parcel-post package and sends that to any part of the world by the shortest possible route to get it there in the quickest time, and he, too, is a traffic expert and should be paid accordingly.

The mailing clerk has become a highly trained and efficient woman. He should be rewarded in every way possible and treated in accordance with the large amount of study and close attention that he has given in past years to develop into the expert that he is.

The automobile mechanic receives \$10 a day. He works possibly in his trade five or six years before he becomes an expert and can command that salary; yet the Government to-day is paying to superintendents and assistant superintendents of mails salaries of \$2,000 and less. They, too, are experts in their line.

I find that in Washington, D. C., my home town, the cost of living is abnormally high. The cost of my table alone, gentlemen, of plain

fare, for a family of six is more than \$90 a month. I can not budget my daily needs under \$5 a day; therefore I find that it is necessary for me to raise in some way at least \$2,400 or \$2,500 a year to meet my expenses, or go into debt.

Now, I have statements of other men of families, employed in the city post office, from substitutes up, and I find that they are all living on, or should live, on \$2,000 a year, and if they do not get that they are three or four hundred dollars behind every year in their expenses. The younger man coming into the Postal Service who is not married and has no family to support, can live on less than \$2,000 a year, but the man who has given considerable time to study and has devoted 12 or 15 years to the Postal Service, by this time has a family, and he is trying to educate his children and bring his family up according to the American standard of living, and he can not do it on less than \$2,500.

Mr. MOON. How many people do you know in the United States who are working 10 hours a day, giving very efficient service, who get \$2,500 a year?

Mr. PINDELL. Judge, I would like to speak of the standard of living of the American post-office clerk: He is a highly trained and efficient worker, and he has devoted considerable time to reach this pinnacle, and therefore his children are being brought up along different lines, and his family is being cared for differently from the man who only is making \$19 or \$20 a week. They expect more of the clerk.

Mr. MOON. I don't want you to misunderstand me. I don't disagree with the idea that you ought to have better pay and proper pay, but it just occurs to me that there ought not to be too much blame about the amount that you are receiving, because 90 per cent, perhaps, of the people of the United States are working for less than half that amount now.

Mr. PINDELL. The average family requires at least \$100 a year for vacation, or a rest period in order to be able to better perform its work after that for the following year. That is not absolutely essential, but it is necessary to the welfare of a home and should be allowed.

Mr. STEENERSON. But you don't have to pay income tax on more than \$2,000.

Mr. PINDELL. I wouldn't have to pay income tax with the family I have.

Mr. STEENERSON. You would have to pay on \$500 if you got \$2,500.

Mr. PINDELL. Yes, sir; not on more than that. Now, it is necessary for the postal clerk to know postal laws and regulations, all parcel-post regulations, the dispatch of all mail, the acceptability of all articles for mailing, the proper method of handling mail for each State in the Union, and how mail for that State is worked, and where. It is also necessary to have a knowledge of the classification of mail and the rates of each class of mail, and the ability to judge offhand the postage on mail and the withholding of short-paid matter. The clerk also must be an adept in the rapid handling and tying of mail—and some of them are experts in that line. He must have ability to operate cancelling machines and other mechanical devices.

Each distributor in the mailing section of the office is required to acquaint himself with certain States assigned to him; to learn it so that he is able to dispatch, without reference to any guide or book,

pieces of mail to any part of the State. This necessitates the memorizing of many thousand facts and training the mind to recall these facts at the rate of one each second, or sixty a minute, and that is positively true.

The CHAIRMAN. Your time has expired, Mr. Pindell. We would like to have you file your brief.

(Mr. Pindell submitted the following brief:)

STATEMENT FILED BY CHARLES D. PINDELL, WASHINGTON, D. C.

Table menu, September 27, 1919, of Charles D. Pindell, graded clerk, city post office, Washington, D. C. (family consists of man, wife, and four children, youngest aged 2 years): Breakfast—cereal, 15 cents; $\frac{1}{2}$ dozen eggs, 35 cents; $\frac{1}{4}$ pound butter, 17 cents; $\frac{1}{4}$ pound sugar, 3 cents; $\frac{1}{4}$ pound coffee, 12 cents; seasoning, 1 cent; total, 83 cents. Dinner— $\frac{1}{4}$ peck potatoes, 15 cents; stewed tomatoes, 18 cents; 6 ounces butter, 25 cents; 4 ounces sugar, 3 cents; tea, 5 cents; meat, 55 cents; total, \$1.21. Supper— $\frac{1}{2}$ pound cheese, 22 cents; jam, 20 cents; tea, 5 cents; sugar, 3 cents; crackers, 10 cents; milk, 16 cents; total, 76 cents. Breakfast, 83 cents; dinner, \$1.21; supper, 76 cents; bread (3 loaves at 9 cents), 27 cents; daily food, \$3.07; daily ice, 15 cents; cost of table, \$3.22; average meal, \$1.07; average per person per meal, 17 cents.

Daily expense itemized elsewhere (365 days \times \$5.38..... \$1,963.70
Clothing—estimate, year 1918 to 1919:

Children's shoes	36.00
Wife's shoes	20.00
Man's shoes	18.00
Children's clothes	60.00
Wife's clothes	107.00
Man's clothes	92.00
Life insurance, per year:	
Man	28.00
Wife	7.80
Children	22.36
Sick benefits	6.00
Incidentals:	
Church, per year	5.00
Barber, 12 \times 75 cents per month	9.00
Magazines, 12 \times 40 cents per month	4.80
Extra car fare family use, per year	25.00

Total necessary..... 2,404.66

Does not include recreation or vacation.

Daily expenses of family of C. D. Pindell, graded clerk, city post office, Washington, D. C.:

Food	\$3.07
Ice15
Car fare14
Rent14
Fuel20
Coal oil32
Phone10
Tobacco10
Papers05
Laundry25
Toilet articles10
Upkeep of house17
Total	5.38

This does not include clothing, insurance, church or recreation, or books magazines, etc. Family life insurance amounts to \$64 per year.

The CHAIRMAN. The next speaker is Mr. Tilghman, of Maryland

STATEMENT OF MR. A. W. TILGHMAN, BALTIMORE, MD.

Mr. TILGHMAN. Mr. Chairman and gentlemen, going into a detailed statement as to cost of living and conditions prevailing in the city of Baltimore is a man-sized job, and I don't think I will undertake to give any statistics on that subject, as you gentlemen are all pretty well versed in that, but I will say this, that when Congress in 1907 enacted our present salary law, they were guided by the conditions then existing, and they gave us the law for the \$600 entrance salary to \$1,200, and I can not understand why they hold back now in making our salaries commensurate with the present cost of living, because it costs twice as much to live. Everybody knows that.

The cost of living in Baltimore has increased 110 per cent and the wages in every other profession, trade or craft have increased accordingly, even to unskilled laborers, where they are paying the street car conductors and motormen over there about 59 cents an hour, and they contemplate giving them another raise, inasmuch as our public-service commission has granted the railroad companies an increase in fare to 6½ cents. I think the men will get the benefit of it.

One of the gentlemen was speaking about raising the funds. I hear one of the Senators remark that he would like to know how you are to get the funds. I think that if 3 cents postage was resumed, it would go a long way toward establishing a fund for granting these increases, and I think that Congress was pretty quick in taking that off at the expiration of the war. It seemed to be about the first thing that they did. I don't suppose they were well acquainted with our conditions.

Within the last 10 months in the Baltimore office we have had 479 resignations of clerks. These clerks are from all grades, and if you gentlemen will permit an individual instance I can recite one in the case of Clerk McComas, of the registry division, who has been in the service 28 years. He was given an examination of the State of Virginia, and after having studied it for about seven or eight weeks he was requested by the man in charge of the examination—he asked him if he wouldn't take Maryland instead. He had then nine days in which to prepare for it—although he had taken Maryland previous to this—and McComas told him, yes, he would try to. The nine days rolled around and he was not prepared and he asked for an extension of time. They gave him two weeks. At the expiration of two weeks he went to put up his examination. He missed it by two cards. He failed to make the required 95 per cent by missing two cards too many, and when July rolled around, this July, his \$100 increase was withheld from him. Now, this same man during the war was offered a position that paid him \$50 a month. He had three sons in the service——

Mr. STEENERSON (interposing). You say \$50 a month?

Mr. TILGHMAN. \$50 a week, I should say. He had three sons in the service and he told the postmaster—he asked him if he was going to take the position, and he said: "Well, I would like to take it, but I have got three boys over there and I think that I will be loyal to the post office, as you asked us to be in a speech that you made to us on the first issue of the Liberty bonds." He stayed, and that was

his reward. That is only one instance out of thousands where departmental orders have worked to the great disadvantage of the men.

Another thing I desire to call your attention to is the fact that our First Assistant Postmaster General Koons, in his testimony before the Senate committee when they had the hearing on time and a half for overtime, if I remember right, he testified that the circular matter was not worked at night in the larger offices, that the men were not required to work overtime in working circular mail. I don't know how it is in other offices, of course, but I know the conditions in the Baltimore office are that nine-tenths of our overtime is made on circular matter, that circulars are worked at night and that circular matter could be worked in the day time just as easy as rolling off a log if the authorities would only cooperate with the men. But there doesn't seem to be any intent upon the part of the supervisory officials to cooperate with the men, because we put it up to them a number of times. We have had our committee go before the superintendent and postmaster and suggest changes, but they were never acted upon.

In the way of night work, I think that if the collections—I know, in fact, if the collections in Baltimore City were arranged differently, night work could be eliminated to a very large degree. I know that we could work—say, 11 o'clock at night would be the latest, instead of 3 o'clock in the morning. We ask that in the reclassification the salaries be \$1,800, \$2,100, and \$2,400—three grades.

I thank you, gentlemen.

The CHAIRMAN. The next speaker is Mr. Weinstock, of Philadelphia.

STATEMENT OF MR. HARRY C. WEINSTOCK, PHILADELPHIA, PA.

Mr. WEINSTOCK. Honorable chairman and members of this commission, I am not going to bore you with a repetition of the facts that you have heard all over the country. What applies in Boston to the inflated cost of living, applies to Philadelphia or to Chicago or to San Francisco. The increase in wages for the present time is simply a makeshift in a direction like a dog chases his tail, and not getting anywhere.

The old adage rings true that you never pick up a sleeping baby, but the post office clerk has begun to yell, and our yells are heard all over this great land, and the Representatives in Congress and in the Senate are wondering why we are making this outcry. We are making this outcry for industrial democracy in the Postal Service. We are asking that you give the postal men who are in a blind vocation, a vocation that is not necessary in any other commercial industry—we are asking that you give us that American ideal, the square deal, and a square deal is to give to us the compensation so that we can stand on a level with our fellow citizens. The conductor or the motorman that brings me down to the post office is able to buy better clothes and better food than the post office clerk on his wages, performing a Government function; and as an American, loving the institutions of our land, I cry out against sabotage, that thing which will destroy an institution which is necessary for the prosperity of this land. And sabotage is being forced into the Postal Service by drastic regulations that humiliate men and drive them from the service. Consequently every month in Philadelphia we are compelled to have an examina-

tion, and the bars are being lowered and lowered; consequently the men who sought the Postal Service years ago turn in disdain away from it and seek other employment.

A porter in an iron foundry, who simply goes around and picks up scrap iron, gets more money than the sixth-grade post-office men. The garbage collectors in some cities get more than a sixth-grade post-office man.

And there is a solution to these problems. The same condition which made it possible for the Congress of the United States to create this commission should have a like commission that would supervise the Postal Service. It is the people's business, and the people's representatives should take care of it. If you had any man in your employ, and he came to you and demonstrated that he could save time and labor on a certain proposition, you would at least give him the benefit of an experiment. Not so in the postal department. I have in mind two appliances that would save hundreds of thousands of dollars for the Postal Service, a source of revenue whereby the deficiency could be eliminated. For instance, the facing-slip proposition. Every modern publication house has a system whereby they eliminate unnecessary hauling and carrying. The facing-slip proposition is printed, to my knowledge, in Whitehaven, Pa., at 4½ cents per 1,000, f. o. b. Whitehaven. By the time it reaches the post office it costs the Government 16 cents for that thousand. Why, by means of certain appliances that men have devoted time and study to those expenses could be saved, but they are simply ignored by some desk man in Washington who gets hold of the communication, and the Postmaster General gets the discredit of not even knowing anything about it.

The Postmaster General is a public servant, just the same as the postal clerk running a canceling machine. The organization of the post office is necessary for the commercial prosperity of America; and if we want to achieve the goal which all of our manufacturers are speaking to get ahead of the other nations for endeavoring to get the trade of the world you must take care of the medium between the producer and the consumer; and if you drive away from the Postal Service men who are willing to devote their lives to their profession, then you cripple the service; but in gratitude to those men you should give them an honest, square deal.

We don't ask for any inflated prices; we don't ask for anything that is not our just deserts. We are simply asking for the same thing that every American asks for—a right to live in the sunshine, a right to raise our children as men and women of the coming America—the same kind of principle that has made Washington stand out before us, gentlemen; and I ask you in all fairness—the argument is the same all over the United States—to give these men a square deal.

The CHAIRMAN. Your time has expired, Mr. Weinstock.

The next speaker is Mr. Gardner, of Hagerstown.

STATEMENT OF MR. W. L. GARDNER, OF HAGERSTOWN, MD.

Mr. GARDNER. Mr. Chairman and gentlemen of the commission, I have come here at your invitation to talk this matter over. I came

into the service 13 years ago. The salary at that time was \$600 to \$1,200. We did not hear any grumbling or crying about the salaries at that time. We all lived within it and were satisfied and gave good, efficient service; but as the years went by and the Great War came on prices began to tighten up, and in 1915 we became dissatisfied. We knew then that we were paying more for the commodities of life than we were able to pay under the present salary. It went on and we entered the war, and prices began to jump so rapidly that we could not keep pace at all, but we still stuck to our posts. We were loyal. We knew that we had millions of our boys over the seas; we knew that it would not do for us not to stand by our posts when we had the flower of the land over beyond the seas fighting our battles. So it was our duty to stand by our posts, and if we had not done so we would not be worthy to be called Americans.

Now, there is something wrong about this thing. I have heard them talk about the examinations. You can do away with the examinations entirely and you will not be able to get into the service the alert, wide-awake young men that it is necessary to induce to enter the service in order to keep up the efficiency in the future. The efficiency of the offices is rapidly going down, and it is going to continue on the downward march just so long as there is nothing done to relieve this situation. You must do something.

Mr. MOON. What brings about that inefficiency?

Mr. GARDNER. The clerks—the kind of material that is induced to enter the post-office service.

Mr. MOON. The clerks do just the same work that they always did, don't they—just as good work?

Mr. GARDNER. The clerks that are left. Whenever a clerk resigns, an efficient clerk, we get some other material in and that increases the duty and the work of the clerks who are left and who are efficient.

Mr. MOON. You mean that the new clerks that have come in are not as efficient as the old ones, and therefore it puts the burden on the old clerks?

Mr. GARDNER. Yes; certainly.

Mr. MOON. Then ought there to be some difference in the pay of the old clerks and the new ones that come in?

Mr. GARDNER. As the clerk goes up his salary should increase. After a time spent in the service he is worth more money. It takes at least five years to become an efficient post-office clerk. Whenever you get too many new men in the post office, I don't care what post office it is, you reduce the efficiency.

Mr. MOON. You approve the idea, then, of putting in new men at the lowest figure and letting them come up?

Mr. GARDNER. Absolutely. That is the right principle. When a new man comes in he retards the work of the office, he don't know what to do, and it is necessary for some one to show him what to do. I am from one of the smaller offices, and there are a great many more of these than of the large offices, and I believe we have had 25 new men to come in the office since the first of the year, of which 75 per cent resigned on account of working conditions and insufficient pay, and some of these men did not know a Southern State from a Northern State. I have seen them work at the mailing cases a few days

after coming in the office, and of course could know nothing worth while about what they were doing, and yet it seemed necessary at periods of the day to do this work, of working the letters in the case and trying it out, being unfamiliar with this science of dispatching the mail; naturally they would have mail going north instead of south, and southern mail north and vice versa, and of course the loss would be in cases as much as two days, just dependent on the dispatch.

The CHAIRMAN. The idea is that they have got to get the mail out?

Mr. GARDNER. Yes, sir.

The CHAIRMAN. And if they don't get it out right they get it out wrong?

Mr. GARDNER. They send it out wrong.

The CHAIRMAN. If it goes in the wrong direction they depend on somebody else to catch it up and correct it?

Mr. GARDNER. They don't know what they are doing; they are inefficient. We get mail at our office that should not come near us, and I am satisfied that there is mail that goes out of our office to the postal clerks in the other offices that is not intended for them at all.

Now, there isn't any use of my talking about what the salary should be. You gentlemen know what the cost of living is. There isn't any use for me to tell you how much it takes me to live up at Hagerstown. Living is about as dear up there as it is at other places, as you people know. I think it would be a reflection on your intelligence for me to stand here and tell you what it costs me to live, because I know that you are paying those costs, and you know it. We must have a salary that will attract to the service alert, wide-awake men.

Mr. MOON. What is your idea about initial salary?

Mr. GARDNER. I think, sir, that the initial salary would be fair at \$1,800. That is about what labor gets. That is the ordinary labor.

Mr. MOON. And then gradually increase it as the man gets experience.

Mr. GARDNER. As time goes on, let a man see a bright future ahead of him. Let him look forward into the distance and see something that he will be able to reach, not the same old grind, but as the years go by he ought to look to his condition being bettered.

Mr. MOON. How long ought he to stay in the service before he reaches \$2,500, in your judgment, if he works well and is a good man?

Mr. GARDNER. If we get the right kind of a man, in five years' time he ought to be an efficient clerk. If he is not an efficient clerk in five years' time, he will never be efficient. He doesn't have the energy to become an efficient clerk, and a man who doesn't have energy will never get anywhere. He will stand at the same old spot and see the boys run by him.

We have stood by our posts; we never faltered. Do you know why we are not getting more money to-day? Do you gentlemen know why we are not getting more salary to-day—the postal employees? Do you know why we are not? I will tell you why, to my mind, it is. There have been so many strikes, one after another; they have struck here and they have struck there, and they have struck everywhere, and the money came to them so easily. If they thought in

their dreams that they ought to have \$10 a day, they would get up the next morning and go to the bosses and say, "We will have to have \$10 a day," and in a few weeks' time a strike would come on and they would be granted the increase. You never heard any noise about us striking. We can't strike. You didn't hear any grumbling. We stood by our posts, and we intend to stand by them. We intend to stand by and give as efficient service as it is possible for post-office clerks to give, and the kind of material that comes in we are not responsible for; but the old clerks will stand and give the service that the Government is entitled to and the people demand; and the only reason that we are not getting any more salary at the present time—there has been too much of this strike business and all of your time has been taken up with that and the post-office employees have been overlooked.

I think that we have stood loyally to our posts, and we intend to stand at the same place, and we think that it is up to you gentlemen, in all fairness to us Americans, that you give us a good, substantial raise. We don't want any inflated salaries; we only want what is due us. If we should quit and cripple the service more than it is now, we would not be entitled to be called Americans. We love the dear old flag too well to cripple the service that we are in, the service that keeps the wheels of this country humming, and those wheels are so badly needed at the present time.

Now, gentlemen, in conclusion, I am going to ask you just to remember and think about the loyalty of the post-office clerks, and I am sure that we will get just as fair a deal as any other class of people in America. We are entitled to it; we should have it; and I am sure that we are going to get it. I thank you very much.

The CHAIRMAN. We are very much obliged to you. This is the last speaker for the clerks, except Mr. Emmerling, who wants four minutes. Now, gentlemen, we would be very glad to give you gentlemen more time than this, since you have come here and put yourself to this inconvenience, but the conditions are absolutely such that we can not do it. You gentlemen agreed upon this disposition of time, and you must not feel that you have been harshly treated if you are called when your time is up. The post-office bill on the increase in salaries is coming up right after 12 o'clock, and of course the Senate has to be there. You may proceed now. I just wanted to make that statement.

STATEMENT OF MR. EDWARD C. EMMERLING, PITTSBURGH, PA.

Mr. EMMERLING. Mr. Chairman and gentlemen of the committee, I represent the clerks of the city of Pittsburgh, the workshop of the world. It is not necessary for me to consume any of your valuable time to impress upon you the conditions outside of the service in Pittsburgh or dwell upon our wonderful prosperity, but the effect of these conditions and this prosperity upon the Postal Service is another question, and in my mind it is a very vital question. We are situated in the heart of the coal, iron, steel, and glass industries—industries that are paying unskilled, semiskilled day labor more money than the Post Office Department is paying to its efficient clerks, with the result that many of our most experienced clerks have

left the service and sought employment in these industrial and commercial fields.

During the year 1912 there were 60 resignations from all classes in the Pittsburgh post office. In 1916 there were 130, in 1917 there were 616, and in 1918 there were 1,040. For the first seven months of 1919 there were 997 resignations from all classes.

Mr. STEENERSON. What is the total personnel in the city post office?

Mr. EMMERLING. About 1,400 men. Fifty per cent of these resignations are in the clerical force, about 25 per cent in the motor vehicle, 25 per cent in the remaining classes.

Since the 1st of July, 1918, 125 men with five years or more experience have left the service.

Mr. ROUSE. How many of those 25 per cent of the motor vehicle men returned to the service?

Mr. EMMERLING. I could not answer that, but I don't think there were very many.

Now there were 125 men resigned from the service with five years or more experience in a period of 18 months, and at the present time we are depending on a constantly changing force of temporary substitute clerks, men who never took the examination; never intended to take it. Their average length of service is about six weeks. We have no substitute roster in our office for the past, I judge, about the past three years. This condition has placed an ever-increasing burden upon the shoulders of the faithful workers in the service. It is these loyal, these remaining employees, who petition you for an increase in salary. In the past Congress has always shown an inclination to increase the minimum grades, with a view of making the service more attractive, but it is just as essential, in my mind, to keep a man in the service as it is to get him in. We have asked your honorable body for a reclassification of salaries in the automatic grades of from \$1,500 to \$2,300, with an additional \$100 per year in the special clerk grades. This only seems like a large increase because of the fact that we have had no permanent increases since 1907, and it is just, when you consider that a postal employee must memorize from 4,000 to 6,000 facts and be thoroughly familiar with the time tables and schedules in his district.

Night duty consumes about 75 per cent of his working hours, and when the mail exceeds the capacity of the working force, he is called upon to perform overtime duty, and over 50 per cent of this overtime duty is performed after midnight.

We have asked for this reclassification because, as you are aware from the vast volume of statistics at your disposal, we are unable to care for our families as we would like to care for them, because, on account of this extremely high cost of living, many of us have been compelled to take our children out of school and put them to work. In many cases the wife and mother of the family has had to seek employment in order to maintain the home up to necessary standards of living.

But we also ask for this increase in order that the service may recuperate its strength, in order that new men may be induced to come into the service and remain in the service and take an active interest in the service; and that the present more experienced employees can remain in the service and not be forced to leave it against

their will. All of these men that are resigning from the service are resigning against their will. It is necessity that makes them resign.

So, on behalf of the clerks of this district, I want to extend to this commission our heartfelt thanks and appreciation for the noble thought that prompted you to ask for an expression on their living and working conditions. The postal employees of the country are pinning their faith to your decision of this, our bread-and-butter question, with the confidence that you will recommend for us reclassifications which we ask and which we need.

Mr. ROUSE. I would like to ask you a question or two. How many resignations do you say have been received by the postmaster at Pittsburgh during the fiscal year?

Mr. EMMERLING. The present fiscal year?

Mr. ROUSE. Yes; the last fiscal year.

Mr. EMMERLING. For the last fiscal year, 1,040.

Mr. ROUSE. That is the year ending June 30, 1919?

Mr. EMMERLING. No; I think these statistics as we have them are from January 1 until January 1, because the last statistics that I have are for the first seven months of the year, and that was 997.

Mr. ROUSE. The first seven months, ending July 31 of this year?

Mr. EMMERLING. Yes, sir.

Mr. ROUSE. Now, let me read here. Your postmaster states in an answer to the question:

How many resignations have occurred in a year in your force during the fiscal year ending June 30, 1919? State in what salary grades resignations have occurred and indicate the information applying to clerks and carriers separately.

He states:

Two hundred and sixty-five clerks and carriers resigned, as follows: Grade \$1,000, 137 clerks and 54 carriers; grade \$1,100, 4 clerks and 3 carriers; grade \$1,200, no clerks and 26 carriers; grade \$1,300, 4 clerks and 4 carriers; grade \$1,400, 23 clerks; grade \$1,500, 6 clerks; grade \$1,600, 3 clerks; grade \$1,700, 1 clerk; total, 178 clerks and 87 carriers.

Mr. EMMERLING. Yes, sir.

Mr. ROUSE. That was during the fiscal year ending June 30, 1919. Now how many did you say resigned in the seven months of this year?

Mr. EMMERLING. For the first seven months there were 997, but this includes all classes of the service.

Mr. ROUSE. It includes substitutes?

Mr. EMMERLING. It includes substitutes, temporary substitutes, etc.

Mr. ROUSE. And chauffeurs?

Mr. EMMERLING. Yes, sir.

Mr. ROUSE. And you say about 25 per cent of that was in the motor-vehicle service?

Mr. EMMERLING. Twenty-five per cent—in my brief that I have submitted this is covered in detail, all of the classes, the number of resignations itemized in each class.

(Mr. Emmerling submitted the following paper:)

STATEMENT FILED BY E. C. EMMERLING, PITTSBURGH, PA.

The wonderful prosperity of the United States coupled with the heavy demand from foreign markets for American farm and manufacturing products has caused a scarcity of those products for the home trade.

The increased cost of labor and production has served to further increase the price of these commodities, and during the past four years organized labor has

demanded and received substantial bonuses and increases in wages ; and, in many instances, duly appointed officers of the United States Government have intervened when a question of adjusting labor disputes or salaries has arisen, and invariably have conceded to the request of the laboring classes ; but as yet there has been no permanent action taken regarding the postal employee in the readjusting of his salary to meet the high cost of living.

The Pittsburgh post office has had no eligible male service list for the past three years, there being at present 124 vacancies. During this period there has been over 2,700 resignations and removals among regular and temporary employees. These vacancies are filled by a constantly changing temporary force. Since January 1, 1918, a period of 20 months, 125 clerks with five years or more experience have resigned from the Pittsburgh post office. Those positions are practically vacant to-day.

At least three years of study and experience is required to qualify a clerk for distribution. The force of distributors in Pittsburgh is actually less than necessary for efficient service.

The great difference existing between postal salaries and those obtainable in industrial and commercial lines is due to lack of reclassification in the past years and of fallure to keep pace with the large expansion of the mail service, and there is no doubt that the Postal Service will be more handicapped by resignations in the near future if prompt action is not taken.

Following are some figures showing the number of changes that have taken place in the Pittsburgh post office the last few years :

Separations in 1912, 1916, 1917, and 1918, were as follows :

	1912	1916	1917	1918
Clerks, laborers, etc.....	28	48	142	171
Carriers and collectors.....	32	37	66	64
Temporary substitute clerks.....			170	308
Temporary substitute carriers.....			54	170
Temporary substitute laborers.....		5	17	67
Motor vehicle service, established Nov. 1, 1919.....		40	167	280
Total.....	60	130	616	1,040

Separations in the first seven months of 1919 were as follows :

January.	February.	March.	April.	May.	June.	July.	Total, all classes.
398	100	101	78	110	85	125	997

The number of resignations for the first seven months of 1919 (after the armistice was signed) nearly equals the entire number of resignations during the entire year of 1918, while the war was going on.

This extremely large number of changes in the Postal Service is due entirely to the high scale of wages offered by the outside corporations and industries, as shown on the following table :

Craft.	Hourly.	Per 8-hour day.	Per year, 300 working days
Bricklayers.....	\$1.12½	\$9.00	\$2,700.00
Carpenters.....	.90	7.20	2,160.00
Cement finishers.....	.80	6.40	1,920.00
Hoisting engineers.....	.90	7.20	2,160.00
Painters.....	.87½	7.00	2,100.00
Leathers.....	.93½	7.50	2,250.00
Slate and tile roofers.....	.90	7.20	2,160.00
Composition roofers.....	.75	6.00	1,800.00
Sheet-metal worker.....	.90	7.20	2,160.00
Steam fitters.....	.97½	7.80	2,340.00
Mail carriers.....	0.70-.85	6.40	1,920.00
Building laborers, unskilled.....	.50	4.00	1,200.00
Building laborers, semiskilled.....	.70	5.60	1,680.00

Some of the average daily wages in Pittsburgh steel mills.

Sheet rollers -----	\$28.16	Blooming-mill heaters -----	\$17.92
Sheet heaters -----	21.12	Skelp-mill heaters -----	18.18
Roughers -----	11.92	Skelp-mill rollers -----	21.72
Catchers -----	11.92	Lap welders -----	16.08
Steel pourers -----	12.84	Blowers -----	13.76
Vessel men -----	14.65	Bottom makers -----	12.91
Engineers, manipulators, etc. --	12.63	Regulators -----	13.52

A few men in the larger steel plants earn wages running as high as \$65 to \$70 a day. These are the highest type of skilled men.

The civil service examination boards have utterly failed in their attempt to maintain a substitute roster. The Pittsburgh post office, at present, is depending entirely upon temporary substitute clerks to perform all of the primary work in the office.

This class of men consist mostly of students working an average of six hours a day, after school hours, elderly men, and cast-offs from other fields of endeavor. It is impossible to build up a permanent and efficient working force from this material and only by a higher reclassification of salaries can the service be placed on the high plane of efficiency where it belongs.

The post-office clerks of the country have asked for a reclassification in the automatic grades of \$1,500 to \$2,300 per annum, and \$200 per year additional in the special clerk grades.

There has been no reclassification since 1907, and since that time many new features have been added to the service, namely: Parcel post; C. O. D.; insurance on parcels; extension of R. F. D.; postal savings; motor-vehicle service and central accounting offices. These additions have added to the duties of the post-office clerks, and these tasks, coupled with the ordinary dispatch and distribution of mail, require men of good caliber, and only by granting a substantial increase in salaries can the Post Office Department hope to obtain men of the desired caliber and keep within the Postal Service the experienced men who are gradually becoming fewer.

It is particularly the men in the maximum grades whose services are so valuable and whose salaries have been at a standstill the past 10 years. These men have great financial responsibility upon their shoulders in addition to the thousands of facts that are necessary to learn in the Postal Service.

In conclusion, we wish to state that we have presented only a few facts in a general way, of the conditions as they actually exist, with the full confidence that you will remedy our living and working conditions by recommending the reclassification which we ask and which we believe is fair and just, to which end we pledge to you a continuation of our whole-hearted support and loyal cooperation for the "efficiency of the Postal Service."

Briefs were submitted by E. M. Henke, Pittsburg, Pa.; John T. Hand, et al, Williamsport, Pa.; W. S. Keesling, Bristol, Va.; John E. Allen, Braddock, Pa.; Fred H. Reichard, Allentown, Pa.; and H. C. Haas, Allentown, Pa., as follows:

BRIEF SUBMITTED BY E. M. HENKE FOR THE CLERKS OF THE PITTSBURGH, PA. POST OFFICE.

We do not feel that we can add much to the information you have already gathered except to assure you that the low wages paid postal employees have crippled the service in Pittsburgh just as much as in any city in the country.

The Pittsburgh post office, particularly the city division, operating at present with as small a personnel as has prevailed during the past three years due to resignations of veteran employees and to the fact that few, if any, of the young men of this district, owing to the high-wage standards that prevail here, regard employment in the post office as a worth-while proposition. This is natural when even common labor is paid \$4.50 a day.

At the hearings before the Senate committee investigating the steel strike it developed that the United States Steel Corporation operating in this district had increased wages 110 per cent over the prewar status, and that common labor received over \$4.50 per day, yet these men are dissatisfied.

Wages have increased in order to meet the high cost of living, and outside employment has almost solved the difficulty by receiving increases in proportion; yet, when the postal employees' case is considered with their mere 25 per cent increase and general salary of \$125 a month, the reason is apparent for the feeling of disgust with postal employment which now pervades the service.

There is not a trade represented at the Central Trades Union in Pittsburgh whose wage scale is not higher than the post-office clerks. And the union scales are set to stay set; at present as far as going backward or reducing is concerned, yet, 10 years ago the postal clerks' general salary was \$25 a week, when all union scales were around \$18 and \$20 a week, and we think a vigorous effort should be made to place our salaries in the same comparative positions as existed at that time, because of the many disadvantages of our work, the scheme study, night work, Sunday work, etc., entitles us to some such consideration.

At the present time the Pittsburgh post office is embarrassed for help, and the situation would be far more serious were it not for the clerks who work Sundays, about 50 in all, taking pay instead of compensatory time during the following week. This condition of working seven days a week was brought about by frequent appeals from the postmaster and the immediate and positive necessity of the clerks increasing their income to buy the common necessities of life.

There is no reserve force in the local post office, very few new regular clerks are learning the distribution, and as the post office is assured of a certain loss of help each year, through resignations, deaths, etc., the prospect of any future improvement in the service is far from promising.

In fixing a permanent salary for clerks at this time the question of the possibility of a future reduction in the cost of living is all important. Whether the high prices or whether the various efforts to reduce them will meet with any success is a question few would care to decide. But one thing is certain; they will never reach the low prewar levels and it is doubtful if they ever get as low as 50 per cent above those levels, and with this in mind this organization, in special meeting assembled, takes the liberty of suggesting that a minimum of \$2,000 per year be paid to a clerk of five or more years of service.

BRIEF PREPARED BY JOHN T. HAND, SAMUEL D. BAILEY, AND G. LEE LUNGER ON BEHALF OF THE CLERKS OF THE WILLIAMSPORT, PA., POST OFFICE.

We beg to submit herewith a statement of facts for your consideration in connection with the reclassification and readjustment of salaries for post-office clerks, and to cite a few of the reasons why we feel that something should be done for them at this time.

In the first place we would respectfully call your attention to the requirements necessary to become a post-office clerk. They are compelled to pass a severe mental and physical examination and must make a high per cent in order to have their names placed on the eligible list; then the appointment is made from the three highest men. Men in the prime of life only are accepted, and they must be men of high moral character.

The responsibilities and duties of post-office clerks are as follows: They are compelled to memorize some 7,000 offices, the railroad routes on which these offices are located, and the quickest and best service to reach them; and they must keep up with the changes in these offices and railroad schedules. They must put up an examination every few months and must make 95 per cent in order to retain their rating or receive a promotion.

They must familiarize themselves with the Postal Laws and Regulations; must have a technical knowledge of the registry, money-order, postal-savings, and war-savings systems, and the rating of ordinary, insured and C. O. D. parcel post. They have great financial responsibility, handling thousands of dollars daily, and if there is a shortage, they must make up the deficiency.

A large percentage of the work in post offices is done at night and it is a well-known fact, based on reports of physicians, that night work is detrimental to the health.

In our own office, we have had no addition to the clerical force in the last several years and the volume of business transacted has increased enormously, so that the clerks are under a constant strain from the time they begin their tour until they end, in order to get the work out.

There has been an increase of 140 per cent in the cost of living in the past six years. The salaries of post-office clerks have been advanced but 25 per cent, and that of a temporary nature, since 1907.

It costs a family of four \$2,265 to exist for a year. Our salary at present is \$1,500; the question arises, How did the great number of post-office clerks with families, and many of them with more than two children, manage to exist during the past year? There is but one answer; they were compelled to seek some employment outside of office hours to augment their salaries. A man can not be as efficient as he should be when compelled to labor four or five hours outside in order to make ends meet, and we believe it is the desire of every true postal employee to render the public as efficient service as possible.

The claim has been made that post-office clerks are not skilled workers and therefore are not entitled to wages for skilled workers. If an expert distributor, having to keep in mind some 8,000 to 10,000 facts, one who can stand up to a distributing case and throw 50 to 60 pieces of mail per minute, or a man who has learned the money-order, registry, or any of the other various phases of the work of a clerk, and who has worked at same for 10, 15, 20, or 25 years, if such can not be called a skilled worker, then there is no such thing. A superintendent in the Chicago post office said, regarding the efficiency of the average post-office clerk, that while he makes only one error in every 34,025 pieces of mail handled, the general public makes one in every 177.

While it is true that the public has enjoyed an efficient Postal Service in the past, due to the large number of efficient employees in the service, yet it must be admitted that under present conditions the service is not what it should be. The reasons are evident. The employees are underpaid, underfed, and dissatisfied. Their health is being undermined by reason of the fact that they are compelled to work hours outside their regular work to try and maintain their families decently and not go in debt. They have denied themselves and their families many of the necessities of life, such as proper nourishing food, necessary clothing to enable them to appear respectable and in keeping with their position as a Government employee, the necessary medical and dental attention to insure good health, books and magazines, especially of an educational nature, and many other things. Their wives have been compelled to work beyond their strength, preventing them from establishing attractive homes, which are necessary to rear moral and intelligent families. They have been unable to make any replacements in the home during the last five years, and now face the situation of being compelled to borrow money for same unless the Government will grant just compensation. Your honorable commission will agree that an employee working under such conditions can not render as efficient service as he could if he received a salary commensurate with his ability and that would provide a respectable living for himself and family.

Another cause of the present inefficiency in the Postal Service is the large number of better men leaving the service for more remunerative positions and the placing of men in the various positions in the post office without an examination. It is a well-known fact that in some cities they have taken men off the streets and placed them in the post office, where they stay but a short time, and their place is filled by another. Were it not for the fact that some of the older men remain in the service, buoyed up by the hope that something will be done for them, that a progressive and just Government such as ours will eventually recognize the fairness of our appeal, the Postal Service would break down completely. The only way to build up the service is to make the salary commensurate to retain the good men that are in the service, to attract the best men of the community, and make the requirements such that only efficient men will be chosen.

At the recent national convention of Post Office Clerks, held in Atlantic City, N. J., September 1 to 4, a resolution was adopted asking for a reclassification of salaries for post-office clerks, as follows: An entrance salary of \$1,500, with automatic promotion of \$200 per annum up to and including \$2,300; with two additional grades of \$2,400 and \$2,500 for special clerks.

We believe that the position of substitute clerk should be abolished and the minimum salary for post-office clerks be paid when inducted into service.

We also believe that all positions in the classified service should be filled by competitive examination and promotion from the ranks, giving every employee an incentive to be efficient and progressive.

We believe that as much night work in the post office as possible should be eliminated and that 45 minutes of night work should be counted as 1 hour.

We earnestly hope that, in justice to the men who have given the best years of their lives to the Postal Service, some form of retirement with fair pay will be enacted. Our Government is far behind other Governments in this respect, and nearly all the large corporations have made provision for their aged employees. This feature would make for a more contented and efficient employee, as he would not need to fear poverty in his old age.

The above facts are presented for your earnest consideration, and we trust that your honorable commission will recommend legislation looking toward the betterment of our condition.

We get to invite your attention to Exhibits "A" and "B" herewith attached.

STATEMENT FILED BY MR. W. S. KEESLING, OF BRISTOL, VA., FOR THE CLERKS
IN THAT OFFICE.

In compliance with your request that our representative, Mr. W. S. Keesling, leave with the above commission such data and information as we may have that will help them to determine what each class of employees should be paid, this statement is presented by the clerks employed at the Bristol, Va., post office, showing cause and reason why these clerks should receive more pay.

First. Our work is so technical and must be so accurately done that we must be up to the minute on every change, and there are many every day. At this office we must know the correct dispatch of all mail leaving the city going into one-third of four different States and be examined on same. On all mail coming into our city we must know to which one of the five city carriers, three rural carriers, boxes, or general delivery it should be given, and, although the address on it may not be right, this must be known and the mail sent to the proper address. In dispatching mail we have to watch four things that are important: First, that the stamp is canceled; second, that if too heavy the postage must be rated up; third, that we know how that particular office is to be dispatched; and, fourth, to know where that box is located in the case.

Second. We are required to work 8 hours daily for six days in every week, except for two weeks' vacation, while many railway mail clerks who work the same mail that we do, except they do it in a mail car, work only about 10 to 12 hours for six days; then they are off for six days. In other words, the post office clerks work 48 hours each week at 60 cents an hour on the very same mail that the railway mail clerks in cars are working 30 hours to 40 hours a week for \$1.05 an hour. On many class C runs the railway postal clerks receive \$1,900 a year, plus \$150 for expense money for a year, having worked 1,500 hours (50 weeks of 30 hours each), while the clerks in the post office receive only \$1,500 for working 2,400 hours (50 weeks of 48 hours), which is 900 hours more for \$400 less money. Is that right? No. Our work requires us to be constantly in study on our distribution here in the city, as well the study on the four surrounding States, and the clerks on the road do not study more than we do in the office. If this is investigated the clerks in the office will be given more pay.

Third. Our work is very important and the standard of salary should be kept high in order that the Post Office Department may be able to keep the efficient men in the office service, as a new man in this branch can not give good service, and the service will suffer until this new man has served at least three or four years.

Fourth. The salary should be high to attract the best men to this service and cause them to stay.

We do not make this comparison of salary with our brother worker in the mail car to have his salary made smaller, but to show you that we clerks are due more pay for our work.

If a post-office clerk wishes to transfer from this service at \$1,500 he must enter the railway mail service at \$1,100, a loss of \$400.

Fifth. In order for you gentlemen to arrive at some definite sum to pay the post-office clerk you must know what amount it requires for us to live on only moderately, for that is all we ask; then give us something for our work, and it ought to be enough that we may save 15 per cent, which in our case would be only \$225.

Sixth. It is impossible in our city to get capable men to take civil-service examinations for the Postal Service on account of the salaries now paid.

We wish to impress upon the commission the reasons why we need more pay, and also why so few applicants come to the post office for employment. Firms and corporations offer the average man more pay to start with than the Post Office Department, and there is usually a chance for the man to be promoted in title as well as salary, and very often he gets a chance to buy stock in the company, or he may be able to organize a company in competition; while if he goes into the post office as clerk he will in 5 years know about all there is to know about the work, then he must keep up on every change, and at the end of the 5 years he is still a clerk and is getting the highest pay that he will ever get if he stays in the service 50 years, and he can not buy any stock in the firm nor can he organize a company of his own.

When there is a place vacant in the post office, and the only one worth while, such as that of postmaster, it isn't given to the faithful and efficient clerk who has worked for years in that office; in fact, grown up with it, but it is given a man who has no idea whatever of the work that is done in an office, and it is usually 4 years before he catches on to the work, and, of course, he gets his information from the men who do the work in the office.

This is an injustice to the men who know the work. Big business doesn't do things that way. The superintendents and managers of our railroads are men who have worked up through the several departments and who know every detail in railroading. Why not have the post office run the same way.

The post office doesn't attract the young man just out of school enough to cause him to take the examination, as the salary is not large enough when he enters it when he has learned the trade of post-office clerk, and he does not take the examination, but instead he enters a business college and prepares for a position that has both salary and a future to it. These schools secure the place for him when he finishes his course.

Recently we had a young man who entered one of these schools, later taking the clerk-carrier examination, was appointed a substitute carrier, and got about \$30 a month for his work for six months. He was bright, but made a very poor carrier, as he had no interest in the mail service. Later he was offered clerical work in a coal-mining section at \$125 a month to begin with, and he took it. You will note that he got the same pay that we now get as clerks, after years of work.

What incentive is there for men to enter the Post Office Service, what attraction does it offer? Once upon a time a Government position was the thing, and that was when we had hard times and money was scarce, but now the jobs on the outside seem to be the better.

We men who have devoted 10 or 20 years to the service and like the work but do not feel like they want to leave it now to enter new work, if the men "higher up" will make our salaries measure up to the work done like those in the business world. It seems very strange that the Post Office Department doesn't appreciate a man's work any more than it does; in fact, it would seem like they should want to keep the men once they know the work rather than teaching a new one, who may be just a drifter here and there.

Why not make our pay what it should be. High prices will prevail for years to come, as there will be many reasons why things will sell still higher. One is that the country people are moving to town to become consumers instead of producers, and our pay should be kept high. If we get \$2,400 now we could live almost as well as we did in 1912 and 1913 on \$1,200 per year.

Allow us to suggest the entrance grade be made \$1,500 per year, grade 2 be \$1,700, grade 3 be \$1,900, grade 4, be \$2,100, grade 5 be \$2,300, and grade 6 be \$2,500.

In five years a man will know the work, and he will receive \$2,500 then for his labor and knowledge, then he will render good service, be interested in his work, and it will not take so many men to do the same amount of work.

You want satisfied men and it takes two things at least to satisfy them and they are sufficient pay to live in comfort, and good working conditions, then he will do the work.

This country has never had a strike in the mail service, and it doesn't know how it would feel without this service, neither does it appreciate properly the mail service as it should. If a city should have no mail service for a week there would be more confusion and trouble than we can imagine, but this can not happen.

The men have no thought of striking and they would not if they could, but they believe they should be paid as much as other well-trained men.

We hope this is not too long, but it had to be to explain it as should be.

—

PETITION FILED BY MR. W. S. KEESLING ON BEHALF OF EMPLOYEES OF THE
BRISTOL, VA., POST OFFICE.

Whereas for the first time in the history of our country postal employees are granted the privilege of appearing before a commission appointed by Congress to investigate salaries, therefore we, the clerks, carriers, and rural carriers of Bristol, Va., do hereby beg to submit the following facts for your consideration.

First. At the present time our salaries are entirely insufficient for the support of our families, only supplying the actual necessities of life. In order to live on our present salary we are compelled to practice the strictest economy, providing only the plainest food and cheapest clothing. Pleasures of all kinds have to be eliminated.

Second. At our past and present salaries, we have been unable to provide homes of our own and are compelled to rent at prices that are exorbitant.

Third. We are unable to lay aside any surplus for the rainy day, and when age makes us unfit to give good service, or bad health compels us to drop out of the ranks, we are left on the mercies of the world.

Fourth. We are unable to carry sufficient insurance for the protection of our families, and are often compelled to borrow on our insurance policies, should we be fortunate enough to have any life insurance. Often we are compelled to borrow from friends and banks, hoping that the future has better things in store for us. We withstood the additional burdens imposed by the war with a cheerful heart, thinking that after the war was ended prices would become nearly normal. But do we find this the case? Not much. On the other hand prices are going higher and still higher and the end is not yet. Take, for instance, sugar. As if it was not already high enough, we are told that we may expect to have to pay more—that is, if we have any money to buy with.

Fifth. Our salaries are far behind those of persons in civil life who have the same qualifications. The railroad employees are far ahead of the postal employees, as their salaries range much higher. Those having practically no education, and who could not take the simplest civil service examination, who could not read the address on a letter or sign their own name, are paid salaries equal to and in many cases in excess of ours.

Sixth. During the last four or five years, some of us, yea, many of us, have been compelled on account of sickness and death to make doctors' bills and funeral bills that we are unable to pay. Yet, the Post Office Department tells us that we must not contract debts that we are unable to pay. So what can we do?

Seventh. We are not allowed to engage in any other business in the spare time we have when off duty. We are told we must not engage in anything that is in competition with other lines of business, so what can one do that will not bring him in competition with some one in that line of business in which he may engage?

Eighth. We are unable to get the best results from our 15-day vacation allowed by law, fearing to use it for pleasure, had we the money to take a trip as we are harassed by the fear that we might get sick and would need time to tide us through this period, so that we would not be compelled to lose our pay on account of being off. We are badly in need of sick leave, such as clerks in other departments of the Government enjoy.

Ninth. Our carriers and rural carriers are compelled to wear regulation uniforms, regardless of cost. The price of these uniforms have advanced over 100 per cent.

Tenth. Our rural carriers are compelled, on account of the increase in postal rates, to provide better teams and vehicles and these things have increased 50 per cent. The increased cost of feed has been more than 100 per cent. Many of these men are compelled to keep two horses, one not being sufficient for the strenuous work.

Eleventh. The service is unquestionably deteriorating on account of the insufficient pay, as men who possess the education and qualifications necessary to make good postal employees are not attracted to the service. Employment

other walks of life offer better inducements as an employee frequently begins on a salary the equal, or often in excess, of the highest salary paid postal employees. Many of our best postal employees—men who have given years to the service—are leaving to accept positions in civil life, taking with them the knowledge that if they are diligent and do their duty well, they will be rewarded by promotions from time to time and the increased pay that goes with it.

Twelfth. We beg to call your attention to the attached list of commodities and necessities, with their cost in 1913-14 and the cost this year, showing the per cent of increase. Please notice that this shows an average increase of 125 per cent. Our salaries have only been increased 25 per cent. Endeavoring to try to live at this rate is like trying to put a 1½-inch plug in a ¼-inch hole.

Thirteenth. We were unable to buy Liberty bonds that we would like to have bought and that we were urged by the Post Office Department to buy, on account of not having the money to spare. Many of us did try to buy and are still in debt for them.

Fourteenth. We are unable to give to church and charitable purposes as we would like, and as others do, thereby being embarrassed and humiliated.

Fifteenth. Employees in civil life receive time and one-half and double time for overtime and Sunday work, while postal employees receive less pay for overtime and Sunday, per day, than for regular time. That is, an employee receives one-twelfth of his annual salary each month of 25 or 26 days, but in calculating overtime and Sunday work his monthly salary is divided by 30 or 31 days, as the case may be, instead of 25 or 26, the number of working days in the month.

We, the undersigned, respectfully submit the above petition to the commission, through our representative, Mr. W. S. Keesling, and to which we trust you will give your most careful consideration.

Clerks: H. E. Weller, W. S. Keesling, J. L. Hughlett, R. M. Peters, A. B. Elam, A. B. Cooper, and Miss Georgia N. White; carriers: L. M. Sproles, J. E. Thompson, E. A. Combs, George O. Harr, Davis S. Gray, Joe White, S. F. Morton, and O. N. B. Sharrett.

BRIEF SUBMITTED BY JOHN H. ALLEN ON BEHALF OF THE EMPLOYEES OF THE BRADDOCK, PA., POST OFFICE.

We, the employees of the Braddock, Pa., post office, beg to submit the following short brief in support of our claim for increased compensation:

Section 696, Postal Laws and Regulations, requires a standard of neatness in regard to uniforms worn by letter carriers, and rules that the postmaster shall from time to time inspect uniforms. Carriers are required to replace worn-out uniforms with new and to be clean and neat in appearance.

Section 705, Postal Laws and Regulations, demands that clerks and carriers must pay all debts contracted by them.

Section 309, Postal Laws and Regulations, demands that clerks pass a mental test or examination and make an average of 95 per cent in order to be promoted to the next higher grade, or if they have reached the sixth or highest grade, to be retained in the service.

Applicants for positions in the Postal Service must present at least five recommendations from persons not related to them as to their honesty, character, and ability, and male applicants must submit to a physical examination by a licensed physician before being accepted as a regular substitute clerk or carrier.

The United States Postal Service, the largest business enterprise in the world, demands more of its employees, both mentally and physically, than any private business or corporation. It demands a high grade of intelligence and also that a high rate of efficiency be maintained. To maintain highly efficient service, the clerk or carrier must be sound physically and contented in mind. An inefficient clerk or carrier will not be retained in the service.

In many post offices large numbers of experienced men have resigned from the service to accept positions paying better wages. On those remaining in the service falls the burden of "breaking in" new employees. To hold the efficiency of the post office to the required standard, carriers have covered not only their own routes but routes being covered by substitute and auxiliary carriers in order that they might learn that route. Clerks have performed their own particular work and have had to do the work of inexperienced substitutes.

To maintain efficiency records supervisory officers have covered carrier's routes, have made night collections, and have worked on the "floor" of the office. In the general delivery, stamp, money order, and register divisions, have dispatched mails, and distributed incoming mails to the carriers, thereby greatly reducing the efficiency, since their own work had to be neglected in order to help inexperienced substitutes or in case of sickness, to facilitate the delivery and dispatch of mails.

Sixteen out of a force of 31 employees have left the service to accept better paying positions:

Fifty per cent of our present force have worked in other lines of business to increase their earnings, so that they might properly support themselves and their families, and those dependent on them.

Apprentices, starting to learn a trade in the steel mills, are paid \$2.75 per day for the first year. Their wages are increased each year, and at the end of four years they are paid journeyman's wages.

A substitute clerk or carrier works from one to four years as a regular substitute at the rate of 40 cents per hour for actual time worked, and in the event of a vacancy in the "regular" force is placed on probation for six months. After being appointed "regular" clerk or carrier it takes five years to reach the sixth or highest grade, which pays \$100 per month. They have then reached the limit of their earning capacity in the Postal Service, unless a vacancy should occur in the supervisory force of the office in which they are employed.

Salaried clerks in the mills and factories of Braddock and vicinity, while not paid for overtime, are paid for time lost on account of sickness. Postal employees are forbidden to work overtime, except in cases of emergency, but are not paid for time lost on account of sickness.

Skilled laborers in the steel industry are paid from \$11.92 to \$28.16 per day. In the larger mills "boss millers" are paid from \$65 to \$70 per day. The last mentioned are the highest type of skilled labor, and few are either high school or college graduates.

Common laborers, whose work is not hazardous and whose jobs require less intelligence than is required of postal employees, are paid from \$5 to \$7 per day, as compared with a clerk or carrier of the sixth grade, who can earn but \$3.23, with the additional war bonus of \$200 per year.

Employees of the steel industry are paid a "bonus" for each pay in which they have worked full time, and are permitted and encouraged to participate in the sale of steel stock offered from time to time by the corporations by which they are employed.

In view of the high rates paid skilled and unskilled laborers in the mills and factories in Braddock and vicinity we contend that those who have faithfully and efficiently served the Post Office Department of the United States are justly entitled to a considerable increase in salary, in order that they may live at least as well, if not better, than a common day laborer.

**BRIEF FILED BY FRED H. REICHARD FOR THE POSTAL EMPLOYEES OF
ALLENTOWN, PA.**

It is the experience of the postal employees of Allentown, Pa., that their present salaries are inadequate in proportion as the purchasing power of the American dollar has depreciated since 1907, when the last salary classification was enacted.

According to official statistics the cost of necessities and ordinary comforts has increased 82 per cent since 1914; the total increase since 1907 being more than 100 per cent.

The bonus of \$200 granted July 1, 1918, with the additional \$100 granted July 1, 1919, has failed to meet the ever-mounting cost of coal, table necessities, rent, taxes, shoes, and clothing.

The cost of letter carrier uniforms during this period has increased more than 100 per cent, with an additional increase to be added November 1, 1919.

During the war period the postal employees remained patriotic and loyal, patiently looking to Congress for relief, while others by threats, strikes, and other methods have increased their wages from 60 per cent to 100 per cent.

The average increase of the railroad employee's wages has been \$580 per annum, with back pay. The postal employees in no case received back pay, on the contrary, their meager increase has in each case been dated ahead.

Many lines of labor are charged with decreased efficiency, thus retarding production and adding to the cost of the consumer; not so with the postal employees. A 40 per cent increase in the volume of mail in three years finds small increase in the number of employees.

The only just solution of the salary problem demands an increase in proportion to the depreciation of the purchasing power of the American dollar, in order to maintain the American standard of living.

STATEMENT FILED BY H. G. HAAS, ALLENTOWN, PA.

I wish to call your attention to some of the existing conditions in the Postal Service, using myself as an example without any exaggerations.

I am the sole support of my wife and six children; I am a substitute clerk at present, and have been one for going on three years, during which time there has been no appointment to regular clerkship except in case of a regular resigning, although the amount of business has greatly increased, and for at least two years four substitute clerks have been working not less than 8 and as much as 13 hours a day.

My average salary is \$84 per month; my rent at \$16 per month.

I have the family insured and belong to three lodges as a precaution against sickness.

My store bill amounts on an average to \$15 per week, this includes only necessities and even of these we are often compelled to do without.

Then, there is the bread, milk, fuel, and other necessities; also clothing and shoes which my entire family is sadly in need of, but the present high prices forbid me to buy.

Pleasures we dare not think of under existing conditions, and I might here state that my spare time is taken up by cultivating vacant lots raising my own potatoes and vegetables for the winter.

I am also secretary of an organization for which I receive a few extra dollars.

My creditors can not understand why I, working for Uncle Sam, can not pay my bills promptly.

When I took the examination for and was appointed to this position, I really thought it was something better than the ordinary job, but I have since found that my family was better provided for when I was a grocery clerk than at present. These conditions, I am sure, do not only refer to myself but must exist throughout the service.

Do you not think it is time that something was done to relieve the situation?

I hope that you will act favorably for us men lower down, and that you realize the necessity of it.

The CHAIRMAN. We will now hear the railway postal clerks. They have agreed to take 30 minutes. Mr. Link will be heard first for 8 minutes.

RAILWAY MAIL CLERKS.

STATEMENT OF MR. H. N. LINK, WASHINGTON, D. C.

Mr. LINK. Mr. Chairman and gentlemen of the commission, I have been selected by the railway postal clerks of the third division to present their case before the commission, and with your kind indulgence I would like to read my brief [reading]:

Before entering upon the subject assigned for presentation, permit us on behalf of the railway postal clerks of the third division to express appreciation for the commission and for the consideration that has already been given our service. We feel it is a progressive move second to none and will result in much good to the employees and bring about a closer feeling of confidence and regard for Congress.

The subject of this paper is that of salaries of clerks performing service in railway post-office cars.

An applicant for the Railway Mail Service is required to pass a civil-service examination, before which, however, he must stand a rigid physical examina-

tion. This gives the Post Office Department a high class of eligibles from which selections are made for the Railway Mail Service.

Following the certification as a substitute, a well-defined plan of study begins and continues throughout the life of a railway postal clerk. The first five years of study is the most exacting, for the reason the subjects are new and difficult. At least five years is necessary to properly train a clerk, his efficiency and value to the department increasing with each year's service. The scope of study includes the routing of post offices by the most direct route, the distribution of city mail to stations and carriers, postal laws and regulations, etc. After receiving permanent appointment he is assigned to one of the three classes of lines, known as A, B, and C. The classification of a line is determined by its relative importance as to volume of mail handled and distribution performed. Class A line is one on which there is only one clerk in the car; a class B line is one having a clerk in charge, with a helper over a portion of the run, while a class C line is one in which the quantity of mail handled, the number of States distributed, and the general responsibility of the line seems to justify or qualify one for a class C rating. There are, however, no definite determining factors and this has been a source of great dissatisfaction among railway postal clerks because of the fact the class of line determines the amount of salary a clerk receives. The salaries of the different classes of runs follows: Class A, \$1,100 to \$1,500; class B, \$1,100 to \$1,600; class C, \$1,100 to \$1,800. In classes B and C the clerk in charge receives \$200 more than the maximum amounts stated, except in the one-man class B line, where the clerk is rated as a distributor and does not receive the pay of clerk in charge. The above amounts are \$300 in excess of the basic salary, and unless legislation is enacted covering the salaries in the Railway Mail Service before July 1, 1920, each clerk will be automatically reduced \$300 on that date.

Attention is invited to the fact that at least five years is required to reach the maximum grade of a class A run, six years on a class B run, and eight years on a class C line. This advancement is not in a ratio to the clerk's advancement in proficiency for the reason a clerk should, and can by strict application, become qualified to a degree to justify the payment of the maximum salary of a distributor in five years.

Much dissatisfaction exists among railway postal clerks because of the three classes of runs, and it is their opinion that while the total responsibility varies, there is little difference in the individual responsibility. In fact, there are instances where clerks assigned to class A and B runs have a wider range of distribution than clerks assigned to class C runs. On the whole the responsibility varies very little, and as the training for the three classes of runs is practically identical, the best interests of all would be served by abolishing the present grades and establishing a single classification for all lines, and the earnest consideration of the commission is invited to this.

No evidence is necessary to show that the salaries of railway postal clerks have not kept pace with the high cost of living, and if the high standard of efficiency of the past is to be maintained there can be no further delay in a substantial salary increase. The volume of mail is gradually increasing while the personnel of the Railway Mail Service is gradually decreasing. Experienced men are quitting at a steady rate for more lucrative positions, and it is a mere matter of simple calculation to reach the conclusion that unless something is done to stem this loss there will soon be a complete breakdown of the Railway Mail Service.

Railway postal clerks believe the following schedule of pay per annum would be equitable:

Substitutes	\$1,700
Clerks:	
Grade 1	1,900
Grade 2	2,000
Grade 3	2,100
Grade 4	2,300
Grade 5	2,500
Clerks in charge	2,800

In support of this scale the commission's attention is invited to the following facts:

First. The high class of men necessary for the Railway Mail Service.

Second. The exhausting physical labor and mental strain required for the performance of the work.

Third. The high nervous tension needed, which frequently undermines the health.

Fourth. The intricate and thorough character of study required makes the force highly skilled with no other market save the Post Office Department.

Fifth, and finally. The men engaged in this work are entitled to a wage sufficient to care for their families and to provide for their maintenance in case of his death.

These principles are well recognized by the leading corporations of this country, and the same consideration for railway postal clerks by Congress is well merited, and would result in the restoration of the service to that high state of efficiency desired by the business world to-day.

Mr. ROUSE. What is your position in the Railway Mail Service?

Mr. LINK. I am a railway postal clerk.

Mr. ROUSE. In charge?

Mr. LINK. No; I am a clerk.

Mr. ROUSE. A clerk on a car?

Mr. LINK. Yes.

Mr. ROUSE. Have you any recommendations to offer to the commission regarding the postage on second-class matter? Do you think it is paying enough?

Mr. LINK. I do not. As an experienced railway postal clerk I have never been able to understand why the big publishing houses should not be made to pay for the large volume of mail they turn loose on the Railway Mail Service. They are getting large profits from advertising and other sources.

Mr. ROUSE. Would you care to express an opinion about what that postage should be?

Mr. LINK. I have never gone into this question except to this extent: I believe they should be made to pay comparatively the same as an individual, allowing proper consideration for the proportionate postal revenue they produce and the character of second-class matter they distribute.

I would like to file a brief prepared by Harry G. Hughes for the acting clerks in charge for the Washington and Charlotte R. P. O.

(The paper referred to follows:)

BRIEF FILED BY H. N. LINK.

Argument relative to the injustice of the provision in paragraph 1, section 1549, Postal Laws and Regulations, requiring clerks in charge of crews to serve three years in that capacity before becoming eligible for promotion to the highest grade in that class, has been covered in another paper presented to this committee.

The attention of the committee is invited to the application of this provision to clerks acting as clerks in charge. When a clerk in charge is absent from his run for any reason, or when a clerk-in-charge assignment is vacant because of death, resignation, removal, reduction, additional service put on, or any other reason, some clerk is assigned by the chief clerk as "acting clerk in charge."

The clerk so assigned has to assume all the duties and responsibilities of the regular clerk in charge. He is, of course, unfamiliar with many of the details of the assignment and works under that handicap. Yet he is subject to the same disciplinary actions for all errors and the same penalties charged against his record. Yet his record is not kept on a comparison with the other clerks in charge on the line, but is made a comparative one with the other clerks on the same assignment as his regular one, who do not have the responsibilities of the assignment of clerk in charge. Consequently his record may not compare favorably with clerks who have not been assigned to the responsible position of acting clerk in charge.

It would at least seem that the time served by a clerk acting as clerk in charge should be credited to the time he would be required to serve to receive

the maximum salary should he eventually be promoted to the regular assignment of clerk in charge. Yet the department rules that such is not the case; and that should a clerk serving in that way be promoted, he should have to serve the full three years from the date of his promotion.

Under this ruling a clerk may be assigned, by a chief clerk, as acting clerk in charge and serve for six months. At the end of that time he will be promoted to the assignment. It will be three years from the date of his promotion before he can receive the full salary and yet he shall have served three years and six months.

Sometimes clerks are assigned as acting clerks in charge for an indefinite period, often many months, and at the end of that time promote some other clerk to the place. The clerk who has been acting gets nothing for assuming the added responsibilities under the handicap of unfamiliarity, and the clerk who receives the promotion has to serve three years from the time of his promotion before he can draw the same pay as the older clerks in charge on the line who have been doing exactly the same work for the three-year period.

As an illustration of this practice, the following case is cited: A clerk in Washington, D. C., and Charlotte, N. C., railway post office was assigned as acting clerk in charge to trains 29 and 32, May 19, 1917. He served until December 15, 1917. During this time the other clerks in charge on the line were receiving \$200 a year more than he was for performing exactly the same service. At the end of these seven months another clerk was promoted to the place and would have to serve three years from that time before he could receive the same pay for the same work as the other clerks in charge on the line.

Among the railroad men with whom we work and with whose work ours is comparable, had a flagman served as conductor, or a fireman as an engineer, for one trip, for one month, or for any length of time, he should have received the same pay for the trip, or the time, as the regular man.

The only law that can be administered equitably is one that requires the same pay for the same work. We believe that to be fair and right. We earnestly request the honorable commission to recommend the enactment of the necessary law to bring that about in the Postal Service.

The CHAIRMAN. The next speaker is Mr. Baldwin. You have been allotted six minutes, Mr. Baldwin.

STATEMENT OF MR. J. N. BALDWIN, RICHMOND, VA.

Mr. BALDWIN (reading):

Mr. Chairman and gentlemen of the commission, in considering the subject of Railway Mail Service, a failure to analyze and investigate that portion known as the transfer service would leave out a very vital and necessary part of efficient Railway Mail Service.

While the duties of transfer clerks are in the main supervisory, yet an intimate and personal knowledge of all phases of Railway Mail Service is necessary to an efficient Postal Service.

The transfer clerks are in most instances on a strictly eight hour basis, having regular hours of duty and are assigned to important railway mail centers, which are usually the larger cities.

It is therefore necessary that transfer clerks make their homes in the cities where the burdens of living costs are more keenly felt than in the smaller towns of rural districts.

Concerning the duties and responsibilities of transfer clerks I would submit the following:

The administration of the space basis method of payment to railway companies for handling the mails, to a large extent, in the hands of the transfer clerks. By exercise of judgment in the dispatch of mails they can and do save large amounts to the department for transportation of the mails; for example, on light days authorized storage space can be and often is annulled on the authority of transfer clerks.

At Washington, D. C., the transfer clerks during the month of September, 1919, authorized over the New York and Washington railway post office emergency storage space to the amount of \$6,000.

While the separation and dispatch of mails at junctions is theoretically a function of the railroad companies, yet experience has shown that the lack

of sufficient transfer force has and does result in serious delay to the mail, due to the lack of knowledge on the part of railway employees.

The handling and safeguarding of registered mail is another function of the transfer service which involves a high degree of responsibility. For example, at Richmond, Va., the location of the Federal reserve bank makes this feature very important on account of the large amounts of currency and bonds handled. Often hundreds of thousands of dollars are intrusted to a single transfer clerk.

It is necessary for transfer clerks to have a good working knowledge of several States.

Example: The transfer clerks at Washington have to dispatch mail for eight States, supervise the loading and unloading of 40 storage cars daily, accounting for 2,000 locked pouches of first-class mail, noting and investigating all irregularities connected therewith.

In many instances transfer clerks assist in the distribution of mails in various lines centering at their offices. Example: The transfer clerks at Richmond, Va., assist in the distribution in Richmond and Danville, Va., trains 7, 9, 11, Richmond and Clifton Forge train 9, Washington and Hamlet train 13, Fort Monroe and Richmond, Va., trains 42 and 44, and Washington and Charleston train 33.

Transfer clerks are required to stand examinations on the space authorizations, train schedules, and connections of mail trains, and on the Postal Laws and Regulations.

Transfer clerks are required by the Postal Laws and Regulations to authorize the authority invested in chief clerks when necessary for the good of the service.

A man to be a successful transfer clerk must therefore be informed, tactful, and possessed of a high degree of executive ability, as he often stands between the department and the railway company and upon his decisions and reports justice or injustice may depend.

An example of the turnover and lost efficiency in the transfer service forces due to inadequate salaries, I would cite that in the year from July 1, 1918, to June 30, 1919, 22.22 per cent of the forces at Washington, D. C., were acting or not permanent men. Thus one of the most prolific sources of wasted energy, labor turnover, in the industrial world finds an example in the transfer service of the Railway Mail Service.

Believing that I have impressed you with the duties and responsibilities of the transfer service, I would add a few personal experiences in that service.

I have been in the Railway Mail Service 18 years—10 years on road duty and 8 years on transfer service. I came into the service at the suggestion of my chief clerk, who is a believer in the importance of that service.

I am drawing a salary at the rate of \$1,500 per annum and live in Richmond, Va., where the statistics of the Department of Labor show an increase of 110 per cent in living costs since 1913. Then my salary was \$1,300, but was reduced in 1915 by reorganization to \$1,200.

I have a wife and five children, and although we have eliminated all unnecessary expenses, my wife and myself doing the laundry work, yet I find I can not make both ends meet and have been unable to meet the necessary living expenses. To live as a good American citizen should live and bring up his family to be good citizens with a fair education, I find by actual figures that I can not do it for less than \$2,500 per annum.

There should be in all fairness but a single classification for railway postal clerks, for often the present classification works to the disadvantage of the clerks. In the administration of the present classification law many injustices result, as the salaries of railway postal clerks under that law are solely dependent upon the classification and the classes are in the discretion of the Post Office Department. We believe the salaries should be positively determined by Congress, so that the clerks would receive a reward for faithful service.

Mr. MOON. Do you handle a great deal of second-class mail matter?

Mr. BALDWIN. A great deal of it passes through my hands, sir.

Mr. MOON. What do you think about the idea of raising the cost of carrying that mail?

Mr. BALDWIN. My idea has been always that it has been underpaid for the service rendered the publishers; that the service is rendered too cheaply.

Mr. MOON. You think that it ought to be increased?

Mr. BALDWIN. I do, absolutely; yes, sir. As to the amount, I haven't given it consideration.

The CHAIRMAN. Now we will hear Mr. Jeffries.

STATEMENT OF MR. E. S. JEFFRIES, NORFOLK, VA.

Mr. JEFFRIES. Mr. Chairman and gentlemen of the commission, at a meeting of the railway postal clerks, in Norfolk, Va., on September 2, 1919, I was selected to represent the 150 of that territory before your honorable body.

I have been working in the mail cars for 25 years, entering at the then lowest salary of \$800 per annum, and am now receiving the highest salary, \$2,000 per annum, including the war bonus.

On my line, the Columbus and Norfolk, east division (Norfolk & Western Ry.), the highest grade line running into Norfolk, Va., we have 40 men. The average salary of the grades is \$1,800 per annum, or \$5 per day. But out of the 40 men, only 15 are drawing the salary for the grade in which they work. The other 25 draw less salary than the assignment entitled them to, owing to the workings of the present classification law and delayed promotions.

Now, in that average I have included the salaries for clerks in charge.

Since 1914 my salary has shown an increase of 23 per cent, including the war bonus, which expires July 1 next. Engineer's salary shows increase of 32 per cent; conductor's salary shows increase of 35 per cent; firemen's salary shows increase of 62 per cent; baggage-master's salary shows increase of 54 per cent.

Government statistics for Norfolk show increased cost of living there to be 87.05 per cent.

The distribution requirements of the clerks in our division are as follows:

Offices:

Alabama	1,312
Florida	1,109
Georgia	1,310
Kentucky	2,789
Louisiana	1,261
Maryland	837
New Jersey	817
New York State	971
North Carolina	1,769
Ohio	1,854
Pennsylvania	2,317
South Carolina	734
Tennessee	1,154
Virginia	2,520
West Virginia	2,126
Separations (stations, carriers, boxes, banks, buildings, business firms):	
New York City (stations)	1,742
Philadelphia (stations)	1,127
Atlanta (carriers)	1,600
Richmond, Va. (carriers)	1,400
Norfolk, Va. (carriers)	1,200
Wilmington, N. C. (carriers)	1,000
Total	30,928

Now, of course, one man does not learn all of that. I am examined on three States—5,589 cards—on which we are required to make 98 per cent at a speed of not less than 25 per minute. The constant changes require constant study. We put up one examination every six months at least, and are the only class of Government employees who are constantly required to stand examinations on our efficiency for the work assigned.

Nearly all labor and all train employees receive overtime except the railway postal clerks. These do not. Yet on the first day of this month one crew on my line arrived at Norfolk 15 hours late. Each man was out \$1.50 additional for meals, yet received not a penny extra.

I draw the highest salary, after 25 years of service, \$166.66 per month, including the war bonus.

The negro porter on my train draws \$175 per month and, in addition, received a check in excess of \$1,000 for back pay.

Other lines in Norfolk territory will average \$200 per annum less in R. P. O. salaries due to lower classifications of line. But all trainmen on the different lines will average about the same, as all are working under the same agreement.

The CHAIRMAN. The next speaker is Mr. Worley, who has been allotted four minutes.

STATEMENT OF MR. H. D. WORLEY, PHILADELPHIA, PA.

Mr. WORLEY. Mr. Chairman and gentlemen of the commission, mine is a personal brief, after which I will make a few oral statements concerning the Philadelphia terminal, which I represent. [Reading:]

I am the head of a family of six. The four children ranging in age from 2 years 9 months to 8 years are altogether dependent. My wife having the care of these children and also the duties in the home is fully dependent upon my support. It will be seen that our only income is that which I receive as a clerk in the Railway Mail Service.

At the present time I receive \$1,500 per year. Prior to July, 1919, I received \$1,400, prior to July, 1918, \$1,200, and so on down to the entrance salary of \$900, each year being \$100 less.

Information gathered from reliable sources and my own experiences prove that the dollar of 1919 is worth in purchasing power only about half of the dollar in 1914. In other words, I received \$75 per month in 1914 as a grade 1 clerk, whereas in 1919 as a grade 5 clerk I receive \$125, or its equivalent \$62.50. In advancing through the grades and gaining more experience as a clerk, and consequently of more value to the Government, my comparative earnings have been decreased.

Is it possible to pay excessive rents, feed, clothe, and care for a family of six on \$125 per month? During the month of July it cost my family \$152.25 to exist, not live, during the month of August, \$142.40. My earnings for the two months totaled \$250 and my expenditures, \$294.60. This is an excess in expenditures of \$44.65 and must be provided for in some way.

Section 1599 of the Postal Laws and Regulations states that the entire time of the clerk is subject to the control of the Post Office Department and that no time shall be utilized by the clerks for the purpose of engaging in business for profit either as principal or as agent. It being forbidden and unlawful to use spare time for the purpose of earning a little to augment the meager salary, I was compelled to draw on a small inheritance in order that I might comply with section 1604, which states that all clerks are required to pay their just and honest debts. Should a good, respectable law-abiding, American citizen be subjected to such conditions in the employ of a Government, which requires high standards for private concerns?

As you descend from grade 5 to 1 the conditions, for men in like position, become altogether deplorable. As you ascend they are somewhat relieved. The majority of the clerks are married, so my case is one of the majority and not an exception.

In the Philadelphia terminal the working force of the terminal consists of 156 men and women. Out of that number 71 are regular clerks, of which we have 3 in grade 6, earning \$1,600; 26 in grade 5, earning \$1,500; 3 in grade 4, earning \$1,400—and by the way, one of those is a man who has been crippled in a wreck in the service, and he only earns \$1,400 on account of the inefficiency produced through that wreck, and he can't be advanced on account of that. We have 1,300 earning \$1,200, and the balance of the force is made up of certified substitutes, of which we have 26, and 59 temporary employees or laborers, as they call them. Of that number, 14 are women, many employed as temporary laborers. The balance are men.

Now, the average earning of the 71 regular clerks in the Philadelphia terminal is \$1,354, or \$26 a week. Now, you can take it from this, that my own earnings are somewhat above the average, and the majority of the men of the terminal are grades 1 and 2 men—at least, grade 2 men—which makes them \$100 a month, and in Philadelphia we are not exempt from the high rents any more than any other city. In fact, I think we are above the average as to rent, and as a result of that some other clerks who have been buying homes are compelled either to sacrifice their homes or take other people in to live with them in order to meet the expenditures which arise from the carrying of that home; and as a result they find that their money is altogether insufficient. The clerk's knowledge is the same as that of any other clerk in the Railway Mail Service in Philadelphia. We distribute all mail by States, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, and West Virginia, and an accurate knowledge of the post offices of each one of these States is required; and that means that his study must be done outside of the eight hours of duty. We work eight hours in the Government service and then all our studying of scheme corrections, etc., must be done in our own time.

One hundred and seven of the 156 men work between the hours of 4 in the afternoon and 8 in the morning, which means that their time at home is very brief, if you want to consider the time they need for their sleep and the corrections of schemes and study. Working nights adds a hardship to them, and they should be given consideration for it. I have the names of Philadelphia concerns which do offer consideration to their men. One is the Philadelphia National Bank, which gives a consideration in money to their men working these hours, a thing which our Government could well afford to follow, I think.

Mr. ROUSE. I would like to ask Mr. Worley a question. You stated a while ago that you were employed in the terminal at Philadelphia.

Mr. WORLEY. Yes.

Mr. ROUSE. And that you handled great quantities of second-class mail matter?

Mr. WORLEY. Yes, we handle quite a lot of that.

Mr. ROUSE. What is your opinion about the postage on that class of mail?

Mr. WORLEY. Judging from the lugging we have to do in handling it, the amount of work and the space it takes up, I think the publishers can well afford to pay more postage.

Mr. ROUSE. How much more would you say?

Mr. WORLEY. I haven't any definite information to give along that line. I haven't considered any definite amount.

Mr. ROUSE. But you think it ought to be required to pay more postage?

Mr. WORLEY. I think so.

Mr. STEENERSON. What do you say about the comparative work as between second-class matter and parcel post?

Mr. WORLEY. Parcel post matter, in my judgment—I am speaking only of my own opinion on that matter—is very near as important as the magazine matter.

Mr. STEENERSON. Which is the most expensive to handle?

Mr. WORLEY. I think they use more space and time in handling parcel post matter. In the Philadelphia terminal I know it is. I am speaking only for the Philadelphia terminal. The majority of the mail matter is from the Curtis Publishing Co., and that is made up to the different lines, and we have no direct handling of that mail. Our mail principally is parcel post and papers.

Mr. STEENERSON. The expense of the parcel post per ton, for instance, so far as you are familiar with the work of handling it in the terminal would be more than for a ton of second-class matter?

Mr. WORLEY. As far as the Philadelphia terminal is concerned, yes, sir.

The CHAIRMAN. We will now hear Mr. Abernethy.

STATEMENT OF MR. C. H. ABERNETHY, GREENSBORO, N. C.

Mr. ABERNETHY. Mr. Chairman and gentlemen, I was appointed a substitute railway postal clerk in March, 1914. The duties of a substitute consisted of making runs (or working for) the regular clerks that were off duty on account of sickness, personal reasons, or other causes, for which I was paid at the rate of \$900 per annum for the actual time I worked. I served in this capacity for three years and four months.

Then the Post Office bill for the fiscal year ending July 1, 1918, carried a provision appointing all substitutes to clerks of grade 1 that had actually served 313 working days. I was then classed as an unassigned clerk, with no difference whatever from a substitute in regard to work and pay. I served as an unassigned clerk for a period of one year and two months (or from July 1, 1917, to September 1, 1918), and was then given a regular assignment as grade 1 clerk on the Washington, D. C., and Charlotte, N. C., R. P. O., beginning with September 1, 1918.

Under the reclassification act of October, 1912, I was due to be advanced to a clerk of grade 2, as I had given one year of satisfactory service from July 1, 1917, to July 1, 1918, as a grade 1 clerk, unassigned.

As the Post Office bill of 1918-19 carried an increase of \$200 for all clerks but suspended the automatic or earned promotion, I was kept in grade 1 two years. Thus from March, 1914, to the present time I have been in the service five and one-half years, and am now in grade 2, receiving only \$100 more per year than a new substitute that entered the service yesterday.

I have been examined on three states of distribution, with a total examination record of 11,669 offices, with an average percentage correct of 99.37; also six examinations on Postal Laws and Regulations.

Since qualifying on all my examinations, and considering the five and one-half years I have already served to reach my present grade, I will have to serve six years longer, making almost a total of 12 years, to reach the maximum grade in the present classification.

I would like to ask the earnest consideration of the commission to reduce the number of grades so a clerk may reach the maximum of grade beginning with his fifth year of service.

While my salary has been increased \$300 since entering the service in March, 1914, the actual necessities of life in my locality have more than doubled, and as the terminal of my run is Charlotte, N. C., and according to Government statistics of the Bureau of Labor, has the highest food cost of any city in the South.

Up to July 1 last my average salary per year has been \$830, or \$2.30 per day. I have a wife and three children, making five in family, and am forced to live in the cheap tenant section of town. I have not been able to keep up but \$500 of life insurance, and have had to drop all fraternal orders that I was a member of on entering the service. I have been unable to buy an overcoat of any kind for the past six years, and have bought on an average of one suit of clothes every year and a half. With my wife and I practicing the strictest economy and self-denial in every way, and with fortunate good health, we have managed to live; but as our children are now of school age and our one desire is to give them an education and raise them to be good American citizens, and this question is naturally asked, does the Government under which we live and for whom I work, requires all my time, strength, and energy, desire that its future citizens be educated?

Your honorable commission may readily understand when \$830 (my average salary for the past five years) has to clothe, feed, and shelter five people, there is no hope whatever to do this.

My case is not an exceptional one, as I know a great number of men in the same grade as myself.

My honest belief is that a Government employee should receive a salary commensurate with the duties performed, so that he can live in accordance with the American standard.

The CHAIRMAN. The next gentleman is Mr. Conn, who is only scheduled to file a brief, and he only asks one minute.

STATEMENT OF MR. D. N. CONN, OAKVIEW, PA.

Mr. CONN. I simply wish to submit the following brief:

I beg leave to submit the following as my personal experiences as an employee of the Railway Mail Service.

I took what was then called a first-grade examination, in the summer of 1912, and failed to pass, although being a normal school graduate I came back in 1913 after some further study and passed one hundred and twenty-fifth out of about 3,000 who took the examination in the State of Pennsylvania at that time, showing the quality of men who were coming into the service at that time. The entrance salary at that time was \$900 per annum.

I was called for duty during the Christmas holidays, and was then laid off to await certification, same being made about the 20th of January, 1914. I then was called for duty in the Philadelphia terminal and have been there ever since with the exception of time spent in military duty on the Mexican border and in the late war with Germany, in which I spent 13 months overseas.

As before stated the entrance salary was \$900 per annum, and as a certified substitute I worked at that salary until July 1, 1919, when by an act of Congress I was automatically made a regular clerk and entitled to automatic promotions if having completed my study requirements as prescribed. By another act of Congress, which stated that all men entering a military branch of service should be entitled to all increases and promotions falling due during our absence should be credited to us, I was given an increase of \$100 or was advanced to grade two in the service, together with the \$200 bonus granted by another act of Congress, makes my salary since July 1, 1919, \$1,200. This is just \$100 in excess of a man who enters the service to-day, under a second-grade examination. It is just \$100 in excess of an uncertified laborer employed by the mail service to pull a truck load of mail or drag a sack of mail from a designated spot to another spot which must usually be designated by some high-grade clerk.

At the present time, from a Philadelphia standpoint, I am qualified to work any local or State case of Pennsylvania mail, whether first, second, or third class matter, and have been as assistant on New Jersey, Delaware, and Maryland. I have worked Western States parcel post, Southern States parcel post, and also New England. I have either worked or assisted on practically every distribution in the Philadelphia terminal. There are several hundred clerks who took the first-grade examination in 1913, all of whom not being appointed regular clerks in that year, are in the same position as myself. Through a system of manipulation by the department we have given almost six years' service to our Government at the first-year entrance salary, while we have been required to put up the same examinations—we have been required to do the same work as clerks who to-day are getting \$1,500. We beg for a readjustment.

At \$900 in 1914, having a wife and one child and a mother to support, I was able, by some assistance from a sister, to support and care for my family as required by the department and my self-respect, while to-day, with twice as much assistance as formerly received, I am positively unable to make ends meet. I have sacrificed my last Liberty bond to buy enough coal to last part of this winter. After that is gone I do not know where the balance will come from. I have worked overtime to get money to buy shoes for my children to go to Sunday school. I am not allowed to have outside employment, yet I am required to pay my debts; when the clothes on my back are worn out where will I get others when it requires all my salary to buy food, furnish light and gas to cook our food, and ice to keep it in the summer, and pay my car fare to my work. A great many of these clerks have quit the service this year. I do not want to be forced to do the same.

STATEMENT SUBMITTED BY ELMER A. TUCKER, WINSTON-SALEM, N. C.

Clerks enter the Railway Mail Service through a civil-service examination after having passed a rigid physical examination. Beginning with the clerk receiving the highest rating on examination, he is appointed as certified substitute, and he is only paid for such time as he may make in running for clerks absent from their runs from various causes, including annual leaves, at the rate of \$1,100 per year.

The amount of time employed varies from one-half to close to full time by some few. He deadheads from his home to the various lines to which he is called upon to perform service on his own time. He has to obtain his meals at irregular hours and in various places, as he may remain on a run one day only, or in case of vacation periods from 17 to 18 days.

After he has made 313 days of service he is appointed an unassigned clerk, grade 1, which carries no salary. He continues his service in the same manner as when he was classed as a substitute. At the end of one year of service as an unassigned clerk, for which he received pay at the rate of \$1,100 per year for the work he actually performs, he is promoted to grade 2 at \$1,200 per year, after which he receives no salary except that which he receives for performing service for some other clerk either as a substitute or as an acting clerk. His pay as a substitute is received from the clerk for whom he runs, but that as an acting clerk is received from the department.

His relation to the service continues in this manner until he receives an appointment to some particular railway post office or terminal as a regular clerk.

A newly appointed substitute is required to pass at a grade of at least 95 per cent such examinations as may be assigned to him by the chief clerk of the district to which he is assigned. This work must be done without pay. The time consumed in this work may run from two to four weeks of study work. Of course if the substitute is unable to subsist without earning his living during this preparatory period it will often cover some months before he can fit himself for his first run. When his chief clerk regards him as having received such instruction by scheme and in Postal Laws and Regulations as will fit him for some particular run and his services are needed to fill the run of some clerk absent from this run he is assigned to the run for instructions from one or two to four or more days. He receives no pay for this service. After he is deemed competent to take his run the clerk asking for leave is given a permit to be absent from his run for a stated period when such period can be determined, and is instructed to turn over to the substitute his key, badge, postmarking stamp, and to furnish the substitute with pouch, sack, and letter-packages labels to cover the proposed leave of absence. The substitute then assumes the duty of the clerk for the period stated. In crews of more than one man the substitute may be assigned to the position needing the least amount of training and a lower-grade member of the crew be assigned to the duties of the absent clerk.

Substitutes may be sent to any run in the division in which he is appointed as may be needed and are sometimes loaned to adjoining divisions. His pay for the first two periods of 313 days and one year is at the rate of \$1,100 per year. When he has filled this assignment he is sent to fill other runs on other lines. The continual change in assignment forces him to live and pay the rate of transients for meals and lodgings. This often consumes all he earns.

The substitute makes the same report of each trip as does the clerk for whom he runs, and a monthly report for each line in which he has performed service during the month as clerk in charge.

After a time he receives an offer of appointment to some line and, if accepted, assumes the duty as the permanent clerk in that line, and his pay begins on the date he assumes the duties of his appointment. He is then assigned to a certain examination requirement which, when met, makes him eligible to promotion to the next higher grade at the beginning of the first quarter after one year of satisfactory service in the grade to which appointed, but can receive only one promotion of \$100 in any one year.

Changes of various kinds affect the amount of work he has to perform, as, for instance, in changing a State scheme which has been divided from three sections into two sections, causing some clerks to have to put up examinations on a whole State instead of two-thirds or less of it, as happened this year in changing the North Carolina scheme in the case of certain lines in the third division. This change caused the clerks on the Roanoke and Florence to throw 700 additional cards this fall.

Sometimes additional work is put onto clerks for which no credit is allowed, as was done in the case of the Roanoke and Florence, trains 50 and 41, when they were ordered to pouch their registers on Winston-Salem. N. C., and Winston-Salem was ordered to pouch theirs on 51. The concluding sentence of this order stated that "This will relieve clerks in trains 50 and 51 from visiting the Winston-Salem post office to receive and deliver registered mail, but will not relieve him from examining the order book at that office." (Order No. 398 of May 22, 1917.) Clerks are required to examine order books before departing on runs and before going off duty.

He is given an annual leave of 15 week days after one year of service as unassigned or permanent clerk, but in practice the length of his leave is made dependent on the number of days paid by the department to his substitute, and often the clerk has to pay the substitute for from one to three days' service in order to get all of the time allowed by law. The department often requires the clerk to take the leave when he does not desire it and in no case will it permit him to save it for use in case of sickness of himself or family.

The hours of most clerks are undesirable. They run at all hours of the night and day, and are often difficult to reach by their families in cases of sickness or accident to them. A clerk spends a greater portion of his time away from his family than most workers, other than train employees. His meals are at all hours of the night and day and many times he goes from 12 to 18 hours without food in cases of wrecks, floods, and blockades.

He is at a great disadvantage as to holidays and other special days, some of which he never enjoys to any great degree, as at Christmas, which always

means long hours of the hardest work and many hours of extra work without any compensation therefor, and frequently when clerks desire to be at home for some certain day, in some cases for only a few minutes, they have to pay a substitute for as much as four or five days of service.

The risk of accident is very high. Some are killed and many injured each year, and clerks in the past have had to pay an exceptionally high rate for accident insurance, running about \$10 per thousand per year.

The occupation of a railway postal clerk requires a physical and mental combination that is not possessed by all men, namely, the ability to do active physical labor and at the same time to possess the mental disposition of a student. For considerable periods, twice or more times a year, clerks have to isolate themselves from their families and study. Studying post offices is the very hardest kind of dry, uninteresting application. The failure to study would cause a separation from the service. Examinations are the basic principle of efficiency in the Railway Mail Service. Without them the service could not be carried on with even double or triple the number of men now in service. These examinations are conducted with high-speed tests.

Railway mail clerks must have a high moral character. They have in their possession each trip many hundreds, and on large lines, many thousands of dollars' worth of property of various kinds, of which no records are kept, and the clerks who handle registers often have several hundred thousands of dollars in money at one time. These registers often are pouched on post-runners and in case of one-man runs there is no one to verify the dispatch. This kind of a responsibility can not be avoided by a clerk. Some of the registers handled by clerks containing many thousands of dollars are pouched over closed-pouch lines without a witness and handled by train porters or young express messengers.

The salaries of railway postal clerks are, however, below those of railway employees on the train on which the clerks run. The Roanoke & Florence runs over the tracks of three railway companies, and are handled by three sets of employees. The salaries received by them are as follows:

Winston-Salem Southbound Railroad:		Per year.
Engineers.....		\$4,672
Firemen.....		3,222
Conductors.....		3,007
Porters.....		2,044
Atlantic Coast Line Railroad:		
Engineers.....		3,043
Firemen.....		2,327
Conductors.....		2,555
Porters.....		1,800
Norfolk & Western:		
Engineers.....		2,810
Firemen.....		2,177
Conductors.....		2,701
Brakemen.....		1,873
Norfolk & Western yard:		
Brakemen.....		1,825
Yard conductors.....		1,945

Please notice that the negro porter on both of the first two lines receive \$444 and \$200 per annum, respectively, more than is received by me.

The colored porters who ice and water my car at Roanoke receive \$1,679 per year and the local car inspectors receive \$1,985.

The increases in pay given to workers in general are from two to four times the prewar wage schedule.

I have been in the service of the Post Office Department over 21 years, 14 of which have been spent in the Railway Mail Service (5 on trunk lines and 9 on one-man runs). My transfer to the present line was due to an effort to escape reduction in salary on account of the department reducing the number of men in the service in the train crew and running them on short runs. I have thrown examinations on Florida, Georgia, South Carolina, North Carolina, Virginia, and New York City, a total of more than 14,000 offices. Several of these have been repeated a number of times. In addition, I have taken the required examinations on Postal Laws and Regulations about 16 times.

Under the plan of examination on Postal Laws and Regulations, adopted a few years ago, the book was divided into 7 examinations of around 80 questions each. Upon complaint of the clerks of excessive requirements in this matter, the plan was adopted to require that only 20 of these questions were to be asked at any one time. Seemingly this would reduce the amount of work required to pass an examination of this kind, but because of the fact that questions are taken from the whole seven groups, it actually causes the clerk to have to prepare on all seven of the groups, thereby increasing his home work in this matter seven times.

Exhibit A, herewith attached, will give a full outline of the questions and answers required in one of these examinations.

My run is a class B, one-man run. We distribute West Virginia, Virginia, North Carolina, South Carolina, and Georgia, handle the registers, and make all reports of a clerk in charge. The pay we receive is \$200 less per annum than that of a helper on a class C run. I can not see where the responsibility for me is less than a clerk in charge, and I feel that in view of the high character and absolute accuracy and responsibility assumed by clerks on one-man runs they should receive the same pay as clerks on class C runs. The standard of living demanded by the American people can not be met by a railway postal clerk on a salary of less than \$2,500 per year and a clerk should reach that grade in five years of satisfactory service.

[Exhibit A.]

SECTION C, QUESTIONS AND ANSWERS, POSTAL LAWS AND REGULATIONS.

(1) Q. What leave may be granted a clerk injured on duty?—A. One year at full pay and one additional year at half pay, in periods of 30 days at a time.

(2) Q. What evidence of injury is required before leave will be granted.—A. Sworn certificate from the attending surgeon setting forth nature and extent and probable duration of the injury, and a sworn statement of the clerk as to how the injury occurred and whether or not it was occasioned by his own negligence.

(3) Q. What are the instructions about renewing applications for leave on account of injury?—A. The same procedure is followed as in the first instance and renewed every 30 days.

(4) Q. What are the requirements before a removal can be ordered?—A. The reasons must be given the clerk in writing and a copy of the charges furnished and a reasonable time given for personally answering the same in writing.

(5) Q. May payments be made in advance or in excess of a service rendered?—A. No.

(6) Q. May payments be made for extra service or when a clerk discharges the duties of another?—A. No.

(7) Q. What are the instructions about employees compiling directories?—A. They are not permitted to do so.

(8) Q. What are the instructions about employees requesting copies of newspapers?—A. They are not allowed to do so.

(9) Give general definition of second-class mail.—A. Periodical publications.

(10) Q. What does second-class mail embrace?—A. All newspapers and other periodical publications which are issued at stated intervals and as frequently as four times a year.

(11) Q. How many classes of second-class matter are there?—A. Two.

(12) Q. What are the instructions about classifying foreign newspapers and other periodicals?—A. They are classed the same as domestic upon filing of applications by their publishers or agents.

(13) Q. What is the postage rate on second-class matter when mailed by publishers?—A. One cent a pound or fraction thereof.

(14) Q. What second-class matter, if any, may be carried in the mails free of postage?—A. Free county publications.

(15) Q. What is the transient rate of postage on second-class matter when mailed by other than publishers?—A. One cent for each four ounces or fraction thereof.

(16) Q. May clerks accept for mailing other than second-class matter without stamps affixed?—A. No.

(17) Q. What are the instructions about using or selling canceled stamps?—A. It is punished by fine and imprisonment.

(18) Q. What are the instruction about incorrectly showing or erasing date of postmark?—A. The clerk doing so is subject to dismissal from service.

(19) Q. What are the instructions about lights being placed on crane at night?—A. The party hanging the mail must place a light on the crane at night. Railroad company must furnish the light.

(20) Q. What are the instructions about signal to be given when train approaches mail crane?—A. The engineer shall give timely notice by whistle or other signal when approaching crane.

(21) Q. Enumerate the subjects given which call for a special report.—A. (b) Mail carried by person under 16 years old; (c) carrier intoxicated; (d) mail pouch not locked; (f) mails left exposed to damage or depredation; (g) failure of the carrier to protect mail from the weather; (h) failure to take all mail on each trip; (i) mails unnecessarily thrown on the ground or dragged about and damaged.

(22) Q. In what manner shall sacks belonging to foreign countries be returned?—A. Empty and promptly.

(23) Q. What constitutes surplus equipment?—A. Any servicable mail bag not required for the regular dispatch of mails.

(24) Q. What are the instructions to clerks about disposing of surplus equipment?—A. They should be dispatched daily to the nearest freight shipping point.

(25) Q. Under what conditions of service and for what reasons may travel allowance be paid?—A. Travel allowance is paid to a clerk for meals and lodging needed after 10 hours from the beginning of his initial run, but not to exceed \$1 a day.

(26) Q. Who may receive travel allowance?—A. All regular and acting and substitute clerks assigned to road duty in railway post-office cars.

(27) Q. What is the limitation of payment for travel allowance?—A. One dollar per day.

(28) Q. In what manner are railway postal clerks appointed?—A. By the Postmaster General under civil-service rules and regulations.

(29) Q. What is the amount of the bond required of a railway-postal clerk?—A. \$1,000.

(30) Q. Under whose authority shall the salaries of clerks be fixed by classification?—A. The Postmaster General.

(31) Q. What is the limit of successive promotions in each classification?—A. Class A to grade 3, class B to grade 4, class C to grade 5.

(32) Q. What is the limit of advancement in grade in a period of one year?—A. One grade in a year below the grade of chief clerk.

(33) Q. What authority is there to suspend, reduce, or remove a clerk?—A. The Postmaster General may suspend, reduce, or remove a clerk.

(34) Q. Who has the authority to temporarily suspend a clerk?—A. Division superintendents.

(35) Q. To what extent may leave with pay be granted a clerk on account of sickness?—A. To not to exceed 30 days in one year.

(36) Q. What provision is made for clerks who are subpoenaed to attend a United States court?—A. His salary shall continue, and he will be paid by the United States marshal his necessary and actual expenses going to and returning from and while in attendance on the court. The expenses to be itemized and sworn to.

(37) Q. Are clerks exempt from arrest on civil process while on duty?—A. Yes.

(38) Q. When mail keys become worn or defective what action should a clerk take?—A. Timely notice should be given of the fact, stating the number of the key.

(39) Q. When mail keys are received from discontinued offices or elsewhere, how should they be disposed of?—A. They should be forwarded promptly to the division superintendent, with a statement of the facts in the case.

(40) Q. When a pouch or sack in transit becomes unsound, what action shall be taken?—A. The contents shall be transferred to another pouch or sack and the damaged one sent to the mail-bag repair shop and notation made on the trip report of cause of the damage, if known. Foreign sacks shall be inclosed in domestic sacks intact and forwarded to proper exchange office.

(41) Q. What are the instructions to clerks carrying surplus or using damaged equipment?—A. Clerks should not carry an excessive amount of or use damaged equipment.

(42) Q. What are the instructions about preparing equipment for shipment to depository?—A. They shall be carefully examined to see that no mail is left therein, must be labeled to show by whom made up, and the number and kind of sacks inclosed. And if possible the different sized sacks packed separately.

(43) Q. What are the instructions about intercepting or using equipment en route?—A. They are to be forwarded intact unless it becomes necessary to use them. If a portion of a sack is used the balance is to be forwarded by the clerk under his own label.

(44) Q. What are the instructions about using card slide labels?—A. They are used to label rotary-lock pouches and sacks and brass-lock pouches.

(45) Q. How shall card slide labels be disposed of?—A. They shall be returned by first mail under official cover to the office of origin.

(46) Q. What property shall a clerk turn in on his resignation or removal?—A. Mail keys, badge, commission, register records, and all other property belonging to the Post Office Department.

(47) Q. What are the instructions about using official diagrams?—A. Letter cases and paper racks shall be labeled according to official diagrams.

(48) Q. To what are notices posted in order book, in postal cars, transfer offices, and terminal R. P. O.'s limited?—A. To official matter only.

(49) Q. When may official telegrams be sent?—A. In urgent cases only.

(50) Q. How shall official telegrams be prepared?—A. In as brief a manner as shall be consistent with clearness.

(51) Q. How are telegrams about leave of absence and filling runs considered?—A. As personal, and to be paid for by the clerk at commercial rates.

(52) Q. What are the restrictions on clerks smoking on duty?—A. They shall not smoke while receiving mail from the public or while loading or unloading mail or visiting letter boxes.

(53) Q. What are the instructions about clerks cooperating with post-office inspectors?—A. They shall be given such official assistance as they may require.

(54) Q. What are the instructions about checking pouches out of and into car?—A. A correct list of pouches due to be received and dispatched shall be kept and checked as the pouches are delivered from or received into the car.

(55) Q. What are the exceptions to the instructions about checking pouches into and out of the car?—A. Pouches are not checked at local offices where not more than one pouch at one time is exchanged.

(56) Q. What are the instructions about serial marking of pouches?—A. When two or more pouches are made up for one address, the first one shall be marked 1, the second 2, and so on; the last one to bear in addition to its proper number a cross, thus, "X," to indicate the last pouch in the series.

(57) Q. What are the instructions in checking and recording emergency pouches handled?—A. Entry thereof shall be noted on the record and proper check made.

(58) Q. Under what circumstances may clerks receive newspapers from publishers and news agents direct?—A. When accompanied with a certificate from the postmaster that the postage has been paid.

(59) Q. What are the instructions about receiving and dispatching newspapers outside of the mails?—A. They shall be treated according to the instructions on the package when marked for "Out Side" delivery to news agents.

(60) Q. What are the instructions about train baggagemen dispatching outside packages of newspapers?—A. They shall deliver the package outside of the mails at the place shown in the address.

(61) Q. When second-class mail is received direct from the publisher, what additional evidence that the postage has been paid will be required?—A. Each load must be accompanied with a certificate from the postmaster showing the number of sacks, the weight of the mail, and that the postage thereon has been paid.

(62) Q. When there is more than one load of a consignment of second-class matter direct from the publisher is more than one certificate required?—A. A certificate is required with each load.

(63) Q. What information shall be shown on certificate from the postmaster accompanying second-class matter direct from the publisher?—A. The number of sacks, weight of the mail, and that the postage thereon has been paid.

(64) Q. How shall label be marked when circulars are included in a sack?—A. The word "Circulars" shall be shown on the label.

(65) Q. What are the instructions for making up mail for delivery and distribution?—A. They should be made up separately, unless ordered by the division superintendent to be combined.

(66) Q. How shall slip be marked when mail for delivery and distribution is included in one package?—A. The address shall be followed by the abbreviation "D&D."

(67) Q. How is a direct package made?—A. By placing all letters for one office in a package faced one way, with a plainly addressed letter on the outside and a slip covering the back of the package. The slip to be postmarked and bear the name of the clerk making it up.

(68) Q. What precaution shall be taken when circular mail is included in a direct package?—A. A letter shall be tied on the outside of the package.

(69) Q. What are the instructions about making up long and short letters? A. When in sufficient quantity make separate packages, but if tied out together the long ones are to be placed on the back of the short ones in such manner as will prevent injury to them.

(70) Q. What are the instructions about letters and circulars being placed in the pouch loose?—A. They shall be made up in packages and not placed in the pouch loose.

(71) Q. Define circular mail.—A. Circular mail is third-class matter in envelopes of such size as will permit distribution in a letter case or of such larger dimensions as can otherwise be made up into direct packages, or private mailing cards wholly in print, except that they do not contain market quotations on grain, stock, or produce (as distinguished from prices current or catalogue quotations on general merchandise).

(72) Q. How shall official matter be treated?—A. As first class unless the envelopes or wrapper distinctly state that the inclosure is printed matter.

(73) Q. How shall weather reports be treated?—A. As first-class matter.

(74) Q. What are the instructions about dispatching newspaper and periodical mail?—A. They shall be promptly dispatched to destination.

(75) Q. How are missent and misdirected sacks reported?—A. The label is sent in with the trip report and on the reserve side of the slip is noted missent or misdirected pouch or sack, as the case may be, and followed by a statement of the amount of mail matter contained therein, and signed and postmarked by the clerk.

(76) Q. What is required in relabeling misdirected or missent pouches or sacks?—A. The label should show the correct destination as well as the post office or R. P. O. by which originally made up and the postmark of the R. P. O. to which missent.

(77) Q. What action shall be taken when a pouch regularly due is not made up?—A. The label shall be indorsed "not made up," with the reasons therefor, and sent to the office of destination or to chief clerk (if known) in case of R. P. O. pouches.

The CHAIRMAN. Gentlemen that concludes the list, and we will adjourn until 2 o'clock this afternoon, at which time we will hear the second, third, and fourth class postmasters.

(Whereupon, at 12.15 o'clock p. m., the commission recessed until 2 o'clock p. m. this day.)

The commission met, pursuant to recess, at 2.15 p. m., Hon. John H. Bankhead presiding.

FOURTH-CLASS POSTMASTERS.

The CHAIRMAN. The commission will now hear from the fourth-class postmasters, and the first one on the list is Mr. R. M. Janney.

STATEMENT OF MR. R. M. JANNEY, GLOUCESTER, VA.

Mr. JANNEY. I am a third-class postmaster myself, but was asked to represent the fourth-class postmasters of the State of Virginia, as I was coming back to Washington in behalf of the third-class postmasters. I am satisfied the fourth-class postmasters are not getting just compensation. It was once considered a business getter to

have a post office in the store. Now it is not. If the mail comes in the busy part of the day, as it usually does, the postmaster has to stop waiting on his customers to handle the mail, write money orders, or sell a postage stamp to a patron. His customers either have to wait or make their purchases elsewhere.

Mr. ROUSE. How many of these men you represent have post office in the store?

Mr. JANNEY. All, except one; that office is not as well handled as those in the stores.

Mr. ROUSE. You think the fact of a post office in a store brings trade to the store?

Mr. JANNEY. No, sir. In my section it does not, as the mail is always delivered by star routes to the offices. In the sections where there are rural free delivery the people go only occasionally to the store, and trade is gotten by customers ordering goods over the telephone to be delivered by the carriers. I prefer being questioned to making a speech, and I will file this declaration with you to save your time. I think the department should make an allowance for rent, fuel, and light. The offices are open from 12 to 16 hours per day.

STATEMENT FILED BY R. M. JANNEY, GLOUCESTER, VA.

The present method of paying fourth-class postmasters was made a law at a time when such compensation might have been just. The duties at this time were at least such that it was not necessary to devote undivided attention to the work. The mails were light—no daily papers of any consequence having found their way into rural communities, while rural free delivery was yet unborn. People gave but little attention to their mail, and a call at the local post office was scarcely ever made oftener than once a week. Knowing this to be the case, these small offices were invariably placed in small country stores. The man who was successful enough to "land the pie" was considered fortunate, not because of the emoluments of the office, but because of the fact that it was considered a snare that would draw the public to the postmaster's place of business, after which it would be easy to sell them what wares that they might need. It is justly considered a trade getter, and this belief has followed the fourth-class office on down the road of time, and is even in vogue to-day.

Nothing could be farther from the real conditions as they exist to-day. A professional business man would scoff at the idea of his being bothered with the office, while the advent of rural delivery has put a crimp in the idea of its being a trade booster. People get their mail at their door, the hucksters deliver their goods, and they buy their produce, and they have no cause of visiting Uncle Sam's little office. All the visiting at the local post office are those who chance to live near the village, while the greater portion of the mail that is handed out of the general-delivery window is that of local business men. Does this look like a trade booster?

Now that the change of conditions has been noted, let us delve into the responsibilities and the amount of work done to-day, as compared with those remote times. It is not necessary to state what was done then. Everybody of mature age knows that, so we will pass that by. What I wish to present is what we are doing to-day. The duties of a fourth-class postmaster were very small prior to the war, compared to the duties now imposed. Everything was on a normal footing and business was progressive. Then came our plunge into the great struggle and the ensuing consequence upon all the resources of the country, and the adjustments to the conditions of war. The wages of common labor soared from time to time, as did the cost of living—more pay and less hours, or excess prices for overtime invariably was adopted. What was the effect on the postal service? In the first place, an increased burden was piled upon us, which might be summarized as follows:

First. The public had to be educated to the conditions and to a realization of the state of war, and to bring this about the mails were flooded with literature. The procedure was commendable, and I am pleased to note that the work was carried on to a satisfactory completion, and that duty found mem-

bers of the service in line, proud of the fact that they were working for the good of their country.

Second. The labor bureau used the mails to better the conditions as they then existed, and the amount was not only increased in volume, but the postmasters were called upon to give personal aid to those who saw fit to appeal to this department, either for help or employment.

Third. The Food and Fuel Administrations came in for their share of mail and work.

Fourth. The postmasters were called upon to act as recruiting agents and display all literature pertaining thereto.

Fifth. The conscription law caused the mails to be flooded with literature from the various headquarters, and the postmasters were called upon to give personal aid to any registrant who might ask for aid or information in filling out his questionnaire.

Sixth. War revenue stamps were added to the list of duties and the responsibility proportionately increased.

Seventh. War savings and thrift stamps were then added and brought before the public. This was a division of the Treasury Department, but their sales were turned over to the Postal Department. This provision increased the responsibility a hundred fold. Not only was the responsibility increased but the work at this point had tripled, and not a cent available for much-needed help. The postmasters were not able to hire the help; he was compelled to "go it" alone, in many cases he being made chairman of the war savings organization, and in order to fill these duties often had to work late at night. This, however, was not a part of his official duty, but the demand for stamps followed, and the work thus imposed was enormous as compared with the size of the office.

Eighth. Next in order came the registration of alien enemies. While this task was of small duration, yet the plan had to be studied in order to be able to answer the many questions that were asked.

Ninth. Now comes the registration and cashing of war savings stamps. Anyone who is familiar with the plan of registration knows that there is more labor and trouble involved in the task than there was in the original sale. The work thus imposed is extremely trying and irksome. The one wishing to register war savings stamps invariably came to have it done just at the time that you are preparing an incoming or outgoing mail. Now that they are being cashed in this procedure adds another feature to the work of the postmaster equally as great as the sale, as he now has to send the certificates to the central accounting postmaster to get the wherewithal to pay for them.

Now that we have gone over the additional duties and responsibilities imposed upon us, let us look and compare our position with that of other employees. The salary of a rural carrier on a 24-mile route was \$1,440 per year, and the trip is covered by the "little tin Lizzie" in less than half a day. They have the remainder of the day to dispose of at leisure. Their wages have been increased \$240 per year since the war commenced, not counting additional pay for mileage on longer routes. The salary of railroaders has trebled in many cases. I will take the local section man, foreman, and operator. Before the war the section laborers were getting \$1.50 per day, the foreman \$60 per month. The operator was getting a salary of \$60 with a commission on express business. He does not do one-fourth the work of a postmaster, yet his salary has been boosted until he now draws a monthly check of \$190 besides his commission. The foreman gets something like \$120 per month and the common laborer about \$100. The salary of common labor in all branches has more than doubled. It is nothing out of the ordinary for a common farm hand to receive \$60 per month with board.

Now, how about the salary of the fourth-class postmaster? He originally got 100 per cent of the first \$50 during any one quarter, and 60 per cent of the remainder. Legislation was finally enacted which gave him 100 per cent of the first \$80 and 60 per cent of the remainder. What has this meant to him? It can not mean more than 40 per cent of the difference between the \$50 and \$80 limit, as he received 60 per cent of this before. This, then, will make an increase in salary of \$12 per quarter, or 13 cents per day. On July 1 the limit was raised to 100 per cent of the first \$100. This will mean an increase of 40 per cent of the \$50 increase, \$20 per quarter, or 22 cents per day. Some will say that the work done at fourth-class post offices does not justify greater pay. From a business point of view this may be correct, so far as dollars and cents

are concerned, but when it comes to service rendered, it is reasonable that every man should have just recompense for what he does?

Those who advance this theory should consider the rural carrier. Does the work he does bring in enough revenue to pay him? Could there be hired a man to do his work for 100 per cent of the revenue that he collects? No; his work is certainly appreciated by the public and he is paid a reasonable amount for the amount of work performed, although the Government gets no return whatever for his labor. He is paid for giving service to the public. Isn't that what the fourth-class postmaster should get? The rural carrier is deserving of every cent he gets, and I do not wish to be understood as "knocking," for I am not. I am merely appealing for aid for the sadly underpaid postmasters. The carrier comes in and uses the building rented by the postmaster, warmed by the fire paid for by the same, gets his instructions therefrom, after which the postmaster shoulders the responsibility. The carrier enjoys a vacation of 15 days annually with full pay, gets every legal holiday, works but half a day, while the postmaster pays rent, light and fuel bill, many times string to tie the packages of letters, and remains at his post of duty from early morning to late at night; does more work than two carriers combined; has an equal outlay as far as expense is concerned; has no vacation with pay; gets off on no holiday save between mails, which does not even permit him to visit friends or relatives; has to pass a competitive examination, and then serves for one-third of the pay and many times less.

Now, as to some of the things that ought to be done.

First. The fourth-class postmasters should be furnished with all the fixtures in his office, so as to insure him against loss should his successor fail to buy the old fixtures, as they are of no use only for the purpose intended, and a chance for sale to some other postmaster is very remote.

Second. He should be furnished with light, rent, and fuel. He should be granted 15 days vacation with pay and all legal holidays.

Third. He should be placed on an actual salary based as follows:

At fourth-class offices the gross receipts of which are less than \$100 per annum, the salary of the postmaster shall be \$150 per annum.

Gross receipts \$100 to \$200, salary \$300.

Gross receipts \$200 to \$300, salary \$400.

Gross receipts \$300 to \$400, salary \$600.

Gross receipts \$400 to \$600, salary \$750.

Gross receipts \$600 to \$800, salary \$900.

Gross receipts \$800 to \$1,000, salary \$1,000.

Gross receipts \$1,000 to \$1,200, salary \$1,100.

Gross receipts \$1,200 to \$1,400, salary \$1,200.

Gross receipts \$1,400 to \$1,600, salary \$1,350.

Gross receipts \$1,600 to \$1,900, salary \$1,500.

BRIEF SUBMITTED BY J. S. WERTZ, WASHINGTON, D. C., PA.

The method of computing the compensation of fourth-class postmasters has not been changed since 1883.

There are approximately 45,000 of the fourth class with a possible average salary of \$500 per year, with nearly 20,000 receiving \$200 per year or less; about 25 per cent of their compensation is paid for fuel, rent, and clerk hire.

Compiled from statements of 105 postmasters of the fourth class, the average total compensation was \$56,742.55; average, \$520.41; spent for clerk hire, 61; reporting, \$6,452; average per month, \$23.80; spent for fuel and rent, 98; reporting, \$11,693; average per year, \$119.21; invested in office fixtures, 93; reporting, \$11,621; average, \$124.99.

Office of the fourth class paying as much as \$500 per year requires the entire time of one person to give efficient service. When it reaches \$800 and up, under the present law, it is necessary to have two on duty the most of the time to give efficient service. The expense of fuel, rent, and clerk hire and lighting must be paid from the compensation of the postmaster.

The cost of living has not only struck the postmaster in the increased cost of commodities, but the increased cost of labor has affected them in securing efficient help.

Postmasters of the fourth class are unanimous that the possession of the post office is not an asset to any commercial business, but rather is a liability, as while the postmaster is selling a 1-cent stamp he is losing on a more profitable sale.

Postmasters of the fourth class insist on a definite civil-service statute, leave of absence with pay, back pay for services performed, permission to close the office during the noon hour for meals, and 8 or 10 hour workday, with pay for overtime, 5 per cent for each money order issued, 10 per cent for each special delivery. At offices where the postmasters furnishes the fixtures the postmasters shall retain all of the box rent and they shall become no part of his quarterly report to the auditor.

Maximum pay of the fourth class should be \$1,500 per year, with sufficient allowances for rent, fuel, clerk hire, and lighting.

See sections 270-272, Postal Laws and Regulations, when referring to maximum and minimum salary; make this point emphatic.

Realizing that the commission has authority to investigate the salary only, yet it is well to call their attention to some other matters that are unfair.

Extra duties are also imposed on fourth-class offices where there is a central accounting office, and provision should be made to reimburse them for their extra labors.

THIRD-CLASS POSTMASTERS.

STATEMENT OF MRS. AGNES C. KLINGER, RIVERDALE, MD.

I am a third-class postmaster in Riverdale, Md. I wish to say that the third and fourth class postmasters of Maryland heartily indorse the salary plan outlined in the August 8 issue of the Postmasters' Advocate. This plan was also adopted in the convention at Detroit. I also have a brief here from the central accounting postmaster from my county, which he has asked me to read, as he can not be present.

I was appointed, postmaster (fourth class) under civil service in 1914.

Office advanced to third class in 1916, with salary of \$1,200 per year.

	Per year.
Allowed by Post Office Department for rent, heat, and light.....	\$264
Allowed by Post Office Department for clerk hire.....	168
Total allowance	432
Expense for rent.....	300
Expense for clerk.....	260
Total.....	560

Or a deficit of \$128 per year out of my salary.

I also purchased fixtures, consisting of up-to-date keyless boxes, general-delivery and money-order windows, safe, typewriter, etc., at a cost of \$650.

In 1918 the office was destroyed by fire and I was compelled to rent the only available place in Riverdale, for which I paid \$50 per month for three months and \$40 per month for the remaining nine months, a total of \$510 rent for the year. This did not include heat, light, nor fixtures.

My expenses were then as follows:

	Per year.
For rent, 3 months, at \$50.....	\$150
For rent, 8 months, at \$40.....	360
Total rent.....	510
For clerk hire, at \$40 per month.....	480
For rent of fixtures, at \$18.50 per month.....	220
For heat, 8 tons coal, at \$11.50 per ton.....	92
For light, at \$1.50 per month.....	18
Total expenditure.....	1,320

Allowed by Post Office Department:	Per year.
For rent -----	\$450
For clerk -----	450
Total allowance -----	900
Total expenditures -----	1,320
Total allowance by department -----	900
Total -----	420
Salary -----per year--	1,200
Deficit -----do-----	420
Total salary per year (or about \$65 per month) -----	780

The office is open all day and night and holidays, and the general delivery from 7 in the morning until 6 in the evening, or 11 hours.

I am bonded for \$1,500 and responsible for all money orders and postal funds and supplies.

It is almost impossible to get a clerk for \$40 a month, when girls from 16 to 17 years of age are receiving salaries amounting to from \$1,200 to \$1,800 per year under the Government, and of course will not consider such small pay.

I would suggest a living wage for clerks; a salary of at least \$1,600 per year and up for third-class postmasters; that the department either furnish all fixtures or allow postmasters the rents of boxes until fixtures are paid for, after which they would become the property of the Post Office Department.

The rent of the boxes now goes to the Post Office Department.

My box rents average \$75 per quarter, or \$300 a year.

(The brief referred to follows:)

BRIEF FILED BY MRS. AGNES C. KLINGER FOR SAMUEL A. WYVILL.

Finding that it will be almost impossible for me to appear before you, I beg to submit the following in behalf of one of the most deserving, if not the most deserving of all postal employees, viz, the central-accounting third and fourth class postmaster. Upon this class, of which I happen to be one, has been imposed a large part of the work that was formerly done in the auditor's office and the Division of Stamps at Washington, in addition to the regular routine work of other offices of the same grades.

This work was first transferred to us about September, 1917. Under the system my office is charged with and held responsible for all stamp stock in Prince Georges County, except Riverdale and Laurel offices, which have recently been changed to direct-accounting offices. All the other offices in the county render their reports to me, and I am required to examine them and embody them in my report to the auditor, so that my report covers the whole county except the two direct-accounting offices above mentioned. The auditing of these accounts was formerly done by the auditor.

Then I have to keep an account with every district postmaster in the county and supply stamps and other stock for those offices. To enlighten you as to what this means, my records show that during the year 1918 I mailed out \$160,913.33 worth of war savings and thrift stamps; \$1,727.80 worth of documentary revenue stamps, and \$64,421.33 worth of postage stock (since then the proprietary revenue stamps have been added to the list), or a total of \$227,062.46 worth of stock handled as extra work. I sent out these under 1,754 registered letters and packages, or a daily average throughout the year of \$756.87, under six registers. This work has always heretofore been done by the Division of Stamps. Can any fair-minded man ask or expect all this of anyone without extra compensation? It seems incredible, yet that is exactly what the class, in whose behalf I am writing, has been required to do for over two years past.

The above does not begin to enumerate the tasks we have to perform by reason of such work. No one can imagine the correspondence required of us.

For instance, on July 1, the price of stamped envelopes changed. The most of the postmasters at the small post offices pay very little attention to such changes and fully 50 per cent of the reports sent me had to be returned, with a letter of explanation to the district postmasters, for correction. There is really hardly any comparison between the work of a central-accounting postmaster and a district postmaster at the same grade office, yet we work for the same compensation.

During the war, I performed this extra work feeling that I was perhaps helping our Government, that I was backing my brother and the other boys in the trenches, but now that victory has come, there is no sane reason why we should be required or expected to do all this work free.

I believe that the salary plan should be revised so as to give postmasters at least 33½ per cent more compensation than they receive at present, and that, conservatively estimating, central accounting postmasters at third and fourth class offices should receive 20 per cent additional by reason of the extra work required on them. We should also receive back pay for the many hours of hard overtime work performed during the past two years.

I thank you for giving me an opportunity of presenting my position, and I beg your just consideration of same.

Respectfully submitted.

SAMUEL A. WYVILL,
Central Accounting Postmaster.

UPPER MARLBORO, MD., October 6, 1919.

STATEMENT OF MR. R. M. JANNEY, GLOUCESTER, VA.

Mr. JANNEY: Gentlemen of the commission: There are a number of things I wish to bring up in behalf of the third-class postmasters.

My salary was \$1,100 at the beginning of the war, and soon after, according to the Postal Laws and Regulations of 1913, it should have been raised to \$1,500, but there was a law passed that no postmaster of the first, second, or third class should be raised in time of war. Since the war it has been raised. My office is central accounting. I have 43 to account for, including my own. I originally had 47, but 4 have closed. My Congressman has written to me several times to try to get some one to take these offices, but it is impossible. If you understand the central accounting postmaster's duties, you will realize what he is up against. As the district postmaster is often careless in making his reports or does not care, as he is poorly paid, the reports have to be corrected. Often this can be done by calling the district postmaster over the telephone; many times it takes several calls before he can be reached; at other times his reports have to be returned to be signed, postmarked, or to get additional information before they are passed. Out of 42 district reports in the last quarter, I returned 27 and a letter to each one explaining why, and asked them to make the necessary corrections. When they were returned, the stamps had to be counted, wrapped, and registered. We are not only responsible for the postage stamps and stamped paper, but for the war-savings, thrift, documentary, and proprietary stamps. Each account has to be kept separate, and when the reports come in it is just as important to collect 2 cents as it is a larger amount. The district postmaster does not seem to realize this and often neglects to inclose it. I have written as many as five letters to collect 2 cents.

Mr. ROUSE. How many offices report to you?

Mr. JANNEY. Forty-two.

Mr. ROUSE. And what is your salary?

Mr. JANNEY. \$1,500 now. It was \$1,100 prior to July 1, 1919.

Mr. ROUSE. How much is allowed for clerk hire?

Mr. JANNEY. \$600 now, prior to August 1, 1919, \$300.

Mr. ROUSE. How many rural routes are there out of your office?

Mr. JANNEY. None.

Mr. ROUSE. Are there any star routes?

Mr. JANNEY. Yes; five. But I have an extra allowance for that.

Mr. ROUSE. How much are you allowed for separation?

Mr. JANNEY. Prior to August 1, 1917, \$1,020; was then reduced to \$492, and inspector was sent in to see if the separation at my office could be cut down, as it seemed too heavy for a small office. He counted the pieces which were handled, this being an unusually dull time of the year and the duller days of the week. I did not begin to get an average count, as it fluctuates a great deal.

Mr. ROUSE. How many money orders do you issue?

Mr. JANNEY. From July 1, 1918, to June 30, 1919, issued 1,006 orders, amounting to \$7,793.53; paid out \$14,642.58.

Mr. ROUSE. How many people have you helping you?

Mr. JANNEY. I have two. I have to have my wife to help me, because the salary is so small, it is impossible to get anyone else to work for it.

Mr. ROUSE. What do you pay?

Mr. JANNEY. I pay my assistant \$65. I have trouble in keeping her at that, and could not keep her if she were not married. I have to put my wife in as clerk and pay her \$30, and at central accounting I hire extra, as we are distributing so much of the time.

Mr. ROUSE. How many mails do you have incoming and outgoing?

Mr. JANNEY. Five each way.

Mr. MOON. You say you have five star routes?

Mr. JANNEY. Yes, sir; five.

Mr. MOON. How many rural routes?

Mr. JANNEY. None at all. All the mail is handled by star route; geographical peculiarities make this necessary. You can not very well supply the county by rural routes. The patrons are satisfied with star-route service. We are 22 miles from the railroad, and are supplied with a truck. We also have steamboat service. There has been a fight between the Post Office Department and Department of Justice since the boats have been under Government control. The service is not of the best on boats.

Mr. STEENERSON. Is your county mountainous?

Mr. JANNEY. No, sir; it is flat.

Mr. STEENERSON. Why can't you have rural routes?

Mr. JANNEY. Because the mail has to be brought in by star route and then sent to the adjoining counties and if supplied by rural routes it would be impossible to give the people both incoming and outgoing the same day. There is another point I would like to call your attention to, is the way most of the stamps are sold. I only have two customers that buy them in five and ten dollars lots; the town only has about 300 inhabitants; the balance of the patrons are farmers; all of them buy their stamps from one up, as they need them, even if they come to the office several times a day; that adds a great deal of unnecessary work. If I could only get them to buy a week's supply, it would considerably reduce the work. They treat parcel post in the same manner.

Mr. STEENERSON. They are canceled there, aren't they?

Mr. JANNEY. We do not get paid by cancellation.

Mr. STEENERSON. You don't sell the stamps, you mean.

Mr. JANNEY. We sell the stamps, but I am trying to show the amount of labor needed. Some one has to be at the stamp window all the time.

Mr. STEENERSON. They don't buy in large quantities?

Mr. JANNEY. We can not get them to. When I was a fourth-class postmaster, at \$800 a year, I was better off than now.

Mr. ROUSE. What is the total amount of money you received in a year, counting your salary and allowance?

Mr. JANNEY. Twenty-five hundred and ninety-two dollars for my salary and clerks.

Mr. ROUSE. And how much do you pay out?

Mr. JANNEY. Over \$3,000 a year including my salary.

Mr. ROUSE. Does the Government have a lease on your property?

Mr. JANNEY. They pay the rent of \$24 a quarter. I have written several times that the owners want more rent and I am liable to be put out of the building.

Mr. ROUSE. Do they pay the light and heat?

Mr. JANNEY. The department pays \$25 a year for fuel alone. Nothing for light. My lowest bid was \$100 for fuel this year. It is almost impossible sometimes to get supplies enough to keep going. The third-class postmaster has to furnish his own fixtures. The department draws the rent from the boxes. I was told by an inspector that my boxes were not adequate for my office, but can not see my way clear to make an investment of \$600 where I get nothing back.

Mr. ROUSE. Your office pays \$1,500; the Government will take a lease on that office and require the proprietor to furnish the fixtures, fix up the place. You ought to make application to the First Assistant to lease that property or have an inspector sent down there to take a lease for 10 years on some property. You have a \$1,500 office with six star routes, and you have enough business to justify that.

Mr. JANNEY. For instance, I have to pay \$2.50 per month for telephone rent; \$12 a year vault rent. I know there are no allowances for these, but as a central accounting office it is impossible to get along without a telephone, and the large stock of stamps would not be safe without the vault. The district offices call over the telephone for their supplies. There has been enough money wasted in forms, etc., by the smaller offices ordering more than they need to give the central accounting office a reasonable salary.

Mr. STEENERSON. Wasted?

Mr. JANNEY. Wasted.

Mr. STEENERSON. Can't you prevent the waste?

Mr. JANNEY. For instance, when a fourth-class postmaster wants a special form, he would order several and never use them. You can collect a truck load of old forms in my county. Every form should be kept by the central office, as the stamps are, and when a district office needs one, he could phone for it. If the central office got a little more salary, he could give this the proper attention it needs.

Mr. ROUSE. That is a matter of administration.

Mr. STEENERSON. How much would be a reasonable clerk-hire allowance for doing the work of central accounting.

Mr. JANNEY. I think \$15 a year for each office.

Mr. STEENERSON. You have 43.

Mr. JANNEY. Forty-three, including my own. You should credit a man with the number of offices he has to handle. Some have only four and from that up.

Mr. STEENERSON. That would be over \$600.

Mr. JANNEY. Yes, sir. I have to work Sunday at the end of the quarter. I have about 10 days' work at night—it is impossible to do it in the day, as I have so many interruptions. We have to check each report on postage, war saving and thrift, documentary, and proprietary stamps and keep a record of each separately. Keep a record of star-route carriers and make reports. A great many stores in the county send to my office for their proprietary stamps instead of buying at their own post office. All the lawyers, county clerks, and many other people buy the documentary stamps they need, instead of keeping them on hand, all of which adds a great deal more to our work than we used to have, but as yet we get no pay for it.

STATEMENT OF MR. H. M. BOWMAN, ANNVILLE, PA.

Mr. BOWMAN. Mr. Chairman and members of the commission, I represent the third-class postmasters of the State of Pennsylvania. There are 393 third-class postmasters in the State with an average salary of \$1,413. The average clerk-hire allowance of these offices is \$441, ranging from \$300 to \$800 allowance for the highest paid, or \$1,900 postmaster. We issue on an average—\$150 is a high average—for post-office money orders issued, plus a possible allowance of 100 special deliveries a month; that is a high average, and the amount we receive is about \$2,000, a little over \$2,000, and from that a man must pay his clerk hire. You can get a lady for about \$75 a month, and you daren't be too choice at that. In my office, for instance, I had two ladies and each worked five hours a day and I paid them \$50 apiece.

Mr. ROUSE. How much do you receive for clerk hire?

Mr. BOWMAN. \$800. In addition to that I have my sister, who assists occasionally when I need her, and my wife has been working regularly for a long time, which is the condition in practically all the higher-grade third-class post offices.

Mr. ROUSE. Is yours an accounting office?

Mr. BOWMAN. No, sir. It is not. The allowance for clerk hire in the higher-grade third-class post offices is entirely inadequate. As soon as my salary is increased to \$2,000, then I get an assistant postmaster and as many clerks as I need. For instance, I have a second-class postmaster and he is only 5 miles away from me. His allowance for clerk hire and an assistant postmaster is \$3,200 higher than mine, and yet his salary is only \$100 higher. His people work 8 hours a day; we are compelled to work an average of at least 12 hours and most of the third-class postmasters work 14 hours. We have to work from 6 in the morning until 8 in the evening, which is what most of them are doing. We are compelled to do that because we can not get clerks for the amount the Government is allowing at the present time, and you can not ask a clerk to work even 8 hours a day for \$50 a month.

In handling the mails, the third-class postmasters are returning to the mail-bag distributaries from 10 to 30 canvas sacks a day, which shows these offices are handling the mail from the larger offices which are deriving the benefit of the revenue. In other words, Chicago and New York offices dump in anywhere from 5 to 10 sacks of mail a day.

Mr. ROUSE. Third or second class matter?

Mr. BOWMAN. Mostly parcel-post and third-class matter. They throw that in on the third-class post offices and they return these sacks because they have no use for them, and the average is about 20 sacks a day, and it shows that these third-class offices are handling the mail of the larger cities from which we derive no benefit as far as revenue is concerned. We handle the revenues of the postal savings and the war savings, in addition to what we handled when the basis was fixed in 1883. In the spring of the year, when the income-tax reports are to be made out, the third-class postmasters are called on and I have had as high as eight in a day for days in succession who came there to have assistance in making out their income-tax returns, and we get nothing for that. One of the poorest men in the service to-day is the village carrier.

Mr. ROUSE. You are not required to make out these income-tax returns, are you?

Mr. BOWMAN. No, sir; we are not. But they come there, most of them, because they have no one to go to. You can hardly turn them down. You are the servant of the Government and you are under a sort of moral obligation to assist them.

Mr. ROUSE. You are the most prominent and best-posted man in the community.

Mr. BOWMAN. You are supposed to be, at least.

Mr. STEENERSON. I thought they usually went to the bank.

Mr. BOWMAN. We have two banks in our town, and I know from personal knowledge that they had a revenue collector make out their reports. I know they got a specialist in that line and paid him \$15 to make out the reports.

I want to say a word about the village carrier. He starts at \$55 a month. They handle as much mail as most city carriers, even more.

Mr. ROUSE. Does he help you in the office?

Mr. BOWMAN. If he has the time. He is only supposed to work eight hours a day, but they can hardly find any time to give to the office when they work eight hours a day and make two deliveries and three collections a day. We have one carrier who serves a population of over 3,000 people. He makes two deliveries and three collections a day. He carries on an average 51 pounds on each trip. He delivers over 400 pieces of mail on each trip and he starts at \$55 a month and now is only getting \$78 a month. He should have a substantial increase.

Mr. STEENERSON. There is one thing I would like to know; that is the expense of this circular mail. How long have you been in the service?

Mr. BOWMAN. Since last October.

Mr. STEENERSON. I was going to ask if there had been a large increase in that circular mail.

Mr. BOWMAN. Yes, sir. I was connected as an extra man under the former postmaster and did all his report work and, in his absence, had charge of the office.

Mr. STEENERSON. What can you say about whether or not there has been a very large increase in that circular mail?

Mr. BOWMAN. There has been an increase of over 50 per cent in the incoming mail in the past several years, and especially in parcel-post matter from the mail-order houses.

Mr. STEENERSON. That is fourth class?

Mr. BOWMAN. Circular matter. There has been a large increase also in parcel post. Parcel post has increased more than 50 per cent from offices like Chicago and New York, where they have Sears-Roebuck & Co. and Montgomery-Ward and those stores.

Mr. ROUSE. What was your business before you went into the post office?

Mr. BOWMAN. I was teller in the bank.

Mr. STEENERSON. What have you to say about increased postage on first, second and fourth class matter?

Mr. BOWMAN. I believe there should be an increase on first, second, and fourth class. On second class I have this experience. We have a college in our town that issues a college bulletin, it is only a pamphlet, two leaves. They issue that every week and they send out 300 in the town and county. They weigh on an average only nine pounds for the two or three hundred.

Mr. ROUSE. Would you put a postage rate on that?

Mr. BOWMAN. I would put a minimum of 1 cent on each of those copies. You can't handle it for less. We handle these 300 copies, and most of the students get it through the general delivery window.

Mr. ROUSE. What about catalogues?

Mr. BOWMAN. Catalogues should be subject to the third-class rate instead of the parcel-post rate, as coming under book form.

Mr. ROUSE. What about magazines?

Mr. BOWMAN. I believe that the schedule at the present time is fair on the zone rate, based on the advertising space.

Mr. STEENERSON. What is the compensation of the village delivery carriers?

Mr. BOWMAN. He starts in at \$55 a month and is increased now—he is in the service two and a half years—and with the last emergency appropriation, he is only getting \$78 a month at the present time.

Mr. STEENERSON. That would be how much a year?

Mr. BOWMAN. Nine hundred and thirty-six dollars.

Mr. STEENERSON. Well, I understood that the bill which passed the Senate provides for \$240 for all. That would increase him \$240?

Mr. BOWMAN. Yes, sir.

Mr. STEENERSON. Would that be sufficient?

Mr. BOWMAN. No, sir; in comparison with what the city carriers get, who are not handling any more than he is. The city carriers,

5 miles distant, are handling less mail than he is, and carrying less weight, and are getting \$1,400 a year.

(Mr. Bowman submitted the following papers:)

STATEMENT FILED BY H. M. BOWMAN, ANNVILLE, PA.

In behalf of the 393 postmasters of the third class of the State of Pennsylvania, I present the following facts and suggestions for the consideration of your honorable commission:

Average annual salary of third-class postmasters of the State, \$1,431.

Average annual allowance for clerk hire, \$441.

The offices receive and dispatch an average of six mails daily.

Most postmasters of the third class are working an average of 12 hours daily, because the Government does not provide sufficient funds for the help necessary for shorter days.

The average which third-class postmasters must pay from their own salary is about \$500 annually. In addition to this deficit in allowance most postmasters use their relatives to assist during busy seasons and their assistance means good service to the patrons without reimbursing the postmasters.

We are compelled to furnish all janitor service, including brooms, brushes, etc.

The allowance in many of these offices for heat and light is entirely below cost of production.

Postmasters at third-class offices are supplying the means of delivery for the mail-order houses, while the revenue accrues to the mailing office.

We are handling the parcel post with the same clerk-hire allowance regulated by the law of 1883, with small emergency appropriations. This volume of business is shown by the fact that third-class postmasters return to mail-bag depositories daily from 10 to 30 sacks per postmaster, which shows that we are delivering the parcels for which some other office is paid.

During the past five years the postal revenue has increased fully 50 per cent.

Postal savings has increased materially. War savings and revenue business has been added, which will continue for a long time until all war stamps have been redeemed.

These added duties and responsibilities which we now have should entitle us to some material advance which would enable us to partly meet the increase of about 80 per cent in living expenses.

When the existing salaries were fixed there was simply a postal business, with a comparatively small money-order business in addition.

The third-class postmasters of Pennsylvania feel that they are entitled to an increase of at least 35 per cent on the present salary basis.

The Post Office Department should provide the necessary clerk hire for these offices on a basis similar to the system now in effect in second-class offices. The present allowances are no inducement to enable postmasters to secure efficient help.

Sufficient allowance should be made for heat and light to all offices. The present rate of allowance for clerk hire is so unequal to second-class offices that it needs little explanation.

A postmaster with a salary of \$1,900 receives \$800 allowance, while a salary of \$2,000 carries with it an assistant of about \$1,400 and at least one, and in most cases two clerks additional.

Another employee who receives the least pay is the village carrier. He starts with a salary of \$55 a month. In some offices he delivers an average of 44 pounds, or over 400 pieces per trip, while he makes two deliveries and three collections daily. The village carrier should have at least 50 per cent increase in salary.

We believe that all postmasters should be granted a regular leave of absence of at least 15 days annually, the same as carriers now enjoy

With these facts, it is apparent that our main claim is for sufficient clerk-hire allowance and a substantial increase to partly meet the added responsibilities and high cost imposed upon us through no fault of the postmasters.

Postmasters at third-class offices should be paid salaries in accordance with the following schedule:

	Salary.
Gross receipts \$1,900 to \$2,100-----	\$1, 650
Gross receipts \$2,100 to \$2,400-----	1, 800
Gross receipts \$2,400 to \$2,700-----	1, 950
Gross receipts \$2,700 to \$3,000-----	2, 100
Gross receipts \$3,000 to \$3,500-----	2, 250
Gross receipts \$3,500 to \$4,200-----	2, 400
Gross receipts \$4,200 to \$5,000-----	2, 550
Gross receipts \$5,000 to \$6,000-----	2, 700
Gross receipts \$6,000 to \$7,000-----	2, 850
Gross receipts \$7,000 to \$8,000-----	3, 000

THIRD-CLASS CLERK HIRE.

Third-class postmasters should be granted allowances for clerk hire according to the following schedule:

Postmaster's salary :	Allowance clerk hire.
\$1,650-----	\$600
\$1,800 -----	700
\$1,950 -----	800
\$2,100 -----	900
\$2,250 -----	1, 000
\$2,400 -----	1, 100
\$2,550 -----	1, 200
\$2,700 -----	1, 300
\$2,850 -----	1, 400
\$3,000 -----	1, 500

FOURTH-CLASS POSTMASTERS.

Fourth-class postmasters should be paid in accordance with the following schedule:

At fourth-class offices the gross receipts of which are less than \$100 per annum, the salary of the postmaster shall be \$150 per annum :

	Salary.
Gross receipts \$100 to \$200-----	\$300
Gross receipts \$200 to \$300-----	400
Gross receipts \$300 to \$400-----	600
Gross receipts \$400 to \$600-----	750
Gross receipts \$600 to \$800-----	900
Gross receipts \$800 to \$1,000-----	1,000
Gross receipts \$1,000 to \$1,200-----	1,100
Gross receipts \$1,200 to \$1,400-----	1,200
Gross receipts \$1,400 to \$1,600-----	1,350
Gross receipts \$1,600 to \$1,900-----	1,500

Fourth-class postmasters should be allowed for the items of rent, fuel, and light a sum equal to 25 per cent of their compensation.

STATEMENT OF MR. F. L. WILLEY, BRIDGEVILLE, DEL.

Mr. WILLEY. Gentlemen, I have a questionnaire covering all the stages of the situation and I would like to file my brief and answer questions. I will give you a compilation of the deficit as taken from the postmasters' salaries:

The \$1,700 postmasters receive \$1,147; the \$1,400 postmasters, \$1,009; the \$1,300 postmasters, \$942.30; the \$1,200 postmasters, \$879.

That deficiency comes, in some cases, from the rent, light and fuel being less than what they have to pay, but mostly from the clerical allowance. The clerical situation in Delaware, which is a small State, is that you can not get anybody under \$15 a week. Girls in stores, 14 years old, make \$14 and \$15 a week, and the result is that we have to go out and spend our own money.

Another point; in my own office I have four rural carriers. I have been in the postoffice since 1915. At that time they were receiving \$1,100, I think. Now they are receiving \$1,548. They start work in the morning at half past 9, and return and check out again at half past 1 and they have no responsibility and I work there an average of 11 hours a day and receive less than they do.

Mr. MOON. What do you get?

Mr. WILLEY. \$1,700. When the deficiency is taken into consideration, I have \$1,200 left.

The CHAIRMAN. How large an increase do you think you ought to have?

Mr. WILLEY. I judge the third-class postmasters would be glad to get anything they could. I know I would. I think the Advocate of August issue was very good. Speaking for the State of Delaware, we would be very glad to get that.

(Mr. Willey filed the following brief:)

BRIEF FILED BY MR. FRED L. WILLEY.

Gentlemen of the Joint Commission on Postal Salaries: I am here representing every third-class postmaster in the State of Delaware.

It is our desire to present facts and conditions as they now exist in Delaware.

1. We are working on a postmaster's salary basis, made by Congress March 3, 1883 (and as a patriotic duty), was not allowed to advance our salaries during the war, to say nothing of the extra work that fell to our share, as our questionnaires will show.

2. Our allowances for clerical services, will not average as good as the law Congress enacted August 24, 1912, for that purpose.

I have the statistics here, relating to the compensation received by the postmasters of our association, as follows:

Post office.	Post-master's salary.	Clerical allowance.	Expected expenditures.	Deficit.	Post-master's balance.	Average.
Middletown.....	\$1,900.00	\$800.00	\$1,319.00	\$585.00	\$1,315.00	\$1,137.79
Smyrna.....	1,800.00	800.00	1,310.00	510.00	1,290.00	
Bridgeville.....	1,700.00	750.00	1,250.00	500.00	1,200.00	
Delmar.....	1,700.00	672.00	914.00	242.00	1,458.00	
Edgemoor.....	1,700.00	84.00	420.00	336.00	1,364.00	
Harrington.....	1,700.00	500.00	1,590.82	1,090.82	609.18	
Marshallton.....	1,600.00	580.00	590.00	10.00	1,590.00	
Clayton.....	1,500.00	708.00	1,050.00	342.00	1,158.00	1,019.00
Felton.....	1,400.00	480.00	907.00	487.00	913.00	
Selbyville.....	1,400.00	480.00	920.00	440.00	980.00	
Wyoming.....	1,400.00	564.00	810.00	246.00	1,154.00	
Greenwood.....	1,300.00	360.00	708.00	348.00	952.00	942.30
Millshoro.....	1,300.00	420.00	727.80	307.80	992.20	
Rehoboth Beach.....	1,300.00	700.00	1,000.00	300.00	940.00	
Yorklyn.....	1,300.00	480.00	949.00	415.00	885.00	879.00
Frankford.....	1,200.00	480.00	808.00	328.00	872.00	
Milton.....	1,200.00	96.00	410.00	314.00	886.00	
Average for all.....						1,050.37

Gentlemen, I have laid these facts before you briefly, and I beg you to give them your most careful consideration; you can readily see that not only our rural carriers in many cases are receiving more compensation than the postmasters themselves, therefore considering the present cost of living, the members of our association ask that we be compensated in proportion to those of like responsibility. I thank you for the privilege you have given our association in coming before you.

SECOND-CLASS POSTMASTERS.

STATEMENT OF MR. M. J. PORTER, WAYNE, PA.

Mr. PORTER. Mr. Chairman and honorable members of this commission, I have been appointed by the Postmasters' Association of Pennsylvania to present to you briefly the causes, the reasons why we believe the second-class postmasters should be additionally compensated over and above the present rate of salary.

We base our conclusions from the fact that some 35 years ago or more the schedule of the present salary was based upon. Since that time, or in the past few years, we have had added to the duties of the postmaster 50 to 75 per cent. Twenty-five or thirty years ago the postal business was the main institution of the Postal Department. The revenues at that time were a great deal less than they are at the present. We claim that a salary based on receipts according to a schedule instituted or inaugurated some 35 years ago does not measure up to the present-day needs.

There has been added—relative to post offices of the second class particularly—the war savings, the postal savings institution, which I believe will be and has been firmly established and will continue to remain a part of the duties, and also an increased responsibility, an increased volume of mail, both in first-class mail and the parcel post. This has increased, from the various reports received from the postmasters of that organization, averaging from 45 to 50 per cent in the last five years. These additional responsibilities have been recognized by the department by the increased demand for bond. Person-

ally, mine has been increased \$2,000 over last year, because, as I believe, of the additional responsibility.

The war saving stamps, while not of a permanent character, nevertheless require specific and special duties on the part of the postmaster. The registration of alien enemies, both male and female, fell to the lot largely of the second-class postmasters. The recent Liberty loans required and received considerable effort on the part of the postmasters of the second class; and I am glad to say that, by their action, by proving themselves, in that action, as loyal Americans, with the additional duties and additional responsibilities, they acted like true and loyal Americans and considered more the interest of the country than themselves. There has been a sacrifice made in order that these obligations may be met honestly, intelligently, and loyally, without a demand, without a request, up until the present time, for an increase. Why? Right in our own midst, the office in which we work, all around us, from the substitute up, have received increases. Not that they are not entitled to it, because I firmly believe we are. We, as loyal Americans, stood firm, performed our duties honestly and efficiently, because of the big crisis that confronted the country, and we come down here now, not as simply asking or soliciting alms or expecting something to be granted for the simple reason that others are having their increases granted, both inside and outside of the department, in every institution and business house all over the world, in this land particularly. Wages have increased—a fact well known to you all. We have, with others, been obliged to meet these new conditions, and we have been obliged to meet them on a salary based back 35 years ago; and in all fairness, I think, with those additional duties, with those additional responsibilities imposed on us, and I think it will follow in the future along the same lines, that we can honestly ask for the fair and favorable consideration of an increase in salary to meet and take care of these duties and the expense attached thereto because of present conditions.

Mr. ROUSE. What do you think would be a fair increase?

Mr. PORTER. According to Government statistics, as I can understand them, there has been an increase in the cost of living in general, and even by strict economy in my own home, my personal expenses have advanced at least 50 per cent, by strict economy. You take the question of rent, for instance; it has advanced on me from \$25 to \$35. These are not extraordinary things. These are facts, gentlemen. You take the coal in my cellar that I put there two months ago. I am paying at least twice what I paid for it five years ago. These are facts that you are well aware of. Take the shoes that go on my feet. Those I paid \$4 for five years ago, I now have to pay \$8 for. Now, then, in order to meet that increase, I believe, by careful and strict economy, we, with these additional burdens and responsibilities, are entitled to an increase of 35 per cent. Not 60 per cent or 50 per cent, gentlemen. I do not propose and no American can expect or propose to ask for 50 or 60 per cent or 75 per cent, when he knows in his own heart he can not obtain it. I believe there is an honest ground that can be reached between individuals and corporations, between the department and its employees, on a common basis of compensation for services rendered, and I believe it can be met, and you will find, I believe, that 98 per

cent of the postal employees of this Government are true and loyal Americans and will stand on a fair basis in conducting the affairs of the Government.

Mr. MOON. What is your salary now?

Mr. PORTER. \$2,400 a year.

Mr. MOON. What is your net salary?

Mr. PORTER. My net salary. It would possibly be about \$2,300. I pay for, provide, two boxes—they are about two foot square—to keep my stamps in over in the bank. I pay a rent in that bank for the safekeeping of those boxes out of my own pocket. We have an allowance of \$100 a year for janitor. You can not obtain a man to give you the service you need for \$100.

Mr. ROUSE. Is that a Federal building?

Mr. PORTER. No. I also contribute out of my own pocket a dollar or two for extra work.

Mr. MOON. For the payment of expenses you pay out of your own pocket about \$100?

Mr. PORTER. Yes, sir.

Mr. MOON. How long have you been getting that salary?

Mr. PORTER. Five years.

Mr. MOON. What did you get previous to that time?

Mr. PORTER. I think my predecessor's salary was the same as mine, and how far back that went I do not know.

Mr. MOON. How much?

Mr. PORTER. My predecessor got the same as I did.

Mr. MOON. I know, but what was your salary?

Mr. PORTER. Oh, in other business. Well, it ran from \$2,000 to \$3,000 at that time.

Mr. MOON. Your salary five years ago?

Mr. PORTER. Yes, sir. It was a business and not a salary.

Mr. MOON. That office has been reduced, then, has it?

Mr. PORTER. I am not talking about the office now.

Mr. MOON. I am talking about your office.

Mr. PORTER. That has remained the same for, possibly, 10 years. My appointment dates back five years or a little more than that.

Mr. MOON. I was not inquiring about your private business. I wanted to know what your salary as postmaster was.

Mr. PORTER. \$2,400 all the time.

Mr. MOON. All the time?

Mr. PORTER. Yes, sir.

Mr. MOON. For how long now?

Mr. PORTER. I have been there about five years and six months.

Mr. MOON. What was it before that?

Mr. PORTER. My predecessor received \$2,400.

Mr. MOON. How many years before? Before you went in?

Mr. PORTER. That I am not acquainted with. The last year, and possibly the last four years, the salary of my predecessor was the same.

Mr. MOON. Now, then, you think your salary ought to be how much?

Mr. PORTER. Well, in order to meet conditions, and as compensation for services rendered, it should be, in my judgment, and the judgment of our association and the members thereto belonging.

there should be an increase of 30 to 35 per cent on our present salary.

Mr. MOON. Making the salary thirty-odd hundred dollars?

Mr. PORTER. Well, in the neighborhood of \$3,000 to \$3,200; yes, sir.

Mr. STEENERSON. Does it require your whole salary to pay your living costs?

Mr. PORTER. I might say yes, and I might say no. As far as the actual living, it wouldn't require \$200 a month to actually live, but it put me in a position where I could save \$100 now where five years ago I could save \$200. I need not explain the cause of that.

Mr. STEENERSON. What are your actual living expenses? Do you spend \$100 a month?

Mr. PORTER. By strict economy they are \$165 to \$175 a month, not including contributions to charity. I am taking in the family and the rent and my coal.

Mr. STEENERSON. How many children have you?

Mr. PORTER. Two.

Mr. STEENERSON. That would include all expenses, would it?

Mr. PORTER. Well, I don't know whether it would or not. It would be like this: I could, as I do now, make some articles of wear last longer, and taking care more particularly to meet the new conditions, and if I was to buy to-day the same amount that I lived on, the same amount of clothes and food and coal, etc., as five years ago, I should say no. A hundred dollars wouldn't take care of my family under those conditions.

Mr. STEENERSON. Most of these men that have testified here have made detailed statements of their expenses, that included such necessities as expense of school for their children and church dues and fraternal societies.

Mr. PORTER. Well, if you are going to include that, lodge dues and the doctor's bills, which are part of life, and the education of my children, who are going to the public schools—my taxes enter into that, of course—it will keep you busy. You can't clothe them as you would desire to clothe them. You could clothe them as I was clothed as a boy, because they patched my clothes, but nowadays you can't do that.

Mr. STEENERSON. You could live on the \$1,200?

Mr. PORTER. No, sir; not as a gentleman should live.

Mr. STEENERSON. How much do you contribute to political campaigns?

Mr. PORTER. I would like to give twice as much as I do, but I can not.

Mr. STEENERSON. How much do you give?

Mr. PORTER. It depends on the year; if it is presidential year, I feel like giving more than I do.

Mr. STEENERSON. How much do you give then?

Mr. PORTER. I couldn't give you an accurate account of that. It costs me \$25 or \$30, possibly; possibly it costs \$50. I would give a man his carfare to have him go and vote.

Mr. STEENERSON. You have regular contributions, don't you?

Mr. PORTER. No, sir; no regular, stipulated contributions.

Mr. STEENERSON. You give about \$25 then?

Mr. PORTER. \$25 or \$30; or, maybe, \$50, and I would be glad to give more.

Mr. STEENERSON. Is that based on your salary?

Mr. PORTER. No, sir; that is based on my general expense. If I came to Washington to visit a friend I wouldn't count that as living expenses.

Mr. STEENERSON. Suppose we increased your salary from \$2,400 to \$3,200, how much more would you give?

Mr. PORTER. I don't know.

Mr. STEENERSON. You would be more liberal, wouldn't you?

Mr. PORTER. I expect if we had a first-class man running, and \$25 would elect him, I wouldn't hesitate to give it.

Mr. STEENERSON. Well, I guess we better give you the \$800 more.

Mr. PORTER. Gentlemen, you take our record and look up our record, and I believe we will have a substantial increase. And I believe that will be given to us because we earn it, and not because we are asking for it.

Mr. STEENERSON. What is the name of your office?

Mr. PORTER. Wayne, Pa.

Mr. STEENERSON. What are your receipts?

Mr. PORTER. The receipts will run about \$16,000 a year.

STATEMENT SUBMITTED BY J. T. BUTLER, OF CORAOPOLIS, PA.

Having been selected by the second-class postmasters of western Pennsylvania to appear before your committee and present some facts relative to the conditions in western Pennsylvania, and being in Washington on October 8, but being compelled to leave before the hearing on October 10, I beg leave to file the following statement for your consideration:

The postal receipts of the second-class offices in the western part of Pennsylvania since 1914 have increased between 75 and 100 per cent.

The money-order business has about doubled.

Postal savings business has increased from 500 per cent to as much as 5,000 per cent in some offices.

In addition to the responsibility occasioned by the increased business mentioned above there has been added the responsibility of handling war savings stamps, revenue and proprietary stamps.

Under existing law postmasters' salaries have increased about 8 per cent.

Salaries and wages in the various industries more than 100 per cent in the same period.

The cost of living also having advanced almost 100 per cent, I therefore believe that an increase of 35 per cent on the salaries of second-class postmasters is reasonable and should be granted.

WATCHMEN, MESSENGERS, AND LABORERS.

STATEMENT OF MR. JAMES GILDEA, PHILADELPHIA, PA.

Mr. GILDEA. Honorable chairman and gentlemen, it is apparently a needless waste of your very valuable time to enter into a discussion of the high cost of living. Suffice it to say that as the price of commodities necessary to the sustenance of life and the maintenance of a home have increased to the general public, the watchmen, messengers, and laborers of the Philadelphia post office have not escaped their share of this burden, hence it would seem to me, in the readjustment of postal employees' salaries, it is fair to assume that the watchmen, messengers, and laborers should be favorably considered, at least they should receive the same consideration as the other postal employees, and I would like to particularly emphasize this point: The present salaries of the watchmen, messengers, and laborers are fixed

of \$900 per annum; bonus additional, \$135. The bonus granted to all other post-office employees, up to and including the \$1,300 grade, is \$300 per annum, and in the custodian or Treasury Department the bonus granted for the fiscal year commencing July 1, 1919, is \$240 per annum. You will therefore note that the difference in bonuses commencing the fiscal year of July 1, 1919, was an apparent discrimination against the watchmen, messengers, and laborers.

As commencing this fiscal year we have received an additional compensation, and while it seems, as I previously stated, an apparent discrimination, my impression is that it was not intentional on the part of the Postoffice Appropriation Committees of Congress or the Senate, but rather that the question was not intelligently brought to their attention. Do not misconstrue or misunderstand me to infer that any of the heretofore mentioned are receiving unearned salary or bonus. Far from it. The evidence submitted and the arguments advanced by the representatives of the clerks, carriers, and so on, is undoubtedly convincing testimony that they are considerably underpaid. Such being the case, it should be more than evident that the watchmen, messengers, and laborers, who have not received as great consideration from the Congress of the United States, are certainly very much underpaid.

The watchmen, messengers, and laborers are selected and appointed in accordance with their averages as received in the third-grade civil-service subclerical examination, and since the year 1914 all the appointments in the Philadelphia post office are made from the list of eligibles in this grade. Now, it occurs that in taking this examination that you are eligible for appointment in the field service, within the jurisdiction of the third-grade civil-service district, hence if, for example, A, heading the list of the civil-service eligibles, is appointed to the Postal Service as watchman, messenger, or laborer, he would receive a salary of \$900, plus a bonus of \$135, making a total of \$1,035 per annum, Sundays and seven holidays in the year off, or compensation therefor, and a vacation of 15 days per annum.

The next on the list of eligibles is appointed to a position in the United States Mint. The wages vary; the laborers get \$3.75 per diem; usher, \$1,100 per annum, plus a bonus of \$240, making the salary of the laborer \$4.28 per diem and that of the usher \$1,340 a year. This is also applicable to the customhouse employees, selected from the third grade, and in either of these the appointee would receive 30 days' vacation, exclusive of Sundays and holidays, summer season Saturday half holiday, and 30 days' sick leave per annum. A, therefore, is apparently penalized for his extra intelligence in heading the list of eligibles.

Honorable gentlemen, you are placed in a very precarious position, between the demands of the postal employees and a probable deficit in postal receipts in the event of granting said demands. I believe it is good Americanism as well as sound logic to put forth the argument that the Postal Department should be self-sustaining; but in the maintenance of the department you must have efficiency, and to attain and maintain this efficiency wages must apparently be adjusted in accordance with wages paid in the general field of labor. For example, in Philadelphia, September 2, 1919, the letter carriers' convention, quoting Congressman Goldfogle, of New York, who, in part,

of six. It just won't do it. We have to work out some in the mornings. A man certainly impairs his service to the Government when he works somewhere from 8 to 12 and then goes to work for the Government from 12 to 8. He can't serve those last eight hours as good as if he didn't have to work somewhere else in the morning. That is what we have been compelled to do in the Richmond post office in order to get by.

The people of the community seem to make a demand of the post-office people. They seem to think they ought to live pretty good, because they have got a Government job and work in the post office, never realizing that they are the poorest paid people in the country. In our office we had a colored man digging a ditch to put a pipe down. He said to me, "Reckon I could get a job in the post office?" I said, "Oh, I don't know; there's a lot of red tape about it. What are you making now?" "Four dollars." "Do you reckon I could get a job doing what you're doing?" I asked him. "You're making more than I am." There was a man with no responsibilities at all and he was making \$4 a day. We have to try to keep up our appearances. We have to have a phone in our house. Well, there is no iron-clad rule about it, but the department wants to call you any time they feel like it, and they request you to have a phone. Phone rates have gone up since Mr. Burleson has charge of it. The doctor used to charge \$1 a visit; now he charges \$2.

Mr. MOON. Has the phone bill been reduced any since Burleson quit?

Mr. HODGES. No, sir; they are trying to have it reduced now in Richmond. Nothing has been reduced. The more you probe into the high cost of living, the higher it is to buy your living in Richmond. Everything has gone up. Flour is \$15 a barrel; seven years ago it was six or seven dollars.

The CHAIRMAN. What is the size of your family?

Mr. HODGES. I have four children.

The CHAIRMAN. What age? Are any of them large enough to go to school?

Mr. HODGES. Oh, yes.

The CHAIRMAN. Do you send them to school?

Mr. HODGES. I send one of them. I can't send the boy. He has a job. I send him to night school.

The CHAIRMAN. You had to take that boy from school and put him to work to help support the family?

Mr. HODGES. Yes, sir. \$1,035 won't support the family. During the war I bought three Liberty bonds, paying a dollar a week on them. It was necessary for me to sell those bonds. As fast as I got one nearly paid off, I would get hold of money to finish paying it, and then I would have to sell it. It is the duty of every man to make a living for his family, and to try and make a decent living and post-office people, as I said before, it looks like they are expected to be a little more dignified than the average run of people. They think you ought to wear better clothes. We don't, but they think you ought to. They think you ought to live in a better house than a man who works in a factory or a place like that. That is the imagination they have about people in the post office.

That is all I have to say. I would be glad to answer any questions that I can. The main point is that \$1,035 doesn't buy a living, and

we have to work outside in order to buy that living, and our children have got to go to work before they can get an education. We have to take them from school and put them to work in order to get a living.

STATEMENT OF MR. J. E. WILSON, BALTIMORE, MD.

Mr. WILSON. In response to your request for information concerning the laborers' salary of the post office: We, the representatives of the Post Office Laborers' Association of Baltimore, have stood the ordeal through the great struggle during the great war, and as laborers and faithful servants stood as loyal as though we were in the trenches. While we did not get into the trenches, many of us wanted to do so. We felt that it was our duty to stick to the task that was ours.

While men of all ranks left the service to go to other service to get better pay we stayed and did what we could to back up the boys in the trenches. And we are here, honored gentlemen, to plead with you hoping that you will take under consideration the high cost of living. We find it impossible for us to live and maintain our families on the salary we are now getting.

For instance, here is a family of three, and the cost to maintain this family for a year—

Board.....	\$1, 040. 00
House rent.....	300. 00
Car fare.....	43. 80
Shoes.....	52. 00
Insurance.....	100. 80
Fuel.....	100. 00
Clothing.....	150. 00
Total.....	1, 786. 60

We now ask honored gentlemen, as laborers in the Post Office Department, that we be given 50 per cent more on our present salary of \$1,035 per year.

Mr. ROUSE. How much of a family have you, Ed?

Mr. WILSON. Three. It is my family that is referred to in the brief.

Mr. MOON. Where do you get the extra money you say in your brief you need?

Mr. WILSON. My dear wife has worked so hard that she is now under the doctor's care, trying to help meet these demands. In Baltimore, where we used to get round steak or a roast for 15 cents a pound, we now have to pay 60 cents. It has gone up 300 per cent, flour has gone up 200 per cent, fuel, 200 per cent, and this is how we come to join in asking you to try and give us an increase of 50 per cent.

STATEMENT OF MR. M. HASKIN, BALTIMORE, MD.

Mr. HASKIN. I haven't much to say concerning the matter. I am a delegate from the Baltimore post office.

Mr. MOON. Where do you live? Speak louder.

Mr. HASKIN. Baltimore. Just at this time, with the high cost of living, it has gone far beyond our wages. When Mr. Wilson read

those figures awhile ago, he said three children. I have got seven. You see, it takes more to take care of seven than it does to take care of three. I have five going to school; there is car fare for the two girls twice a day and occasionally for myself, and it is very hard to get along on \$1,035 for a year's work. I have been in the post office for nine years, and I have not lost a day, for sickness or any other cause, and every month I have got my pay regular, but still it is impossible for me to get along.

Mr. ROUSE. How much do you think you ought to have?

Mr. HASKIN. To justify me in living and living decent? Well, not decent, but as well as I can expect, I would say not less than \$1,400 a year to compensate me and keep my family.

Mr. MOON. What do you do now?

Mr. HASKIN. A laborer.

Mr. STEENERSON. What kind of labor?

Mr. HASKIN. I dump sacks and I clean up and help to dispatch; carry mails to the car.

The CHAIRMAN. Carry sacks?

Mr. HASKIN. Yes, sir; I carry sacks.

Mr. ROUSE. Do you distribute any?

Mr. HASKIN. No, sir.

Mr. STEENERSON. Do you do facing?

Mr. HASKIN. Yes, sir.

Mr. ROUSE. Do any of the laborers do any distributing?

Mr. HASKIN. No, sir; not that I know of.

Mr. STEENERSON. What kind of facing do you do?

Mr. HASKIN. Fourth class.

Mr. STEENERSON. Papers and parcels?

Mr. HASKIN. Yes, sir; and parcel post.

Mr. ROUSE. How much of that work do you do?

Mr. HASKIN. I do it continuously, right along.

Mr. ROUSE. I mean how much of this facing do you do?

Mr. HASKIN. In the morning; the first thing in the morning.

Mr. STEENERSON. A couple of hours a day?

Mr. HASKIN. About that; yes, sir.

Mr. ROUSE. That is clerk's work, isn't it?

Mr. HASKIN. If they can get laborers enough it might be laborer's work.

Mr. ROUSE. You mean if they are short of clerks, don't you?

Mr. HASKIN. Yes, sir.

Mr. ROUSE. Have you always done that work during the seven years you have been in there?

Mr. HASKIN. Only recently, since the laborers got scarce.

Mr. STEENERSON. You mean since the clerks got scarce, don't you?

Mr. HASKIN. Yes, sir; since the clerks got scarce. I am satisfied that to live as I should live, I should have \$1,400 a year.

(Whereupon the committee adjourned at 3.30 p. m.)

POSTAL SALARIES.

SATURDAY, JANUARY 3, 1920.

JOINT COMMISSION ON POSTAL SALARIES,
Atlanta, Ga.

The commission met at 10.30 a. m. at the Piedmont Hotel, the Hon. Thomas M. Bell, presiding.

Present, Senators Moses and Sterling and Representatives Bell and Steenerson.

Mr. BELL. Ladies and gentlemen: You are all doubtless aware of the object of this commission. We are glad to meet you people. We are proud to see the faces of so many intelligent people. When we say intelligent people, we mean that. We do not mean to flatter you, because that would be equivalent to calling you fools. Every man knows his own ability; every man knows his own worth; every man knows his relative position to mankind, to church and State. No man is ever deceived in himself. He may deceive others and others may deceive him, but he is not deceived in himself.

This joint commission, authorized by Congress, is for the purpose of investigating salaries in the Postal Service and the making of a report to Congress by which we might enable you to get proper increases in compensation. I believe the other members of this commission agree with me that a majority, if not the whole, of the postal employees are entitled to increased compensation.

I am proud, so far as I am concerned, that we have had so little kicking, as you might call it, from the postal employees. Less, in my judgment, than from any other people in the country. I have seen no indication on the part of the postal employees and the postmasters in the United States to strike. I am glad of that. I am proud of that, and I commend you for your action in that respect. I regret to say that we had more men engaged in strikes during the war than we had men at the front fighting. That is a deplorable condition, a condition that must change sooner or later and that, I believe, is something we all agree upon.

This commission has undertaken a stupendous work, the biggest work, no doubt, of any commission ever appointed by Congress. We are to deal and are dealing with more than 200,000 postal employees in the United States. That is no little job. We work without compensation—and I think that is right, too. I do not like paid commissions, especially where there is no limited time within which it must report.

We have some distinguished northern and western men on this commission. I have found them very agreeable, very reasonable, very fair, and I believe they are as close to the postal employees of the country as anybody else. I am glad to have them here with me to see the "Sunny South" on a cold day. (Laughter.) I am

glad that they can get a glimpse of Georgia—the greatest State in the Union, of course. (Applause.) And I am glad to have them meet the good people of this part of the country to show them the character and class of men and women we have here, the brave men and the pure women of the Empire State of the South.

Our time is limited, I am sorry to say. I wish we had more time to give you, but we have only to-day to hear you and we will, of necessity, be obliged to limit the time of each speaker. We want to give you as much time as we can, but we must leave here this afternoon for New Orleans. I believe you have representatives selected for the different branches of the service to present your claims, but that doesn't prevent you from filing briefs, or any statement you may wish to make. They can be filed with Mr. Beasley, the secretary of the commission, and will go into the record of the hearings.

I believe the first on the list is a representative of the clerks, Mr. William Brown, of Birmingham, Ala., who has, I believe, arranged for the length of time he will talk. The clerks of that State, I believe, have eight minutes and, of course, if Mr. Brown takes up the entire eight minutes, the other representatives will be cut out. If Mr. Brown is present, we will be glad to hear from him.

CLERKS IN FIRST AND SECOND CLASS OFFICES.

STATEMENT OF MR. WILLIAM BROWN, BIRMINGHAM, ALA.

Mr. BROWN. Mr. Chairman and members of the commission: The conditions in Birmingham are pretty much the same as they are at other places.

Senator MOSES. What is your position in the post office, Mr. Brown?

Mr. BROWN. Clerk-distributor.

Mr. BELL. In the post office?

Mr. BROWN. In the post office. The conditions are very much the same in Birmingham as they are anywhere else. We have the high cost of living to contend with, night work, overtime and all those things. We have scheme study. We have to keep up on that, and it is all done on off time with no compensatory time allowed. There is no time allowed for scheme study. It is all done on our own time. We have also a good deal of overtime, which takes up the regular men. Whoever happens to be on duty when they need this overtime work to be performed is called upon to perform this extra duty, and whoever it hits has got to do that extra time. The overtime runs between two and three thousand hours a month.

Mr. BELL. Are you compelled to make that overtime?

Mr. BROWN. Well, if we have anything we want to be off for, they are not hard on us. They are pretty liberal along that line.

Senator MOSES. How many employees are there in the Birmingham post office?

Mr. BROWN. There are a hundred and six clerks in the Birmingham office and stations.

Senator MOSES. Have you had any difficulty in filling places in the office?

Mr. BROWN. We don't seem to have. They have a good many substitutes working around.

Senator MOSES. Are there plenty of applicants to take the examination.

Mr. BROWN. I haven't heard of any. Some take the examinations and don't take the jobs.

Senator MOSES. How many men resigned from the service in the last two years?

Mr. BROWN. During 1918 there were quite a few, but for the last six months of last year there were very few resignations in our office. Possibly two or three, if I remember.

Senator STERLING. What are your hours per day?

Mr. BROWN. We have eight hours, and some of them have a "swing" of two hours, which stretches it over a period of 10 hours. My regular shift is from 7 in the morning until 3.30 p. m., with 30 minutes for lunch.

Senator STERLING. What is involved in the scheme study?

Mr. BROWN. In the mailing division we have three States—Alabama, Georgia, and Mississippi. They require one State a year. That means you repeat every three years. They examine you on these States. It is divided into two sections. You get one the first six months and one the second six months of the year to put up. To put an examination it will require all your spare time for about four weeks to get up on it and prepare yourself to pass the examination. I think they require about 98 per cent to pass the examination.

Senator STERLING. On the average, how much time each day do you spend in that scheme study?

Mr. BROWN. Two or three hours we will spend on the scheme. From two to three hours a day. Of course it is all memory work. You learn some to-day and forget them to-morrow.

Senator MOSES. Have there been any failures to pass the examinations?

Mr. BROWN. In this distribution?

Senator MOSES. Yes.

Mr. BROWN. They try at times, and if they fall down the first time they go back and study some more and try again. They may make possibly two or three attempts at it. There has been no one put out of the service for failure.

Senator MOSES. Have there been any failures to receive promotions?

Mr. BROWN. None that I know of.

Senator STERLING. But that study is absolutely necessary?

Mr. BROWN. If a man is working in the mailing division, if he don't know the distribution, he is of very little service to the post office. He has got to know this distribution. He has got to know how to put it in the right place as it comes to him. In working out the different trains, we have to know the different routes, where it makes the best connections and the best time. You have to know all that as soon as you look at a letter.

Senator MOSES. There has been a great industrial activity in Birmingham in the past few years, has there not?

Mr. BROWN. Yes. All the manufacturing plants have been running to full capacity.

Senator MOSES. Their scales of wages are higher than those in the post office?

Mr. BROWN. I am acquainted with a machinist in the United States Steel mill there who gets 78 cents an hour. They work him 10 hours a day and for all over 8 hours he gets time and a half.

Senator STERLING. How long has he been getting that 78 cents an hour?

Mr. BROWN. He just left a railroad shop and went to the steel plant. He works 10 hours and gets 11 hours' pay.

Senator MOSES. He is a journeyman machinist?

Mr. BROWN. Yes. He is a machinist. That is his trade. He is a mechanic. Blacksmiths, boilermakers, and all that are pretty much on the same basis from all I can learn. Carpenters get about 70 or 75 cents an hour in our town. Plumbers, of course, are higher than anybody else all the time.

Senator MOSES. You think there have been very few resignations from the office in the last year.

Mr. BROWN. There were more the first six months. I do not think there have been more than three in the clerical force in the last half of the year. They are all hanging on and living in hope.

Mr. BELL. The emergency bill we passed some time ago had something to do with that, I dare say.

Mr. BROWN. It relieved them at the time, but living is going up. It increased in our town about 4 per cent in the month of November. In a couple of months that will be all used up again in the cost of living. Most of our men have families and have little jobs on the outside that they work at after they get through or before they start.

Mr. STEENERSON. Are the clerks well satisfied with the administration of the office as it affects promotions, or is there any complaint there about promotions being unfairly made?

Mr. BROWN. Well, there is not a great deal. Awhile back we had a case. There was a vacancy there and a former carrier had a chance for the place, but they brought in a man from the inspector force and made him superintendent of the carriers. A lot of the boys didn't like that, but that is all over now.

Mr. STEENERSON. But generally they are satisfied that they have been treated fairly in regard to promotions?

Mr. BROWN. I believe they are.

Mr. STEENERSON. Promotions are based on their records, I suppose.

Mr. BROWN. Yes.

Mr. STEENERSON. They are kept by the supervisory clerks?

Mr. BROWN. Yes. I haven't heard any complaints about the way promotions have been made or about who has been receiving the promotions.

Mr. STEENERSON. Or the manner in which the supervisory clerks keep the records?

Mr. BROWN. As far as the records are concerned, we do not know what they are. I haven't seen mine since I have been in the maximum grade of \$1,200 and I reached that grade seven or eight years ago.

Senator MOSES. How long have you been in the service?

Mr. BROWN. Since 1907. I worked for a little while in the Railway Mail Service.

Senator MOSES. What are you receiving now?

Mr. BROWN. \$1,650.

Senator MOSES. That includes the recent increase?

Mr. BROWN. That is all told.

Mr. BELL. We are much obliged to you, Mr. Brown, for your statement.

Mr. Brown submitted the following brief:

BRIEF SUBMITTED BY MR. BROWN, BIRMINGHAM, ALA.

LEGISLATION DESIRED BY THE POST-OFFICE CLERKS OF ALABAMA.

1. There should be three grades of salaries—an entrance salary of \$1,800 and a maximum salary of \$2,400. Special clerk grade should be restored, so that efficiency can be rewarded.
2. The establishment of a court of appeals in order to insure fair and impartial trials, the judges to be appointed by the Justice of the United States Supreme Court.
3. Seniority should govern in the making of promotions, everything else being equal. New clerks entering the service should be required to work six months as distributors in either the city or mailing division in order to give them a general knowledge of mail service.
4. Clerks who are required to put up distribution to routes, study of schemes, and train schedules should be paid according to amount of time consumed and the amount of distribution required.
5. Time off for Sunday should be mandatory and the rate of overtime should be based on the number of working days in each month. Time and a half for overtime. Six hours night work equal to eight hours daywork.
6. That 30 days' annual vacation with pay and 30 days' sick time with pay be granted postal employees.
7. That the committee recommend a retirement measure for postal employees—Sterling-Lehlbach measure preferred.

Mr. BELL. The next speaker is Mr. William Harrison.

Mr. HARRISON. I yield my time, Mr. Chairman, to Mr. Deacy.

Mr. BELL. We will then hear from Mr. D. J. Deacy.

STATEMENT OF MR. D. J. DEACY, TUSCALOOSA, ALA.

Mr. DEACY. I represent the entire force of our office—clerks, carriers, rural carriers. Mr. Chairman, Senators, and Representatives, I know the time is brief and I will endeavor to be brief. I am not prepared to make an argument. In fact, this time was allotted to me owing to the absence of one who should have been here. I think it is very patent to this honorable commission that the service, or the men in the service, demand that they should receive a just and adequate compensation, and may I not be permitted at this time to call your attention to the Congressional Record and the arguments made during the consideration of this \$150 legislation.

Mr. Newton, of Minnesota, asks this question: "Are men leaving trades now to go into the Postal Service?" No! But skilled postal employees are leaving the Government service to accept private employment. That is true the country over.

And again:

Mr. Speaker, I believe that the people of this country expect the Government of the United States to pay its employees an adequate wage, certainly not less than what this same man, under similar working conditions, could receive from a private employer.

Just one more:

Mr. DYER. It is not at the recommendation of the Postmaster General and I believe if we should vote here to increase the pay of these employees \$500 instead of a hundred and fifty, that the President would veto it upon the recommendation of his Cabinet officer, the Postmaster General * * *. We are doing something to help a class of people who have been badly neglected and mistreated and whose pay is far below what it ought to be to give them a decent livelihood.

Now, conditions in our office, gentlemen, are quite different, perhaps, from the general run of post offices. Our post office is of the first class and is a central accounting office for three counties in west Alabama. On the 1st of January three additional post offices have been added to that office for central accounting—Sumter, Green, and Bibb Counties. The acting postmaster has asked for an increase in the clerical force, but it has not been allowed him, and it is nearly four years now since an additional clerk has been given to that office. We have had during that period of time I think four separations from the service—men who have resigned. I only need to mention the last one, who resigned from the carrier force to accept a position in the railroad shops as a laborer in the car department, where he received 45 cents an hour.

Senator MOSES. Was that prior to this recent increase?

Mr. DEACY. Yes, sir.

Senator MOSES. He was then getting 40 cents?

Mr. DEACY. Yes, sir.

Senator MOSES. In the Postal Service?

Mr. DEACY. Yes, sir.

Senator MOSES. He would get 60 cents now, under the new bill?

Mr. DEACY. He wasn't a substitute; he was a regular carrier.

Senator MOSES. How long have you been in the service?

Mr. DEACY. Nearly 18 years.

Senator MOSES. How many clerks are there in the Tuscaloosa office?

Mr. DEACY. Fourteen.

Senator MOSES. What are the receipts of the office; do you know?

Mr. DEACY. Something around \$60,000. Now, our duties in the office: The duties pertaining to my position, particularly, are most everything. We are required to put up a scheme examination of the State of Alabama; we have also to study distribution and are called upon to perform every service in there. The position I am on and the man who works opposite me calls for our working every other Sunday. The men in the railroad shops or any other employment that work on Sunday get time and a half. We are only allowed a straight salary according to the salary we receive for that month.

Senator MOSES. How much are you now receiving?

Mr. DEACY. Fourteen hundred and fifty.

Senator MOSES. All told?

Mr. DEACY. Counting the hundred and fifty increase.

Senator MOSES. After 18 years' service?

Mr. DEACY. After 18 years; and I want to call your attention to what we consider an injustice. There is a man in the service now who has worked a third less number of years than I have who was a carrier, and on account of this increase by percentage he became the "percentage carrier." He was transferred to a clerk's position and is receiving now a hundred dollars more per year than I am. You readily understand how that was. There were so many—a certain percentage of the clerks and a certain percentage of the carriers—entitled to a hundred dollars raise. He became the percentage carrier and carried that into the office and now ranks over the men who have been in the service for 18 or 20 years.

Senator MOSES. Have you any definite suggestion as to what the salaries should be?

Mr. DEACY. The maximum and minimum?

Senator MOSES. Where they should start and where they should end.

Mr. DEACY. Well, I should think that under the requirements of the postal service—what a man is expected to do and the goods he is expected to deliver—that his salary should be nearly seventeen hundred.

Senator MOSES. As the maximum?

Mr. DEACY. No; the minimum.

Senator MOSES. You mean the entrance salary?

Mr. DEACY. Yes; entrance salary; and we believe it ought to go to \$2,400. You must understand that the operation of the post office doesn't depend so much on the supervisory positions and the postmasters who, with all due respect, are sometimes nothing more than a figurehead—men who hardly know the color of a 2-cent stamp.

Senator MOSES. What is your postmaster's salary?

Mr. DEACY. Thirty-one hundred.

Senator STERLING. What is the population of your town?

Mr. DEACY. About 20,000.

Senator STERLING. What industries have you there?

Mr. DEACY. Coal mines, iron furnaces, and then we have a tremendous volume of business from the lumber district. We also have the State University and the State institution for the insane.

Senator STERLING. What do the men working in the iron furnaces get?

Mr. DEACY. What do they get?

Senator STERLING. Yes; what are their salaries?

Mr. DEACY. Of course their salaries vary according to the duties performed.

Senator STERLING. Well, the average compensation?

Mr. DEACY. They average around about the same as the railway employees there, which is close around \$260 to \$280 a month.

Senator STERLING. Per month?

Mr. DEACY. A month; yes, sir. The men in the shops make that and the lumbermen make the same thing—that is, the mechanics working around the lumber industries.

Senator MOSES. What effect do you think a retirement bill would have on the general situation?

Mr. DEACY. Well, we are very much in favor of it. And these other things—this little dross of gold—which you have handed out, we are very grateful for it—that is, the \$150. We are hoping for a betterment of our condition by your commission and also the enactment of a permanent retirement bill. That alone, in my opinion, is what has kept men in the service. We feel there ought to be something of this nature. We do not object to some form of contribution on the part of the clerks, provided that the Government will give us a sufficient amount of money to meet this requirement. It would hardly be fair or satisfactory to us were we required to contribute to a retirement fund when we are receiving inadequate compensation at this time.

Senator STERLING. Would you deem a contribution of one-half on the part of the Government and one-half on the part of the employees a reasonable plan?

Mr. DEACY. Well, if the compensation was forthcoming, I do not think we would object to it. We couldn't do that under the present salary we are receiving. It would be an utter impossibility. I can truthfully say that in order to keep up our life insurance—which we ought to do, and every man who does not provide for his dependencies in some form or other, whether by retirement or life insurance, I think is committing a crime—it will be found that we have to borrow money to pay up our life insurance policies.

There is another thing, and that is our contention for a court of appeals. We in the postal service do not think it right or fair that the First Assistant Postmaster General, or the postmaster, or any other one official should be the court of last resort on any complaint we might have to file with them, and if you will pardon the personal reference, I want to cite a case I was the victim of. I have every scrap of paper pertaining to this particular case, and some day I hope that this generous Government, which I have endeavored to serve with honor to both myself and the Government, will right a wrong that has been unjustly imposed upon me.

In a change of postmasters in our office at one time some years ago, after I had served for something over eight years, the office force was reduced on the recommendation of a post-office inspector. One clerk in the office there, who was a junior clerk, was recommended to be reduced to senior substitute. The recommendation of the post-office inspector was held up and I was designated to be reduced to that position. I appealed to the Postmaster General, who was then Mr. Hitchcock, and my case was referred to the First Assistant Postmaster General, and I received no satisfaction whatever.

I remained a substitute for 21 months, and during that time several offers were made to me, through his office, of transfers to several designated cities, or, using his own words: "To a vacancy in any post office in the United States to which I might wish to transfer." I told him I was there with my people and there also I elected to remain, and after 21 months I was restored to my former position and salary. I had no appeal whatever, and that is just one case out of thousands. There was no one to give me any redress and I had to submit to the injustice imposed upon me.

Mr. BELL. What kind of a tribunal would you suggest to refer such matters to?

Mr. DEACY. Mr. Chairman, you have that in your own courts, and while I am very poorly versed in law, I know that if I am aggrieved at a decision in our justice's court, I can take it to our county court of appeals, and if they don't give me what I think is justice, I can take it to the State court of appeals. I believe there should be a commission appointed by the Government which would incorporate or include therein one man from the Postal Service, as a representative of the postal employees—whether he be carrier or clerk, it makes no difference to me. I think they are all good fellows and all alike. There should be a representative there who would look after our interests as well as the Government's interests. As it is to-day the final disposition of all such matters goes to some department of the Postmaster General's office and we have absolutely no appeal from his decisions.

Senator STERLING. How would a board of appeals within the department itself suit you, instead of a decision resting on a single individual official—the department to have a board of appeals to which the cases could be referred.

Mr. DEACY. To be composed of whom?

Senator STERLING. Well, the head of the department, perhaps, to begin with, but it would be a permanent board.

Mr. DEACY. Oftentimes these heads of departments are not men who are practical men. Oftentimes they know nothing at all of the operation of the Postal Service, and while they might be first-class officials theoretically, from a practical standpoint they would be absolutely ignorant of the conditions existing. Whereas, a clerk or carrier, or a man who has served as a clerk or carrier, knows the actual conditions which exist.

Senator STERLING. I simply thought of that in connection with the board of appeals, for example, in the Interior Department—a board of review, perhaps.

Mr. DEACY. Well, if the board was composed of men who knew the conditions, of course, we could expect justice from it.

Senator MOSES. You mean men who know the conditions of the service in the field.

Mr. DEACY. Absolutely. Yes. It would be the same proposition of appointing a business man—no matter how big a business man—postmaster of Atlanta. He would be in the way, so far as the operating condition of that office is concerned. No matter how big he was. We have a condition confronting us in our post office. Our postmaster resigned on the 15th of August and we have had no appointment since that time, and I have jocosely remarked to several of the applicants, who are friends of mine, that I hoped they would not be appointed during the Christmas season, because they would simply be in the way of the postal employees. We feel that a commission of that kind would be the same thing. They would be in the way so far as knowing the exact needs and conditions of the men in the service.

Mr. STEENERSON. Still, all postmasters are appointed under civil Service.

Mr. DEACY. Well; that's what they say. [Laughter.]

Mr. STEENERSON. It seems to me if you can't get competent men under civil-service examinations, it is impossible to get them.

Mr. DEACY. We have a vacancy existing in our post office to-day. Our postmaster resigned on the 15th of August. The assistant postmaster was appointed acting postmaster. I spoke to our Congressman about the appointment of the acting postmaster, who was the assistant for 9 years. I asked him to indorse him for the position, adding his indorsement to the indorsement of every clerk and carrier in our office, and he told me that he did not believe in a law, or that he would not be in favor of a law that would restrict the appointment of postmasters to men in the service.

Mr. STEENERSON. You advocate that postmasters should be appointed from the men in the Postal Service?

Mr. DEACY. Without any question.

Mr. STEENERSON. Do you think in addition to getting competent postmasters, it would have a good effect on the personnel of the service?

Mr. DEACY. Certainly. I think there is just as high intelligence in the Postal Service. The Government expects it, demands it, and gets it.

Mr. STEENERSON. You think it would stimulate the rank and file because they could see that the road was open to the highest promotion from the ranks?

Mr. DEACY. May I answer that by asking this question? What inducement does any intelligent man have for remaining in the service? There is a condition that exists in our office to-day, a man who has served in every department, has acted as postmaster for nine years, on account of the death of a former postmaster, and he has handled the entire business for nine years as assistant postmaster and then for an outsider, a stranger to the service, a man who has rendered no service at all to the Government to be appointed over him leaves absolutely no incentive, gentlemen, to a man of intelligence to enter the service. And you can not expect, gentlemen, to keep up this morale, this intelligence you demand, and which I claim exists in the Postal Service, until you give these men the opportunity to become postmaster, if they fit themselves for the position.

Mr. STEENERSON. There was one thing I want you to explain a little more and that is about the operation of the salary-increase law. You say that a clerk junior to you was given a hundred dollars more than you?

Mr. DEACY. Yes, sir.

Mr. STEENERSON. How do you explain the operation of that?

Mr. DEACY. He was a carrier. Under the old law, there was 50 per cent—

Mr. STEENERSON. The automatic promotion law?

Mr. DEACY. The automatic promotion law.

Mr. STEENERSON. That was varied. Sometimes 50 per cent was required; 85 per cent was the last, I think.

Mr. DEACY. I will make that plain to you. One carrier in our office was entitled to an increase of a hundred dollars over the others. After they attained the maximum salary of \$1,100. That was the maximum salary.

Mr. STEENERSON. Eleven hundred was the maximum?

Mr. DEACY. Eleven hundred was the maximum, and then they passed another law, whereby a percentage of the clerks was entitled to an additional hundred.

Mr. STEENERSON. By promotion.

Mr. DEACY. By promotion, and this one carrier being the percentage of the carriers in that office he received that \$100. After he was transferred into a clerical position he carried this promotion with him and with it he carried the \$1,200 over the \$1,100 which we were getting at that time until our office became first class and we all received an additional \$100 on account of the reclassification of the office, which would entitle all the eleven-hundred-dollar men to twelve hundred, and instead of him being a twelve-hundred-dollar man he would be a thirteen-hundred-dollar man and he has carried that all the time.

Mr. STEENERSON. Well, how did that operate in your case? You didn't get your hundred?

Mr. DEACY. Oh, yes; I got mine, but he was a hundred over me. He carried it with him.

Senator MOSES. In other words, he lost nothing by his transfer.

Mr. DEACY. He lost nothing by his transfer. We had one clerk also in our office who had this preferred classification.

Mr. STEENERSON. You contend that this is an inequitable result?

Mr. DEACY. I think so.

Mr. STEENERSON. And that it is the duty of this commission under the statute to readjust postal salaries on an equitable basis?

Mr. DEACY. Yes, sir.

Mr. STEENERSON. And to do that we have to look out for such cases?

Mr. DEACY. Yes, sir. I don't think he should be brought down to our level. We would much prefer going up. [Laughter.]

Mr. BELL. Thank you, Mr. Deacy. The next speaker is Mr. Lloyd A. Wood.

STATEMENT OF MR. LLOYD A. WOOD, JACKSONVILLE, FLA., REPRESENTING THE POSTAL CLERKS OF THE STATE OF FLORIDA.

Mr. BELL. Mr. Wood; may I ask if you are to take the entire time of Florida? Will you take the entire 8 minutes, or is that to be divided?

Mr. WOOD. I have the privilege of representing the entire State.

Mr. Chairman and gentlemen of the commission, the conditions confronting the Florida post-office clerks are much the same as for all other sections of the country, and I am filing with your secretary for your later consideration data gathered from about 20 different offices representing every section of the State of Florida. This data and information shows that the conditions are not merely local to any one or two offices of the larger class, but extend into the smaller first and second class offices as well. Now, the post-office clerks, having all the facts before them, find that they are in unequal competition with the commercial and industrial workers of the State; that their working conditions are also unfavorable as compared with other Federal departments, and, above all, the increased cost of living, which is the main item, coupled with these other considerations is causing dissatisfaction among clerks of the various offices. These combined conditions have resulted, and are resulting, in a large percentage of the clerks leaving the service. The result, consequently, is a depreciated service rendered to the public. Merely to give you a specific example, we will take the office of Jacksonville, Fla.—

Senator MOSES. Is that your office?

Mr. WOOD. That is my home office; yes, sir. In the fiscal year 1918-19 over one-third of the entire clerical force resigned, left the service, and at the present time about 55 per cent of the entire clerical force at Jacksonville, Fla., are in the two entrance grades of salary.

Senator MOSES. Just a moment. In other words, the resignations were all from the higher grades.

Mr. WOOD. Largely so; yes.

Senator MOSES. What occupations do these men go into?

Mr. WOOD. Into various lines of industry. Some into the ship yards; others engage in business; others as employees of various commercial concerns. Some of them merely resigned and went back on the farm.

Senator MOSES. Those men who went into the ship yards have, of course, now lost their jobs?

Mr. WOOD. Yes, sir.

Senator MOSES. Are they trying to get back into the service?

Mr. WOOD. I haven't heard of any. The ship yards are still working there, some of them.

Senator STERLING. How many clerks are there in the office at Jacksonville?

Mr. WOOD. Ninety-one regular and 8 special; a total of 99 clerks. The particular office conditions that cause dissatisfaction to clerks are, first, perhaps, the large amount of scheme study required in some of the sections of the office. That, together with the Sunday and holiday work, and the fact that there is no time differential for labor performed at night and low salaries. In nearly all industries there is a difference in the rate of pay for night work or a difference in time over that performed in the daytime.

The amount of scheme study in the mailing and city divisions requires a clerk to devote an average of several hours daily to the memorizing of the different facts. In the mailing division he has to learn the location of several thousand post offices, or, if he is in the city division, he has to memorize a scheme whereby he learns the location of all the principal business firms and become familiar with the city as laid out by blocks and carrier districts——

Senator MOSES. Do you mean to say that every day in the year he has to be studying these schemes?

Mr. WOOD. A clerk to keep up to date and efficient must be constantly studying.

Senator STERLING. Just what is your position in that office? I don't think you stated.

Mr. WOOD. I am a clerk in the mailing division.

Senator STERLING. How long have you been in that position?

Mr. WOOD. I have been in that position for three years at Jacksonville.

Senator STERLING. Had you been in the post-office service elsewhere prior to your service at Jacksonville?

Mr. WOOD. Yes, sir.

Senator STERLING. Whereabouts?

Mr. WOOD. Johnson City, N. Y. I entered the service nine years ago.

Senator STERLING. And what pay are you getting?

Mr. WOOD. \$1,650.

Senator STERLING. That includes the increase?

Mr. WOOD. Yes, sir; the temporary increase at the present time. During the same period that we have been receiving a temporary increase amounting to about 35 per cent the cost of living, as shown by various statements from different parts of the State, has increased on an average of 135 per cent. Workers in other lines of industry have received increases varying from 50 to upward of 150 per cent in some cases. Naturally, of course, the outside positions become attractive to the men in the service. In order to rectify these conditions, the clerks of the State have prepared a brief for your consideration in which they ask for a minimum entrance salary, to be not less than the minimum living wage as fixed by the Department of Labor, with regular increases to a maximum salary of \$2,400.

Senator MOSES. How much?

Mr. WOOD. Twenty four hundred.

Mr. STEENERSON. What is your minimum?

Mr. WOOD. At the present time it would be about \$1,800. In addition thereto, they ask for two special grades of clerkships, at twenty-five and twenty-six hundred dollars, to be awarded clerks for special efficient and faithful service.

Senator STERLING. Now, would that mean any clerks in any departments, mailing division or elsewhere?

Mr. WOOD. That would mean that any clerk would be eligible for the special grade whose faithfulness of service, his general efficiency, and his high standing in the service would warrant the recommendation of the postmaster.

Senator MOSES. You mean, of course, after he had gone through all the regular grades and had reached the maximum, that he might be promoted to be a special clerk at a special salary?

Mr. WOOD. Yes, sir.

Senator MOSES. Wouldn't that contemplate a time, in some offices, where every clerk would be a special clerk with a special salary?

Mr. WOOD. No; not necessarily. In addition, we recommend that 45 minutes constitute an hour's labor from 6 p. m. at night until 6 a. m. in the morning; that we be allowed time and a half compensatory time, or time and a half pay, for Sunday and holiday work for overtime in excess of 8 hours in 10; that we be allowed compensatory time for scheme study, since the post office is the only business we know of where a man is required to take work home and learn, and where he receives no consideration for such study. For that reason we make the recommendation that we be allowed either compensatory time or pay for scheme study.

In addition, to take care of local grievances, we ask that a board of appeals be created to review cases where employees believe there has been unjust discrimination.

Mr. BELL. Mr. Wood, how much time is absolutely necessary, in your judgement, for scheme study?

Mr. WOOD. It depends somewhat on the amount of schemes a clerk is assigned to. It has been my experience, when engaged on scheme study, that it took me an average of not less than an hour a day for scheme study.

Mr. BELL. But the longer you are in the service the less time it takes, doesn't it?

Mr. WOOD. The longer you are in the service and the more experienced you become, the easier it becomes for you.

Senator MOSES. You were a clerk in Johnson City, you say?

Mr. WOOD. Yes, sir.

Senator MOSES. Up until when?

Mr. WOOD. June, 1916.

Senator MOSES. And then you went to Jacksonville?

Mr. WOOD. Yes, sir.

Senator MOSES. And you went into the Postal Service immediately?

Mr. WOOD. Yes, sir.

Mr. STEENERSON. Transferred, I suppose.

Senator MOSES. Were you transferred, or did you go there voluntarily?

Mr. WOOD. I was transferred upon my request in an exchange of positions.

Senator MOSES. You evidently thought the post office had some attractions, or you wouldn't have gone into it voluntarily when all this industrial activity was going on.

Mr. WOOD. I went in nine years ago.

Senator MOSES. I mean in 1916.

Mr. WOOD. My work in the Postal Service is of such a nature, starting at the age I did, that it almost wholly unfits me for work outside of the service. Before that I was a teacher in the public schools. Wages in that line are lower even than in the Postal Service.

Senator MOSES. I taught school. I know that. What I was trying to find out was why, in 1916, at the time you made this transfer and this industrial activity in the country had begun, and these places were open in other lines you went back to the Postal Service. You must have found it attractive or you wouldn't have stayed. You then set up the fact that your position practically unfits you for anything else, and yet earlier you had told us that 33 per cent of the men had gotten out.

Mr. WOOD. Most of the men who resigned were men who entered the service with a knowledge of some other line, which enabled them to earn greater wages on the outside. Even common labor received greater pay than did the average post-office employee.

Senator MOSES. Is it your observation that men who stay in the service so long become so wedded to it and so saturated with it that they are unfitted for other service?

Mr. WOOD. It is my observation that close application to the service does unfit him for other service. Whether the work becomes attractive to him or not, it is certain that long service unfits him for other work.

Senator MOSES. Would you assume that the application which a man has given to the Postal Service in producing the results you have named should be an element to be considered specially in classifying the Postal Service?

Mr. WOOD. I do.

Senator STERLING. You say you represent all the post-office employees in your State?

Mr. WOOD. All the clerks in the State of Florida. Briefs have been prepared by offices in all parts of the State setting forth the conditions in the different offices in the State.

Mr. BELL. You have filed these with the commission?

Mr. WOOD. With the secretary; yes, sir.

Mr. STEENERSON. You said a while ago you thought there was more scheme study than necessary.

Mr. WOOD. No. Scheme study is absolutely necessary to the conduct of the post-office business.

Mr. STEENERSON. But your contention is that that should be on the Government's time and not on your own time.

Mr. WOOD. Yes, sir.

Mr. STEENERSON. Well, do you think that men engaged in private enterprise would do that? Don't they all study their business, more or less, when they are off duty? Take a doctor or a lawyer. He doesn't confine his study to business hours, to the hours he keeps his office open, does he?

Mr. WOOD. Not if he is conducting his own business, for his personal interests.

Senator MOSES. Well, Mr. Wood, you and I have been both school teachers. I do not know whether it obtained in all cases, but in mine I generally had to put in some night work getting ready for the next day's classes.

Mr. STEENERSON. Undoubtedly I think that would be true of a man who simply teaches a school.

Mr. WOOD. The amount of overtime and the amount of scheme study makes the 8 hour in 10 day which we now have extend over to a 9 or 10 hour day, and unless he does continue to do that scheme study outside of his regular work he can not continue to hold his position.

Mr. STEENERSON. But it does seem to me reasonable to expect that he would devote some time to his business outside of the hours he works. Everybody else does that; the merchant, the mechanic—he doesn't forget all about his daily task when the hours are over; but it may be that you are right.

Mr. WOOD. I will yield to the next delegate as my time allowance is up.

Mr. BELL. From your State?

Mr. WOOD. No; I know of no more from our State.

Mr. Wood filed the following brief:

BRIEF SUBMITTED BY MR. LLOYD A. WOOD ON BEHALF OF POST-OFFICE CLERKS OF THE STATE OF FLORIDA.

The post-office clerks of the State of Florida respectfully submit this brief for your consideration:

In 1908 the salaries of post-office clerks were established in grades ranging from \$800 to \$1,200 per annum, and two special clerk grades of \$1,300 and \$1,400. From 1908 to 1918 there was no increase granted to clerks, with the exception of a small per cent who were each year promoted to the special grades. However, each year from 1908 to 1919, inclusive, there was an increase in the cost of living which was very marked during the years 1914 to 1919, inclusive. As shown by the report attached to this file from every section of Florida this increase is shown to be upwards of 100 per cent in all of the necessities of life.

On July 1, 1918, the clerks received an increase, or bonus of \$200, and on July 1, 1919, they received an increase of \$100 and on October 1, 1919, a still further temporary increase, varying from \$150 for those in the highest automatic grade to \$200 for those in the entrance grade.

In other words, the salary increases from 1908 to date have been about 28 per cent, almost wholly temporary in character. This as you will note leaves upward of 72 per cent increase in living cost yet to be taken care of by salary increases.

During the last five years the life of the postal employee and that of his dependents has been one of the greatest sacrifice and self-denial. During the period of the war the clerks made little or no complaint as they believed these conditions to be simply incidental to the war, but now that the war is ended and prices still continue abnormal they feel that this commission should correct the inequalities existing between the compensation they receive and the cost of living.

The salaries of postal clerks do not compare at all favorably with those of private industries. This has resulted in a very high percentage of resignations from the service, with a corresponding decrease in efficiency of service rendered the public. The work of the post office clerk must be exact and he is required to work under conditions that the average employee of private enterprises would never consent to.

Perhaps one-half of all the work of post-office clerks is performed at night. In many employments a wage difference or a time differential is made in behalf of the men who work at night.

Clerks are required to study schemes during the hours when they are off duty. This study commences when they enter the service and continues as long as they remain, and they are required to pass satisfactory examinations with a percentage of not less than 95. These examinations cover many thousands of offices. There is no

other business that requires employees to perform work at home for which they receive neither compensatory time or pay.

Nearly all post-office clerks are required to perform Sunday work. A day of compensation is allowed for such work, but this does not alter the fact that clerks do not prefer to labor on Sunday. In other employments there is a wage differential for Sunday work, but in the post office service, the clerk if he desires pay instead of compensatory time he is only paid on the basis of 30 or 31 days to the month.

The financial condition of many of the clerks in the State of Florida has become so acute that many are taking pay instead of compensatory time in order to help provide for the necessities of life. Conditions such as these should be rectified.

Post office clerks are worked harder to-day than ever before. The great growth of the parcel post and steady increase in other classes of mail without an adequate increase in the number of clerks is the prime cause. At this time auxiliary employees (extra employees who have not taken civil service examination) are employed to assist somewhat in relieving conditions. They receive the same pay as a substitute who has tried the civil service examination.

The post-office service is now and has long been regarded as the least desirable branch of the Federal service. This is due to the fact that other Federal departments have vacation privileges of 30 days as compared with 15 for the post office. They also are allowed annual sick leave and their pay averages considerably higher for less arduous duties. We believe these facts should be taken into consideration in determining new rates of pay for post office clerks.

To rectify these conditions and provide an adequate basis of salary the post office clerks respectfully ask this honorable commission to consider the following recommendations:

First. A minimum entrance salary of not less than \$1,600 per annum with semi-annual promotion of \$100 each until \$2,000 per annum is secured; thereafter annual increases of not less than \$100 until a maximum salary of \$2,300 is reached.

Second. The creation of two grades of special clerks with salaries of \$2,400 and \$2,500, respectively, to be granted as a reward for especially efficient or meritorious service.

Third. That a time differential be created for work performed between the hours of 6 p. m. and 6 a. m., during which period 45 minutes shall constitute an hour's labor.

Fourth. Compensation for overtime or Sunday and holiday work shall be at the rate of time and a half compensatory time, or time and a half pay.

Fifth. Post office clerks should be granted identically the same vacation and sick leave privileges as are afforded clerks in other Federal departments.

Sixth. Clerks who are required to put up scheme examinations should be compensated therefor in money at his regular rate of salary, or time allowance should be made for study.

Seventh. Promotions to special clerkship and supervisory positions should be on the basis of seniority, coupled with examination.

Eighth. An unbiased board of appeals should be created to hear and adjust complaints.

Ninth. An adequate retirement law providing for the care of superannuated employees in order that a post-office clerk, after long years of faithful service, shall not become an object of charity simply because he is unable to longer retain his position in competition with younger men in the service.

I believe that all the foregoing will meet with your careful consideration.

Attached hereto is a list of recommendations from the Jacksonville post-office clerks, outlining their needs and the needs of the service as regards reforms in working conditions and increased compensation.

A carefully prepared table on staple articles of food, embracing a total of 57 articles, shows an average increase of about 105 per cent. This average, however, is deceptive, inasmuch as the articles of which there is the greatest consumption have advanced on an average several per cent over the 105 percentage given, and it is only by including articles in which there is not any great demand that the average is brought down. A table of the prices charged by 10 representative firms at Jacksonville for July, 1914, and July, 1919, which embraces 36 articles (on file with the commission), proves conclusively the great advance in the more essential staples. The tables show that the average increase in women's clothing was 172 per cent and in men's about 80 per cent. This table is also not a fair average, as such articles as men's suits and shoes, upon which the biggest percentage of earnings is spent, show increases of upward of 100 per cent and in instances as high as 300 per cent.

The tables show that rents have increased from 37.5 per cent to 220 per cent per month. Household furniture and furnishings show that, in the opinion of leading retail-furniture dealers, the increase has been from 130 to 140 per cent over prevailing 1914 prices. A table of 52 articles will show the actual increase in purchase price.

Amusements show an increase of 100 per cent, railroad fare of about 60 per cent, steamship fare about 90 per cent, and such items as tobacco and confectionery from 50 to 100 per cent.

The attached table on salaries shows an average wage of \$1,193.61 in 1919, as against \$972 in 1914, an increase of around 25 per cent, which does not go far toward offsetting increases like those mentioned above. This increase also includes all overtime, which if omitted would reduce the actual increase to less than 20 per cent.

To show the decreased efficiency of the service which is bound to result from these conditions it is only necessary that you study closely the table analyzing the number of clerks in the different grades. You will see that over one-half of all regular clerks employed are in the entrance grade. This is necessary from the fact that 32 clerks, or one-third of the total force, resigned during the fiscal year ending June 30 in order to secure positions paying sufficient salaries to provide the necessities of life. This table also shows that the carrier force, which is 95 per cent Negro, is receiving average salaries of \$1,333.75, or about \$140 over that of the clerks, which force is 96 per cent white. This condition is only occasioned by the fact that most of the carrier force entered the service many years ago and had reached the maximum grade before the great increases in the price of living took place, and there were fewer resignations.

The plans which they recommend are the result of much study and represent in each case the minimum requirements for which post-office clerks can be expected to render satisfactory and efficient service.

We know that your honorable commission will give this data due consideration, and believe that the recommendations contained therein are a just and equitable basis for solving present post-office conditions.

GENERAL COMMITTEE,
POST-OFFICE CLERK'S CONVENTION,
Jacksonville, Fla., September 18, 1919.

Mr. LLOYD A. WOOD,
Chairman Post-Office Clerks' Convention,
Jacksonville, Fla.

SIR: The general committee of the post-office clerks' convention of Jacksonville, Fla., met in the post-office building, Tuesday, September 16, 1919, at 5 p. m., for the purpose of formulating a definite program of concessions to be presented by you, as our chairman, to the Congressional Commission for the Investigation and Readjustment of Postal Salaries at the hearing to be conducted at Atlanta, Ga., the latter part of this month.

It is the unanimous consensus of opinion of the members of the general committee that the following program represents the most reasonable foundation upon which a satisfactory readjustment of postal salaries and working conditions can be based and this letter is your authority to present these contentions to the Congressional Commission, as representative of the sentiments of the whole body of post-office clerks at Jacksonville, Fla.

1. The minimum salary at which appointments of post-office clerks should be made is \$1,500 per annum.

2. Promotions or increases in salary should be made at the rate of \$100 each after every six months' period of satisfactory service, until \$1,800 per annum is reached. Increases should be granted after that time at the rate of \$100 per annum after each 12-months' period of satisfactory service until—

3. A maximum salary of \$2,300 per annum is reached through automatic increases

4. There should be two grades of special clerks, with salaries of \$2,400 per annum and \$2,500 per annum, respectively.

5. The position and designation of "foreman" should be abolished and the various activities of the office separated into "sections," with active "clerks in charge" to supervise the work. These clerks in charge should be responsible to the superintendents for the efficiency and the individual conduct of clerks under their supervision and any action, disciplinary or otherwise, taken by the superintendent should be taken through the clerks in charge only.

6. The period of time constituted as a day's work for regular clerks should remain as at present—eight hours service to be performed in a maximum period of 10 hours.

7. Compensation for overtime or Sunday work should either be paid in cash at the rate of one and one-half hour's pay for each hour's service, or compensatory time for

actual time consumed in such service; choice of pay or compensatory time to be at the discretion of the clerks, except that compensatory time shall be taken when, or at a period, designated by the department, with the good of the service as the first consideration.

8. Compensation for service performed on authorized holidays shall be the same as for overtime or Sunday service, holiday leave to be alternated between the clerks in each section, on an equitable basis.

9. Compensation for service performed in excess of 8 hours per 24-hour period shall be at the rate of $1\frac{1}{2}$ hour's pay for each hour of such service. Under normal conditions not more than 12 hours, and during the Christmas holiday season not more than 24 hours' overtime or excess service, may be demanded of any clerk during a 6-day period.

10. Post-office clerks should be granted identically the same annual leave privileges as are accorded to clerks in the Post Office Department at Washington, D. C.

11. Post-office clerks should be granted identically the same "sick" leave privileges as are accorded to clerks in the Post Office Department at Washington, D. C.

12. Clerks who are required to put up scheme examinations should be compensated therefor in money, at his regular rate of salary, such remuneration to be based on the average length of time required to learn such distribution schemes.

14. Seniority in filling executive or supervisory vacancies should apply only within reason and as a secondary consideration. Such vacancies should be filled by competitive, practical examination only and appointments made on no other basis than efficiency. The superintendent should be the judge of such examinations.

15. After 20 years' continuous service clerks should have the privilege of retirement with pay at the rate of 50 per cent per annum of the highest salary he has received while in the service; such retirement to be at the option of the clerk, or compulsory by the department if in the interests of good service. Clerks should be protected by insurance, such insurance to be in force after 10 years' continuous service and to become effective upon complete disability or death, the amount to be paid in the event of complete disability to be at the rate of 50 per cent per annum of the highest salary the clerk has received while in the service. These retirement and insurance privileges are to be financed by congressional appropriation and no part of such finances to be deducted from clerks' salaries. The amount of insurance to be paid to deceased clerk's beneficiary shall be an amount equal to the highest annual salary he has received while in the service.

16. Pay for "night" service shall be at the rate of one hour's pay for each three-quarter hour's service, any service performed between the hours of 6 o'clock p. m. and 6 a. m. to constitute night service.

Respectfully submitted.

GENERAL COMMITTEE,
By W. P. BROWNE, JR.,
Chairman.

WILL W. HUNTER,
Secretary.

OSCAR A. WILLIAMS,
FLOYD R. MCKINNEY,
PERCY F. LUDWIG,
WM. C. SCARBOROUGH,
Committee.

Mr. BELL. The next speaker is Mr. E. L. Lee.

STATEMENT OF MR. E. L. LEE, WILMINGTON, N. C.

Mr. LEE. Mr. Chairman and gentlemen, I will take this opportunity to testify that the conditions as spoken of by the other gentlemen obtain in our office, and after I found that I had been selected to come here and tell you of the conditions that we know exist in our section and in our office especially, we drew up a brief setting forth a few expressions of these things that we know from our own experience. We have made an effort to put them plainly. When I knew I was coming here, I undertook to find out about some of these conditions in other places, and I found them to be serious all along the line. We have had considerable resignations from the

¹ Percentage of clerical force by grades: 29.7 in sixth grade; 18.7 in fifth, fourth, and third grades; 51.6 in second and first grades.

service and it has been extremely difficult for the executive heads to secure certified men to fill these vacancies.

Senator STERLING. What is your office?

Mr. LEE. Wilmington, N. C. Not only that, but it has been extremely difficult for the executives in our office to secure temporary help and it is nothing unusual for this temporary substitute help to turn over in 10 days or two weeks. You gentlemen know what it means not to have experienced men in the service.

Senator STERLING. What is the population of your town?

Mr. LEE. I do not know the official census figures. I think it is over 25,000. Since the shipyards have been established at Wilmington, N. C., the population of the city is between 35,000 or 37,000.

Senator STERLING. How many clerks are there in your office?

Mr. LEE. We have 19 clerks. Possibly 20 now. I am stationed at Carolina Shipyard Station, and am not just sure of that figure. There have been one or two appointed recently. I have drawn up a brief and I hope that you gentlemen, when you have more leisure, will give some attention to it.

Mr. BELL. You have filed that with the commission, have you?

Mr. LEE. I have that with me now to file. We have had three or four men to leave the service within a few months. In the Newbern, N. C., office, I learned that five men left the service within four months.

Senator STERLING. Do you know that they left the service because of inadequate salary?

Mr. LEE. They left to better their condition, generally. They left because of inadequate pay, more attractive remuneration, more money in other businesses. In the Rocky Mount office I was told there was only one certified employee at one time.

Mr. STEENERSON. How big was that office?

Mr. LEE. I think the population of Rocky Mount, N. C., is more than ten thousand.

Mr. STEENERSON. And only one man in the service?

Mr. LEE. One civil service man left in the office.

Mr. STEENERSON. You say there was only one man in the service?

Mr. LEE. Only one certified man at that time.

Mr. STEENERSON. And no eligible list?

Mr. LEE. No eligible list. At that time, I think, the postmaster offered his resignation to the department. (Laughter and applause.) In the Fayetteville, N. C., office I asked some of the clerks whom I came in contact with to write and tell me the conditions up there so that I might present it to you gentlemen. I had two letters from men who had been in the office—one, 11 months, and one a greater length of time—which could be filed along with my brief, and they are pitiful appeals. One man had had only two Sundays and one holiday off since he entered the service. That, however, was no fault of the executive officials of that office. That postmaster telegraphed to Charleston with a request that they loan him clerks. He had to use railway mail clerks as substitutes in their lay off, especially during the holiday rush. As we understand it, the recommendations of you gentlemen will establish things that will be permanent, and we appreciate this opportunity to plead our cause and to ask you to give us not only enough just to pay our grocery bills, but give a wage that will enable us to meet our obligations as citizens.

This is an age in which men will be required to specialize. I am past the age where I can go out and specialize again.

Senator MOSES. How long have you been in the Postal Service?

Mr. LEE. I was in the service 13 years last June.

Senator MOSES. How much are you now receiving?

Mr. LEE. \$1,800. I am rated superintendent of station, but I represent the supervisory employees and clerks and carriers of the office and I am now speaking for the clerks and carriers.

Senator MOSES. You have a family?

Mr. LEE. I have a family—a wife and four boys.

Mr. STEENERSON. Aside from this question of compensation, as far as the employees are concerned, what effect, if any, has this state of affairs had upon the mail service? This fact that you have only one certified employee in a large office like Wilmington, or that other town, and that there is no eligible list to choose men from. What effect has it had upon the service rendered to the public?

Mr. LEE. Well, I would say that the public has been, to a great extent, justified in their complaints of the service rendered.

Mr. STEENERSON. Have there been complaints?

Mr. LEE. There have been complaints. Of course, some of these complaints start and it becomes a popular thing just to kick on the Postal Service because some other fellow kicks, and they are unreasonable in their demands for service; but there is no doubt that the complaint of slowness of mail in transmission is justified. Of course some of that comes in connection with other branches of the service—delay at terminal points and those things. It all goes to make up the Postal Service, however.

Mr. STEENERSON. Are there more missing letters on account of inexperienced employees?

Mr. LEE. I understand that is the complaint of the public. There are more miscased pieces of mail on account of inexperienced help.

Mr. STEENERSON. You are a supervisory employee and should know.

Mr. LEE. I do not have a force of clerks under me. I occupy a rather peculiar position. I was sent to a war emergency position that did not develop to that extent.

Mr. STEENERSON. You understand, of course, that the public is interested in having as good a service as possible, and if an increase of salary tends to expedite the delivery of mail and prevent mistakes, we want to know your judgment about it.

Mr. LEE. In my judgment there is no doubt that increase in wages of postal workers will attract capable employees to the service and raise the standard of efficiency which will soon afford a satisfactory mail service for the public.

That is something I think the business men would do well to take up with you. I have spoken to business men along that line and I find that they realize the importance of the mail service to them.

You gentlemen, to-day, may receive—I don't know whether or not you will receive it—anyway, our chamber of commerce passed a resolution favoring our efforts to better our condition believing that thereby the standard of efficiency of the Postal Service will be raised.

Mr. STEENERSON. You think the public would be reconciled to paying even a higher postage in order that the service might be thus improved by giving better compensation?

Mr. LEE. I don't think they would.

Mr. STEENERSON. You think they would not be reconciled to it.

Mr. LEE. I don't think they would be reconciled to higher postage, because there is a strong agitation for lower postage, and I do not think this would offset the other influences and recommendations that have been offered.

Mr. STEENERSON. Well, if everybody wants increased compensation the money must come either from the taxpayers in general or from increased postage.

Mr. LEE. I do not want to criticize other classes of men, but there are bigger classes of workers than we are, and I think we are justified in thinking that we are their equals intellectually, and on the average we require as much training to become efficient workers, and they do not hesitate to give them raises, regardless of where the money is coming from. Isn't it a well known fact that the Post Office Department affords a surplus of revenue?

Senator MOSES. It is an open question.

Mr. STEENERSON. There is not enough to satisfy the increases demanded. You have an \$1,800 minimum and a \$2,400 maximum. It would require more revenue, or else tax the general public about \$100,000,000.

Mr. LEE. That would bring in too many things that we would not have time to talk over. For instance, the franking privileges and——

Mr. STEENERSON. That doesn't have anything to do with the franking privilege.

Mr. LEE. It does with the revenue of the department—the burden they carry in that respect. You take the many things that the department has been called upon to handle during the war, and even now that the war is over.

Mr. STEENERSON. We are not interested in that feature.

Mr. LEE. That comes into the consideration of the accumulation of revenue.

Senator MOSES. Mr. Lee, you think the public would not want an increase in postal rates; do you think the public would be willing to have the franking privilege abolished?

Mr. LEE. I have not informed myself about that, but I wouldn't take that as an indication. We know that the business of the Government departments must be carried on and the average citizen, when he understands it, would not deny a Congressman or the departments of the Government the usual privileges of the mail for educational purposes or, may be, political purposes, or in the ordinary routine of departmental business. I do not think the average citizen, if he understands it, would question that or object to it. Your question was, I take it, whether they would want that abolished in order to keep the expenses within the income.

Senator MOSES. Well, considering this whole question of postal revenue, whether they would look with favor upon the abolishment of the franking privilege as part of the general scheme.

Mr. LEE. If the post office is going to be conducted as an efficient and businesslike institution it should have its debit and credit sides and have pay for the work it does, or some consideration. If it does a certain work and it is not practical to pay them for that work, they should have credit for it, so that it would be understood why there is a deficit in the income.

Mr. STEENERSON. That has been debated for years and years, but the fact is that both the franking privilege and the penalty privilege, which is by far the greater, combined would not amount to but very little in comparison with the total expenses. It would only be about four or five millions of dollars.

Mr. LEE. Another work that is devolving upon the Post Office Department and is gradually accumulating is these extra tasks imposed upon the postmasters in the way of handling the business of other departments.

Mr. STEENERSON. Of course, that is another matter.

Mr. LEE. It is going to be an immense thing. It is nothing unusual for an office of some size to detail clerks for that particular work alone. I will not undertake to go into a discussion of all the items we have in the brief.

Mr. BELL. You have all that in your brief?

Mr. LEE. Yes, sir.

Mr. BELL. I thank you very much, Mr. Lee.

The brief referred to follows:

BRIEF SUBMITTED BY MR. E. L. LEE.

The clerks and carriers of the Wilmington (N. C.) post office take this opportunity to inform your honorable commission of some of the conditions as we realize them in the Postal Service, and we beg to submit some changes that we think would correct some of these conditions.

1. It is conceded that the cost of living has advanced more than 100 per cent during the last four years. We are convinced that the necessities of living are costing, here in our city, about 125 per cent more than they did four years ago.

2. After carefully considering all the conditions of our living, and comparing relief accorded workers of other occupations with that granted employees of the Postal Service, we feel justified in appealing to you to recommend to Congress that the clerks and carriers be reclassified into four grades: The first grade with a minimum wage of \$1,600, the second grade \$1,800, the third grade \$2,100, the fourth grade with the maximum salary of \$2,400.

3. We realize a decline in the efficiency of the Postal Service on account of the number of the most experienced and valuable employees leaving the Postal Service to engage in more remunerative occupations.

4. Extreme difficulty is found in securing certified applicants to fill vacancies.

5. On account of the continual change of personnel of the force of uncertified employees, the efficiency of the service is not only hampered, but the duties devolving on the more experienced employees of the service are becoming extremely arduous.

6. Night work is not conducive to the best mental and physical well-being of anyone, and we believe that clerks who are required to perform night duty should be credited with differential time of 1 hour for every 45 minutes duty performed between the hours of 6 p. m. and 6 a. m.

7. We believe that night work should be reduced as much as it is possible to do it by restricting night duties to the most essential work, and the distribution of only the most important classes of mail.

8. We are anxious to see some pension law enacted for civil-service employees providing for the retirement of aged and incapacitated employees of the Postal Service.

9. We favor a seniority system that will assure promotion to employees based on requirements of merit and efficiency of service.

10. We ask that you look into the matter of remedial legislation, and the practice of executive officials of the Post Office Department nullifying such laws which are conditional, when they do not deem it desirable to comply with the provisions of such legislation. Among such laws we will mention the one providing for the tour of an eight-hour day to be completed within a period of 10 hours, and the treating of time made on Sundays and holidays as overtime, instead of allowing compensatory time as provided in the law.

11. We think that on account of abuses arising in the requirement of employees to make overtime that such time should be penalized to some extent.

12. We believe that clerks assigned to duties requiring scheme study should be allowed reasonable time while on duty to prepare such work, or when they are required

to prepare such scheme work while off duty that they should be allowed some compensation for time so engaged.

Mr. BELL. The next speaker is Mr. Mulligan.

STATEMENT OF MR. H. E. MULLIGAN, CHARLOTTE, N. C.

Mr. MULLIGAN. Mr. Chairman and gentlemen: I wish to speak to you concerning some of the conditions in our office. Some time ago when I entered the service as a substitute letter carrier, some of the carriers came to me sympathizing with me, saying that they sympathized with me because amongst the carriers none resign and few die. That condition has changed to-day, gentlemen, because, if I am correctly informed, in the last 18 months something like 31 per cent of the 42 clerks in the Charlotte post office have resigned, and in filling these vacancies it also seems that it has been impossible at any time to fill them with men from the civil service register; that is, with eligibles from the civil service register. Positions have been filled temporarily with men not on the register—just temporary employees until a register could be created. This fact is also brought out by the increasing number of examinations held in the office. Whereas some four or five years ago a single, fixed examination was held annually, now some four or five for the last two years have been held annually. Even these have not produced eligibles for the positions.

I am also informed that a great number who were on these eligible lists have declined the positions when tendered to them. It shows either that the salaries, which they had not previously investigated, or the conditions in the office were not as appealing as they expected them to be.

Next to the inadequate pay, I would say that it seems that the greatest trouble amongst the clerks, especially in the distributing division of the office, is that of night work. That is the bugaboo of all, you might say. Amongst the 30 distributing clerks in the post office at Charlotte, 27 of them have schedules which either begin earlier than 5 in the morning or close later than 7 in the evening. About 68 per cent of them are on unnatural night work between the hours of 6 p. m. and 6 a. m. There is no distinction at the present time so far as pay or time allowance between the work consumed in the day time and the work consumed at night. We believe there should be either extra pay for this night work—and many outside industries grant pay and a half—or preferably a shorter hour; an allowance of 45 minutes to count as an hour for work performed between 6 p. m. and 6 a. m.

Now, the question of promotions is one that also comes up, and I will say, with all due respect to our supervisory officials, with whom we are all well pleased, that 12 of the 42 clerks which I spoke of, 30 of whom are distributing clerks, clerks at the cases who distribute the mail—12 clerks are assigned to window work and desk work—registered mail, parcel post, stamps, and so forth. These 12 have almost entirely daylight work. In fact, the latest schedule amongst them runs to 9, another to 8, another is not later than 6.30. Now, in nine years' experience in the Charlotte post office, while there have been in that time, to my own recollection, 12 vacancies in those positions, not a single one has been filled from the distributing force of the office,

from the workers, the workers who are required to do this scheme study you have heard so much about. These men on the window jobs do not have that scheme study, and are not required to do this night work. Not one of these positions has been filled from the ranks of those who are required to do this night work and this real hard work.

Senator MOSES. What is the reason for that?

Mr. MULLIGAN. I do not know, sir.

Senator MOSES. Did the men at the cases make application for transfer to these window positions?

Mr. MULLIGAN. Yes, sir. In my own experience of only three years, whenever one of these vacancies occurred, a man senior, or amongst the senior clerks, has always gone to the postmaster and asked for the position. At the present time these positions are filled in the post office, six with men and six with women.

Gentlemen, I hate to make any remark about the women. I like them too well.

Mr. BELL. And it is dangerous.

Mr. MULLIGAN. But it is not fair for young girls, in some cases with no dependents whatsoever, and in nearly every case in our office well qualified and efficient stenographers, who could make equally as much money and possibly more outside of the Post Office Service, to be brought in and placed ahead of these old men in the service—one man who is working with me has been 25 years in the service, standing at a case for 25 years, and his feet are almost broken down. Gentlemen, it isn't fair to bring these girls in.

Mr. STEENERSON. Is that man engaged in night work?

Mr. MULLIGAN. No; he is on one of the two daylight schedules at my office.

Mr. STEENERSON. He is one of the daylight men?

Mr. MULLIGAN. One of the daylight men; yes, sir. He has been on that one job, though, for 15 years, and he has held behind him 13 other men. He has not been taken off that one place, and, consequently, no one else can get in.

Mr. STEENERSON. It is really a matter of administration on the part of the postmaster, is it not?

Mr. MULLIGAN. Yes, sir.

Mr. STEENERSON. The postmaster could, if he was so disposed, remedy these things by a more equitable system of promotions?

Mr. MULLIGAN. With no disrespect, gentlemen, I hope that it is possible for this commission to take care of that sort of thing.

Mr. STEENERSON. Do you think we could remedy such defect as that by statute?

Mr. MULLIGAN. Yes, sir. There is a statute, if I understand correctly, which requires that supervisory officials be appointed from amongst the senior clerks in the office. It seems that a statute could also be made that would require that these window or daylight positions be filled from amongst the senior clerks in the office.

Mr. STEENERSON. That the window or daylight positions be filled from amongst those who held the night positions?

Mr. MULLIGAN. From amongst the senior positions.

Mr. STEENERSON. So that a man who was on a night schedule might have some hopes of getting a daylight job after awhile.

Mr. MULLIGAN. There is not much hope for these 27 men behind the daylight schedules at Charlotte; some of them have been there for 25 years.

Gentlemen, I thank you.

Mr. BELL. We thank you, Mr. Mulligan.

(Mr. Mulligan submitted the following brief:)

BRIEF SUBMITTED BY MR. H. E. MULLIGAN.

It is not our purpose to enter into a detailed discussion of the general increase in cost of living or the comparatively small increases in salary which we have received, even temporarily, but instead to respectfully call your attention to the detrimental effect to the service as observed at the post office to which we are attached and which we believe traceable to the low salary classification now in effect.

We submit the following for your consideration:

From a maximum roll of 42 clerks, 13, or a total of 31 per cent, have resigned during the 18 months period ending January 1, 1920.

At no time during this period has the postmaster been able to fill vacancies with eligibles from the civil-service register.

A large percentage, probably 75 per cent, of eligibles refused the appointment when tendered, due in most cases to their having found more remunerative employment elsewhere since date of examination or to closer investigation of conditions within the post office, salary, night work, etc.

In order to meet expenses, many clerks are known to be following in spare hours outside employment of various kinds, such as collecting bills, keeping books, truck farming, etc., while in other cases their wives or children of school age have sought employment in public works.

Your attention is also called to the increased frequency of examinations and the decreasing percentage of successful applicants, the exact figures of which are not at our disposal.

Doubtless the most damaging factor to the efficiency of the service under present classification is night work. Of the 30 distributing clerks, 27, or 90 per cent, are scheduled to begin earlier than 5 a. m. or end later than 7 p. m., and of the 240 hours performed by these daily 164, or 68 per cent, are between the hours of 6 p. m. and 6 a. m., only three daylight schedules ahead of these 27 clerks to which promotion is made by seniority. There are 4 with more than 10 years' service now working "split" or half night schedules. In this connection, realizing that a certain amount of such work is indispensable and with a view of removing the dread of same, we would suggest additional pay or shorter hours, preferably the latter, for whatever work is done between the hours of 6 p. m. and 6 a. m.

In addition to the 30 distributing clerks mentioned above, 12 are assigned to duties at windows and desks whose work is performed almost entirely in daylight, while in the last five years 12 vacancies have occurred among these, not one has been filled by a senior member of the distributing force, all having been filled either by women or young men in the service, only 3 having served more than 10 years, while 2 are substitutes. We would suggest legislation requiring postmasters to fill such vacancies from among senior clerks regardless of sex.

In order that they may handle the mails in an efficient manner, distributing clerks must continually study and practice their schemes, many having as much as 2,700 post offices in two States to commit to memory, and then to keep posted on changes which are constantly being made. An annual examination is required, which the clerk must stand 95 per cent perfect. This work must all be done outside of work hours, consuming an average of 30 minutes a day. As this extra work is required of only a part of the clerks, it is suggested that compensation in some form be granted, either in added pay or compensatory time, preferably the latter.

While the reports of almost all investigators differ as to the actual percentage of increase in the cost of living since 1916, yet all seem to agree that it lies somewhere between 75 per cent and 100 per cent, while for the corresponding period the maximum increase in salaries of post-office clerks has been 37 per cent.

We appeal to you, gentlemen, not alone for ourselves and our families, but as well for the great service to which we have become attached, that its efficiency may be retained at its highest and render to the public a service which would deserve and obtain the approval of all.

STATEMENT OF MR. W. H. RIDDLE, GREENVILLE, S. C.

Mr. RIDDLE. Mr. Chairman and gentlemen of the commission. I am a clerk in the Greenville (S. C.) post office, and I wish to state the facts as they exist now in our office. We have had recently five resignations; five clerks have resigned from the office because of the fact that they could get more money for their work in other lines of business.

Senator STERLING. How many clerks are there in your office?

Mr. RIDDLE. There are 24 clerks in our office. Those clerks who have resigned—some of them are old, experienced clerks; one man had been there 16 years as a clerk, one man 6 years, and some of the others for a shorter time—were offered better positions where they could earn more money for their work. In our city it is hard—in fact, impossible—to live on the wage we receive as postal employees.

We, the clerks of the Greenville post office, do not feel that we are getting a just salary for our work. In fact, the salary that we receive is too small to give us a living, much less lay aside anything for old age, and there are several concerns in our city paying larger salaries to their employees than the post-office employees are receiving, and we come before this commission with the hope that in the near future we will receive a larger salary for our work than we are now receiving.

Senator MOSES. What are you getting now?

Mr. RIDDLE. Thirteen hundred dollars.

Senator MOSES. How long have you been in the service?

Mr. RIDDLE. I entered the service as a regular clerk a little less than three years ago; as a substitute six years ago. I worked for something over three years as a substitute at 30, 35, and then 40 cents an hour, and then I was appointed a regular a little less than three years ago.

Senator STERLING. How much overtime were you required to work while you were a substitute?

Mr. RIDDLE. Well, I was required to report at the post office every day, and if there was no work for me to do I could deliver special deliveries. I had a bicycle, and I delivered special deliveries so as to earn a living wage. I was a substitute and, as I said, I was appointed a little less than three years ago.

Senator MOSES. Do you remember what you earned a month during that period?

Mr. RIDDLE. As I remember, it must have been about \$60 a month.

Senator STERLING. Were the other substitutes favored as you were in getting this special work?

Mr. RIDDLE. Oh, yes. The substitutes were all given a chance to deliver special deliveries. They had some special delivery messengers, but we were given the opportunity because we could not get work all the time, and we could not get work in other places, because we were required to report at the post office every day, and they gave the opportunity of delivering special deliveries so that we could earn a living during the time we were substitutes. With the recent increase we got some time ago and the promotions I have gotten since I entered three years ago I am now in the \$1,300 a year class. Now, gentlemen, I can not live on \$1,300 a year.

Senator MOSES. Have you a family?

Mr. RIDDLE. I have a wife and four children. No man with a family like that can possibly live on that wage.

Senator STERLING. Do you own your own home?

Mr. RIDDLE. No, sir; I do not. I pay rent; I pay a monthly rent.

Senator MOSES. Well, how do you do it. You say you can't do it, but you evidently do do it. Now, how do you do it?

Mr. RIDDLE. After my day's work in the post office is through, I go out and do some other little jobs to make a living. Clerks in other businesses don't have to do that, because their employers pay them enough, yet I am working for the greatest Government in the world and I have to go out after my day's work is done and do something else to make a living.

Senator STERLING. Do you consider yourself fortunate in finding something else to do in order to eke out a living?

Mr. RIDDLE. There are other clerks making more than I am. In other words, those in the top grade, making \$1,650, possibly can live without doing that, but in my case I have not been in the service long enough to reach the top grade.

Now, in regard to conditions in my office. When I came there a few years back, competitive examinations were held and there was an average of about 60 who would take the examination for clerks, once a year. Now they hold examinations about twice every year, and there are only about 8 or 10 people who take them. Why? Because there is no inducement to go into the service any more. The salary that the post-office employees receive is not sufficient to justify a man in standing these examinations, and that is reflected in the class of people who are taking these examinations. With no reflection on anyone personally, some of the men who have taken the examinations recently and are now on the eligible list are unfit for the service. During the holidays they have been working as extra help. Of course a man is not supposed to give the service when he enters that he will later on, but you can tell what is in a man and tell how he is going to work when you first start him and watch him.

Senator STERLING. Do you mean that some who were on the eligible list were called in for special and temporary service during the holidays?

Mr. RIDDLE. Exactly.

Senator STERLING. But that doesn't give them any permanent place?

Mr. RIDDLE. No, sir. You can tell whether or not they would make good clerks after they had an appointment, and most of those who have worked show that they could not learn to be efficient in the postal service if they were there for several years. Not casting any reflection on them, but from the observation of myself and the other employees, they would not make efficient clerks.

In regard to these resignations; some of those who have resigned were some of the best clerks in the post office and it is going to be hard to fill these positions like they have been filled, and to fill them from these eligible lists will be hard indeed. If this is going to continue every year, it will eventually come to where we can not get men to take these competitive examinations and eventually we won't be able to get men to fill these positions of the clerks who have resigned and left the service.

In regard to night work, I think that 45 minutes should constitute 1 hour's work in the hours from 6 p. m. to 6 a. m., because in other lines of business, men who work the night hours receive more salary

than those who work in the daytime, and another thing I would like to call your attention to is the overtime, the way we are paid for overtime. If you have ever thought of it, you will know that when we work overtime and on Sundays we do not receive as much per hour during that time as we do during the regular time for our day's work. Take a month that has 31 days in it—our Sunday time and overtime is based on the number of days that is in the month, and of course the number of hours in the month, and therefore we do not receive as much for overtime and Sunday work as we do for regular work, and I think, and we all think, we should receive more. We should have at least time and a half pay for overtime and all Sunday work.

Senator MOSES. Just how does that work out?

Mr. STEENERSON. Thirty-one days——

Mr. RIDDLE. That is it exactly. Take the greater number of hours in the month, which, of course, there are in a 31-day month than in a 30-day month.

Senator MOSES. Well, there are 248 hours in a 31-day month.

Mr. RIDDLE. When we draw our regular salary it is based on the number of working days.

Senator MOSES. Did you do any overtime in December?

Mr. RIDDLE. Yes, sir.

Senator MOSES. There are 31 days in December, and an 8-hour day would make 248 hours in that month. How much overtime did you work?

Mr. RIDDLE. I haven't those figures with me. The latter part of December I worked 38 hours overtime—the last two weeks.

Mr. STEENERSON. Doesn't one hour count one-eighth of a day?

Mr. RIDDLE. It does.

Senator MOSES. I see now what he means. He was drawing his \$108.33 for the 248 hours, and then he had 38 hours overtime at the same rate. How about the month of February?

Mr. RIDDLE. Well, the month of February, I don't think would bring it up. There is only one February in a year, anyhow. [Laughter.] We think, gentlemen, that this should be changed so that we should receive at least pay and a half for overtime and Sunday work, and we ask that you look into this.

Senator MOSES. You are suggesting only pay and a third when you say you advocate 45 minutes to constitute an hour.

Mr. BELL. That is for night work.

Senator MOSES. This is for night work, too.

Mr. STEENERSON. That would be a 6-hour day, wouldn't it?

Senator MOSES. Yes, but that is only paying time and a third.

Mr. RIDDLE. I should think that it is no more than fair that a man who has to go in there and work at night—all of his time at night—that he should not have to work as many hours as the man in day time.

Senator MOSES. Now you are suggesting that a man whose regular schedule calls for work between the hours of 6 at night and 6 in the morning should have 45 minutes constitute an hour's work, which is time and a third. You suggest that when you have a day schedule when you work overtime you should get time and a half.

Mr. RIDDLE. Yes, sir.

Senator MOSES. Why the discrimination?

Mr. RIDDLE. Well, if he has to work overtime, the man who works at night, give him time and a half. I make no discrimination. If he has to work overtime, pay him the same amount. Or, if it seems best that they should pay the night man a larger salary than the day man, we would be glad to work daytime at my salary and let the night man receive a greater salary, because I think it is due them.

Mr. STEENERSON. You don't think it is necessary to make a 6-hour day for night work, do you? It is only a question of compensation with you.

Mr. RIDDLE. Well, if it seems best that the salary should be greater, that would be perfectly all right with everybody, but I think there should be a difference.

Mr. STEENERSON. Physically they could stand eight hours' work at night?

Mr. RIDDLE. I think they could.

Mr. STEENERSON. So that if they got sufficient pay, everything would be satisfactory?

Mr. RIDDLE. I think so. I think a man who works during the night should receive greater pay or shorter hours than the man who works in the day time. That is the substance of the thing.

Now, with regard to the ladies in the office. I have nothing against the ladies whatever, but there have been some ladies appointed in the Greenville post office recently that have all day hours, and there are clerks there who have been there some time who have all night hours. There is no inducement for these men to stay in the service and work at night when they can not see any hope of getting a day schedule. My suggestion would be if ladies are going to take a man's work that they should take a man's hours.

Mr. BELL. Work at night?

Mr. RIDDLE. Yes, sir.

Mr. STEENERSON. I think we had an important postmaster state before us sometime ago that women were not suitable for this work you spoke of—the distributing and carrier work, that they have to be put at windows or desks because the other work was too strenuous, standing and walking around continuously all these hours, and that therefore they were given these places.

Mr. RIDDLE. Well, I should think that if they can not stand the work the men do, that they should not be expected to receive the salary the men do.

Senator MOSES. Or, in other words, with equal suffrage, you want equality in everything. [Applause.]

Mr. STEENERSON. Do you think it would be in the interest of efficiency in the service to not have women clerks and carriers in the post office?

Mr. RIDDLE. With all due respect to the ladies, I think so.

Mr. STEENERSON. Except as stenographers?

Mr. RIDDLE. Except as stenographers.

Mr. BELL. Don't they make good stamp clerks and money-order clerks? Don't they fill those positions as well as the men?

Mr. RIDDLE. I don't think so, from some we have had in our office. Take a stamp clerk we have in our office. We have a very good one. He is fast and accurate. We have had some ladies on his window when he would be off on a vacation, and they could not turn off near the work he does.

Mr. BELL. That was not their regular work, was it?

Mr. RIDDLE. No; it was not their regular line.

Mr. BELL. They were not as accustomed to it as the man was?

Mr. RIDDLE. No, sir.

Mr. STEENERSON. Your idea is that these places should be reserved for those who do this hard work, especially the night work?

Mr. RIDDLE. I should think those men who have been in the service some time, especially at night, should later on receive these better places and better hours.

Mr. BELL. We are much obliged to you. Before the next speaker appears, I want to say that the commission wants to hear from all those who have been picked out, but we will be obliged to stay within the limitations of time or else we won't get through or hear from all the representatives, so that I would like all those that appear to make their statements as brief as possible. If you do not make statements sufficient to satisfy yourselves, you can file briefs, and they will go into the record, and we will see it just the same.

The next on the list is Mr. W. F. Moseley.

STATEMENT OF MR. W. F. MOSELEY, COLUMBIA, S. C.

Mr. MOSELEY. Mr. Chairman, and gentlemen of this commission, I believe I have two minutes assigned to me. I will not attempt to mention my brief, but will just say that I am a special clerk. I served three years in the Philippines, one of which was in the mail service. I have been 15 years in the service of the United States. My present salary is \$1,750 at the Columbia office.

At our office we have 31 clerks, 15 substitutes; 29 carriers, 3 substitute carriers. We have a superintendent of mails at a salary of \$2,150, including bonus; 1 cashier, \$1,925, who is acting assistant postmaster, leaving 15 clerks, with salaries of \$1,500 and below, according to the length of service.

Senator STERLING. What is your exact position?

Mr. MOSELEY. I am a special clerk, assigned to the parcel-post division. We have two special clerks, both assigned to parcel post.

Senator STERLING. Do you do any night work in the parcel-post division?

Mr. MOSELEY. No, sir.

Senator STERLING. Is night work required for parcel-post business?

Mr. MOSELEY. No, sir; we close at 6 o'clock in that division.

Senator STERLING. Your work is eight hours?

Mr. MOSELEY. Yes, sir.

Senator STERLING. Do you work overtime at all?

Mr. MOSELEY. I did in the holiday season. I worked 15 hours in the latter part of December. The present salary of the postmaster at our office is \$5,000, but on account of Camp Pike being reduced by possibly 2,000 soldiers, naturally next year the salary of the postmaster will be reduced, I suppose, to about \$3,700. That, of course, will affect the assistant postmaster and the superintendent of mails. I have a brief here which I will submit to Mr. Beasley.

The brief referred to follows:

BRIEF FILED BY MR. W. F. MOSELEY, FROM THE POSTAL EMPLOYEES OF THE COLUMBIA, S. C., POST OFFICE AND VICINITY.

In presenting this brief, as a representative of the supervisory employees in the Columbia post office and clerks at Beaufort, Bennettsville, Camden, Georgetown, Hartsville, and Lancaster, it is not with the thought that I am presenting new or mentioning conditions with which you are not reasonably familiar, after visiting as many of the large postal centers, such as New York, Chicago, Cincinnati, St. Paul, etc., but we wish to add our evidence as to the imperative need of remedial legislation along the lines suggested by others that have appeared before you. Therefore, I have not included any statistics on salary tables.

THE CAPITAL CITY.

Columbia being the capital city, there seems to be an artificial something that tends to enhance the cost of the necessities of life, among them house rent, which has increased over 100 per cent, and the end is not yet. Food, clothing, light, and fuel prices have soared until the prices are something like 76 per cent above what they were five years ago.

AVERAGE EXPENDITURES LESS IN SOUTH.

The average clerk can get along without buying much furniture or luxuries, but we have to have food, fuel, and light, pay rent, and buy a reasonable amount of clothing. We of the South are fortunate in that God "tempers the wind to the shorn lamb," as our mild climate enables us to get along without heavy expensive clothing and with less fuel during the winter months than what is required of our neighbors farther north. If that was not the case there would be considerably more suffering for the want of fuel and clothing, as we are not receiving a salary that would justify the expenditure.

AS TO THE AMOUNT OF INCREASE OF SALARIES.

We believe the members of the commission are convinced of the need of an increase in the compensation to be given the postal workers throughout the country. We mean on a permanent basis, at least for several years, but the mooted question is to agree on the amount that should be given. We suggest that the examination for clerk-carrier in the Post Office Service be made first grade, with an entrance salary of \$1,400, with automatic promotions of \$200 annually until the \$2,200 grade is reached, a salary of \$2,300 and \$2,400 being provided for special clerks and \$2,500 for supervisory officials in small first-class offices.

To provide the money necessary to cover the increased compensation mentioned in the preceding paragraph we suggest that postage on first-class mail and postal cards be restored to a war-time basis, as there was very little complaint on the part of the public in paying 3 cents per ounce on letters, and we believe it would be a grievous mistake to reduce postage on letters for local delivery to 1 cent. Gentlemen, while we are on the subject of the rate of postage, we believe that printed matter should be restored to the third-class rate; so, also, catalogues be denied the privilege of the parcel-post rate, but should be mailed from the office of publication, and not be shipped by freight to a central distributing point, to be mailed at the local or second zone rate of postage.

SUBSTITUTES TO BE REDUCED.

The number of substitute clerks should be reduced, or a reasonable limitation upon the period of substitute service, with credit given for such service in determining entrance salary grade upon regular appointment.

RETIREMENT LEGISLATION.

Next in importance to the salary question is that of the retirement of the aged postal workers, and we indorse the Lehlbach-Sterling bill, or some similar measure. While it contemplates deductions from the employees' salaries at the rate of 2½ per cent, yet these deductions are to be placed to the credit of the employee in the event of his separation from the service. Post-office clerks would be entitled to retirement at age 62 with a maximum annuity of \$720 per year.

NIGHT WORK.

It is a well-known fact that night work is unpleasant, giving little opportunity for social intercourse, thereby causing much dissatisfaction, with a corresponding loss of efficiency; therefore, we would suggest that seven hours work after 6 p. m. constitute a day's work.

VACATION.

As employees of all branches of the Government service, except post-office clerks, carriers, and laborers, are allowed 30 days vacation per year, we ask that postal employees be given an equal privilege with other employees of the Federal Government.

A COURT OF APPEALS.

The Federal civil service should make provision for granting employees the right to appeal from the decision of officials in cases involving demotion or dismissal, and lodging arbitrary power in the hands of officials frequently results in injustice being done an employee; therefore, we suggest that a court of appeals be created, granting civil-service employees the right of a hearing in cases of demotion or dismissal.

RECOGNITION OF SENIORITY.

Recognition of seniority is one of the essentials which will promote the best interest of the Postal Service; will lend incentive alike to the senior clerk as well as the new entrant, as a reward for the service of older clerks, and the lack of such recognition of seniority with reference to promotions and assignments is a flagrant abuse of the civil-service laws, therefore, we insist upon the observance of the right of seniority.

Now, gentlemen, in conclusion we do not believe we have asked for anything that is unreasonable as to salaries or the betterment of working conditions in the Postal Service. We want to educate our children; have time for recreation; have time for study; and should not be compelled to supplement our salary by outside employment, as I do not believe a clerk can give his best service to his Government if it is necessary for him to seek employment outside of the Postal Service when not on duty. In not doing so, my family has made many sacrifices in order to eke out an existence, as I do not call it a "living."

SALARY STATISTICS, COLUMBIA POST OFFICE.

Present salary of postmaster, \$5,000 (acting). No assistant postmaster. Superintendent of mails, basic, \$1,800; present, \$2,125. Assistant superintendent of mails, basic, \$1,600; present, \$1,925. Cashier, acting assistant postmaster, basic, \$1,600; present, \$1,925. Foreman money order, basic, \$1,600; present, \$1,925. Foreman night force, city division, basic, \$1,600; present, \$1,925. Clerks, 31; substitutes, 15; carriers, 27; rural free-delivery routes, 5; registered pieces handled last year, 33,836; insured parcel-post pieces handled last year, 38,868; money orders issued, 85,022; money orders paid, 105,584; money orders, foreign, issued, 171; money orders, foreign, paid, 84.

Mr. BELL. The next is Mr. W. J. Kelly, of Charleston, S. C.

Mr. KELLY. I yield my time to the Georgia clerks.

Mr. BELL. We will call on Mr. C. G. Clark.

STATEMENT OF MR. C. G. CLARK, ATLANTA, GA.

Mr. CLARK. I am a clerk in the Atlanta, Ga., post office, Camp Gordon Branch. I have been in the service a little more than 13 years, 4 of them as a railway mail clerk, 1 year as a postal agent for the American Expeditionary Forces in France.

Gentlemen, you have questioned some here to-day as to how mail is being handled in the large offices, with delay or without delay. This mail is being handled in our large office here by making overtime. You know that it is impossible to continue this overtime year in and year out. We have for the last two years made more overtime than ever. Why? Because we haven't the young blood coming into the

service that we should have. You will find our civil service eligible lists all over the country depleted, and speaking for Atlanta particularly depleted. We have 208 clerks in our Atlanta post office with 117 auxiliary and substitutes besides. There are men continuously coming and going all the time in our Atlanta post office. More than six hundred within the last four years have come in and left the Atlanta post office.

Mr. STEENERSON. Is that the whole force?

Mr. CLARK. That includes the whole force—clerks, carriers, mechanics, etc.

Senator MOSES. What is the total force?

Mr. CLARK. Five hundred and fifty one is the total force of the office. What inducement is there for the young man to come into the service to-day? A few years ago I used to have young men come to me anxious to take the examinations. No more is that the case. Why? Here in the city of Atlanta, which is the fourth as an insurance center, we have offices that pay these young men much more than the post office can pay under the law. It is impossible almost to get these young men to take the examination, and as I have just stated, what can we do but continue to work overtime all the time, and that can not go on year in and year out. The mail has got to move, however. If it doesn't move, you hear from the business men.

Senator STERLING. How much overtime is there worked on an average?

Mr. CLARK. My dear sir, I haven't access to the finance books of this office, being only 1 employee out of 551. I have never had the opportunity of getting exact data on that, but I do know that that is the way the mail is moving, by the overtime made in our office. It is not the fault of the supervisory officials of our office. It is due to the fact that we can not get young blood in our office; no substitutes are coming in and learning these schemes. It is absolutely necessary that the supervisory officials require these men to work overtime. That can not continue always. We must offer some inducement to have men come into the service.

The gentleman on my left [Mr. Steenerson] has asked a question as to where we would get the funds to pay increased salaries. I do not believe the public objects to paying 3-cent postage on letters [Applause.] Canada is paying 3-cent postage; France is now paying 3-cent postage. A small country like France, where the expense of transporting a letter from one end of it to the other is only as great as from here to the Mississippi River, is charging 3 cents while, as a matter of fact, we charge only 2 cents to transport a letter from here to Seattle, Wash.

The people of this country had some experience in paying 3-cent postage during the war. Nothing was said about it. They want efficient service [applause] and in order to get efficient men we have got to pay them the price. If we do not, others in the field employing young men will certainly employ them, and the Government will be the loser.

Senator MOSES. You spoke of the insurance companies being competitors with the Post Office Department for clerks. What do they start their clerks at?

Mr. CLARK. They start their younger clerks in at something like \$85 per month, but I wish to say that the opportunities for promotion

are much greater, faster, than the law allows in the Post Office Department, thereby offering a greater inducement. The reason I referred to the insurance companies is because Atlanta ranks fourth in insurance agencies of the United States.

Senator MOSES. Also another reason is that the work is substantially of the same character.

Mr. CLARK. Exactly.

Senator STERLING. What does the experienced insurance clerk get—having an entrance salary of \$85 a month—what will his salary reach after a year or two?

Mr. CLARK. Many of my friends who have been in that service less than I have been in the Postal Service are getting \$225 and \$250 a month.

Senator STERLING. How long have you been in the service?

Mr. CLARK. Thirteen years. Gentlemen, the cost of living in Atlanta has increased—groceries and clothing—155 per cent.

Senator MOSES. And rents?

Mr. CLARK. From 60 to 70 per cent. We attribute that locally to the large conflagration we had May 15, 1917, which wiped out 1,500 homes.

Senator STERLING. What is your salary?

Mr. CLARK. \$1,650 a year.

Senator STERLING. And do you have a family?

Mr. CLARK. I have not, sir. That is one reason I have not, by the way. [Applause.] I make that statement in all earnestness, too.

Senator STERLING. You have advanced one of the best arguments yet made, Mr. Clark.

Mr. CLARK. I thank you for the compliment. With that, I will leave it with you gentlemen.

STATEMENT OF MR. J. O. GREENE, AUGUSTA, GA.

Mr. GREENE. Gentlemen, I have two minutes. I feel that will be plenty. I am from the Augusta office. Augusta is a city of approximately 60,000, and we have 31 clerks, including supervisory help—24 regular clerks, and of this number 4 have resigned since the middle of November, which is 16½ per cent of the regular clerical force. Now, these boys, young men, have gone out, I am sure, to accept positions in some field of business where they can receive better salaries, and four green clerks have been appointed to take the place of these four regular clerks, and in the face of the heavy winter mails and the Christmas rush, had it not been for the overtime, without compensation, put in by the foremen of the different departments, I believe the machinery of our office would have been paralyzed. Our supervisory help and foremen and bosses put their shoulders to the wheel and worked overtime and got everything off and everybody else fell right in line and we pulled through and possibly have dodged some just criticism in so far as efficient service is concerned.

After the appointment of these 4 new clerks we have left 14 substitute clerks. Ten of these are young ladies, girls, and they, I think—I will say it although they are not here—are exceptionally good clerks. I work right close to them and am married and have no policy in saying it. All of the women have day schedules, and about half of them are performing duties for which they are, in my

judgment, better fitted than we are; they are stenographers and manipulate their fingers well and I do not know how we would get along without them. There are 10 of these ladies and 4 boys on the substitute list, and owing to the increased popularity of the parcel post and the tremendous amount of night work at our office, there is quite a lot of work that would be distasteful to these girls if they were put on it.

I want to say right here that our eligible list is exhausted. The secretary of the local board of civil service told me yesterday morning—I understood him to say there was not a name on it. I am sure he said there was not the name of a man on it. In addition to this help we have five, I understand, who are working, not to move the Christmas rush, but who have been working for some time as auxiliary or temporary help because there were no names on the list, and oftentimes we are favored in getting rather bright men to come into our office, but they, just like the four who have just left us, come in and look around and see just what is expected of them and they pass on out. There is a reason for all of this. We had a young man who has gone back to the farm, another has gone into one of the city offices to work. The minimum salary paid by the banks in our town is \$125 a month, I am told, and one of the big department stores pays their clerks an average salary of \$40 a week. That doesn't include the managers of the departments. I know two messenger boys, one who had not been to school since he was 12 years of age, and they are getting, one \$175, and the other \$200 a month.

As for myself, I feel that we need young blood. I have served my time in the service and have acquired that helpless feeling that is the heritage of the service. The thing that I think we should do is not so much to satisfy the old fellows who have passed their zenith in the service but to hold out something that will get new blood to replace these fellows as they go.

I am satisfied that the people would be willing to pay enough postage to insure efficient service. They only need a little education along that line.

That is the condition of our office, gentlemen. I promised not to take more than two minutes and I think they must be about up. The Augusta post office ranked second only to Atlanta in receipts last year. I think the receipts were something like \$513,000, and this fiscal year the receipts will be approximately \$550,000, and for that reason I am glad to tell of the conditions down there and I appreciate your interest.

STATEMENT OF MR. E. C. GRINER, VALDOSTA, GA.

Mr. GRINER. I am a clerk in the mailing division of the Valdosta post office. I will just relate a few of the real facts and conditions as they exist in our office to-day. We have a force of 10 regular clerks, I believe. Three of these clerks have been appointed regulars within the last three months. Two of these clerks have been in the service there less than two years, leaving five that you might call older clerks. We had a resignation recently to take effect December 1, I believe, of a clerk who had been in the service 18 years, who resigned to take a position which pays him \$1,800—more than he was getting as a post-office clerk after having served for 18 years.

Mr. BELL. \$1,800 more?

Mr. GRINER. \$1,800 was his entrance salary in the new position.

Senator STERLING. He had been getting as a clerk a maximum of how much?

Mr. GRINER. His maximum as a clerk was not that much—something like \$1,650, I believe. Another thing is that our clerks are overworked. We make overtime every day. We work Sundays and holidays. It is next to impossible to get time off because we haven't the force of men who are competent to relieve us; men who have been on the job long enough to know how to do the work are overworked.

Senator STERLING. What position did this clerk who resigned after 18 years' service hold?

Mr. GRINER. He was the register clerk.

Senator STERLING. What position did he go into?

Mr. GRINER. He went into the automobile business at Gainesville, Fla. I think, gentlemen, that the post-office clerk need consideration in regard to night work and in regard to Sunday work and overtime. All this ought to be considered, and in order to restore the service to its one-time efficiency and to maintain the service the American people desire and, we might say, demand, changes have got to be made. We must make the service attractive to young men. They must see some future to it, gentlemen. I have been in the service as a regular employee for something like three years, but I see no future to it as it stands.

Senator STERLING. Your pay is \$1,650 now?

Mr. GRINER. No, sir.

Senator STERLING. What is your pay?

Mr. GRINER. I get only \$1,200.

Mr. BELL. You got the \$150 emergency increase, didn't you?

Mr. GRINER. This includes—

Mr. BELL. Everything?

Mr. GRINER. Everything. Yes, sir.

Senator MOSES. What did you start at—\$800?

Mr. GRINER. I started at \$800.

Senator MOSES. Then you got a \$200 bonus; then \$150. Where were your automatic promotions?

Mr. GRINER. I have not had any automatic promotions.

Mr. BELL. He has not been in the service long enough.

Senator MOSES. Three years, and not get any automatic promotions?

Mr. GRINER. My postmaster has written the first assistant for a ruling and he has not heard.

Mr. BELL. If there were any vacancies higher than you, you would be entitled to that, wouldn't you?

Mr. GRINER. I think so.

Mr. BELL. By promotion—automatically.

Mr. GRINER. Yes, sir. I am in the mailing division. My tour is from 4 p. m. to 12.30 a. m., with 30 minutes for lunch. There are two of these new clerks who were recently appointed 42 and 43 years old, respectively. I can never hope—regardless of the time of service I put in in that office—I can never hope to get a day job with the present force we have, because these older clerks are inefficient. They can not do the work that we younger clerks can do. These men will never attain that degree of efficiency that a young man would.

Senator STERLING. From what business do they come into your office?

Mr. GRINER. One was a fourth-class postmaster, I understand, prior to his coming to our office.

Mr. BELL. Was he transferred, or did he take the civil-service examination?

Mr. GRINER. I think he took the examination. As I have just said, something must be done; some changes must be made to make the service more attractive, so that we can get men with talent, young men, to enter the service, and so that they can hope to attain something for themselves and those dependent upon them. I am a married man and have one child, and I know \$1,200 means a mere existence.

Mr. BELL. We are much obliged to you. The next gentleman is Mr. Clyde Lawrence, of Columbus, Ga.

STATEMENT OF MR. CLYDE LAWRENCE, COLUMBUS, GA.

Mr. LAWRENCE. Gentlemen, I have been in the service 26 years. I have had every position in the Columbus, Ga., post office, and I think that when a man has been in the post office or any other business 26 years and then has to accept outside employment to meet the requirements of his family, I think it is time something should be done for him. I was also, you might say, ruined for life in the service a good many years ago with a sack of mail. My back was sprained, which I have never gotten over, and I think there should be some provision made also for clerks who have been employed in the service for years and get down and out from different causes of that kind.

Senator STERLING. What is your present compensation?

Mr. LAWRENCE. \$1,750, which includes my recent raise. In about 30 days I will be made superintendent of mails. Our postmaster and assistant carry out the rules of the office there with regard to promotions of the men in the office. We have absolutely no grievance except that we need more money. The postmaster and his assistant do everything in their power for us. We have no men on our substitute list. It seems we can not get anybody to take the examinations. We are using now four men, just engaged—we just picked them up off the street, you might say. We haven't the inducements to offer, I don't think, to get men to come into the service. We are required to live what you might say is a pretty decent sort of a life. We are required to take care of ourselves and family in a good way. We are looked on as a little more than the average man, you might say, in a way. My own daughter, for instance. She had just completed her course in a preparatory school and I was going to send her to college, but financial conditions with me were such that I couldn't. She is now at work trying to make enough money so that she can complete her education, and with the salaries we are getting and the present high cost of living we find it is impossible to do it.

Now, we also have a lot of overtime, and when there is any overtime going around my place I am Johnny on the spot, because it is money that we need to keep going, and we never hesitate when there is any overtime and say, "Bill, you do it." Whenever there is any overtime to be done John says, "Let me do it." Everybody wants it. I have worked every holiday for a couple of years at least, every holiday, and during the Christmas time I worked from 5.20 in the morning to anywhere from 6 to 7 at night with 1 hour off for breakfast.

Mr. BELL. You were glad to get that overtime?

Mr. LAWRENCE. Glad to have it. I didn't even take time off for lunch and supper. The boss came to me and said, "Young man, you go home. You have done enough."

Mr. STEENERSON. Suppose the minimum salary was \$1,800 and the maximum \$2,400; wouldn't the clerks still work overtime?

Mr. LAWRENCE. They might have to work overtime, but you would be getting some men into the service who would work regularly and learn to do the work. You wouldn't have so many of these green men who havn't the experience.

Mr. STEENERSON. There wouldn't be so much necessity for overtime?

Mr. LAWRENCE. There wouldn't be so much necessity for overtime, because a man, after he gets the experience—two experienced men can do as much work as any three green men. We also have at Columbus what is supposed to be the biggest thing in a military line—Camp Benning—and that is working us very hard. We are glad to have the camp, but it has run the cost of living up wonderfully. Our house rents have almost doubled.

Mr. STEENERSON. Is that a permanent institution?

Mr. LAWRENCE. Yes, sir.

Mr. STEENERSON. I thought we were demobilizing.

Mr. LAWRENCE. Camp Benning is a permanent camp. Camp Benning is here to stay and we are going to have a good bunch of men there, and every man that comes through the United States training schools you will find will wind up there at Benning. Even the men who come through West Point will go there. It gives us a wonderful amount of work and wonderfully increased house rents and groceries, etc.

Senator STERLING. Do you rent the house in which you live?

Mr. LAWRENCE. I unfortunately do not own my house. I do not have to pay any rent in this way: My father-in-law is an old man, 78 years old. He is blind and absolutely helpless. He owns the house and he lives with us. We live with him, I should say. He owns the house. We furnish absolutely everything that goes into it. All the income he has in the world is what he gets from us and what the State of Georgia pays him as an old veteran.

Mr. Lawrence submitted the following brief:

BRIEF SUBMITTED BY MR. CLYDE LAWRENCE.

The clerks of the Columbus, Ga., post office respectfully submit this brief for your consideration.

In the year 1908 salaries of post-office clerks were put in grades ranging from \$800 to \$1,200 per year, with special clerk grade of \$1,300. Practically no further increase was granted until the year 1918, when we received a bonus of \$200 per year, and on July 1, 1919, an increase of \$100 per year, and on November 8, 1919, a special increase was granted for the current fiscal year only of \$150 for certain clerks and \$200 for others.

Post-office clerks' salaries do not compare favorably with those paid by private industries, the average pay per hour being about 50 cents, while other industries pay as follows:

Common laborer in building lines, 40 cents per hour; plumber, \$1 per hour; painter, 75 cents per hour; ironworker, 75 cents per hour; steam fitter, 81 cents per hour; cement finisher, 60 cents per hour; carpenter, 75 cents per hour; lath workers, 80 cents per hour; minimum salary paid clerks in local stores, \$80 per month; minimum salary paid clerks in local banks, \$125 per month; maximum salary paid clerks in local banks, \$200 per month; clerks in railroad offices, ranging from \$87.50 to \$175 per month.

It is clear that post office clerks, the nature of whose work equals any of the above occupations, do not receive sufficient pay, and if private enterprises, whose wares are bringing high prices, realize that their employees need more pay in order to pay their part of the combined increases of all wares, the Government, because their wares (postage) have not increased, certainly can not expect their employees to live on less than other employees.

An almost incomprehensible loyalty to the service, an admirable spirit, has held together this wonderful organization in spite of low wages while almost every other kind of human endeavor has found increased rewards. The most loyal have been the least rewarded. Men who have served the post office faithfully all their lives are confronted with poverty the moment they fall ill or are injured out of the line of duty. Their pay never has been sufficient to permit old-age funds of their own. Able-bodied men can not be expected to remain in the service. The unsurpassed efficiency of the Postal Service is bound to deteriorate. There ought to be immediate better pay.

There are many disagreeable features connected with the work of a post-office clerk. Nearly every clerk in the Columbus post office has at some time performed a long period of night work, the amount of night work varying according to the division; for instance, in the mailing division there are men who do constant night work with no alternating with day clerks; in the city distributing division most of the clerks work one month at night and one month at day. The only clerks in the office who have straight daywork are window clerks. The fact that clerks are required to perform night work, which causes them to necessarily have to lead very irregular lives, should be a strong factor for higher salaries. Another undesirable feature to post-office clerk work is that clerks are required to study schemes at home, which they have to do from the time they are substitutes as long as they are in the service; unless they are assigned to window work. They are examined on these schemes at least once a year. In addition to scheme study and keeping up with the many changes in the schemes, it is necessary to have a fair knowledge of the postal laws and regulations, as well as a multitude of other facts, including the schedules of trains in the division, numbers of trains in the division, and many others which we recognize as essential duties, but which should be given consideration by the commission in determining the salaries of clerks.

Nearly all of the clerks in the Columbus post office, except window clerks, are required to work on Sunday. A day of compensation or overtime is given for the work performed, still none of the clerks prefer to work on Sunday. However, most of the clerks take pay instead of compensatory time, as their financial condition is so acute, and they prefer to see their families having the necessities of life rather than having a day off. Conditions that cause men to violate their obligations to their God in order that their families may not suffer certainly calls for relief.

It is a certain fact that post-office clerks are worked harder now than ever before due to an increase in general business without the corresponding increase in the number of clerks. Every clerk in the office is worked to his maximum capacity, and his work must be exact, too. This is due to the fact, too, that so many old men in the service have resigned, because of low salaries and unusual working hours with little opportunity for advancement, and, as a consequence, the service is filled with green and inexperienced men, which causes the experienced men to have to do the bulk of the work.

In conclusion we wish to thank the commission for their efforts in securing an understanding of postal conditions, and we assure you that we are thoroughly interested in the service and put forth at all times our best efforts to make the service what we wish it to be and what it ought to be—the best Postal Service in the world. The citizens of the United States wish to see all employees in the Postal Service well paid, and we believe that any recommendation that you make to Congress to that end will be the expression of the will of the people.

Briefs were submitted by W. J. Kelly, Charleston, S. C., John E. White, Atlanta, Ga., post-office clerks, Montgomery, Ala., Ed. L. King, Rome, Ga., J. R. Stone, Spartanburg, S. C., and A. E. Ragsdale et al, Atlanta, Ga., as follows:

BRIEF SUBMITTED BY MR. W. J. KELLY, CHARLESTON, S. C.

We, the clerks of the Charleston, S. C., post office, do hereby adopt the following resolutions, and favor the amendment of the present law so as to provide for three salary grades, as follows:

That the salary for the first year be \$1,800; for the second year, \$2,100; and for the third year, \$2,400, with a proviso for the immediate promotion, under the enactment of the law, of all employees of grades 1 and 2 under the old law to grade 1 under the new law, all employees of grades 3 and 4 under the old law to grade 2 under the new

law, and all employees in grades 5 and 6 under the old law to grade 3 under the new law, all future promotions to be made at the beginning of the quarter nearest to date of expiration of one year's service in the next lower grade.

Further provided that superintendent of mails and superintendent of finance should receive 80 per cent of the postmaster's salary, namely, \$2,600 minimum and \$3,000 maximum. All supervisory officials under superintendent of mails and superintendent of finance should receive no less than \$200 above the maximum salary of regular clerks.

Further provided that special clerks, that is, clerks doing work of a technical nature, be divided into two grades, respectively, \$100 and \$200, above the maximum salary of regular clerks, and that special clerkships be appointed by seniority only.

Further provided that substitute clerks be paid at the rate of 70 cents per hour, and after 1,440 hours, or six months, satisfactory service they be promoted to the first grade of regular clerk.

Further provided that clerks be allowed 88 hours, or 11 days, off for the studying of a new scheme, and 24 hours, or 3 days, for the review of an old one.

Further provided—

1. That clerks be allowed 30 days vacation and 15 days sick leave with pay.
2. That a court of justice be provided, for the fair trial of clerks, consisting of the postmaster, two clerks chosen by the accused, and an uninterested person to be chosen by the postmaster to be acceptable to all concerned.
3. That six hours' night work between 6 p. m. and 6 a. m. be equivalent to an eight-hour day.
4. That double time for all overtime performed nights, Sundays, and holidays, with time and a half for week-day overtime, should be paid.
5. That a committee of employees be appointed at each post office to meet with the postmaster once a month for exchange of ideas and to offer suggestions for the benefit of the service and local conditions.
6. That the employment of women in the Post Office Service be discouraged, as the employment of same forces men to work nights without hope of relief for day work. If women must be employed, require them to share the night work with the men.
7. That postal employees shall not be required to work more than 44 hours a week.
8. That all work performed on Sunday be compensated with pro rata time off during the following six days and all work performed on holidays be compensated with time off during the following 30 days.

GENERAL INFORMATION.

1. Fifty per cent of the men work natural hours (i. e., from 6 a. m. to 6 p. m.). All of the women work natural hours.
2. We employ no regular system for seniority promotion.
3. Most of the resignations from the service by young men are caused by night work with no hope of future permanent day work. If a regular system were devised whereby promotions were made by the length of service at night—that is, if the men were promoted in order as vacancies occurred in the permanent day work—this might serve to induce young men to remain, as they are thus given hope for permanent day work at some future time.
4. Schedule for night work: Incoming mail—Clerks work from 5.30 p. m. to 2 a. m. (one-half hour for lunch), others 7 p. m. to 3 a. m. or 11 p. m. to 8 a. m. (one hour for lunch).
Outgoing mail—Clerks work from 6 p. m. to 3 a. m. (one hour for lunch), or 10 p. m. to 7 a. m. (one hour for lunch).
Scheme study.—Clerks are required to put up two examinations per year in this office. One hour per day for three months preceding examination is necessary to properly prepare for each examination.
Number of employees at this post office, 44; number of resignations at this post office, 7 regulars, 40 substitutes.

BRIEF FILED BY JOHN E. WHITE, ATLANTA, GA.

You have heard, and will hear again, how much pay a post-office clerk should receive as a living wage. I will therefore refrain from adding anything further to that subject as I feel assured that your honorable commission will arrive at what you consider a just conclusion. But there is another fact of the utmost importance that confronts the service to-day, to which I desire to invite your attention, and that is the fact that there is no inducement held out to an old and experienced clerk to keep him in the service.

Millions of dollars are spent annually to maintain the Army and Navy, from which there is no return—in cash. This money is spent for service and the Army and Navy

performs it. Now, there are millions of people in this country who never saw a battleship and never will; yet every man, woman, and child in the United States is a patron of the post office and every one of them not only wants but demands service and is entitled to it.

Now, the post office was not established for pecuniary gain on the part of the United States Government but was intended solely for service—efficient service and plenty of it. Not more than 1 man in 10,000 cares a rap whether the post office pays expenses, earns a profit, or is run at a loss as long as he gets his mail and gets it promptly.

The surest way to give the public this service is to provide the post office with a sufficient amount of efficient help, which can not be done unless you pay the employees not only a living wage but offer them an inducement to keep them in the service, for the longer they stay the more valuable their services become. This fact is self-evident.

When an experienced clerk leaves the service it cripples it that much. You can not replace that man in less than three and in some cases five years; it depends on what division the clerk was in. I repeat, therefore, that something should be done to keep a man in the service, as a clerk would be foolish to remain in the post office if he could do better elsewhere.

I have but recently returned to the post office from the Army, where I held a commission as an officer. As I had been in the Army before, I completed 5 years' service while there, although I had been out more than 15 years. When I completed this 5 years' service I was given a 10 per cent increase in my base pay. This is called "longevity pay."

Longevity pay is given to all officers regardless of rank, at the end of 5, 10, 15, and 20 years' service, making a total of 40 per cent increase in pay, which easily accounts for the fact that an officer in the Army is satisfied and few of them resign.

There is absolutely no reason why this should not prevail in the post office. It would be only delayed justice to the old and experienced clerks who have given the best part of their lives to the service and are now too old to start in something else.

Longevity pay, together with a retirement law—to which they are entitled—would, I am quite sure, solve the problem; it would give the men something to look forward to; it would keep the men in the service. A satisfied worker always gives his employer the very best there is in him; therefore, the public would be benefited as well as the service.

Excerpts from the Army pay tables concerning the pay of a second lieutenant are submitted for your comparison with the pay that is being asked for a post-office clerk. It is my belief, and also those whom I represent, that this is a more modest request and would prove more satisfactory to both the men and the Post Office Department.

Daily rates of pay to second lieutenants.

	First 5 years.	After 5 years.	After 10 years.	After 15 years.	After 20 years.
Per year.....	\$1,700.00	\$1,870.00	\$2,000.00	\$2,210.00	\$2,380.00
Per month.....	141.67	155.83	170.00	184.17	198.33
Per day.....	4.72	5.19	5.67	6.14	6.61

Daily rates of longevity pay to second lieutenants.

After 5 years.	After 10 years.	After 15 years.	After 20 years.
\$0.47	\$0.94	\$1.41	\$1.80

Daily rates of pay to retired second lieutenants.

[Retired officers receive 75 per cent of the pay of their grade (salary and increase).—R. S. 1274.]

	First 5 years.	After 5 years.	After 10 years.	After 15 years.	After 20 years.
Per year.....	\$1,275.00	\$1,402.50	\$1,530.00	\$1,657.50	\$1,785.00
Per month.....	106.25	116.87	127.50	138.12	148.75
Per day.....	3.54	3.90	4.25	4.60	4.96

In addition to the above, a second lieutenant receives from \$35 to \$40 per month (varying with the season) for quarters, fuel, and lights. The duties of a second lieutenant are not near as exacting and arduous as the duties of a post-office clerk, and the latter should be shown as much consideration as the former.

BRIEF SUBMITTED BY THE CLERKS OF THE MONTGOMERY, ALA., POST OFFICE.

At a joint meeting of the clerks of the Montgomery, Ala., post office, December 30, 1919, the following resolutions were adopted and they are respectfully submitted to the salary committee of the United States Congress for their kind consideration in adjusting the salaries of postal employees:

Resolved, 1. That a new wage scale of salaries be adopted as follows: First grade, or entrance salary, \$1,800; second grade, to be given at the expiration of the six months' probationary period, \$1,900; third grade, to be given six months from entrance to the second grade, \$2,100; fourth grade, to be given at the expiration of 12 months from entrance to third grade, \$2,400. The fourth grade to constitute the senior grade, with the exception of special clerks who shall be allowed an additional increase of \$200. Under this plan it will be noted that it is proposed for employees to reach the senior grade at the expiration of two years satisfactory service. It is believed that by shortening the number of years to reach the senior grade, a higher class of employees can be secured, and it is further believed that a clerk is as valuable to the department at the expiration of the two years as he is at the expiration of six, with only a few exceptions.

2. That the old law relative to employees taking compensatory time for services rendered on Sundays and holidays be restored. That is, clerks who perform service on Sunday be required to take an equal amount of time off on one of the six days following; and clerks who perform service on holidays be required to take an equal amount of time off on one of the 30 days following. Furthermore, that all clerks required to perform services in excess of eight hours on any other day shall receive pay at the rate of one and one-half as overtime.

3. That 30 days annual vacation with pay and 30 days sick time with pay be granted postal employees.

4. That a marked improvement be made in the existing lighting and sanitary conditions.

5. That post-office laborers' salaries be increased in proportion to that recommended for clerks.

6. That Sundays be omitted in figuring salaries of postal employees; that is, an employee's salary or compensation shall be figured at the rate of six days per week instead of seven, both for leaves of absence and overtime.

7. That 45 minutes shall constitute an hour's service for services rendered between the hours of 6 p. m. and 6 a. m.

8. That substitute clerks shall be paid at the rate of 75 cents per hour.

9. That the committee recommend a retirement measure for postal employees in keeping with that allowed employees of commercial interests.

10. That the employees of the Montgomery, Ala., post office hereby extend thanks to the Congress of the United States for the bonus allowed November 8, 1919, for the fiscal year ending June 30, 1919.

BRIEF FILED BY MR. ED. L. KING AS REPRESENTATIVE OF EMPLOYEES OF THE ROME, GA., POST OFFICE.

The employees of the Rome, Ga., post office held a meeting on September 13, 1919, for the purpose of discussing the conditions of employment in the postal service with a view toward laying before your committee some of the things which we feel should be brought to the attention of the committee.

And while we were cognizant of the fact that the committee is primarily seeking to get the facts as to compensation, we venture to include a few other items which we feel are fully as important to the post-office employee, and which we beg you to consider in connection with any proposed change in the workings of the post office which you may see necessary.

The subjects discussed at the above-mentioned meeting resulted in recommending to the committee the following:

First. That compensation of post-office employees be increased so as to be in keeping with the standard given out by the Bureau of Labor Statistics, Department of Labor, as to what is necessary to support an average American family.

Second. That a suitable retirement law be enacted to care for the superannuated employees now in the service.

Third. That post-office employees be given 30 days' leave with pay as is the case with other departments of the Government.

Fourth. That in the event of the promotion of an employee to a higher position or salary, the entire office force be given opportunity to compete for the position, seniority of course having the preference. This would remedy one of the worst features of the service, which tends to keep a man in one position regardless of his efficiency or ability.

As it is now the service is divided into three classes and the only hope for advancement in the carrier positions is through securing a transfer to the clerical force, which may only be secured on the recommendation of the supervisory official.

Fifth. That salary ratings be based on the time of employees entering the service as a substitute instead of the time of regular appointment.

Sixth. That substitutes be put on the same basis as substitutes in the city carrier force.

Seventh. That there be established a civil service court of appeals, where an employee having charges preferred against him will be allowed to present his defense openly with the assurance that his side of the controversy will receive as much consideration as that given the inspector or other officer making the charge.

Eighth. That the compensation of rural free delivery carriers be based on a standard route of 24 miles, with the same rate per mile for longer or shorter routes, and that an allowance of not less than 5 cents per mile be given for the maintenance of suitable conveyance, which they are now required to furnish and keep up without any compensation whatever.

We, the clerks of the Rome (Ga.) post office, submit to you our resolutions and data of the necessary expenses of a postal clerk in Rome, Ga.:

1. We are in favor of post-office clerks' salaries being raised to equal the amount given out as the minimum necessary for the upkeep of the average American family, by the American Labor Bureau. We believe that post-office clerks' salaries should equal railroad mechanics, firemen, and trainmen, because he has a trade and can carry it with him, but the post-office clerk's work does not fit him for any other line of work outside of the Post Office Department; and in view of the fact that the clerks in this office have to work by artificial light even during the day, will eventually cause his eyesight to deteriorate, which unfits him for other work. We think that we should be given this raise immediately and that it be retroactive to July 1, 1919.

2. Itemized expenses, year 1918, of post-office clerk in Rome (average):

5 tons coal, at \$8.50 per ton	\$42. 50
4 two-horse loads wood, at \$5 per load	20. 00
Upkeep of house, furnishings, and clothing for family	500. 00
House rent, 12 months, at \$27.50	330. 00
Personal, street, and poll tax	52. 92
Grocery bill, including meat	476. 00
Laundry	64. 90
Milk, 2 pints per day, at 10 cents per pint	73. 20
Butter, 104 pounds, at 65 cents per pound	67. 60
Medical service, including pharmacy	161. 00
Life and accident insurance	114. 00
Tonsorial, ice, and school books	43. 00
Incidentals, car fare, repairs, etc	43. 20
Grand total	1, 988. 32
Annual salary (average, including bonus)	1, 333. 33

Amount borrowed at interest or obtained from other source than earned from our occupation

654. 99

The above figures based on year 1918.

3. We believe that it would promote the efficiency of the Postal Service, as well as from a humanitarian standpoint, to provide for superannuated employees.

4. That post-office employees be given 30 days leave with pay annually as is the case in other departments of the Government.

5. We believe clerks should be promoted to higher positions according to seniority and be based not only on the salary the position pays, but he should be allowed to enter the class of work that will fit him for the next promotion. This would remedy one of the worst features of the service, which tends to keep an employees in one position regardless of his efficiency or ability.

As it is now his advancement in salary constitutes his promotion, and permits supervisory officials to select more favored employees for recommendation.

6. As substitutes are paid at the rate of 40 cents per hour and permitted to work any number of hours per day, and that regular clerks are confined to eight hours, and the entrance salary of a regular clerk is \$1,000 per annum, and a substitute's salary many times exceeds his salary as a regular clerk, we believe the entrance salary should be raised to \$1,500 per year.

7. As night work is very wearing on the nervous system, and day sleep not comparable with night sleep, we believe that 45 minutes of night work should constitute 1 hour of day work.

BRIEF SUBMITTED BY J. R. STONE FOR THE EMPLOYEES OF THE SPARTANBURG, S. C.,
POST OFFICE.

I shall endeavor to give you some facts and figures in regard to the high cost of living and its effects upon the Postal Service, especially the post-office clerks and carriers, both city and rural, at Spartanburg, S. C., for they are the ones that I come before this honorable body to represent.

Gentlemen, it is a well-known fact that the man with a small salary has had a hard fight to keep his head above water—what a problem he has had to deal with in trying to meet the many patriotic calls and obligations of the day. He has been called upon by his country to purchase war savings stamps, thrift stamps, and Liberty bonds, and various other calls, such as Red Cross, Y. M. C. A., and church donations. The records will show that we at a great sacrifice to ourselves and to our families have purchased as best we could under the conditions as they are to-day.

Spartanburg, S. C., like many other cities near camp or cantonment sites has suffered more than those not near a camp. For instance, a man living in an ordinary cottage renting, for say \$15 per month receives a notice from his landlord that his rent for the following month will be \$30 perhaps \$40. What can he do? No use to move; the next man will tell him the same thing; so it is with everything steadily advancing.

Now, gentlemen, I beg of you as representatives of this great and grand Nation to give this branch of service a living chance. I mean by that a living wage (not merely existence) one that will allow us a little more than a mere living, a wage whereby we can put aside a wee portion for a rainy day which is bound to come to one and all. Gentlemen, remember the longer this salary adjustment is delayed just so long will the United States Mail Service and the post-office clerks and carriers suffer.

Now, sir, I ask you to give us a salary of not less than \$2,000 minimum that we may be able to live, enjoy a little recreation, and feel proud that we are postal workers for the greatest Nation in the world.

Whereas the Congress of the United States has appointed a Joint Commission on Postal Salaries to carefully study and investigate the salaries of all postal employees and the conditions under which the service is carried on, with the view of making such report and recommendations as this commission in its wisdom may deem just and equitable; and

Whereas the present salaries of clerks and carriers is totally inadequate to the needs and necessities of everyday life—unskilled and illiterate wage earners and laborers in many instances making double, treble, and even fourfold more per week, month, or year than men who have grown old in the Postal Service; and we only ask a just, living recompense for trained work: Therefore, be it

Resolved, That we earnestly petition this Joint Salary Commission to carefully investigate and weigh the evidence and testimony that is produced under oath, and that they find a true and just conclusion, looking to the increase of our compensation to something commensurate with the present high cost of living and considering at the same time the fact that the best years of our lives have been devoted to this work, which requires trained, educated workmen.

DECEMBER 31, 1919.

The following is a list of eligible clerk-carriers who have resigned or declined appointments as substitutes at Spartanburg, S. C., since September 29, 1916, to present date:

Mr. C. V. Tanner, accepted, afterwards resigned; E. O. Bishop, declined; Miss M. Culp, accepted, afterwards resigned; Miss Nora McCallister, accepted, afterwards resigned; M. W. Cantrell, accepted, afterwards resigned (twice); Carl O. Page, accepted, afterwards resigned; J. Arthur Gentry, accepted, afterwards resigned; Paul Kennett, accepted, afterwards resigned; M. L. Willis, accepted, afterwards resigned; Jas. Ray, accepted, afterwards resigned (twice); W. E. Willis, accepted, afterwards resigned; Miss Virginia Burnett, accepted, afterwards resigned; W. T. Smith, accepted, afterwards resigned; Roy Coleman, accepted, afterwards resigned; J. D. Keller, declined;

R. H. Vogal, declined; W. E. Taylor, declined; L. D. Neighbors, declined; Jno. L. Goodwin, accepted, afterwards resigned.

Regular carriers quit the service: T. E. Trimmier, accepted a position in bank (six years as carrier); Earl McHugh, left the service, back to the farm (3 years as substitute and regular carrier).

BRIEF SUBMITTED BY A. E. RAGSDALE ET AL., ATLANTA, GA.

The clerks in the Atlanta (Ga.) post office respectfully submit a brief statement, with reference to the annual compensation received from the Post Office Department, and their reasons for urging you to recommend a very necessary increase in same.

We deem it unnecessary to call to your attention the unprecedented increase in the cost of the necessities of life, and the corresponding decrease in the purchasing power of the dollar.

The importance of the Post Office Service is recognized by everyone. It is most assuredly the branch of the Government which comes into more intimate contact with all the people than any other. Business depends upon it, and could not be carried on without it. The very happiness of the people depends upon it also. Truly it is an indispensable service, so closely woven into the activities of every day's existence that when it is not efficient and fails to function properly, every individual in the Nation feels the immediate effects of it.

Our clerks feel that when our case has been adequately presented and is understood, Congress will realize we have not been properly treated. The inequalities in salaries paid are known to be unexplainable and unjustified. There seems to be an entire lack of scientific application of the methods of compensation for the work performed.

The consequences will be that the Post Office Department will fail to measure up to the demands of the public, and from day to day its lack of efficiency is certain to become apparent.

The post-office clerk is a man of a higher degree of intelligence and capability than the average man. His faithfulness, loyalty, and honesty must be unquestioned. While the hours of labor are specified during the time he works, he is frequently subjected to a pressure which demands of him every particle of his strength and the closest kind of application. The work is there to do. It can not be postponed or slighted. It must be done right, and it must be done promptly and swiftly. To acquire skill in this work at least five years of training are essential. The clerk must know a great deal about many things, because the post office has become in recent years a much greater institution than it has ever been. The post office is the banking house, as well as the clearing house for letters, parcels, and newspapers. The rates of foreign exchange must be known, insurance rates comprehended, claim adjustments and banking processes understood, as well as a complete and thorough knowledge of all the regulations and requirements of the Post Office Department.

Such work can not be performed by unskilled and untrained men. The greater skill and the better their training, the better service the people obtain. For this work the post-office clerk certainly is entitled to what may be regarded as adequate compensation.

While adjustment is in progress in all kinds of business, the post-office clerk's needs have not been justly considered. His pay was not increased during the trying years from the outbreak of the World War in 1914 to 1918. If proper, fair, or just provision had been made for the post-office clerks during the years mentioned, as was made by all other great employers, the percentage of increases necessary to bring the post-office clerk up to the level of the ordinary worker would not be so great and would not be denied us because of the apparent expense to the Government.

If the Postal Service is to be operated as it should be operated, with the one aim of giving efficient service to the people, something must be done to render the service attractive to the man of ability and ambition to correct the conditions we now have existing in all parts of the country, of the complete failure of the various civil service commissions to maintain an eligible list of entrants to the Postal Service.

Our post-office clerks are prey for the loan sharks and other unworthy individuals who deal in Liberty loan bonds. They thrive upon the want and misery of the post-office clerk. However, these facts, we feel sure, will be revealed to you in the questionnaires issued to the postal employees.

To become efficient in the various duties of a post-office clerk requires an absolute freedom from want or destitution and with a corresponding peace of mind and contentment. Under existing circumstances this peace of mind, this security against want and destitution, is impossible. The post-office clerks can not live on the salary they now receive.

We can not maintain our homes. In this city rentals have increased from 20 to 100 per cent within two years. This locally is partially attributed to the great con-

flagration that completely wiped out 1,500 homes in May, 1917, few of which have been rebuilt because of the dearth of labor and material. We can not properly educate our children, nor yet give them the oft times necessary medical attention. We are required to make uncalled for sacrifices. We must put our children to work at a tender age in order to provide the necessities of life. Because of these conditions it is impossible to have efficiency amongst the clerical force, and when that is lacking, when men's spirits are broken, efficient service to the people can not be rendered.

For these reasons we respectfully request your kind consideration in behalf of the great constituency which you represent.

With confidence in your wisdom and sense of justice, we are,

Respectfully,

A. E. RAGSDALE, *Chairman,*
C. G. CLARK,
C. V. TUTWILER,
Committee.

FORMER EMPLOYEES OF ATLANTA OFFICE.

W. C. Howell left service November, 1918, salary \$1,200. He is now with circulation department of Atlanta Constitution, Atlanta, Ga., salary \$118 per month. Saturday afternoons off during summer months.

F. C. Wilson left service November, 1918, salary \$1,100. He is now employed by John L. Moore & Sons. No night work; if sick, time not lost, in addition to vacation. Salary \$125 per month.

W. F. Ritchie left service December, 1917, salary \$1,300. He is now employed by Miller Rubber Co., Atlanta, Ga. Salary \$160 per month, Saturday afternoons off the year round.

Alf. Fouché left service December, 1917, salary \$1,000. He now works with Federal Reserve Bank, Atlanta, Ga. Salary \$150 per month. Saturday afternoons off the year round.

C. W. Wager left service December, 1917, salary \$1,200. He is now employed by Bradstreet Co., Atlanta, Ga. Salary \$150 per month. Carfare to and from home daily.

Joe Smith left service March, 1917, salary \$1,100. He is now with Zone Supply Office, Atlanta, Ga. Salary \$150 per month. Saturday afternoons off.

H. E. Lee left service May, 1919, salary \$1,000. He is now employed by Southern Railway in transportation department. Salary \$95 per month, but average earnings \$135 per month.

T. A. Carter resigned May, 1918, salary \$1,300. He is now employed by Luckie Street Barber Shop; average earnings \$135 per month.

A. G. Pope resigned January, 1918, salary \$1,200. He is now employed by West Point Utilization Co., West Point, Ga. Salary \$150 per month. Saturday afternoons off.

T. W. Ramey resigned September, 1918, salary \$1,400. He now works for Travelers, Life Insurance Co. Salary \$150 per month. Saturday afternoons off the year round.

W. H. King, formerly carrier, left service April, 1914, salary \$1,200. He is now insurance adjuster for Standard Life Insurance Co.; salary \$250 per month.

R. L. Craddock left service. He is now employed by Pilgrim Health & Life Insurance Co. Salary \$200 per month.

S. R. Styron left service October, 1917. He is now employed by Zone Supply Office. Salary \$120 per month. Saturday afternoons off. During summer months, seven hours per day.

F. M. Bottoms resigned May, 1917, salary \$840. He is now employed by Zone Supply Office. Salary \$1,650 per year.

T. B. Woodhouse left service August, 1918, salary \$1,700. He is now employed by Royal Insurance Co., Atlanta, Ga., salary \$1,900. Saturday afternoons off the year round.

A. L. Ward resigned September, 1919, salary \$1,500. He is now employed as musician, Atlanta, Ga. Average earnings \$250 per month.

CITY LETTER CARRIERS.

Mr. BELL. That completes the list of clerks and we will next take up the carriers. We would like you to make your statements as brief as possible, because we would like to hear from all of you. The first on the list of carriers is Mr. J. D. Parsons.

STATEMENT OF MR. J. D. PARSONS, BIRMINGHAM, ALA.

Mr. PARSONS. Mr. Chairman and honorable members of the commission: I am a carrier from Birmingham, Ala. I entered the service on the 5th day of November, 1895, and have been continuously in the service since that date. I am here to-day with no grievance against anyone, no complaints to air, except to talk about living wages for the carriers of Alabama. That is the subject upon which I want to talk to you to-day.

In order to show the conditions that prevail, I have a personal statement from 16 out of the 17 first consecutively-numbered carriers at Birmingham, Ala. I sent them a questionnaire on the 15th day of December, 1919, asking several personal questions. From their replies I have tabulated a little statement. I find that the average ages of these men are $41\frac{1}{2}$ years; that 15 are thirty-four or more years old. (I will show you in a few minutes my reason for asking that question.) The average length of service is $15\frac{1}{10}$ years. Twelve of the 16 are married. The average family is $3\frac{3}{10}$ persons to the family. Thirteen are heads of, or the main supports of families. The average salary at the present time, including the bonus, is \$1,584.37.

I also asked this question: "Taking into consideration the present cost of living and the wage scale of other classes of workers, what do you consider a fair maximum salary for letter carriers—entrance?" The average amount which these men furnished me was \$1,793.75 for the entrance. Most of them said \$1,800, but it varied a little so as to make the average \$1,793.75. The maximum was \$2,293.75. That is the average from sixteen complete answers.

Mr. BELL. What is the average salary of these carriers now?

Mr. PARSONS. The average salary at the present time is \$1,584.37. Now, my purpose in asking the question as to age and length of time in the service, and the number in the family, was for the purpose of showing you the class of men we have in the service. You will notice they are comparatively old men, men who have assumed the obligations attendant upon a family. They are nearly all married; nearly all own their own homes. It is to this that I attribute the fact that we have kept up the service in Birmingham to a point better than in the average city of this country.

Several years ago, instead of increasing the carrier force, the deliveries were curtailed. The carriers in the service have grown old in the service. When these conditions came about—When the high cost of living and the other conditions came upon us, these men were already fixed in the service. They did not feel like throwing down and taking a chance in some other lines of work. A man of mature age does not feel like taking up something new after he has become acquainted with the line he is in. In my city I believe that it is only owing to the age of the men, and to the fact that they are looking forward to this commission for relief that they are remaining in the service. I believe they are holding on and looking forward to the time when all these things will be adjusted.

I also asked the question whether they were able to live on their salaries. One lived on his salary; one saved \$150. This was an old man without a family. The one who lived on his salary lives with his parents' family. All the others had a deficit, a deficit which averaged \$324.94.

Senator STERLING. To how many did you address these questions?

Mr. PARSONS. To 17 men. Sixteen responded. One gentleman, because he had considerable outside income of his own and would have given an unfair advantage, did not respond. This man is fairly well to do and has considerable property, and we did not run his in because it would have unfairly affected the averages. These 16 men, consecutively numbered, commencing with Carrier No. 1, with no attempt at selection, were the ones from which I tabulated this information. I also asked the question: "How was this deficit met?"

Senator STERLING. What was the answer?

Mr. PARSONS. That is what I wish to give you.

Carrier 1: "Sold my home in 1918 and used \$400 of the proceeds in that year." His deficit was \$400.

Carrier 2: He is the man I referred to as having an income from property on the outside and is not taken into the average on that account.

Carrier 3: "Borrowed money." His deficit was \$600. It was larger than the average on account of considerable sickness during the "flu" last year. This man is not on that route now, but he did have it practically through the year.

Carrier 4: "Did carpenter and barber work. Stopped one child from music and paid no rent." This man lived in his own home. His deficit was \$350.

Carrier 5: "Used savings to the amount of \$50. Sold bonds previously purchased with other money to the amount of \$100. Used own house saving rent, a hundred and fifty dollars. Chickens, garden, and interest used \$70. His deficit was \$370.

Senator STERLING. And still he had a deficit with all these advantages?

Mr. PARSONS. No; these advantages met the deficit. These advantages in addition to his salary offset the deficit.

Carrier 6: "Rented part of house and wife did sewing outside." Sewing for other families.

Carrier 7: "Worked in a retail store, \$180; overtime collecting, \$160; borrowed, \$75." This overtime collecting he did was night collecting in addition to his regular work.

Carrier 8: "Used money on hand." He was a young man with a deficit of only \$50. He had no dependents.

Carrier 9: "Two children working; sold land, cattle, and vegetables to the extent of \$500."

Carrier 10: "Failed to make payments equal to rent on home." This man had borrowed money on his home and undertook to set aside a reasonable rental as a sinking fund to repay that money and failed to keep up these payments.

Carrier 11: Single, and lived with father's family; lived on salary.

Carrier 12: "Used savings; sold land; 17-year-old boy at work."

Carrier 13: "Saved a hundred and fifty dollars." He was an old man without family and has his own home.

Carrier 14: "Garden and potatoes, \$100; Sunday work at an amusement park, \$84; work in grocery store, \$120; debt, \$160." That makes a total of \$464 that he ran behind.

Carrier 15: "Worked in store; family sold milk and vegetables; and 16-year-old son at work." His deficit was \$400.

Carrier 16: "Sold bond and war-savings stamps previously purchased and used the money." Deficit of \$250.

Carrier 17: "Used house free of rent and raised garden and chickens."

Mr. BELL. Were these carriers all in the Birmingham office?

Mr. PARSONS. Yes, sir; they were all in the Birmingham office. And these are consecutive numbers, commencing with No. 1. They are not selected cases.

Senator STERLING. Do you personally know any of them?

Mr. PARSONS. Yes, sir; I know them. I am one of them.

Mr. BELL. What number are you there?

Mr. PARSONS. I am No. 5. I gathered this information since the 15th day of December, last year, so that it is right up to date.

Now, you see what we are up against. These figures may look large, but when you consider that five years ago the \$1,200—twelve hundred one-hundred-cent dollars—that we received at that time had a purchasing power as great as the amount we are now asking we do not think you will consider that our request is unreasonable, nor out of proportion with the pay of men for similar work.

Senator STERLING. What is the length of your route?

Mr. PARSONS. I work in office buildings principally. I work some outside work before reaching the buildings and one block beyond.

Senator STERLING. You are not a rural carrier?

Mr. PARSONS. No, sir; a city carrier.

Senator STERLING. And you are speaking for——

Mr. PARSONS. The city carriers of Birmingham. These 16 men are the men with whom I am closely associated. They represent, in a general way, the carriers of the Birmingham office. These men have all assumed the obligations of a family, undertaken years ago when conditions were different from what they are now. Many of us, if we had known this, would have been rather slow about assuming obligations or expenses of that kind, I expect, so that we are appealing to you to give us the needed relief.

There are one or two other little matters I would like to mention. One is that the mounted men need some relief in Birmingham. I understand from the superintendent of carriers that they get \$350 per annum. They do not think that this is sufficient.

Mr. BELL. You mean for maintenance?

Mr. PARSONS. For maintenance of horse and buggy.

Mr. BELL. They can be given more; there is a lump sum appropriation for that purpose.

Mr. PARSONS. They estimate that \$500 per annum is as little as they can maintain them with at the present prices.

Another thing that the carriers asked me to bring before the committee is the matter of uniform. They ask that the Government buy them on a contract price and furnish them at cost, which would avoid the necessity of traveling salesmen visiting the city each year to take orders and measurements and also the increased cost incident to the credit system which we now have in furnishing them to the carriers.

Also, if you feel disposed, we would like to have a recommendation for a uniform of a little more pleasing appearance than the one we are now wearing. We think it could be improved, both in materials—especially for summer wear—and in appearance.

But, after all, the salary question is the one that affects us most vitally, so that practically a straight request for an \$1,800 entrance salary and \$2,400 maximum represents the general belief of the men in the Birmingham post office under present conditions. I thank you for your attention.

Mr. BELL. The next is Mr. J. W. Kiser, of Charlotte.

STATEMENT OF MR. J. W. KISER, CHARLOTTE, N. C.

Mr. KISER. Gentlemen, I am glad to come before you, but I would feel a great deal more at ease delivering letters. I represent Charlotte, N. C., which has the honor of being classed first in the high cost of living among the cities of the South by the Board of Labor Statistics.

Our office is like all the others; considerably short on eligible help. We have 24 carriers, and 6 left the service during the last year. Fifty eligible applicants have refused appointments in our office. That includes the clerical and carrier force both. They have not been able to supply help from the eligible list for the last year or two. They have to go out on the street and gather them in wherever they can. Our incoming parcel post was delivered during the holidays with a schoolboy in charge of it, under the supervision of the superintendent of mails. We had one regular man and a substitute, but a 20-year-old schoolboy had charge of the delivery of the parcel post, which was conducted in a building near the post-office building.

We work overtime only when we can not help it, by request of the supervisory officials, because we believe that a man doing manual or mental labor can only do efficient work eight hours a day consecutively. The loads that the carriers take out will tire them out physically, and they can not give efficient service working 10 to 12 hours a day, although we did work longer hours during the holidays for the benefit of the office.

We have a splendid force of supervisory officers and have no complaint along that line. The only complaint we have along that line where we think we are unjustly discriminated against is in the line of promotions. According to the law a carrier is not entitled to be promoted to the supervisory force. We think a carrier should be eligible to such an appointment. They come in under the same examinations as a clerk, they are under the same bond as the clerks and are supposed to be as intelligent as the clerks. I believe they should be eligible to those positions. We believe also that these recommendations should come, as they do now, through the supervisory officers.

There is, I suppose, the same things existing in our city as in the others. It is useless for me to go over the high cost of living. You know it is the ambition of every man to leave this world a better world than the one he came into. I want my boys to stand before the world better men, financially, morally, and mentally than did their father. It is impossible for a carrier to clothe and feed his family and mingle in decent society. When I say decent society I mean to make them presentable for church, school, or on the streets, and to educate his children. I am right now passing through that experience. We have a boy at home, and we are curtailing expenses in our home in order to send that boy to school, and we are going to do it. We are not going to go in debt to do it, either. We were

raised poor and we expect to die poor, but we expect to hold to our heads above water as long as we live, and his mother and I have felt that we would rather curtail expenses than curtail the education of these boys, because some day we expect them to stand before the public and the world on a higher plane than did their father and mother.

That boy has passed the civil service examinations in order that he might get work. He has been complimented on his efficient work, but he has turned down an offer of permanent work, because he can not afford to sacrifice his education.

We believe that the Government wants men that are intelligent, men that will be a credit to the American Nation and to its service, and we believe there is no other way if getting that class of men there than by offering some inducement over the outside world so as to attract the men into the service.

I came into the service just when I entered manhood. I have been in it ever since. Then it was an attractive position and paid just a little more than the average position I could pick up around town and I was glad to get it, and to-day I stand here and say that I am sorry I ever took it, because boys I was raised with and who entered other vocations of life stand head and shoulders above me financially, and I wouldn't to-day advise my boy to take the step I have taken. I advise him to stay away from the postal service, except as he can get work to help him along, but so far as a permanent position is concerned, I don't want him to take it.

I think we should have an adequate living while we are here. Of course, the same proposition confronts us that confronts everybody else. "If you don't like your job, why don't you get out?" I have been in the service 25 years and am proud of my job; proud of having given service to the people and of having given satisfaction. I stand here now and say without fear of contradiction that in 25 years and 10 months service I never had a reprimand or a demerit. The assistant postmaster is here to-day and can correct me if I am in error. That is the service I have given, and when I take into account the living conditions of to-day, trying to educate my children it is hard.

I don't know what the other clerks or carriers think, but I think that an efficient carrier is the link, the last link, and the most important link, between the public and the office. They can make the office a credit to the community or they can make it a continual source of complaint. The carriers are the men who correct the mistakes the clerks make. There is no clerk that will ever attain absolute perfection in working mail. It is almost impossible. You take a street—that clerk is trained to work that by numbers. If a man moves from there and goes somewhere else and notice is sent in, that clerk can not remember it. He has too many. When he works that mail to the old number, the carrier erases that number, puts on the correct address, and throws it back for distribution. I claim that while the expertness of the carrier is, perhaps, more limited in scope, it is greater than that of the clerk. The clerk's experience is broader; it takes in more scope. He has more to memorize than the carrier, but the carrier must be more expert.

Senator STERLING. You spoke about resignations; were they due to inadequate salary?

Mr. KISER. Yes, sir; they leave the service for the reason that the working conditions or salary are better elsewhere.

Senator STERLING. You spoke about the inability to fill the places from the eligible lists; is that due to inadequate salaries?

Mr. KISER. My own opinion is that it is. Of course I could not tell you that without asking the men, but they have stood the examinations and were offered the positions and refused them. The figures that I gave you were given to me by the assistant postmaster who has that in charge. I didn't ask the reason. I can only speak for one, and that is my own son. He was offered a position and turned it down because he could not afford to quit school and accept it. The others I do not know about. Gentlemen, I thank you.

Mr. STEENERSON. Just one question. You spoke about the carriers having a heavy load. Is it generally true in your town that a carrier has as much as he is able to carry?

Mr. KISER. I have carried on a business route—I do not serve that route now—I have carried and delivered in one day 278 pounds of mail.

Mr. STEENERSON. That was all you were able to carry?

Mr. KISER. If you would put a hundred pounds on your neck and swing it around a while you would know how it feels.

Mr. STEENERSON. Supposing there was a very large increase in the volume of mail to be delivered, could that be carried without employing more carriers?

Mr. KISER. They are not delivering now within the limit.

Mr. STEENERSON. Your observation now is that they are loaded to their capacity?

Mr. KISER. They are loaded beyond their capacity, because after you load a man beyond his capacity he can not deliver the mail as fast.

Mr. STEENERSON. Then if there was an increase in the volume of mail it would necessitate more carriers?

Mr. KISER. If a man has 100 pounds to deliver on his route, that man would deliver faster if he started off with 25 pounds and two blocks up the street picked up 25 pounds more, and so on. When a man commences to deliver his load with 75 pounds on his back and climbs a half dozen flights of stairs when he comes down his steps are not so elastic.

Mr. STEENERSON. According to your observations and knowledge of the conditions where you live an increase in the volume of mail, the number of pieces of mail, would require additional carriers?

Mr. KISER. Yes, sir.

Mr. BELL. Much obliged to you. The next on the list is Mr. M. M. Hayes, of Asheville, N. C.

STATEMENT OF MR. M. M. HAYES, ASHEVILLE, N. C.

Mr. HAYES. Gentlemen of the commission, just a brief word in corroboration of what my brother from Charlotte has stated. I want to deal particularly with the defects in the service as I see them and just briefly mention some things that I think will remedy them.

The first defect everyone has tried to bring out here to-day is the low salary, which is caused to be low by the cost of living. The figures run all the way from an 80 per cent increase to 150 per cent.

Taking 80 per cent as a safe estimate, our salaries have increased in five years, during the war times, between 30 and 40 per cent, and we are still 40 per cent behind at the lowest calculation you can make.

Another condition that has caused a depreciation in the service is the resignations and these, of course, are traceable to this high cost of living and low salary. The resignations in our office, with a force of about 60 men, city carriers, rural carriers, and city clerks, in the last year numbered about 18 men. These men were not all from the higher grades, although quite a few of our very best men have resigned and each time they have gone into better positions. A number of these resignations were men who have come into the service and stayed only a few days and saw how unattractive the service was and left.

The recruiting of new men into the service is another cause of depreciation in the service. The men we are recruiting now are of a lower grade than the men who are resigning and leaving, a lower grade of men intellectually than the older men who are leaving the service, and the standard of the service can certainly not be any higher than the men that make up the personnel of the office.

Another thing that makes for dissatisfaction is the discrimination in promotions. We do not contend that promotions should be made altogether subject to the seniority rule, but when everything else is equal, and when the service would not be impaired by it, it seems to us that seniority should be observed.

Another thing that is hard in our particular office is that we have had promiscuous transfers of men. The postmaster would issue an order that a man should be transferred to another route. You would be transferred from a route after you had been on that route long enough to know it and the people on it and were giving satisfaction. We believe that condition should be remedied. A man can certainly give better satisfaction on a route that he is acquainted with.

Another thing that makes for depreciation of the service and looks very bad for the service and that is traceable to these low salaries and the high cost of living is the increase of thievery in the service. I don't believe my office is the only one where stealing is going on. On one route where I served there were four rifled packages delivered on one trip. There has been everything stolen, from suits of clothes and shoes all down the line. They were taken out before I received them, and I had the superintendent indorse them "Bad order." I have talked to inspectors about it, and they say it is increasing all over the country, and they attribute it to nothing else than the low salaries the men are receiving.

Mr. STEENERSON. I would like to ask right there if the fact that there is no record kept of a parcel, so that you can not determine in whose hands it was when it was tampered with, is not the cause of a good deal of this stealing?

Mr. HAYES. That makes it a good deal easier; there is no doubt about that.

Mr. STEENERSON. Another reason, as I understand it, is that the parcels that are insured receive exactly the same care as those not insured, and when a man wants to steal he knows that an insured package is more valuable than one not insured. That is an advertisement of the package's value and an inducement for him to steal, so that if a man wants his package to reach its destination with certainty he had better not insure it.

Mr. HAYES. That is very well put, but I will say for the credit of the men that I do not think that this thievery is altogether traceable to the men in the postal service. In the terminals and the baggage rooms and the depots, the mail lies around exposed to railway employees and messengers and sometimes to the public, sometimes for as long as half the night or all night. It is enclosed in these ordinary tie sacks that anyone can open if they try hard enough. This matter of thievery is a thing that bothers me greatly. It is degrading to the men that they are not paid enough salaries so that they do not have to stoop to that. It is contemptible to have to deliver a package to some of your old patrons and say, "This was rifled and something stolen before it got here." I hang my head in shame when I have to do it.

Mr. STEENERSON. We have heard something like this in New York, where the drivers of the wagons are supposed to be in collusion with fences who receive these things, but I am surprised to hear of this condition in Asheville.

Mr. HAYES. On this particular day that I referred to I remember that these packages were all from northern points, probably from mail order houses in New York. I do not know where the stealing occurred.

Mr. STEENERSON. There are mail order houses in the Southern States, aren't there?

Mr. HAYES. Yes, sir. I think I have covered my time without touching on the remedies for these conditions. They are so apparent, however, that it is hardly necessary for me to mention them. The big remedy for almost all our ills is a living wage. A second remedy would be a seniority rule for promotions, where the service will not be impaired by it, and then a 45-minute hour for night work for clerks. I did not state at the beginning that I am also representing the clerks and rural carriers from my office as well as the city carriers. There should also be study periods for scheme work, or compensation for the study of scheme work.

Mr. BELL. Much obliged to you, Mr. Hayes. The next gentleman on the list is Mr. R. H. Reifensahl, of Jacksonville, Fla.

STATEMENT OF MR. R. H. REIFENSTAHL, JACKSONVILLE, FLA.

Mr. REIFENSTAHL. Mr. Chairman and honorable commissioners, in presenting the case for the Florida letter carriers, I wish to state that the living conditions in Florida and in Jacksonville particularly, as compared with the compensation given the carriers shows that the breach has widened so much that unless we get a just and equitable increase there is no hope whatever of bridging that breach.

In the data that I will present to you in my brief, I will show that articles of absolute living necessity, groceries, meats, clothing, etc., have increased a hundred to four hundred per cent, and those that have not increased that much have decreased in volume and quantity. The report for Jacksonville and vicinity by the Bradstreet and Dunn agencies show that the living costs of Jacksonville and vicinity have reached the figure of 139 per cent more than that of 1914. That, gentlemen, will show you that the dollar of to-day is at the rate of about 40 cents, whereas the dollar that we earn with the increase that has been granted us is about a 65 cent valuation. Therefore,

gentlemen, there is a difference of 35 per cent, which must be overcome. As the carriers come to the cashier's window and get their pay, they go away with the absolute knowledge that they must give labor worth 65 cents and receive 40 cents in return. The carrier in his community in the State of Florida is the lowest paid of all labor. We must make sacrifices to overcome that difference—in our food or clothing, and I will state, gentlemen, that the table that is set to-day in the letter carriers' homes is absolutely scant compared with other labor, including ordinary laborers. Laborers to-day in Jacksonville are receiving from \$3.64 to \$4.65 a day, and that is above what the automatic man is getting. Therefore, the carrier as he stands to-day must look up to the laborer, whereas the entrance to his position is based upon mental and physical examinations.

I represent the carrier division on the Civil Service Board. In 1914, for the clerk-carrier examinations, we averaged 175 applicants. On November 10, 1919, in a widely advertised examination for clerk-carriers we had one man. That is the difference. What is the incentive for men of any ability to enter the postal service?

I have a route that embraces the heart of the business district of Jacksonville. I serve banking houses every day with bonds and stocks amounting to from five thousand to a hundred and fifty thousand dollars, in my registered mail, not counting the jewelry houses and the packages I deliver to them. It seems to me that there should be a high standard set for men that perform such work.

The raise that was granted the men in 1918 was a disappointment to the automatic men. For one reason. He received a hundred dollars less and his promotion was taken away from him, and it is therefore a fact that he is troubled with financial matters.

Coming down to the men that have mounted routes, I will say that the mounted men to-day are going into their own pockets to meet the expense of horse hire. The horse hire in Jacksonville last week went up \$2 at the boarding stables. That means that the man with a horse, the mounted man, must provide that out of his own pocket, and the condition of these men is absolutely deplorable.

Mr. BELL. \$2 increase, is that per week?

Mr. REIFENSTAHL. Per month. \$2 a month. I think it went up to \$36.

Mr. STEENERSON. Do they hire horses?

Mr. REIFENSTAHL. The horse hire goes to the boarding stable men; the people that board the horses for the mounted carriers.

Mr. STEENERSON. The carrier buys his own horse?

Mr. REIFENSTAHL. He buys his own horse, he has his own rig and his own harness.

Mr. STEENERSON. Is that in the City Delivery Service?

Mr. REIFENSTAHL. In the City Delivery Service; yes, sir.

Mr. BELL. And then he boards that horse at a stable, is that it?

Mr. REIFENSTAHL. Some board them at a stable and some at home.

Mr. STEENERSON. He is on the same basis as a rural carrier?

Mr. REIFENSTAHL. No, sir; not as to salary.

Senator MOSES. He gets an allowance?

Mr. REIFENSTAHL. He is allowed, I think, \$31.

Mr. STEENERSON. \$31 a month?

Mr. REIFENSTAHL. I think it is \$31.25.

Mr. STENERSON. Is that in Jacksonville?

Mr. REIFENSTAHL. Jacksonville, Fla. And to think that that man has to go down in his own pocket to bear expenses that a Government-run post office has promised to bear for him.

Mr. STENERSON. What is it, parcels he carries?

Mr. REIFENSTAHL. He carries parcels and first-class mail; all kinds of mail.

Mr. STENERSON. What is his salary?

Mr. REIFENSTAHL. His salary is the same as any other city carrier. If he is a full-paid man, he receives \$1,650, but the fact is that the horse hire is taking money out of his pocket.

I also want to state that the substitutes come down and spend their time, for which they receive no compensation. They receive 60 cents an hour for the time they work, but they don't always work. But they have to be on duty day and night, so that they will be there when the time comes to work, whether it be 1 hour or 2 hours or 10 hours.

Senator STERLING. And they are subject to call?

Mr. REIFENSTAHL. They are subject to call.

And I will say, gentlemen—not discounting my neighbors that receive more money than I do, and there is not a one that doesn't—while I am absolutely compelled to adhere to the Postal Department for a livelihood, for the simple reason that when I come home at night I am so tired from trudging up and down with my mail that it is impossible for me to take any other position to add to my earnings.

Mr. BELL. We are much obliged to you.

The brief referred to follows:

BRIEF SUBMITTED BY MR. R. H. REIFENSTAHL, OF JACKSONVILLE, FLA.

The letter carriers of the State of Florida submit this brief for your consideration:

During the past five years, from 1914 to 1919, there has been a very great increase in the cost of living, amounting in nearly all instances to over 100 per cent.

As shown by reports filed with the commission and representing every section of the State of Florida, various staple articles of food have increased from 30 to over 200 per cent, with a general average of 140 per cent. There is an increase of 125 per cent in clothing and from 25 to over 500 per cent increase in rentals, according to locality.

During this same period there have only been temporary increases in salary of about 25 per cent. This leaves a very wide margin, for which no provision has been made, and the only way that a post-office carrier can meet this unprovided-for difference is by lowering his standard of living, with its attendant sacrifice to his family, or by labor outside the post-office service.

These salaries (including the temporary increases) now received by carriers do not compare favorably with those paid to employees of industrial and commercial concerns and are resulting in many carriers resigning from the service in order to provide adequately for themselves and those dependent upon them. This, of course, tends to lower the general efficiency of the service.

Working conditions have become much more arduous during the past five years, due mainly to great increases in the amount of mail handled without corresponding increase in the number of carriers employed. Excessive overtime is required, with resulting detriment to the physical well-being of the carriers.

The letter carrier serving his patrons on their respective routes stands and acts as the representative of both the Government and the postmaster of the local office from which he serves. In this respect he must at all times assume and act with utmost care and precision the exacting duties both in the handling of the mail and as representative as stated above. These duties consist of all that from delivering of the daily paper and first-class mail matter to that of handling insured, c. o. d., and registered mail matter, which oftentimes amount to great sums of money. This very fact would

show that the average business man, discounting personal and private mail, must depend upon the carrier for the correctness and reliability of a vital part of his business life. For this reason the standard of the carrier force should be of the very highest. This can only be accomplished through proper compensation to induce this high standard to both enter and remain in the service.

Carrier routes throughout Florida are made up in such proportion together with working schedules that it is an impossibility to conform to them. Routes in general in Jacksonville are so large that overtime is made daily by a majority, with this knowledge in the hands of the supervisory officials. Schedules can not be followed both to the detriment of the patrons of the routes served and the carriers in their performance of delivery, thereby creating complaints from one and inefficiency from the other.

A letter carrier, owing to the fact of his strenuous duties both mentally and physically and to the exactness with which he must guard against not only his own errors but all errors of distribution that reach him, completes his day's work even though it may be of only eight hours, a tired-out and fatigued man. Owing to this fact it is an impossibility for him to consider in any manner any other employment for the purpose of revenue than that of serving his route. In this connection I may add that, day in and day out, year in and year out, through this strenuous work as it now is, superannuation and early inefficiency through age is forced upon him, and at an early date he is forced to retire.

The automatic carriers have in the past suffered more than that of the highest grade carrier, not alone from the smaller salary he has received but from the fact that in the 1918 increase he was denied the promotion which was due him and which he earnestly believes Congress meant to give him.

The present demerit system as is practiced by the Post Office Department tends to show in the eyes of the carriers that they are always doing wrong and never right or otherwise, inasmuch as a man serving faithfully and doing his work right has no mention made of this or receives no merit, but the least error or infraction of rules he invariably receives demerits. No standard is attached to giving demerits and oft-times it is made a practice to vent spite on a carrier who does not stand in favor, curried or otherwise by his immediate superior.

After careful consideration of both the Postal Service and the welfare of the letter carrier we submit for your worthy consideration and that of Congress the following, which we believe will remedy existing evils and tend to uplift both the moral efficiency and standard of both men and service.

Salary.—Based on the report and figures of the Department of Labor which under the present conditions would be a minimum or entrance salary of \$1,800 per annum to a maximum salary of \$2,400 per annum. This to be made in at least three promotions and not more than five.

Vacation.—A vacation period of 30 days with additional 30-day sick leave given only on a doctor's certificate. This would place the carrier on an equality with other departments outside of the Postal Service, including Washington, D. C.

Routes.—Shorter routes to conform with the postal laws, rules, and regulations.

Retirement.—Retirement should be made and is asked for as an absolute necessity to keep the old employees from becoming wards and objects of charity.

Overtime.—Time and a half for overtime based upon the regular eight in ten hour day.

Board of appeal.—A local and a national board of appeal to consider and pass upon all grievances and charges which may come before it. This must be considered an absolute necessity if the present or any contemplated retirement measure can be considered a success. For unless some measure of protection from persecution is given, any carrier before reaching the age of retirement can be charged with inefficiency or some other flimsy subterfuge whereby he is dismissed from the service and from which he would have no recourse or protection, unless that obtained and given by an impartial, unbiased board of this character.

Expense of equipment.—In this connection I wish to state that the mounted carriers, owing to the small compensation given them for the upkeep of their horses and rigs, to-day are paying out of their own pockets compensation which should justly be borne by the Post Office Department. This injustice can only be remedied by the granting of at least 30 per cent more horse hire money which is paid them at the present time. This, of course, is due to the advanced cost in the price of harness, wagon repairs, and feed.

Substitute carriers.—In this connection there appears to be a deplorable condition as to compensation, and can only be adjusted by either disposing entirely of this position, and placing them under a heading of special carrier with rate of pay equal to that of the entrance salary of a regular carrier but not limited to 8-hour duty, and compensation for all overtime. Or, if the present position of substitute is continued,

he should be paid equal compensation to that of a first year regular carrier, time of duty not limited to eight hours to be available at all times if necessary and compensation for overtime at the rate of 60 cents per hour. Overtime considered after eight hours has been consumed.

The carriers of the State of Florida can not but help to state that unless this commission or Congress remedy existing deplorable conditions both as to salary and working conditions, the Postal service will remain, as it is and seems to be to-day, a ridicule and joke of the industrial and labor world.

Mr. BELL. The next speaker is Mr. M. B. Henriksen, of Charleston, S. C.

STATEMENT OF MR. M. B. HENRIKSEN, CHARLESTON, S.C.

Mr. HENRIKSEN. Gentlemen, I won't bother to talk too much on this high cost of living. I have a brief on that. I will talk on some other matters. Letter carriers average generally from 9 to 12 miles walking a day, and the loads average in our city 125 pounds on some trips. We have to carry on in the rain and snow, the heat and the cold. We don't have much snow down there to go through, thank God, but we have got to go out every day just the same.

Another thing, we haven't any substitutes. It is impossible to get any, except young fellows just out of the Army. They come in for a few days until they can get something else. We had them around Christmas time. They delivered C. O. D.'s without collecting for them; threw packages in empty houses. They were two weeks getting things straightened up. When I left they hadn't gotten everything straightened up yet.

Another thing, with regard to this 3-cent postage. The Senator from my State is the one advocating the 1-cent postage, but the business interests on my route say, "Give us better service and we will be willing to pay 3-cent postage."

With regard to overtime, all the men are working overtime. They have got to. We asked the Postmaster General four years ago for four additional carriers. He came down and took away four. He cut the service. There are some places within a few blocks of the post office where they get only one delivery a day. Over one-third of the city gets only one delivery. A letter mailed above the north-central part of the city takes a day and a half for collection and two days for delivery. The postmaster is not to blame for this; neither are the supervisory officials. They have requested additional carriers time and time again, and the chamber of commerce knows it. I think the other day we got the promise of two additional carriers in response to a request through the Retail Merchants' Association.

With regard to the holiday proposition, we think that 15 days is a little too short a holiday. We should have, like the other departments, an additional allowance of 15 days for sick leave if necessary. If we are sick it comes out of our pay. We need 15 days' rest, but if we are sick for 15 days additional, I think we should be paid for it.

With regard to working on holidays and Sundays. Some days you are brought down practically for an hour or an hour and a half. That breaks up the entire day. You can't go anywhere. I think we should be allowed a whole day off if it is necessary to work on Sundays or holidays, with the exception, of course, of the Christmas holidays. It is necessary to work then.

Another thing. With regard to Saturdays, I think a bill was passed last year intending to give us a half day holiday on Saturday. The

way it read was that any holiday proclaimed by the President of the United States should be celebrated in the same manner by the postal service, but when the half-day holiday on Saturday came around it didn't apply to the postal service. If there was only one delivery on Saturday, the residence carriers could get out their mail and it would be practically the same coming down on Monday.

I think there should be a court of appeals to establish the position of men tried. There should be two courts of appeal, one in Washington and one in every post office. I do not mean to say that you should set up a commission or anything of that sort. It should consist of men in the service. The national court of appeals in Washington would consist of the Postmaster General and the other supervisory officials; one from the carriers, one from the clerks, one from the rural free delivery men, which would give every man a chance for a fair hearing. The local court of appeals, consisting of the postmaster, superintendent, and a representative of the clerks and the carriers, should sit once a month and hear petty grievances that come up, as well as recommendations for the improvement of the service. At the present time if you make any such recommendation for improvement in the service it is not accepted. Most of the differences that come up are not of such a nature that they require much settlement. One or two words in the right place will settle most of them, but sometimes they disrupt the morale of the office.

I also want to speak about the retirement feature. We have some men in the Charleston office who have been in the service for 38 years. They are barely holding on in the hope that both the Democratic and Republican Parties will remember that there was a plank in their national party platform for civil-service retirement.

Senator STERLING. Do you believe, if the salaries were reasonable, that the men would be willing to contribute something toward retirement?

Mr. HENRIKSEN. If we got a decent wage we would be willing to contribute something toward it.

Mr. Henriksen's brief follows:

Statement submitted by M. B. Henriksen, of Charleston, S. C., as representative of the following post offices in South Carolina: Aiken, Union, Chester, Anderson, Darlington, Abbeville, Greenville, Bennettsville, Georgetown, Clinton, Hartsville, Camden, Laurens, Charleston, Rock Hill, Columbia Sumter,

1. That salaries of carriers in the city delivery service be divided in three grades as follows: First, \$1,800; second, \$2,100; third, \$2,400. That promotions be made automatically to the highest grade.

2. That no discrimination be shown between carriers in the first and second class offices. All carriers to be promoted to the highest grade.

3. That no promotions be withheld or demotions made on account of old age.

4. That 80 cents per hour be allowed to substitute carriers and a regular appointment be made following one year's service as substitutes.

5. Time and one half to be allowed for all time in excess of 8 hours.

6. That 45 minutes be considered an hour in computing work performed between 6 p. m. and 6 a. m.

7. To limit the weight carried to 40 pounds for residence and 50 pounds for business carriers.

8. That carriers be allowed to transfer to clerical positions without an examination, and all supervisory positions to be filled by competitive examination held by Civil Service Commission open only to all employees of the Post Office Department alike.

9. That 30 days holiday a year be allowed to the Post Office Department the same as all other branches of the Government service, rated as 2½ days for each month worked.

10. That a whole holiday be allowed for any service performed on Sundays or holidays.

11. That 4 hours constitute a day's work on Saturday ending not later than 1 p. m.

12. That a retirement bill be passed allowing the retirement of letter carriers on three-fourths pay after 30 years service down to one-third pay for 15 years.

13. For the good of the service.

Whereas the men performing the work often see the advantages of a change whereby the service can be improved and time saved better than their superiors who are not acquainted with such facts, and often petty grievances disrupt the entire force's moral, we would recommend that a board be appointed in each office to consist of the postmaster, superintendent, one clerk and one carrier to be selected by their brother clerks and carriers, to hold meetings once each month during working hours for the reception of such suggestions as may better the service, and the settling of such petty grievances as may come before them.

The following is a sketch of salaries (per month), paid to the principal trades in Charleston, S. C.: Bricklayers, \$175; plasterers, \$175; boiler makers, \$175; machinists, \$175; plumbers, \$165; carpenters, \$165; building trade laborers, \$150; machinist and boiler maker help, \$150; letter carriers, temporary, \$83.33 to \$125; letter carriers, regular, \$66.66 to \$100.

When I entered the Postal Service in 1907 the entrance salary was \$600 and yearly increases up to \$1,200. At that time carpenters and plumbers were receiving \$50 to \$60 per month, machinists, boiler makers, bricklayers, and plasterers were receiving \$75 to \$83 per month. Through collective bargaining and strikes they have increased their salaries from 100 to 150 per cent. On January 1 these organizations are going to demand \$1 per hour, eighth hours per day \$8. If our services were worth \$100 in 1907, why not in comparison worth \$200 to-day.

The temporary increased received by us amount to 25 per cent but we received nothing during the first year of the war, while other Government employees received their increases.

According to Department of Labor reports living expenses advanced 23 per cent from 1907 to 1914, inclusive, and the July issue of the Labor Review of the Department of Labor shows an increase from January, 1915, to May, 1919, of 108 per cent average, with all articles of food over 100 per cent. Since May to August an increase of 5 per cent, making a total of 136 per cent. According to these statistics Charleston, S. C., was the third highest in the United States, showing an increase of 98 per cent in the past six years.

In interviewing the leading furnishers of our State and comparing invoices I was assured of an increase of 25 per cent in next summer's clothing and from \$2 to \$3 per pair on shoes. These orders are already placed and statements made out for same.

In my particular case I have had to let my wife go to work at a sacrifice of the ideals of an American home because this democratic Government of ours can not support in reason an employee with a wife and three children. Nearly every other carrier in our State has either to engage in side lines after their day's work is done or send other members of their families to work. Look in the Commercial Guide used by the merchants and you will see S. after their name, meaning slow pay. The only wonder is that he is able to pay at all.

I need but say that there are many men now remaining in the service only waiting to see what recommendations are made by this committee and action taken by Congress as to whether they will continue to remain in the service or seek other employment before getting too old like some of our brothers who have served 35 to 52 years and are not fit now to seek more remunerative positions.

Uniforms are another item of cost having advanced over 100 per cent.

2. We do not think that promotions should be withheld like formerly to the highest grade of carriers in the smaller offices. All city-delivery carriers should be paid the highest grade of salary.

3. It is not fair to the carrier who has given the best part of his life to the postal service to be refused promotion on account of old age or to be demoted for same.

4. In regard to this we have no regular substitute list; all are temporary appointments of young men recently discharged from the Army who only accept this job while looking for more remunerative positions elsewhere. Out of a total of eight sent for last week five refused to pay any attention to the summons, as they had got better jobs since filing application. From August 12 to 26, inclusive, I have had a substitute assigned to work my vacation. He had to learn to case and distribute mail on my territory, for which he did not receive one cent of pay. God knows I can't afford to pay him; but what about the postal service. Must a man work for 14 days for nothing in order to get 15 days' work at 40 cents per hour? This is one reason that we have no substitutes, or else those of a lower grade.

5. In regard to time and a half for overtime, we don't think this would increase the amount paid very much as, in our opinion, it would eliminate overtime, as nearly all postmasters have an allowance for extra work which they can't go beyond, and they would employ subs to do this work or would rearrange the routes to permit the employment of additional carriers. We do not want any overtime, as a man who works as hard as we do for eight hours does not feel like performing any extra work. No day in our offices when we return after the last trip of the day but what there is such an accumulation of circular mail that it takes from 20 to 30 minutes to work up same. I don't think in the last two years that I have ever seen all the mail in the offices worked up.

6. All authorities agree that night work is more strenuous on the system than day-work, and other trades penalize it by demanding time and a half to double time for work so performed. Under our department a great deal of work is performed at night, so such recommendation is no more than justifiable.

7. This is one of the reasons that you can't get any responsible carriers, as very often in our State the load carried weighs as much as 125 pounds for a trip; such loads lead to a rapid decline in health among the carriers, and is only one other reason that we should obtain more money. For this reason also there should be no difference between salaries of carriers and clerks.

8. The right of promotion to supervisory positions by carriers as passed by Congress is nullified by regulations of the department, making it impossible for a carrier to get such promotion without first transferring to the clerical force.

9. Every other of different Government branches except the postal service has 30 days' holiday, and it is not to be disputed that a man that walks an average of 12 miles a day certainly needs a longer rest than those clerks of the other Government departments who sit under fans all day at desks protected from the heat as well as the cold, rain, and snow.

10. Carriers are in many cases required to work for only one or two hours on Sundays and holidays thereby breaking up the whole day for them. This can be avoided by passing this law which will prevent them working on such days as the department would not let you work then when it has to pay you for a whole day off.

11. As all places of business suspend business for one-half day on Saturday—and most of the other crafts, including the rest of the Government employees—this bill should be passed in such a way that no other construction could be put on it.

12. The need of retirement legislation is greater than ever. Just imagine being in the service over 52 years, as most of our older men have, waiting each day to be kicked out but holding on in the hopes that both the Democratic and Republican Parties will remember that this was a plank in their national platform, and pass such legislation. I guess with the war and League of Nations this was only overlooked, and we hope you will recommend that this important piece of legislation be taken up.

STATEMENT OF MR. B. L. WALL, AUGUSTA, GA.

Mr. WALL. Mr. Chairman and honorable gentlemen, on behalf of the letter carriers of Georgia, I am pleased indeed to have the opportunity of saying a few words in a cause of such vital importance to us. You gentlemen will pardon me if I become personal, with the idea, of course, that what affects me is also typical of others similarly situated. In my office the older men are home owners. They acquired these homes under old-time conditions, with savings from the salaries paid then. They were able to acquire these homes, and now, in a measure, of course, can stand the strain a little better than those who came along later and did not get that far along in the service. To-day none of the men in the service are foolhardy or reckless enough to undertake to buy a home and pay for it out of the wages they are earning. I believe I have heard of one since I have been up here, who undertook to do that and he was later caught robbing the mails, extracting money from letters. That is the only one I have heard of who, under present conditions, was reckless enough to try it.

We have made the Postal Service our life work. We love it. No members of any trade, calling, or profession have a greater love for

their avocation than we have after due training and experience in the service, and yet the opportunity is denied us now in this chosen life work; the opportunity is not open, I say, at the present salary, of undertaking the responsibility of becoming a home owner, the great bulwark of liberty-loving democracy. The truth about the matter, gentlemen, is that we can not meet expenses under the present conditions. We can not live with the income we receive at the hands of the Government.

Six or seven years ago, when I was in the twelve-hundred grade, and that was the top—compared with my associates, my neighbors and the people with whom I mixed, skilled artisans and such like—my pay was fair. I was not in high society, with engineers and such as they, but I had better pay than the average fellow. To-day I live in a rural community because I could not get a house in the city that I could afford to pay the rent for. At present my neighbors are artisans, barbers, etc., who go to town to work, and farmers who work there, and they all make considerably more than I do.

I want to say to you, also, that we believe, as you have already heard, that the maximum salaries should be at least \$2,400 a year. I make bold to assert that when I drew my \$1,200 a year just seven years ago that as far as my expenses were concerned and as far as the expenditures in my household are concerned, it was more than \$2,400 would be to me to-day. If statistics do not bear me out in this statement then it is so much the worse for the statistics, because I know what I am talking about.

I know that I am paying 35 and 40 cents for white bacon, and I know that then I could get it for 12 cents. Statistics won't change that fact. I know that I am paying two and a half times what I used to pay for bread; three or four times as much for clothing and shoes than I did six or seven years ago. You needn't talk to me about statistics. Those are the things for which we spend our wages, and I know what I am talking about.

When we were getting \$1,200 six or seven years ago nobody said that the postal employees were overpaid; hardly anybody would have said that we didn't deserve and didn't need a raise even then, and the maximum we are asking now, I say to you gentlemen, as far as we are concerned, is less than we were getting six or seven years ago, when you count what it will buy.

There is just one other point. I did want to say a word about the applicants for entrance into the service. We are running out of men. All the parcel-post work is done practically by noncertified men. It used to be when a civil-service examination was held in Augusta just a little notice would appear in the paper, and when the day arrived for the examination the place would be crowded. Now you can hardly get a man to take the examination, and even after he does, he won't take the job.

Another thing I wish to emphasize is that we should have time and a half for overtime. A man who gets \$1,650 a year gets as overtime after his first eight hours about 57 cents an hour. The matter has already been discussed before you, and the reason is that the department in fixing the overtime figures went on the assumption that we worked 365 days a year—this year it will be 366, notwithstanding that there are Sundays and holidays, none of which we are required to work, in addition to 15 days' vacation. There are 74 days a year

by so doing you would have to increase the force. You would have to make the districts shorter, and the supervisory officials would have to furnish us supernumeraries within 30 days from the time we put in this overtime, whether we served on Christmas or New Years, or when it was, we would then get time off within the next 30 days, and that would be beneficial, both to the men and to the service.

We believe that some specified weight should determine the letter carrier's burden. As it is we have routes in the Atlanta post office that go anywhere from a hundred to a hundred and fifty pounds a trip, especially on the first trip on Monday morning. We have routes that have to have auxiliary help. We make tie-outs on the first trips, which is delivered by auxiliary help, and on the second trip we have to have automobile service. We divide our mail and it is carried up to a certain station, to depositary boxes or a certain building, and it is left there until we can work up to it, which shows you we are overburdened with mail.

We believe that the size of a route should be determined by the heaviest day a man has to work. We believe that a man ought to be able to make his route in a reasonable time and not have to split up or not have to return mail or make overtime, because it is extremely hard when a man has worked eight hours on a heavy day to work two or three hours in excess of that in order to complete his deliveries. We believe the patrons would be better satisfied and the Post Office Department better represented.

We have in our route what is called "curtailed deliveries." We believe that every route should have the maximum number of deliveries. This is due to no fault of our supervisory officials. We have districts, a portion of which have only one delivery a day.

Mr. BELL. Your time has expired and more, and if you have anything further, you may submit it in a brief.

Mr. WESTMORELAND. I believe I am about through and I have already submitted my brief.

The brief referred to follows:

BRIEF SUBMITTED BY MR. W. G. WESTMORELAND, ATLANTA, GA.

The letter carriers of Atlanta, Ga., desire to present to you the following brief, which we have condensed to such an extent as we think practicable to cover the points to be considered in the readjustment and reclassification of our salaries:

QUALIFICATIONS.

(a) An applicant for the position of letter carrier is required to pass a physical examination.

(b) He must furnish evidence of good moral character.

(c) He must pass a mental test. This test is an open competitive examination in which he must make a creditable mark in order to be placed on the eligible list.

APPOINTMENT.

(a) He is appointed as a substitute at 60 cents per hour.

(b) The length of time a substitute must serve is indefinite; on good authority it is estimated at an average of four years. The average salary is about \$50 per month.

(c) He is appointed as a regular carrier to the lowest grade, and must serve 6 years to reach the maximum grade, which makes 10 years he must serve in order to reach the \$1,650 salary, which maximum is inadequate to meet the present cost of living.

INCREASED COST OF LIVING.

(a) The necessities of life have increased from 50 per cent to more than 200 per cent in some instances, as note the following table:

	Prewar price.	Present price.
Uniform.....	\$13. 75	\$32. 95
Shoes.....	3. 50	8. 00
Shirtwaist.....	. 90	2. 25
Cap.....	1. 25	2. 25
(b) Food:		
Flour, 24-pound sack.....	. 95	2. 25
Sugar, per pound.....	. 05	. 23
Meal, per peck.....	. 15	. 70
Lard, per pound.....	. 15	. 30

Other commodities in proportion.

(c) Increase in salary from \$100 to \$137.50, a 37½ per cent increase. In view of the fact that it requires a minimum of \$1,800 per year to support a family of five, according to the report of the Federal Bureau of Statistics, we urge this commission to recommend an initial salary of \$1,800—\$2,100 for the second year and \$2,400 thereafter—these promotions to be made automatically. Adequate pay produces satisfaction, and attracts a good class of men to the service: satisfaction produces superior service and retains experienced men. According to figures furnished by the superintendent of the Atlanta post office for the fiscal year ending June 30, 1918, six regular and 23 substitute carriers quit the service. For the fiscal year ending June 30, 1919, 16 regular and 9 substitute carriers left the service, and men are constantly leaving, from which is plainly evident that the pay is not attractive. Examinations are being held three and four times a year in order to keep the force properly recruited, and at the present time we have on our list temporary substitutes. In other words, men who as yet have not passed the examination.

(d) Promotions. Before a carrier is denied his promotion, or before he shall be demoted, provision should be made to furnish him with a written copy of reasons therefor. He should be given an opportunity to appear before an impartial board appointed for this purpose to refute said charges.

SUBSTITUTES.

(a) In view of the fact that the duties of a substitute are varied and hard and that his hours are long, we urge that he be paid at the rate of 80 cents per hour, and that he be guaranteed a salary of not less than \$100 per month. He is required to report every morning, including Sundays and holidays, and often he is required to extend his work over a period of from 10 to 15 hours. He is required to buy uniforms, caps, etc., just as is a regular carrier. A great many substitutes enter the service with the responsibilities of a family already upon them.

(b) The time served as a substitute should be reckoned as a factor in regulating his initial salary. If a substitute serves one year before he is appointed, we believe that his appointment should be made to the second group, and if he has served two years, to the third group, and so on, until the maximum is reached.

VACATION.

We urge that this commission recommend a 30-day vacation in order that the men may be more fit for the work of the ensuing year. There is no set of men who are more exposed to all kinds of weather—extreme heat and extreme cold—than are the letter carriers.

SUGGESTIONS.

In addition to an adequate salary, we believe that the following suggestions carried out would prove beneficial to the service:

Compensatory time. Whenever it is necessary to the service that a carrier be required to work a portion of any Sunday or holiday, he should be given a whole day in one of the 30 days following, regardless of whether he works the entire holiday or a fractional part thereof.

Weight. Some reasonable limit of weight should be specified.

Curtailed territory. Every portion of a route should be given the maximum number of deliveries.

Size of route. A route should be laid out for eight hours' work on a maximum day.

Overtime. All time in excess of eight hours' time on week days should be paid for at the rate of time and half time.

"Speed-up" system. Abolishment of the "speed-up" system—doubling on routes on account of vacation time, and removal from routes as a punishment of offenses—for in every case it is the public as well as the carrier that suffers.

And, in conclusion, gentlemen, we should not consider the suggestions complete without a request for the retirement of the old men who have worn themselves out in the service, and we request that such legislation be based upon length of service rather than upon attained age.

Briefs were submitted by C. G. Brandon, Natchez, Miss., R. L. Jones, Fort Smith, Ark., J. W. Lavender, Columbus, Ga., W. C. Morgan et al, Chattanooga, Tenn., J. W. Markham et al, Durham, N. C., and Alvin J. Brandes, Charlotte, N. C., as follows:

BRIEF FILED BY MR. C. G. BRANDON, NATCHEZ, MISS.

Greetings from the six letter carriers of Natchez, Miss.

We wish to state that the present scale of wages paid us at this juncture is much too small to meet our actual every-day cost of living. The increased prices of 60 per cent, at the lowest estimate, compels us to place our families in a hampered predicament, constantly curtailing expenses, and too often doing without the most necessary requirements of home comforts, and with watchfulness then falling in arrears with our 30 days accounts invariably.

The fact is that postal pay has at all times been less than all employment pay rolls. The department wishes efficient employees and good workers are required, and in turn living wages should be compensated to enable it employees to cope with the present high cost at the prices prevailing.

BRIEF SUBMITTED BY MR. R. L. JONES, FORT SMITH, ARK., CHAIRMAN OF COMMITTEE.

The city letter carriers of Fort Smith, Ark., wish to file the following brief for your consideration in regard to an increase in salary:

Applicants for a civil-service examination are required to give the best of references by having vouchers signed by responsible persons, and are required to stand a rigid examination, and must be physically as well as mentally fit before being admitted to the examination. The applicants are required to take an open competitive examination from which the eligible register for appointments is made up according to the percentage attained, and must make an average of 70 per cent before being placed on the eligible register. If an appointment is made, it is first to substitute, for which the average substitute works about three years for 40 cents per hour for actual time employed (later increased to 60 cents), during which time his earnings are meager. In other words, he averages about \$50 per month (before bonus) and is required to report every day without any assurance of work. When appointed regularly, he begins at the lowest grade salary regardless of how long he has served as substitute. Letter carriers work an average of 10 years before they reach the highest grade salary. We think this is unjust. A carrier is as competent in four years' service as he will ever be.

The July, 1919, issue of the Labor Review, published by the Department of Labor, shows that for the six-year period from May 15, 1913, to May 15, 1919, the increase for food, as a whole, was 91 per cent, with nine of the most important food articles showing an increase considerably over 100 per cent. Clothing and other necessities have increased accordingly, if not more. Carriers' medium-weight uniforms in 1913 cost \$15.65; to-day the same uniform costs \$31.50. Shoes—a carrier's most expensive item—have increased at least three times in price in the past six years. During the same period the wages of employees in private industries were raised as the cost of living increased. Letter carriers have only received a temporary increase of 25 per cent since 1907, and it will require an increase of not less than 60 per cent to the salary scale now in effect to place the letter carriers on a prewar basis.

Mechanics and unskilled laborers are better paid than the trained employees in the Postal Service; besides, their moral standing is not questioned. They are not required to stand a rigid examination and have not the responsibility that the postal employees have. During the war the postal employees could not make the proper patriotic subscriptions and donations on account of inadequate salaries. At present, carriers can not purchase homes and make other necessary investments on account of inadequate salaries.

Opinions will differ more widely as to the causes for the present high prices, but there should be little disagreement as to the actual effects. We know them and we feel them, and a worker with a fixed salary like the letter carriers is the greatest sufferer of all. Advanced prices, meaning prosperity to many, have meant a constant wage reduction to the postal employees. With private industries offering more inviting inducements, many trained men have been forced from the service. Few qualified applicants have come to fill their places. Here is a situation which demands substantial relief.

The postal service is an institution of the people and should not be run for profit. Instead of turning a large sum back into the Treasury, it should be expended for the betterment of the service, and unless the trained employees are retained, the Post Office Department can not give efficient service.

Herewith attached is a wage scale of some of the skilled laborers of the city from 1913 to 1919 for an eight-hour day:

	Salary per day, 1913.	Salary per day, 1919.		Salary per day, 1913.	Salary per day, 1919.
Bricklayers.....	\$6.00	\$9.00	Painters.....	\$4.00	\$6.80
Carpenters.....	4.80	8.00	Plumbers.....	4.00	6.80
Cement finishers.....	3.50	7.00	Plasterers.....	5.00	8.00
Electricians.....	4.00	7.00			

BRIEF SUBMITTED BY MR. J. W. LAVENDER, COLUMBUS, GA.

As regards the reclassification of salaries of postal employees, the letter carriers of Columbus, Ga., ask your careful and earnest consideration of the following facts, based on personal investigation:

To be eligible for appointment as letter carrier, a man must pass a rigid civil-service examination and eligibility is based on the rating obtained.

Appointments are made in rotation to the position of substitute and is compensated at the rate of 40 cents per hour (later increased to 60 cents) for work actually performed. The length of service as substitute varies, but on an average is about two years.

On receiving regular appointment he begins at the lowest salary grade, under the present law \$1,000 per year, and is promoted successively to \$1,400 per year, with \$1,500 as the highest grade to be obtained. During his service as substitute, and on account of slow promotions, very naturally he soon goes so far in debt that it is almost impossible to get out again.

On careful investigation we have found and herewith submit the following facts to substantiate our request for a much-needed increase in salary:

First. Since 1916 the cost of living has increased at the following rate: House rent, on an average of 75 per cent; dry goods, shoes, uniforms, 200 per cent; groceries, 140 per cent; fresh meats, 130 per cent.

Since the beginning of the war private corporations have increased the pay of employees at approximately the following rates from July, 1916, to July, 1919: Railroad, 50 per cent; machinists, 70 per cent; brick masons, 100 per cent; carpenters, 100 per cent; molders, 75 per cent; cotton mills, hosiery mills, 150 per cent; printers, 75 per cent.

Local fertilizer and cotton-oil mills have actually increased the pay of colored laborers more than 100 per cent. Negro laborers with no skill whatever receive as much as letter carriers in the first grade.

We call the special attention of your honorable body to the following increases in the salaries of letter carriers: The classification law of 1907 placed the entrance salary at \$800 per year, with automatic promotions to \$1,200. On July 1, 1918, automatic promotions were suspended and a bonus of \$200 substituted, which actually amounted to only \$100 for the men in the lower grades as they had already served one year. On July 1, 1919, we were granted a temporary promotion of \$100 per year.

Think, gentlemen, since 1907 the salaries of letter carriers have only been increased 25 per cent, while the cost of living has increased more than 125 per cent.

Nevertheless, the letter carriers of our office responded almost 100 per cent in every Liberty loan and war-savings campaign, as well as all the numerous worthy causes brought about by the war.

Out of 17 carriers in this office, 14 are married and have an average of five in the family.

In view of the foregoing facts, we feel perfectly justifiable in asking your adoption of the following schedule of salaries: First grade, \$2,000; second grade, \$2,100; third grade, \$2,200; fourth grade, \$2,300; fifth grade, \$2,400.

Be it resolved, That in conjunction with our statement of facts herewith presented, we strongly urge your consideration of the following:

(1) Thirty days' sick leave; (2) thirty days' vacation; (3) a civil service court of appeals; (4) retirement for aged employees; (5) recognition of our organizations by the department, and other betterments in a general way that will tend to make our Postal Service a more efficient as well as a more attractive public institution; (6) an adequate allowance to cover cost of uniforms (as no other class of postal employees are required to wear uniforms, it is no more than common justice that the department furnish them).

BRIEF FILED BY W. C. MORGAN ET AL., CHATTANOOGA, TENN.

We, the letter carriers of Chattanooga in joint session respectfully request that our salaries be adjusted and reclassified as follows:

First grade, \$1,800 per annum.

Second grade, \$2,100 per annum.

Third grade, \$2,400 per annum.

Request that substitutes be paid at the rate of 80 cents per hour, and that after one year service they be promoted to the second grade.

We base our claims on the attached table of wages that is being paid by the different industries of Chattanooga with increases ranging from 58 to 148 per cent, compared with our 41 $\frac{1}{2}$ per cent increase in 12 years.

Also the necessities of life having increased from 50 to 336 per cent, you can readily see the conditions in which we are placed, our salaries having remained stationary until last year when Congress gave us a small bonus.

Owing to these conditions we are asking for decent wages that we may be able to clothe, feed, and educate our children in a way befitting our positions and to enable us to make payments on our little homes.

Respectfully,

W. C. MORGAN,
J. F. McPHERSON,
R. B. LANE,
Committee.

Wages being paid employees of different industries.

Wages.	1913	1919	Increase.
			<i>Per cent.</i>
Machinists.....per hour..	\$0. 40	\$0. 68	70
Blacksmiths.....do....	.35	.68	90
Boiler makers.....do....	.35	.68	90
Carmen.....do....	.29	.58	100
Switchmen.....do....	.25	.62 $\frac{1}{2}$	148 $\frac{1}{2}$
Tower men.....do....			58
Engineers.....do....			111
Bricklayers.....per hour..	.50	1. 00	100
Carpenters.....do....	.40	.75	87 $\frac{1}{2}$
Butchers.....per week..	15. 00	30. 00	100
Plumbers.....per hour..	.50	.87	74
Painters.....do....	.40	.65	62
Car inspectors.....do....	.29	.58	100

Uniforms have increased from 75 per cent to 100 per cent since 1913; coal has increased from 75 per cent to 100 per cent since 1913; and almost everything else in proportion.

We have vacancies in our carrier force which we are unable to fill on account of no regular substitutes. We have no eligible list. Routes are served by temporary appointments.

Employees leaving service during the past year:

Clerks—

3 at \$1,000 per annum.

1 at \$1,100 per annum.

2 at \$1,400 per annum.

1 at \$1,500 per annum.

1 at \$1,700 per annum.

Carriers—

2 at \$1,000 per annum.

1 at \$1,100 per annum.

1 at \$1,200 per annum.

Temporary clerks appointed and on pay roll during past year, 28.

Temporary carriers appointed and on pay roll during past year, 21.

BRIEF SUBMITTED BY MR. J. W. MARKHAM ET AL., DURHAM, N. C.

The letter carriers of the city of Durham, N. C., respectfully present to you the following data and information which to them presents the urgent need for immediate readjustment and reclassification of the salaries of city letter carriers in the United States:

1. At the present time the salaries of city letter carriers are below that of uneducated and unskilled labor in other walks of life, who are also free from any responsibility whatsoever. The city letter carrier must not only be a citizen of good repute, but must have sufficient education to stand an open competitive examination under civil-service rules and make a higher percentage than those against whom he competes for the appointment. He occupies a position of trust and confidence in the community and must in conduct and personal appearance be acceptable to the hundreds of homes to which he is daily given free access in the discharge of his duties.

2. To reach the coveted position of city carrier the applicant must undergo an apprenticeship as substitute for a term which is, on the average, four years, during which period he averages approximately \$50 per month, and when advanced from substitute to regular, the carrier must start at the very lowest grade salary and work on an average of 10 years before he can receive the highest grade salary now paid.

3. During the past five years the cost of living has increased more than 80 per cent. Through this period, and in keeping with the advance in the cost of living, the employee in private industries has been raised in proportion to the advance, while the letter carrier has, since 1907, only received a temporary increase of 25 per cent, though it would take an increase in the present salary scale of not less than 60 per cent to place the city letter carriers on a prewar basis.

4. That the demand for men of the educational qualifications and standing of citizenship required of and possessed by city letter carriers makes the present schedule of salaries too unattractive to hold the present men in the service or to recruit new men in their places, as, according to the statistics furnished by the Department of Labor, it now requires an income of not less than \$1,800 to purchase the actual necessities of life for a family of five.

In view of these facts, we earnestly pray that your commission give serious and thoughtful consideration to the enactment of the reclassification law for city letter carriers and make the following recommendations:

(a) That the salary of first grade be \$1,800; that of second grade, \$2,000; third grade, \$2,200; and fourth grade, \$2,400.

(b) That all promotions be made following the expiration of one year of service in the next lower grades.

(c) That substitute service be limited to a period not to exceed one year.

(d) That substitutes be paid at the rate of 80 cents an hour and that they be guaranteed earnings of not less than \$100 per month.

(e) That the time served as a substitute shall be reckoned as a factor in regulating the initial salary when appointed to a regular position.

BRIEF SUBMITTED BY MR. ALVIN J. BRANDES, CHARLOTTE, N. C.

As the representative of the carriers of this office Mr. J. W. Kiser, who appeared before the commission which convened in Atlanta, Ga., Saturday, January 3, 1920, did not have the time or the information to lay the full facts before the commission, I have been instructed to file a short brief with you to substantiate our claim that the present wage scale, even with the bonuses provided, is insufficient to meet the extra cost of living and to compare our wages with the wages paid workers in other vocations in this city.

Several months ago the press of the country published tables giving the average cost of living in different cities of the country; Charlotte, N. C., appeared at the head of the list as being the city in which the cost of living was highest, and Savannah, Ga., the lowest. I do not remember the exact amounts given, but as the statements were given out by Government statisticians, they should be easily available for your inspection.

It is impossible to compare salaries paid workers in other vocations with that of the postal employees for the simple fact that in no other line of work does the employment compare with that of the letter carrier or the postal clerk; therefore I will simply state the class of employment and the salaries paid for same in this city: Painters, 75 cents per hour; carpenters, 75 cents per hour; bricklayers, 75 cents per hour; plumbers, \$1 per hour; common laborers, 40 cents per hour; street-car men, 38½ to 46½; paper hangers, \$45 to \$65 per week, piecework, not over 8 hours; grocery clerks, \$18-\$20 per week, groceries at cost; clothing salesmen, \$1,600 to \$2,000 per year,

clothing at discount; furniture salesmen, \$1,600 to \$2,000 per year, also commissions: Negro porters at railroad, \$150 per month. All mechanical trades receive time and one-half for overtime and double time for Sundays and holidays. Painters who report less than 26 minutes late are paid for the full hour, and are allowed 15 minutes to wash up.

In the matter of rents, I beg to state on reliable authority that an apartment which in 1914 could be rented for \$15 now brings \$45, and others are in proportion. To state that rents have increased from 200 to 300 per cent would not be an exaggeration.

The figures on salaries are taken from personal investigation, and I know that they are not taken from hearsay.

I do not think it is necessary for me to enumerate any further, as I believe the members of the commission are well aware of the conditions in regard to clothing, shoes, and other necessary articles which are used every day in the household, so I will refrain from taking up any more of your valuable time.

Mr. BELL. The meeting will now adjourn from this hour until 2 o'clock.

(Whereupon, at 12.30 p. m. the hearing adjourned.)

AFTER RECESS.

RAILWAY POSTAL CLERKS.

Mr. BELL. The first speaker for the R. P. O. clerks is Mr. C. C. Boone.

STATEMENT OF MR. C. C. BOONE, BLACK MOUNTAIN, N. C.

Mr. BOONE. Mr. Chairman and gentlemen of the commission —

Mr. BELL. I believe you have 3 minutes, Mr. Boone.

(NOTE.—Mr. Boone being assigned only 3 minutes and not having time to deliver his prepared speech extemporized as follows:)

Mr. BOONE. Possibly it will not take me that long, but for fear that I will not, in the limited time I have at my disposal, bring to your attention something that occurred to me to-day, I will do so now. It seemed to me that some of the gentlemen who are addressing you to-day are trying to skate on some very thin ice, inadvertently treading on the surface of a slumbering volcano. This is the age of emancipated woman. Having passed 53 milestones in life's journey and having been a married man for 21 years, I would say to you gentlemen and ladies that I would not for any amount make any remark or expression that could by any stretch of the imagination be construed as reflecting in any way upon womanhood, because, as I say, after 21 years of married experience, I am yet, at the age of 53, daily trying to ingratiate myself into the good will, confidence, and esteem of the fair sex, because I, like a number of you other gentlemen, have found in that period of time that we can neither live with them nor without them.

Aside from a spirit of levity, gentlemen, allow me to say that I have always heartily subscribed to that beautiful tribute paid by Washington Irving to womankind when he said: "In the heart of every true woman there is a spark of heavenly fire which lies dormant in the broad daylight of prosperity, but which kindles, blazes up and burns in the dark hours of adversity." That is my conception of womankind, and I hope that these gentlemen who inadvertently made the mistake of possibly creating a false impression will go around and apologize to the ladies. I know they will receive them courteously and accept their apologies.

Gentlemen of the commission, will you allow me to say, and I would not undertake by any cheap process of flattery to create a false impression in the minds of you gentlemen, that as I sat there, an

interested listener, and watched you and noted your kindly and considerate attitude toward the various ones who addressed you to-day, a good many of them, perhaps, who had not had the training in life that enabled them to approach you without a good deal of fear and trembling, I will say that the manner in which you greeted them and treated them was an inspiration to me, and the fact that you who are representatives of the greatest deliberative body on earth have been chosen to come down here and meet face to face with us portends great good for the future.

And at this special period of time, a time of reconstruction, the old world forces having been broken up from their very foundations—we are starting in to reconstruct, we in the lower walks of life, not as a thing separate and apart from yourselves, but all of us recognize ourselves as being part and parcel of this great, intricate, and complex machinery called “government,” as coworkers and collaborators with you, part and parcel of you. I think all this will have such an influence on the spirit and temperament of this class of people that you will find you have builded much better than you knew or hoped when you started this splendid work which you have begun.

I want to say to you in behalf of the railway postal clerks that you with your various duties, troubles, and worries need have no fear about the postal clerks striking. You need not, for the simple fact that the man who qualifies as a railway postal clerk must be an educated man, a man who must have a good, working common-school education at least. Then, if you have an aggregation of that kind without a single illiterate man among them, you are dealing with a group of men who, without a single exception, have initiative and progressiveness, who know their duty, their relationship, and their responsibilities toward their Government. They know its history and its traditions, and they know the things this Government is based upon and what they must do in order to maintain themselves and maintain the existence of this Government, and in a time of great crisis when other classes are worrying you, you will not find the railway postal clerks coming to you and laying down ultimatums, but you will find each and every one of them at their designated places, laboring to the common end and doing their part, doing their duty and working in hearty accord with you; and I want to say in concluding these remarks that the railway mail clerks will not strike; they will not embarrass you.

If conditions get such that they can no longer continue, they will step down and out, send in their resignations and, “silently, like the Arab, fold their tents and move away.”

In that memorable and unpleasant conflict some 50 years ago, at the Battle of Manassas, there was a general, I believe, by the name of Bee, who saw his men wavering and being pressed back, and in order to rally them he galloped to their head and said, “See Jackson standing like a stone wall,” and it had a great rallying effect on his men, and I want to say to you gentlemen that although the spirit of Bolshevism may run through this country, or how much we are lashed by or impressed by this great spirit of unrest, when the worst comes to the worst, you gentlemen can say, “See the railway postal clerks standing like a stone wall.” I thank you.

Mr. BELL. The next speaker will be Mr. John Hogan, of Atlanta, Ga.

STATEMENT OF MR. JOHN HOGAN, ATLANTA, GA.

Mr. HOGAN. Mr. Chairman and gentlemen of the commission. I have been selected by the clerks of the States of Florida, Alabama, Georgia, Tennessee, and North and South Carolina, to represent their cause here to-day.

We have prepared a brief and our conclusions have been drawn from a questionnaire sent out to 500 clerks, and while the brief apparently is rather lengthy, we have confined ourselves strictly to the various phases of the service that have a bearing upon salaries, and we are here not to burden you with a lot of matter that has been gone over and over again, but to serve you, if we can. We hope we may be able to answer such questions as you may want to put to us.

Senator MOSES. Have you additional copies of that brief?

Mr. HOGAN. We have quite a number and I beg permission to file the same with you. I know it would be unfair to ask you to let us read the brief in its entirety, but I ask you if we may be allowed to read those paragraphs on which we want to lay particular stress and draw particular attention. We have gone over the brief and cut out everything we could and then carried out the points of our arguments. With your permission I will undertake to read that portion. I think I can come nearer to getting down to business by so doing. I will be as rapid as I possibly can, and in the rapid reading I know you will excuse any mistakes I may make in the reading.

(The brief in full appears hereafter.)

Mr. HOGAN. With reference to our request for back pay. The brief will show to you that the amount the clerks have drawn upon their savings and from all other sources, during the last two years, taken in connection with the high cost of living destroyed a number of homes. They have lost their homes by it and have simply used up every penny they have saved, and we feel that it is only fair that they should be reimbursed. You can partially do that by making this retroactive since the extreme high cost of living began. However, gentlemen, you must realize that to heal all of the wounds of the postal clerks and possibly every other postal employee is to give him a wage that will enable him to support his family in respectability and that is something that we can not do now.

That, gentlemen, is my conclusion, except that if you will permit me to say that we have 43 reasons in the back of this book, gathered from the men themselves, that we would like to call to your attention. I won't take up your time to read them. They give the reasons why they want that back pay and why it is they are coming to you to-day to request this raise in salary. With that I have finished, gentlemen.

Mr. STEENERSON. Aren't there a number of railway postal clerks employed at terminals?

Mr. HOGAN. How many are employed in the terminals?

Mr. STEENERSON. No, not how many; what class do they belong to?

Mr. HOGAN. They are a separate class, and Mr. Sims, who will represent the terminal clerks has all the figures.

Mr. STEENERSON. They are in a class by themselves?

Mr. HOGAN. No, sir; they are classed as railway postal clerks. You asked me the number employed.

Mr. STEENERSON. I don't care about the number. I want to know in just what class they are. A. B. or C: or what grade.

Mr. HOGAN. Most of the terminals I believe have been raised to class B. There are, I don't know how many in the country that are class B, but I think they have all been cut down and are in class B.

Mr. STEENERSON. Then there are grades within that class?

Mr. HOGAN. Yes, sir.

Mr. STEENERSON. It is pretty complicated.

Mr. HOGAN. Yes, sir; this class proposition is very complicated.

Mr. STEENERSON. You think your proposition to have one class and ten grades—is it?

Mr. HOGAN. No, sir. We want one class, practically one group of clerks, with five grades.

Mr. STEENERSON. That, you think, will simplify it?

Mr. HOGAN. It is altogether a different proposition. Under the present law we have A, B, and C. Under that proposition there would be no classes, simply five grades.

Senator MOSES. With the clerks divided into five grades?

Mr. HOGAN. Yes, sir.

Senator MOSES. As it is now, you have classes A, B, and C, and in each of these there are how many grades?

Mr. HOGAN. Ten.

Senator MOSES. Ten in each?

Mr. GROGAN. No, sir; 10 in all. Class A goes so far, class B so far, and so on.

Senator MOSES. But in your brief you state class A embraces 1 to 5 and class B embraces 1 to 7.

Mr. HOGAN. Correct.

Senator MOSES. Then that second class embraces the same as the other; 1 to 7 embraces 1 to 5.

Mr. HOGAN. That is true. I mean, to pass from class A to class B he goes up. He goes up 5, 6, and 7.

Senator MOSES. Before he can get into class B?

Mr. HOGAN. No; he is raised one grade each year until he receives the maximum after he passes from grade A. After he gets into class B there are three classes that he attains before——

Senator MOSES. Three years' service?

Mr. HOGAN. One grade each year until he reaches grade——

Senator MOSES. Grade 7?

Mr. HOGAN. Grade 7; yes, sir.

Senator MOSES. Grade 7, you mean. Grade 7 includes A and B?

Mr. HOGAN. When he gets there he can go no further unless he is assigned to a class C line. If he is on a class A line he can get no farther than 5.

Senator MOSES. Then after he gets in a class C line he can be in grades 8, 9, or 10?

Mr. HOGAN. Yes, sir.

Senator STERLING. What determines the classification of a line, the amount of business?

Mr. HOGAN. The length of the line; the importance of the run. As a matter of fact, class C lines are usually trunk lines.

Senator STERLING. I have heard it stated that that particular classification embraced in this law was framed by the railway postal clerks themselves and submitted to the committee?

Mr. HOGAN. Yes, sir.

Senator STERLING. And still that is the law you are finding fault with?

Mr. HOGAN. Yes, sir. We are finding fault with it because experience has taught us that the application of it is by no means what we expected.

Senator STERLING. Experience has taught you that it is not as easy to write a law as it looks on the face?

Mr. HOGAN. That is true; yes, sir. If the law had been applied as the postal clerks anticipated and as we felt that it should, we would have been satisfied now other than with the salaries that go with each of these grades.

Senator STERLING. You contend, then, that the administrative interpretation of this statute that you yourselves framed has been wrong?

Mr. HOGAN. I do not contend that it has not been correctly interpreted. It may be in the writing of the law.

Senator STERLING. But there has been no judicial interpretation of it. It has never been in court?

Mr. HOGAN. No, sir; we haven't the right to go to court.

(The brief referred to follows:)

STATEMENT MADE BY RAILWAY POSTAL CLERKS OF THE FOURTH DIVISION, ALABAMA, GEORGIA, FLORIDA, SOUTH CAROLINA, NORTH CAROLINA, AND TENNESSEE.

This statement prepared by the following committee: John Hogan, chairman; Fred W. Rooney, B. M. Moss, W. G. Travis, H. E. Sims, J. E. Segrest.

CLASSIFICATIONS AND ASSIGNMENTS.

Under section 1549, Postal Laws and Regulations, amended by the appropriation act of July 2, 1918, we quote the following mandatory proviso: "The Postmaster General shall * * * classify railway post offices, terminal railway post offices and transfer offices with reference to their character and importance in three classes with salary grades * * *."

The act making appropriations for the fiscal year ending June 30, 1920, further amended this section, the effect being to create two meritorious grades in classes A and B, and three meritorious grades in class C.

The grades of the basic law are specified in section 1543, Postal Laws and Regulations, and were created under the act of August 24, 1912, which is the basic law governing the salaries of all railway postal employees.

This law divided railway postal clerks into 10 grades, with annual salary at not exceeding \$900 for grade 1 to grade 10 at \$1,800, a difference of \$100 per annum for each grade.

The Postmaster General put this law into effect October 1, 1912, and classified according to their character and importance (as viewed from an administrative standpoint) all railways post office lines, terminals and transfer offices. Under the basic law class A embraced grades 1 to 4, \$900 to \$1,200; class B grades 1 to 5, \$900 to \$1,390, and class C 1 to 7, \$900 to \$1,500; grades 8, 9, and 10, \$1,600 to \$1,700, were salaries provided for clerks in charge of class C assignments, as hereinafter shown in that part of this statement, setting forth the difference and duties of assignment in each classification.

It therefore follows that railway postal clerks' salaries are fixed at a minimum and maximum rate according to the classification of their respective railway post-office lines, terminals or transfer offices and the assignments which they hold in the grades under the particular classification.

It is apparent that clerks are peculiarly interested in, and vitally affected by, any disarrangement or reduction in the classification of their railway post-office lines, under the present organization, as administered by departmental regulations which carry a corresponding reduction in grade.

Before going into further detail as to how a clerk may either be advanced or reduced in salary, allow us to show the actual classifications under the present temporary law.

Clerks and clerks in charge in class A may be graded from \$1,100 to \$1,700; class B, \$1,100 to \$1,800; class C, \$1,100 to \$2,000.

It does not necessarily follow that these clerks have reached the maximum grades in their classification; indeed, many of them have not. (Attention is invited to Exhibits A and B, with statistical information showing the number of clerks, class, grade, and average salary in the fourth division.)

This temporary increase in the pay of each grade was made possible by the act of July 2, 1918, as stated in the first paragraph under this caption, and by additional amendment of February 28, 1919.

The act of February 28, 1919, does not increase the grades, but only the amount of salary attached to them, a total of \$300 over the basic law of August 24, 1912. The creations of these new grades were mentioned in paragraph 9 of this statement, and they can perhaps be best explained in the language of the honorable Second Assistant Postmaster General in circular letter No. 821, June 16, 1919: "Attention is especially invited to the fact that there is no change in the grades for successive promotion, and that the new law creates two meritorious grades in classes A and B, and three meritorious grades in class C."

A proviso in the act of July 2, 1918, reads as follows: "that the salary of * * * railway postal clerks shall be increased during the fiscal year 1919 not more than \$200."

This proviso had the effect of preventing many clerks from receiving their automatic promotions, as provided in the basic law, and also deprived many other clerks of the right to be considered for a meritorious promotion.

To illustrate this: John Doe was regularly appointed September 30, 1916, and assigned as a clerk in the X. Y. Z. R. P. O., which had previously been designated by the Postmaster General as a class A run, and in 1916 would have paid a salary of from \$900 to a final maximum of \$1,200 per year. It is assumed that Clerk Doe had demonstrated his fitness and capabilities by not less than six months' previous service as a substitute or probationer, or else he would never be regularly appointed, and that his conduct and efficiency for one year in the X. Y. Z. R. P. O. had earned for him an automatic promotion. Consequently on October 1, 1917, his salary was increased by advancement to grade 2, at \$1,000. On October 1, 1918, he was due to receive another \$100 increase, or a promotion to grade 3, at \$1,100. He did not, and could not, receive this promotion on account of the \$200 proviso referred to. He did automatically pass from grade 2, at \$1,000 to a corresponding grade 2 at a temporary increase of \$200, but he was denied the additional \$100 which the basic law would entitle him to receive.

By the temporary act of February 28, 1919, John Doe is receiving for the current fiscal year a salary of \$1,300, or he has been temporarily advanced to a temporary salary of grade 3. He will be again denied an earned automatic promotion October 1, 1919, for the reason that section 1549, Postal Laws and Regulations, provides that no clerk can be advanced more than one grade in a period of one year. We quote from circular letter No. 821, June 16, 1919, from the Second Assistant Postmaster General Hon. Otto Praeger, as follows:

"Several superintendents have asked whether a clerk may receive an advance of \$100, and also his automatic or meritorious promotion of \$100. In reply it may be stated that the new legislation does not grant advances as referred to, and in no case can a clerk be advanced more than \$100 within a period of one year."

Thus John Doe, in 1918, is prevented from receiving his automatic promotion by a proviso in the law, and in 1919 he is again denied his automatic promotion by the interpretation of the new legislation, as cited above in circular letter No. 821. In both instances the effect is identical, and Clerk Doe loses \$200. If Clerk Doe had been assigned to a class B or class C line the situation would be unchanged, as his original appointment to any class must be grade 1.

Thus the case of John Doe is clearly one for "readjustment," and when we find, on page 2 of the annual report of the Postmaster General, that there was a total surplus in the Post Office Department of \$19,979,768.08, approximately \$20,000,000, and that for the salaries of the Railway Mail Service (all employees, p. 126), there was appropriated \$28,385,500, and an unexpended balance of \$1,892,386.42, it would seem to us that your recommendation in John Doe's case might justly be made retroactive, and that he yet receive what he had so faithfully earned, and which must have been the intention in the minds of those seeking to give him relief by legislative enactment.

The case of John Doe could be multiplied by hundreds, and you will find them in every division of the Railway Mail Service assigned to runs in each classification. Sometimes he will have been denied his \$100 meritorious promotion (there is a distinction between automatic and meritorious); again he may be unfortunate enough to have his R. P. O. line reduced in classification just before he was due to receive promotion, and while he will receive the \$100 provided in the new temporary law of February 28, 1919, he has been estopped from automatic or meritorious advancement.

Although he may continue to serve with conscientious effort, he is but human, and his mental attitude must almost invariably reduce his efficiency in dollars to his employer, the Post Office Department, in an even greater ratio than his own individual loss.

CLERKS AND CLERKS IN CHARGE.

The present organization of railway post offices for all practical purposes may be divided into only two groups as shown by this subheading.

A clerk in charge is the responsible head of the crew, as well as the executive head of the R. P. O. car or cars. His duties are minutely defined in section 1572, Postal Laws and Regulations, this section being a regulation and not a statute law.

CLASS A.

On a class A run (and as a general rule class A runs have only one clerk) the duties of a clerk in charge devolve upon that clerk. The only difference between the duties of a clerk in charge on A, B, or C runs being the volume of work both on and off duty, and the exercise of supervisory functions where there is more than one clerk in a crew. In fact, a clerk of class A must and does combine all the duties of clerk in charge, distributor, local service, etc. He must rely wholly upon his own knowledge of his duties, distribute all mail, both letters, papers, parcel post, handle the registered matter, deliver and receive mail at local stations, including catcher on nonstop stations.

In some respects these runs are the most important in the service, as all mail finally becomes local.

Class A are not necessarily separate R. P. O. lines, but are the local trains sometimes on a class B or C run. The same R. P. O. line may have trains of each classification; in fact, a great many of them are simply a lower classification on a B or C R. P. O. Numbers of former short runs have been discontinued and closed-pouch service substituted, so that few class A runs remain, where the clerk is the only one credited to the line.

Class B runs may be termed a group of railway post-office lines which the Postmaster General deems of an intermediate character and importance.

In so far as the fourth division is affected, they are runs in which two or more clerks are assigned. R. P. O. lines where the local service is heavy, where the mails received are sufficient to make a complete distribution by State or States necessary, where city distribution is frequently a part of the work and study scope.

In short, class B runs are full-fledged railway post-office lines where a distribution of mails is made similar to the service performed in the lower classification "A," and identical with service required of clerks assigned to the higher classification "C," the chief difference being in the volume of mail handled and the quantity distributed. In fact, this difference in volume handled and especially in the amount distributed (that is, the number of packages of letters, sacks of papers, and registered mail) is the principal determining factor in the present method of fixing the classification of R. P. O. lines.

The word "fixing" is used advisedly, as it must be constantly borne in mind that under the existing law the Postmaster General has the authority to fix and unfix the classification of any R. P. O. line as may seem proper, desirable, or expedient to him. This can be done, effective at any time by the promulgation of a postal regulation, which the commission to whom this statement is being submitted is fully aware has all the force of law when not in conflict with a statute.

It is true that paragraph 1, section 1549, Postal Laws and Regulations, was amended by an act of March 3, 1917, as follows:

"Hereafter when railway postal clerks are transferred from one assignment to another because of changes in the service, their salaries shall not be reduced because of such change."

We have gone into a more detailed statement of this amendment, setting forth our construction of its intent and endeavored to show how it can and has been applied in so far as its operation has affected salaries of railway postal clerks adversely. This will be found under the caption "Single classification," paragraphs 10 to 16, inclusive.

Classification of a line and assignment under that classification are inseparable factors in regulating the amount of salary that may be received by railway postal clerks. And obviously the fixing and unfixing of the classification of a line, terminal, or transfer office, or the changing and reorganization of the assignments held under that classification has a direct bearing on the salary of the employee.

This is one reason why many railway postal clerks believe that a complete readjustment of the salary grades should be made and a single standard for clerks and clerks in charge be absolutely fixed by law.

As it is to-day such an assignment or transfer carries a reduction in class and grade, and consequently length of service, experience acquired, knowledge obtained by years of continuous application and study, to say nothing of the attendant physical exertion and mental strain which enter into the daily life of every postal clerk is penalized instead of rewarded.

CLASS B.

A clerk in charge in a class B run under the present temporary law may receive the salary of grade 8, \$1,800, while other members of his crew may receive as high as grade 6 pay, \$1,600.

There is a difference of \$200 per annum in the pay of clerks in charge in both classes B and C, and the maximum salary that can be reached by other clerks or distributors in their crews. This is provided for in the basic law, which specifies "that clerks in charge of crews consisting of more than one clerk shall be clerks of grades 5 to 10, inclusive."

A clerk in charge on a class B run, who was selected or designated as such during the fiscal year July 1, 1918, to June 30, 1919, did not receive any additional compensation, or did not benefit on account of such designation during that period. He would be serving in that capacity, and did so serve, until July 1, 1919, at his previous maximum salary as a clerk, \$1,500. He was advanced July 1, 1919, to \$1,600 on account of the new law, but he would have received this increase had he only remained a clerk or distributor on his line.

Thus he has been selected as a clerk "especially adapted to the assignment and competent to direct a crew," yet, nevertheless, his actual performance of these duties and the assumption of the attendant responsibilities has added nothing to his salary, and so far as remuneration is concerned, his title is an empty one.

Indeed, if the present law should stand without any change whatever until July 1, 1923, it would be that length of time before he could be permitted to receive the maximum salary of \$1,800. In 1920 and 1921 he would not be eligible for promotion but would receive \$1,700 on July 1, 1922, and \$1,800 July 1, 1923.

This condition is made possible by the interpretation of an amendment to section No. 1549, as follows:

"Clerks assigned as clerks in charge of crews consisting of more than one clerk shall be clerks of grades 6 to 10, inclusive, and may be promoted one grade only after (3) three years' satisfactory and faithful service in such capacity."

If the construction placed on this amendment is correct, it is an essential factor in emphasizing the need of reclassification and readjustment of the salaries of railway postal clerks.

It is one of many cumulative reasons why a single standard of classification is desirable and the number of grades reduced, as proposed under the caption, "Single classification," paragraph 18.

CLASS C.

This classification, class C, under the present law is the highest attainable by clerks assigned to road duty.

The maximum salary of clerks or distributors is grade 8, at \$1,800, and for clerks in charge, \$1,900 to \$2,000.

These railway post offices are established on the trunk lines of the country's railway systems, and their importance is determined by the schedules of these trains, the connecting links of the system and other systems, the volume of all classes of mails to be carried and the scope of the distribution. Other features enter into this phase of the service, too numerous to burden the commission with detail. The fact that postal clerks are performing service in such railway post offices and receiving salaries entirely inadequate to meet their needs, considerably less than their duties, labor, and responsibilities should command, is the theme of this entire presentation of our claims.

These lines are manned by two (2) or more clerks; there is no limit. The distribution may be performed in 30 to 70 feet of car space, or there may be two (2) or more cars or an entire train of them.

The clerks in charge of both classes C and B distribute the mail as assigned by the supervisory officials. He is the head of the crew, the accountable representative of the Government. He makes the reports, sees that the mails are properly distributed, and correctly dispatched, and frequently upon his judgment depends the actual payment of money for the transportation of mails, under the space system. This is where his requisitions for "excess space" may be in one sense a warrant drawn on the public funds.

From his records are obtained the actual number of pouches handled, either in transit or distributed, their contents and origin, by whom worked, when and where delivered or received, the number of pieces of registered mail of all descriptions, and the disposition made of it.

He also has record of the sacks of papers worked by his crew, of all failures to receive, deliver, or connect mails of all classes at any point, local or junction, including outside news dealers' packages. If distribution is not completed he must show how much, in intricate detail, and the reason. If these reasons are not satisfactory to the chief clerk, he is called upon for a further explanation, and if it appears that he may have exercised poor judgment or lax supervision, his record may be charged with "minus" points under the efficiency rating system, and the bearing that this feature has upon his salary is that if he receives a sufficient number of such charges he could be reduced in grade and consequently in pay.

In case of a wreck the report he must make is a mass of detail, even to consist of the entire train, which has no bearing on the mail service except to show whether unserviceable cars were being operated or placed in the train contrary to orders or agreements. (See section 1576, Postal Laws and Regulations.)

If more mail is being carried than can be accommodated in the regular authorized space, his report must show this, how much and between what points, and the excess space, requested or utilized.

A clerk in charge must file with his chief clerk or superintendent his trip report, monthly reports, and all his special reports for permanent record.

Much more could be said relative to the work of class C clerks in charge, and what has been stated applies also to class B and class A, except as previously explained, the principal difference is in the volume of the work, responsibility involved, and number of clerks in the crews. In fact, a postal clerk's work in all classes and any grade is so similar that we have given this subject consideration under the heading, "Single classification."

CLERKS—ASSIGNMENTS.

Clerks assigned in both classes B and C are designated as distributors. The minimum and maximum grades of their salaries has heretofore been shown. They are "divided into as many groups as there are assignments in the R. P. O., and progress from the lowest to the highest assignment through the several trains in the order of importance and desirability" designated by the division superintendent.

The groups mentioned are designated as second, third, fourth, and fifth clerks, etc., or as many as may be in a crew. We must treat with these groups as we know them in this division, as the practice of assignments is not uniform and can not be on account of different conditions in every R. P. O. line in all divisions.

If there are only two men, as in the case in quite a number of class B and C runs, the second clerk usually is also the local man or exchange clerk, distributing all paper mails, while the clerks in charge work letters and handle the registers. It is, after all, just simply a matter of what duties he has been assigned by the chief clerk, and no matter what they may be, it requires the cooperation of all clerks in any crew to really successfully do the work and meet the changing and unforeseen conditions which constantly arise.

The third clerks are usually known as "side case" men, who handle the local and frequently the registers and may have other distribution. This all depends on the quantity of mails and the particular R. P. O. line, whether it be day or night service, through or local train.

The same thing is applicable to all other clerks in the crew; all distribute mail, sometimes both letters and papers of the same State or altogether letters or papers of two or more States. They are frequently assigned to assist each other at specific points and on different days of the week may have added or lessened duties. They distribute mails in accordance with schemes and schedules, supplemented by frequent special orders and almost daily changes in some particular in these schemes.

A railway postal clerk must constantly have at his mental beck and call a mass of technical detail, not only as to location, but also how to reach them by the quickest possible dispatch. All railway postal clerks are just what the term implies, and must be a combination of brain, brawn, and muscle. Their lot is hard, and the road to clerk in charge position is so long and beset with so many doubtful contingencies, so much labor, constant and never-ending study, that many capable young men who enter this service, after making a survey of the situation, having some false illusion dispelled, and viewing the hopes of other clerks shattered overnight by a reorganization, reclassification, or discontinuance of their respective R. P. O. lines, simply by the promulgation of a regulation, lose heart and resign to seek a more stable and lucrative position.

This is an additional reason for a single standard and reclassification by statute law. Had there been no war to disturb the economic conditions of the world, and if to-day we could go back to our status prior to 1914, we would still come to you with the plea for reclassification and readjustment.

While our salaries in 1914 provided a living, to-day we face a crisis, although we are not basing our claims, by any means, altogether on present cost of necessities.

We feel that an honest, capable, and efficient railway postal clerk who serves his employer, the entire citizenship of these United States, through the Post Office Department, whose entire time, under section 1599, both on and off duty, is subject to control, who expends all his energy under most trying conditions; who, by the very nature of his calling, must be away from his home one-half of his life, and who is debarred by circumstances, as well as Postal Regulations, from taking an active part in many civic affairs; who is in an isolated occupational class with nothing in common with many of his fellowmen; a class of citizen who serves behind the scenes, both night and day, receiving none of the plaudits, and sometimes much of censure from his employer—the public. We think that such a man should receive not only a living wage, but a sufficiency to provide for himself, and rear a family, without having to deny them many of the comforts and all of the luxuries of life.

WORKING CONDITIONS.

Under this caption we shall endeavor to show only such conditions as have a bearing on our salaries or the need of reclassification.

Unavoidable ones, apparently, have not heretofore been given due consideration in fixing salaries. We contend that they do have value in determining what those salaries should be, as a glass-blower or steeple-jack receives not so much pay for what work he actually does, as the hazardous conditions under which it is performed.

Our occupation was classed as extra hazardous by accident insurance companies. They preferred not to write us at all, and the excessive rates charged was really the beginning of such organization as postal clerks now have. We organized primarily for the purpose of providing ourselves with accident insurance at its actual cost.

We are perhaps engaged in one of the most dangerous civil occupations under the Federal Government.

Our duties are very irksome and nerve-racking. We have to work in fast moving trains, standing for long hours without rest, which is a constant strain upon our vitality. We must be physically fit to enter the service, and remain in good health to properly perform our duties. Our hours of duty are governed by the railroad schedules, day or night.

On practically all R. P. O. lines there is a certain amount of advance distribution necessary. Thus clerks are compelled to work under terminal sheds with the smoke, dust, and soot, often where ventilation is insufficient and frequently heat inadequate in winter. This does affect the health of a clerk, and to a certain degree his efficiency in the car.

If it be argued that lack of heat is not an unavoidable condition, we reply that even where this is adequate (and it's the exception), the sudden change in temperature by steam from the engine, when the train begins its journey, overheats the cars, and mail cars, like all other railway cars, are hard to regulate in this respect.

The same condition is applicable to lights, where electricity is used. While standing the light from storage batteries is approximately 40 per cent less than when the generator is in operation. This creates a strain on the eye, and this, together with the very exacting work of a mail distributor, forces, this class of civil employees to seek the optician's aid at an earlier age than the average normal man.

A postal clerk must exchange mails, regardless of rain, sleet, snow, or other elements, night and day, and the opening of doors makes it impossible to keep the cars at an even temperature, to say nothing of thrusting his head in a cinder-guard at sometimes a zero mark and squinting for some frozen catcher pouch while the train moves at 40 miles per hour.

The Government itself has admitted by the fumigation of mails that contagious diseases can be transmitted. A railway postal clerk is constantly handling mails which have before been handled by the hands of people in every stage of humanity's social strata. The pouches and sacks are obviously insanitary and a sack that may have been the bed of a mangy dog in some country store post office to-day, may in 12 hours be resting in your own office, filled with public documents.

A pouch that may have been the cuspidor of some thoughtless tubercular postmaster or patron in a country village, may in a few hours lie upon the separating table of a postal car, and in a few more hours be emptied on the tables of the Washington post office. Thus we are not only extra hazardous accident risks, but also unpromising

prospects for the life companies. We respectfully call your attention to the figures presented in Exhibit C, question No. 19.

There are other unavoidable conditions which could be set forth, but probably the most potent one of all is the fact that our employment unfits us for other occupations and that the experience gained in long years of service is not a saleable asset in the commercial world.

It is invaluable to the most gigantic monopoly on earth which has created it, the Post Office Department, and from an economic viewpoint alone, it will cost less in dollars and cents to pay these faithful and needy civil employees a salary commensurate with the service rendered and in keeping with the responsibilities and risk assumed, than to train some new clerk who soon must reach the same conclusion which we are endeavoring to convey.

The cost of labor turnover is yet an unsolved problem in the business world. An average of five years is necessary to properly train a first-class railway postal clerk, and his schooling is never quite complete.

A "substitute" postal clerk (this is the first mention of these indispensable young men) who enters the Railway Mail Service through the civil service first has to be untaught some of the things that he may have been led to believe such as short hours, easy work, and good pay.

He soon finds that the "lay-off" time (little understood by the uninitiated and by many business men who think we work only half time) is given him for just what it is intended—rest and study. He will be allowed 60 days to memorize an examination that contains less than 1,000 cards, and will be expected to place these cards one by one in from fifty to one hundred different 2½-inch compartments at a speed of not less than 25 per minute, and with not less than 98 per cent correct. Missing the right box, even though he knows the card, counts against him just the same, and not knowing how it is schemed only makes matters worse.

A lessened speed of a lower percentage than that mentioned results in a "minus charge" under the efficiency rating system. This applies to regular clerks as well as substitutes.

He will also be examined on Postal Laws and Regulations from time to time, and annually for the rest of his life if he remains a railway postal clerk.

If he passes, he has only just begun to study, and he keeps this up until he has learned two, three, or more States or cities, to say nothing of the knowledge he is compelled to have of the schedules, frequently of R. P. O. lines 200 to 300 miles from his own.

By a recent ruling in Circular Letter No. 821, if he is a regular clerk, the following will be required:

- Class A, grade 4.*—Not less than 2,000 cards thrown in three-year period.
- Class A, grade 5.*—Not less than 2,500.
- Class B, grade 5.*—Not less than 2,500, three-year period.
- Class B, grade 6.*—Not less than 3,000, three-year period.
- Class C, grade 6.*—3,000 cards, three-year period.
- Class C, grade 7.*—3,500 cards, three-year period.
- Class C, grade 8.*—4,000 cards, three-year period.
- Class C, clerk in charge.*—4,000 cards, three-year period.

If the clerk under any of these classifications has not cased the number of cards indicated, and if he does not make up any deficiency on or before December 31, 1919, he will be reduced to his former grade or the maximum successive grade.

His salary would be affected \$100 per year, although the act of February 28, 1919, says nothing relative to the number of cards he must have cased.

We have shown under "Classification and assignment" that clerks of the same grade are performing service in either a Class A, B, or C, R. P. O.

That clerks of the same grade are assigned in different duties and varying responsibilities in each one of these classes.

That clerks in class A work mail and perform a similar service to that in both of the two higher classes, and that their work and responsibilities vary only in volume of distribution, supervision, and clerical duties.

We have called attention to the fact that clerks in class B of a higher grade may be and are assigned to duties identical with that of a clerk in class C of a lower grade, or vice versa.

That clerks in both classes B and C are assigned to identical work in their respective R. P. O.'s, and yet be of different grades and consequently receive a higher or lower salary for the same service.

That a clerk in either classes B or C may be assigned to duties which are more important and which carry more responsibility than other clerks in their crews or the crews of other R. P. O.'s, and at the same time be of a lower grade or vice versa.

That clerks of the same grade in both of these classes are assigned to varying amount of distribution, responsibility, and quite frequently study scope, in the same railway post office.

It depends upon the trains to which assigned, their schedules, connections, and service, which the varying conditions in every division must and do regulate. There are many other reasons, too numerous to detail.

Clerks in different grades in the same R. P. O., assigned to the same crew and trains, may and do have work identical, according to the direction in which the R. P. O. is moving.

Please allow an illustration:

The clerk in charge or his second clerk may be assigned to handle and be responsible for the registered mail, as the crew goes north or east. On the return trip the third, fourth, or some other clerk of the same or a lower grade may be assigned to that duty and responsibility, ad infinitum.

You will please note that there has been but slight reference to the efficiency rating system under this subject, although it has a very great bearing, not only upon the salaries, but is a source of much dissatisfaction among railway postal clerks, and especially as to the lack of uniformity in its administration.

Referring again to the temporary law mentioned in paragraph 21, the purpose of its enactment, as postal clerks understand it, was to give to all of them, regardless of class, grade, cards, or any other reason, a little additional money to help them purchase necessities.

It is but added evidence of the need of a single classification, one of many other reasons for less flexibility in the basic law, and to just such situations must be attributed, to a very great extent, the fact that in the past fiscal year there were 1,666 resignations from the service, other than for military reasons, or a total of 3,283.

Twenty-one per cent, or one man out of each five, finds the working conditions in this service so unattractive, the remuneration so inadequate, and the "human element" brushed aside by regulations and the lack of uniformity in their administration, and adverse interpretations of law affecting railway postal clerks, that they resign to earn a livelihood in a more congenial atmosphere, where a part of their time can be called their own.

Indeed, if these conditions did not exist (and a whole pamphlet would be required to mention them all and do full justice to this subject) it is but necessary to make a casual inspection of the comparative salaries in only a few other occupations, which will be found under the caption "Living conditions," paragraphs 18 to 20.

It is not surprising that the honorable Postmaster General, in his current report, page 30, under the heading, "Railway Mail Service," in his first paragraph, uses the quoted language:

"The problem of securing a sufficient number of employees to maintain the distribution service on the trains and in the terminals is causing some concern."

We are endeavoring in this statement to point out a sure, certain, and infallible remedy for a condition which the responsible executive of the Post Office Department admits is a matter of anxiety.

The remedy is reclassification and readjustment of the salaries of railway postal clerks.

LIVING CONDITIONS.

We are confronted with a problem which to-day the whole world is seeking to solve. Railway postal clerks, with a fixed standard of earnings, are viewing this situation with a feeling of much anxiety.

Living conditions for them would be more explicitly expressed under a headnote entitled, "The problem of existence."

The average railway postal clerk would feel much chagrined if the members of your commission could take a peep behind the scenes in some of their modest homes.

You would find in a number of them a faithful wife, combining all the duties of cook, housemaid, seamstress, and in many instances laundress, whose only reward for her never-ending labors is what she eats.

You will find some children who may not fully understand, yet whose countenance indicates, that they sense some perplexing situation.

You will find the mother in hundreds of instances is forced to deny herself many actual necessities, and that the postal clerk, head of the family, is compelled to deprive himself, in every conceivable way, of things which the majority of his fellow men of "equal mental and moral qualifications" are accustomed to enjoy.

You would also discover that in other instances the wife herself had gone forth to add her earnings to the family purse, and quite frequently a child had been taken from the schoolroom to prevent a financial calamity.

You would frequently find the family housed in two or three rooms, and under such conditions as have been declared by the United States Public Health Service to be insanitary.

Our own investigations by a questionnaire sent to 500 clerks in this division have disclosed some very startling and discouraging tabulations.

The average family of 3½, within a period of one year, has been unable to expend more than \$42 for recreation. The Post Office Department, by granting a period for rest and study, admits that recreation is necessary to preserve the efficiency of a postal clerk, if for no other reason.

Notwithstanding the meager salary which, for all employees in this division, is an average of \$1,512.84, they have contributed to church and charity the average of \$37 per annum.

A money donation is the only part, in many instances, that postal clerks and their families can take in religious and civic affairs, for the simple reason that they are unable to maintain themselves in that degree of customary social requirements which is expected in the communities in which railway postal clerks should be enabled to reside.

While the average expenditure for rentals shows \$380, which would two years ago command a fairly decent home, a recent council investigation in the city of Atlanta, Ga., disclosed the fact that for residential property the rents had been increased 30 to 150 per cent.

The average food bill was \$730, and for all wearing apparel \$336.

For household refurnishings only \$56.50. A copy of the questionnaire form is attached to this statement. See Exhibit "C."

While postal clerks patriotically and sacrificingly subscribed to the limit of their ability for War Savings Stamps and Liberty bonds, question No. 30 discloses the fact that 80 per cent of them have been forced to sell. Question No. 29 shows that 90 per cent of them have had to borrow money.

The average total expense per family was \$2,364, while, as already stated, the average salary in this division for all employees is \$1,512.84, a deficit of \$851.16.

The commission, no doubt, has complete statistical information as to the increase in food products, but we reprint here (Literary Digest authority) for ready comparison a table comprising the States in the Fourth Division:

Twenty-two principal articles of food, 1913 to 1919, advanced: Alabama, 88 per cent; Florida, 88 per cent; Georgia, 86 per cent; South Carolina, 88 per cent; Tennessee, 87 per cent; the whole United States, 70 to 94 per cent.

United States Council of National Defense is authority for the following statistics: Clothing, 150 per cent; light and fuel, 80 per cent; house furnishings, 131 per cent; all wearing apparel, 100 to 150 per cent.

From authentic sources we submit a table of increase in wages for various occupations, 1913 to 1919, and as we are railroad men in every sense and a part of the crew, now under the supervision of the Government, we deem a comparison with them peculiarly applicable:

Machinists (average increase), 80 per cent; car men, 112 per cent; conductors (70 per cent in 1913 in advance of R. P. C.), 35 per cent; engineers (70 per cent in advance of R. P. C. salary in 1913), 32 per cent; firemen, 62 per cent; baggage masters, 54 per cent; flagmen, 54 per cent; porters, 73 per cent; street car men, 91 per cent; electricians, 114 per cent; carpenters, 172 per cent; brick masons, 212 per cent; railway postal clerks, 22 per cent.

Comment would be superfluous, yet there is one feature in comparison with other railroad men particularly relevant—they receive free transportation for themselves and families, and are able to take such recreation in that respect as they desire. The monetary value of these passes can be only a matter of conjecture.

Railway postal clerks not only have to spend money for photographs for their commissions, but are prohibited from using them except to go to and from duty. It is contrary to the instructions, and probably to the interstate commerce law, to use them for a day's fishing trip, 50 miles on their own R. P. O. line.

A number of railway postal clerks, as disclosed by our questionnaire, have an equity in a home which they are trying to provide, and their present predicament is one of very serious concern to them.

Certainly a man, be he postal clerk or porter (and the railroad porters are receiving salaries in a number of instances double that of the clerk who handles the Nation's business), should be paid a salary commensurate with the service which is required and which he actually delivers.

And if it be doubted that his hours of study, his attention to his duties and application to his occupation, which a great many of these men yet love, we cite as our authority the honorable Postmaster General, who says, in his report for the year

1917-18, that railway postal clerks distributed and redistributed 14,133,384,417 pieces of all classes of mail, and did it with a percentage of 99.99.

Although burdened with the unprecedented volume of mail on account of the war and handicapped by the curtailment and discontinuance of many trains and R. P. O. lines, hampered by the employment of many inexperienced men and women, both regular and uncertified, we were still capable of handling approximately 15,000,000,000 pieces of mail correctly, although some of them may have been delayed through no fault of our own.

We must say again that we have shown you not only the evident need of a substantial increase in our salaries, the desirability of a reclassification or method of regulating those salaries, but also the justice in a readjustment in numbers of instances where the law or regulations of the Postmaster General has affected them adversely and where a court of equity would grant us relief.

As state in the first paragraph, we are confronted with a problem. The only feasible remedy and practical solution which can be proposed by the millions of toilers who earn their living by the "sweat of their brow" is adequate compensation for the service rendered.

SINGLE CLASSIFICATION.

This phrase has been repeatedly employed in discussing "assignments" and "working conditions," and we believe it to be the most satisfactory solution of the salary system.

In other branches of the Postal Service there is no organization, based upon classification, of distinctive features, as A, B, or C, as is the case in the Railway Mail Service.

There may be different grades in salary for first-class post-office clerks, but they may all finally reach the maximum, and are not prevented from so doing by reason of any class restriction.

We have already shown minutely the similarity of duties and responsibilities of clerks in different classes, different assignments, and different grades.

We have pointed out the importance of local service and have shown the lack of uniformity in the compensation for the same service rendered in the different classifications.

We have shown the injustice which can be and has been done by the reduction in class of both R. P. O.'s and terminals which has automatically reduced salary or prevented promotion.

When the subject of classes is finally understood, an examination of the basic law, together with amendments referred to in this paper, will show that the Postmaster General can raise or lower a salary at will.

We claim that such discretionary power is too great and too flexible in the hands of the administrative officers of this service.

That whether by misinterpretation or administration of the law and amendments thereto, they have been so hedged in with regulations that railway postal clerks have suffered, and are yet suffering, from the full application of this system of classes.

The effect, after all, is the vital issue.

The act of March 3, 1917, paragraph 1, section 1549, Postal Laws and Regulations, is, as amended, as follows:

"Hereafter when railway postal clerks are transferred from one assignment to another, because of changes in the service their salaries shall not be reduced because of such change."

This amendment was for the purpose of protecting the salaries of railway postal clerks.

When a clerk of class A had his R. P. O. superseded by closed-pouch service, he has been placed in a terminal or given an assignment in some other R. P. O., sometimes classes B and C.

If he had reached his maximum, which was \$1,400 in 1918, he might be assigned to the same set of trains and do the identical work of his opposite man in another crew, who had reached his maximum, which in 1918 was \$1,700. Thus there would be a difference in the pay of two men on the same R. P. O. line and set of trains of \$300 per year.

In that case the transferred clerk would lose no salary, but it would take him three years to receive the same pay of the clerk who was already assigned to the class C line. This shows the injustice under the present classification and the need for a single standard, as suggested in paragraphs 17 to 19.

A class C R. P. O. in this division was reorganized on account of the discontinuance of two trains a portion of the route.

Three clerks in charge at \$1,700, and one clerk in charge at \$1,600, were left without assignment. One of them accepted a transfer to another R. P. O. and changed

his home. Before assignments could be provided for the others, two vacancies occurred on that R. P. O. in grade 10. This protected two of them. The \$1,600 clerk in charge, who had not been so designated for the three-year period, was reduced to a distributor at \$1,500. This reorganization created two class A runs on this R. P. O., but class system prevented these surplus clerks in charge from accepting these runs, as the pay at that time would be only \$1,400.

At the time of this reorganization there were two vacancies in a class B run on the same R. P. O. These clerks in charge mentioned above could not and did not take those places, because under the system they would have to be reduced in salary.

This clearly demonstrates the inequality and effect on the salaries of railway postal clerks in the application of this class system, happening on the same R. P. O. line and including all three classes, A, B, and C.

A REMEDY AND A PLAN.

A single standard with a progressive number of grades for clerks or distributors, as shown below, with a separate grade for clerks in charge of \$300 per annum above the maximum of distributors, and with no proviso before he could draw the salary; acting clerks in charge to receive the actual salary when so acting; distributors to be advanced annually under rules and regulations, both just to the Government and fair to the clerks.

Raise the standard of entrance examination and thereby keep out those who might be wanting in those attributes that are required to make a capable and efficient railway postal clerk: Substitutes, \$1,700; grade 1, \$1,900; grade 2, \$2,000; grade 3, \$2,100; grade 4, \$2,300; grade 5, \$2,500; clerks in charge, \$2,800.

That all clerks in the service on passage of bill, who are in any grade from grade 4 or below be automatically placed in same grade with salary as above, and that all clerks who at time of passage of bill are of grade 5 or over (under clerk in charge) be placed in grade 5 with salary as stated.

We would earnestly ask that the above plan be made a part of your recommendations, and that they also be retroactive to June 30, 1918. In this way you can partially reimburse the clerks for the savings drawn upon during the past five years to meet the deficit between their salaries and living expenses.

TERMINAL RAILWAY POST OFFICES AND TRANSFER CLERKS.

The primary object in the establishment of terminal railway post offices was to care for the distribution of parcel post.

- The limited space in the railway post-office lines made it imperatively necessary that some other system of working this class of mail should be devised, consequently terminal railway post offices were the result of this apparent need, and experience has shown that they are important and successful adjuncts to the Railway Mail Service.

These terminals were originally established at many railway centers in the country.

Their operation soon demonstrated that the same volume of distribution could be cared for with a greater degree of efficiency and at less cost by the discontinuance and consolidation of some of them not so advantageously located as those that are now a necessary part of this service.

As at present located, in the important gateways to the different sections of the country, it is possible for them to receive large quantities of the mails which they distribute, and thus they are enabled to work out to districts or actual points of destination, the major portion of such mails.

Their operation also demonstrated the feasibility of further expanding their functions to include the distribution of circular mail and periodical publications designated by the Post Office Department as "Blue tag."

These classes of mail had reached such volume that distribution, together with that of other mails of greater importance, made it necessary that additional space and clerical force be provided for railway post-office lines, or that their distribution be embraced in the scope of terminal work.

Under the present organization not only the mails above mentioned, but also registered matter, made-up letter mails, and a vast quantity of massed first-class matter is handled, distributed, and connected through these terminals.

In some instances daily papers are distributed to a limited extent for dispatch over closed-pouch lines.

In fact, terminal railway post offices are clearing houses for the Railway Mail Service.

The distribution required of terminal railway post offices relative to schemes and schedules is in every particular identical with those of railway post-office lines as we

have heretofore shown under other subjects treated in this statement, especially as to class C.

It is therefore necessary for clerks assigned in these terminals to devote as much time to study in order to adequately prepare themselves for the performance of their duties as clerks assigned to road work.

Organization sheets of railway post-office lines show a varying amount of time allowed for this purpose, while under an amendment to section No. 1570, Postal Laws and Regulations, will be found the following, incorporated in circular letter No. 115:

"All clerks assigned to terminals who perform distribution, or may be called upon to perform distribution in any emergency, shall be examined on the scheme of distribution and no time allowance shall be given for study in * * * terminals."

It is therefore obvious that clerks assigned in terminals are forced to make this preparation on time outside of eight hours required for their regular terminal duties.

In reply to recent inquiries terminal clerks submitted statement showing that they spend an average of 55 minutes per working day for off-duty work.

This time computed on the basis of the average pay of all terminal clerks in this division, \$1,289.61 per annum, would amount to \$123.75 per clerk, for which no compensation was received.

It would appear that compensatory time should be allowed for this absolutely necessary service required by the Post Office Department, and inasmuch as this service has already been performed by all terminal clerks, justice demands that this be retroactive.

Terminals were originally classified like railway post-office lines in accordance with their character and importance—A, B, and C.

By an order of June 19, 1915, all terminals were reduced to class A. The effect of this order was to reduce the salary and grade of such clerks who remained in the terminals previously in classes B and C, and to estop the further advancement of other clerks beyond the maximum of class A.

This injustice to a very great extent demoralized the terminal service and created a spirit of discontent among those who remained, sometimes through necessity rather than choice, and others were forced to take transfers and other assignments in order to protect their salaries.

A general curtailment of the service made it necessary for a great many clerks to accept assignments in these terminals frequently at a reduction in grade or an estoppel from further promotion.

In case a clerk declined these proffered terminal assignments they were placed on the "surplus" or unassigned list.

This general upheaval in the whole service resulting in many transfers to and from these terminals had the effect of at least temporarily reducing their efficiency. Had these terminals not been reduced in class, or if they had been then or now all under the same classification, this condition with its resulting unrest among the clerks would have been averted.

The reasons set forth showing the necessity for the single classification of R. P. O. lines apply with equal force to the terminal and transfer service.

The larger terminals employ many clerks, distribute a great volume of mail, covering a wide scope of distribution, equal to any R. P. O. line in this division.

All terminals in the fourth division are located either in or adjacent to the railroad stations, thus rendering it practicable to detail clerks for the purpose of assisting clerks in R. P. O.'s before the departure of trains.

In case of the necessity to supply a road clerk's assignment these terminal clerks are available. Thus terminal clerks are called upon to perform duties of clerks regularly assigned to lines.

Terminal clerks must not only be familiar with schemes and schedules, but also Postal Laws and Regulations relative to the proper record of registered mail, correct manner of making all reports, and such other work not usually incident to terminal duties.

Experience has demonstrated that terminals are an important and necessary complement to R. P. O. lines centering at the points where located.

One of the most important features of terminal work is that in case of the failure to complete distribution by R. P. O. lines, commonly known as "stuck mail," or failure to connect, the mail is taken into, redistributed, and dispatched by these terminals with a minimum of delay.

They serve to relieve R. P. O. lines, already receiving in the regular course of mail, the maximum which their organization can care for. For example, mail from the Treasury Department, Washington, D. C., is dispatched periodically to these terminals, such as pension and interest checks, to be worked and released on specified dates, and in addition to this, a huge quantity of Government bulletin mail is handled.

Had it not been for these terminals, the vast quantity of mail incident to the establishment of military camps, especially in the fourth division, together with the quantity of overseas mail received from the A. E. F., it would have been almost impossible to have worked all this mail in the R. P. O. lines.

Another example: The terminals receive mail of all classes from post offices and railway post offices in this and other divisions sent directly to them for distribution and dispatch, such as pouches from Chicago-Cincinnati, or Chicago and Cincinnati R. P. O.

These terminals make a more complete distribution of mail than any post office or railway post office, except the actual local separations on R. P. O. lines and their adjacent connections.

Some mails already made up by post offices and R. P. O.'s are redistributed to directs by the terminals, thus showing that a more complete distribution is made than in any other branch of the service. This relieves road clerks of a certain amount of advance work.

In addition to the work heretofore shown, terminals relieve the local post office of the handling of mail for connecting lines, both made up and for distribution.

The Atlanta, Ga., terminal relieves the local post office of the handling of all transit registered mail, and also works a portion of such mails which originate in that office.

Thus a terminal R. P. O. combines the functions of the post office and a railway post office, performing all the duties of a post office relative to distribution and dispatch. In fact, the distribution of terminals is more difficult than that of post offices, for the reason that mail received in post offices is more uniform, legible, and easier to handle first-hand than that received in terminals which originate from all sources and every section of the country. Mails received from rural districts, mill, and mining section, or what is termed by postal clerks as "mean mail." This also applies to the quality of paper mails.

In short, a terminal is a stationery railway post office, performing all the duties except that of receipt and delivery at local station.

TRANSFER CLERKS.

At many important junction points, railway postal clerks are detailed as transfer clerks.

Their duties are varied and important. They are required to keep records for use by the supervisory officials, the importance of which should not be underestimated, such as a correct record of all mail carried outside of postal cars, all mail off its regular dispatch, and the reports to be made are intricate, and upon their accuracy sometimes depends the amount of money paid for the transportation of storage mails. Also upon these reports depend the correct information as to the disposition of all delayed or irregular pouches, and they have value in tracing lost or stolen mail.

They must supervise the loading and dispatch of mails, and in case of connections missed and delayed trains, it is of greatest importance and requires not only a correct knowledge of schedules of trains arriving and departing from the junction to which transfer clerks are assigned, but must have a general knowledge of train schedules, schemes, and dispatch of mail for the whole country. A failure of prompt action on their part will result in almost a complete nullification of work done by clerks who had made the original distribution.

They are required to keep record of pouches and daily papers, from whom received and how dispatched.

Transfer clerks at the more important junctions are not only required to transfer registered mail from train to train and from post office to railroad post offices, and vice versa, but are also required to make up and dispatch pouches and jackets the same as a post office. In other words, they have the same responsibility in handling registers as any post office or railway post office line.

Notwithstanding this responsibility, the majority of these transfer clerks are classified in the lower grades.

At many points they must perform all the duties of a distributor and "round-table" man and supervise mail messengers.

They must visit letter boxes placed in stations for the convenience of the public, take the mail therefrom, cancel, and dispatch it.

One of the most responsible and important duties devolving upon him is the requisitions upon the railroad companies for all "excess" space, the great importance of which has been referred to in a preceding paragraph.

At points where no chief clerk is located, they are required to act in that capacity, in that they must supply runs and give directions in cases of emergency, such as disruption of trains, schedules, etc.

Attention is called to the fact that in the past few years many important transfer offices have been discontinued, and the mails left in charge of the railroad companies,

which condition is detrimental to the Railway Mail Service, as mails are frequently exposed to depredation and damage.

Terminal railway post offices and transfer service are integral parts of the Railway Mail Service, and what has been said in this statement relative to need of a "single classification" and "readjustment" for other railway post offices, applies with equal force.

CONCLUSIONS.

We have endeavored, in discussing the subjects in this pamphlet, to confine our statements to actual facts.

It has been difficult and tedious to write a full explanation without a mass of detail.

We have tried to say nothing that did not have a direct or indirect bearing on our salaries and the conditions under which we earn them.

It has been our purpose to hew as closely to the line as possible, and if some chips have fallen on ground irrelevant to the subject of your investigations it must be remembered that for a long, long time the railway postal clerks of this great Nation have waited patiently for just this opportunity.

We have refrained from injecting any reference to a great many things of interest and importance from the viewpoint of a railway postal clerk.

No mention has been made of the word "seniority," the slight reference to hours has not been called a "standard day" and "retirement" uppermost in the minds of many of the older clerks, does not appear in this statement elsewhere.

We have made an effort to show some inconsistencies in the basic law, and especially its administration.

We have called attention to the fact that the promulgation of a regulation, or the issuance of a ruling, or interpretation of a postal law may, can, and does frequently have a direct or implied effect on the amount of money we receive from the appropriation which you gentlemen in Congress annually make for payment of our salaries.

We invite your especial attention to Exhibit D, which shows the effect a ruling or regulation may have, and has had, on the clerks whose names are signed thereto.

We have been silent on the subject of additional pay when our cars are wrecked, detoured, or otherwise delayed, and we have made no mention of "emergency service" during Christmas holidays, or at other times, for which we neither receive compensation or sufficient travel allowance. Nor will you find this term—travel allowance—elsewhere.

The "efficiency rating system" and methods of administration have been only slightly mentioned.

We could write a book on the Post Office Department and not require many reference files.

We do not deny that there is much unrest and considerable discontent among railway postal clerks at this time, and we believe that some of the reasons have been made apparent.

We believe that the Government should be a model employer, and in all its dealings set an example as to the conditions under which its own citizens labor, as well as the remuneration for it.

We are in earnest as to our actual need for a reclassification and readjustment and the statistical information which we present is authentic to the best of our knowledge and belief.

During the "World War" railway postal clerks volunteered their services, and some of them made the supreme sacrifice.

We take great pride in calling attention to the fact that while no craft has suffered greater burdens, received less consideration, or shown greater devotion to their country than the railway postal clerks, at no time have they caused the Post Office Department the slightest concern.

A substantial increase in our pay, enabling us to provide better living conditions under which to rear our families and a more stable system of employment will have the effect of restoring to the Railway Mail Service its esprit de corps and driving discontentment from our door.

FORTY-THREE REASONS GIVEN BY RAILWAY POSTAL CLERKS WHY THEY NEED INCREASED SALARIES.

1) "The only thing that has kept our little craft from going on the rocks long ago is the loyalty of my wife, who has sacrificed the pleasures of her home, her standing in the community, and the possibility of motherhood, and has gone into a city office to earn enough money to help keep our heads above water. Why should not railway postal clerks receive enough to maintain a decent standard of living?"

(2) "Although I am living in a modest way, keeping no servants, wife doing all the housework, I have been unable to save any money during 25 years in the Railway Mail Service."

(3) "I am unable to meet my obligations on my home, and will be forced to sacrifice or lose it, unless helped by increase in salary."

(4) "Before the war and the increased cost of living, at their salaries then, no clerk was able to save and are therefore going in debt to meet present conditions."

(5) "More clerks in debt than breaking even, should have chance to save for the day when they will be placed on the scrap pile."

(6) "I have been forced to let insurance policies lapse and give up my fraternal societies, unable to meet the cost."

(7) "My health has been impaired, being forced to work extra at night to make a decent living."

(8) "I am unable to pay for needed medical attention, and my health has been injured by this forced neglect."

(9) "Am unable to buy fruit and milk, or pure butter for my children."

(10) "I am unable to give each child a quart of milk per day as doctor has advised."

(11) "Had to take two children from school and put them to work to help meet expenses."

(12) "Have to keep my children from Sunday school; unable to dress them decently."

(13) "Have been forced to sacrifice my home to get out of debt."

(14) "Forced to take out bankruptcy proceedings to save my position."

(15) "Would suggest that loan association people be called to prove financial straits of railway postal clerks."

(16) "After 16 years of service in the Railway Mail Service I find myself badly in debt."

(17) "Have to accept charity from relatives, more fortunate than I, to keep even."

(18) "Had to spend \$500 of inheritance each year for past five years to make up deficit."

(19) "Unable to attend church; can't wear decent clothes."

(20) "My daughter is at work instead of being at home, going to school."

(21) "After 16 years in mail service, my relatives have to help me take care of my family."

(22) "My family is scattered among relatives account of having to give up house; was unable to pay increased rent."

(23) "I am unable to dress myself and family decently."

(24) "My wife had to go to work to help meet expenses."

(25) "I am forced to deny myself and family on account of inadequate salary."

(26) "I am getting in debt and spending my savings of past years."

(27) "Am unable to make needed repairs on my home."

(28) "Have been forced to do outside work to make living."

(29) "I am unable to take any recreation—no funds."

(30) "I live in dread of doctor's and drug bills."

(31) "Will be compelled to resign unless my salary is increased."

(32) "Am ashamed of community in which I am forced to live in."

(33) "I have been forced to sell my Liberty bonds at a sacrifice."

(34) "We are more intelligent than train crew, receive less salary than they do."

(35) "Had to sell our cow to pay my debts."

(36) "I am a 'sub,' and have made several trips when my expenses exceeded the pay I received."

(37) "I wish to marry, but would be unable to properly support a wife on present salary."

(38) "Although I am a single man, I will have to go into other work on account of small salary received."

(39) "It takes too long for a man to reach highest grade."

(40) "From my experience I am forced to advise young men to stay out of the Railway Mail Service."

(41) "The service is depreciating on account of low salaries—keeps desirable men out."

(42) "There is a crying need for overtime in the service. Every other class of men get overtime."

(43) "As a single man, I can barely exist on present salary in Railway Mail Service. God help the married man."

EXHIBIT A.

Total number of clerks and their average salaries.

	Average salary.
57 regular clerks in Atlanta, Ga., terminal.....	\$1, 212. 30
40 acting clerks authorized, Atlanta, Ga., terminal.....	1, 100. 00
23 regular clerks, Birmingham, Ala., terminal.....	1, 270. 00
32 acting clerks authorized, Birmingham, Ala., terminal.....	1, 100. 00
5 regular clerks, Chattanooga, Tenn., terminal.....	1, 380. 00
3 acting clerks authorized, Chattanooga, Tenn., terminal.....	1, 100. 00
26 regular clerks, Nashville, Tenn., terminal.....	1, 296. 15
15 acting clerks authorized, Nashville, Tenn., terminal.....	1, 100. 00
111 total) regular clerks in terminals.	
90 total) acting clerks authorized.	
Average salary all terminals combined.....	1, 289. 61
278 substitutes in the division.....	1, 100. 00
12 unassigned clerks in the division.....	1, 115. 00
909 road clerks in the division.....	1, 584. 37
41 transfer clerks in the division.....	1, 411. 70
Average salary, all employees, including substitutes.....	1, 512. 84

EXHIBIT B.

Number of clerks in each grade, including substitute and unassigned clerks.

	Average salary.
137 clerks, grade 10.....	\$2, 000
5 clerks, grade 9.....	1, 900
303 clerks, grade 8.....	1, 800
45 clerks, grade 7.....	1, 700
150 clerks, grade 6.....	1, 600
246 clerks, grade 5.....	1, 500
14 clerks, grade 4.....	1, 400
4 clerks, grade 3.....	1, 300
50 clerks, grade 2.....	1, 200
401 clerks, grade 1.....	1, 100

EXHIBIT C.

Tabulated averages of railway postal clerks, compiled from 500 questionnaires sent.

Time in service, average, 11 years.
 Residence, average city
 Present salary, average, \$1,512.84.
 Increase in 1918 (number clerks not benefited \$200), 61 clerks.
 Increase in 1919 (number of clerks not benefited \$100), 117 clerks.
 Fair compensation, average asked for, \$2,410.
 Number in family, average, 3½ persons.
 Annual rental (average cost per family), \$380.
 Annual food expenditure (average cost per family), \$730.
 Wearing apparel expenditure (average cost per family), \$336.
 Ice, fuel, heat, and light (average cost per family), \$256.
 Insurance (average cost per family), \$84.
 Laundry (average cost per family), \$79.
 Periodicals and schoolbooks (average cost per family), \$23.
 Schooling expenses (average cost per family), \$17.
 Telephone service (average cost per family), \$27.
 Household furnishings (average cost per family), \$57.
 Doctors, dentists, oculists, and undertakers (average cost per family), \$141.
 Sickness due to working conditions, 63 clerks.
 Donations to church and charity (average cost per family), \$37.
 Recreation (average cost per family), \$42.
 Amount paid for service responsibility (average cost per clerk), \$3.
 Amount paid account of change of residence (average), \$193.

Amount paid account of personal or sick leave (average), \$47.
 Cost of postal supplies (average), \$6.
 Cost of slips (average per clerk), \$4.
 Road expenses and travel allowance, deficit per clerk, \$49.92.
 Clerks borrowing money, 90 per cent.
 Clerks forced to sell war savings stamps or Liberty bonds, 80 per cent.
 Curtailment of education of children (all except three).
 Emergency service not paid for (average per year), \$9.60.
 Salary necessary to live comfortably and save 10 per cent, \$2,444.
 Miscellaneous expenses (average per family), \$54.
 Cost to clerks by arbitrary transfers (average per clerk), \$270.
 Annual average of all cost, per family, \$2,364.

EXHIBIT D.

NASHVILLE, TENN., September 17, 1919

HON. CECIL A. BEASLEY,
Secretary Joint Committee on Postal Salaries,
United States Senate, Washington, D. C.

DEAR SIR: We respectfully request that you submit to the Joint Committee on Postal Salaries the following data relative to our condition. We feel sure an investigation will show that we have been unjustly discriminated against.

We were appointed substitute railway-postal clerks February 28, 1914, received our first promotion July 1, 1919. We had served the following number of days prior to July 1, 1917: C. R. Chilton, 991; E. T. Hewett, 1,089; H. H. Heistand, 996; C. L. Hobson, 1,060.

Then the following bill was passed by Congress: "Hereafter any substitute railway-postal clerk shall, after having performed service equivalent to 313 days, be appointed a railway-postal clerk of grade 1, and in computing such service credit shall be allowed for service performed prior to the approval of this act."

The intention of Congress, when they approved this act, was to give us what we justly deserved on account of having been held on the substitute list for such a long period, but instead of being given credit for the full time we had served prior to the act, we were just given credit for 313 days and designated as unassigned clerks of grade 1, when we should have been given credit for the full time as shown above and made clerks of grade 3.

C. B. Murphy, W. B. Patton, H. E. Allmon, R. R. Rucker, R. J. Miller, and others taken from the same eligible list we were taken from, were appointed regular clerks after having served about a year on the substitute list, and are now clerks of grade 5.

On the other hand, C. O. White, H. C. Langford, Fred Estes, and others entering the service about two years or more later than we had entered, are in the same grade we are in, their time being credited by the same act, or ruling, as ours, but after having served 313 days in accordance with the act given above, they were designated as unassigned clerks of grade 1; then the quarter following their next year they were made clerks of grade 2.

Now, it is our opinion, if this act works in this manner in case of clerks last named, we should be given credit in accordance with the time we served.

H. H. HEISTAND.
 E. T. HEWETT.
 C. R. CHILTON.
 C. L. HOBSON.

Mr. BELL. The next on the list is Mr. H. E. Sims.

STATEMENT OF MR. H. E. SIMS, ATLANTA, GA.

Mr. Sims. Mr. Chairman and gentlemen of the commission, I represent the terminal and transfer clerks. In reality I represent all railway postal clerks, because our interests are identical and inseparable. The terminal and transfer clerk of to-day may be the road clerk of to-morrow and vice versa. This little booklet from which Mr. Hogan has been reading you will find includes terminal and transfer clerks also, and let me say that as we prepared this book,

we gave it quite a good deal of thought and we attempted to be fair to the Post Office Department, as well as to ourselves. We recognize the fact that efficient service must presuppose satisfied men and we have attempted in this not to ask anything that is not fair both to ourselves and to the department.

Senator MOSES. Have you always been a terminal clerk?

Mr. SIMS. No, sir. I have only been in the terminal service about 16 months, and 9 months once prior to this time. The rest of my mail service life has been spent on the road.

Terminals were primarily established for the distribution of parcel post, and their operation soon demonstrated the advisability of taking in other classes of mail, and they eventually reached the point where all classes of mail—circulars, blue-tag, first-class mail, registered and, in some cases, daily papers, are taken into, distributed and dispatched by these terminal R. P. O.'s. Their operation soon demonstrated also that there had been too many of them established; that several of them could be discontinued and that they could do better work by consolidating and locating at important gateways of the country. By so doing we were enabled to dispatch mail to its destination without it having to be handled and rehandled.

Senator MOSES. Would you regard the work in a terminal as more desirable than work in an R. P. O.?

Mr. SIMS. I would not; for the reason that in so many of the terminals the sanitary conditions are so poor, and for the reason that we have to give more time to it than the railway clerks do. Our distribution is identical with that of the road clerks. In order to be an efficient terminal clerk you have to familiarize yourself with the distribution. I noticed this morning that one of the clerks said that post-office clerks were the only men required to make their preparations for examination on their own time. That is a mistake.

We clerks in the terminals have to keep up on distribution, schemes, answer correspondence, and do all the outside work, and yet we are required to give the Government 48 hours per week. The fact is that we give them about 54 a week instead of 48. We sent out an inquiry to the terminal clerks of this division and upon consolidating these reports we found that they put in about 55 minutes a day on scheme study. After they have given 8 hours, they give 55 minutes more, making practically a 9-hour day. The post-office clerks and terminal post-office clerks have no allowance made for this work, and without it they are of no account. You can not do something you do not know how to do.

Senator MOSES. Where were you running before you went into the terminal?

Mr. SIMS. I have run on several lines—Atlanta and Savannah, Savannah and Montgomery, and Cleveland and St. Louis. I have been reorganized off a line or two.

When terminals were first established they were classified according to their importance as A, B, and C. Most of the large terminals were C, and then there was a regulation of the Postmaster General arbitrarily reducing all of them to class A. This immediately had the effect of reducing the clerks' salaries. It didn't reduce their work any; they stayed in the same place and did the same work at a reduction in salary. Or, if they didn't suffer an actual reduction in

salary, they virtually did, because they were stopped from going further. However, I will say that the department did give the clerks an opportunity to transfer to some lines and hold their salary. Many of the clerks, however, could not afford to do that. They owned their own homes in a community and did not have any idea where they would finally be located. The consequence was that most of them took the reduction and stayed where they were. Terminals since that time, effective July 1, 1919, have been reclassified.

Senator MOSES. What became of this law of 1917 when this obtained?

Mr. SIMS. These terminals were reduced prior to this time.

Senator MOSES. In anticipation of this law coming?

Mr. SIMS. I could not say as to that. I do not know what they had in mind.

Senator MOSES. You do not know whether a farseeing Postmaster General took advantage of it?

Mr. SIMS. I would not be able to answer that. I will speak more particularly for the Atlanta terminal, because I am familiar with the conditions that prevail there. This, we maintain, was an injustice, and it demoralized the service to a very great extent, and when they were reduced it immediately carried with it a reduction in salary. Now we have been restored to class B, but we had to bide our time and wait until we get to that. It only works one way. When a line is reduced, it reduces your salary. When it is restored, your salary is restored by gradation.

Senator MOSES. That is very simple; that is what makes a surplus.

Mr. SIMS. Permit me to say I have contributed to that surplus.

Senator MOSES. I hope you feel patriotic about it.

Mr. SIMS. I feel patriotic, but not on that score. We have at present on the Atlanta terminal register 108 clerks; 60 regular clerks—53 men and 7 ladies; 3 unassigned clerks; 13 substitutes—9 men, 4 ladies; and we have 32 uncertified men.

While we are talking on the subject of whether the ladies are effective or not, I would say that we have had them down here ever since they have been in the Railway Mail Service, and my experience and observation has been that they are not as effective as men for the reason that they are not physically strong enough. They can not go on a blue-tag rack and do the heavy lifting that is required. The fact is, we do not want them to; but when it comes to circulars and letter distribution and places where they can be used, they are jamb-up. Nobody has anything on them. I speak from knowledge. I know.

In our organization we have 32 uncertified men, practically 30 per cent. They do not and can not render the service of the railway mail clerk. They haven't the knowledge. I do not mean to reflect on them at all, but they haven't the knowledge, and they work right alongside of our substitutes and clerks and many of them are drawing the same salary.

When a clerk gets through and goes home, he has to get out his little black book or schemes and prepare for the next examination. If they do not, minus points will put them out of the service. The uncertified men do not have to do this. After he gets done he goes home, and the rest of his time is his own.

Mr. STEENERSON. Would you mind giving us a definition of an unassigned railway mail clerk.

Mr. SIMS. I asked an official one time the difference between an unassigned clerk and a substitute and his answer to me was, "just a shade." An unassigned clerk is a substitute, but he may, in some instances, draw more pay than a substitute. If I were to-day put on the unassigned list, I would get paid for what time the department gave me work, but at my present rate of pay.

Mr. STEENERSON. What is an acting clerk?

Mr. SIMS. Suppose I find it necessary to lay off for 30 or 60 days, some substitute is appointed in my place and designated an acting clerk.

Mr. STEENERSON. Does he draw the same pay?

Mr. SIMS. As the substitutes.

Mr. BELL. He doesn't draw the clerk's pay?

Mr. SIMS. No, sir.

Mr. STEENERSON. Why isn't he a substitute?

Mr. SIMS. He is a substitute.

Mr. STEENERSON. Why do they call him an "acting clerk"?

Mr. SIMS. The office calls him that; I don't know why.

Senator MOSES. Just to round out our knowledge of the terminology of the Railway Mail Service, what is an "acting clerk in charge"?

Mr. SIMS. That is the designation of the one who serves while the clerk in charge is off. The man who is designated to act as clerk in charge of the Atlanta terminal to-day while I am up here is the acting clerk in charge.

Senator MOSES. The acting clerk in charge, under the law, should receive \$100 more salary than the man next to him, I believe.

Mr. SIMS. Under the law I think he draws two hundred more.

Senator MOSES. Under the law he must have a hundred.

Mr. SIMS. He don't get it always.

Senator MOSES. The acting clerk in charge doesn't get it?

Mr. SIMS. He doesn't get it at all; he draws his grade.

Senator MOSES. But he does all the work of a clerk in charge, doesn't he?

Mr. SIMS. Yes, sir. Let me call your attention to the fact that out of all the clerks in the Atlanta terminal—the uncertified men draw their maximum—out of 60 regular clerks there are 2 who draw the maximum pay, and they are 2 men reduced from the road or they would not be getting it.

Senator MOSES. The difference then between the acting clerk in charge and the clerk in charge is that the acting clerk in charge has a longer title and a shorter salary. Is that it?

Mr. SIMS. Yes, sir. In fact, it is an empty honor. I was transferred into the Atlanta terminal on September 20, 1918, by the Post Office Department and not at my own request, and to-day I draw not one more cent in salary than if I had stayed on the Atlanta & Savannah run as a distributor. It cost me \$300 to move up here.

Mr. STEENERSON. The railway mail clerk in charge has additional duties to the clerk under him?

Mr. SIMS. Yes, sir.

Mr. STEENERSON. He has to make reports?

Mr. SIMS. Yes, sir.

Mr. STEENERSON. And besides that he does the general work of the men under him?

Mr. SIMS. He has general supervision of the entire work, makes reports, is held responsible for the carrying out of the orders of his

supervisors; he must see that all mail is correctly worked and dispatched. In fact, he has direct supervision of the work.

Mr. STEENERSON. When the clerk in charge has one man under him only, he is still clerk in charge?

Mr. SIMS. Yes, sir.

Mr. STEENERSON. And if he has 10 men under him, he is still clerk in charge?

Mr. SIMS. Yes, sir.

Mr. STEENERSON. And of course the more men he has under him the more clerical work he has, in making reports, etc.?

Mr. SIMS. Yes, sir; to some extent. It doesn't affect that so much as it does his supervisory work. When he has a large number of men under him it lessens the amount of distribution he has to perform. There are many clerks in charge who perform no distribution, and many times, with two or three under him, he has as much distribution to perform as the men under him, besides having to make the reports. We find that it is very hard to keep the efficiency of a terminal up to anything like the proper standard, for the reason that the conditions are so unsatisfactory and resignations are so frequent that we must be constantly breaking in new men. I reported here on the 20th of September, 1918, and I am next to the oldest man in point of service on my crew. Out of 70 men who were there at that time, only 28 now remain. Many of them have transferred to the road; many of them have resigned, and most of these resignations are due to the fact that the terminal sanitary conditions are not satisfactory. The same class of work on the road pays much more—it paid more still prior to July 1, and the ruling is that when a man comes into a terminal he must stay there a year. I doubt if I have ever had one a year that did not have an application for transfer.

Senator MOSES. The sanitary conditions are worse in the terminal than in the cars?

Mr. SIMS. That doesn't apply to all terminals, but as a general rule I believe it does. It does in the case of this terminal here. These uncertified men come and go. If we get hold of one who is not satisfactory, it is an easy matter to dispose of him and get another one. Experience has demonstrated the feasibility and practicability of terminals. At large junctions where many R. P. O.'s terminate they are a necessity. One of the things we do that makes them of value is that we take up "stuck" mail on delayed trains; take it in the terminal and dispatch it with the minimum delay, whereas if the terminals were not there they would have to wait until the next train or be carried to the post office and that work thrown on the post office with the attendant expense of cartage to and from the post office.

Mr. STEENERSON. Has there been a decrease or an increase in the amount of "stuck" mail?

Mr. SIMS. That depends on the season of the year. We have very little "stuck" mail in the summer and plenty of it in the winter. We have it all the time now.

Senator MOSES. What do you mean by "stuck" mail?

Mr. STEENERSON. Mail not distributed en route?

Mr. SIMS. It means that R. P. O.'s come in here that receive an unusual amount of mail without a sufficient force—or whatever the reason may be—and when that occurs we take it in the terminal and distribute it and dispatch it.

Mr. STEENERSON. If you had more clerks on the line you would have less of this "stuck" mail.

Mr. SIMS. That is an evident fact.

Mr. BELL. Is there much delay caused by this "stuck" mail, as you term it?

Mr. SIMS. Well, most every time an R. P. O. line becomes stuck it is bound to result in a delay to the mail.

Mr. BELL. About how much on an average?

Mr. SIMS. That varies, of course; it varies as to how close a connection it is. A line may come in "stuck," and if you have five or six hours it may not suffer any delay. If there is only an hour, it is possibly delayed until the next connection. I would say that a fair answer to that question would be that ordinarily it is delayed one connection.

Mr. STEENERSON. On "stuck" mail?

Mr. SIMS. Yes, sir.

Mr. STEENERSON. Is that sometimes 24 hours?

Mr. SIMS. No, sir. There is no line out of here that is 24 hours between dispatches of mails.

Mr. STEENERSON. What would be the average time between dispatches?

Mr. SIMS. From 6 to 12 hours.

I want to call your attention to a vast amount of work that was thrown on the railway post office, and a greater amount of this at the terminals, incident to the establishment of camps through the southland and the American Expeditionary Forces. That has, of course, gone by, and has nothing to do with it. I just mention that to show you that the Railway Mail Service is equal to all those things. We took hold of it and handled it, and I call your attention to that to show we are ready for whatever may come.

In addition to handling this "stuck" mail, we relieve the railway post offices of a large amount of mail from the Washington, D. C., post office, bulletin mail from the Agricultural Department, pension checks from the Treasury Department, and other mail from the Treasury Department that suffers no delay. It is perfectly legitimate that it should come to the terminals, because the checks are dated ahead, and the mail is pouched to us over an R. P. O. line usually, and a letter accompanies it from the postmaster at Washington, D. C., showing the dispatch of so many pouches of Florida or Georgia pension checks, as the case may be, and that is only to be released on a certain day in the future. We take that mail and work it up and release it on the date set. The fact is that a terminal railway post office is nothing in the world but a stationary railway post office. We do everything that any other railway post office does except, receive, and dispatch mail at local offices.

Now, I desire to call your attention for a moment or two to the transfer clerks. At large junction points railway postal clerks are detailed and designated as transfer clerks, and the importance of their work can not be over stated. The fact that some years ago the transfer service was curtailed has resulted in more missent mail, in my judgment, than any other thing that has happened to the mail service. The importance of their duties is great. The reports they are required to make are intricate and upon their accuracy much depends. If they are not accurate, they are not worth anything at all.

On a heavy line coming in here, like the Charlotte & Atlanta, Nashville & Atlanta, with close connection, or with a missed connection, if a transfer clerk is not there to see that these transfers are made and the mail gotten out on close connections, the work the men on the road have done is virtually nullified. It must lay over until the next connection. He must keep a record of daily papers—where they come from. Any delay must be noted. He must keep the time of arrival, so that if connections are missed we will know who is responsible, and these records are of value in determining whether mail that has been lost has been stolen, and at many points he must perform all the duties of a railway postal clerk. He must be a round-table man, a distributor, must know how to handle registers, make up pouches, he visits the letter boxes placed for the convenience of the public, takes the mail from them, cancels it, works it, and dispatches it.

Mr. STEENERSON. Right there, Mr. Sims. Where the regular space requisitioned by the department is not sufficient to take care of the mail, what duties does that impose upon the transfer clerk?

Mr. SIMS. That is one of the most important duties a transfer clerk has to attend to. Upon his judgment depends the amount of money the Government pays for the dispatch of mails. If the regularly authorized space will not provide for it, the transfer clerk must see that this is loaded and make the necessary requisition for the needed extra space.

Mr. STEENERSON. He requisitions the space?

Mr. SIMS. Yes, sir.

Mr. STEENERSON. For extra mail that can not be accommodated?

Mr. SIMS. Yes, sir; that is a daily occurrence.

Mr. STEENERSON. And that, I suppose, determines the amount of compensation the railways receive from the Government?

Mr. SIMS. Yes, sir. One of the most important duties a transfer clerk has to perform is this looking after the space system. If I could have only two good men in my department, one of them would be a transfer clerk. But, if he don't know what he is doing, he is not worth very much to me. He must be familiar with the schedules—if a connection is missed he must know how to dispatch that mail. If he don't, he is not able to perform his duties as they should be performed. Further than that, he must watch and keep down depredations. If more transfer clerks were stationed over the country we would have less damaged and stolen mails.

Senator MOSES. Do you join in this recommendation for a single classification in the Railway Mail Service?

Mr. SIMS. Yes, sir.

Mr. BELL. In the railway post offices?

Mr. SIMS. Yes, sir. A transfer clerk is nothing but a railway postal clerk. We are subject to call. The fact is, very frequently when clerks fail to show up for their assignment, they take a clerk out of the terminal and send him out on that run. He must be familiar with the postal laws and regulations, must know how to handle registers, receipt for and keep the receipts therefor; he must be conversant with all the things a man on the road must know. Otherwise he wouldn't be available for these things. In our judgment, the single classification is the solution of our troubles. A railway postal clerk, be he stationed where he may, must be familiar

with the duties. If he is taken off one assignment and put on another, it takes him a little while to get up on it. While the smaller runs may not seem so important as the longer, heavier runs, there are fifteen or twenty clerks on the one and one or two on the other. All mail eventually becomes local, and were it not for the local service the public would get no benefit. Gentlemen, I thank you.

Mr. BELL. We are very much obliged to you.

Briefs were submitted by T. J. Bowen, Birmingham, Ala., and F. L. Minor, Macon, Ga., as follows:

BRIEF SUBMITTED BY MR. T. J. BOWEN, BIRMINGHAM, ALA.

The undersigned clerks are men who entered the service in 1913, 1914, and 1915, and served continuously until they were made regular clerks of grade 1, unassigned, by an act effective July 1, 1917, after which they continued to do substitute duty and receive substitute pay under the designation "Railway postal clerks, grade 1" until they were finally assigned to lines or terminals regularly. Some of these men did substitute duty for five years, none of them less than three, and most of them four.

APPOINTMENT OF SUBSTITUTE RAILWAY POSTAL CLERKS AS AUXILIARY CLERKS, GRADE 1.

OFFICE OF SECOND ASSISTANT POSTMASTER GENERAL.

Washington, June 25, 1917.

Circular Letter No. 199.

To all Superintendents Railway Mail Service:

Referring to that part of the appropriation act approved March 3, 1917, which provides "That hereafter any substitute railway postal clerks shall, after having performed service equivalent to three hundred and thirteen days, be appointed railway postal clerk, grade 1, and in computing such service credit shall be allowed for service performed prior to the approval of this act," your attention is invited to the following instructions, which should be strictly observed:

All appointments will be made so as to show the clerk without regular assignment and with pay at the rate of \$900 per annum for services actually performed. The pay office shall be the office at the chief clerk's headquarters under whose supervision the substitute is performing service.

Statement showing the number of days' substitute service performed should be included in each case. Credit for service performed as a weigher should be included.

For instructions regarding the appointment of those in the military service, see circular letter No. 154.

Those substitutes whose records are unsatisfactory, but not such as to warrant removal, should be recommended for appointment. Careful consideration should be given their cases, however, and recommendation promptly submitted if at any future time the clerk's record is such as to bring up the question of disciplinary action.

When substitutes have resigned and are afterwards reinstated, credit may be given for former service, but in each case the substitute will lose his original standing on the substitute list and will be placed at the foot of the list or considered the junior of all clerks who are regularly appointed.

The usual report should be furnished at the proper time on Forms 5051 and 5054, with recommendation for or against permanent appointment.

Clerks will be eligible for promotion to and including \$1,200 per annum, subject to the usual rules governing promotions.

Jacket recommendations for the appointment of all clerks who have completed 313 days' service should be submitted so as to reach the department as early as possible. A sample jacket will be furnished each division as a guide and the same should be followed without variation as to form.

Where these clerks are now being employed as substitute and acting clerks, certificates should be issued terminating their service as such with the close of June 30.

OTTO PRAEGER,

Second Assistant Postmaster General.

The clipping above was taken from a fourth divisional general order. It gives the department's construction of the law which raised these men from substitutes to clerks of grade 1. The promotion was nominal only, no material benefit resulting therefrom.

We call your attention to the wording of this extract, particularly to the promise that credit should be given to substitutes for time served prior to the passage of this

act. The law provides that after 313 days of service, a substitute is automatically promoted to a clerk of grade 1. At the time of the passage of this act, some of the signitaries had served a thousand days, hence they figured quite logically that they had approximately two years over the stipulated 313 days, for which credit would be given.

No further word has ever been passed down from the department concerning this.

Until the 1st day of the past July these men who have given four and five years of service and are in every detail experienced distributors, received the same per diem as the rawest recruit of the service. The inexperienced substitute who could do nothing save set up papers and lift sacks received as much for his days' labor as did one of these men exercising a thorough knowledge of distribution.

A clerk appointed regular from the substitute list a few months after the majority of these men entered as substitutes, say January 1, 1914, would now be a clerk of grade 4. This does not include the period during which automatic promotions have suspended in lieu of the wage raises given to meet war-time emergencies.

Such a clerk transferring to a line to which one of these men is assigned can, under the present ruling, claim grade seniority and force the clerk of lower grade out of a desirable assignment regardless of his age on the line; could even force him to change his residence, incurring inconvenience and expense.

This data is respectfully submitted to the committee with the request that it investigate these men as a separate body if possible.

All clerks in the service that come under this classification should be considered clerks of grade one 313 days after they began service and for the elapse of each fiscal year thereafter, should be credited with the automatic promotion provided by law and the progression followed until their grades are attained, and their salaries adjusted accordingly.

This they hold to be a matter of common justice. The knowledge that they have not been treated fairly in the matter mentioned and their faith in the judgment of the committee have prompted them to lay this petition before the gentlemen of the committee through their representative Mr. T. J. Bowen.

J. T. Matthews, grade 2, certified May, 1914; J. S. Cruz, grade 2, certified May, 1914; W. R. Ray, grade 2, certified February, 1914; A. S. Davis, grade 2, certified February, 1914; Walter C. Bailey, grade 2, certified February, 1914; Louis D. Wallis, grade 2, certified February, 1914; F. P. Johnson, grade 2, certified February, 1914; J. G. Harris, grade 2, certified February, 1914; P. Witt, grade 2, certified February, 1914; A. E. Igon, grade 2, certified February, 1914; P. W. Stephens, grade 2, certified February, 1914; A. A. Schmidt, grade 2, certified February, 1914.

The signatures herewith affixed represent all the clerks of this grade for the State of Alabama.

STATEMENT SUBMITTED BY MR. F. L. MINOR, MACON, GA.

At the request and on the behalf of a number of class A railway postal clerks, on one-man runs, I respectfully submit to your body the following catechism:

The class A men have been the greatest sufferers from the high cost of living, because they have been paid less, and required to spend a greater amount of their pay going and coming from work and for expenses on the road.

We respectfully ask that you do justice to class A clerks before any raises are granted in other classes.

Q. What is the difference in the pay of class C clerks and class A clerks?—A. The clerk in charge of class C is paid \$600, per annum more than class A. Second and third clerks—class C—paid \$400 per annum more. In addition they receive a larger per diem allowance.

Q. How much more have these clerks received in the last five years than class A clerks?—A. \$3,000 for clerks in charge, class C; \$2,000 for second and third class. In addition to per diem allowance.

Q. What is the difference in the pay of class B and class A clerks?—A. Clerks in charge, class B, receive \$200 per annum more than class A, in addition to a larger per diem allowance, which, in five years amounts to \$1,000.

Q. Do clerks of each class perform the same service?—A. No; clerks in class A are expected to work one hour longer per day than class C, and one-half hour longer than class B clerks.

Q. Why does Congress make a difference in the pay and class of the men?—A. Presumably to equalize the work.

Q. Well, then, if Congress equalizes the work by paying less to class A men, why does the Postmaster General require longer hours of class A men?—A. This is one of the questions we can't answer. We are willing to work longer hours for the same pay, but we don't feel that we should work longer hours for less pay.

Q. How much time do clerks of class C and B have off?—A. Usually two days on and two days off, or four days on and four days off.

Q. How much time does class A have off?—A. Some of the class A men are on the road every day in the year. Many are on the road every day but Sunday.

Q. Give some extreme cases in class C and A runs.—A. Hamilton and Atlanta clerks on trains 11 and 12 work two nights on and three nights off, or about 27 hours per week. The clerk on Macon and Vidalia runs four weeks on and one off, and is on the road 17 hours per day except Sunday and is required to report at terminal Sunday morning and work his mail out for the line.

Q. Are the clerks on class C and B line busy all the trip in each direction?—A. Most lines are heavy in one direction only, and light in the other.

Q. Are class C and B men allowed to sleep on duty?—A. Yes, when the work is completed, all except one are allowed to sleep. Postal Laws and Regulations, sec. 1575. And on many lines they sleep several hours.

Q. Is this counted in as time work?—A. Yes.

Q. Are class A men allowed to sleep on duty?—A. No.

Q. How many trips reports do class C and B men have to make?—A. The clerk in charge makes from 24 to 30 per month, including duplicate. Second and third clerks do not have this to do.

Q. How many trip reports do class A men have to make?—A. From 36 to 100.

Q. What is the difference between trip reports of class C and B and class A men?—A. There is more on trip report of class C and B, but there are many more to be made by class A men.

Q. Do class C and B men have to maintain storage for register reports, books, trip reports, etc?—A. Only one man of the crew has this to do.

Q. Do class A men have to maintain storage space?—A. Yes.

Q. How is the work divided on class C and B runs?—A. Some work letters, some papers; one man handles registers.

Q. What is the difference in class C and B work and class A work?—A. Class A takes in and delivers, works letters, and papers, handles all registers, makes all reports, checks all pouches, must answer all calls of the public. The work is divided on class C and B runs.

Q. What other advantage, have class C and B clerks?—A. The advantage of companionship and of asking each other questions in regard to dispatch and work, but the class A men must refer to their books on every question in doubt.

Q. How does class A men's pay compare with railroad men's pay?—A. Class A men are paid much less than the lowest paid railroad employees, the difference existing of \$16 to \$100 per month in flagmen and bagagemen's pay and from \$100 to \$300 in engineer's and conductor's.

Q. How is overtime by clerks on road paid or divided?—A. If a train is 10 hours late, the 10 hours is divided by all the trains run on the road for a year; thus there is in the run from Athens to Macon, 1,460 passenger trains per annum. This divided by 10 hours gives less than one-half minute per day. The clerk making overtime gets no credit, which is unfair.

Q. Are railroad employees paid or allowed overtime in this way?—A. No. Each man is paid for the overtime he makes, which is fair.

Q. What other advantage have railroad employees over railroad postal clerks?—A. In this section, the South, they are paid continuous overtime. That is, after leaving on a run and not having eight hours rest before returning, they are paid full time for lay-off at the other terminal.

Q. Do postal clerks have this advantage?—A. No. On Athens and Union Point run the clerk has only about 40 minutes at Union Point. Part of this time is taken out, not counted, although clerk states he has not been out of the car in 10 months.

Q. What opportunity do clerks in class C and B have for other business?—They have one-half to three-fifths time off. Many of them run stores, farms, or educate themselves for some profession, but many class A clerks do not have time to work their gardens.

Q. What would be fair for each class of clerks?—A. Pay all clerks the same except clerks in charge, who should have \$100 to \$200 more than other clerks. The per diem allowance should be paid as at present.

Q. How can the money be raised or saved to pay these increased salaries?—A. By taking up the slack on class C and B lines and paying overtime.

Q. Please explain.—A. Some lines have five crews, caused by four crews not being able to make the run with an average of eight hours per day. Thus you pay an extra crew from \$4,000 to \$10,000, when you could pay a substitute \$150 to make up the excess time or pay the clerk overtime.

Q. What other advantages have clerks in class C and B over class A clerks?—A. Class A clerks spend greater time in going and coming from work on account of making more days, spend more for street car fare, and receive less per diem.

RURAL DELIVERY CARRIERS.

Mr. BELL. The next class of employees to be heard will be the rural carriers. Mr. Charles F. Harris will be heard first.

STATEMENT OF MR. CHARLES F. HARRIS, THOMASTON, GA., REPRESENTING THE MOTOR-ROUTE CARRIERS.

Mr. HARRIS. Owing to the extremely short time which I have to appear before you, I wish to ask you to interrupt me at any time to be quizzed, and I will answer to the best of my knowledge, even if it is only to say that I do not know.

To-day there has been handed to me by Mr. Merritt, of Alabama, this:

I, Julius Merritt, representative of the State of Alabama, am authorized by the motor-route carriers of Alabama to empower C. F. Harris, of Georgia, to represent them.

Gentlemen, I know from what you have already gathered that you are convinced of the fact that the standard route carrier is not overpaid, hence I base my argument on a comparison basis. A standard route is 24 miles. The carrier is paid for this 24 miles and gets a mileage for anything above 24. A motor route is presumably two standard routes, with a compensation of salary and a half for the two. As a matter of fact, a motor route is anything that the Post Office Department has seen fit to make it, and they have not been bashful a bit. From 55 to 60 miles form a large percentage of the motor routes.

Now, in the case of a 60-mile route, it means, provided we had received the same compensation that a single route carrier had received for his first 24 miles, we are carrying 36 miles for one-half the compensation that a single route carrier gets for carrying 24 miles.

Mr. BELL. That is, if a route is 60 miles?

Mr. HARRIS. Provided a route is 60 miles, and lesser routes in proportion. For a route of 60 miles, we would get for the 36 miles above the 24 just one-half what the single-route carrier would get for the 24 miles. It stands to reason that that is performed at an actual and great loss. We can not possibly perform that service and come out even. It means then that we perform our duties of more than twice the work that a single-route carrier does for actually less pay than he receives, for the self-evident fact that our salary is our monthly check—less our monthly maintenance expense. My own salary, under these conditions, for the last fiscal year was \$45 a month. We understand that the department is opposed to any maintenance allowance. Their reason for that is that the salary as we now receive it appears attractive to any man who has not tried it. He just simply won't believe it—wont believe the facts. The expense incurred, the maintenance, is not merely driving a car the number of miles that constitute the route—the necessary stops in the

delivery of the mail will increase the expense of the car, on a very conservative estimate, 25 per cent. You can not possibly employ a car dealer to furnish a car and chauffeur for the mileage we have to travel and over the routes we have to contend with for our whole salary, to say nothing of the efficiency required of us. It is self-evident that the service, under conditions such as these, can not stand. I have a resolution here, gentlemen, prepared by the motor-route carriers at their convention held on Thanksgiving Day, as follows:

We, the Georgia motor-route carriers, do vigorously protest the conception of our relation to the United States Post Office Department as in any way a contract service.

Inasmuch as we have no voice in determining the duties assigned to us, or the compensation for the performance thereof, these matters being determined by legislation.

These conditions are the same as pertain to R. F. D. service on single routes.

We respectfully submit the following as the only fair and practical basis from which to determine justice toward us; and in the interest of efficiency beg to advise that this and this only, is the measure of satisfaction among us, without which the maximum of efficiency can not be expected; and since it is also the measure that is necessary in order to enable us to provide a living for ourselves and our families, we sincerely urge that it be given the earnest consideration of those who are responsible for justice to us.

Whereas the motor route was established on a basis of two standard single routes, with compensation of one and one-half times the salary of a single route; and whereas a standard single route is 24 miles, and basic salary therefor is \$100 per month, we contend that the standard length of a motor route should be 48 instead of 50 miles, which is now called standard length of motor route, for which basic salary of \$150 per month is paid.

Whereas legislation has granted to single-route carriers since July 1, 1918, \$2 per mile monthly, for mileage in excess of 24 miles, we contend that the rights of motor-route carriers were not therein considered, and that we should in justice receive \$2 per mile, in excess of 48 miles, for service rendered thereon since July 1, 1918; in consideration of the fact that aforesaid discrimination against motor-route carriers was very unjust, and indisputable evidence that small regard was given to their deplorable condition.

We contend that the economy realized by the reduction of \$50 from basic salary for 48 miles of service is all the discrimination between single and motor routes, that efficiency of service and equitable compensation can justly and reasonably endure. Therefore we contend that we should receive in future the same per cent of increase over basic salary of \$150 per month that single-route carriers may receive over basic salary of \$100 per month; and in all future legislation we contend that we should receive the same payment, per mile of service over 48 miles, that may hereafter be received by single-route carriers, per mile of service, over 24 miles.

Whereas the cost of maintenance for motor-route service is just as great, in proportion to its length, as it is for single-route service, in proportion to its length; we contend that we should be granted a maintenance allowance in proportion to our miles of service as the single-route carrier may receive in proportion to his miles of service, or if an allowance be granted on any other than a mileage basis, we contend that we are justly entitled to twice the amount that the single-route carrier may receive.

We further contend that we should receive any other benefits, not herein mentioned, 150 per cent, as compared with whatever the single-route carrier may receive, and that we share equally with them in all privileges and immunities that they may hereafter enjoy.

Indorsed by Georgia Motor-Route Carriers November 27, 1919, at Cordele, Ga.

P. S.—We urge a court of appeals. We approve a just retirement law.

Mr. BELL. Do you know how many motor-route carriers there are in the State?

Mr. HARRIS. About 86. There have been a few resignations and some few changes since the 1st of July. Mr. Jones, the postmaster here, sent me a list at that time, and I think his list was 86.

Mr. BELL. The route upon which you operate, was that two standard routes made into one?

Mr. HARRIS. It was three. It was two standard routes and a loop route, and that loop route is my bone of contention. I wish I had time to go into that in detail.

Mr. BELL. What is your total compensation?

Mr. HARRIS. \$204.66½ a month.

Mr. BELL. That includes the emergency increase?

Mr. HARRIS. That is everything. Out of that it cost me last year—we did not receive that until the last appropriation—last year, out of my salary of \$187.50, my maintenance was \$135, allowing 25 for depreciation.

Mr. BELL. Twenty-five per cent?

Mr. HARRIS. \$25 per month. That is what the motor carriers, as a rule, estimate their car depreciation. My car has been used over 18 months now, and since July it has been old and constantly in the shop, and it has cost me \$135 without allowance for depreciation since July 1, and it is just simply ruined. Since I can not go over it all, I want to give you my expense statement. Here I have matters representing the various carriers, and I deem it my duty to get that before you if possible. These are different views. These are letters I have received from the various carriers, and I have extracts that give their views on the subject.

Mr. BELL. Mr. Harris, will you just file those with the commission? I suggest that on account of the limited time.

Mr. HARRIS. There is one exception I would like to call to your special attention, and that is in the case of some carriers whose routes are over 50 miles and who are not even now receiving the salary they are supposed to receive by reason of the recent legislation. There is one whose route is, I think, 52 miles, who is receiving \$177.50 when we receive \$187.50, \$10 less, and they have made every possible investigation and endeavor to have that rectified, without success. The other route is over 55 miles, and he gets exactly the same salary, \$10 less than the others receive, and no investigation seems to throw any light on it. They have investigated through the Post Office Department and individual Senators in Washington, I think. Even you yourself received a letter from Mr. L. C. Kicklighter.

Mr. BELL. Yes; I remember that.

Mr. HARRIS. Those are two cases I know of. I think there are probably others in the same class. That condition certainly is unfair, and, if I may venture an opinion, it is due to the fact that there is an entirely unjust interpretation placed upon our work. We never have conceived of our work as a contract service, and why it should be so construed I do not know, and yet I am led to believe that that is so. It seems to me that is an unfair leverage that is used against us.

Concerning my own affairs, I will just give you this little statement. My total indebtedness at the present time is something over \$1,000, for which I have absolutely nothing to show, allowing full value for my car to be deducted. It leaves me over a thousand dollars in debt and nothing to show for it; and, furthermore, it matters not what a man's intentions are, his credit is limited unless he has something to show for it. I have about reached the boundary line, and I am not the only one. There are numbers of them who are simply waiting on you, gentlemen, and if your recommendations are not liberal and if they are not backed by our Representatives in Washington, you may look for resignations, not simply because we want to, but because we will be forced to.

Gentlemen, I thank you.

(Mr. Harris's briefs and papers referred to are on file with the commission.)

STATEMENT OF MR. C. H. HOWARD, ST. PAULS, N. C.

Mr. HOWARD. I represent the rural carriers of North Carolina. They have asked me to come down here and put their case before you. I feel like I represent the baby of the department. The Rural Delivery Service is the baby of the Postal Service, and while the baby is always made the pet of the family, in this case it is not so.

Everyone I have listened to has made a good plea, but I think we have a better one than any of them. We live in the smaller towns and we started with a small salary, in the belief that better times were coming around again, and that when corn and hay and oats would get to 30 cents times would be good for the rural carrier. It failed to do so. It kept going up step by step. It is true Congress gave us a little more, but our expenses have gone so far beyond what we get that, while we are grateful for it, we can not live on it. We have come before you, gentlemen, with our case, and we deem it an honor to present our case to you in person, and when they appointed me to come down here I began to think about what I should do.

I sat down and wrote to over 100 carriers in the State and asked them to send an itemized account exactly dollar for dollar, and they can make an affidavit to them if necessary, and the average account came to \$56.93 a month for upkeep. That was when we were getting a salary of \$1,500, before the raise came, and the way we figured that was ~~six~~ hundred from fifteen hundred left nine—eight hundred and some dollars for the family and all other expenses; house rent was not included in that. That was something over \$50 a month for upkeep to carry a short route. Some of them went as low as 44 and some as high as 80 in different parts of the State, but when they were footed up they made \$56.93 average all over the State. All we want is justice; that is all we want. Just a living wage, something we can get along on. It is true that we can not lay aside anything for a rainy day on what we are getting. I have a family of nine, seven girls, and that leaves my wife and myself to work for the seven girls. You know girls naturally take more than boys. There is no one there to help. The oldest one is prepared to go to college, but I am not able to send her. It takes all my time on the mail, and how can I send a girl off to college on my present wage? I can not do it; it is impossible. There is only one possible chance, and that is to let her go out and work her way through. That is embarrassing to a father and to a man. If we were given a living wage, say \$1,500, with a gradation of 10 per cent for five years, and then a maintenance of as much as would be reasonable, actual cost and expenses of upkeep, we could get on and I think you wouldn't hear another murmur. In my experience the best servant I have ever had is a pleased servant. I thank you, gentlemen.

Mr. BELL. We thank you, Mr. Howard. The next on the list is Mr. Gray Meeks, of Nicholls, Ga.

STATEMENT OF MR. GRAY MEEKS, NICHOLLS, GA.

Mr. MEEKS. I have some figures to submit here that reflect conditions as they exist in the southern part of the State. I think it would be unfair, in view of the fact that Mr. W. A. Keown, of Rome, Ga., intended to submit a brief that will cover the State more thor-

oughly than mine to ask that this apply to all sections of the State. It may be that the expenses we have to meet for the upkeep of our equipment would not be the same. It may be less, and I am led to believe it would be less, than in the hilly sections in the central and northern parts of the State.

I have heard from about 22 or 23 carriers in my part of the State. They have given the depreciation on their equipment and the equipment expense, and together I figured up the cost per mile on the amount invested in their equipments, which is about as follows: Depreciation, 33 per cent; equipment expense, \$745; cost per mile traveled, 9 cents; amount invested in equipment, \$619.

You can see from that, gentlemen, that the depreciation is very great on the amount invested in equipment, and the annual equipment expense is about \$745, or in the neighborhood of \$62 per month out of the man's gross salary.

The only thing that I feel called upon to ask at this time is that rural carriers be given the same status as city carriers, with an additional allowance sufficient to cover the cost and maintenance of an equipment which meets the requirements of the department—amount allowed on each route to be determined by the department, with assistance of postmasters and post office inspectors, and rural carrier concerned.

The examination required of a rural carrier is exactly the same as a city carrier; his physical qualifications, his moral qualifications must be the same. When a city carrier draws his check at the end of the month it goes for the relief and benefit of his family and himself. In the case of the rural carrier that is not true—\$62.50 goes to meet the expenses of his equipment, and that is just as though his pay was planked down to him and cut in half, so far as the equipment expense goes toward relieving his family.

I ask that we be allowed a reasonable amount, at least, to meet that cost and that we placed on the same status as the city letter carrier. That is the only statement I care to make, except to file this brief.

Mr. BELL. The rural letter carriers have a State organization?

Mr. MEEKS. Yes, sir.

Mr. BELL. Do you belong to that organization?

Mr. MEEKS. Yes, sir.

Mr. BELL. Are they in any way affiliated with the American Federation of Labor?

Mr. MEEKS. No, sir; I am pleased to say, they are not.

Mr. Meeks submitted the following brief:

BRIEF SUBMITTED BY MR. GRAY MEEKS, NICHOLLS, GA.

Being authorized by the rural letter carriers of the eleventh congressional district to present their case to this commission, I respectfully submit the following as a basis for the adjustment of the pay of rural letter carriers. It has already been approved by them and if enacted into law, would, I believe, prove acceptable to the carriers of the country as a whole.

Fifty dollars per year per mile is urged as a fair basis of pay, applicable to daily horse-drawn routes of all lengths. Mileage in excess of the standard should be paid for at the same rate as that of the standard. The last 6 miles of a 30-mile route is more tiring both to the carrier and his horse than the first 12 miles of a standard route.

An additional allowance should be made sufficient to cover the cost of an equipment and its upkeep. The mileage basis I would consider the most satisfactory. Under

present conditions to provide an equipment which meets the requirements of the department would cost 9 cents for each mile traveled in the delivery of rural mail. See table attached. Under the present arrangement carriers are forced to spend almost 50 per cent of their salary to provide a suitable conveyance, thereby reducing their net salary to the level or below the level of the unskilled laborers of the country. Without an equipment allowance it is unjust to impose on them extra or additional work, such as carrying pouches to village post offices or substations, or the carrying of packages or relay mail for city carriers. This is star route and city letter carriers' duty, and as such should be recognized and properly compensated for if imposed on rural carriers. It imposes an additional burden on them and their horses. It also requires additional space and consequently extra equipment expense without carrying with it any increase in compensation.

Rural routes should where possible be limited to 24 miles. Where unavoidable they should be paid for on the mileage basis proposed above.

Thirty dollars per year per mile is recommended as a minimum, applicable to daily motor routes of all lengths with an allowance sufficient to cover the cost of an equipment and its maintenance.

A living pension should be granted superannuated postal employees. Government insurance for rural letter carriers strictly on a self-sustaining basis would prove beneficial both to the Government and employees. Very few carriers are able to carry insurance for the protection of their families. Prevailing high prices and inadequate salaries make it practically impossible to lay by anything for the future, and no employee can possibly render the most efficient service under these conditions. It is therefore recommended that rural letter carriers be admitted for insurance under the Bureau of War Risk Insurance.

A civil-service court of appeals should be established to which rural letter carriers may appeal their grievances. Competent employees are often practically forced out of the service by supervisory officials for no other reason than a personal dislike.

Present restrictions on the creation of daily routes should be removed in the interest of the rural public. All rural routes are now created as thrice-a-week routes and in order to get daily service inaugurated must count 150 pieces of mail per mile per month, whereas only 75 are required to sustain those having daily service. In the case of a route so created patrons are naturally dissatisfied with the service granted and will either come, or send to the office for their mail and to deposit outgoing mail. Such mail thus deposited from the route and delivered to patrons of the route by the postmaster is not credited to the route on its monthly count, and in this way strong routes are continued from year to year on thrice-a-week service, in the interest of economy, while the patrons carry their own mail to and from the post office.

Present restrictions on reinstatements, in cases where carriers are separated from the service by no fault of their own, should be removed. It requires no small sum of money to properly equip a rural letter carrier for the proper performance of his duty, and often such equipment is fit for nothing else. Where a rural carrier is dropped from the service on account of combined or discontinued route he should be listed for reinstatement without regard for the present law denying him the right after a lapse of 12 months after his separation from the service. Oldest men in point of service should receive first consideration in filling of vacancies. Such legislation would relieve a certain amount of unrest among employees which the present system breeds and would increase the efficiency of the service.

Thirty days annual leave, without pay, in addition to the present 15 days with pay, should be granted. This privilege would not be abused by rural carriers.

Christmas day should be made a legal holiday. Rural letter carriers' substitutes should be appointed on competitive examination the same as city letter carriers, and vacancies existing in the Rural Delivery Service filled from the ranks of qualified substitutes.

Data submitted by three motor route carriers of the eleventh congressional district.

Mr. BELL. The next is Mr. Julius Merritt, of Dothan, Ala.

STATEMENT OF MR. JULIUS MERRITT, DOTHAN, ALA.

Mr. MERRITT. Gentlemen, I fear that you feel wearied, and I will not detain you but a minute. I was sent here by the carriers of our State to represent them. There are 1,124 in that State, and I think that they have been loyal to the Government throughout the war, and we want to ask for more pay.

As for myself, I have been in the service 16 years. I started at \$600. At that time I had to pay \$17 a month board for myself and my horse, and I thought it pretty high, but while I was getting \$600 a year I bought me a home, and I believe now, that if I stay in the service much longer, I will have to sell that home to pay my debts.

What we need—we can not get what we want, but we want to get what we need. We want something like \$1,800 and \$600 for upkeep—maintenance. I have compiled 75 different carriers' statements on motor routes—short motor routes—I mean horse-drawn routes—

Mr. BELL. Standard routes.

Mr. MERRITT. Standard routes. Their average upkeep and maintenance averages \$52.27 a month to run that route. On horse-drawn, 24-mile routes, the average of 60 carriers is \$47.16 a month. In our country in the summer we have to have two horses. Horse feed to-day is about \$1 a day apiece. We can not feed them for much less, and in the summer time our expense is higher than in the winter time for carrying the mail. One horse can not carry the mail for 27 miles, over a route, every day. We have to have two.

We want to ask for the same pay above that 24 miles that is deducted for less than 24 miles. We want a man with 25 or 26 miles to get as much pay as is deducted for 23 miles—the same up as down.

I have one carrier close to me that has to make two trips. If yesterday was a holiday, to-day he would have to make his trip eight miles to another office. He says he doesn't get any pay for that. Often he has to take a one-horse wagon to carry his lock pouches to that other office.

Mr. BELL. That is lock-pouch mail?

Mr. MERRITT. Not lock pouch, but pouch mail.

Mr. BELL. Does he get any extra compensation for that?

Mr. MERRITT. Not a bit.

Mr. BELL. There is a provision that if it requires more equipment, he can get extra compensation for that.

Mr. MERRITT. He says he can not get any relief. He has tried, and his postmaster has tried, and he can not get any relief. I don't think it makes much difference to us how we get more pay, whether it is maintenance, upkeep, or in salary, because it amounts to the same thing. I have heard city carriers and clerks come up here and say they got sixteen hundred and seventeen hundred, and they say they can not live on it. We rural carriers make sixteen or seventeen hundred and then pay \$50 or \$60 a month out of that to keep up our teams. We must be better financiers than they or we would go to the poorhouse mighty quick. The way we get over that is that we have got friends on these rural routes who put us in a few back bones and spare ribs and help us out in that way.

We have had a great many resignations on account of these conditions. We have eight rural routes out of our town and we can not get substitutes. We will get one on, and he will serve maybe six or eight days, during some carrier's vacation, and then he will quit. He can not get a team, and he can not hire a car and get anything for his time, and he soon quits; and we have a good many carriers who can not get their annual leaves because they can not get substitutes.

At Christmas time and holidays we have to help out the city carriers. We were loaded down to carry these bags out. We didn't get anything for that. I haul mail for a city carrier five blocks every morning. I carry his mail down there for him. We think we need something for that.

Mr. BELL. Is that a part of your duty?

Mr. MERRITT. They put it on us. It is just like the colored man in jail who told his lawyer he hadn't done anything against the law, and the lawyer said, "Why, they can't put you in jail for that," and the colored man answered; "They can't, can't they? I'm here, ain't I?" There are two carriers, two in the morning and two in the afternoon that haul that mail out. We haul it out in bundles and put it in collection boxes, and we think we ought to have something for that the same as carrying the lock pouches and with this plea, gentlemen, I thank you.

Mr. BELL. The next speaker is Mr. D. C. Hayden.

STATEMENT OF MR. D. C. HAYDEN, ORANGEBURG, S. C.

Mr. HAYDEN. For nineteen or twenty years I have been a rural carrier out of Orangeburg, and, like my predecessor, when I started in at \$500 I thought I was making a fortune. When I was getting \$500 a month——

Mr. BELL. A month?

Mr. HAYDEN. A year. I beg your pardon. When I started in I was handling about fourteen hundred pieces a month. Now I handle about twelve thousand. The increased facilities I have to use and the increased cost of living has just worked the other way. All of the speakers I think have impressed you with the fact that none of them are getting enough pay, and if these other classes of postal employees are not getting enough pay, what about the rural carrier who has to furnish his own equipment at a very heavy cost? I have here and will leave with you, statements from over three hundred rural carriers in my State and their average cost is about \$63 a month for maintenance and upkeep of their automobiles, horses, and horse-drawn vehicles. There is the contention we wish to fight for. There is no need to rehash all that has been said. You gentlemen know if they can not live on it, we can not either. We are supposed to live in the same community, go to the same churches, belong to the same lodges and make the same contributions that they do.

During the drive for the sale of war savings stamps, the rural carriers had to do more than the city carriers did. Oftentimes I went to some school house or church on Sundays—we would have an appointed place and be designated to go there and tell them why they should buy war saving stamps. We realize that we were doing our duty by the country and we did not expect compensation for it. What we are asking for now is maintenance for our automobiles.

Mr. STEENERSON. Are you aware that it was the expectation when the rural carrier service and the motor routes were established that that would reduce the cost of living by encouraging the direct from the farm to the table movement, thus eliminating all middlemen?

Mr. HAYDEN. You mean the parcel post?

Mr. STEENERSON. Parcel post and the motor truck and the rural carriers were expected to accomplish that. You haven't noticed any reduction, have you?

Mr. HAYDEN. None whatever. They tried it from our town to Augusta and even the motor trucks didn't run. As to the cost of living, the only advantage was that the patrons along the line got to sell their produce without going to town.

Mr. STEENERSON. And they got the same price as they charged in the cities?

Mr. HAYDEN. Yes, sir. They got the same price, plus the postage. Another thing, the parcel post has given us a great deal of work, I know that.

Mr. STEENERSON. But you think the cost of living is really higher than it ever was?

Mr. HAYDEN. There is not any thinking about that; I know it. You come down to one of these restaurants that was here 20 years ago and try to get a meal for the same price you did then, and you will soon find that out.

Mr. Hayden submitted the following brief:

BRIEF SUBMITTED BY MR. D. C. HAYDEN, ORANGEBURG, S. C.

I deem it a privilege to appear before this honorable body to try and point out to you a few facts that pertain to our work as rural letter carriers.

I feel sure that meeting together with the employees of the Postal Service you will gain a better idea of the work that we perform and the amount of upkeep necessary to properly carry on the work that is required of each of us, and that when you have

completed these hearings you will feel that you are doing nothing but justice when you recommend to Congress that the rural letter carriers be given an allowance for maintenance of equipment. Just think for a moment the hardships we have to endure, up by daybreak or before, feed your stock or get enough hot water to start a Ford, hurry to the post office and route out and handle as much mail as four or five carriers handled a few years ago, considering weight and bulk, then start out over a 25-mile route in any kind of weather, sometimes pleasant and sometimes very much otherwise. But you will find that there are very few days that the rural patrons are not served by the carriers, for we feel it a duty to go over our routes unless the weather is such as to make it dangerous to travel. For myself, in the 19 years of service I don't believe I have missed more than four days on account of weather conditions, and I feel sure there are many more with as good or better records.

With a service like this many of us feel that it is an injustice for the department to make us lose pay for not serving our route during very severe weather, as our expenses are about the same if we fail to do so.

As to the penny nuisance, beg to call to your attention the order relating to same; that pennies wrapped in paper and deposited in boxes for postage on unstamped mail is worse than loose pennies, for sometimes we have to get out a knife and cut the cord they are tied with to see if the proper amount is inclosed. If you have ever tried this during freezing weather or during a downpour of rain, I think you will recommend that all mail deposited on your rural route be fully stamped and ready for the carrier when he passes. I also find that if the patrons are fully supplied with postage that there are more letters mailed on your route. This is logical.

As to substitutes: This is a matter that gives all carriers much concern and I hope that you will devise some means whereby a substitute will feel that at an examination he will have some preference. Not all of us are so fortunate as to have some one in the family that will make this sacrifice, and to find a suitable one elsewhere who knows all he will get out of the job is 15 days a year, is a problem, and rightly so under present conditions.

The retirement feature that is now being agitated should have your earnest consideration. I feel sure that not one carrier out of 10 who has had only his salary to live on and support and properly educate a family will have only enough to barely exist after 20 or 30 years' service as a rural carrier under the present scale of wages and the high cost of living and equipment expenses. I have here a pretty fair example of what we are up against, the actual cost of what it takes to handle the mail on a rural route as reported by about 200 carriers from 39 counties in South Carolina. In many instances both horse-drawn vehicle and automobile were kept for this use, but I only used one of them for the basis of this report, leaving out entirely the other as to cost of operating expenses. The average from these reports returned to me was \$756.35 per year or \$63.30 per month. For myself, I firmly believe that the cost is nothing less than \$60 per month. Take this amount from our salary and I think, gentlemen, you will find that we need for you to make a strong plea for the maintenance feature for the rural carrier.

Report of equipment and maintenance for carrying the rural mail as reported by 39 counties in the State of South Carolina.

Mr. BELL. The next speaker for the rural carriers is Mr. W. M. Lemmons.

STATEMENT OF MR. W. M. LEMMONS, WESTMINSTER, S. C.

Mr. LEMMONS. I have route 2 from Westminster. They have been talking about their work and what they had to do. I carried through the month of October 2,868 pounds of mail a distance of 6 miles.

Mr. BELL. Where is that to, Walhalla?

Mr. LEMMONS. Oakway. In the month of November I carried 2,552 pounds, December 2,584 pounds. That is all in addition to my own delivery and I deliver something like ten to twelve thousand pieces of mail a month myself. I do not get any extra compensation for that and I have to furnish an extra size wagon and some few days I make two trips from Westminster to Oakway. I can not haul it in one load and I take it out in the evening to keep from having to carry it the next day.

I want to suggest—I think there is a little bill somewhere that I should get a dollar a mile for that—but I haven't been able to get it.

Mr. STEENERSON. Is that what is called a "loop" route?

Mr. LEMMONS. I carry it to No. 3 route in the morning and in the evening he brings it to No. 1, his collections, also the Fairplay mail. No. 2 carries it out and No. 1 brings it in to Westminster, but bringing it in is not as bad as taking it out. In my brief which I will file I suggest that we get a dollar a mile on that for 500 to 1,000 pounds; \$2 from 1,000 to 2,000; \$3 from 2,000 to 3,000 pounds. I think that is a cheap proposition for the department.

Mr. STEENERSON. How would it suit you to adopt the plan proposed by the Fourth Assistant Postmaster General, in 1917, and again repeated a while ago to the Post Office Committee, to fix a maximum and minimum salary for the rural carriers, a basic salary of \$1,200 and then on up to \$2,400 and \$2,500, and leave it discretionary with the department to pay above the minimum in proportion to the amount of mail handled and carried? That would cover your case, wouldn't it?

Mr. LEMMONS. I don't know. They only figure our own delivery. They never want to figure on anything on this extra weight.

Mr. STEENERSON. Well, that plan contemplated adjusting the salaries between a maximum and a minimum in proportion to the amount of mail and pieces handled and the distance traveled.

Mr. LEMMONS. I know it takes in the amount of pieces handled, but this is a case where it doesn't take that in. There is a law to pay it, but we haven't been able to get it.

Mr. STEENERSON. Congress passed a law authorizing the department to pay for closed pouch, but made it discretionary. They can pay it if they want to. They don't have to.

Mr. LEMMONS. They don't do it.

Mr. STEENERSON. They claim they do in some instances.

Mr. LEMMONS. This is what I say; I think it is a hardship to have to do this work without compensation.

Mr. Lemmons filed the following brief:

BRIEF SUBMITTED BY MR. W. M. LEMMONS.

We appear before your committee to present our claims as rural letter carriers of South Carolina and the United States.

We call your attention to our work and duties to the Government, of which we are a part:

We are expected to defend the United States both in time of war and peace; also to stand by the flag whenever it is assailed under any circumstances. Our duties are to deliver all kinds of mail from first to fourth class matter, also to collect all kinds of mail from first to fourth class matter, to receipt and make application for money orders, receipt for registered letters, insure packages, sell stamps and post cards, and in fact do all kinds of office work that is done in a first-class post office, regardless of weather or road conditions; also some of us are required to carry loop route mail, also mail to intermediate offices without any extra pay for same. For example, Westminster route No. 2 has to carry No. 3 mail and the Fair Play mail 6 miles every morning extra to his own delivery.

During the month of October he carried 2,868 pounds, November 2,552, December 2,584 pounds, and does not get any extra pay for this extra work, both on him and his horse. He has to provide an extra size wagon and a more costly outfit to do this work, and sometimes has to make two trips the 6 miles a day to get the mail out.

We are put on extra mileage at \$24 per mile for all over 24 miles, so you see that by consolidating the four routes the Government is saving some money but working a hardship on the three carriers that have from 30 to 35 miles both on the man and the horse. So, gentlemen, we ask that we have a just pay for the work that we are required to do, as well as all other employees of the Government do. That the salary we are getting of \$1,200 and bonus of \$500 is not enough for a carrier when he has to keep up his own outfit and furnish a comfortable living for his family at the present high cost of living.

In 1915 you could buy corn from 75 cents to \$1 per bushel, oats from 45 cents to 60 cents per bushel, hay from \$20 to \$30 per ton, mail wagons at \$65.

At present corn is \$2.25 to \$2.50 per bushel, hay \$55 to \$60 per ton, oats \$1.05 to \$1.15 per bushel, mail wagons are \$130, and all other things too numerous to mention.

Everything we have to live on or wear has advanced in the last five years to 125 per cent, and pay has been advanced only 40 per cent, and that not permanent.

So, in view of the present circumstances, we ask your committee to recommend that our salaries be raised to a permanent basis with the high cost of living, say, \$1,800, with \$600 for outfit and upkeep of same, or a flat salary of \$2,400 a year for a route of 24 miles, with pay for over mileage at the same rate as the 24-mile route, which would be \$71 per mile for the over mileage; also extra pay for carrying loop route and intermediate offices at the same rate, \$1 per mile for carrying 500 to 1,000 pounds per month; \$2 per mile for carrying 1,000 to 2,000 pounds; \$3 for carrying 2,000 to 3,000 pounds, per mile, per month.

We do not think we are asking too much, as the Government pays city carriers \$1,800 per year; also furnishes them with outfit and upkeep of same. Mail clerks get \$2,100 per year and \$1.50 a trip for living expenses, so we ask your committee to weigh our cause from all angles and be governed accordingly.

We are also in favor of a court of appeals where all differences between carriers and patrons and department can be adjusted with justice to all concerned.

Also we favor a retirement bill, whereby the carriers after years of service and in their old age can look forward to some compensation to keep them from want.

Briefs were submitted by W. Y. Bennett, Cookeville, Tenn., and J. C. F. Hamilton, Jasper, Ala., as follows:

BRIEF SUBMITTED BY W. Y. BENNETT, ASSISTANT POSTMASTER, COOKEVILLE, TENN.

A comparatively small unit of the great army of rural letter carriers of the United States have asked me to represent them, either orally or by brief, at this hearing, and to put before you to the best of my ability, the condition under which they are at present working, in their endeavors to give the best service possible in their line of work, and at the same time to discharge their duties to their families, and to society in general, by rendering the support that every upright, honest, moral man is supposed to render. I represent the rural letter carriers of the fourth congressional district of Tennessee, who are in most part a sturdy, thrifty lot of men, with the purest Anglo-Saxon strain of blood known to the world to-day. Many of them were born and bred in the Cumberland Mountains, and on her plateaus and among her foothills, and few if any of them know what it is to cry "kamerad" in anything they undertake. I am not a rural letter carrier myself, but I am an observant man, and through my work

in the country newspaper field a few years ago, where I had occasion to study all phases of rural life, coupled with my experience of the past few years as assistant postmaster in an office from which nine carriers go forth each morning to their several roads of labor, I believe I know pretty accurately the ups and downs of the average rural letter carrier.

That he learns to go through rain, sleet, snow, and mud with a cheerful mein and a kindly word for all his patrons, we know full well, but just how much of this unpleasantness he endures from one year's end to another, few of us have perhaps stopped to consider. A few years ago he was fairly well paid for his labor, but he has never received the just compensation that should have been his, when endurance qualities and the results of his labor are taken into consideration. However, as a rule he was satisfied with his lot, for he had an opportunity to make and save something from month to month, so he was contented with his vocation and its compensations. Something like three years ago his average expense account began to swell, and from then to the present time it has steadily increased until to-day the actual expenses of his position as rural carrier has grown to such enormous proportions that it has seized the biggest half of his earnings, and naturally he and his family have had to suffer the consequences. It was impossible for him to cut out or curtail the expense of maintaining his equipment and still hold his job, and the man who had been on the job for perhaps 15 years was loth to give up and be called a "slacker" or a "quitter," so he has plodded along the best he could, displaying a patriotism to Government and to country that is not surpassed in the annals of our great nation. A large majority of carriers have had to spend a part of their savings of the past 15 years in order to keep out of debt, and some of those who had not prepared for this emergency, had no alternative but to contract debts, in order to get through and hold their positions, steadfastly believing that assistance would come in the form of salary increases or maintenance allowances. The so-called war bonus allowed each carrier has fallen far short of his actual needs, in fact according to the figures I have gathered from representative carriers, their excess expense has been equal to double the amount of bonus received. The very fact of there being so many of the old carriers on the job still, is absolute proof of their former frugality, for many of those who were not frugally inclined have had to resign because they could not carry the mail with the extra expense.

I have questionnaires from a representative number of carriers, and not one of them shows anything but a deficit in their past two years' work, when their expense accounts and family support are taken into consideration.

The average cost of feeding two horses two years ago was \$35 per month, while to-day it is \$70, just double. The cost of maintaining repairs to vehicles, harness, horseshoeing, etc., three years ago was from \$4 to \$6 per month, while to-day it ranges from \$15 to \$20. The cost of living has increased with them at the same ratio that it has with men in other vocations, and being salaried workers, they have had to help bear the heaviest part of the burden, as compared with people in other lines of business who have had opportunities to share in the profiteering game, which has apparently become a nationalized vocation with all tradesmen who buy and sell the necessities of life.

The rural letter carrier responded most nobly to the call of their Government in the time of war by subscribing and buying liberally of all bond issues, and they not only bought their pro rata of war savings stamps, but acted as free agents for their sale and distribution during the whole tenure of the war, and are still doing so.

Quite a number of carriers not only carry their own patron's mail, but also have to carry for miles the mail to star or loop routes, forming a connecting link between these carriers and the post offices, and for this they get nothing. This is not right, gentlemen, and it should be remedied by the present Congress.

The rural letter carrier believes he is entitled to a living wage for the duties he performs, and that is all that he asks for. He has proven his worth to the Nation by having developed isolated regions into up-to-date civilized centers; he has by constant contact brought the rural district and the urban centers into closer touch with each other, and thereby bred confidence and friendship, instead of distrust and enmity that obtained before. To sum it all up in a nutshell, he is an educational missionary and could not be eliminated from latter-day civilization of which he is an integral part. He doesn't ask the Government to cut down his hours of labor; he doesn't ask that his labors be lightened; he doesn't ask that a part of his work be shifted to other shoulders; he simply asks the Congress of the United States to allow him a sufficient compensation to maintain his position; that is, to maintain his equipment and support his family comfortably. He believes that his present regular salary should be augmented by at least 50 per cent, and that the increase should be made permanent; he believes that he is entitled to as much consideration as the city carriers, both mounted and unmounted, and he simply asks to be put on an

equal basis with them. What he asks is reasonable and just, and I can see no reason why it can not be granted him, and I appeal to you, gentlemen of the joint commission, to recommend that he be taken care of by the present Congress and put on a compensation basis that is commensurate with the duties he performs, and the expense he incurs.

STATEMENT SUBMITTED BY J. C. F. HAMILTON, CARRIER NO. 5, JASPER, ALA.

As a rural letter carrier with more than 11 years continuous service, I wish to submit the following facts:

The R. F. D. service is deteriorating by reason of—

1. Resignation of carriers.
2. Inability of carriers to provide adequate travel equipment.
3. No eligible lists.
4. Carriers are not enabled with present salary to educate our children, carry insurance, keep up our lodge dues and church obligations, properly clothe and feed our families.

I suggest the following remedy:

1. Increase the salary of rural carriers to \$1,800 per annum for standard routes.
2. Fifty dollars per mile per annum for travel over 21 miles and a like amount for travel under standard route.
3. Twenty-five dollars per mile per annum for upkeep or maintenance.
4. Make salary increase and maintenance fund permanent so that carriers now in the service will retain their positions and as an inducement for new blood to enter the service.
5. Enact a liberal retirement law.
6. Abolishment or adequate pay for locked pouches.
7. Require carriers to wear uniforms while on duty.
8. Require carriers to take scheme examination once in 12 months on postal laws, rules, and regulations as affects the rural carrying of mails.

SUPERVISORY EMPLOYEES, INCLUDING SPECIAL CLERKS, AT FIRST AND SECOND CLASS POST OFFICES.

Mr. BELL. The next on the list are the supervisors. The first speaker will be Mr. A. J. Michener, of Atlanta, Ga.

STATEMENT OF MR. A. J. MICHENER, SUPERINTENDENT OF MOTOR VEHICLE SERVICE, ATLANTA, GA.

Mr. MICHENER. I represent the supervisory employees of the States of Alabama, Florida, Georgia, North Carolina, and South Carolina. I feel that in this splendid meeting we have had to-day all of the recommendations for an increase of salary will be also applicable to the supervisory employees, particularly so because of the fact that there has been no readjustment or reclassification of the supervisory salaries since the year 1889, with the exception of the recent increases, which in themselves amount to from 5 to 20 per cent.

I desire particularly to stress upon the point of the importance of the relation of the supervisory employee to the proper administration of the Postal Service. In all of the large offices in these States they are working under what is known as the two-division plan, a division of finance and one of mails.

In the division of finance the assistant postmaster is responsible for the operation and conduct of this service; he is responsible for the proper accounting of all finances to the department, the checking up of the postal cashier and the money-order cashier, and in addition to that he has charge of the correspondence with the department and

with the public. He has to meet the public; he has to be in conference with the postmaster, and consequently the duties of the assistant postmaster is next in importance to those of the postmaster, and under him he has in the division of finance the cashier of the postal system, who receives all of the money for the postal services of the office, except for postal savings and money orders. He carries usually a very large stamp stock, stamped paper, and the transactions of the office run into the millions in this office. He is under a very heavy bond, on which he is required to pay the premium out of his personal salary account. That is also true of the assistant postmaster. The money-order cashier is in charge of the supervision of the employees of his division as well as responsible for the money orders issued and paid and for the proper accounting thereof. He, too, is under a large bond, and he pays for that out of his personal account. They have in this office finance clerks who have charge of the payment of salaries of the rural carriers, railway postal service, and employees of the post office.

That completes the organization, in so far as the finance division is concerned. Each one of these positions are responsible ones, because they have to do directly with the finances of the Post Office Department in so far as they relate to the receipts and disbursements.

In the division of mails, which is equally as important to the service as that of the finance division, and probably more so in some directions, because the proper maintenance of the service is dependent upon its proper administration through the executive ability of the superintendent of the mails—he has practically 90 to 95 per cent of the working force of the post office under his administration. He must prepare and submit estimates for the allowance of auxiliary service, etc., as well as arrange schedules for the dispatch and receipt of mails, and he has in charge the delivery and receipt of all mails. He must meet the public and take care of correspondence and, in general, he must be a man of executive ability, one whose position would equal that of the manager of a large institution or corporation. Under him he has assistant superintendents, who have to be trained by years of experience and knowledge of the business so that they may be qualified to take the position of superintendent and upon whose duties vastly rest the detail of the operation of the service itself. Under the assistant superintendents are foremen and the special clerks who, in the operation of the service, are all a necessary part of the organization.

Each of these employees that I have named has given years of preparation and study, and have qualified themselves for the particular positions which they occupy, and yet, through all these years, there has not been a real recognition of their service by Congress in so far as the enactment of a law for a salary commensurate with the services they perform.

It seems to me as if this is one class of employees that have been particularly neglected, one whose services have not been fully appreciated and one whose services are most invaluable to the department, because without the proper discipline and efficiency, the service itself could not be maintained and this, the practical operation of the service, is in the hands of these men.

I do not desire, Mr. Chairman, to take up much of your time, because the hour is getting late. I understand you leave this evening for New Orleans. There are some who are going to follow me,

in so far as they represent the cities from which they come, and I would be pleased to answer any questions with reference to this service, without going into further details, because there has been a brief prepared which covers much of this matter with reference to the supervisory employees.

Personally, I have been in the service for 30 years, and have seen the growth of this service since the year 1889 to its wonderful proportions of to-day.

Senator MOSES. Have you been all of your time in this office?

Mr. MICHENER. No, sir. I have been in Atlanta only three years and nine months.

Senator MOSES. Where were you previously?

Mr. MICHENER. In St. Louis.

Senator MOSES. In a similar capacity?

Mr. MICHENER. No, sir. At present my position is superintendent of motor vehicles. In 1889 I was a carrier; in 1892, a special clerk; in 1896 an assistant superintendent of delivery; in 1909, superintendent of carriers; and in 1910, superintendent of delivery, and 1912, superintendent of mails.

Mr. STEENERSON. How long were you a superintendent of mails?

Mr. MICHENER. Two years.

Mr. STEENERSON. Until 1914. Did you come to Atlanta then?

Mr. MICHENER. No, sir. I came to Atlanta in 1916.

Mr. STEENERSON. In your work at St. Louis, did you supervise or have anything to do with the records from which promotions were made, and demotions?

Mr. MICHENER. Yes, sir.

Mr. STEENERSON. Have you had anything to do with that since?

Mr. MICHENER. No, sir.

Mr. STEENERSON. Who keeps these records now from which promotions and demotions are made in St. Louis?

Mr. MICHENER. I wouldn't be able to tell you who was keeping them to-day in St. Louis.

Mr. STEENERSON. I don't mean the name of the person; what office?

Mr. MICHENER. The superintendent of mails controls the records of the employees in that division.

Mr. STEENERSON. And the superintendent of finance, does he control the records relating to that division?

Mr. MICHENER. The office of the auditor is where they are controlled. He is in charge of that.

Mr. STEENERSON. Was there any dissatisfaction there in St. Louis with regard to promotions, as has been mentioned here in some cases? In some cases they stated it was perfectly satisfactory—the employees were contented. How was it there from your experience?

Mr. MICHENER. From my experience—the part of the time that I was in charge I can speak about. Since that time I can not answer intelligently, because I was not in charge of the force in that office so far as relates to promotions or demotions.

Mr. STEENERSON. Do you know if there was any dissatisfaction amongst the employees?

Mr. MICHENER. Yes; I know there has been dissatisfaction.

Mr. STEENERSON. For what reason?

Mr. MICHENER. In the matter of promotions, in the first place, and in the general conduct of the administrative affairs of the office.

Mr. STEENERSON. In what respect?

Mr. MICHENER. Well, in respect to the manner in which that office was administered in so far as shown by discrimination, and in the improper application, I should say, of the rules and regulations to the employees.

Mr. STEENERSON. Well, discrimination by reason of what? Was there any partisan or religious or social influence that controlled promotions, or were they based on merit?

Mr. MICHENER. Well, I wouldn't be prepared to say they were based on ulterior motives or not, but it was there.

Mr. STEENERSON. There was discrimination?

Mr. MICHENER. Yes.

Mr. STEENERSON. And dissatisfaction among the employees on that account?

Mr. MICHENER. On that account.

Mr. STEENERSON. When did you leave there, did you say?

Mr. MICHENER. In 1916.

Mr. STEENERSON. And you have not been there since?

Mr. MICHENER. No, sir; when I say I have not been there since, I have been there twice since, but I have not been in the post office since then.

Mr. STEENERSON. Well, was this dissatisfaction on account of promotions and demotions due to the men—the supervisory employees—that had charge of it, or was it the postmaster, or who was it?

Mr. MICHENER. I would say personally that it was the general policy of the administration. The postmaster's administration as carried on down through the various supervisory employees.

Mr. STEENERSON. You said you were demoted there?

Mr. MICHENER. Yes, sir.

Senator MOSES. From what to what?

Mr. MICHENER. Sir?

Senator MOSES. From superintendent of mails?

Mr. MICHENER. Yes, sir.

Senator MOSES. To what?

Mr. MICHENER. Superintendent of central stations.

Senator MOSES. How long did you hold that position?

Mr. MICHENER. Two years.

Senator MOSES. Were you transferred here at your own request?

Mr. MICHENER. No, sir; I was transferred here after charges had been preferred against me and not sustained. The department wrote me a letter directing that I be transferred here.

Senator MOSES. There were charges made against your efficiency?

Mr. MICHENER. Yes, sir.

Mr. STEENERSON. By whom?

Mr. MICHENER. The postmaster.

Mr. STEENERSON. And they were not sustained?

Mr. MICHENER. They were not sustained, or I would not be in the service to-day.

Senator MOSES. I take it that, under the circumstances, you were entirely willing to be transferred?

Mr. MICHENER. I was entirely willing; yes, sir.

Senator MOSES (temporarily in the chair). Now, in addition to the supervisory employees Mr. Michener spoke of we have seven others to whom have been allotted only three minutes each, and in the interests

of saving time I will take the opportunity of saying that in the various hearings we have held in the different parts of the country we have had ample testimony as to the high cost of living, comparative increases in salaries in industrial occupations, and in the post offices, the conditions of work in the average post-office building, etc. Of course, if this commission is to render any real service to the country, and especially to the Postal Department, it must be in the line of practical suggestion, and we feel that the men in the field, who constitute the brains and the backbone and the conscience of the Postal Service, as we have found postal employees everywhere to do, knowing the conditions, as they are in the service, are the men who can give us the practical suggestions upon which we can formulate any recommendation we can make to Congress, and I would suggest that the gentlemen who are to follow Mr. Michener, and all others who are to speak, shall confine themselves to giving to the commission as many practical suggestions as possible with reference to the recommendations which they, as members of the Postal Service, think we should make to Congress, and I will ask Mr. C. L. Patch, assistant postmaster at Tampa, Fla., and every succeeding speaker to speak to us along that line of suggestion.

Mr. Michener submitted the following brief:

BRIEF SUBMITTED BY MR. A. J. MICHENER, SUPERINTENDENT MOTOR-VEHICLE SERVICE, ATLANTA, GA.

We respectfully submit this brief on behalf of supervisors and special clerks of the States of Alabama, Florida, Georgia, North Carolina, and South Carolina.

We desire to call attention to the various positions and their duties with a view of bringing to above commission the responsibility of these positions and to call attention to the salary paid them as being totally inadequate with the salaries paid for similar positions in commercial world, and to show that under present conditions of living and prices prevailing it is impossible for a supervisor to maintain living conditions that he is expected to maintain and that would give him and his family a substantial living necessary to contentment of mind and self-respect they should have.

The following are the duties and responsibilities of the various supervisors:

ASSISTANT POSTMASTER.

The position of assistant postmaster is one of the most important places in supervisory force of the office. He must be a man capable of assuming the duties of postmaster at any time. He is also charged with the financial transactions of the office. He must have exceptional financial ability to handle place of superintendent of finance, which goes with the position. In addition to this he has supervision of a number of men, which necessitates executive ability as well as many other qualifications.

As superintendent of finance he must account for millions of dollars passing through his office. The duties of assistant postmasters in smaller offices will be enumerated later. The assistant postmaster is also required to carry a large bond at personal expense.

SUPERINTENDENT OF MAILS.

Superintendent of mails is head of division of mails and is responsible for conditions in a post office to the department and to general public through postmaster. He is charged with giving prompt and adequate service to the public and with handling of practically all of the allowances, estimates, and expenditures allowed by the department. He is responsible for discipline and working conditions of 90 per cent of employees in the office. The position requires a man of exceptional ability, capable of rendering efficient service to the public, and handling entire operations of post office to satisfaction of department.

ASSISTANT SUPERINTENDENT OF MAILS.

The position of assistant superintendent of mails is a stepping stone to position of superintendent of mails. He must be a man with sufficient training to assume duties of superintendent of mails and act in any capacity in division of mails to which assigned.

SUPERINTENDENT OF MOTOR-VEHICLE SERVICE.

The superintendent of motor-vehicle service has a position equivalent to that of assistant superintendent of mails. He must be thoroughly familiar with entire workings of division of mails and must be capable of assuming responsibility of making expenditures and curtailing expenses. The motor-vehicle service is a branch of the service in which there may be large expenditures or large savings in accordance with character of supervisor in charge. It is essential that he be a man of executive ability and capable of instituting much initiative in this work. This position requires close study and absolutely personal attention.

FOREMAN.

A foreman in post office has great responsibility, as he is charged with direct handling of employees under him. His training and supervision will be responsible for future ability and character of employees. It is essential that he be a man of executive ability in order that he may administer proper discipline to those under his supervision and maintain proper order. He must have sufficient knowledge of Postal Service that he may in part train those subordinate to him. In addition to this, he must be a man capable of assuming higher supervisory places as they become vacant.

MONEY-ORDER CASHIER.

The money-order cashier has direct supervision of operations of his division, which also handles postal-savings branch of the service. Large sums of money pass through this division, and it is essential that money-order cashier be a man of financial ability as well as having executive ability, as he is charged directly with discipline and duties of his division. He must also carry a large bond at personal expense.

POSTAL CASHIER.

The postal cashier is charged with handling and recording of all postal revenues, with exception of money-order and postal-savings business, which amounts up to millions in many offices. He is charged with conduct of his division. The position requires a man sufficiently trained to handle these millions of dollars, render satisfactory reports to department, and be executive head of his division. He is required to carry a very heavy bond at personal expense.

ASSISTANT POSTAL CASHIER.

Assistant postal cashier is charged jointly with responsibility of the postal cashier and must be a man sufficiently trained to assume duties of cashier. He is also under heavy bond at personal expense.

BOOKKEEPER.

The bookkeeper in the post office is in reality the auditor for the post office. He is subordinate only to the postmaster. He is charged with making of all reports, checking the various financial transactions passing through the office. Not only must he have a thorough knowledge of bookkeeping, he must in addition thoroughly familiarize himself with postal laws and regulations pertaining to finance department and keep all departmental rulings current.

CHIEF STAMP CLERKS.

The chief stamp clerk is charged with responsibility of maintaining a large stamp stock from which retail stamp clerks are supplied and large orders to public are filled. Large financial responsibility is attached to this position in view of the fact that only large amounts are handled and any slight error might make large financial loss. They are required to carry a large bond at personal expense.

FINANCE CLERKS.

Finance clerks are clerks who are taken from other places in the office and assigned to finance division for their exceptional ability. Men with such exceptional ability, had they been allowed to remain on workroom floor, would have no doubt become supervisors as vacancies occurred. Their exceptional ability placing them in finance section has practically eliminated their chance for advancement to supervisory grades due to the fact that there are but few supervisory places in that division. Therefore, we believe that finance clerks should be classed as supervisors and paid in accordance with foremen.

STATION EXAMINER.

This position is one of very large importance as duties of station examiner require that he visit various stations, issue instructions relative to all phases of the work which requires a man with general knowledge of entire postal service. Inasmuch as stations, as a rule, are separated entirely from supervision of main office, the station examiner is relied upon to keep superintendent of mails and superintendent of finance in touch with the conditions existing at all stations.

SUPERINTENDENT OF STATIONS.

The superintendents of stations are charged with conduct of station service to public supervision of personnel, and responsible for all financial transactions at the station. To fill this position a man must have a thorough working knowledge of all branches of the Postal Service; a personality sufficiently pleasing to meet public; executive ability enough to maintain high standard of efficiency in personnel of his office.

SPECIAL CLERKS.

It is the opinion of the delegation of five States mentioned above that from their personal observation and experience that grade of special clerk should be maintained in two grades—one grade being \$100 higher than highest clerk grade, and second grade being \$200 higher than highest clerk grade. The grade of special clerk gives a clerk something to look forward to after he has obtained the highest clerk grade.

It is something in which the department can recognize special merit and exceptional ability on part of clerk after he has reached highest clerk grade when there is no supervisory places available.

We believe that first-grade special clerks should be made for promotion of clerks in highest clerk grade showing exceptional ability and knowledge of work they are assigned to; that second-grade clerks should be clerks promoted from first grade of special clerks to second grade of special clerks having qualifications necessary for first grade and in addition thereto displaying qualifications of executive ability. This would be a stepping-stone to supervisory grade and would give the department a chance to recognize such ability when no supervisory places were available.

ASSISTANT POSTMASTERS IN SMALLER OFFICES.

The duties of assistant postmaster in the smaller offices is one of the most difficult to handle. He is held responsible for all financial transactions of the office and he has no cashier, bookkeepers, or others to help him with that branch of the service. He is held accountable for service to public, and, in a great many instances, dispatching and handling of outgoing as well as incoming mail. He must submit all reports to the department, keep all instructions and regulations current himself, as he has no one to intrust these duties to. The office of assistant postmaster in these offices is practically indispensable to the department and is compared with places in the commercial world in which men have spent their lives studying and have obtained a high position at the head of corporations. In addition to above duties of assistant postmaster, the attention of the commission is called to the fact that these assistant postmasters in a great many instances are required to put up scheme examinations. It is the opinion of assistant postmasters in five States above mentioned that they should be relieved of these examinations. Further attention of the commission is invited to the fact that central accounting offices and noncentral accounting offices are paid the same salaries, no provision being made for compensation for this extra duty. The commission is asked to take notice of these conditions existing and it is requested that additional compensation be allowed offices that are designated central accounting offices.

INEQUALITY OF SALARIES IN SMALL FIRST-CLASS OFFICES.

Special attention of the commission is called to inequality of salary as now established in smaller first-class offices, namely, foremen, station superintendents, superintendents of mail, and assistant postmaster receiving the same or approximately the same salary.

We cite as one example, Tampa, Fla.

Superintendent of mails, basic salary, \$1,600.

Assistant superintendent of mails, basic salary, \$1,600.

Station superintendent, basic salary, \$1,600.

Cashier, basic salary, \$1,600.

Foremen, basic salary, \$1,600.

Under bonus and increase acts recently passed by Congress all of the above positions receive \$1,925.

This is not to the best interest of the service. It prevents administering of proper discipline and does not give officials the prestige they should have.

The supervisors from the above-named States respectfully request the commission to take into advisement and grant 30 days' annual leave of absence.

We also ask that some definite form of retirement bill be enacted into law in order that those who have given practically all of their lives to the service and are now superannuated, be retired and have favorable consideration.

In conclusion we wish to advise the commission that the price in foods and wearing apparel in this section has increased close to 150 per cent in the last five years in which time practically no permanent increase has been granted supervisors.

It is requested that we be allowed increase similar to that adopted by the National Association of Supervisory Post Office Employees at their convention in Atlantic City in August, 1919. We have reviewed this scale of salaries very closely and believe same is just and equitable to the position of responsibility and trust held by supervisors in the Postal Service.

**STATEMENT OF MR. C. L. PATCH, ASSISTANT POSTMASTER,
TAMPA, FLA.**

Mr. PATCH. Mr. Chairman and gentlemen of the commission. I have a small brief here which I will present as representing five of the first-class offices of the State of Florida; 20 of the 34 second-class offices, as well as the Tampa local office. The brief covers practically everything necessary to cover. There are only one or two items that I will emphasize and I will be through.

One thing I would like to emphasize or indorse is a request made by the subordinate employees of the office. The fact that it is necessary for a post office to have an efficient clerk-carrier force as well as other employees is plainly apparent. No supervisor, I care not who he is, or where he may be from, can give efficient service without efficient carriers and clerks. That is self-evident. One of the ingredients of a successful postal service as well as other industries is efficient supervisory employees.

The fact that we are getting an inefficient and low grade of employees into the service in this day, which I think has been amply shown here to-day—we can not get applicants to start with—indicates that unless something is done to remedy this condition in the near future the supervisory employees of to-morrow will be very inferior to those of to-day, and it will be very hard to hold even the supervisory employees they have. I might cite one case—our assistant superintendent of mails, who is drawing a salary of \$1,950, including the bonus, resigned, effective January 1, to accept a position paying him \$225 a month. It was next to impossible for us to fill that position within our office.

The future of the service depends upon the class of men we are getting in now.

There is another condition I would like to call your attention to. I believe it is peculiar to our State to a greater degree than any other State, with the exception of California and a few of the Atlantic coast cities, summer resorts, etc., during the months of November to April 1, or possibly April 15—during these months our State is the playground of the Nation: every coast town on the east and west coast is filled with people. The populations increase to two, five, and sometimes six times their summer population. This will apply also to a great number of our inland cities. To handle this class of people, these increases, it is necessary to increase our clerical force many fold. I might cite the case of Palm Beach, which in the summer time has a postmaster and one clerk, and in the winter time that force is increased to five clerks. These additional employees taken from the outside are totally green men and they are inefficient and unable to handle this great mass of business.

I might say, too, that the class of people that come there in the winter time are a very exacting class of people. They demand the best of service, and it is an utter impossibility to give them that kind of service with the men we have at our command.

The question has been asked here as to how the increases we have recommended could be met, and I have asked the question of a number of our supervisory employees as to whether or not they ever had a complaint on the 3-cent postage and I have yet to hear the first supervisory employee say he has heard any such complaint. I did not have inquiries from the business men in my community as to why the postage was reduced from 3 cents to 2 cents.

Senator MOSES. Your time has expired, Mr. Patch.

Mr. Patch's brief follows:

BRIEF SUBMITTED BY C. L. PATCH, OF TAMPA, FLA.

I represent the supervisory employees of 5 of the 8 first-class offices of Florida and 20 of the 34 second-class offices. I am also representing the supervisory employees of the Tampa (Fla.) post office.

Perhaps the slogan used by one branch of the service whose representatives have appeared before your body at other hearings, and will no doubt appear in Atlanta, will best state in a few words our purpose in appearing before this commission—"A just remuneration for services well rendered." This is all we ask, and in asking this we do not do so with a selfish motive, but with the object in view of maintaining and increasing in so far as may be possible the efficiency of the Postal Service as a whole. We ask no favors, but we do hope to convince this commission and through this commission the Congress of the United States that we are worthy of a better remuneration than we are receiving under the classification law of 1889—a law over 30 years old.

We wish to urge a proper recognition of the claims of the representatives from the other branches of the service. The supervisory employees must have efficient, loyal, and capable clerks, carriers, and other employees to render that efficient service demanded by the patrons of the service, by the department, and by Congress, and to which they are entitled. It is essential that we secure the highest type of employees possible in the entrance grades of our offices, and that we make every effort to hold the efficient, experienced men at present in the service. The object in appointing this commission was not to correct present conditions alone but, in so far as may be possible, to provide for the future conditions in the service; for that reason we must induce capable men to enter the service now, as it is from the employees entering our service to-day that we must select the supervisory employees of to-morrow. Salaries and the opportunity for promotion to the very highest positions within the service, based upon merit alone, must be such as will get this class of men and hold those within the service at present.

At present the base salaries are so low that we are not getting the higher class of men to take the examinations, and the best of those that do take these examinations and pass them are refusing appointments after learning just what the conditions are.

One assistant postmaster in my State informs me that the Civil Service Commission has held two examinations at his office recently; only six men passed these two examinations, and the examinations are not hard. Of these six men five refused appointment, and to get help he was compelled to appoint the bottom man on the list. The reasons for refusing appointment were that they could do better outside of the service. At a recent examination in Tampa we had 10 applicants; a few years ago I held an examination and had over 90 in the class.

We believe we have a condition existing within our State that does not exist within any other State to so great an extent, unless it is in California and in a few of the Atlantic coast summer resorts. From November to April our State is the playground of the Nation; practically every coast town on both the east and west coasts of the State and very many of the inland towns are increased in their population from two to five times, and in some cases more. To meet these abnormal conditions it is necessary to increase the office forces. Palm Beach increases from the postmaster and one clerk in the summer to the postmaster and five clerks within the tourist season. St. Petersburg, Fla., increases from 17 clerks in the summer to over 50 in the winter months, and other offices are increased, some more, some less. These tourists are people who demand service that is up to the minute, and it requires the best of executive ability upon the part of the supervisory employees to give such service as they demand with the green, inexperienced help they are required to use during these months. We feel that they are meeting these requirements and that they should be compensated accordingly.

As to salaries paid by other lines of business within our State: Banks in Tampa are paying bookkeepers \$150 per month, tellers \$175, minor officers from \$200 to \$250; in addition to this they are paid a bonus at the end of the year amounting to 5 to 15 per cent of their year's salary; they also receive meal allowances, and are usually protected to some extent against losses, while a post-office employee stands every loss.

The proprietor of one of our largest dry goods stores made the statement a few days ago that it was generally conceded among business houses that the post office paid a very low salary for the duties performed and the responsibilities assumed. Supervisory employees in this store are paid from \$1,800 to \$4,000 per annum.

I believe we are well enough acquainted with the salaries paid railroad employees, and as they are very much the same everywhere I shall omit them.

In the auto sales line supervisory employees are paid from \$250 and up; in the fruit-packing business, from \$50 per week up. Men having from 4 to 10 men under them in the cigar business in Tampa are paid \$3,000 per year. In the wholesale dry-goods business managers of departments are paid \$250 per month and up.

On the first of this month our assistant superintendent of mails resigned to accept a position paying \$225 per month, with house rent, water, fuel, and lights, and his clothing for himself and wife and all provisions at wholesale rate.

From information that I have been able to gather from 15 supervisory employees representing five of the 8 first-class offices of Florida, I find: the average length of service is 13 years, and ranges from 7 to 18 years. The average length of time they have been in the supervisory positions is about 4 years. Thirteen of these 15 employees are married men with families of from 2 to 8 dependent upon them, averaging about three to the man. Living expenses average \$111.50 per month which does not include rents or taxes, or payments upon homes. Rents average \$37 per month. Thirteen of these men are purchasing homes, or rather trying to do so.

The same class of information gathered from 20 out of 34 second-class offices in the State show: Range of time in the service from 1 to 25 years with an average of 9½ years. Length of time as supervisory employees from 1 to 20 years with an average of 6½ years. Fourteen of the 20 are married men and their dependents range from 2 to 10 with an average of 3. Living expenses range or rather average \$97 per month, rents \$27 per month, taxes \$62 per year. Eight of the 20 are buying homes and one of them stated that he had not been able to make a payment on his contract in two years. The average number of men supervised by these employees is 7, and offices that are central accounting have charge of from 5 to 42 offices, average 21.

At some of our offices there are no assistant postmasters, the duties are performed by clerks who receive clerk's salaries. We feel that any employee performing supervisory duties should be paid supervisory employees' salaries. These men should receive more than temporary men under them would receive at 60 cents per hour or than any regular clerk or carrier under him would receive.

There is another class of employees that should be provided for. There is a class of employees who have to perform duties of a semisupervisory nature; they may not have any employees directly under them, yet it may be their duty to refer matters to other employees; their duties may require expert knowledge; these employees

should be classed as special clerks and their salaries should range from the highest clerk or carrier salary to the lowest supervisory salary.

(On behalf of the supervisory employees of my State I wish to urge the adoption of the classification plan as outlined by the supervisory employees of the United States at their last national convention held in Atlantic City last August. We feel that this scale is only just to us. It may be true that we should not expect as high salaries as are paid in outside lines, but we do not feel that because we have given our lives to this work that we should be penalized or that our families should suffer. We feel that the position of postmaster and for that matter the positions above that to the Postmaster General should be filled by promotion upon merit. That these positions should be made strictly civil service. That the postmaster's positions in the larger offices could be filled by promotions of postmasters from smaller offices, if it should happen that there was no one in that office fitted to take the place, and provided that the postmaster promoted had shown ability to handle larger things.

The big problem in the post offices to-day as well as in other lines is efficient supervisory officers. We can only get these men by holding out proper inducements. We want politics forever removed from the post offices.

We feel that assistant postmasters at second-class offices that have central accounting work should receive more salary than those who do not have this work. Assistant postmasters at first-class offices should receive from one to two hundred dollars more per annum than any other supervisory employee in that office for the reason that he may be called upon at any time to perform the duties of the postmaster, and in such cases all other employees would be subordinate to him. He is also supposed to have an all-around postal experience to be a postal expert in his office.

We feel that there is too great a differential between the salary paid the postmaster and the salaries paid the assistant postmaster and superintendent of mails and other supervisory employees. The postmaster in nearly every case is protected from loss by bonded employees.

In the January number of the American Magazine, on page 127, appears in part an article written by B. C. Forbes, and I wish to quote just a few lines, "The nation-wide craze for Government positions is not easy to understand—not even when all the known advantages as to hours, certainty of steady employment, vacations, and, in some cases, pensions, are taken into account."

"It can be set down, as a general statement, that civil-service salaries are the poorest in the whole country."

Again later on: "All who have high-salary aspirations would do well, therefore, to steer clear of civil-service jobs."

This magazine has a circulation of one and a quarter millions, and with the quotations that will be made it is safe to say this article will reach two or more million people. How can we, in the face of these facts, and knowing what we do of the service conditions, urge any young man to make the post-office service his life work?

On behalf of those whom I represent, I wish to thank this commission for the opportunity to present our cause, and we feel that this body of fair-minded men will make just arrangement of the affairs of the service and that better days are ahead of those of us who have given years of our lives to the service they love.

Senator MOSES. The next speaker will be Mr. W. E. Hanley.

STATEMENT OF MR. W. E. HANLEY, SUPERINTENDENT OF MAILS, JACKSONVILLE, FLA.

Mr. HANLEY. Gentlemen, I have a brief here from the executives of the Jacksonville, Fla., post office. We have covered the subject right thoroughly, and I do not know that I can add anything to it that would help, and I will therefore submit my brief.

Mr. Hanley's brief follows:

BRIEF SUBMITTED BY MR. W. E. HANLEY.

I am appearing before your commission as a representative of the executives of the Jacksonville (Fla.) post office, submitting for your consideration certain facts in connection with the revision of the salaries of those executives. I shall use as a basis of comparison the months of July, 1914, and July, 1919.

In July, 1914, a person could go into the markets of this city and purchase a supply of food for the sum of \$5.33. In July, 1919, to buy the same list of supplies would cost \$10.88, or an increase of 104.22 per cent.

Rents in all parts of the city have been greatly increased. From a recent investigation conducted in this city it was found that rentals for all classes of property had increased approximately 80 per cent. The cost of building operations of all kinds has increased more than 100 per cent, and the value of real estate, especially residential, has increased 100 per cent.

The average annual salary received by the 13 executives in this office in 1914 was \$1,569.23. The flat increase to \$1,800 per annum granted these executives, effective July 1, 1919, has carried this amount to an average salary of \$1,892.30 per year, or an average increase for all executives during that period of 20.5 per cent. This includes the salary of the assistant postmaster. Many of these increases were made on July 1, 1919, so the benefit of this increase has only been in effect for the past few months. The figures given do not include the increases recently granted by Congress in public resolution No. 19, Sixty-sixth Congress.

One phase of the increase that became effective under the department's order of July 26, 1919, is the inequality of the increases as applied to individual executives. For instance, our assistant superintendent of mails is receiving \$1,800 per year, whereas the foreman of one of our classified stations, who has under his supervision one and three-eighths clerks per day, two rural free delivery carriers, and one city carrier, is receiving the same salary.

We have another classified station the superintendent of which receives \$1,800 per year and has under his direct supervision 12 carriers and 3 clerks, and at another one of our classified stations we have a superintendent receiving \$1,800 who has direct supervision of some thirty-odd employees and the financial responsibility of many thousands of dollars per year; yet his salary is the same as that of the superintendents of the smaller classified stations.

Such conditions of necessity tend to cause those executives who have a greater responsibility to feel dissatisfied and to feel that they are not receiving adequate compensation for the responsibility that they assume, as compared to the executives with lesser responsibilities who receive the same salary.

We have other employees in this office who are not classified by the department as executives, but who perform a considerable amount of supervision. For instance, at the main office the clerk in charge in the evening has under his direct supervision approximately 25 clerks, yet his salary is no more than any clerks under his supervision. The clerk in charge in the morning has under his supervision approximately 20 men, yet he is not even designated as a special clerk and receives a salary of only \$1,500 per year, while he has clerks under his supervision who are designated as special clerks at a salary of \$1,600 per year.

Of course, you may ask why one of the special clerks was not assigned as clerk in charge. The reason is that there is a possibility of a special clerk being designated owing to his ability in distribution of mail, yet having no ability as an executive.

There is another phase of the executives' trouble that seems to be unfair and causes a considerable amount of complaint, and that is the fact that these executives are all on an eight-hour basis. Yet, in the event the needs of the service require that they work overtime, or on holidays or Sundays, no compensatory time or pay is permitted for this. If one of these executives has the misfortune to become sick, even though he has put in overtime, Sunday time and holiday time, he is docked for the time he is absent from his regular schedule.

There is a feeling among the post-office employees, that they have not been dealt with as fairly as other Government employees, in the matter of vacations, sick leaves, etc. Post-office employees are only allowed an annual leave of 15 days, not including intervening Sundays and holidays, which, as a rule, makes about 17 days. They are required to work a full 48 hours per week, whereas employees of other departments of the Government are granted 30 days leave of absence and 30 days sick leave, with full pay, and a 44-hour week. It does not seem fair to the average post-office employee that such discriminations should be permitted to prevail against him.

During the year 1918-19 this city, in common with the rest of the country, had an epidemic of influenza. During the fall and winter, I worked many hours in excess of my regular schedule, Sundays and at night, to maintain the service. Yet, in January, 1919, I was stricken with the influenza and was sick in bed for 10 days, for which time I was allowed no compensation, and there are many such instances that make men feel that their best efforts to the service are not appreciated.

In the 21 years that I have been in the service, this question of increase in salaries has been an open question and it seems to be unsettled still. A number of the larger industrial organizations have solved their trouble along this line by adopting what is known as the Dun, or Bradstreet index number system, having a minimum wage for all employees and, as the price of the necessary things of life increase, the salaries of these employees are increased in the same proportion. As the price of the essentials

of life decrease, this increased salary is reduced progressively as prices go down, until the minimum wage salary is reached.

There is a growing feeling and desire on the part of the postal employees, that the Government should provide an adequate retirement fund for old age, total disability, or partial disability. There has been no definite plan suggested, but it is the opinion of the employees that the Government might well take up one of the plans adopted by some of our leading commercial and civic organizations, or following the line of the War Risk Insurance. I am attaching hereto, a retirement bill that has been adopted by the city of Jacksonville. It might be worth your while to give same careful consideration.

I would like to state further, as a representative of the executives of this office, and I am only speaking for them, that there is a tremendous amount of criticism of the department for its failure to grant promotions and increases of salaries that are recommended apparently in accordance with law. As I understand it, the law provides that the stenographer in a post office the size of this, is to receive a salary of \$1,800 per year and it was so recommended by the postmaster, but the department saw fit to cut it to \$1,700. The foreman of our stamp division, if I have been correctly informed, is entitled to a salary of \$1,800 and it was only recently that the department would give him any recognition whatever, in the way of an increase, and this has been granted effective October 1, carrying his salary from \$1,500 to \$1,800 per year. There is not, in my opinion, a man in the financial service, that has a greater responsibility than the foreman of the stamp division. He has charge of the wholesale and retail stamp department and is personally responsible for an average of approximately \$50,000 per month. In the event that he makes an error, he is held responsible for it and must make it good to the department. A few shortages or one error may materially reduce the net earnings of his salary and it is the opinion that there should be some means by which those executives who handle finances and are held responsible for a strict accounting for same, might be protected in these shortages.

Of course, it is understood that, in the event it is found that a clerk is careless and incapable of handling finances, he should not receive this protection, but should be removed from that division.

I would like to say further, that the service to-day, as compared with what it was in 1914, is only about 60 per cent efficient. We have had a tremendous turnover in our organization. This is caused by the fact that many of the old and efficient employees who were familiar with the service, have resigned and entered into other lines of endeavor. I have in mind a number of instances, but I will name two; one was a clerk of the fourth grade, receiving a salary of \$1,200 per annum, who left to accept a position with the Standard Oil Co., at an entrance salary of \$125 per month.

Another case is that of a young man who left the service and went with the Shipping Board at a salary of \$8 per day and continued with them until last spring, when he returned to the service as a temporary clerk, the department refusing to reinstate him as a regular clerk. When he found that the department would not consider his reinstatement, he again left the service and entered the employ of the American Bakeries Co., at a salary of \$50 per week.

All of these conditions tend to make those that are in the service dissatisfied, and the turnover that we have had in the past does not seem to abate, as many of the older, experienced clerks, who are among the most faithful and efficient in the service, are resigning and entering more profitable and congenial occupations with outside commercial organizations. Of course these vacancies must be filled with new and inexperienced persons, and the service to-day in the Jacksonville post office falls far short of the standard of what it was a few years ago. It is not from a lack of interest on the part of the executives, but is caused primarily by this unstable, shifting organization, resulting from the continual resignations of employees who are not receiving salaries sufficient to provide themselves and their families with the necessary things of life.

I know that there are a number of employees who are remaining in the service to-day, looking forward to relief that they hope will be accomplished by your commission, and as surely, and as soon as it becomes definitely determined that no relief is to be expected from Congress, there will be a general exodus from the post-office service.

COPY.

An act providing pensions for employees of the city of Jacksonville.

Be it enacted by the legislature of the State of Florida:

SECTION 1. A pension fund is hereby created for employees of the city of Jacksonville, holding permanent positions, other than members of the police and fire departments, who may, while an employee of the city become incapacitated through injury, ill-health, or who shall after a number of years of service be retired and for their dependents, as hereinafter provided.

SEC. 2. Any employee of the city of Jacksonville, except members of the police department and fire department, who shall pay the assessments as provided herein, shall be permitted to participate in the fund herein and hereby created, but nothing herein contained shall be so construed as to require any employee to participate in the benefits herein and hereby conferred. All present employees participating herein shall receive credit for the time of their service: provided, such service shall have been without interruption not exceeding four months during any period of 12 months prior to the passage of this act. All present employees shall be required to file their written election with the city commission on or before 6 months from the date of the passage and approval of this act, in order to entitle them to participate in the benefits conferred by this act.

SEC. 3. All persons entering the employ of the city subsequent to the passage and approval of this act, shall be required to file their written election with the city commission on or before six months from the date of their employment, in order to entitle them to participate in the benefits conferred by this act. Any person desiring to participate in the benefits conferred by this act, shall sign an application within the time herein prescribed, on a form prescribed by the trustees hereinafter designated, which shall be considered their written election to participate in the benefits herein and hereby conferred. After the passage of this act, any person employed who shall have reached the age of 45 at the time of their employment shall not participate in the fund herein and hereby provided for.

SEC. 4. All employees except those now employed by the city, shall pass a medical examination. The pension fund shall consist of money derived as follows; at least 2 per cent of all salaries of employees holding a position under the city which entitles them to a pension under this act; and \$5,000 to be levied by the city in the 1919 budget; \$5,000 in the 1920 budget; \$5,000 in the 1921 budget; \$2,500 in the 1922 budget; \$2,500 in the 1923 budget, and provided that thereafter the city may appropriate such additional sums as may appear to the trustees to be necessary, or any portion thereof.

SEC. 5. The administration of this fund shall be in charge of the city commission of the city and the members thereof shall be known and designated as trustees of the pension fund. The trustees shall make all reasonable rules and regulations for their government, the treasurer of the city of Jacksonville shall be the treasurer for said board, and he shall give such bond as may be prescribed by said board. The fund shall be managed by said trustees and shall be invested in first mortgages on property in the city of Jacksonville, or in United States bonds, the validity of which investment shall be approved by the written opinion of the city attorney. The trustees shall not invest any of said fund so as to yield less than 4 per cent per annum.

SEC. 6. Employees who have been in the continuous service of the city for a period of 20 years, shall at their request be retired on a pension, which shall be 40 per cent of the average salary received by them for the last three years. They shall receive 2 per cent additional for each year of service over 20 years until same reaches a maximum of 60 per cent of the average salary received by them for the last three years. Employees who become, in the opinion of said trustees incapacitated for the performance of their duties, irrespective of the length of service, shall be entitled to a pension as provided in section 7.

Any employee who may have enlisted voluntarily or who was drafted into the service of the United States Army or Navy and later returns to the service of the city shall be given credit for the period of employment preceding such enlistment or draft provided, however, the time intervening between the date of such enlistment or draft and his return to the city employment does not exceed five years; and provided, that he shall return to city employment within 90 days after his discharge from the Government service, provided, that nothing in this section contained shall be construed as to permit of the retirement upon a pension of any employee prior to his becoming 55 years of age, unless such employee in the opinion of the board, shall become physically or mentally incapacitated from the performance of his or her duties, or unless the employee has been engaged for the term of his employment of 20 years in a character of employment which trustees hereunder may consider as hazardous.

SEC. 7. Employees entitled to a pension by reason of incapacity through injury or illness, shall receive an amount equal to and not to exceed 50 per cent of the average yearly salary received by them for a period of three years preceding retirement, provided that no person drawing a pension by reason of incapacity or illness from any source whatever, including the pension, receive an income exceeding the amount received as a salary at the time of his retirement, whenever same does exceed it, the amount of pension paid shall be reduced proportionately. The widow of an employee, without children, shall be paid 75 per cent of the amount of the pension which such employee would have received, until the widow remarries or dies. The widow of an employee with children under 16 years of age, shall receive the amount of the

pension which such employee would have received, until such widow remarries or dies, or the youngest child reaches said age. Children of any employee entitled to a pension under this act, who are under 16 years of age, shall each receive the sum of \$15 per month on the death of their father or mother, entitled to a pension under this act, or in the case of the death of such employee and his widow shall remarry, until they reach the age of 16 years, provided the amount paid such children shall not exceed the amount to which the widow would have been entitled. In case there is no widow or children and the father or mother of such employee is dependent solely on the earnings of such employee, he or she, or both, shall receive an amount equal to that which would have been paid to the widow under like conditions. This act shall apply to males and females alike whether specially mentioned or not, except that the husband of an employee shall not be entitled to a pension under this act unless he is incapacitated at the time of the death of his wife and then only so long as he continues in that condition.

SEC. 8. In case of the voluntary resignation of an employee all payments made by him to said fund shall be returned to him without interest, but when an employee is discharged, all payments made by him shall be refunded with interest at the rate of 4 per cent per annum. Any person receiving a pension under this act shall not be thereby barred from engaging in other business.

SEC. 9. Pensions under this act are not assignable or subject to any legal process.

SEC. 10. Pensions of an employee shall cease upon his conviction of a felony, except that the trustees, by a majority vote, may in their discretion, renew the pension of any person for good cause shown, or in behalf of persons dependent on him, for support as herein provided.

SEC. 11. Any employee who sustains injury in the course of his employment and institutes suit against the city therefor, shall thereby forfeit all of his rights to a pension under this act.

SEC. 12. No employee entitled to a pension under this act shall be discharged from the service of the city by the head of a department without the approval of the trustees of this fund.

SEC. 13. That all laws and parts of laws in conflict with the provisions of this act be, and the same are hereby, repealed.

SEC. 14. This act shall take effect upon its passage and approval by the governor or upon its becoming a law without such approval.

Approved May 24, 1919.

STATEMENT OF MR. C. B. McELROY, SUPT. OF DELIVERY, MACON, GA.

Mr. McELROY. Mr. Chairman, I had not intended to appear before the commission at all. I came to select a delegate to appear for the five States. We did that and I was not under the impression that I was to appear before the committee at all. I do not know anything that I could say that would add anything to what has already been said.

Senator MOSES. The next speaker is Mr. W. B. Bradford.

STATEMENT OF MR. W. B. BRADFORD, ASSISTANT POSTMASTER, CHARLOTTE, N. C.

Mr. BRADFORD. I will take only a few minutes of the time allotted to me.

I would like to call attention to the fact that an increase in salary is positively necessary to get the class of men the post office must have in its service. We have had positions revert to the department because of inability to fill them from the register, not having a register.

During the Christmas just passed, with the substitute's salary raised to 60 cents an hour, we were able to get students from Davidson College. We were not able to get them at the old rate, and without question we had the best temporary help this year for handling

the mail during the Christmas rush that we have ever had, which shows very conclusively that by paying a better salary you can get different men. Before, at 40 cents an hour, we got people of entirely different character, men not going to school, and this year we got college boys and, naturally, the college boy is trained better, and it was an entirely different proposition to what it was under the previous arrangement.

Senator MOSES. Your conclusion is, then, that the increases in salary already made have produced results? .

Mr. BRADFORD. Yes, sir.

Senator MOSES. And with the natural deduction that further increases would produce further good results.

Mr. BRADFORD. Naturally. The supervisories have not been increased in proportion to the increase in the amount of work. The work in my office, the business, amounts to four hundred thousand thousand, and with the war-saving stamps, five hundred thousand—nearly a million dollars handled in my office, and for that year my salary was nineteen hundred dollars. I do not think the commercial world would expect to get help—a supervisory employee—to assume a position of that character at that remuneration.

Mr. STEENERSON. Of course, you understand that the idea of Congress was that they must increase the small men in proportion. A man getting eight hundred or a thousand or twelve hundred must be increased very much more in order to enable him to live than would the higher salaried man. That was the theory—that the increase should be greater, the smaller the salary.

Mr. BRADFORD. Naturally a man getting eighteen hundred dollars is farther away from a living than a man getting two thousand, but the chances are that a supervisory employee, in a position that requires so much more——

Mr. STEENERSON. Based upon the value of his services, I think the claim is well founded, but this was an emergency that came on suddenly, and it was thought necessary to increase the low man more in proportion, because a man getting \$3,000 a year, for instance, was more apt to be enabled to live on that salary.

Senator MOSES. Thank you very much, Mr. Bradford.

The next on the list is Mr. Cumming Harriss.

STATEMENT OF MR. CUMMING HARRISS, ASSISTANT POSTMASTER, AUGUSTA, GA.

Mr. HARRISS. Gentlemen, we supervisory officials at the Augusta office feel that the salaries now paid to supervisory officials for the class of office of our size is not equitably proportioned, in that some of the higher-priced clerks are paid as much as the foremen, due to the fact that they get overtime, and due to the fact that the foremen get paid for Sundays and holidays, they draw as much and, in some instances, more than the superintendents and assistant postmaster. This does not apply only to the Augusta office. I am informed by a representative from Macon and from Montgomery that it applies at those offices, and I assume it applies equally as well to any office of the size of Augusta.

Then we feel that for us to carry on the service and give efficient service that we have got to have men that we can depend on, and that the clerks and carriers should receive substantial raises in salary so that once for all they will stop their everlasting talk about debts and put that time in the service. You would be surprised at the marked improvement in the substitute clerks since they received that 60 cent basis, and I think the same thing would prevail with the clerks and carriers were they paid accordingly.

We are seriously handicapped in Augusta in obtaining new men, either good or poor material. The Civil Service Commission has not furnished us an eligible list for the past two years of any size. The consequence is that we have to go out almost and trap young men and bring them into the service, and when we get them there and give them a scheme or a guide book to study, they say, "Good-bye," and they are gone, saying that they can earn as much or more in commercial fields without as much effort.

I think the suggestion I would make would be to start at the bottom; take the laborers and clerks, the substitutes and the carriers and then the supervisory officials and pay them on a basis that will be attractive not only to the ones in there, but that will bring new material in.

Another thing peculiar to our office is the fact that about 65 per cent of our clerks and carriers are over 40 years of age. There are 10 of them in there that have been in the service over 30 years, and some kind of retirement plan ought to be adopted to take care of these old employees, both for their sake and for the sake of the Post Office Department, so that we could get new blood into the system.

Mr. Harriss submitted the following brief:

BRIEF SUBMITTED BY MR. CUMMING HARRISS.

In behalf of the supervisory employees of the Augusta, Ga., post office, I am presenting these briefs to show cause why a substantial increase in salary should be made to these employees. I am dividing this argument into two main points: The high cost of the actual necessities of life, and the fact that the salaries paid in the post office will not at all compare with the salaries as paid by private businesses to those employees who have positions similar to the positions of post office supervisory.

THE HIGH COST OF LIVING.

Statistics show that the prices of the actual necessities of life have advanced 78.72 per cent, an advance all out of proportion to the minor increase made in our salaries. While these statistics show that the cost of living has advanced 78.72 per cent, it is manifest that the statistics were not compiled from the prices charged in Augusta, Ga., for the reason that the prices charged in this city have advanced on almost everything at least 100 per cent. To substantiate this with concrete evidence, the following is the prices charged on a few of the actual necessities of life in 1919 as compared to the prices in 1914:

	1914	1919
Grits.....per peck..	\$0. 25	\$0. 75
Butter.....per pound..	.35	.80
Flour.....per sack..	.75	1. 75
Bread.....per loaf..	.05	.10
Meal.....per peck..	.20	.70
Rice.....per pound..	.06	.12
Bacon (breakfast).....do....	.35	.70
Shoes (Crossetts).....pair..	4. 00	11. 00
Shoes (Nettleton).....do....	6. 00	15. 00
Suit of clothes (men).....	25. 00	\$50-\$100

We bear the same analogy to the Postal Service, as the manager or chief clerks do to their respective business. Take the manager away, or have one of poor ability, and the business will go to pieces. This same rule will apply to the Postal Service, regarding the supervisory employees. We are the men that supply the electric energy to the service; we are the ones that have to know how to manage the men under our charge. to get the best and most efficient work from them, and at the same time be able to keep down the ever bickering and discord in the service: we are the ones that the post-office inspectors call on for information of the service, and criticize on any delinquency made by any of the men under our charge. Rarely do we receive a compliment—though we sometimes justly deserve it, and it would serve as an inspiration. The post-office inspectors are usually hypercritical in their work, and it is rarely that criticism is directed at the postmaster, but we supervisory employees have to bear the brunt of it.

The public does not make great use of the office of the postmaster for the purpose of obtaining information on the Postal Service, but call over the phone either at the post office or at his home, some supervisory employee to give the information desired.

It was the supervisory force that held up the Postal Service to the standard at those post offices that had military camps; it was the supervisory force that had to work 14 hours a day, with a lot of inexperienced young ladies, some of them had never seen the inside of a post office before, to keep the service up to the standard. Without the supervisory force the handling of the military business, which almost trebled over night, would have been an utter failure.

In conclusion, the supervisory employees are very poorly paid, for the amount of knowledge required of them; the arduous duties that they have to perform, and the painstaking and persevering way in which they perform these duties. It is my opinion, leaving out the personal part, that the Post Office Department would receive ample return on the investment in the increase in salary. If substantial increase is not given, the private business concerns will be employing the best of the talent in the supervisory force, and then, again, in any event, our places will have to be filled at some time, and if the salary is not attractive, there will not be the right material to pick from, as the salaries paid in the service now as a whole is very poor, and young men of ability will not be attracted to the Postal Service.

Salaries paid by some private concerns.—Merchants Bank, tellers and bookkeepers, \$200 per month and yearly bonus; last year it was \$500 to each employee. J. B. White & Co., managers of departments, from \$3,500 to \$4,000 per annum; some salesmen at \$160 per month; clerks in office, \$127 per month. Georgia Railroad, chief clerks, \$200 per month; cashiers, \$125 to \$150 per month; bookkeepers, \$150 to \$190 per month, with time and half for overtime net about \$150 to \$350 per month; conductors, \$150 to \$350 per month; laborers average about \$3 per day. Sibley Manufacturing Co., managers, over \$3,000 (exact amount could not be learned); superintendents, \$4,000 per annum; overseers, \$2,500 per annum; in addition to the salary, houses are furnished free of rent, including electric light, gas, and water, coal at cost to the company; this will net them more salary than above. John P. King Manufacturing Co., pay practically the same as the above, and also furnishes houses, etc., free. The Bureau of Internal Revenue pays \$2,100 to deputy collectors and more than this to the other employees.

City of Augusta:

Present pay in the Augusta (Ga.) post office.—Assistant postmaster,¹ \$2,100; superintendent of mails,¹ \$1,900; foreman, \$1,800; cashier, \$1,800; special clerks, \$1,600.

Salaries that should be paid.—Assistant postmaster, \$3,400; superintendent of mails, \$2,700; foreman, \$2,400; cashier, \$2,500; special clerks, \$2,000.

Senator MOSES. The rest of the commission having abandoned me, I think the best thing we can do is to settle this whole thing among ourselves. The next speaker is Mr. F. H. Ellis.

¹ The assistant postmaster and superintendent of mails received a \$200 increase on July 1, 1919, due to the fact that the salary of the postmaster was increased from business received from a military camp. Next July the salary of the postmaster will be reduced to his former salary. The salary of assistant postmaster and superintendent of mails will naturally also be reduced. This reduction will place them on an equality with the foreman. There is no comparison between the duties of the assistant postmaster and superintendent of mails and the duties of foreman. The basic salary of the assistant postmaster and superintendent of mails is \$1,700 and \$1,500, respectively.

**STATEMENT OF MR. F. H. ELLIS, SUPERINTENDENT OF MAILS,
ATLANTA, GA.**

Mr. ELLIS. Mr. Chairman, I have filed a brief which covers in detail the ideas of the supervisory force of the Atlanta post office as to what they would wish from the commission. There are a few things I would like to mention.

One of them is the Post Office Department's present system of determining what compensation supervisors will get according to their own notion. The superintendent of mails in Atlanta in 1915 received \$3,000. The basic salary now is \$2,700. I believe that there should be a receipt plan of classification to do away with this inequality. The receipts of the Atlanta post office are \$2,600,000. In offices with receipts that are less, I understand, superintendents of mails are getting three thousand and twenty-eight hundred. The assistant superintendents of mails in some of these offices, I understand, are getting twenty-six and twenty-seven hundred and twenty-four hundred dollars. The assistant superintendent of mails in our office is now allowed but \$2,000 basic salary. They give him a \$200 bonus, which makes \$2,200.

Senator MOSES. In other words, you are opposed to any discretionary power on the part of the department.

Mr. ELLIS. I do not believe there should be discretionary power for the same size offices, for the reason that the supervisors in an office of the same, either in Georgia or Missouri, would have identically the same duties. I do not think there would be any difference worth mentioning in either place, and I believe the salaries in both Missouri and Georgia should be the same as to the different grade supervisors. Of course, there should be a distinction in salary between the rank and file of supervisors.

The other matter I wish to bring to your attention is that of special clerks. That is also in our brief. In the Atlanta office I believe there should be two grades of special clerk, one grade of special clerk for special, meritorious service and ability, after the clerk has reached the maximum clerk grade. The second would be for men who have been promoted for exceptional ability and who also possess executive ability. That would be something by which the department could hold these men and recognize ability in the absence of a supervisory grade being vacant. I believe it would work out both ways—to the advantage of the men and to the advantage of the department.

The last thing I will speak about is the question of night work, which was also discussed by the clerks. It is of vital importance to the supervisors as stated by the gentleman who preceded me. A supervisor can not do very much unless he can get a good alignment of assistants under him and sufficient help to do it. One of the greatest drawbacks of the Postal Service (I think any supervisor will tell you this, I haven't talked with any who has not agreed with me in it) is the night work which all new men are compelled to do when they come into the service. We bring them in and tell them they will get a salary of 60 cents an hour as a substitute, and we tell them they will have to work night work, but they do not realize fully what that means. The majority of runs are from 2 until 10, 3 until 11, or 4 until 12. If the man is a single man, this does away entirely with

his recreation. Unless we can offer them some inducement to make night work attractive, I believe that the night-work proposition is going to be a more serious handicap in the future than it has been in the past.

Senator MOSES. Your suggestion would be more pay?

Mr. ELLIS. My suggestion would be to give them a 45-minute hour, which would be equivalent to that.

Mr. Ellis submitted the following brief:

BRIEF SUBMITTED BY MR. FRANK H. ELLIS.

The reason for submitting this brief is to call to the attention of the commission the low salaries paid supervisors in the Postal Service in comparison with that paid for similar positions in the commercial world.

The receipts for this office during the last year were \$2,611,541.85 (Dec. 1, 1918, to Nov. 30, 1919).

The number of employees were: Clerks, 208; substitute and auxiliary clerks, 117; carriers, 116; substitute carriers, 35; rural carriers, 5; laborers, 10; special delivery messengers, 60; making a total of 551 employees.

In addition to business conducted by this office we are also designated a State depository and over \$22,000,000 were cleared through the cashier's office in this post office last year.

This office respectfully submits to the commission the difference in cost of living in January, 1915, and January, 1920, presenting at end of this brief a table showing difference in prices in 1915 and to-day.

The basic salaries for supervisors in this office are as follows:

Assistant postmaster, \$3,000. In 1915 the salary was the same as to-day, \$3,000.

Of course it is realized that the assistant postmaster must be a man capable of performing duties of the postmaster in his absence and is directly over cashier and superintendent of money-order department. He is responsible for all finances of the office. He is required to carry \$34,000 bond, at an annual expense of \$34.

Superintendent of mails, \$2,700. Salary in 1915, \$3,000. The superintendent of mails is in charge of the carriers and a majority of the clerical force. In fact, 90 per cent of employees in the office are under the superintendent of mails. He is charged with maintenance of service and character of force in general and is responsible for manner in which practically all expenditures of department are made.

Assistant superintendent of mails, \$2,000. Salary in 1915, \$1,800. Assistant superintendent of mails is, as the name implies, assistant to the superintendent of mails, and should be able to take over his duties.

Superintendent of motor-vehicle service—a new branch that has been established since 1915—has duties similar to assistant superintendent of mails in charge of vehicle service of office. His position is a very responsible one, as this branch of the service is one in which there may be large expenditures or large savings in accordance with character of the man in charge.

Superintendent of money-order division, \$2,200. Salary in 1915, \$2,200. The superintendent of money-order division is a man who must be responsible for financial condition of office as well as being an executive to maintain discipline in organization of his division. This division cleared over \$6,000,000 during last year. The superintendent of money-order division is required to carry a \$7,000 bond at an annual expense of \$7.

Foremen, \$1,600. Salary in 1915, \$1,500. The foremen's duties are very responsible, inasmuch as they are in direct contact with different forces, and shaping of men in Postal Service is entirely in their hands. They must be men capable of taking care of both department's interest as well as men themselves. They should also be men capable of filling higher positions when they become vacant.

Cashier, \$2,400. Salary in 1915, \$2,400. The cashier's position in post office is one of large responsibility, as he is charged with handling of large amounts of money. Through the cashier's office of this office last year were placed \$22,000,000. He is also charged with conduct and discipline of office force under him, which makes the position require a man of executive ability in addition to ability to assume financial responsibility. He is required to carry \$34,000 bond at an annual expense of \$34.

Assistant cashier, \$1,600. Salary in 1915, \$1,500. The assistant cashier is, as name implies, jointly responsible with cashier for conduct and responsibility of that division. He must be a man sufficiently trained to assume responsibility of cashier.

Bookkeeper, \$1,800. Salary in 1915, \$1,800. The bookkeeper has, as name implies, a position requiring an expert bookkeeper who must keep all departmental rulings and regulations current, in addition to expert knowledge of bookkeeping. He also renders all accounts to auditor.

Superintendent of stations, \$1,600. Salary in 1915, \$1,500. The superintendent of stations is required to perform the functions of postmaster in an independent office. He must have a knowledge of all branches of the service and be able to deal with the public and take care of finances.

Examiner of stations, \$1,700. Salary in 1915, \$1,500. This position is one that requires a man familiar with different branches of service. He must have executive ability sufficient to issue instructions to all stations as to their conduct, etc. This position is one of much importance and requires an exceedingly apt person to perform these duties intelligently.

Another feature to be given consideration is title of special clerks. This title, in the opinion of this office, is very necessary, and it is believed that at least two grades should be maintained, one being \$100 higher than highest clerk grade, the other being \$200 higher than highest clerk grade. Special clerk is the only means of recognition that can be given to a man of exceptional ability when no supervisory places are open. In practically every instance supervisors have risen from grade of special clerks. It is an inducement for clerks to go on and do better after he has obtained highest clerk grade.

Attention of the commission is further called to title of stenographer in post office. Everyone who uses a typewriter or takes dictation is not titled as a stenographer. In this office at present time there are only three stenographers. One is private secretary to postmaster, one other is secretary to assistant postmaster, the other is secretary to superintendent of mails. This position requires a knowledge and ability of a thoroughly trained secretary and relieves the officials named of the majority of detail and unnecessary work. We believe that stenographers should be classed as supervisory positions and paid proper salaries, or that they should be titled chief clerks and rank with foremen.

In order to give the commission an idea of some of the salaries being paid in the commercial world in this city, the following are furnished:

One of the telegraph companies was consulted and the following information furnished: \$3,600 is paid to their superintendents, \$3,120 to chief operators, \$4,200 to their auditors, \$2,100 to chief clerks, and \$3,300 to superintendents of traffic. Notwithstanding that responsibility of our supervisory positions would average up with any of the above named positions, there is only one place that is not paid higher than any of our post-office salaries.

A large dry goods house was asked to give salaries, with the following results: The manager is a large stockholder in the concern and therefore would not give his salary. However, he advises that each one of his department heads receives \$4,200 salary, with about \$2,000 a year bonus; head salesmen in different departments receive \$2,400 and bonus; shipping clerk's salary, \$2,700 and bonus; assistant auditor, \$4,200 and bonus. Auditor is a member of the firm; salary not given.

Two large building contractors and engineers give information to the effect that their superintendent of construction receives \$3,600 per year; their cashier, who handles only into the thousands, receives \$2,400; draftsman, \$2,400; chief engineers, \$5,000; auditors, \$2,700.

One of the telephone companies gives information that their commercial manager receives \$350 per month; assistant manager, \$250 per month; cashier, handling less than \$3,000,000, \$200 per month; disbursing clerks in cashier's office, \$175 per month; traffic chiefs, \$300 per month; assistant traffic chiefs, \$325 per month.

The Atlantic Steel Co. advises that they have raised all of their supervisory positions 100 per cent within the last five years.

A large electric and power company of this city gives their department manager \$4,500; assistant manager, \$3,500; cashier, \$4,000; line department foreman, \$2,400.

While all of the above firms are willing to give information furnished as stated above, they do not care that their figures go in print. Therefore they request that their names be furnished the commission on request.

The following is a comparison of figures as to cost of living and house rent as increased between January, 1915, and December, 1919. The figures were obtained in the following manner:

The Atlanta Journal for the month of January, 1915, is on file in Carnegie Library, this city. The advertisements were taken from this paper and compared with present day advertisements, with following results:

	Prices, 1915.	Prices, 1919.
Prunes.....	pound.. \$0. 10	\$0. 20
Oatmeal.....	package.. .08	. 15
Eagle milk.....	can.. .10	. 25
Irish potatoes.....	peck.. .23	. 68
Cotton bloom.....	10 pounds.. .79	2. 34
Lard.....	do.... 1. 14	3. 10
Oysters.....	quart.. .30	. 75
Maxwell House coffee.....	pound.. .28	. 60
Sugar.....	25 pounds.. 1. 31	5. 25
Creamery butter.....	pound.. .35	. 73
Round steak.....	do.... .15	. 35
Loin steak.....	do.... .17½	. 40
Apples.....	peck.. .29	. 90
Eggs.....	dozen.. .25	. 85
Flour.....	24 pounds.. .69	1. 65
Sweet potatoes.....	peck.. .19	. 40
Rice.....	pound.. .07	. 17
Cheese.....	do.... .19	. 40
Pork roast.....	do.... .15	. 35
Coal.....	ton.. 4. 50	9. 75

Increase of 159 per cent.

Renting:

	Prices, 1915.	Prices, 1919.
7-room house (W. E.).....	\$27. 50	\$37. 50
5-room house (Washington Street).....	22. 50	32. 50
8-room flat.....	20. 00	40. 00
12-room (421 Capitol Avenue).....	30. 00	40. 00
8 rooms (28 East North Avenue).....	55. 00	80. 00
7 rooms (401 East Fair Street).....	30. 00	40. 00
10 rooms (217 Juniper Street).....	60. 00	110. 00
8 rooms (furnished), (between Peachtrees).....	50. 00	110. 00

Increase of 66 per cent:

Shoes and clothing have increased over 100 per cent.

As an example I wish to quote herewith the cost of actual necessities for living for a family of four in Atlanta, and these figures can be verified, not only by any one in the Postal Service but by reference to people out of the service:

Rent, \$35 (this is based on living in the suburbs, and having to pay car fare, as rent in the city is higher); light, \$3 (this is based on averaging 10 different monthly light bills); gas and fuel, \$10; ice, \$3; laundry, \$10 (this means that a great deal of the laundry work is done by the wife); food, \$80; car fare, \$6; insurance (fire, life, accident, etc.), \$6 (this is inadequate); total, \$153 (this allows for no sickness or education of children).

In conclusion, we will respectfully ask that the commission grant us in salary from \$5,000 for assistant postmaster down to not less than \$2,400 for foremen and secretaries (stenographers).

Briefs were submitted by J. W. Scott, Atlanta, Ga., and C. T. Reisner, Waco, Tex., as follows:

BRIEF SUBMITTED BY MR. J. W. SCOTT ET AL., OF ATLANTA, GA.

The special clerks in the Atlanta (Ga.) post office beg leave to submit to you a short statement of the compensation paid them and to set forth their reasons for making a plea for an increase.

As you know, gentlemen, the title of special clerk is only conferred upon a post-office employee after many years of hard work and study. During that time he is obliged to have mastered the essential duties, knowledge of schemes, etc., incumbent upon the regular employee in the Postal Service, and not only that, but to have shown in the general performance of work and in conduct an aptitude for some special line of achievement, as well as executive ability and qualifications, looking forward to a time when he may be called upon to fill a supervisory position.

This employee is a "specialist" in the full and true meaning of the word. In every field of endeavor, including industrial, commercial, and professional life, the specialist is recognized, and it was this reason on the part of Congress which caused that body

to establish the grade of special clerks in the Postal Service and to award every first-class post office a certain number of special clerkships in order to have certain clerks who would be educated, trained, and equipped for certain special positions which, though not in a grade of supervisors, are certainly in a higher grade than ordinary clerks and which are, on account of their responsibilities and special duties, worthy of a higher remuneration. Many of these special clerks, in addition to the responsibilities as to the conduct of their work, have very heavy financial responsibilities.

This, gentlemen, is the only goal to which a clerk with any ambition, with any special education or ability, has to strive, as there are comparatively few supervisory positions in the Postal Service. This is the reward he expects to attain in payment for his years of faithfulness, good behavior, and special effort.

For the above reasons, and because of the inadequacy of the salary we now receive to combat the present conditions and to provide in any befitting manner for those who are dependent upon us, and last, but not least, because of our inability, on account of our meager salaries, to provide the proper amusements and recreations that go to make a healthy body and satisfied mind, which are the prerequisites of accomplishment of the best and most successful results, we ask that the salary of a special clerk in the Postal Service be made in grades of \$100 and \$200 per year higher than the maximum salary of a regular clerk, feeling that no less difference would be commensurate with our duties and responsibilities which are in addition to those of a regular clerk.

J. W. SCOTT,
A. E. RAGSDALE,
S. E. KNOX,
Committee.

BRIEF SUBMITTED BY C. T. REISNER, OF WACO, TEX.

The supervisory clerks of Waco (Tex.) post office wish to file the following brief for your earnest attention and consideration:

The proper conduct of the Postal Service is dependent upon the intelligence displayed by the supervisory official from the assistant postmaster down to the humblest employee. It makes no difference where the exigency arises, immediately the employee looks to the man who is in charge for instructions.

As regards the responsibilities of these men, financial and otherwise, if they were employed in the commercial and industrial field, having like positions, would command salaries 100 per cent greater than now received.

You are urgently requested to give consideration to the present low scale of wages paid supervisory clerks with a view to making these positions compare more favorably with like positions in the commercial and industrial world.

FOURTH-CLASS POSTMASTERS.

Senator MOSES. Congressman Bell having returned to the chair he has thwarted our scheme to end this whole thing among ourselves, so we will have to go on with the hearing. Mrs. Lottie C. Reid, representing the fourth-class postmasters, will be next.

STATEMENT OF MRS. LOTTIE C. REID, POSTMASTER AT ODENVILLE, ALA.

Mrs. REID. Gentlemen, I just want to convince the commission that the fourth-class postmasters have to work. A great many people seem to have an idea that there is not very much to do in a fourth-class post office and that there is not a great deal of responsibility, but I want to assure you that there is. Last year I handled in my office about \$18,000 in money-order business and about \$1,300 in the postal business—something like that.

A fourth-class postmaster has to be conversant with the law and has every department to deal with that a first-class office has to deal with, with perhaps the exception of the savings account.

I want to say something with reference to the fact that the fourth-class postmaster is required to give to the richest Government on

earth rent, fuel, and light. We are required to provide that as well as equipment, and when we provide equipment we naturally take some pride in our offices and want to provide equipment that will be a credit to the Government and ourselves as well, and it requires some little expenditure to put that equipment in. When we rent out boxes we are required to enter the rental as a part of our postal accounts paid to the Government when, as a matter of fact, it is provided out of our own pocket. My own salary for three months of the past year—and this is with reference to the time prior to July 1—for three months amounted to \$68 and a fraction a month, and you can readily understand that it is not possible to live and support a family on that small amount. Last year it was absolutely necessary for me to stop my daughter from taking music lessons, and I was unable to meet a good many obligations that I feel were very necessary.

I want to say that the postmasters of Alabama, representing the National League of Postmasters, heartily indorse the salary plan as filed with the commission through that league.

STATEMENT OF MR. BEVERLY H. TUCKER, POSTMASTER AT CALHOUN FALLS, S. C.

Mr. TUCKER. Gentlemen, it seems to me that a lot of people have got a wrong impression of the duties of a fourth-class postmaster. I wish to speak just a few minutes about the duties of a fourth-class postmaster.

One day about two months ago I thought I would take a note of just what I did in the office. Of course, I could not count the questions I had to answer about the general delivery. The first thing that came up I had to walk 2 miles to deliver two special deliveries, and I handled 1,822 pieces of mail, 7 registered letters sent out, 4 C. O. D., issued 32 money orders, and 6 parcel post packages, and there were 32 lock sacks and 28 draw sacks that I handled daily.

In regard to the equipment of the office, we rent our own building or own it, furnish our own boxes, light, heat, chairs, and tables, and the box rent is turned over to the Government to be applied on our compensation and, of course, the maximum compensation is eighty-three and a third dollars a month, and we work about 12 to 14 hours. The way I figure it out, I get about 26 cents an hour. What you call the average fourth-class office gets about 15 to 16 cents an hour and a small office, of course, gets about 8 or 10 cents an hour. The boys and girls 16 years old in the cotton mills get 28½ cents an hour.

That is one of the conditions that the fourth-class postmasters work under. Some people have the idea that they have plenty of time to run other businesses in connection with the office, but I believe that you will agree that after you have handled 32 sacks of mail, and have fixed up mail for the direct pouches for nine different post offices over a route of 66 miles a day, with the other duties of the office, you won't have time to do much work in the way of other business in connection with the post office.

Mr. Tucker's brief follows:

BRIEF SUBMITTED BY MR. BEVERLY H. TUCKER.

Since we have a representative here from South Carolina to speak for the third-class and the central accounting postmasters, I shall try and represent the fourth-class postmasters.

Having been connected with a fourth-class post office 11 years (6 years assistant postmaster and 5 years postmaster) has put me in possession of no little amount of experience of the work and duty of the fourth-class postmaster. But even with this experience I am certainly rushed from 12 to 14 hours every day during the week in order to attend to the duties of the office.

About two months ago I decided to take note of some of the duties performed for one day. Of course I did not have time to count the calls at the general-delivery window; but I remember walking about 2 miles delivering two special-delivery letters, 1,822 pieces of mail handled in receipt and dispatch of mail, excluding several heavy parcel post packages, 6 letters registered, 4 C. O. D. parcels delivered, 6 insured parcels dispatched, 23 money orders issued, 32 lock pouches, and 28 draw sacks handled in receipt and dispatch of the mail. This was not an extra busy day either. As we are required to remit all money order money promptly, I had to walk another mile to get a \$200 check, have the trouble of making record of the money orders, and get a daily average of 37 cents for the money order end of the office work.

I might mention some of the office equipment we are required to furnish, which includes a building, light and heat, tables, chairs, safe, if you are able to buy it, cabinet and lock boxes, and keep the boxes in good repair, and then at the end of the quarter turn the box rent over to the Government to be applied on our compensation. And then we get from \$7 to \$83.33½ per month. The maximum compensation allowed the fourth-class postmaster will average 26½ cents per hour for his services. Then there comes what we might call the average fourth-class post office, where the postmaster receives from 12 to 15 cents per hour, and in the smaller post offices the postmaster receives from 6 to 8 cents per hour. There are plenty little boys and girls working in the spinning rooms of our southern cotton mills making 28½ cents per hour. And yet the postmaster is a responsible person and is expected to be one of the leading citizens of the community.

Gentlemen, if there was just two or three fourth-class postmasters in each State working for this unreasonable low compensation, there might be an excuse for overlooking the matter. But I should like to impress upon you the fact that there are thousands to-day spending from 12 to 14 hours in an office and receiving less than a child's pay. Required to stay by the job 7 days a week, 365 days a year, with vacation never.

This trade drawing and storekeeping business in connection with the postoffice has no foundation now. After having enumerated some of the duties of the fourth-class postmaster, I think you will readily admit that there is no time to operate any other business in connection with the post office. The office in a store "stuff" some people harp on is out of date and even out of the question. They might have gone together 2 years ago, but they will not mix now. By time we are through with freight and express parcel post mail, revenue, war savings, and thrift stamp business, cashing Liberty bond coupons, give a little information to Army and Navy recruits, and the various other duties connected with the office, and then talk about keeping a store? Impossible. You can't serve these two masters.

Gentlemen, we are human, all we want is common justice, and we appreciate this opportunity to let our needs be thoroughly known, and may I urge that you remember this: Long hours we work, less than a child's pay, expense of equipping an office, vacation never.

STATEMENT OF MR. J. P. STOCKTON, POSTMASTER, ELLENBORO, N. C.

Mr. STOCKTON. Gentlemen, it is not necessary for me to state what class postmaster I am. All that it is necessary for me to do is to state my salary. I have been in the service something like five years, and for the year July 1, 1914 to June 30, 1915, my compensation was \$640.87, my expenses \$80—that is rent, light and fuel. I have two rural carriers; one receives \$1,772 a year and the other

\$1,796. They go out and serve their route and are out from three and four to seven hours a day and when they return, they turn their money, money orders and everything else over to the postmaster who is responsible for it, and they can go home, while, at the same time, I get to the post office at 7 o'clock and serve from 12 to 14 hours per day. I believe that is all I have to say with regard to the matter. I filed a brief with the commission this morning.

The brief referred to follows:

Through our North Carolina representative, Mr. John P. Stockton, we submit the following brief to your honorable body in behalf of the fourth-class postmasters of North Carolina.

The fourth-class post offices constitute what is doubtless the most important branch of the United States Postal Service in many respects, because these offices serve the great host of country people, our rural population constituting a large majority of the population of the country.

The postmaster at a fourth-class post office receives his appointment from the Postmaster General as a result of a civil service examination embracing the same features of the examinations required for the appointment of rural carriers, clerks in first and second-class post offices and city carriers. In addition to the subjects of these other branches of the service, the fourth-class postmaster has to stand examination on accounts (bookkeeping).

The present method of determining the compensation of postmasters at fourth-class post offices was authorized by act of Congress of March 3, 1883, and it allows the postmaster a certain percentage of the cancellation of stamps on mail matter actually dispatched from his office. Under the said act, his compensation is limited to \$1,000 per annum. Under this act, the postmaster must rent a suitable building in which to keep the post office, paying the rent himself. He must buy a post-office cabinet of sufficient capacity to accommodate the mail received and dispatched through his office by his patrons. He must buy the other office equipment (safe, desk, chairs, stove, etc.) necessary for the proper conduct of his office. Also, he must furnish lights and fuel for himself and also for his subordinates (rural carriers) when they are on duty in the post office. He must procure his own clerks and pay for their services out of his own pocket. All these expenses must be borne by the postmaster himself under the act of March 3, 1883.

At the time when this act was passed (nearly 37 years ago), it was doubtless satisfactory, as every community then had its own post office, which was kept in one corner of the community store, and there was only one mail each day—sometimes only one or two mails each week. Then the duties of the postmaster were very light indeed, and the commission basis was the best method of compensating him. But some 20 years ago rural delivery became an established feature of the Postal Service, since which time practically all of the old-time country store post offices have been displaced by rural free delivery routes.

Since the inauguration of rural delivery and the advent of the parcel-post system, with its insurance and C. O. D. features, the work of the postmaster in a fourth-class post office has increased 500 per cent, and there has been practically no increase in the compensation of the postmasters themselves, as at least nine-tenths of the parcel post mail handled, as well as the other mail, is mail received for delivery, for handling which the postmaster receives no compensation whatever, as the stamps which carried this mail, were cancelled at the office of mailing, which is usually a large city post office where the clerks are paid living wages for their work. Fully nine-tenths of all mail handled at fourth-class post offices is that which is received for delivery. The wage of the postmaster being determined by certain percentages of the value of the stamps on mail matter actually mailed at his office, makes his position at best a precarious one, as his compensation is an insignificant uncertainty and is limited to \$1,000 per annum.

In 1883 there was no money order system. The proper conduct of the money order business at a fourth-class post office requires a finished scholar, as he must keep an intricate system of books accurately posted daily. At an office where the gross receipts are as much as \$1,000 per annum the postmaster writes about 2,000 money orders each year. In the first place, he makes out nine-tenths of the applications from which the orders are written. Then he writes the order itself; at the close of business each day he again writes the order in his book of money orders issued; when the order is presented for payment, he writes all the particulars in his book of paid orders; every day he must keep up his cash book (double-entry bookkeeping here); 2,000 money orders represent from \$10,000 to \$15,000 in money order funds. The

postmaster is held strictly accountable for these funds, and must make out usually from three to five remittance letters each week, in order to keep the funds remitted and thus protect the department against burglars. He must keep a fire-proof safe (reasonably burglar-proof, also) to keep the Government funds in which he can not keep deposited. Every month he must make out a difficult money order account, usually having from six to ten or twelve columns to add correctly. These columns are 53 numbers in length and must be accurately added. The postmaster is also held responsible for the books of blank money order forms, a supply of which must be always kept on hand. For writing these 2,000 money orders and doing all the work accruing in connection therewith, the fourth-class postmaster gets just \$60 for the entire year's work, or \$5 per month. Making out the monthly report alone is worth twice this monthly sum of \$5.

Since 1883, as stated above, the rural free delivery system has been established. At most country fourth-class post offices there are from one to four rural carriers. Under the law these men are subordinate to the postmasters and must obey their orders. The rural carriers are now paid all the way from \$1,700 to \$1,988 per annum. They usually make the circuit of the route in from 4 to 7 hours, after which their responsibility ceases. The remainder of the 24 hours each day they may devote to other business or to their families and the pursuit of pleasure. The postmaster is held strictly responsible for the work of these rural carriers. After they return from serving their routes, the postmaster is required to serve their patrons until they again start with the mail the next day. Oftentimes the postmaster delivers two-thirds of the mail of a rural carrier—sometimes practically all of it—for which he gets nothing, the rural carrier getting the pay, the postmaster doing the work.

As stated above, the rural carrier gets all the way from \$1,700 to \$1,988 a year for from 4 to 7 hours' work. He gets an annual vacation of 15 days each year, with full pay. Also, on holidays he goes in his automobile (practically all rural carriers have their own private automobiles) to some place with his family on pleasure, and the postmaster has to deliver his mail to the route patrons.

Often the fourth-class postmaster, having one or more rural carriers under his supervision, does not receive more than \$500 for his entire year's work, the carriers (his subordinates, for whom he is held responsible) getting more than three times as much as he gets. He has all the responsibility, they have practically none. He has more brain work in one week than the average rural carrier has in 12 months. The very fact that the postmaster in a fourth-class post office is obliged to work with men who are his subordinates at a salary less (many times less) than the salary of those subordinates, makes his position intolerable. It is a condition unparalleled in the world. In every other establishment on earth the head of the business receives a greater wage than those working under him. And the fact that these postmasters (who are the cream of the land when it comes to intellectual, social, and moral worth) are compelled to work daily with men whose wages are so much greater than theirs is without doubt the most grievous wrong in connection with our whole governmental system to-day. Public sympathy is all with the poor postmasters. Public sentiment is going to demand, sooner or later, that the wage of the postmaster must be, shall be, as great as that of his subordinates. Every principal of justice in heaven and on earth demands it.

Under the workings of the present antiquated and obsolete method of determining the compensation of fourth-class postmasters it is an easy matter for one person or a great number of persons to reduce considerably the little wage the postmaster should receive by refusing to mail their letters and parcels with him, mailing them instead on the train or at another post office. This is frequently done. Because of some real or imaginary grievance certain parties will mail their letters at other offices or on trains, thus cutting down the salary of the postmaster, who is required to deliver their incoming mail for nothing.

It would be altogether as just, altogether as reasonable and fair both to the Government and to the employees, if rural carriers or city carriers were to be paid on a commission basis, as it is to pay their superior officers in this way. It would undoubtedly be just as fair to require that rural mail routes shall be self-supporting as to require that fourth-class post offices shall support themselves. There are rural carriers now serving standard daily rural routes who do not get business for the Government amounting to more than \$75 per annum. If the Government can afford to pay these men \$1,700 to \$1,988 per annum for getting business amounting to no more than \$75 annually, it can afford to pay every fourth-class postmaster in the United States a salary of \$1,800 a year, as the postmasters get business for the Government amounting to thousands of dollars. At a \$1,000 post office the postmaster usually handles all the way from 20,000 to 100,000 pieces of mail each month. Rural carriers handle an average of 5,000 pieces each month.

The fact that a fourth-class postmaster has to work every day with men who get from \$1,700 to \$1,988 per annum, while the postmaster works on a commission basis, like a fruit-tree agent, for the same Government, in the same department, and gets an insignificant uncertainty—probably \$30 one month, perhaps \$40 the next—makes his position cruelly miserable, absurdly unjust. His subordinates, who are so well paid, are tempted to look upon him as an underling. Usually they do regard him as an underling, far beneath them, if they are of that kind of a disposition, but the postmaster bears it all with patience—he has learned to exercise patience. Often the postmaster himself feels like an underling while working with such subordinates. The subordinates themselves are prone to be insubordinate. There can never be that satisfied feeling, that spirit of harmony, in fourth-class post offices that should obtain, until the postmaster's salary is raised to the equal of the salary received by his subordinates (rural carriers), and until he is allowed the same annual vacation they receive, and all other privileges and benefits which his subordinates may enjoy.

The American people want efficient service. They are willing to pay for efficient service. They can not have it—that is, the majority of our people can not have efficient service, this majority living in rural sections—unless harmony and satisfaction shall obtain in fourth-class post offices, which can not be until the postmasters' wages equal the wages of the men working in these offices under the postmasters. The rural carrier's conditions of living, expenses, and work compares with the fourth-class postmaster. The carrier is no better by nature than his superior officer, he is no more loyal or efficient in his work for the Government. Both classes must stand the same grade of civil-service examination. Both live in the country together. The cost of living to both of them is the same. Their expenses are practically the same.

If the Congress can vote an appropriation of \$75,000,000 to pay the 45,000 rural carriers, and the people not grumble, it can vote an appropriation of \$75,000,000 to pay the 45,000 fourth-class postmasters, and the great American people will never grumble. In this new age our people demand efficiency. They are entitled to it. It is up to the joint commission to say whether they may have it in the great rural districts, as this commission must, by its recommendations, bring about harmony in fourth-class post offices if this efficiency may be secured.

Speaking for the 1,500 fourth-class postmasters in North Carolina, we ask that these worthy public servants, who never murmured when one after another the great burdens of war were heaped upon them without remuneration. We ask for these a salary of \$1,800 per annum at every fourth-class post office where the gross receipts shall be \$1,000 per annum. We ask, further, that every fourth-class postmaster shall be allowed 15 days' annual leave with full pay and 15 days' additional sick leave with full pay. We ask, further, that they shall be allowed \$10 monthly for every rural carrier attached to their offices, the postmaster to be paid \$10 each month for the supervision of these men and the responsibility for their work.

We ask, further, that the salaries of all postmasters shall be determined in accordance with the salary plan of the National League of Postmasters of the United States with \$1,800 for the office where the gross receipts are \$1,000 per annum as a basis for determining the salaries of those whose gross receipts are more or less than \$1,000 per annum. We ask, further, that every fourth-class central accounting postmaster shall be allowed \$5 monthly for each district office under his supervision. We ask, further, that fourth-class postmasters shall be retired after 20 years' satisfactory service, on a 50-50 basis. We ask, further, that fourth-class postmasters shall be given a working day of 8 hours within 10 hours, and that they shall receive pro-rata pay for all overtime duty.

We ask, further, that postmasters at fourth-class post offices shall be retired on a 50-50 basis after 20 years' satisfactory service, and that the entire time spent by them in the postal service shall be counted in determining whether they are entitled to the retirement privilege, whether this time shall have been continuous or not.

Our reasons for asking these things are outlined in the following statements:

1. During the past three years the cost of living has trebled in all sections of our country.

2. During this same three-year period the wages of every class of workers except third and fourth class postmasters have been increased from 50 to 200 per cent, including rural carriers attached to these post offices, who, under the law, are subordinate to the postmasters, and for whom the postmasters are responsible.

3. The postmasters are put to a great deal of expense to conduct these offices, this expense, in most if not all offices where the gross receipts amount to \$1,000 per annum, being equal to the expense of a rural carrier on a standard horse-drawn vehicle route. As stated above, the work in these offices, since the inauguration of rural delivery, and the money-order and parcel-post systems, has been increased 500 per cent, with practically no increase in the compensation of the postmasters. How can they

maintain their respectability among their subordinates? They can not make provision for the immediate needs of their families, to say nothing of the rainy day.

4. Because of the friction in these offices, the subordinate workers (rural carriers) getting at present many times the wages received by their superior officers.

5. Because unless there is some incentive there can not be put forth much effort to perform efficient service.

6. We ask these things because the sentiment of the citizenship of the country is favorable to the granting of them. In fact, the people are beginning to realize, the country over, the cruel conditions under which the fourth-class postmasters have been working, and they desire to see this condition remedied.

7. It used to be that almost every fourth-class postmaster in the country conducted a little store in connection with his office or conducted the office in his home. Such is no longer the case. At an office where the gross receipts are as much as \$600 and over it is physically impossible for the postmaster to conduct any other business whatever in connection with his office work. Furthermore, the public does not want the post office in a store. To go back to the old system of keeping the post office in a store, if it were possible, would never be acceptable to the public. Besides, as stated just above, it is humanly impossible for the postmaster to conduct any other business in connection with his office work. If he has any other business, the time has come when he must hire someone else to do the other work. In addition to the salary schedule submitted (\$1,800 at offices where the gross receipts are \$1,000, graduated according to the league salary plan), we ask for an amount equal to one-fourth of the postmaster's annual salary to partially defray the expense of fuel, lights, rents and the upkeep of the equipment at such offices.

We respectfully and humbly submit the foregoing for your conscientious consideration, implicitly placing our trust in your willingness to work out for us a just scale of wages and the granting of such things as will make it possible for us to give that efficiency to which the American people are entitled.

Pelham, N. C.
GROVER C. PHILLIPS,
Bear Creek, N. C.

STATEMENT OF MR. W. H. BROPHY, POSTMASTER, CRYSTAL SPRINGS, FLA.

Mr. BROPHY. Mr. Chairman, when I was selected to appear before you, I understood that I was to represent the national league and the executive committee, which includes also the third-class postmasters—the third and fourth.

I have a brief which I will submit later, and I will not take up any of your time with figures, but will try to give you a few of the reasons why we adopted what is known as the national league salary plan. The National League of Postmasters is in no sense a labor organization. It is an organization of third and fourth class postmasters of the United States of America with the idea of promoting efficiency in the service, and, naturally, to promote efficiency in the service we expect that after that efficiency has been established and maintained that the department and Congress will see to it that we get adequate compensation; and you know, and everyone knows, that it is impossible to maintain efficiency unless you do pay for it. This idea of getting something for nothing has been found wanting in pretty nearly all lines.

The present basis of salaries was established in entirely different times. In the old fourth-class post office about the only equipment necessary was a little box over in a corner some place where a man would put the mail so they could help themselves, and then he would go on about his business, tending to the store. The parcel post and all those things were unknown, so that when the theory and practice was established that a postmaster had to furnish his own equipment it was not a hardship at that time, because it only meant that the

patrons would come in his store and go over to the little box in the corner and help themselves.

To-day the Post Office Department and the postal business has grown until it is the greatest business institution in the world; but the salary, organization, and personnel has not kept pace with the growth of the department, and if efficiency is to be maintained there must be some attention paid to the salary and the working conditions of the people so that they will keep up with the progress of the department.

To-day a postmaster's duties are so varied that in an office of any note at all it is practically impossible for the postmaster to give attention to any other business, so that he must receive a salary from the post office that will make a living for him. They have so many things to attend to—almost like an express business.

Now, if a postmaster is supposed to get \$1,000 or \$1,200 a year, and it is absolutely impossible for one person to do the work, I say that the United States Government should pay all of that extra expense, so that the salary of the postmaster will be left intact. That is not true to-day. He has to pay his clerk hire out of it, or part of it, and instead of \$900 or \$1,000, he is only getting \$700, so that all we ask is that the postmaster shall have the salary he is supposed to have.

We have gone into this very thoroughly, and the result has been the national league salary plan, which I believe is indorsed by about 95 per cent of the third and fourth class postmasters of the United States. This makes a uniform system from the third class right on up to the fourth.

Mr. Brophy's brief follows:

BRIEF SUBMITTED BY MR. W. H. BROPHY.

I appeal to you to recommend to Congress, for adoption and to support with all the power at your command, the national league salary plan.

As a result of your questionnaires and the many other sources of information at your command, you will be abundantly supplied with statistics and comparative tables showing wage averages in various lines of industry. And as the great number of postal employees whom you will hear necessarily reduces the time that you can allow me to the minimum, I will, therefore, not take up your valuable time with statistical figures but will give you a few reasons for requesting the adoption of the national league salary plan.

The National League of Postmasters is in no sense a labor union. It is an organization having for its purpose the betterment of the Postal Service by increasing the efficiency of its members. By rendering to public and to the Government the best service of which we are capable, we hope and expect Congress to revise the methods and basis of computing our compensation in such manner as will insure to all a salary in keeping with the work performed.

The national league salary plan was unanimously adopted by the National League of Postmasters of the United States at their fourteenth annual convention held in Detroit, Mich.; September 17, 18, and 19, 1919.

For several years the officers of the league have been busy gathering data and expressions of opinion from postmasters all over the country. For months the question of increased salaries, working conditions, etc., have been freely discussed from every conceivable angle. During this time we have been busy, also, feeling out Members of both Houses of Congress in an endeavor to find out just how they stand. After gathering all of this material together, tabulating and analyzing the thousands of questionnaires, letters, ideas, and plans submitted, the executive committee, of which I had the honor to be a member, met in Washington, D. C., to formulate a plan which we hoped would meet the approval of all. Upon our arrival in Washington our first move was to visit the Post Office Department for the purpose of getting their views and ideas. Next we called upon the chairman and secretary of your honorable body. Everywhere we were received very cordially. And the open.

frank discussions convinced us that no one questioned the fact that we should be given increased compensation, the only question that presented itself being how much and in what manner. During our deliberations, which lasted for several days of from 12 to 18 hours each, we kept constantly before us this purpose—that our plan must be one just alike to the public, the Government, and ourselves. Also to insure its adoption with as little delay and opposition as possible, it must be practical and conform as nearly as possible to the ideas and wishes of our members, the department, and, most important, at least to its adoption, to Congress. The national league salary plan was the result. We were proud of our work, but as many of the most brainy and influential postmasters were advocating and doing everything in their power to secure the adoption of diametrically opposite plans we were fearful lest it should prove impossible to unite all on any one plan. However, the national league salary plan was accepted enthusiastically by at least 95 per cent of the postmasters of the country. And we hope and believe that its extreme fairness and conservatism will win for it the approval of this honorable joint commission and finally of Congress and that it will be speedily enacted into law.

The best basis for computing the salary of fourth-class postmasters was the cause for the greatest divergence of opinion. Many favored a system of counting the number of pieces of mail handled, both incoming and outgoing, one month of each quarter or one month every six months. This plan we discarded as being impractical and cumbersome. The present plan of basing the salary of fourth-class postmasters on the basis of the cancellation is objectionable to the great majority of these postmasters. It being impossible to make an accurate check on the cancellation has laid all fourth-class postmasters open to suspicion of padding and falsifying their accounts and has been the cause of the downfall of many. This feature of placing unnecessary temptation in the way of an employee should alone be sufficient grounds for discarding it. Another prolific cause of complaint against it is the fact that disgruntled patrons, although they may have a very heavy incoming mail, by mailing their letters on the trains and sending them to other offices can prevent the postmaster from receiving any compensation for the handling of their mail. This is a much more general practice than you would think possible. Personally, I never could understand why this method was adopted for fourth-class offices, and an entirely different method used as a basis of computing the salaries at all other offices. I have always advocated the adoption of a uniform system for all offices with an equitable gradation from the smallest fourth-class office to the largest first-class office. I encountered very little opposition when I presented this plan to the executive committee. It was adopted unanimously. The salary gradations, however, required much careful, painstaking consideration from every possible angle. It was realized that "stop-watch" methods would accurately fix the pro rata cost of work performed in the larger offices, where a clerk is kept for hours at a time at the same routine work. This basic cost, however, would be out of all proportion in smaller offices where one person is required to do all of the work, on account of the time required to prepare for each of the various processes in the daily routine. To illustrate: The time required to prepare and set the date and hour in the canceling machine at a large office, where the run of letters canceled is in the thousands, is hardly worth considering; but in a small office where the run is from half a dozen to a few hundred and a slow hand stamp and pad the implement used, it becomes an entirely different proposition. About nine-tenths of all mail handled in the average third and fourth class office originates at and the total revenue derived therefrom is credited to a large first-class office. This is especially true since the introduction and growth of the parcel post, and it promises to increase rather than diminish. It was therefore apparent that this should be taken into consideration by adding to the revenue basis of these smaller post office salaries an amount sufficient to at least partially compensate for this extra work for which there is no accurate basis for computing same. We have tried to compensate for these varied conditions as equitably as possible. This accounts for the excess of salary over the total income of some offices. Very small offices are in many instances held by persons whose own business constitutes, practically their only reason for existence. On the other hand, many, perhaps the major portion, serve residents in sparsely settled communities, where the postmaster holds the position more from a sense of public duty rather than, for the salary received. After much discussion, it was decided that the responsibilities, periodical reports, and the holding of one's self in constant readiness to perform the various duties in connection with the office is surely worth at least 50 cents per day, or \$150 per year.

Allowances: This item is of special interest to third class postmasters although it is an urgent necessity at many of the larger fourth class offices. In the matter of allowances we have been extremely conservative. It is a travesty to fix the salary at an office where it requires the entire time of more than one person to properly per-

form the work and then to fix by law or departmental order the maximum allowance for clerk hire at from 25 to 50 per cent of the minimum amount such clerk hire can actually be secured for. Many third class postmasters whose salary is shown in the official guide as \$1,200 per year and up have not to exceed \$800 to \$900 left for themselves after making up this unavoidable deficiency in clerk hire allowance. This applies in a lesser degree to fourth class offices also. In addition to the above these third and fourth class postmasters, except in buildings where lease is held by the department, are required to maintain an investment of several hundred dollars in boxes and equipment, the rental of which amounting to \$150 per year and up is taken by the Government although they have not one penny invested. Instead of an allowance the Government should pay all expenses necessary to the efficient conduct of the business. Then postmasters would receive all of the salary to which they are entitled. It is a great injustice to require fourth class postmasters to furnish quarters, equipment, heat, light, etc., at their own expense; these should be provided by the Government, and as a partial relief the 25 per cent asked is very conservative.

"A money-order application, please," greets you as you reach the middle of a column of figures; you stop, hand the required application to the patron or direct them to where they can help themselves to one; as you would be unable to accomplish anything in the meantime, you wait until the applicant has completed the application and returns to the money-order window; you take the application, read it over carefully, then make out the money order; more time is lost waiting for the patron to "dig up" the money to pay for same; you make change and in some cases it is necessary to make separate advice and mail to paying office. You return to your work to be interrupted a few minutes later by a patron who wishes to cash a money order drawn on another office. Perhaps you are short of money-order funds and have to resort to a draft or transfer of postal funds entailing more clerical work. After the patron has received their money and departed you prepare and mail notice to issuing postmaster that this particular money order has been paid at your office instead of at the office drawn on. After several days you receive acknowledgment that your notice of payment has been received by issuing postmaster. You file this acknowledgement with paid money order particulars. Particulars of all money orders both issued and paid must be entered in their respective registers and form a part of the cash book records. At the end of the month each is again entered on separate reports, one-half of each paid order forwarded with report to auditor, the other half filed with applications for orders issued as office records. If an order issued by you is paid at an office other than the one drawn on you are required to file the notice, from office making payment, to you with the application. Besides the work mentioned there are applications for lost and destroyed money orders, requiring searching of records for verification of particulars and more or less correspondence with other postmasters and the department. There are also requests for other information, as to whether a certain money order has been paid, etc. If you should make an error, especially in the payment of the order, it might cost you the face value of the order. We think 5 cents is not an excessive fee for all this work and responsibility, especially as the Government charges a minimum of 3 cents and a maximum of 30 cents for each money order issued; and as we receive nothing for this work except a fee on money orders issued. We therefore most respectfully request that the fee allowed us for the issuance of money orders be fixed at 5 cents each instead of 3 cents as at present.

Vacations: Argument in favor of vacations would seem unnecessary as they are now almost universally accepted as a matter of course. We therefore request that you recommend that all third and fourth class postmasters be granted a 15-day vacation with an allowance equal to 15 days salary at their regular rate, with an additional 15 days without allowance, when requested.

Briefs were submitted by J. M. Clement, Mineral Bluff, Ga., James A. Grant, Alto, Ga., and S. C. Puckett, Springville, and Mrs. Lottie C. Reid, Odenville, Ala., as follows:

STATEMENT SUBMITTED BY J. M. CLEMENT, POSTMASTER, MINERAL BLUFF, GA.

I consider that if any public servants need relief, it is the fourth class postmasters. Take, for instance, this post office: The postmaster is required to devote his time to its duties, every day in the week and Sunday too. We furnish the post office building which formerly brought me over \$100 rent; furnish all the fuel and light, stove, brooms, and everything necessary to keep the office as required. We handle not only the work of the office but that of three star route mails, covering a long stretch of country. Have spent personally over \$100 for the improvement of the office for the safety and betterment of the service. I am allowed only one clerk at only \$24 for every three

months, being only \$8 per month, or about 26 cents per day. My compensation for the year ended September 30, 1919, was \$477.12 for 365 days' work, being about \$1.30 per day; whereas it should have been to have justified the work done here nothing under \$800 and justly \$1,000, in this hard time of living.

The fact is, an office of this size should be on a salary basis, lights, fuel, rent, and equipment furnished.

During the year ending September 30, 1914, the compensation was \$497.65, and with an increase of living 82.2 per cent, and a decrease of \$20.53 in the two years above mentioned, a postmaster can not devote all his time to an office of this size and do the work that has been done here in the last four years, under present living conditions, for less than double the present compensation. Take the present compensation, \$477.12, and deduct the rent, say, \$100, light, fuel, brooms, and all furnishing, and the postmaster has but little left for himself and family; and it is plain that relief is badly needed. We bore it through the war period without murmur; did all the extra work of bonds, war savings stamps, and numerous things without compensation; stinted our clothes, table, family, and now we feel that relief should come.

BRIEF FILED BY MR. JAMES A. GRANT, POSTMASTER, ALTO, GA.

It was my intention to come before you the third instant, but on account of sickness in my family it will be impossible for me to be there.

I desire to submit a few facts to you pertaining to my office which is a fourth class office. For the year ending December 31, there were 2,455 money orders issued amount received for these orders were \$13,217.45, the fees on these orders were \$133.36. For the same year I cashed 204 orders, amount to \$2,730.27. I made 65 remittances to my depository (Atlanta, Ga.), in said year, amounting to \$10,475. I will say, living in a town where there is no bank I am forced (as well as all other postmasters), to either remit currency, keeping the denomination of each bill separately, etc., or send my money 5 miles and get certified checks and send them as remittances, which you can see puts me to a great deal of trouble as well as a heavy responsibility. I have two rural routes that bring in about one-third of these orders, and as you well know it is about as much again trouble to handle these orders as orders brought regular in the office. I will add that my working hours the year around average 13 hours per day, I will further say that it requires all my time and an extra hand four hours a day to run my office. Two-fifths of this entire time is required and devoted to the different phases of the money order part of my office. I think that all fourth class postmasters should have all the money-order fees and not just 3 cents on each order, as the law now provides. I think in addition to this that all fourth class postmasters, where the office pays as much as \$900 per year, should have \$100 per annum to pay for lights, fuel, and rent.

My post office is run in a store of which I own a one-half interest, and there has been a lot said about that. I will say that my partner advises me that he would be glad to see the post office removed out of our store building, which should convince you gentlemen that a post office in a storehouse is no asset to the business. I realize that you men have a big job before you; I further realize that it takes men of wide experience and a lot of facts and figures to pass upon this great question; but I do not see how you gentlemen can get around paying fourth class postmasters all the money-order fees for lights, fuel, and rent on a basis of a fourth class office, as above stated, paying \$900.

BRIEF SUBMITTED BY S. C. PUCKETT, SPRINGVILLE, ALA. AND LOTTIE C. REID
ODENVILLE, ALA.

JANUARY 13, 1920.

In behalf of the postmasters of the fourth class of Alabama we beg to submit the following:

We ask for relief from an inadequate compensation based on a percentage of the cancelled stamps. The counting and keeping of cancellation consumes valuable time of a busy postmaster, so that in the interest of efficiency also, we are unanimous in asking for a salary based on the gross receipts of the office; such as that recommended by our national league officers.

We work from 10 to 14 hours per day. We work on all holidays and Sundays. We are granted no vacation the year around. The eight-hour day is recognized by our Government as the lawful work day. We do not object to longer days when the service requires it, but we do feel that four to six hours "overtime" work should entitle us to a living wage, which at the present cost of living we are not receiving.

At our present rate of compensation we are unable to educate and properly clothe our children, or to contribute to civic and religious life, not to speak of recreation for ourselves and families.

We are required to furnish absolutely free to the richest Government on earth, buildings, rent, light, fuel, and equipment for the conduct of its business. We feel that this is the most obviously unjust feature of the present system.

We feel that we are entitled to salaries equal to that of other employees doing similar work. A clerk in a first-class office has only one line of work to perform and is responsible for that alone. The fourth-class postmaster must be familiar with all regulations pertaining to rural delivery, registry business, parcel-post business, insurance business, money-order business, c. o. d. business, war-savings business; all law relative to the receipt and dispatch of mails, must hold himself responsible for the proper conduct of all duties performed by the rural carriers from his office, must work 12 to 14 hours daily to accomplish this, and receive about one-half the salary paid to his rural carriers, or paid to the clerks in a first-class office.

We do heartily indorse salary plan as adopted by the national league of postmasters at their convention held in Detroit last September.

THIRD CLASS POSTMASTERS.

STATEMENT OF MR. J. H. BODIE, POSTMASTER, LEESVILLE, S. C.

Mr. BODIE. Gentlemen of the commission, I have no brief. We will file a brief later. I was asked when I came before you to put before you this most peculiar class of postal employees the best I could. We are just on the borderland. I would like to talk to you, if we had the time, under three heads. The postmaster, the assistance he has, and the equipment and building, but we haven't the time to go into all that.

The requirements for a third class postmaster are extremely peculiar. He must be a man of some executive ability, he must have a fair education, he must be a man of some business ability and, above all, he must be of irreproachable character. He must be a man who commands the respect of his entire community, the entire patronage of his office, and with the executive ability to manage those employees under him—the rural carriers and the rural delivery service men as well as his assistants. Now, this necessarily calls for a most versatile man. He has to have some of the abilities of the bank cashier, some of the salesmanship of the get-rich quick salesman, of a clothing clerk, of the grocery clerk, and some of the executive ability and requirements that all of the larger offices require. He has to know, in his small way, the many things that enter into all of the branches of the large offices. He performs the various duties of a money-order clerk and all of that.

Take my own State, South Carolina; we have 89 offices of the third class, with 89 first-class postmasters in them. Their average salaries prior to July 1 was \$1,440, as against an average for the rural carriers, who are supposed to be under them, of \$1,490. It has been increased since then.

The clerk hire in each of these 89 offices was an average of \$79 and some few cents, and the postmasters have to make up that difference out of their own pockets. That is, to get efficient help, it costs him from \$50 to \$75 per month on an average. He has to furnish and equip a decent office. To do this—I happen to own my own building—a building and equipment is cheap at \$6,000. I am allowed \$300 rent, \$60 for light and fuel. I have paid as much as \$9 for light alone last winter. In addition to that equipment the boxes bring into the

department approximately \$200 a year from my office to offset that \$300. In addition to that the inspectors come into our office and tell us we have to keep a decent office, keep the office clean.

We put in 14 hours a day, some of us. I know I do. The average in my State is 11½ hours, as against an average for the rural carriers of 5 hours. Every rural carrier in my office—I have seven—has from, I think, \$150 to \$200 more salary than I get. They fulfill their duties in 3½ or 4 hours in my office, while I am on duty 12 to 14 hours.

Gentlemen, I have about covered the case as I see it. If there are any questions you would like to ask, I will be glad to answer them.

Senator MOSES. Do you indorse the national league program for salaries?

Mr. BODIE. To a great extent. I have not been able to go into detail on that matter. I was instructed by my State to suggest an increase of from 50 to 60 per cent with 50 per cent of the postmaster's salary allowance for clerk hire.

Personally, I am entirely willing to leave the case with the honorable committee, they, realizing the high cost of all the necessities of life compared with the cost when the present rate of salaries was inaugurated, thoroughly understand our situation.

During the recent years of the war when we were called upon to put forth every power at our command, contributing to all of the various war funds, doing our limit for our Government in all the ways possible, the average postmaster at offices of the third class who had no other income and having to supplement the small allowances for clerical assistance from his own salary, could hardly afford the necessary comforts of life. Combined with this is the fact that the various political changes affect us so materially, as perhaps no other Government employees, it makes it a rather hard problem for any of us to lay aside for the proverbial "rainy day." Preaching the doctrine of thrift as never before, I can not think that those in command of this, the greatest Government on earth, are willing for those of its citizens who are serving faithfully, though in an humble capacity, should be paid less than an amount for those labors that will give them the comforts of life and a little for that time to come when they can no longer give their best in service and thought.

It is practically impossible for us to speak intelligently of any but the office in which we are employed. In my own office it requires at least two of those employed practically all of their time and the third assisting in assorting mails for incoming and outgoing trains as well as the business of handling the mails of the seven rural carriers from this office. This, combined with the long hours, makes other affairs practically impossible. Of course, if there is such a person in the service who has no pride in his office and is not thoroughly interested in the service, has no regard for his rating, he may find time for other things. The man who really wants to keep a respectable office has to be "on the job" in season and out of season.

The total receipts of this office for the year ending December 31, 1919, were \$4,644.89; the total expenditures—salary, clerk hire allowance, rent, light, and heat—were \$2,315.58; net profit, \$2,329.31.

Previously I mentioned a comparison with the rural carriers, they being the only class of employees with which I am familiar and with no intention of detracting from their service, realizing just what those men have to undergo and the great expense of equipment and its

upkeep over the roads they are forced to travel, but solely for the purpose of comparison of hours and salary.

It would not be my purpose to ask anything that would appear extortionate or unjust to the employer or the employee.

First. I believe there should be an adequate allowance made for clerks so as to be able to command efficient help. I believe this should be based on the salary of the postmaster at each individual office, on a basis of 50 per cent. This with the fees from money orders should be adequate except perhaps in some extraordinary cases.

Second. Where the boxes are owned by the postmaster I believe he should have the rent from them. My reason for this is the postmaster has to pay a very good price for them; in the event of his removal or resignation he has to dispose of them at whatever he is able to get, regardless of their actual cost or value. The boxes at my office cost me between \$600 and \$700 and they pay a little more than two-thirds of the office rent.

Third. The salary of the postmaster should be adjusted as far as possible with regards to the hours of service, cost of living, responsibility, and to as far as possible compare with other employees. I realize in doing this it will be impossible to please all, but, as I have already stated, I am willing to leave this with the honorable committee, believing they have a clear insight of the facts and are in sympathy with anything for the greatest good to all.

I believe a percentage salary system could be planned, based on the receipts of the individual office, that could be made equitable and fair to all. Of course, there are objections to this. It could be argued that some would become too diligent in search for business, but there is no system that will be perfect, and, too, those who are honored with the position should be men of honor at least.

It seems fair that whatever adjustment made should be retroactive to the date when an increase would have been made under normal conditions and which was denied during the term of the war.

STATEMENT OF MR. E. A. MEEKS, POSTMASTER, NICHOLS, GA.

Mr. MEEKS. Gentlemen, I do not have much to say, and most of what I do have to say is in my brief.

There are some things, however, I would like to call attention to. The postmasters in the smaller third-class offices are required to furnish fixtures for the Government and turn over the fees. In this way we help to pay our own salary. I have a tabulation here in my brief which shows the expenditures and the box-office rents received, and it shows conclusively that the postmaster is actually paying on his own salary \$118.72 by furnishing the fixtures in his office and turning the rent over to the Government.

The postmaster's work is greatly increased since the adoption of the parcel post, rural delivery service, etc., and there is a great deal required of a postmaster of the third class, because he has had to familiarize himself with all the departments and all the regulations pertaining to all departments of the postal laws, because it all comes under their direct supervision, or else they do the work themselves.

I think my brief contains most of this information, and I will say in conclusion that we indorse the national league salary plan.

The brief follows.

BRIEF SUBMITTED BY MR. E. A. MEEKS.

As representative of the third-class postmasters I beg to submit the following to your honorable body in behalf of the third-class postmasters: Third-class postmasters are one step past the commission (cancellation) postmasters. We receive our appointment from the President with the advice and consent of the Senate and retain for four years, or until removed for incompetency, violation of the regulations, or for political reasons. Therefore, the postmasters of the third class insist on a definite civil-service status with other civil-service employees of the Post Office Department, such as departmental clerks, post-office clerks of the first and second class, railway postal clerks, rural carriers, etc., as postmasters of the third class must handle all work in their offices, viz. janitor, general-delivery division, money order-division, registry division, mailing division, auditing, and chief of their offices, and must familiarize themselves with the postal laws and regulations pertaining to the different divisions of the service as all work is done by him, or comes under his direct supervision. Therefore we believe that efficiency can be brought about only by retaining employees in office as long as competent and efficient servants of the Postal Service. Their efficiency can be obtained by visiting inspectors' reports, auditors' reports, and from the public in general. Therefore it is detrimental to the service to dismiss an employee as long as efficient because of political reasons. The postmasters of the third and fourth classes are really servants of the people and are the only executive officers who handle all the work from janitor to chief of their offices.

The salary of all presidential postmasters has been in vogue for the past 36 years, such salary being inadequate, and in most cases the salary of the third class postmasters are fictitious, as we are required to furnish clerks, which are not considered employees of the Government, but employees of the postmaster and the meager allowance granted by the Post Office Department only meets about one-half or less than one-half of the amount actually expended for this service, thereby reducing the salary of the postmaster. The clerical allowance granted under amended section 312, P. L. & R., is insufficient to command the services of an efficient clerk and we find that the full amount under this section is almost impossible to get. We are almost always put off with a smaller amount than the amount specified under this section. Therefore we ask that clerical allowances be granted according to postmasters' salary, and left discretionary with the postmaster at each office whether the full amount be needed, or less, according to the conditions prevailing at each office. The increased cost of labor has affected us in securing efficient clerical assistance on small allowances.

Since the salaries of the postmasters were adjusted the following additions have been made to the service, viz. the rural delivery service, parcel post, postal-savings system, sale and redemption of war-savings stamps, the sale of documentary and proprietary revenue stamps, and for the central accounting postmasters of this class, the filling and filing of requisitions of district postmasters, and the checking and auditing of accounts of the district postmasters.

The parcel-post system has grown into a regular express business, involving a plan of accounting, weighing, rating, insuring, receipting, tagging, tracing, and remitting on each piece, the work comparing with that of a regular commercial express company which has increased our work at least 100 per cent. Ninety per cent of the second, third, and fourth class mail (parcel post) handled and delivered by third and fourth class postmasters are received from offices of the first and second class, and as the postmasters' salaries are based upon the receipts of their offices it can be readily seen that the receipt of 90 per cent of the mail handled by these offices originates at offices of the first and second class, thereby furnishing the bulk of the work done at the third and fourth class offices without any compensation therefor.

In a majority of the small third class offices we find that the postmasters are required to furnish all equipment (except rural carriers' cases), which includes routing tables, desks, lights, box equipment, iron safes, and other equipment which may be needed for postal work in their offices, of time causing the expenditure of from \$300 to \$1,200 by the postmaster from which he receives no revenue or rent, the boxes being rented at regulation prices and every cent going to the Government, the postmaster not realizing one penny on his investment, and in this manner the postmaster helps to pay his own salary. The postmaster has to pay the taxes and insurance and stand the depreciation on his fixtures, and when political parties change he is railroaded out with fixtures on his hands without a sale, which he has furnished without one penny of rent or revenue, and if he sells same he must do so at a sacrifice as no one needs these fixtures except a postmaster.

From statements received from 27 offices in different parts of Georgia we list below 17 which furnish fixtures without rent:

Post office.	Amount invested.	Box rent year ending June 30, 1919.	Post office.	Amount invested.	Box rent year ending June 30, 1919.
Chatsworth.....	\$200.00	\$106.30	Demorest.....	\$450.00	\$169.95
Zebulon.....	100.00	89.40	Broxton.....	220.00	106.30
Adrian.....	300.00	191.16	Tignall.....	115.00	45.95
Gordon.....	125.00	90.00	Loganville.....	800.00	117.90
Norcross.....	400.00	155.00	Chamblee.....	300.00	27.55
Rhine.....	135.00	82.85	Louisville.....	400.00	135.00
Austell.....	584.50	116.75	Nicholls.....	750.00	154.75
Metter.....	1,025.00	195.62			
Woodbury.....	175.00	133.89	Total.....	6,379.50	2,018.37
Bremen.....	300.00	100.00			

From the above you will note that these postmasters are paying an average of \$118.72 on their salaries.

We wish to call the attention of this honorable body to the third-class offices which have become central accounting offices under the late ruling, which in many cases have doubled their work and responsibility because of increased stock of stamps and stamped papers, and filling and filing of requisitions of the district postmasters, and auditing of their accounts, and the further responsibility of getting the district offices to render accounts properly and on time. The work has increased in such manner that the necessity for clerical assistance has more than doubled since the addition of the central accounting business.

The hours of the average postmaster are from 10 to 15 hours instead of an 8-hour day allowed other Government employees, and the third-class postmaster has never been granted an annual leave of absence with pay.

In consideration with the foregoing we feel that we deserve, and respectfully ask the following: That postmasters of the third class shall be paid in accordance with the following scale, with the amount specified as clerk allowance:

Gross receipts.	Post-master's salary.	Clerk-hire allowance.	Gross receipts.	Post-master's salary.	Clerk-hire allowance.
\$1,900 to \$2,100.....	\$1,650	\$600	\$3,500 to \$4,200.....	\$2,400	\$1,100
\$2,100 to \$2,400.....	1,800	700	\$4,200 to \$5,000.....	2,550	1,200
\$2,400 to \$2,700.....	1,950	800	\$5,000 to \$6,000.....	2,700	1,300
\$2,700 to \$3,000.....	2,100	900	\$6,000 to \$7,000.....	2,850	1,400
\$3,000 to \$3,500.....	2,250	1,000	\$7,000 to \$8,000.....	3,000	1,500

That an amount equal to 25 per cent of the postmasters salary be paid to the central accounting postmasters in addition to their salary for the extra work.

That postmasters of the third class be given a civil-service status with line for promotion to higher vacancies, according to their efficiency rating.

That an eight-hour day be granted to third-class postmasters with pay for overtime and 15 days leave of absence with full pay, as granted other employees.

That an allowance sufficient to cover rent on office, fixtures, lights, and fuel be wanted to all third-class offices, whether under lease or not.

That the Post Office Department be required to furnish or rent fixtures in all third-class offices.

STATEMENT OF MR. J. T. STILWELL, POSTMASTER, MONTE-ZUMA, GA.

Mr. MEEKS. Gentlemen, the ground has been pretty thoroughly covered and I have a brief which I will submit and will not go into detail. I have been postmaster for 19 years, and have gone all the way from fourth class to just edging on the second class.

I think it simmers down to this: The cost of living which we have heard so much about is one reason why we should have more salary,

and then we should have that salary and should not have to pay it out for clerk hire. I think we need a 50 per cent increase in our own salary and 100 per cent increase in clerk hire.

The maximum allowance now for clerk hire is \$100. We need clerks, as you know, and we can not get them for that, and when we do get them we have to pick up what we can get. As soon as a clerk becomes efficient we lose him. In my 19 years experience I have trained and lost no less than 25 clerks. I now have two new clerks and in 60 days, as soon as they become efficient, they will be off for more than I can pay them. No bank, no firm or corporation can succeed with its help changing every 60 or 90 days. I love the work. I have given my life to it for 19 years, but I have to live right to give efficient service. I want to be an efficient postmaster. The people want service and I believe they are willing to pay for it, but we can not give efficient service unless we have the help.

Mr. Stillwell's brief follows:

BRIEF SUBMITTED BY J. T. STILWELL.

We, first-class postmasters—managers of third-class offices—appreciate very much your courtesy in coming down close to us and inviting us to tell you of our needs and if we feel we need and deserve increasing salary, why, and if need better clerks and better pay for them—why?

In behalf of the third-class postmasters of Georgia and Alabama, whom I have been appointed to represent, I beg leave to submit reasons for the hope we have that you will strongly recommend at least 50 per cent increase in third-class postmasters' salaries, and sufficient allowance for clerk hire so that postmaster's salary will really be the amount stated.

We ask increase in salary:

First. Because living expenses have increased from 200 to 400 per cent. To illustrate:

A few years ago could buy corn meal for from 50 to 60 cents per bushel. Now is worth 60 to 75 cents per peck

Could buy flour for from \$5 to \$6 per barrel. Now it is \$16 per barrel.

Meat was from 6 to 12½ cents. Now 25 to 50 cents a pound.

Sugar and coffee have increased 300 per cent.

Clothing has increased from 200 to 400 per cent. A cheap suit that you could buy from \$10 to \$15 is now from \$40 to \$50. Shirts that were \$1 are now from \$2 to \$3.50. Dress goods, gingham that were 10 to 15 cents per yard, now 40 to 60 cents. Shoes increased about 400 per cent, and merchants tell us prices will be much higher still.

Coal was \$4.50 summer delivery in 1914; now \$11 to \$14.

Eggs were 15 to 20 cents; now 75 to 90 cents. Chickens that were 25 cents now cost \$1.

Second. On account of the great difference in class and amount of mail handled.

When postmasters salaries were adjusted, the principal mail was first class. Now, three-fourths of the mail we handle is parcel post or second or third class. The great bulk of all this mail originates at the large city offices and does not add to the receipts or sales of the third-class offices and as our salaries are based on our sales, and not on amount of mail handled, and, as stated, this great bulk of parcel post, C. O. D., newspapers, magazines, catalogues, and advertising matter, is mailed out from the large city offices.

We would call special attention to the C. O. D. business which has added an enormous amount of record and detail work and this is especially true as to C. O. D. packages which fail of delivery—for which we receive no remuneration whatever. So great has the C. O. D. business grown, at most of the larger third-class offices, that one clerk could be kept busy most of his time attending to this.

We see no reason why we should not be allowed credit for sales of revenue and proprietary stamps just the same as for ordinary postage stamps. It takes time, labor, and responsibility just the same.

The third-class post office belongs to the Government. And the third-class postmaster is paid a salary to look after and manage it and is required to give it his personal attention, thereby preventing him in engaging in other business. He is employed just as a manager or any firm or corporation is employed, except the manager for a firm

or corporation is not expected to pay for extra help needed to run the business out of his own salary or private funds. Is it fair and just that a postmaster who works from 10 to 15 hours per day should be required to pay from one-fourth to one-half of his salary to secure and keep efficient help? Not that he may make more money but that the public may be given the service they require and have a right to expect. The question of clerk hire is so closely connected with the salaries of third-class postmasters that we ask you, gentlemen, to give it your careful consideration.

Under the present adjustment of clerk hire for third-class post offices, the maximum clerk hire being \$1,200 per annum and that temporary and optionary. How can an office be properly run that really needs three clerks when an efficient, reliable clerk can command from \$75 to \$150 per month? If we secure a new, green clerk and teach and train him up we but train him to lose him. In my experience of 19 years, as a third-class postmaster, I have trained and lost not less than 25 clerks. How long could a bank, firm, or corporation do a paying or satisfactory business on such a basis. We believe the people want the service and are willing to pay for it. We recommend that post office clerks in third-class offices, should be treated as other Government employees and be promoted for efficiency, granted 15 days' vacation each year, with pay, and only required eight hours or be paid for overtime.

Briefs were submitted by John P. Stockton, Ellenboro, N. C., W. S. Hite, Batesburg, S. C., Bays D. Cather, Pell City, Ala., and James M. Byrd, Branchville, S. C., as follows:

BRIEF SUBMITTED BY MR. JOHN P. STOCKTON, POSTMASTER, ELLENBORO, N. C.

Through Mr. John P. Stockton, our North Carolina Representative, we beg to submit the following brief in behalf of the postmasters at third-class post offices in the State of North Carolina:

The postmaster at a third-class post office at the present time receives his appointment from the President of the United States as a result of a civil service examination, in which experience and fitness play a very important part. It is true, but which, at the same time, embraces educational tests which guarantee the intellectual fitness of the appointee.

Third-class postmasters do not as is often supposed, get a fixed salary like first and second class postmasters, but their compensation is determined by the amount of stamps they sell, in other words, the gross receipts. This method of compensating them was adopted by act of Congress of March 3, 1883, and from time to time there has been an adjustment of the salaries and clerk-hire allowances at these offices, the latest adjustment having been made as we understand, in 1907. Since that time the living expenses have gone up tremendously, so much so that there is no comparison of present living expenses with those obtaining 13 years ago.

Some time ago an act was passed making the pay of clerks in first and second class post offices 60 cents an hour, that is, substitute clerks in these offices. Every class of worker, in every field of endeavor is asking for great increases in wages, our information being that the section foremen on the railroads are now asking for 80 cents an hour or \$6.40 for a day of eight hours.

Third and fourth class postmasters are the only people on our earth who get a lesser wage than that of the people who work under them. In every other position in this world except third and fourth class post offices the head of the establishment gets a greater wage than those who work under him, but we find the third and fourth class postmaster working every day with men, no better than he is by nature, whose wages are very much higher than his. This alone makes his a most cruel position, and there is hardly a person on earth who has not experienced it for himself who can have any conception of the humiliation and embarrassment to a third or fourth class postmaster to be compelled to work from month to month with subordinates (rural carriers) whose vouchers he must sign for a great deal more than his own pitiable wage.

Third-class postmasters are supposed to be allowed sufficient clerk hire to cover the extra work in their offices, but this has hitherto been left discretionary with the department, the acts which have governed this feature of the third-class offices having read that "not to exceed such and such a sum may be allowed at third-class offices where the salary of the postmaster is such and such a sum." This has made it extremely difficult for the postmasters to get anything like an adequate allowance for clerk hire, in practically every office of this class the postmaster has always had to pay out a good percentage of his own meager compensation for clerk hire.

We ask that where the gross receipts of an office of this class are \$1,900 to \$2,200 an ample allowance for one clerk full-time at a living wage shall be granted, and where the gross receipts are above this \$2,200 there shall be sufficient allowance for additional clerk hire such as shall be required to give efficient service.

We ask, further, that third-class postmasters shall be allowed 15 days annual leave with pay, and that they shall also be allowed 15 days sick leave with pay after one years' satisfactory service in such post offices. We ask, further, that these third-class postmasters shall be given a working day of 8 hours within 10 hours, and that they shall receive pro-rata pay for overtime duty.

We ask, further, that third-class postmasters shall be retired after having rendered 20 years' satisfactory service in the said offices or other branches of the postal service.

We ask, for both third and fourth class postmasters that the total time spent in the Postal Service, in whatever department of the said service the beneficiary shall have worked, and even if he or she may have worked in several branches of the Postal Service, we ask that the total time spent in all of them shall be counted in the necessary number of years entitling him or her to retirement. That is, 20 years' satisfactory work in the postal branch of the Government service shall entitle the person having so served to the benefits of the retirement law.

We ask for both third and fourth class postmasters that there shall hereafter be required but one money-order book to be kept, the preserved applications being a sufficient record of the money orders issued and the coupons cut from paid orders, likewise preserved, being a sufficient record of paid orders. Thus the cash book is really all that is necessary to be kept.

We believe that the Government should own or rent all post office quarters, or that postmasters of every class should have a sufficient allowance from the Government to enable them to maintain that respectability in such offices as will be in keeping with their position as the representatives of the greatest Government of all time.

We believe that sufficient salary should be paid to all postmasters to enable them to live as decently as their neighbors, the railroad workers, and their subordinates, the rural carriers. This is essential in order that the respect due these positions may be given, and that there shall not be brought any reproach against our great Government because of the inadequacy of the salaries of these officials in these important positions of trust.

It should not be necessary that a third or fourth class postmaster should have to pay his clerk hire out of his own pocket, and yet there are fourth class postmasters who actually pay out more for clerk hire than they receive as compensation from their cancellations. Third-class postmasters are supposed to get ample clerk hire allowances for the conduct of all work, and yet in practically every office of this class the postmaster has had to pay out a good percentage of his own compensation for the item of clerk hire.

At third-class post offices the Government is supposed to rent suitable quarters for the office and to furnish cabinets and office furniture, but the postmaster often has rented or furnished additional room or been put to the expense of other room and fixtures.

At a third-class post office, as well as at the larger fourth-class post offices, the postmaster has more actual work than any clerk in a city post office or any rural or city carrier, yet his wage is but a miserable pittance compared with the great burden of work which falls to the lot of these officials.

Therefore we ask your honorable body to recommend to the Congress the immediate passage of appropriate legislation granting adequate allowances for clerk hire, rent, and other expenses at third-class post offices, and that the salaries of these officials shall be based on the schedule proposed in the national league salary plan, which is adequate for third-class post offices at present, provided the legislation respecting clerk hire shall be made mandatory in every instance.

We ask, further, that third-class central accounting postmasters shall be allowed \$5 monthly for each district office under their supervision, and that they shall be allowed \$10 monthly for each rural carrier attached to their offices, the same as has been asked for in our plea for fourth-class postmasters, which has this day been presented to your honorable body by Mr. John P. Stockton, representing the third and fourth class postmasters of North Carolina.

We do most respectfully and humbly beg to submit the above for your conscientious consideration, with perfect assurance that with the noble members of the Joint Postal Commission our cause is in safe hands, and we believe your recommendations will be ample for every postal worker in all branches of the postal service, and that no discrimination will obtain against any class of workers as a class through the recommendations of your honorable body.

BRIEF SUBMITTED BY W. S. HITE, POSTMASTER, BATESBURG, S. C.

I am postmaster at a third-class central accounting post office, and can speak from personal experience what a postmaster at an office of this kind has to contend with.

Making this statement as short as possible, will say: First, I have 17 district post offices, exclusive of my own, to supply and keep accounts with; I only have one assistant, and we are compelled to work from 13 to 14 hours per day, and then it's almost impossible to keep up with the work. Being impossible to employ additional help with the small allowance that I now have for this purpose, I feel sure that the honorable gentlemen constituting the commission who gave the postal employees such an attentive hearing at the Atlanta meeting will also lend an attentive ear and kindly consider the claim and needs of the overworked and insufficient compensated postmaster at a third-class central accounting post office.

I think a fair compensation (additional) for service required at a central accounting third-class office would be \$5 per month for each district office served. This would enable, or assist at least, the postmaster in securing the very much needed help for this purpose. If no allowance can be granted for this additional work, I readily agree with many others from whom I have had expressions and with an expression from one of the members of the honorable commission, that all central accounting post offices should be placed in first or second class office, where they already have sufficient help to take care of such work. I know that those in charge of this great task will give the postal employees due consideration and a fair deal.

Now, as to the third-class postmasters, owing to at least 75 per cent increase on the general cost of living, it's not necessary to say that we need at least 50 per cent increase on our present salaries to meet all the necessities and comforts of life and allow the assistant's salary to be 50 per cent of the postmaster's salary.

All the above is only an idea of one man, and, as previously stated, I am perfectly willing to submit our claim to the honorable body of great men who have the matter in charge and will give to us a most careful consideration. I am content with their decision.

BRIEF SUBMITTED BY BAYS D. CATHER, POSTMASTER, PELL CITY, ALA.

We consider the salaries of all third-class postmasters should be increased, at least 50 per cent, for the following reasons:

1. Our rates of pay were fixed by Congress over 20 years ago, when prices of necessities were much lower than they were even three years ago. During this same period wages and salaries were raised 30 per cent.

2. Since 1914 prices of commodities have again risen another 100 per cent. Wages and salaries have also again risen to keep step with the rise.

3. Our duties as postmasters have been materially increased, our responsibilities added to, and the standard of our qualifications raised.

4. The third-class postmaster is usually the only representative of the Government in his town. His pay should be such as to entitle him to the respect and standing due these considerations.

For similar reasons we think the pay of our clerks should be raised too. We think the third-class postmasters should also be given additional clerk help.

1. Because the work in our offices has become much more arduous through the introduction of the parcel-post system and its rapid growth, together with the issuing of insurance and filing of claims for lost mail.

2. Because of the Rural Free Delivery system.

3. Because of the increase of the amount of incoming mail of all classes handled, caused by the advent of the mail-order business and other causes.

4. Because from all prospects the work and usefulness of the postal system is going to be still more increased in the future by aerial and auto service and other work.

We consider the hours of labor should be reduced to eight hours a day and thus brought into harmony with the oft-expressed policy of the Government in all its departments.

1. The hours worked now are usually from 11 to 15 a day.

2. There are at present no specified hours for a third-class office to be open for the public transaction of business.

3. We think sufficient help should be furnished and the hours of work so arranged that no one should have to work continuously over eight hours without extra pay.

We think that post offices, besides being divided into four classes with pay depending on the receipts of the office, should also have a supplementary subdivision, based on the work with additional allowances to be made obligatory and not merely optional, for instance:

1. All offices that are central accounting should be class A, with fixed additional pay and clerk allowance based on the number of offices served.
 2. All offices at railroad junction points doing transfer and separating work should be class B, with additional remuneration.
 3. Offices having star routes originating with them and supplying other offices might be known as class C, with added pay.
 4. Other offices with unusual conditions, as exacting train schedules, large number of rural routes, or with corporations using their offices but not buying their stamp supplies from them, should also have distinct classification with proper consideration.
- We ask the Joint Congressional Commission, at their session at Atlanta, Ga., to give their favorable consideration to these suggestions.

BRIEF SUBMITTED BY JAMES M. BYRD, POSTMASTER, BRANCHVILLE, S. C.

I wish to take this opportunity to thank the Congress for the privilege of presenting you with the requests of the third-class postmasters of South Carolina for increases in salaries and the betterment of conditions generally at offices of this class.

At a meeting of the third-class postmasters of South Carolina held in the city of Columbia, on September 2, at which meeting the conditions as they now exist were very freely discussed and it was decided that they should lay before you the following requests for your earnest consideration, with the hope that you will see fit to recommend their adoption by Congress.

1. That the salaries of all third-class postmasters be increased at least 50 per cent over present rate for an eight-hour day, with pro rata pay for all over eight hours. (That the said eight hours be within 10 consecutive hours.)
2. That third-class postmasters be granted 15 days annual leave with pay.
3. That the assistants pay be 50 per cent of the postmaster's salary as a minimum.
4. That any allowance made or granted on account of extra work or unusual conditions be in addition to that allowed for an assistant.
5. That all increases granted be retroactive from July 1, 1918.
6. That Sunday work be reduced to a minimum.

By way of comment of the requests that the salaries of third-class postmasters be increased at least 50 per cent over present rate of pay I beg to call your attention to the recent statement given out by Bradstreet's on December 9 showing that the cost of living based on the wholesale price of 96 staple articles advanced 1.3 per cent during November and now stand at 131 per cent above the prewar level, or the highest ever known. (These figures are given for a period just preceding the war as the figures are not available for comparison with year 1883 when our present salaries were fixed by Congress.)

Upon close examination it will be found that the cost of living is still advancing at the rate of 1 per cent or more each month notwithstanding that every effort of the Government has been directed against the high cost of living for months.

In a statement made by the National Industrial Conference Board at Boston on October 14 we find that the average weekly earnings increased all the way from 62 to 110 per cent from September, 1914, to March, 1919, for the eight leading industries.

The railroad men, the factory worker and practically every other trade and occupation throughout the country has received increases from time to time. A great many times by strikes and threats of strikes, possibly the postal employees could have taken advantage of the conditions existing during the war and threatened a strike in order to have had their salaries increased.

But they are too loyal and patriotic, and God forbid that they shall ever resort to such methods but let us rather put our trust in the broadmindedness and fair dealings of our Government and its representatives, for a proper and adequate adjustment of our difficulties.

Upon inquiry made at all third-class offices throughout the State it was found that the rural carriers were receiving an average salary of \$1,490 for an average work day of 5.53 hours whereas the postmasters received an average annual of \$1,440 for an average workday of 11.28 hours. (This was before the increase which went into effect on July 1, 1919.) The difference would now be even greater. Is this right when the difference in working hours, responsibilities, etc., are taken into consideration?

What would be the result if in the Army the private received more pay than his superior officer?—or in a business establishment, if the clerk more than the manager? Yet this is the condition that now exists at the third-class offices in this State.

This should not remain so.

We find the postmasters and clerks at first and second class offices, city, rural, village delivery carriers, railway-mail clerks and other employees all working on an 8-hour day (except third and fourth class postmasters and their clerks. Yet they receive smaller salaries than the others.) Suppose we take my office, for example: I am compelled to commence work by 6.30 a. m. and am on duty almost continually until 8.30 p. m., or 14 hours per day, with 7 hours on holidays and 2 hours on Sundays, not even a piece of machinery can keep this up day in and day out. Certainly there should be some relief to conditions like this.

Our request for an eight-hour day with prorata pay for all over eight hours seems to me a most reasonable one. (In this we want the 8-in-10-hour rule to apply.)

Several years ago Congress saw fit to pass an act limiting the working hours of telegraph operators to eight hours per day.

Again, about the time of the outbreak of the late war, Congress enacted the Adamson Law which makes the basis day of railroad men eight hours. (Thus it has twice been recognized by Congress as a working day.)

Isn't it just as important that the postmasters have time off for recreation as the railroad man? Hasn't he been just as loyal? Isn't his duties just as exacting and nerve-racking as other occupations? Certainly they are, and yet we find the banker working from 5 to 6 hours daily 6 days a week and the school teachers 5 hours 5 days a week, and so on.

Yet the third-class postmasters go on and on day in and day out, year in and year out.

That third-class postmasters be granted 15 days annual leave with pay. (This is done in practically every other branch of the Government service—why not extend it to the third-class postmasters?)

That the assistants' pay be not less than 50 per cent of the postmasters' salary as a minimum. Conditions have so changed that the ordinary Negro laborer can get better pay than that allowed for clerks at the larger offices of this class. How, then can we expect the best service? An old saying is that we usually get what we pay for. If we pay poor salaries, can we expect good service?

That any allowance made or granted on account of extra work or unusual conditions be in addition to that allowed for an assistant.

For example, at my office, we have to handle mail in transit for two other offices for which I am allowed \$180 per annum for separations (of course this is extra work), however, this is included in my total allowance for clerical help.

The maximum amount allowed for offices the size of mine is \$600 per annum.

I am allowed for separation of mails, \$180; clerk, \$400; total \$580, or \$20 less than the maximum for handling local mail only.

That all increases be retroactive from July 1, 1918.

In making this request it should be borne in mind that we have been for several years having to bear the increased cost of living out of our meager salaries and when at the outbreak of the war living costs rose by leaps and bounds, the very time that all other salaries were being increased, and the time that we needed an increase to help meet this additional cost of necessities, there came from Washington "Like a bolt from a clear sky" an order that postmasters' salaries would not be increased for the duration of the war, notwithstanding that additional duties and responsibilities were added yet not a murmur went up from the army of postmasters but they did their duty as faithfully as the boys who "Went over the top."

That Sunday work be reduced to a minimum.

There was found among some of the postmasters at the Columbia meeting those who were having to handle mail over a period of from 10 to 12 hours on Sunday. It seems that quite a bit of this could be avoided if proper action was taken by the department, for, several years ago by an act of Congress first and second class offices were allowed to remain closed throughout the day. If this can be done in the cities why certainly it can be reduced at the smaller offices.

The postal service is the only branch of the Government that comes in daily contact with every business and individual throughout the land and is the yardstick by which the Government is measured, the efficiency of the Government is measured by the efficiency of the postal service, therefore every effort should be exerted to keep the postal service upon as high a plane as possible, which can only be done by keeping faithful and efficient employees in the service by making the salaries and working conditions as attractive as possible.

The retirement act will soon be brought before Congress, and I believe that postmasters should by all means be included under its terms as other civil employees for certainly they do not receive compensation sufficient to put aside anything for their old age.

SECOND-CLASS POSTMASTERS.

STATEMENT OF MR. W. B. McCANTS, WINDER, N. C.

Mr. McCANTS. I am a postmaster of the second class. I do everything that these gentlemen here have been talking about that they do. I am the postmaster; I am the janitor when he does not come; I issue money orders; I register mail and do everything in a second-class post office. For that I receive a salary of \$2,000 a year, which I think is not in keeping with the work and the responsibilities.

We sell in that office documentary, proprietary, war savings and thrift stamps, in addition to all denominations of postage stamps. Now, I am liberal in my views. I could live at one time on \$2,000, but I told my friend, Congressman Bell, that I no longer can live on that salary, which is true; and if it were not for the fact that I had been blessed with a small income from other sources I would just have to quit the service and go to work at something else. Of course, I could make more money at something else. It would hardly seem possible that I could do all the work I say I do, but I am not as old as I look. I go to that office about 7 o'clock in the morning and work until 7 or 8 o'clock at night, with a short rest for dinner. I do not get any supper until I close my office, after finishing the day's work, and go home. It seems to me there are no other second-class postmasters who have appeared here, and I judge there are no others interested except myself.

Senator MOSES. That is not so with reference to the whole country, Mr. McCants. They have appeared at other places.

Mr. McCANTS. That may be true, but I realize that second-class offices are not given much consideration, because they are a kind of interim proposition. There are more third and fourth class post offices all over this country than any other kind. The big cities of the country have first-class offices, but when you strike towns like Winder they are second-class offices. Some, of course, have greater receipts than others, but I do exactly the same work in my office, outside of paying vouchers, that Mr. Jones does in the great city of Atlanta. There is not a thing that he has in his office but what is done in mine. The responsibilities are very great, the burden is very onerous, my duties are manifold, and I just appeal to you gentlemen to give all second-class offices an increase, and I am, most respectfully, your humble servant.

STATEMENT OF MR. T. P. McLEOD, HARTSVILLE, S. C.

Mr. McLEOD. I have been instructed to ask for a 25 per cent increase.

Senator MOSES. You represent whom?

Mr. McLEOD. The second-class postmasters of the State of South Carolina. In our meeting at Columbia we were not represented all over the State, but still we had there a representative body of second-class postmasters, and it is not necessary for me to go into detail and tell you all the various duties that have been placed upon us in addition to handling the Postal Service. We have embodied that in our brief and will submit it to you for your consideration.

I just want to state that that 25 per cent was arrived at after a full discussion, but we also recommend that the matter of the various

activities of the Postal Service be taken into consideration when these increases are studied out and recommendations made, for the simple reason that at the various offices the conditions are different. In other words, we do not think it is fair that the salary be placed on a basis of the revenues of the office, for the simple reason that such a condition is not such as to make the compensation of the postmaster just what it should be. In one office we have these various activities and responsibilities of such a nature, while in another office these responsibilities are not present, or they are put off to other departments. They have supervisory officials, etc., to take the responsibilities off the postmaster.

I heartily concur in what Mr. McCants has said about the second-class postmasters whose salaries run from \$2,000 to \$2,500. Along that line, we have to engage in every kind of work in the office. Sometimes I have them calling me up at the office before I go on duty at 8 o'clock, telling me a man is sick, and I have to go on down, and if I can not get a man to put in his place, I have to go out and take his place. I have worked in every department, with the possible exception of having served a rural route. I have all those responsibilities on me, and I particularly ask for an increase because of the high cost of living.

Senator MOSES. Thank you very much; and in the name of the commission, I wish to thank the Postmasters' Association of South Carolina for their moderation in asking only 25 per cent.

The brief referred to follows:

BRIEF SUBMITTED BY MR. T. P. McLEOD, OF HARTSVILLE, S. C.

The undersigned representative postmaster has been duly authorized by postmasters of the second class in South Carolina to appear and present to your honorable commission the arguments hereinafter set forth in their behalf in particular, and a summary in behalf of postmasters of all classes. I therefore beg leave to submit the following:

CHANGE IN STATUS OF POSTMASTERS.

There have been no changes in the classification of salaries of postmasters of the presidential class since March 3, 1883. We believe it will be admitted without question that the conditions surrounding the appointment of postmasters in 1883 were entirely different, both from a service and a personal standpoint, than they are to-day. Under the system as it existed then and for many years afterwards qualification and ability were not considered of first importance, and the appointee was not required to give much of his time to the duties of his office. He was only expected to assume the responsibility of accounting for the funds which came into his hands. In nearly all cases postmasters had other and more lucrative business or employment.

PRESENT CONDITIONS AND QUALIFICATIONS SURROUNDING APPOINTMENT OF POSTMASTERS.

When the present salary schedule was inaugurated in 1883 it was permissible for postmasters to have some outside resources to supplement the pay of their offices and they were allowed, without criticism, to engage in outside commercial activities. In later years, however, the demands of the service have become so persistent as to preclude the possibility of postmasters successfully carrying on any permanent or extensive enterprises, and finally by direct order of the department postmasters must devote at least eight hours a day to their offices, the possibilities of adding regularly to their income by outside endeavor has been reduced to practically nothing.

It will not avail us to go further into detail as to past and present duties of a postmaster, and we only desire to cite enough evidence on this point to forcibly bring to the attention of this conference the fact that we are not traveling along in the same old rut, and that a present-day postmaster is an entirely different official from the old-day postmaster.

The position has increased in importance and in the required duties thereof, but the salary classification has remained unchanged for 36 years.

INCREASE IN DUTIES OF POSTMASTERS.

(a) *General.*—Postmasters' duties were greatly added to by reason of the war, but it is far from our intention to urge any increase in salary or other personal benefits for any war work or activity. We assert that there was no more loyal or patriotic body of men engaged in war work than the postmasters of the United States, and we resent even the suggestion that we have received or now desire to receive any reward whatsoever for the many and diversified services rendered by us.

However, it is a fact that, outside of war work, the post office has gradually become the agency for all other departments at Washington. It is a wonderful system, whereby the Government has a personal representative in every city, village, or cross-roads in the United States. And the usefulness of that system is fast becoming more apparent at Washington. The Treasury Department, the Agricultural Department, the Census Bureau, and the War and Navy Departments are constantly and regularly calling upon the postmaster for information and services. It is almost a daily occurrence to receive a request which reads "by permission of the Postmaster General," for some statistical information, or for some service outside of postal affairs.

(b) *Custodians of buildings.*—Many postmasters of the second class are custodians of post-office buildings. The appointment as custodian comes from the Treasury Department unsolicited, and is entirely outside of the Post Office Department, and not in any way to be construed as a part of the Postal Service or work. The custodian is obliged to supervise the janitor force, negotiate contracts for repairs, additions to the building, annual supplies, etc., and then to supervise the work, make inspection thereof, and certify vouchers. In addition the office is burdened with much correspondence and clerical work.

For all of this the postmaster is not paid. He is compelled to render services as custodian without remuneration except his salary as postmaster.

CENTRAL ACCOUNTING SYSTEM.

The inauguration of the central accounting system affects principally offices of the second class, although there are many first-class offices and a few third-class which have been designated as central-accounting offices. Your commission is probably thoroughly familiar with this system but in order to make this argument complete we will very briefly outline the idea involved, as follows: Formerly every single post office, regardless of class, worked direct with Washington; received their supplies direct and accounted direct. Under the central accounting system practically all communication on the part of the third and fourth class offices with Washington is cut off. Third and fourth class post offices, now known as district offices, make requisition on their central accounting office for all stamps and stamped paper, and make their reports to the central accounting office. This is, briefly, the system as established by the department, but in addition the system has grown to the point where the district offices make the same use of the central accounting offices that they formerly did of the department at Washington.

They apply to the central accounting office for all information desired, interpretation of rules, regulations, and orders, and for advice generally. In addition they make frequent requests to be furnished with supplies and materials. All cash is paid into the central accounting office. It will be readily understood what a wonderful saving this system is to the department, not only in accounting labor, but in relief from almost constant communications from district offices, which may now go to the central accounting office. When the accounts of the central accounting office are audited, it is in effect an audit of all the district offices under the jurisdiction of the central accounting office.

This system necessarily shifts all the burden of this work from the department to the central accounting offices, yet no credit is given the central accounting office and no increase in the salary of central accounting postmasters has been made.

The increase in the duties, utility, and responsibility of the central accounting offices is, in our opinion, so apparent as not to require discussion and we will pass on.

UNFAIRNESS AND IMPROPRIETY OF PRESENT METHOD OF OCCUPATION OF POSTMASTERS' SALARIES.

It is, of course, well known that salaries are now computed on the basis of volume of postal receipts, that is, on the volume of sales of stamps and stamped paper, and that alone.

Your honorable commission is familiar with the salary tables, but for convenience of reference we will quote them at length herein, as follows:

THIRD CLASS.

	Salary.
Receipts of \$1,900 and not exceeding \$3,100.....	\$1, 000
Receipts of \$2,100 and not exceeding \$2,400.....	1, 100
Receipts of \$2,400 and not exceeding \$2,700.....	1, 200
Receipts of \$2,700 and not exceeding \$3,000.....	1, 300
Receipts of \$3,000 and not exceeding \$3,500.....	1, 400
Receipts of \$3,500 and not exceeding \$4,200.....	1, 500
Receipts of \$4,200 and not exceeding \$5,000.....	1, 500
Receipts of \$5,000 and not exceeding \$6,000.....	1, 700
Receipts of \$6,000 and not exceeding \$7,000.....	1, 800
Receipts of \$7,000 and not exceeding \$8,000.....	1, 900

SECOND CLASS.

Receipts of \$8,000 and not exceeding \$9,000.....	\$2, 000
Receipts of \$9,000 and not exceeding \$10,000.....	2, 100
Receipts of \$10,000 and not exceeding \$11,000.....	2, 200
Receipts of \$11,000 and not exceeding \$13,000.....	2, 300
Receipts of \$13,000 and not exceeding \$16,000.....	2, 400
Receipts of \$16,000 and not exceeding \$20,000.....	2, 500
Receipts of \$20,000 and not exceeding \$24,000.....	2, 600
Receipts of \$24,000 and not exceeding \$30,000.....	2, 700
Receipts of \$30,000 and not exceeding \$35,000.....	2, 800
Receipts of \$35,000 and not exceeding \$40,000.....	2, 900

FIRST CLASS.

Receipts of \$40,000 and not exceeding \$45,000.....	\$3, 000
Receipts of \$45,000 and not exceeding \$60,000.....	3, 100
Receipts of \$60,000 and not exceeding \$80,000.....	3, 200
Receipts of \$80,000 and not exceeding \$110,000.....	3, 300
Receipts of \$110,000 and not exceeding \$150,000.....	3, 400
Receipts of \$150,000 and not exceeding \$200,000.....	3, 500
Receipts of \$200,000 and not exceeding \$260,000.....	3, 600
Receipts of \$260,000 and not exceeding \$330,000.....	3, 700
Receipts of \$330,000 and not exceeding \$400,000.....	3, 800
Receipts of \$400,000 and not exceeding \$450,000.....	3, 900
Receipts of \$450,000 and not exceeding \$500,000.....	4, 000
Receipts of \$500,000 and not exceeding \$600,000.....	5, 000
Receipts of \$600,000 and upwards.....	6, 000

From the above table of salaries it should be noted that as the volume of business transacted grows, the percentage of increase in salary is lowered.

The larger the postal business transacted, under ordinary and normal circumstances, the larger the general business of the office, or in other words, the postal receipts are only a barometer, and with their increase there is also an increase in all other departments and divisions of the office. This means an increased force to supervise; increased accounting, increase in incoming mails and deliveries, increased registry and insurance business, and in fact a corresponding increase in the business of the entire office.

As stated these tables take into consideration only the actual postal business transacted. This is really the easiest and most simple of all the post-office work.

One or two clerks can do all of the accounting in your office doing from \$25,000 to \$45,000 business. What are the other clerks doing?

They are looking after the dispatch of mails, receipts of mails, deliveries, money order, registry, postal savings, parcel post, insurance, collections, C. O. D., money-order deposits, handling of supplies, nixie desks, postage-due desk and countless other duties of an office of this size.

All of the above comes under the direct supervision of the postmaster. He must positively see that all of the parts of this great system are properly functioning. For all of this work the postmaster receives no credit whatsoever in the line of compensation.

READJUSTMENT OF POSTMASTERS' PAY.

Since the present schedule of postmasters' pay was formulated the following activities have been introduced and not one of them is directly represented in the receipts, viz: Postal savings, rural delivery, village delivery, central accountancy, parcel post, Government-owned vehicle service, highway express routes, subagencies, supply depots, and last but not least the growing C. O. D. business.

June 30, 1919, the amount of postal savings on deposit was \$148,471,499 in 5,931 offices.

Rural routes were serving 27,290,459 families, or 66,041,404 persons, and cost \$53,166,502. They handled 3,892,927,736 pieces of mail, 43,320 carriers were employed on 43,453 routes, covering 1,127,110 miles.

Eight motor-vehicle express routes, running from January 1, 1918, to June 30, 1918, employed 105 trucks, earning at an annual rate \$430,396.78, of which the annual profit would be \$40,772.08.

In the Government-owned vehicle service, 464 trucks were purchased at an expense of \$774,854.57, making a total of 965 trucks in service.

Central accountancy was established in approximately 2,000 offices.

These are samples of activities that have been added to postmasters' duties and responsibilities that are not in any way reflected in postmasters' pay.

The readjustment of postmasters' salaries for 1918 shows that while the gross receipts for the calendar year ending December 31, 1917, showed an increase of \$27,858,144, the total postmasters' pay as readjusted on these receipts, showed a decrease of \$108,500.

A fair salary schedule would recognize these duties and responsibilities and give compensation for them.

PLAN OF READJUSTMENT OF POSTMASTERS' PAY.

It is impossible to figure a schedule of post-office pay without having a complete tabulation of receipts, and a record of activities as the post office grows, such as mail distribution, domestic money orders, foreign money orders, postal savings, star routes, rural delivery, village delivery, central accountancy, free delivery, depository work, branches of the dead-letter section, subagencies, supply depots, foreign-exchange offices, Government vehicle service and highway express service. Post offices should be reclassified so as to secure a better pay for lower-grade offices than under the present schedule of pay, and a percentage should be added to the pay for each additional activity added to the post-office work in the lower grades.

In applying these percentages it would not be difficult to graduate them into amounts in proportion to the extent of the activity involved, such as added compensation for the supervision of each star route starting from an office, or each rural route, or each hundred or thousand money orders issued, or population served, or each square mile of territory entitled to and given free delivery, or the number of post offices depositing or receiving supplies, or the amount of exchange work done.

All different activities are installed after investigation and permission by the Post Office Department and after further investigation as additional clerk and carrier hire are applied for.

COMPARISON OF POSTMASTERS' SALARIES WITH SALARIES PAID IN BANKING, INDUSTRIAL, AND OTHER BUSINESS CIRCLES.

It should be considered that the post office is simply a great big business, operated upon business principles, and in which business the postmasters are valuable and experienced executives thereof. If comparison is made with the salaries of the more important employees in banking, commercial, and industrial activities, it is really apparent that such salaries are largely in excess of those paid to postmasters.

(a) *Banking*.—Because of the peculiar nature of the banking business, which is practically dealing in dollars, it would be unfair to compare the business transacted in dollars and cents with the postal business. We have also taken into consideration the fact that executive heads of banks are often large stockholders and thereby receive unusual salaries. So, in setting forth our statistics as applied to banking circles we have only considered the salaries paid to cashiers, tellers, etc., who are not the actual heads of the institution, but employees in the commonly accepted meaning of the term.

We have received information from 14 cities concerning banking institutions, which shows that the average salary paid to officials such as described above to be \$5,783 plus.

In considering the above statistics the difference in the character of the employment should be taken into account. In the case of cashiers, tellers, etc., their duties are chiefly ministerial. They are not usually required to exercise any particular degree of discretion. The higher executive heads, the boards of directors, the discount and examining committees, assume nearly all the responsibilities, whereas the postmasters' duties are almost entirely executive, and the exercise of discretion and sound judgment is the first and foremost requirement of the position. The bank cashier and teller are but a cog in the wheel, whereas the postmaster is the power which rotates the wheels of his own office.

CONCLUSION.

(b) *Industrial and business circles.*—In conclusion we desire to urge upon the commission the peculiar position occupied by the postmaster in his respective community. We realize that a public official can not expect to receive compensation from the Government because of duties and obligations outside of his official work, but, nevertheless, the customs and traditions which have grown up around the office of postmaster and which have been countenanced by the Government either officially or unofficially, and which have now become a fixed responsibility, must be considered in arriving at a fair and just compensation for postmasters.

Permit us to refer to the local standing of the postmaster in his community.

To satisfactorily perform these multifarious official and unofficial, though very necessary duties, he must have the respect of his community to commence with, and must retain this respect throughout his tenure of office. In short, the postmaster, to be an efficient official, must "maintain a position," and to do so costs him much money.

As we stated at the outset of this brief, the present salaries of postmasters were fixed 36 years ago, when the receipts of the Post Office Department were \$45,650,624.82 as compared with the receipts of the last fiscal year ending June 30, 1918, which were \$388,975,962.24, which included \$44,500,000 of war postage. This is more illuminating as to the need of a reclassification and readjustment which will increase postmasters' salaries than any other argument we can advance.

I respectfully submit this as our case.

BRIEF SUBMITTED BY J. W. MCGLATHERY, POSTMASTER, HUMBOLDT, TENN.

Representing the postmasters of the second class in west Tennessee, I beg leave to submit the following arguments to your honorable commission in their behalf:

SALARIES RECLASSIFIED.

You are aware of the fact that the salaries of postmasters of the presidential class have not been reclassified since 1883. No other salaried position on record has held its own like that of the postmaster, yet it is not permissible for him to engage in outside business as was formerly the custom. At one time the postmaster's salary was merely an addition to his other earnings, and this was a time when living expenses were at least 100 per cent less than they are to-day. Considering the reduction in income and the increase in expenses we ask, What is the remedy?

INCREASED RESPONSIBILITIES.

In calling your attention to a few of the duties that have been added to the office we wish to be understood that we do not include those duties that were added on account of the war. We have cheerfully done every thing called upon in the way of war work and many of us have connected ourselves with the Red Cross, Y. M. C. A., and other voluntary work.

There are a few postmasters of the second class who are fortunate or unfortunate enough to be in Federal buildings, and to these have been added the responsibility of custodianship. While this is seemingly a position in name only, there are many duties connected with it, such as looking after the janitor force, certifying vouchers, negotiating contracts for repairs to the building, obtaining and submitting proposals for annual supplies, and doing the necessary correspondence. All of this in connection with his duties as postmaster without additional compensation.

CENTRAL ACCOUNTING.

While the central accounting system does not affect all second-class offices there are a few of us who are thoroughly acquainted with the added responsibilities of this system. Before this plan was adopted every post office in the United States regardless of size or class, made direct reports to Washington. In order to show more clearly just what this work means let us take for illustration the county of Gibson, where Humboldt was made the central accounting office with 12 district offices. Each of the 12 district offices makes a quarterly report to the central accounting office, where the reports are audited and forwarded in 1 report to Washington where 1 report must be audited instead of 13 as was formerly the custom. Not only this, but the district offices make all requisitions on the central accounting office for all stamps and stamped paper, including \$200,000 in war savings stamps for 1918, and all proprietary and documentary revenue stamps, thus relieving Washington to the extent that they must fill only 1 requisition instead of 13, and prepare and send only 1 register instead of 13. You readily see that all this work has been transferred from Washington to the central accounting offices, thus adding more work and responsibility, without additional compensation. This is not all, the district offices have been disconnected from Washington so long they do not even apply there for information that is necessary for conducting the business of their offices, but either write or call the central accounting office. In discussing this among a number of central accounting postmasters, the question was asked, How was it ever possible to properly audit the accounts of some district offices under the old plan, when in numbers of cases it has been necessary to return reports for correction as many as five times and write a letter each time, and yet the ruling is that all central accounting offices are expected to get their reports in by the 10th?

This must be a great saving to the department in accounting and labor, and while this work has been handed over to the central accounting office no provision has yet been made to increase the salary of the postmaster.

INCONSISTENCY OF SALARIES AS NOW CLASSIFIED.

With reference to the salary table, we wish to call your attention to the inconsistency of the present plan. We take, for example, the Humboldt office, being an average second-class office, doing a business of \$13,000 and receiving a salary of \$2,400. In order to get an increase in salary of \$100 this office must do another \$3,000 worth of business, for the next \$100 increase in salary it must do another \$4,000 business, and for the next \$100 requires another \$4,000 business, and now to get the next \$100 it will be necessary to do an additional \$6,000 business. By referring to the salary table you will note that the first increase in pay of a second-class office is \$100 when the business increases from \$9,000 to \$10,000. The salary increases from \$2,000 to \$2,100, thereby receiving \$100 for the \$1,000 increase. The office doing a \$24,000 business receives a salary of \$2,600 and to get a raise in salary of \$100 this office must show an increase of \$6,000. In the first case the office that did an additional \$1,000 business received \$100, and in the second case the office that did an additional \$6,000 business received \$100. Again we ask, What is the remedy?

According to the salary tables, the postmaster's salary is based entirely on the postal receipts of the office without taking into consideration the increased business in issuing and paying money orders, registered mail, parcel post (especially insured parcel post), receipt and dispatch of mails, deliveries of mails, both in the city and on rural routes, and many other duties of which the postmaster is held responsible. In addition to all this, the postmaster is required to go over each of the rural routes emanating from his office at least once a year. Still the receipts of the office govern the salary of the postmaster.

You will pardon me for referring to the Humboldt office, but I have a few figures to present and will take advantage of this opportunity. I wish to call your attention to the money-order business of this office for the calendar year 1919; also to the receipts of the office and the number of registers:

Money orders issued, 11,854, amounting to.....	\$68, 836. 15
Money orders cashed, 3,312, amounting to.....	28, 912. 13
Postal receipts.....	13, 156. 28

On account of this office being a central accounting office the following duties are added:

There were 838 official registers sent out without reference to the regular number of registers passing through the office. Of this number of official registers, we can safely say that 800 were requisitions from the district offices.

Stamps and stamped paper furnished the district offices by the Humboldt office the past year amounts to \$21,171.85, which amount represents requisitions from \$1 up.

It was very evident that the department appreciated the fact that this office was handling considerable funds when the postmaster's bond was increased from \$7,000 to \$17,000.

Regardless of the amount of funds handled and the necessity of increasing the bond, the postmaster's salary remains the same.

LABORERS.

BRIEF SUBMITTED BY MR. W. C. CHENEY FOR THE LABORERS OF ATLANTA, GA.

Knowing, by experience, that we constitute a very essential element in making the remarkable showing in efficiency and accomplishment for which this office is noted, and among the most arduous and exacting as well as the most poorly paid of all the classes employed here, and that we have nothing to look forward to without taking other examinations, we respectfully request that, if it is in your power to grant us an increase of at least 20 per cent in our salaries, that you will do so.

The maximum that we can draw per month at present is \$86.25.

We are nearly all men of large families; we feel that it must be apparent to you, gentlemen, that under present conditions it is impossible for a self-respecting man to support himself and family on the above stated amount.

We earnestly hope that as matter of simple justice you will grant the above.

Hon. WM. D. UPSHAW. May I record this as part of the proceedings? I have been detained by insistent constituents in my office all day long nearly, and I was just giving this to Mr. Bell, as the Atlanta chairman.

I wish heartily to indorse the application of the post office employees for an increase in salary. I personally investigated their needs in many cases and find that many of them are embarrassed in their family life because of their scant and wholly inadequate salaries.

I learn also that many of the skilled and experienced employees of the post office are resigning to go into other lines of business because of the low compensation they receive.

I have been in pretty close touch with them and I would like to go on record to the effect that I believe they should get what they ask.

Senator MOSES. There being no further classes of employees to be heard, the commission will resume its hearings at New Orleans on Monday morning, at an hour to be fixed by the secretary.

(Whereupon, at 5.30 p. m., the commission adjourned.)

POSTAL SALARIES.

MONDAY, JANUARY 5, 1920.

JOINT COMMISSION ON POSTAL SALARIES,
New Orleans, La.

The commission met at 9 o'clock a. m., at the Hotel Grunewald, Hon. Edward J. Gay, presiding.

Present, Senators Gay and Moses and Representatives Bell and Steenerson.

SECOND-CLASS POSTMASTERS.

Senator GAY. We will get right down to business this morning and hear first from Mr. Julius P. Hebert, of Morgan City, La., representing the second-class postmasters.

STATEMENT OF MR. JULIUS P. HEBERT, MORGAN CITY, LA.

Mr. HEBERT. Gentlemen of the commission: I was selected by the second-class postmasters of Louisiana to appear before your honorable committee and present a set of resolutions. Embodied in that set of resolutions is a suggestion relative to a change in the present table of salaries. As you know, the table runs from \$2,000 to \$2,900 and it is recommended that these salaries be increased proportionately to from \$2,600 to \$3,800. The present table contains 10 items; the new schedule contains 13 items. The average increase recommended in this table is 33.6 per cent. That is the only thing in our recommendation that is different from anything I have seen.

Senator GAY. What set of resolutions have you there?

Mr. HEBERT. May I read them?

Senator GAY. I mean who passed those resolutions?

Mr. HEBERT. The second-class postmasters of Louisiana.

Senator MOSES. A State association?

Mr. HEBERT. There is no State association. When the department order was issued that the second-class postmasters should send a delegation to attend the hearings, these postmasters selected a committee to draw up these resolutions. These resolutions were submitted to the postmasters afterwards and none rejected them.

Senator GAY. So that they express the sentiments of all the postmasters of the State?

Mr. HEBERT. Yes.

Senator MOSES. Does it also deal with the allowance for clerk hire?

Mr. HEBERT. No, sir. We do not go into that phase of the matter, because so many different conditions arise in different post offices. However, I do not believe there is any source that is as true a barometer of the amount of work done in a post office as the postal receipts.

I have compiled a statement of the receipts—the number of money orders issued, parcels or letters registered and issued, and for the past five years there has been a proportionate increase. (See Exhibit A.) There are conditions in certain offices where they handle a great number of draw sacks or a large amount of special mail, but the department looks after that and should take that into consideration when application is made for additional clerk hire.

Mr. STEENERSON. Do you second-class postmasters count the fees you get on money orders? You get that extra, beside your salary, don't you?

Mr. HEBERT. We don't get any pay for issuing a money order; we are second-class offices. We can not find any reason why a postmaster of the second class should be paid a fee for handling money orders.

Senator MOSES. Should the allowance be a definite fixed one, or should it be left to the discretion of the department?

Mr. HEBERT. It should be left to the discretion of the department; the inspection service. These men come out to the post office and know conditions pretty well.

Mr. BELL. What per cent of the postmaster's salary should the assistant get? What should be his salary as compared to the postmaster's salary?

Mr. HEBERT. I do not know whether my views on that subject would agree with the majority of the postmasters in the State. However, in a second-class post office the duties of an assistant postmaster are almost identical with those of a clerk. I think, though, that he should be paid—if he is given extra work to do—I think he should be paid \$200 more than the highest paid clerk in the office.

Senator GAY. What is the salary you are getting?

Mr. HEBERT. Twenty-four hundred dollars a year.

Senator MOSES. Your postal receipts are how much?

Mr. HEBERT. Sixteen thousand dollars last year.

Senator MOSES. You would go to \$3,200 under this table?

Mr. HEBERT. Yes, sir.

Mr. BELL. What is the salary of your assistant?

Mr. HEBERT. Fourteen hundred and fifty.

Mr. STEENERSON. His basic salary is only twelve hundred.

Mr. HEBERT. Isn't it the law that the assistant postmaster of the first-class office shall receive compensation equal to 50 per cent of the postmaster's salary, and that the department has applied that to the second class?

Mr. BELL. The basic salary is thirteen hundred.

Mr. HEBERT. The postmaster's salary was increased a hundred dollars, but the assistant could not get it, but I don't believe that the assistant postmaster's promotion should be withheld whether the postmaster's salary is increased or not.

(The resolution referred to follows:)

Whereas a Joint Commission on Postal Salaries has been appointed by Congress and charged with the duty to investigate salaries of postmasters and postal employees, and to reclassify and readjust such salaries on an equitable basis; and Whereas the salaries of second-class postmasters, classified in 10 grades and fixed by the act of Congress approved March 3, 1883, are inadequate and insufficient in view of the present high cost of living, which has been recognized in the adjustment of salaries by employers in the commercial and industrial world; and much less than is paid for similar service in the commercial and industrial world; and

Whereas it is essential that the second-class postmasters must possess the same executive qualifications and clerical ability, together with a measureable knowledge of accountancy for the proper discharge of the duties devolving upon them; and supply the positions with the same mental equipment, as required of the management of the average commercial and industrial enterprise, or banking institution in the community served: Therefore, be it

Resolved by the committee of three delegates representing the second-class postmasters of Louisiana, That we recommend to the Joint Commission on Postal Salaries that in lieu of the present 10 grades of salaries running from \$2,000 to \$2,900 there should be provided the following 13 grades of salaries, to wit:

Gross receipts:	Salary.
\$8,000 and not exceeding \$9,000.....	\$2, 600
\$9,000 and not exceeding \$10,000.....	2, 700
\$10,000 and not exceeding \$11,000.....	2, 800
\$11,000 and not exceeding \$12,000.....	2, 900
\$12,000 and not exceeding \$14,000.....	3, 000
\$14,000 and not exceeding \$16,000.....	3, 100
\$16,000 and not exceeding \$18,000.....	3, 200
\$18,000 and not exceeding \$20,000.....	3, 300
\$20,000 and not exceeding \$23,000.....	3, 400
\$23,000 and not exceeding \$26,000.....	3, 500
\$26,000 and not exceeding \$30,000.....	3, 600
\$30,000 and not exceeding \$35,000.....	3, 700
\$35,000 and not exceeding \$40,000.....	3, 800

MEMORANDUM.

It is well to note that the salaries of postmasters were classified and adopted more than 30 years ago, and have up to a few years ago represented a fair remuneration for the services performed, and were measurably adequate to the then living conditions. During the past few years conditions of living costs have changed upward so rapidly as to render the existing basis of compensation inadequate and insufficient.

Under prewar conditions second-class postmasters were called upon to render services relating solely to the receiving and dispatching of mails and other work absolutely correlated. The accountancy problems and other responsibilities were confined to the postal, money-order, and postal-savings accounts; and the registry, insured, and C. O. D. business.

The exigencies of the war have added to this work many new responsibilities, until to-day they not only perform prewar work, but have been made the medium through which the Government conducts business in activities entirely outside the scope of the prewar work of the Postal Service.

To-day the second-class postmasters act as the distributing agents of the Government, serving the Department of Justice, the War Department, and more particularly the Treasury Department in the selling and accounting for war-savings stamps and thrift, documentary, and proprietary war-tax revenue stamps, and are called upon for information by the Bureau of War Risk Insurance in many instances, all of which draw upon the postmaster's time. These added responsibilities, although of much magnitude, were welcomed by the second-class postmasters, because they felt that it meant the placing of added confidence in their ability to handle any responsibility placed upon them by the Government; but like all men, in all walks of life, they feel that added responsibility calls for added remuneration.

CITY LETTER CARRIERS.

Senator GAY. The next on the list is Mr. H. A. Christenberry, who is allotted five minutes.

STATEMENT OF MR. H. A. CHRISTENBERRY, NEW ORLEANS, LA.

Mr. CHRISTENBERRY. I had planned from the very beginning, gentlemen, to make my appeal brief. With the short paper that I had prepared I thought I would say just a word or two.

One of the first things I will say is with regard to the high cost of living. I don't care to base our appeal on what men in other lines are receiving. But it is a fact that we should get a better wage than we are receiving. You gentlemen know if you had to depend upon the salaries you are getting you would have a hard time getting along. I entered the service 19 years ago, and in all that time I have been engaged in outside work after hours.

Senator GAY. How long have you been a carrier?

Mr. CHRISTENBERRY. Nineteen years. From the beginning I started doing outside work.

Senator GAY. How many increases have you had?

Mr. CHRISTENBERRY. I received the regular promotions.

Senator GAY. Have you had any since?

Mr. CHRISTENBERRY. I had one in July.

Senator GAY. That was the one Congress passed?

Mr. CHRISTENBERRY. Yes, sir; the temporary bonus.

Senator GAY. What do you get now?

Mr. CHRISTENBERRY. Sixteen hundred and fifty dollars. I want to add right there, that I had a son 20 years old who is getting more pay than I am, although I have been in the service all these years.

Senator GAY. About what increase do you think would be right?

Mr. CHRISTENBERRY. I think there should be three grades; eighteen hundred, twenty-one hundred, and twenty-four hundred.

Senator GAY. That is the concensus of opinion of all the places we have visited.

Mr. CHRISTENBERRY. I believe the substitutes should also be credited with the time they have served. During my period as a substitute I made an average of \$30 a month.

Mr. BELL. You mean they should have time off for the time they serve over eight hours?

Mr. CHRISTENBERRY. No, sir; I mean when they get a regular appointment that they begin at the grade the time they have put in would entitle them to. I would like also to mention overtime. I have in mind a man who made 80 hours—80 to 89 hours overtime this past month. That overtime becomes very hard and tiring and the men can not stand it. That is why we asked for an 8-hour day many years ago. In an emergency, of course, the men do not object to it. Some of the men take pay for the time they should have off on holidays, but I want to tell you that it is hard on a man's constitution to have to put in overtime after working for eight hours; it is hard to work the overtime we have been compelled to work the past few years.

Mr. STEENERSON. What is the difference between working overtime and working on the outside?

Mr. CHRISTENBERRY. We go home, bathe and rest up, and it is not laborious work.

Mr. BELL. And it is also a relief?

Mr. CHRISTENBERRY. Yes, sir. I did a salesmanship business, which is not laborious. I would like to touch on the quality of the men we are getting in at the present salaries. It is not sufficient to attract men into the service of the right caliber. We are getting men that seem to have been picked up off the street. One day this past week the foreman told one man he would never make a letter carrier. This man had a bag (of mail) which he figured was too heavy and went to the foreman and told him he couldn't carry it. The foreman told him he would never make a carrier. That shows the quality of men we are getting under present conditions.

I don't know whether you want to hear anything about the sanitary conditions of the post office.

Senator GAY. Yes; we are glad to hear it.

Mr. CHRISTENBERRY. The sanitary conditions are deplorable.

Senator GAY. In what station.

Mr. CHRISTENBERRY. Station B. I am not complaining. I have been told that nothing can be done on account of the lease that has been signed.

It is about 35 blocks above the center of the city; about 20 minutes ride. The toilets are just adjoining the lunch room, and our lunch has to be eaten in the same room. A man will be sitting there eating his lunch and others will be sitting on the toilet. It has been reported time and time again. I took it up with the sanitary department of the city, but never got any results.

Mr. STEENERSON. Why don't you take it up with the postmaster?

Mr. CHRISTENBERRY. It has been taken up with the postmaster.

Mr. STEENERSON. And he hasn't done anything?

Mr. CHRISTENBERRY. No, sir.

(The brief referred to follows:)

BRIEF SUBMITTED BY H. A. CHRISTENBERRY.

In representing the carriers of the New Orleans (La.) Post Office, I beg to submit the following facts and suggestions:

If carefully-prepared statistics furnished by the National Industrial Conference Board can be taken as accurate, the cost of living has increased 71 per cent on account of the war. Thus, an individual who was receiving \$100 a month in 1914, must now receive \$171 a month to live as well as he did then.

Notwithstanding this fact, postal employees have received very little increase in salary during this period, and it is well known and commented upon throughout the country, that the pay of postal employees has not kept pace with the cost of living, nor with the pay of men in other walks of life doing similar work.

While we do not care to base our appeal altogether on the pay received by others, we, at the same time, feel that as Government employees, we should be paid a salary that will enable us to support our families, giving them the same benefits and pleasures as those employees working for private corporations or individuals. We are compelled to undergo a mental and physical examination; also our moral reputation should be above reproach, yet there are thousands of men all around us who have not the qualifications necessary to enter the Postal Service, receiving more pay for the same number of hours of labor, besides time and one-half and double time for overtime.

I use the word "labor" in the foregoing paragraph advisedly, as comparatively few people are aware of the strenuous labor involved in performing the duties of a letter carrier. We go willingly, not grudgingly, through snow and rain, cold and heat and it is often impossible or impractical to protect ourselves against these hardships, on account of the heavy packs we are compelled to carry, often reaching a weight of 60 to 75 pounds.

It takes several years to become an efficient letter carrier, and I believe this fact should be given earnest consideration by your honorable body. We do not think it necessary to take up your valuable time by going further into the increased cost of living expenses, food, clothing, recreation, etc., while numerous instances could be cited; we feel that you are thoroughly acquainted with the existing conditions along these lines. But taking a few items from my personal experience, I beg to submit that I had to resort to the expediency of borrowing money to send one of my sons to school, an act which, of course, I do not regret, as by strict economy and doing outside work, I have been enabled to repay this sum. I can also state that I am to-day wearing the same winter suit purchased three years ago, and have bought no other woollen suit for my use since that time.

The salaries of postal employees were fixed by Congress in 1912, and there is not a man or woman to-day who doesn't realize that what he or she earned seven years ago does not come, by half way, of meeting expenses of living to-day.

We would respectfully suggest that you give earnest consideration to the enactment of a reclassification law for letter carriers carrying the following increases:

First grade salary	\$1,800
Second grade salary	2,100
Third grade salary	2,400

Permit us at this point to offer a plea in behalf of the substitute letter carrier, due to the broken hours, shifting of work from one route to another. The poor pay they receive and the number of years they must work before receiving a regular appointment, makes their lot a hard one, and the position very unattractive. They serve from two to five years, and when finally receiving an appointment, must begin at the lowest salary, not being given any credit for time served as substitute.

We earnestly request that you give consideration to the enactment of a law that will guarantee to them a salary of not less than \$100 per month, and that will give them credit for time served as substitute when appointed to a regular position.

STATEMENT OF MR. NORTON H. BAILEY, DALLAS, TEX.

Mr. BAILEY. I am sent here by the carriers of Dallas, Tex., to represent them. I want to say now that this is something we have been wanting for years; the right to appear before a committee of Congress and lay our case before them.

The men in Dallas are paying my expenses pro rata, so that I can come here and ask you gentlemen to give us a salary that we can live on. Conditions are such now that the men are compelled to work on the outside; they are compelled to go out and get clerical work or anything, and the hardest proposition of it all is that the children are forced to quit school, deprived of an education, so that they can go out and work. That hurts all of their future years.

Senator GAY. What do you get?

Mr. BAILEY. Personally I draw \$1,650. I have been in the service 13½ years.

Senator GAY. What is the average salary?

Mr. BAILEY. The average? I couldn't tell you. It commences at twelve hundred and goes up to sixteen hundred and fifty.

Mr. BELL. How many carriers have you in Dallas?

Mr. BAILEY. One hundred and fourteen. In the last four weeks we have had four on the substitute list. Before that we had not one. As soon as they were appointed a substitute they were appointed to the regular force if they showed any real ability at all. Right now is the only time we have had an eligible list for some time. We have had to take men from any place. This summer we went out to one of the office buildings and got one of the elevator men and put him on that route.

In sending out questionnaires we found that the average family was three to five, and the average expenditures were \$122.92 more than the highest salaries paid by the Government. Some of the men are working in stores or anywhere they can obtain work. Since 1907 we have had a 37½ per cent increase, from \$1,200 to \$1,650, and in the same length of time the living expenses have increased 87½ per cent.

I would like to call your attention to five men who left the service in the last six months. Of these five, none are making less than 50 and some over 100 per cent more than they did in the service. One is in the insurance business, another in a grocery store; another is running a bakery and still another is with his father in a general merchandise store.

There have been some bad postal laws passed from time to time. In 1906 or 1907 there was a ruling passed—the 30-day law. A regular carrier could work 30 days and lay off the 31st day and draw full salary. The substitute at first received his pay, but later had to refund it. There are several cases in the Dallas office where the substitute did the work on the 31st day and got no pay. Another thing, on a holiday a clerk can lay off on one of these seven specified days and receive full pay. A carrier, provided the schedule calls for work, does not receive pay, although he has the privilege of receiving compensatory time. If he doesn't work he doesn't receive either compensatory time or pay.

I would like to ask you to correct a wrong. A man who was entitled to his automatic promotion on July 1, 1918—a man getting \$1,100 and who was entitled to his promotion on July 1—but at that time the automatic promotion was cut out and he received the \$200 bonus, and that classed him as \$1,100 instead of \$1,200. A man coming up for promotion in January is pretty well taken care of. He has no real kick like a man that came in at another time.

Senator MOSES. Do you know any way we could compel the postmaster to do what we wanted him to do; what it had been our intention to have him do?

Mr. BAILEY. I do not.

Mr. BELL. That was fixed by law.

Senator MOSES. You mean the \$200 increase joker.

Mr. STEENERSON. That fell in the limitation that no one should receive more than \$200.

Mr. BAILEY. Don't you think the man who had worked for a year was entitled to his automatic promotion?

Mr. BELL. I think in a case like that he should; but there were few of those.

Mr. Bailey submitted the following brief:

BRIEF SUBMITTED BY NORTON H. BAILEY, DALLAS, TEX.

In taking advantage of your permission to submit in writing a further statement of our position on the question of adequate salaries for postal employees, I will endeavor to confine myself to a simple statement of conditions at present affecting the working conditions of the letter carriers of the Dallas, Tex., post office, and will try to avoid any unnecessary statistics regarding general advances in cost of living, etc., as your honorable body is doubtless fully informed along these lines already.

NEED OF THE LETTER CARRIERS FOR AN ADEQUATE SALARY.

When the automatic salary law was passed in 1907, Congress gave to the postal employees what was rightfully considered an adequate salary under conditions such as then existed. The carrier then drawing the maximum salary and who was immediately promoted to \$1,200 had little cause for complaint for several years; the carrier drawing less, or just entering into the service, fared not so well, as you will recall that shortly thereafter there began a steady increase in the cost of living, which very nearly, or quite amounted, from year to year, to as much as the yearly increases, especially when considered in connection with increasing family obligations, and the sharp increases in 1915 rendered the situation serious.

This sets forth very clearly the fact that for the man entering the service during the past 12 to 15 years has had no "years of plenty" to enable him to lay by for the lean years, but has been living from year to year in the hopes that conditions will be better next year.

From 1915 to the present year we have had increases in salary from time to time, totaling 37½ per cent, but during this same period the cost of living in Dallas has increased far in excess of this amount, the total increase for Dallas being reliably estimated at 88 per cent. Thus, "the last stage is worse than the first."

The Dallas Letter Carriers' Branch appointed a committee to gather information regarding the living expenses of the individual carriers in the Dallas office. The committee conducted a painstaking personal investigation to learn, as near as possible, what each carrier's actual living expenses were, exclusive of money spent for pleasure, recreation, or unnecessary expense. The data thus gathered was carefully verified and averaged, and the record so compiled would show that the carrier with a family of from three to five, even at the maximum salary, is at present spending for actual living expenses \$122.92 more than he can earn from the Government.

The largest family reported contained 11 members, with a monthly expense of \$256.50. On account of the unusual size, this was not included in the general average.

Aside from payments on homes, only two reported any saving per month out of their salary.

From reports submitted, at least 30 per cent of the carriers are doing some form of work outside of carrying mail to piece out their incomes. In a great number of cases the wife or some other member of the family is working. A number reported that they were renting out part of their homes to help meet expenses. It was also evident, from personal conversation with the various carriers turning in reports, that practically every carrier with a family was either earning some outside income, to the detriment of his efficiency in the service, or piecing out his income with borrowed money or credit, to the detriment of his peace of mind, efficiency, and good health.

The committee felt that the reports submitted represent the actual facts as requested, without exaggeration, as a number brought their monthly bills or canceled checks to support their statements.

Comparison of wage scale with that of other skilled workers:

From the secretary of the Central Labor Council the information was obtained showing the wages paid the different crafts to range from \$5.50 to \$9 per day, the greater number of trades drawing \$7 per day; unskilled day laborers average \$3 to \$4.50 per day.

This comparison is offered only because it is necessary for the letter carrier, earning \$1,200 to \$1,600 per year, to buy his living in open market in competition with these workers drawing an average wage of \$2,000 per year.

It was impossible, in the opinion of this committee, for a letter carrier to live decently and raise and educate a family on less than a minimum of \$1,800, with a maximum of \$2,400 per year, to be reached in three grades, and to avoid hardships and increasing indebtedness this relief should be available by July, 1920; in fact, it should be available as soon as possible.

GOVERNMENT NEED FOR EFFICIENT SERVICE.

From the standpoint of the best interest of the service it is absolutely essential that adequate measures be taken promptly to put the service back on its old footing of efficiency and dependability. That the quality of the service has deteriorated is a fact plain to anyone having even a superficial knowledge of conditions. This is not necessarily to be attributed to any difference in the management of postal affairs, but rather to the inferior quality of service possible to obtain at the present salaries paid. This does not mean that the older carriers in the service are not giving the best service possible, as the records will clearly show, but from time to time these efficient men are being forced to quit the service to secure more remunerative work elsewhere. Their places are being filled by men not nearly so well qualified for the work, and the service suffers.

A fair estimate of the kind of men now seeking service in the post office may be had by a study of the recent examinations, in Dallas as elsewhere, where, in spite of the fact that the examinations have been made easier, only a few of the large number of applicants make a sufficient grade to pass, and only a portion of those who pass will accept appointment when learning the true conditions, both as to salary paid, the necessity to serve as a substitute, to learn routes without recompense, and the requirement of having to always report for duty at 6.30 a. m. whether assigned to a route or not. At the present time, the Dallas office is almost entirely dependent on emergency help, which is both hard to get, and, for most part, poor in quality.

Every letter carrier worthy to be in the service has a sincere interest and love for the service. He wants, and does, render the best work possible, taking a personal pride in satisfying both the requirements of the department and of the patrons on his route, but he realizes that he is but one of a number, and that if good, efficient men are to be secured to bring back the Postal Service to its former high state of efficiency, and to maintain same, a sufficient salary must be paid to attract and hold good men.

STATEMENT OF MR. L. M. FIFE, MONROE, LA.

Mr. FIFE. Gentlemen of the commission, I appear here in behalf of the Monroe letter carriers at large. I believe we are receiving far too low a scale of wages. Of course on account of the increased cost of living, the wages paid to letter carriers does not make the position an attractive one to the man on the outside. We have no eligible list. We have only five carriers there now, of which three are regulars and the other two have been unable to pass the examinations. There is no man on the eligible list that can fill a vacancy. In our office there is no possible chance for the carrier who wishes to make a transfer to transfer to the clerical force.

There is no comparison between the wages paid to-day in the Postal Service and the wages paid in outside employment. With the last increase we received of 10 per cent, it only gave us a 35 per cent increase since 1907, whereas the cost of living has increased 83 per cent. That is all I have to say, gentlemen.

Mr. Fife filed the following brief:

BRIEF SUBMITTED BY MR. L. M. FIFE.

On behalf of the letter carriers of the Monroe, La., post office, and the letter carriers in the Free Delivery Service in the United States at large, I ask permission to submit this brief.

In submitting this brief, an argument in favor of increased salaries for postal employees, I wish to set forth the following reasons for same:

1. The qualifications necessary to take a civil-service examination to enter the Postal Service are rigid, and one must be of unusual intelligence, as well as having attained a high-school education in order to successfully pass same. He must pass a rigid physical examination as well as mental, and be of good moral repute. Then, after having passed the examination, his name is placed upon the eligible register and appointment made according to percentage. Appointments are made to the position of substitute, and often substitutes serve an indefinite period, and in the past received 40 cents an hour, only recently receiving an increase to 60 cents an hour. Letter carriers work on an average of 10 years before they reach the maximum grade.

2. During the past five years the cost of living has increased more than 80 per cent. Five years ago and since, the actual necessities of life could be bought for less than half the price paid to-day; to wit: Food, shoes, clothing, etc. Bacon then was 10 and 20 cents per pound; now is 40 and 65. Compound lard was 10 cents per pound; now, 28 and 30. Shoes we wore then cost approximately \$3 per pair; are now retailing for \$7 and upward. Cost of half-soling shoes was 60 cents per pair; now amounts to \$1.50. Uniforms that we bought six years ago for \$11.25 have now advanced to \$24. Shirtwaists were 70 cents; are now \$1.50. Five-room houses now rent for \$35 per month, as compared with \$15 five years ago.

3. During this same period of time the wages of employees in private industry were raised as the cost of living advanced. Letter carriers have only received a temporary increase, including bonus, of 35 per cent since 1907. It will require an increase of not less than 40 per cent to the present scale now in effect to place salaries for letter carriers on a prewar basis.

4. Mechanics and unskilled laborers are better paid than the trained employees in the Postal Service.

5. It requires an income of \$1,800 per annum to purchase the actual necessities of life for a family of five, according to a late report of the Bureau of Statistics of the Department of Labor.

6. We feel that service efficiency is menaced greatly and seriously by the inadequacy in the salaries paid postal employees, and beg to assure you that it is not possible for postal employees to properly maintain their homes, rear their families, meet their other obligations such as church, civic, social, and fraternal.

7. It is not the desire of the rank and file of the letter carriers in the delivery service to desire an increase in salary for the sake of accumulating money or to gain profit from the fruits of their labors. They merely ask that in return for their devoted duties and loyalty to the service that they be given a sufficient salary to enable them to provide food, clothing, and shelter for their families.

8. In view of the above statements of facts, it is suggested that the commission give earnest and serious consideration to the enactment of a reclassification law for letter carriers as follows: First-grade salary, \$1,800; second-grade salary, \$2,000; third-grade salary, \$2,200; fourth-grade salary, \$2,400.

STATEMENT OF MR. GEORGE E. WALLACE, WACO, TEX.

Mr. WALLACE. Gentlemen, I desire to present to you, as near as I can, the conditions existing in Waco, Tex., and bring them to your attention. The conditions in Waco and the central portions of Texas are very much like the rest of the country, except where abnormal conditions exist. I have only two sheets of a brief, but I have some other papers here that I desire to file.

Of course you gentlemen are well aware how appointments are made. First a person must take a competitive examination and he must make a grade of 70 to pass. Then he is appointed a substitute. At the present time substitutes are receiving 60 cents an hour, which, thanks to you gentlemen, is fair pay provided they get the work to do. There are days that they do not get work.

I want to lead up to the fact that the carriers work from 7 to 10 years before they get the maximum salary. I entered the service 25 years ago last September. I received \$600 for the first year. After the first year I received \$850, the maximum salary in the second class at that time. It is a long road up to the maximum salary and oftentimes unless a man augments this on the outside his financial standing is pretty rough; he gets in a desperate condition. If it were not for a good friend in the city in which I live I would have a hard struggle. Of course you can ask the question, "Why do you stay in the service?" It appeals to me and I have been hoping for better conditions, but now I am getting older and am confronted with the condition that I have come to the point where, being a man that works for a salary, I would like to have a little above my living expenses to lay aside.

Senator MOSES. Are you now receiving \$1,650?

Mr. WALLACE. Yes, sir. A man must pay his just debts; he must live right, especially in the post-office service. His moral reputation should be beyond question. You go out to people every day, to their homes, and your reputation should be first class.

We can not possibly get men to come into the service. I am a member of the local civil-service board and I want to call your attention to this paragraph from my brief:

Postal salaries at present are so unsettled that few, very few, men are taking the examination. Only five men, two for clerk and three for carrier, took the last examination. Two of the three that passed for carrier have turned down the offered appointment as substitute and at present our carrier list is completely exhausted, with only one substitute for 27 men.

Gentlemen, a condition like that is utterly out of the question. I have here and will file with you statements from three or four different men who served as substitutes from four to five years, and one received an average of \$20 a month during that time. Here is another that served four years and received an average of \$40; another \$35.

Mr. STEENERSON. You spoke about these substitutes not working all the time. If I recollect, when we had that 60 cent proposition up before Congress we figured that if the substitute worked 300 days during the year he would make \$1,440, which was more than the clerks or carriers. Are there any cases of that kind?

Mr. WALLACE. It is a rare thing. In many cities of the smaller size that condition does not exist and the substitutes will not work over half and, in many cases, a third of his time.

(The brief referred to follows:)

BRIEF FILED BY MR. GEO. E. WALLACE, OF WACO, TEX.

The city letter carriers of Waco, Tex., desire to submit the following brief:

(1) The person who enters the post-office service should have a fair education, enough so that he be qualified for the work.

(2) Applicants for post-office positions are required to take a competitive examination which requires a grade of 70 to pass and are then placed on the eligible register according to grade.

(3) Appointments are made to the position of substitutes.

(4) Substitutes are paid at the rate of 60 cents per hour for the actual time they are employed. Substitutes serve for an indefinite period of time, often as much as four years or more, and their average earnings are very small.

(5) At the time of appointment to a regular position they start at the lowest grade.

(6) Letter carriers work from 7 to 10 years before reaching the maximum salary. In that time their record must be first class and the making of this record is often subject to the whims of some supervisory officer.

The foregoing is a brief summary of a carrier from the time he enters the service until he reaches the highest grade.

You can see, or at least imagine, the struggle a man has in maintaining his self-respect and reputation from a financial standpoint.

The facts are, coming from one who knows, the long road to the top often places a man in such position that it takes other long years to wipe out, and a reputation is often ruined during this struggle so far as finances are concerned. The letter carrier's reputation in all respects should be first class because of his close touch with the public, and because of the letter carrier's close touch with the public and his constant going in and out of the homes of the people, it is our opinion that the Post Office Department and Congress should not undertake to put a lower estimate on his value as a postal worker than other postal employees. The facts are that other than the stamp, registry, and money-order clerks, the letter carrier's responsibility is much greater than the ordinary clerk because he is required to handle registers, c. o. d. parcels, war savings stamps, etc.

We feel that the letter carrier is discriminated against because of the fact that in almost every instance supervisory positions are given to clerks. Supervisory posi-

tions in the carriers' department are given to clerks who never carried a pouch and who can have but a small idea as to the duties required of letter carriers. Against this practice we enter a solemn protest, and respectfully ask the commission to place letter carriers on the same basis as clerks.

The carriers of Waco, Tex., are only asking for a wage scale with which they can maintain their self-respect and enable them to care for their families in a proper manner and enable them to do their duty as citizens in the community in which they live.

The holidays and year just past have brought out the fact that many large corporations, banks, mercantile establishments, and others have given bonuses to their employees, amounting to large sums of money, and this in addition to a raise in salary.

Postal salaries at present are so unsettled that few, very few men are taking the examination. Only five men, two for clerk and three for carrier, took the last examination. Two of the three that passed for carrier have turned down the offered appointment as substitute, and at present our carrier list is completely exhausted with only one substitute for 27 men.

I am filing with the commission statements from men who have served as substitute carriers in this office; these statements are as nearly correct as possible and speak for themselves.

STATEMENT OF MR. WALLACE W. TAYLOR, WACO, TEX.

Mr. TAYLOR. I am representing the smaller offices of Texas that could not pay the expenses of a representative to New Orleans. I have here a statement from Wichita Falls. In the last two years they have had five resignations and four transfers in the regular carrier force. There have been about 60 temporary carriers who have quit. There have been 10 applicants in the last three examinations that they held there, and of those 10 applicants only 3 were accepted.

I have also a letter from Denton, Tex., from the secretary of the civil service board, which states that they were forced to call an examination for help and that the only men who responded were men who could not possibly pass, and even if they had passed—"they are men who are too sorry to work, because if they wanted to work they could go right out here and after a few hours' ride get three times as much as our Government is willing to pay."

I have various expense accounts of the carriers, which I am including with my brief. (On file with the commission.)

In Dennison, Tex., four regular carriers have quit the service and have no substitutes. I have a letter from a carrier in Abilene, Tex., which reads as follows:

I began work in the service July 1, 1914, had my regular promotions, but on July 1, 1918, on account of my promotion period coming in the new year, I could only receive \$100 of the \$200 bonus as no one could receive but a \$200 advance in salary. That gave me \$1,300 for my fifth year.

Now this being my sixth year, I figure I am in the sixth grade, having been entitled to promotion each year, and should receive \$1,500. They seem to think here I will only get \$1,400. Now a carrier just three months ahead of me got his advancement to \$1,200 on April 1, 1918, and of course received the full benefit of the \$200 bonus. We are in the same year of service, the sixth year, and I claim I should be advanced to the same grade as he is, \$1,500. Am I right?

The subs now are getting 60 cents an hour. I was talking to a man the other day and asked him if he would take a job in the service, and I told him that he would get 60 cents an hour, and he said, "When you pay eighteen hundred dollars, I will consider it. Otherwise, nothing doing."

Mr. STEENERSON. A substitute getting 60 cents an hour gets \$1,497.60 a year if he works full time, but if he was appointed a regular he would get only \$1,000 and \$200 bonus; total, \$1,200.

Mr. TAYLOR. If he works all the time.

Mr. STEENERSON. I mean the regular carrier; the regular carrier gets twelve hundred including bonus.

Mr. TAYLOR. I don't get the question.

Mr. STEENERSON. He gets \$1,000 salary and the \$200 bonus. That is the lowest compensation for a carrier. But, if a substitute works all the time he gets \$1,497.60, so that when he is appointed a regular, he gets \$297.60 less than he did as a substitute. Does that present a cause for grievance?

Mr. TAYLOR. Yes, sir.

Mr. STEENERSON. The Government would save \$297.60 by making him a regular carrier.

Mr. TAYLOR. Yes, sir, but they will not accept a regular appointment with the low entrance salary of \$1,200, including bonus.

Mr. Taylor filed the following brief:

BRIEF SUBMITTED BY MR. WALLACE W. TAYLOR.

The city carriers of Texas desire to submit the following brief:

1. The person who enters the post-office service as a city carrier is required to fill out an application for examination and must have two vouchers to sign same, also five names and addresses, preferably employers, who have knowledge of his character, experience, and ability; and the persons named must be in addition to those that signed the vouchers. He should have a fair education, enough so he is qualified for the work above the average man.

2. Applicants for city carriers are required to take a competitive examination, which requires a grade of 70 to pass, and are placed on the eligible register according to grade.

3. Appointments are made to the position of substitutes, and they are paid, or have been paid, at the rate of 35 and 40 cents per hour, but now receive 60 cents per hour for the actual time they are employed. Substitutes serve for an indefinite period of time, often as much as four and five years, and are required to report for duty every day, and their average earnings are very low.

4. We believe that the time a substitute letter carrier serves should serve as a factor toward his promotion, and if he has served four or five years he has served his apprenticeship and should go to the top grade. When a substitute is appointed a regular carrier his salary is \$1,200 per year, and it often takes from 7 to 10 years to reach the maximum grade, and in that time his record must be first class, and the making of the record is often subject to the whim of some supervisory officer.

5. You can, at least, imagine the struggle a man has in maintaining his self-respect and reputation from a financial standpoint. These facts are coming from one who knows the long road to the top, and it often places a man in such position that it takes other long years to wipe out, and a reputation is often ruined during this struggle, so far as finance is concerned. Letter carriers' reputation in all respects should be first class, because of his close touch with the public and his constant going in and out of the homes of the people. The letter carrier is the Government's representative to the individual family, and our opinion is that the Post Office Department and Congress should not undertake to put a lower estimate on his value as a postal worker than other postal employees. Letter carriers' responsibility is much greater than the ordinary clerk, because he must keep up with his own route, all orders and forwarding orders, and his desk partner; also required to handle registers, c. o. d. parcels, and sell thrift and war stamps, etc.

6. There is prejudice against the letter carriers, and in almost every instance supervisory positions are given to clerks. Supervisory positions in the carriers' department are given to clerks who never carried the pouch and who can have a small idea as to the duties required of letter carriers.

We think every one should have equal opportunity for promotion to any position he is qualified to fill, and a substitute carrier can hope some day, if he has the ability, to become the head of the office that he entered or any other office.

7. The carriers of Texas are only asking for a wage scale with which they can maintain their self-respect and enable them to care for their families in a proper manner and enable them to do their duty as citizens in the community in which they live. The Government statistics on American standard of living for a family of five is a minimum of \$1,800. The carriers should receive the same compensation we received

years ago, based on the purchasing power of the dollar, and prices are still advancing. The minimum should be \$1,800 and maximum \$2,400.

8. Service is what you are considering, and the men coming into the service, but don't forget the old veterans that made the service what it is to-day, and unless you pass some sort of retirement legislation you will continue to have inefficiency in the service.

STATEMENT OF MR. E. W. SANCHEZ, BATON ROUGE, LA.

Mr. SANCHEZ. Gentlemen, these gentlemen who have preceded me have touched on the salary proposition, but I think there is something else that we are in need of that is almost as important as is the salary question. I am referring to the vacation proposition. We only get a 15-day vacation, whereas all the other branches of the Government get a 30-day vacation and 30 days' sick leave in addition. We do not get any sick leave. If we are sick we suffer; it comes out of our pay. I do not think that is fair. I do not think it is right that the Government should recognize this as one of the necessities of life for the other branches and not for us. We should be put on the same plane as they are. We take a civil-service examination the same as they do, and there should be no discrimination between us.

We have the hardest time in Baton Rouge to get people to take the examination. We have had about 137 per cent resignations there, and have to hold examinations frequently. Often we hold examinations and have no male applicants. We had to hire a tramp to help us out and deliver parcel post during the Christmas holidays.

Mr. BELL. Did that tramp come from Minnesota?

Mr. STEENERSON. Minnesota is a hard place on tramps; you know we have lots of snow up there.

Mr. SANCHEZ. He admitted that he was a tramp, but we had to have someone, and he was the only one available.

We have three men working who took the examination and failed, but we can not get anybody to take their places. We have only eight carriers in Baton Rouge and we cover 3,000 people to the carrier. There is no overtime allowed us and we do not want to make overtime. They give us a sub on Friday and Saturday so that we can clean up for Sunday. We have 440 city square blocks to cover with those eight carriers; approximately 55 square blocks to each city carrier. The population on the last end only gets one delivery. We have not enough men to cover it. I went to the inspector and to the postmaster and complained about my route. I told them it was too heavy and that I could not get around. The inspector agreed with me, and the postmaster also said it was heavy. The superintendent said the same, but I couldn't get relief. There was nothing doing; they pass the buck to the next fellow.

I have a brief here showing 137 per cent resignations from the service; and some of those who resigned are now drawing as much as \$128 a month more than when they were in the service. These resignations were not from among the substitutes, or the transients, but were regular carriers.

Mr. STEENERSON. I would like to know if you think we could remedy that condition by law. It seems to me that the number of carriers is entirely within the discretion of the authorities that administer the law, and it would be impossible for Congress to say in a statute the number of carriers there should be, because while they may need so many in a town in Minnesota, they might need more

here. I can not see how we can remedy by statute the grievance you have with regard to the insufficient number of carriers.

Mr. SANCHEZ. The salary could be fixed. I think if a man could receive more salary, he would go to work with more energy.

Mr. STEENERSON. I suppose you know that the department and the postmaster have the authority to supply sufficient carriers.

Mr. SANCHEZ. They don't do it. There is my case, where all the supervisors agree that I have more than I can handle, and all they do is to give me an extra man on Saturday.

Mr. STEENERSON. An increase in salary wouldn't give you more men. Do you think they would be more efficient?

Mr. SANCHEZ. We wouldn't have to take men like we have now. Some of them have taken the examination and failed three or four times. We wouldn't have men like that in the service at all.

Mr. Sanchez filed the following brief:

BRIEF SUBMITTED BY E. W. SANCHEZ.

I beg to submit the following brief on the Baton Rouge post office:

Overtime.—None allowed. Not wanted because it decreases the efficiency of the service and impairs the health. Overtime for holiday service is optional with the carriers, but living conditions compels them to take all overtime they can on account of small salary. Would like to have time and a half for overtime and double time for Sundays and holidays.

Office time.—On Monday or the first of the month no extra time is permitted over any ordinary day. We approve the sliding scales to meet conditions.

Sidewalks.—In the interest of health and economy, that carriers be permitted to deliver mail only to those who have a continuous paved sidewalk.

Substitute service.—Routes are so heavy that we have to double up at least once a week when substitutes are available through these congested conditions.

Rent.—Average \$25 monthly, \$75 quarterly, \$300 annually and upward. Water, lights, and fuel are additional expense borne by the carriers.

Bonus.—All business firms and factories of any consequence give out substantial bonuses to their employees. Would ask that compensation be allowed us as compared to like employment in the commercial world.

Seniority.—All things being equal, seniority should prevail.

Examinations.—Frequently held without a male applicant.

Population.—The carrier force of eight serves between 24,000 and 26,000 people, approximately 3,000 to each route.

Area of route.—Carriers cover 440 city square blocks, approximately 55 square city blocks each.

Weight.—Compels carriers to tie packages on outside of satchel, approximate weight about 52 pounds.

Resignation.—Resignations in the past two years have been about 100 per cent, clerks and carriers included; regular carrier force resignations amounted to 137 per cent. All resignations were voluntary, and in most instances were for increase in salaries and better positions.

Salaries.—Minimum entrance salary to meet conditions of to-day, should be \$1,800, graded in even hundreds of dollars, automatically increased annually to a maximum of \$2,400. Purchasing value of a dollar to-day is worth only 45 cents when compared with that of four years ago. To meet the living conditions of to-day at this small salary received from the Post Office Department, it is necessary that carriers seek outside employment in addition to their regular work and practice most rigid economy and in many instances deny themselves and families the necessities which make life worth living. There is also an extra heavy expense imposed on us in the purchase of uniforms, which must at all times be neat and tidy. Trousers in 1914 cost us \$3.45, to-day the same trousers of an inferior grade cost us \$8. This uniform is of no service to us when off duty, during which time extra clothing in the form of civilian clothes must be purchased, to say nothing about the cost of shoes, for you, gentlemen, know the advance price in shoes.

Betterment of service improvement.—The service could be better by increase of pay for employees, which acts as an incentive for the employees to give better and more efficient service, permits of more healthful living conditions, keeps in better frame of mind and an added interest in life. Should receive 30 days' leave of absence

with pay, which is necessary to keep a man healthy. This standard is recognized by all other departments of the Government. Thirty days' sick leave, with pay, which is also recognized by the Government and other outside corporations.

The old age and retirement plan, if such a plan could be devised and placed in operation by the Government as soon as possible, thereby eliminating the aged and unfit workmen and replacing them with young men.

Arbitration board.—There should be an arbitration board before which grievances and differences between employees and the department could be brought and adjusted satisfactorily.

The following is a wage scale of the Standard Oil Co. of Louisiana, situated at Baton Rouge, La.:

Occupation.	Salary without bonus.	Salary with bonus.	Occupation.	Salary without bonus.	Salary with bonus.
Stillman.....	\$205	\$225	Machinists.....	\$172	\$189
Assistant stillman.....	177	195	Boiler makers (calker).....	188	206
Pump man.....	159	175	Boiler makers (riveter).....	176	193
Watchman.....	126	139	Timekeeper, first class.....	138	151
Bricklayer.....	184	202	Timekeeper, second class.....	122	134
Pipe fitter.....	160	176	Timekeeper, third class.....	110	121
Carpenters.....	160	176	Labor (white).....	110	121
Painters.....	110	121	Labor (colored).....	66	73

This company employs 3,300 men. Salaries of the employees amount to one-third of the total deposits in all the banks in the city of Baton Rouge. Have had 10 increases in the past four years, 8 actual increases in pay; one change was from nine to eight hours and one 10 per cent temporary bonus. They allow time and a half for overtime and double time for Sundays and holidays.

BRIEF SUBMITTED BY MR. J. W. C. SMITH FOR THE LETTER CARRIERS OF MARSHALL, TEX.

We, the committee appointed by the letter carriers of the city of Marshall, Tex., herewith present our claims for a reclassification, on a higher salary plane, of all letter carriers, and we trust that we shall be able to do so in such a forceful manner that you will have to admit that we are not only right but honest in what we shall say, and are entitled to what we ask for, and that you, the gentlemen of the commission, will, in your report to Congress, either by bill or otherwise, recommend that we be given a fair, square deal, in that a living wage shall be paid to all postal employees.

According to a report of the Bureau of Statistics of the Department of Labor, on last April 1, the cost of living increased during a period of six years, from March, 1913, to March, 1919, fully 90 per cent. Since then we have received only a temporary increase of 37½ per cent. On July 1, 1918, we received \$200 for the fiscal year ending June 30, 1919, making a salary of \$1,400 a year. On the 1st of July, 1919, we received the balance of the 25 per cent, which was allowed under an act of Congress, February 28, 1918, making a salary of \$1,500 a year. During October, 1919, Congress granted us an additional increase of 12½ per cent, retroactive to July 1, 1919, making a salary of \$1,650 a year as a maximum. This small increase was granted to offset an increase in the cost of living many times greater. Can you, gentlemen of the commission, show us how to make 37½ per cent balance a 90 per cent increase in the cost of living? If you can, you will do more than we have been able to figure out. We do not understand that kind of mathematics.

The economic conditions under which our salary was fixed have long since been swept away, and there is no evidence at our command that normal conditions as we knew them at that time will ever again exist. It is a fact that can not be disputed that one dollar in 1913 went as far for the purchase of commodities as two dollars will today. This being the case, isn't it plain to be seen that our salaries have virtually been cut in two? In other words, if \$100 will buy no more than \$50 did in 1913, doesn't it appear reasonable that our salaries should not be \$137.50 a month, but \$200 a month? If the purchasing power of the dollar has been reduced to where it is worth no more than 50 cents, then, gentlemen of the commission, we should be paid two dollars now to every one that we received in 1913. Gentlemen, it isn't fair nor just to expect us to exist on our present salary and continue to go in debt each month.

When unskilled labor is better paid than the well trained employees of the Postal Service, is it not time for us to be given some consideration and relief in the way of a substantial increase in salary? Listen, gentlemen of the commission, do you know

that it is a fact that can not be denied that negro brakemen on the railroads are being paid a salary of \$200 a month; that unskilled labor in all lines of trade is better paid than we; that men without any education whatever are paid \$4.50 a day in the lumber yards? If these men worked every day in the year, they would receive something like \$1,404 a year? And that we, the postal employees, an intelligent body of men and women, who have to stand an examination before being put on the rolls, even as a substitute, only receive \$246 a year more than these men who need no education at all?

The present salary scale is so unattractive that many good men have already left the service, and many more will leave unless we are given a substantial increase. Why, do you know that it is almost impossible to obtain new men at the salary now being paid? Young men within the age limits can earn more in other lines of trade, and do not care to stand an examination for the Postal Service and have to act as a substitute for an indefinite period, for which work they would only receive a nominal sum. The last examinations held over the country were very poorly attended, for applicants were few indeed, some places having no applicants at all. These facts clearly demonstrate that the salaries paid by the Postal Service are so unattractive that no young man of ordinary intelligence cares to tie himself up where there is no opportunity for promotion, but prefers to go where there is an opportunity for advancement, and not where he will be a slave all the rest of his life, for the post office most assuredly is a workshop, and if you do not believe it, just go into any office and stand by the side of any clerk for eight hours, or go out on a route with some carrier and carry the pouch for a day, and you will find out that what I say is true. Our work may look easy and you may believe that we have a snap, but things are not always what they seem, and "All is not gold that glitters." It is very necessary that those employed as carriers be intelligent and have a certain degree of tact and diplomacy. Without these qualifications the service cannot reach that high degree of efficiency and perfection that is so much desired by the department, the carriers, and the public.

The foregoing statement of conditions existing throughout the country bears out our contention that many men have left the service, and that it is almost impossible to obtain new men. We are short-handed now, and if something is not done at once to relieve existing conditions, matters will be far worse, as we who are already in the service will be forced to leave and seek a living wage elsewhere. Fully 90 per cent of the letter carriers have families to clothe, support, and educate. We can not do it on our present salary. We wish to ask a few questions to which we trust you will give careful attention and consideration. Have we, the well-trained letter carriers, a right to expect a living wage for our services? Is it not our duty to properly feed, clothe, and educate our children, whom God has seen fit to bless us with? How can we, with honor, fail to fulfill our part of the contract entered into at the altar, where we led that pure sweet girl who became our wife and the mother of our children? Has she no right to wish to enjoy a few of the pleasures of life? Has she no right to expect a few good clothes? Has she no right to wish to dress the children God gave her nicely and comfortably? How can she expect these things when her husband is an employee of the Post Office, and is not given a living wage? Are we not entitled to more than a mere existence? Should we not, as well as others, be paid a salary that will allow us to put aside a few dollars each month, so that if sickness and death enter the home we would be able to take care of our loved ones without going so deep in debt that we will never be able to extract ourselves? Shall we be content with a wage that merely provides enough to keep body and soul together and a few, if any, clothes, and in the event of death in the family be forced to submit to our friends paying the funeral expenses, or to allow the city bury our dead? Listen, gentlemen of the commission, you do not know what it means to be forced to exist on a mere pittance of a salary; to have to deny yourselves the necessities of life that those dependent on you may also have enough to keep body and soul together. We have done without the necessary food that we should have, we have done without clothes that we may send our children to school. We must tell you, gentlemen of the commission, the situation is very critical with us, and we should have a living wage, a wage that will enable us to look out for to-morrow, as well as for to-day. There is no encouragement when looking down the lane of life and see looming up before us the poorhouse as the place of our last abode. You are aware of the fact that Congress has done absolutely nothing looking to the caring for those who have given their lives to the service. This is a shame, and you know it, but a fact nevertheless.

When boys not more than 16 years old are being paid \$100 a month and more for their services, do you not think that the well-trained employees of the Postal Service are not worth more? We overheard a conversation between two boys a few weeks ago on a street car. They were only 16 years old, for we heard them say so, and they said that they were being paid \$110 a month and were expecting an increase of a dollar a day, which would give them \$136 a month, with time and a half for overtime. On

the 6th of September, 1919, we delivered a registered letter to a lady from her boy, and this is what she said: "This is from my baby; he is only 16 years old and is making \$100 a month."

We mention these few instances just to show you, gentlemen of the commission, that unskilled labor is far better paid than are the well-trained employees of the Postal Service. We do not think it is right, fair, nor just, neither do we believe that any fair-minded man, or set of men, will think so either.

We, the letter carriers, come before you asking that you, the gentlemen of the commission, will consider well all that is said in this brief, for we believe that we have a right to expect all that we ask for, for we have asked for nothing unreasonable. A living wage is all we want, all we ask for, and all we expect, and we certainly believe that we are entitled to that. We do not come before you with a club in one hand and our demands in the other. It is not our wish to create the impression on your minds that we will resort to intimidation and strike, for such has never entered our minds. We are simply trying, through perfectly legitimate means, to secure what we are entitled to. We can only secure relief through legislation by Congress, and that is what we are trying to do through evidence submitted by us to you, and through your report to Congress.

We, the letter carriers, handle fully 95 per cent of the mail of the business of the country. We go into your places of business, your homes. We are constantly before the public in one way or another. Would you care to see a slouchy or slovenly looking man enter your place of business or home with your mail? Should we not appear neat and clean at all times? Uniforms have advanced more than double what we used to pay for them; laundry prices have advanced; street car fares advanced; rents, food of all kinds, shoes, hats, clothes, telephone, gas and electric lights have all advanced, and coal has advanced more than 15 per cent since the winter of 1917-18. Cotton is higher than it has been since 1865. Cotton goods are high enough now and it is predicted that they will go to \$1 a yard before next fall. Cottonseed products are climbing to the top right along, and these articles, as well as those already mentioned, are going higher each day. Senator Myers, of Montana, said on the floor of the Senate in his speech against joint resolution (H. J. Res. 151), on October 10, 1919, that: "If it is to last during the present era of the high cost of living, I think it will last for a good many years, for I do not think the cost of living is going to be materially reduced for several years. Indeed, I do not think it has yet reached its apex; I do not believe it has ceased increasing. From present prospects, I think it is likely to keep on increasing for several years." Mr. Myers evidently knew whereof he spoke, for I do not believe that he would make an assertion like this without being able to substantiate it. If this be true, and we believe that it is, then how in the name of all that is just and fair can we be expected to live and support and educate our families on our present salary basis? If the purchasing power of the dollar has already been reduced to where it is not worth more than 50 cents, what will it be worth in another year or two? We see by reports in the papers that the prices of meats and other commodities have fallen, but when we go to the butcher or to the grocer to buy something to eat we do not notice any depreciation in the prices of anything. Somebody somewhere is getting the benefit of this reduction, and you can rest assured that it is not the consumer.

To see men carrying mail looking untidy, slouchy, and ragged, certainly is not a very good advertisement for the Postal Service. How can we look spick and span when we are not being paid enough to live on to say nothing of buying uniforms and other clothes we need, and for our families? How can we educate our children when we can not afford to buy clothes for them in which to attend school or give them the nourishing food they require? How, we say how, in the name of all that is just and fair, can we perform the duties of letter carriers when we are underfed? We must have good wholesome food to be able to perform these duties and without it we can not stand up under the strain. Being a postman is a great life if we don't weaken. The necessities of life are so high that we are unable to reach them with a 45-cent dollar. We must inform you, gentlemen of the commission, that the situation is critical, critical in the extreme, and we must have relief, from Congress if we can, and elsewhere if we must. We noticed in the questionnaire sent out by the Postal Wage Commission this question: "How much money have you made outside of the Postal Service, and how?" Is it expected that we shall be paid only enough with which to get by, and if we want anything more than a mere existence, that we should get out and hustle in other fields; do you believe that it is good for the service for us to be forced to go on the outside to earn money with which to pay for a few of the comforts of life, and to thereby be able to lay aside something for the future? In some cities this can be done, but here in Marshall, Tex., it is impossible to do anything else for it is too late when we get through with our duties that there is no time left to devote to any other business, and we have to depend solely on our salaries as letter carriers for

all that we get. After carrying the heavy loads of mail for many miles each day that are to be delivered on our routes, we can not stand the strain of other employment. Certainly this can not be the idea of the Post Office Department and of Congress; if it is, then God have mercy on us, for we can not stand up under the strain, and our lives here on earth will be of short duration.

We have patched our old uniforms until patches will no longer do, but have got to be patched with a new uniform. Our stomachs have got to be patched with plenty of good wholesome food; food that will build up our bodies so that we will be able to perform the hard tasks that confront us each day, and without it we can do nothing short of weaken, and thus weakened, we can not do justice to the public, the department, nor ourselves. It is our highest ambition to give perfect satisfaction to the department, the patrons on our routes, and to ourselves. We can not hope to be satisfied until we have satisfied the department and the public, but in a weakened condition we can not hope to be able to satisfy any one.

Gentlemen, we have said a great deal, but have dealt only with facts, and have stated them as they actually exist. We trust you will weigh well the statements contained herein and believe that when you have done this, you will be convinced that we are entitled to \$2 for every one we were paid in 1913.

We respectfully ask that you recommend, through bill or otherwise, a reclassification of all letter carriers on the following scale: Entrance grade, \$1,800; second grade, \$2,100; and third grade, \$2,400 per annum.

Thanking you for your kind consideration of the facts we have submitted, we beg to remain,

Very respectfully yours,

J. W. C. SMITH, *Chairman.*
R. W. WELCH,
A. H. ALLEN,
Committee.

SUBSTITUTE LETTER CARRIERS.

STATEMENT OF MR. J. C. WILLIAMS, NEW ORLEANS, LA.

Mr. WILLIAMS. Gentlemen, I have been for five years and five months a substitute carrier here, and I stand at the present time first on the list for appointment. The condition I want to point out is the injustice done to a substitute carrier. He has to report every morning whether there is work for him to do or not; when there is work, he works; and he may work all day and then have to report back at night in the mailing division as an auxiliary clerk. This is detrimental to a man's health. The next day he may not work, and still has to report back to the mailing division at night. In the second place, you go to work and find there is nothing doing and you go home. You have to pay an extra car fare to go back home, and then you have to report back in the mailing division.

Subs when they go in the service are granted appointments in one or two years, and after he gets his appointment he is required to serve another year before he is eligible for a promotion. That makes five years he serves, four extra years before he gets an automatic promotion. Take my case: I have a wife and three children. If I am appointed a regular at \$100 a month I could not live on it. As it is my wife has to do extra work. When I was appointed the subs were told the average sub spent from two to two and a half years as a sub.

Mr. BELL. How long have you been a sub?

Mr. WILLIAMS. Five years and five months.

Mr. BELL. And you have not been regularly appointed?

Mr. WILLIAMS. I stand first on the list.

Mr. BELL. What is your compensation now?

Mr. WILLIAMS. Last month, on account of the Christmas holidays, I made \$162; previous to that the average was about \$70 a month. The average pay for a sub, during the past fiscal year, has been \$53.30 a month.

Mr. STEENERSON. How are you paid, by the day or the hour?

Mr. WILLIAMS. By the hour; 60 cents an hour.

Mr. STEENERSON. What did you get before that?

Mr. WILLIAMS. Forty cents an hour.

Mr. STEENERSON. You are very much better situated now than you were before.

Mr. WILLIAMS. In one way it gives us temporary relief. There is another thing I wish to speak about. The regular men are making 9, 10, and 11 hours. They are working overtime. No regular carrier should work overtime, when substitutes are available. The substitutes do not get the work, and yet the regulars work overtime.

Senator MOSES. How long have you been at the head of the eligible list?

Mr. WILLIAMS. Since December 10.

Senator MOSES. 1919?

Mr. WILLIAMS. 1919; yes, sir.

Mr. STEENERSON. The matter of employing the regulars and working them overtime instead of the substitutes rests with the officials in charge. That is discretionary with them. Do you desire to have that controlled by law?

Mr. WILLIAMS. The regular men should only be required to work eight hours. That would give the substitutes a chance to become familiar with the work.

Mr. STEENERSON. Your idea, then, is that Congress should say that they should not employ a clerk or carrier overtime unless a substitute is not available?

Mr. WILLIAMS. Yes, sir.

Mr. Williams submitted the following brief:

BRIEF SUBMITTED BY MR. JOSEPH C. WILLIAMS.

On behalf of the substitute letter carriers of the New Orleans, La., post office, I beg leave to submit the following brief covering working conditions with a few suggestions and requests which will, I think, improve conditions greatly.

All substitutes must report at 6 a. m., main office, for duty. If a substitute is previously assigned to a district, he reports in the place of the regular carrier. If no absentees, he does not go to work; but, he must remain near the office until 8 a. m., in case of emergency, reporting again at 12 m. Then if he does not go to work, a certain number of substitutes are assigned to work as auxiliary clerks in the outgoing section of the mailing division, reporting to the foremen in charge of that section at 6 p. m., working from three to six hours generally. It is a hardship on the substitute to spend 36 cents a day carfare. Getting home about 10 p. m., he must rise about 4.30 a. m. in order to report at 6 a. m., next day; he does not get sufficient rest or proper regular meals.

If after a substitute reports at the main office at 6 a. m., he is assigned to Station A, Algiers, he must spend both car fare and ferry fare in order to reach there. Likewise, if assigned to Station B or D, he must pay car fare to get to these points, his time not starting until he reaches there and has rung in on the bundy clock; and, in the event that the regular carrier is routing the mail of the district which he is to work, his time does not begin until the mail is all routed, which is nearly 9 a. m.

I would suggest, gentlemen, that you recommend extra items of expense be allowed to the substitutes.

After a substitute works on a district all day and is ordered to report in the mailing division at 5 p. m., it is an added hardship, after he has been up and working about twelve hours, to be forced to put in from three to five hours additional, with the

penalty of losing his district the next day if he is reported as absent by the foreman in charge. If he lives any distance from the post office, he can not get home to his dinner until after 9.30 p. m., for a hot meal in a restaurant means extra expense.

In the case of a substitute who is assigned to a district at Station A, B, and D, and the regular man reports in the interim, he must spend extra car fare to return to the main office, without any remuneration, in order to put his uniform in his locker, no substitutes being regularly assigned to Station B. One substitute is assigned to Station A and D with extra substitutes reporting at these stations at times. For this reason, I ask that the pay of substitutes be made 80 cents an hour. We make on an average of \$12.50 per week and must be up at least sixteen hours a day in order to do it. Further, I request that the honorable committee recommend that the services of substitute carriers in the mailing division as auxiliary clerks, be discontinued. This means added hours and unnecessary hardship with small returns at the expense of a man's health if continued for any length of time.

It has been the practice of this office to have regular carriers who are not assigned to any regular districts, to compensate the mounted collectors for Sunday work. This applies only to the winter months. These regular carriers do not compensate any regular men on Mondays, but work as helpers on parcel post wagons, depriving two substitutes of work on that day. During the week they have from two to four hours per day to work around the main office. During the summer months throughout the vacation period, substitutes are assigned to work the mounted collectors' routes on Sundays. These two regular men, or rather regular substitutes, are assigned to work regular routes during vacations, thereby causing a loss of 15 days each to two substitutes. These two routes should be abolished, or two regular eight-hour routes should be found for these two regular carriers, as if mounted collectors can be dispensed with on Sunday during one-half the year, I see no reason that the substitute could not be used in their stead all the year and give them the benefit of Sunday off.

It is requested that the honorable committee will abolish this Sunday work of the collectors, as these two men (regulars) are used in place of the substitutes doing extra work.

Further, it has been the practice of this office during the leave of absence period to merge the routes of the carriers on leave for one trip. The substitute makes the morning trip and puts the mail up, or rather, routes the mail on the afternoon trip. As all the regular carriers, on account of this merge, are forced to make overtime, it is a direct violation of the Postal Laws and Regulations.

I trust the honorable committee will look into this matter enforcing this law in future.

Regulation as to numbers of substitutes.—In this office we have 164 carriers and 76 substitutes. It is respectfully requested that the number of substitutes be regulated, one substitute to every six regular carriers. Present proportion is almost one substitute to every two regular carriers, which is far too many substitutes. Guarantee the substitutes at least six hours' work per day. This would result with a decrease in the substitute force.

Service.—The substitute must serve from three to six years before receiving regular appointment, as promotion to regular districts averages about six per year. I have been serving as a substitute five years and four months and am first on the list for regular appointment. I would ask the committee to recommend that the years or service performed as substitute be taken into consideration at the time of appointment by starting the appointee at the graded salary commensurate with the number of years served. In lieu of this, pay a substitute a flat salary of \$50 per month and all else he can make. This \$50 as a compensation for reporting at the specified hours, and remaining on hand in case of emergency, as well as to cover the cost of carfare, lunch, etc.

Uniforms.—The cost of a complete new winter uniform is \$33. Winter pants, \$10.75 per pair; summer pants \$9.50, and a coat and pants, \$24. Shoes cost at least \$8 per pair. The average carrier wears out at least four pairs of shoes each year. A carrier is required to present and maintain always a neat appearance, and consequently must purchase at least one uniform each season. Therefore, it is respectfully suggested that the honorable committee recommend that the Post Office Department be made to supply at cost price to all carriers and substitutes a khaki uniform with Army shoes and hats, permitting the use of khaki overalls on parcel-post wagons, as the gray uniform at present worn soils very quickly; in lieu of this, recommend a yearly cash allowance to cover the cost of uniforms.

The average earnings of substitute carriers and clerks from July 1, 1918, to July 1, 1919, were \$53.33 per month.

The salary paid to substitutes, 40 cents per hour, is not sufficient to cover the high cost of living as compared to wages paid by outside employers of labor, who pay time

and one-half for overtime, double time for night work and Sundays and holidays, with a usual reporting time of 7 a. m., whilst a substitute carrier, on the other hand, has to report at 6 a. m., gets off around 4 p. m., having to work 10 hours to make 8. Other classes of labor work 8 hours in 9 with the Saturday half holiday. The postal employee is the only Government employee who does not receive the benefit of the Saturday half holiday.

No increase in salary has been given the substitutes in the last five years. Auxiliary time is the only time for which an increase has been allowed, the change being from 35 to 40 cents per hour. Time made as substitute for regular carrier remains the same, 40 cents per hour.

I have been a substitute in this office five years, and my present standing on the list for appointment is first. How can I live on \$1,000 per year if appointed? If no increase is given I will be forced to resign the service, as I can earn at least \$60 per week at my trade as a miner. I think it is up to the honorable commission to make the rate of pay at least 80 cents per hour for substitutes, retroactive from July 1, 1919.

(NOTE.—Since this brief was prepared, House joint resolution 151 has been passed granting substitutes 60 cents per hour.)

CLERKS IN FIRST AND SECOND CLASS POST OFFICES.

STATEMENT OF MR. HUGH ROYALL, EL PASO, TEX.

Mr. ROYALL. I represent the States of Arizona, New Mexico, and a portion of Texas, and in coming before this commission I feel that what I am asking is nothing more than what is right. We do not come in the spirit of making a demand, but we simply come asking for what we feel to be absolutely our rights. We feel that a man has a right to make a living wage, and at the present time, the way conditions are, we are really not making a living wage.

There are some specific things I would like to mention, one in particular is overtime, and while I have no criticism to make of the management of the office with which I have been associated, these things I want to mention, chief among which is the ever present question of overtime.

We feel that the men who work irregular hours, or rather, who work from 6 o'clock at night to 6 o'clock in the morning are deprived of certain privileges which inherently belong to every American citizen. He is deprived of being at home with his family in those hours which nature demands a man should rest and, in addition, we have a condition whereby such a man is paid the same money as a man who works regular hours in the daytime, say from 6 in the morning until 6 in the evening. The salaries of all these men are identical. We feel that a man who works those hours between 6 o'clock in the evening and 6 o'clock in the morning should either be paid more money because of the inconvenience he suffers or else he should be given a shorter hour, for instance, a 45-minute hour, this because of the fact that he is deprived of the opportunity of being with his family, and things of that kind.

Senator MOSES. Which would you prefer to have, a 45-minute hour or extra compensation?

Mr. ROYALL. So far as I am concerned, and I think I voice the sentiments of all those with whom I have talked, I prefer the 45-minute hour.

Mr. STEENERSON. That is a six-hour day.

Mr. ROYALL. Yes, sir.

Senator MOSES. If you were to ask for extra compensation, what do you feel it should be? Would you ask for time and a half?

Mr. ROYALL. I believe that is equitable; yes, sir.

Senator MOSES. But you would rather have the time and a third than the 45-minute hour would give you than the time and a half in money?

Mr. ROYALL. Yes, sir. There is one other question that is prominent in the Southwest that I would like to mention, and that is this: We have a system there where the clerk in charge is given all the responsibility of the men who work that shift. We have a system of seniority in that office that is determined by the number of years a man has worked in the El Paso office. We have a number of men who have been in the service 15 or 20 years who transferred in there during the late war. They are not taking the seniority rights and it gives men younger in the service the rights of seniority. They draw smaller pay than the older men, and sometimes you find a man like that placed in charge who draws a smaller salary than the man who has been in service long enough to draw the higher rate. We feel that it is not right for a man like that, who has all the responsibility, to draw less salary than the men who work under him and who have no responsibility whatever. We feel that the man who is given a responsible position of that kind should be paid for it, so why not place the special clerks in charge? Why not place them on the shifts that require this management?

We have only two men in the mailing division who work regular hours. In the city division it is not quite so bad.

Mr. BELL. How many clerks have you?

Mr. ROYALL. Sixty-three.

Mr. BELL. How many ladies have you?

Mr. ROYALL. I believe I would be safe in saying we have at least 10; possibly more.

Mr. BELL. What kind of clerks do they make?

Mr. ROYALL. For general delivery clerks, for instance, they are very efficient; for directory clerks they are very efficient. We haven't used them elsewhere, except a few in the money-order and registry divisions.

Mr. BELL. Are any of them night clerks?

Mr. ROYALL. No, sir. They come there and are assigned to the day shift. It would be impracticable, I feel, to assign them to a night shift.

There has been in El Paso, during the last fiscal year, ending June 30 last, 1,020½ days overtime worked by the regular clerical force. This is worked by about 26 men. Generally speaking, it represents overtime that has been made by 11 men in the city division and about 15 men in the mailing division, making about 26 men who have worked 1,020½ days overtime.

Senator MOSES. The other 37 clerks got no overtime?

Mr. ROYALL. Practically none. I am unable to give the individual figures. These figures were given to me in the aggregate, and embrace the clerical force for the entire office.

Mr. STEENERSON. What is the postmaster's salary?

Mr. ROYALL. I really do not know.

Mr. STEENERSON. What are the receipts of the office?

Mr. ROYALL. I couldn't tell you.

Mr. STEENERSON. You don't know the receipts of your own office?

Mr. ROYALL. No, sir.

Mr. STEENERSON. How many clerks and carriers have you?

Mr. ROYALL. Sixty-three clerks and 38 carriers.

Mr. STEENERSON. It is a first-class office?

Mr. ROYALL. Yes, sir. Now again, with regard to the overtime We are paid on the basis of 30 or 31 days to the month, whichever number happens to be in that particular month. In reality we only work 26 or 27 days in that month, and that really gives us less money for overtime than we receive for straight time.

Mr. STEENERSON. How about February?

Mr. ROYALL. That is one exception—February.

Mr. STEENERSON. You get more then?

Mr. ROYALL. February only comes once a year.

Mr. STEENERSON. This year it has 29 days.

Mr. ROYALL. In that case it is only a little better. As a usual case, though, we do not get as much for overtime as we do when we work straight time. I find the conditions in the offices of the Southwest almost entirely covered in the brief that I am filing with you, but there is one place in New Mexico I would like to call your attention to. It is a second-class office without a single regular clerk in the postoffice. The office is carried on entirely by a sub force. There is not a man in the office that is really eligible to an appointment.

Senator MOSES. You mean there is not a man in the office that could hold an appointment?

Mr. ROYALL. Not a one. The office is carried on solely by subs. I find a statement here from Flagstaff, Ariz., that while the cost of living has gone up 107 per cent, salaries have increased only 25 per cent, and it makes it practically impossible to get men to take a position, notwithstanding that examinations have been advertised from time to time without any response.

Mr. Royall filed the following brief:

BRIEF SUBMITTED BY MR. HUGH ROYALL.

In consideration of the peculiar conditions obtaining in the offices of the El Paso-Southwest, I beg leave to state first, the postal employees of this section are loyal and are interested in the welfare of the service as much as any representative of the Post Office Department regardless of his station, and in asking certain redresses we feel that we are asking only for that which is the inalienable right of every American citizen, the right to live with a competency sufficient to provide, not only the absolute necessities of daily life, but also to provide by our labors for a coming day when we will be no longer able to follow the pace that is required but must step down and out for younger and fresher blood. This brief is intended to cover a condition which obtains with peculiar similarity in the different offices which I have the honor to represent before your honorable body.

Since we are located in an arid and by no means an agricultural country, except for the systems of irrigation which are as yet very limited, and since our system of transportation is also limited only to transcontinental traffic, causing us to depend almost entirely for the necessities of life on goods shipped from hundreds and sometimes thousands of miles away, the freight rate makes the cost of living variously extend at from 15 to 25 per cent higher than in the more favored communities of the East and North.

The El Paso-Southwest is strictly an industrial community, composed almost entirely of mining, railroads, and some manufacturing interests. The work in these and their associated lines of endeavor is plentiful, and the supply is seldom as great as the demand, thus creating a condition of salaries which on account of the rocketing high cost of living are on the whole higher than the salaries paid the post office employees.

A general average of wages paid to employees in the following lines of industry, compiled from the reports at hand from the following places show at Bisbee, Flagstaff, Clifton, Tempe, Douglas, Globe, Miami, Holbrook, and Ray, Ariz., and Gallup, Silver City, Las Cruces, Fort Bayard, and Alamogordo, N. Mex., clerks doing work

which is generally on a par of that done by post office employees but with less responsibility attached to their work, receive compensation which is from 10 to 80 per cent higher than that paid to post-office employees. Carpenters are drawing \$8 per day; bricklayers, \$8 per day; plumbers, \$8 per day; electricians, \$7 per day; painters, \$8 per day. These represent the building trades where an education is not necessary. Printers, stereotypers, pressmen and mailers draw from \$5 to \$6.50 per day with an addition of time and a half for overtime (all Sunday and holiday work being overtime). These men all work the eight-hour day. We find that on the railroads trainmen are paid a wage that averages from \$150 to \$300 per month. Baggage men who work a 26-day month are paid from \$150 to \$200 per month. Clerks in the railway offices are paid salaries ranging as high as \$200 per month. This condition primarily is responsible for the following conditions at the following places: At Fort Bayard, N. Mex., there are no regular clerks, all help being auxiliary substitute help, not one of which is eligible to appointment. At Miami, Ariz., where there is a working force of nine, there is only one male clerk. At Douglas, Ariz., the office is working short handed and is unable to procure applicants to take the examinations, there having been one vacancy in the carrier force for two years which could not be filled for the above reasons. Repeated examinations have been advertised, but no applicants. Three-fourths of the working force is female help on account of being unable to secure men substitutes. Globe, Ariz., is little better off. Applicants for examinations are hard to get. At Silver City, N. Mex., one substitute refused appointment on account of the low entrance salary. The office finds it hard to obtain suitable substitutes on account of the higher wages paid elsewhere. At Flagstaff, Ariz., five regular clerks have resigned from the service to take other and more lucrative employment, and the employees have submitted evidence showing that in that locality the cost of living has increased 107 per cent against the approximate 33½ per cent increase in postal salaries.

Further inquiries have shown that against the scale of post-office clerks' salaries, \$1,200 to \$1,650, bookkeepers in the El Paso-Southwest, whose duties are practically on a par with money-order and registry clerks, and whose responsibility is far less, receive for a 26-day month from \$1,800 to \$3,600 per year. In a statement from George J. Rolfe, post-office clerk at Douglas, Ariz., I find that Mexican laborers who, for the most part are not citizens of the United States, and are almost totally unable to speak the English language, are receiving from \$82.50 to \$109.50 per month, and in addition a bonus of \$100 per year to each employee who has been in the service for one year, with an additional \$10 for each additional year, thus showing these men to draw as much as a post-office employee of the first and second grades who have been required to stand creditable examinations, and in many instances periodical card examinations which require much time and study for preparation while the clerk is really off duty.

Further inquiry from Douglas established the fact that while there is a regular force of six carriers at that place, there are at present only three regular men at work, the other positions being filled with "subs" unclassified. There has been one vacancy for two years because of the fact that notwithstanding repeated examinations have been advertised, it has been impossible to obtain applicants' to take the position at an entrance salary so far below the standard of wages in that locality.

I am advised by a member of the Civil Service Board in El Paso that this condition of inadequate pay makes it most difficult to obtain desirable applicants for the clerk-carrier examinations at El Paso. It has been necessary to hold two such examinations within the past six months, and notwithstanding much advertising was done there were only five men to take the examinations on the first occasion and only four at the second examination. Of these nine men, four were soldiers in the Regular Army taking the examinations with permission of their commanding officers. Of this number one has refused appointment, due to the fact that he finds wages in other lines more than in post-office service.

In a statement issued to me by Assistant Postmaster Burleson, of El Paso, I find that 63 clerks during the fiscal year ending June 30, 1919, worked 1,020½ days overtime, 416 days of which was regular overtime, 604½ days being overtime for Sunday and holidays, and while the employees here do not prefer to work overtime still I have been told by numerous ones that were it not for the extra pay gained from this source they would be compelled to secure employment elsewhere to obtain a living wage. No less than five men, of which I know, are now following outside employment in order to supplement their incomes through sheer necessity. During the last four years there have been 30 resignations from the clerical force in El Paso, Tex., which number is just 1½ less than 50 per cent of the entire clerical force of this office. There have been during this time 12 resignations from the carrier force, making the percentage of resignations in that branch more than 30 per cent. I am submitting herewith letters from some of these individuals setting forth their reasons for

resigning and stating how, in their opinion, they have "bettered themselves. This condition has made it necessary to employ uncertified help to conduct the business of the office, and often this help is of a most independable and unsatisfactory character, causing frequent changes and lending an air of instability to the service in its entirety.

The class of employees has deteriorated in a marked degree, and very frequently we obtain help of a cheaper class of men whose only interest in the work seem to be quitting time and pay day. The above condition is also very noticeable in the quality of the few men who present themselves for the frequent examinations held for the clerk-carrier service.

To insure the full measure of service expected by the department, and to regain the vigor and strength expended in that service, we feel that the present two weeks annual vacation allowed is insufficient to restore the force and vitality lost in fulfilling the exacting duties and believe that a 30-day annual vacation as enjoyed by certain other Government employees would also be fair and just to postal employees whose duties we feel are generally more varied and exacting.

The present policy of the department in maintaining aged and infirm employees at their work, while charitable in conception yet is really a poor boon to these unfortunate ones whose daily work becomes an ever increasing burden. This condition within an office must of necessity cause a decrease in volume of work performed or else it automatically falls to the lot of younger and more efficient clerks to assist in order that such work be completed. In view of the above facts, and as an act equally just to all employees, we feel that a retirement law granting half pay to the old employees would be a fair and equitable adjustment.

It is necessary for post office clerks to stand examinations at intervals to demonstrate their fitness for the work to which they are assigned. In order to stand these examinations, it requires quite a great deal of study and preparation. Time for the learning of schemes is not allowed by the department. An arrangement whereby men would be allowed a flat rate of four hours per week or two days in each month as overtime for the purpose of scheme study is suggested as an effective and equitable means of settling this phase.

In view of the above recited facts, it causes us to stop and ask ourselves the question, "How do we really manage to get along?" The answer is that the average married postal employee is forced to bolster up his inadequate salary by either one of the following means: He must himself seek extra employment, or his wife and children are forced to seek outside work, or else deprive themselves of proper nourishment and clothing. These statements can be verified by canvassing any number of married employees who have families to support. Under these conditions it can be readily seen that the home life of the post-office employee must suffer. Most industrial workers, excepting the post-office clerks receive time and one-half for overtime, with double time for work performed on Sundays and holidays. The responsibilities of post-office employees are numerous and varied. In addition to the severe mental and physical test they have the responsibility of handling millions of dollars in money which pass through the mails, likewise millions of negotiable securities and valuable packages, and this with an almost negligible amount of loss. The employees are responsible for the safe handling of this mail and must pay for such losses as occur, although very often their liability is fixed by an inspector on the merest technicality.

Post-office employees, as representatives of the Government, are obliged to conduct themselves at all times in a manner which will reflect credit upon the service. That means meeting their obligations promptly and living decently, in all a hard thing to do with the present salary conditions.

In an issued statement, Irving Fisher, professor of political economy at Yale University, says: "The high-priced level has come to stay." In his judgment, the high cost of living is a permanent condition. He thinks it may go down a trifle in a year, perhaps, but then it would continue at a plane far above the prewar level. On whether the general level of prices is bending downward, he says: "It is not going to very much, if at all. We are on a permanent high-priced level, and the sooner the business men of the country take this view and adjust themselves to it the sooner they will save themselves and the nation from misfortune which will come if we persist in our false hope."

The attitude of business generally is opposed to reduction in wages of labor. Under the management of the United States Railroad Administration, the wages of railway workers have been increased at the rate of \$500,000,000, and may reach a maximum in the aggregate of \$800,000,000, which would amount to about \$1 per day per man, a little less of an increase per man of \$400 per year.

John Hays Hammond, of the Universal Service, is quoted as follows: "Bolshevism can not be fought by force, they must return to prewar times. Bolshevism is anarchy and must be fought as such, but force must not mean failure to maintain high wages, and the meeting of every reasonable cause of dissatisfaction."

Mr. Hammond, famous mining engineer, said in discussing labor conditions in the mining States of the West: "There can be no great drop in wages in mining industry or commerce. The war period scale should be maintained." Men who dream of a return to prewar conditions are foolish, for five years back from now is the same as going back 1,000 years. High wages mean industrial peace, social contentment, and good standards of living for all. That is right and just, and it means a better citizenship for America.

It is foolish to think we will ever return to the old scale of wages and the old purchase power of a dollar. Government investigators have found that it requires \$2,500 a year to keep the average American family to-day, and the cost of living still soars. Of those who depend upon a \$2,500 yearly income, few families are able to show a surplus of \$100 at the year's end. Some can save as much as \$50, while a large number have nothing to show but a deficit. These figures have been announced by the Department of Labor, which has made a year's survey of living conditions in the United States.

In view of the above recited facts, we feel justified in asking for at least an entrance salary for post-office employees of \$1,500 per annum, a raise to \$1,600 at the end of six months' satisfactory service, a raise to \$1,700 after one year, and thereafter at the rate of \$100 for each six months' satisfactory service until \$2,100 is reached, and thereafter the yearly promotion of \$100 until a maximum of \$2,300 is reached.

BRIEF FILED BY MR. ROYALL FOR MR. B. W. HOLLIFFIELD, OF THE PORT ARTHUR (TEX.) OFFICE.

Our contribution to the cause must of necessity be very brief. Our time is limited and very few members of the old crew remain to help us in our fight for a just and equitable salary adjustment. At the present writing the service at this office has just about reached the breaking point. Our proximity to the oil refineries, shipping and other industries which pay wages so out of proportion to our meager allowance has caused the steady desertion of the post office by experienced men whose places can not be filled at the salaries allowed by the department. It is very discouraging to the few remaining veterans to see youngsters with no experience at all, accepting positions with outside corporations at salaries greater than the "old timers" receive after giving years of conscientious study and faithful services. The service that was once a pride to all of us has almost ceased to function.

Of course the Joint Commission is unable to aid us in securing emergency legislation, but we wish to emphasize the present conditions in order to prevent their existence after permanent legislation has been enacted.

It is deplorable that the department withholds the true condition from the investigating committees. There are none who have been connected with the service for any length of time who can deny that it is doomed to disintegration unless the department adopts more humanitarian tactics and recognizes the right of postal employees to a compensation in keeping with the cost of living, and with that allowed by private industries for similar lines of work.

We are forwarding a few letters from former employees of this office as fairly representative of the many who have resigned. You will find also other statements and data which you may find useful in assembling what you already have. If your representative sees fit to use this data when he makes that trip to New Orleans, we will appreciate it from the depths of our hearts. Ours is a small office, so the expense precludes our sending a representative.

STATEMENT OF MR. SIDNEY O. SAYRES, LAUREL, MISS.

Mr. SAYRES. Gentlemen, I represent the clerks and carriers of our office. In regard to wages I do not think we are getting enough. There is no need for me to say anything about the increased cost of living. You know all about that, I suppose. The worse trouble we find in our office is getting competent substitutes. We have only six clerks in our office. The receipts are \$38,000.

Senator MOSES. How many carriers have you?

Mr. SAYRES. Four city carriers; five rural carriers.

Senator MOSES. How big a town is Laurel?

Mr. SAYRES. Fifteen to eighteen thousand.

Senator MOSES. A manufacturing town?

Mr. SAYRES. Yes.

Senator MOSES. What?

Mr. SAYRES. Lumber; cotton mills. The cost of living is unusually high. The cost of everything has gone up over what it was in 1914. It is very hard on us.

Senator MOSES. What do you suggest to remedy your grievances?

Mr. SAYRES. I think, under the present conditions, we should have an entrance salary of \$1,800.

Senator MOSES. And the maximum?

Mr. SAYRES. Twenty-four hundred.

Senator MOSES. To be attained in how many years?

Mr. SAYRES. About six years, I think.

Senator MOSES. With automatic promotions yearly?

Mr. SAYRES. Yes. Speaking of automatic promotions: Last year you gave us the two-hundred dollar increase. We failed to get that. We got the \$200 and failed to get the increase.

Senator MOSES. That has been explained; that was because it was a lump-sum appropriation.

Mr. SAYRES. I do not know of any suggestion to make other than to say I think we should be paid more than the substitutes.

STATEMENT OF MR. CESAIRE R. DUPAS, NEW ORLEANS, LA.

Mr. DUPAS. Gentlemen of the Commission, the mere fact of your presence here is a significant sign that Congress has at last awakened to the fact that the employees of the Postal Service are being unjustly treated.

I wish to offer some suggestions as to why our salary should be made commensurate with the quality of the work performed. Prior to 1912 civil-service examinations were held in this city every year, and as the number of applicants was so great it became necessary to hold them but every other year. Finally the war came on and common labor came into its own, and the conditions became reversed. Instead of examinations being held every two years, with 200 men seeking appointments, they began to hold three examinations a year; and in the last one, in December, 1919, there were but 37 applicants.

Contrast to that the number of resignations. In the period from 1912 to 1917, the yearly average was 7. In the last two years that has increased over 400 per cent, and it is now averaging 31 resignations a year.

Our suggestion is, and it is in the interest of the United States, the postmaster and everybody else, particularly those who are complaining about the rotten service—that suggestion is to increase the standard of the examinations; invite men of a higher type into the service, and the only way that can be done is to increase the wage standard.

We therefore suggest that a wage scale of from \$1,800 to \$2,400 is a mere pittance compared to what is being received to-day by everyday labor.

Now, with regard to the substitutes. Through the medium of the body which you represent, they have seen fit to increase their standard to 60 cents an hour. It is impossible here, with that 60-

cent standard, to induce men to enter the service, study schemes at night, deprive themselves of the luxuries that common labor enjoys, deprive them of time with their own families and loved ones. Common labor ignores 60 cents an hour. A clerk, after seven years, receives 55.44 cents per hour. We place ourselves on a parity with the professional man, and a professional man who devotes four years to study, receives his degree. He no longer is required to keep up with the different and constantly changing rules of his profession. We are placed in a position of having to know when a train arrives, when a post office is discontinued, when a new post office is established in a city, when a new building is erected, we have to be thoroughly familiar with the different sections of the city, and we are constantly applying ourselves to a study of these things, for all of which we get no consideration whatsoever. We are donating that to the Government. We do not believe, if you would understand the conditions, that you would give that your sanction.

With regard to the night work—I am submitting a brief that deals in part with this subject. The night hours of duty are after 6 o'clock. Any time worked after 6 o'clock in the evening can be classified as night work. We know that the United States is the only employer that pays single time for such night work, and it seems to be the rule, rather than the exception, to encourage overtime, and we ask your commission to prevent, in a measure, this overtime, by providing that time and a half be paid for it, which is no more than any private employer grants.

Another thing, we, the clerks, are penalized for being efficient. A man enters the service with the idea of becoming one of the supervisory force. He enters and gives the best of his life to the service, but, the greater efficiency he attains, the greater is he penalized. A distributor is invariably denied promotion. The very fact that he is efficient keeps him where he is. In view of this fact, I ask that the distributors be given a bonus of \$200 in excess of the highest paid clerk and, in doing so, abolish the special clerk. The First Assistant Postmaster General says that that special clerk has been the reward of the efficient distributor who applies himself diligently and faithfully to the work. It has never been such. We ask that that be made compulsory, without any prejudice and that everybody be placed on an equal basis, and that every man who attains the grade of distributor be given \$200 in excess of the highest grade clerk.

Mr. STEENERSON. Do you claim that promotions to the supervisory grades in the New Orleans post office are not made on merit?

Mr. DUPAS. I do.

Mr. STEENERSON. Is that the general feeling?

Mr. DUPAS. The concensus of opinion is that there should be competitive examination or strict seniority.

Mr. STEENERSON. We have discovered some places where they claim promotions are based on merit and seniority, and some places where they claim they are not. Now you claim that this office is not administered according to seniority and merit?

Mr. DUPAS. I will cite my own case, Mr. Steenerson. I have been in the service 14 years and have enjoyed 100 per cent rating. I have never gotten below 92, and men entering five years after I did have been designated as special clerks. That is an illustration.

Mr. STEENERSON. There are some who have been promoted frequently, and others who have not been for years.

Mr. DUPAS. That's the idea. Seniority is not put into effect. All that we ask is that a tribunal board be established where we can have brought out all our differences. We also ask that seniority be put into effect. It is true that a man might come up who is not competent, but we ask that he be given an opportunity and if he fails, he can step down and give the next man an opportunity. This, we think, is one of the fundamental principles on which the Government is established.

Mr. STEENERSON. The Postmaster General has made an announcement to me, and later, has written a letter, to the effect that any statement with regard to these matters will not be held against you; that you will not be discriminated against for anything you say before this commission, so that you are privileged in this case to state what your views are. What we would like to know, is whether the commission can locate the responsibility—is it the fault of the inspectors, or the postmasters, or the department in Washington? Where is the blame for not treating the clerk and carrier force on their merits? Have you any idea where we could find the weak spot in the administration?

Mr. DUPAS. I might suggest this, that the recognition of seniority prevail without prejudice, and that a trial board be set up. That would be in line with the legislation enacted by the Cummins bill.

Mr. STEENERSON. The point has been made that seniority could not be followed in all cases, from the fact that the man who is senior might not be fitted for the position, and that it would be impractical to enforce seniority in every case.

Mr. DUPAS. In this brief I make the proviso that in such cases he be brought up and he be given a chance to demonstrate his ability. The Constitution says that every man is innocent until proven guilty. We say that every man should be considered competent until he is proven incompetent.

Mr. STEENERSON. One man might have a talent to handle and supervise men, while another one would have a temperament that would not let him succeed in the management of men. It might be that seniority would have to be set aside in some instances.

Mr. DUPAS. Let me suggest that an examination be held among all the employees, not excluding the carriers; that competitive examinations be held covering postal regulations, etc. If examinations are good enough to determine fitness for entering civil-service departments, it seems to me that they would be all right to determine the fitness of candidates for promotions.

Mr. STEENERSON. There is a good deal of merit in your suggestion that could not be reduced to black and white.

Mr. DUPAS. Seniority is what we ask.

Mr. STEENERSON. In some of the offices with regard to which we have taken testimony seniority has almost entirely been in force. In others it seems to have been ignored entirely, and where we find that seniority has been set aside entirely we have the greatest number of complaints, so that it would appear that seniority should be followed except in rare cases, but we could not make an iron-clad statute requiring that seniority should be followed in all cases.

Mr. DUPAS. The rule in this office has been that the younger the clerk, the greater the chances of promotion and the better the assignment he receives, and this can be borne out by going down the roster and tabulating what position each employee holds, but, unfortunately, each and every one of us has not some influential politician, or layman, or ecclesiastic, or does not belong to the charmed circle or clan, and in not having friends or membership are without resources to seek promotion, unless either seniority or competitive examination prevail.

Mr. Dupas filed the following brief:

BRIEF SUBMITTED BY CESAIRE R. DUPAS.

In behalf of the employees of the New Orleans (La.) Post Office, with the designation "clerk," the following is submitted with the request that due consideration be shown same:

Congress admits that postal employees are underpaid.—The postal employees are underpaid, and conditions are in dire need of improvement or reconstruction, as is admitted by the Congress of these United States, which body of its own volition has assigned your honorable commission the task of securing statistics throughout the various zones of the Union, and we therefore willingly present the following:

Prior to the World War, examinations were scheduled for regular intervals, and very often—due to the large eligible roster of substitutes—the examination would be postponed or canceled, the number of candidates was very large, and as the standard was rated "second grade" only those attaining a high average could hope for certification, which thereby insured the Government's securing the best of applicants and subsequently clerks. As the chaos, due to the industrial conditions brought by the war, increased the common laborer came into his own, and his compensation exceeded even his own fondest hopes of but the yesterday, and the inroads in the Postal Service became apparent, so much so in this city, and there is no boom in any one line such as automobile industry, oil operations, steel mills, etc., but just general conditions that prevail, that the civil-service examiners found themselves conducting two and three examinations a year, where heretofore they conducted but one every two years, and passingly strange but nevertheless true fewer applicants, and this despite the fact that the standard of the examination had been lowered. Exhibit No. 1 gives statistics showing the number of examinations scheduled, number not held, number of applicants, number successful, number appointed, and, on the other hand, the number of resignations of clerks and subclerks by years from 1912 to 1919, both inclusive.

During the last year or so a considerable number of men have been working temporarily, but who have not taken any civil-service examination.

As the standard of the examination has been lowered in an endeavor to recruit the service, and incidentally decrease the efficiency of the personnel, we ask that proper steps be taken to restore the standard not only to what it was formerly, but to raise the examination to first grade, insuring greater efficiency in the morale and warranting the paying of salaries commensurate with the quality of the work given.

Salaries of clerks and subclerks.—Congress, of which your commission is a part, has seen fit to increase the pay of substitutes to 60 cents per hour—for no reason other than that the service was demoralized, and common laborers who were not required to study schemes and helpers who simply handed tools to the mechanics were receiving that stipend, and as even 60 cents was paltry, we can not refrain from calling your attention to the fact that after a man has served upward of seven years in the Postal Service he is only worth, in a 30-day month, \$0.5729 per hour and in a 31-day month \$0.5544 per hour, under the present schedule of wages, \$1,650 gross, which only holds good until July 1, 1920. Gentlemen, we ask that your recommendation be at least \$1,800, \$2,100, and \$2,400, with an additional bonus of \$200 per annum to distributors after they have reached the \$2,400 grade.

Night work and scheme study.—As there is at present no law that requires a postmaster to assign to night duty a clerk when he is appointed as a regular, and as influences play their part invariably, we suggest that your body incorporate into your recommendations and report such suggestions that are necessary to have seniority prevail without prejudice. Exhibit No. 2, showing the number of night hours of duty in the New Orleans, La., post office, is attached.

As a differential to the men who toil at night, and in a sense in the name of humanity, we suggest that 45 minutes be considered as a night hour. The greatest Government

on earth in every respect is the only employer who exacts 60 minutes night work for the expenditure of single day-hour pay. The minimum pay that any employer pays out for night work is time and a half, and if we toiled 8 hours for a private corporation we would earn 12 hours' pay, and as we desire to not impair our health in an effort to earn overtime we feel that we are justified in asking for a 6-hour night. As the distributors are compelled to master schemes, we are placed on a parity with professional men, and can compare our duties with that of the professional man who is compelled to study three or four years to obtain his degree, and once he has his degree he no longer is required to be constantly applying himself to his studies; unfortunately, for the post-office clerk, due to the fact that post offices are established, discontinued, supply offices changed, train schedules altered or discontinued, etc., or firms are renting post-office boxes, sections of the city are improving, office buildings are being erected, firms changing their locations, and a thousand and one other reasons, he is compelled to be a continual bookworm if he desires that mail, the thing most common in use by all the masses, be expeditiously and accurately handled; we therefore ask that your commission make such recommendation to the Congress of the United States so that the hardest-worked and least-paid employee in the Postal Service be compensated for the time, his own time, that he applies to such duties as pertain to the work of keeping, figuratively speaking, up to a 100 per cent standard.

Supervisors, and how to become one of them.—We believe, and correctly so, that either one of the two methods mentioned herewith should govern the assignment of ordinary clerks or employees to the grade of supervisor, and in passing suggest that the title "special clerk" be discarded, as it has been a misnomer. When a vacancy occurs in the supervisory force, be it either postmaster or foreman or any intermediate position, the senior man should be promoted to the vacancy and so up the line, and in the event that the appointee failing to qualify he should be relieved from performing the duties so assigned and the next eligible given an opportunity, or let a competitive examination be held among the postal employees who have rendered 10 or more years service to their Government, and the candidate attaining the highest average be assigned to the vacancy.

Overtime.—As from time immorial it has been the practice to teach that the day is divided into 24 equal parts, and we should divide these 24 hours into three equal parts, one of each of which should be divided as follows, 8 to the performance of usual vocation, 8 to recreation and rest, and 8 to the devotion to God and to our distressed brothers, we feel that the usage so well adhered to is in grave danger of abolition, and we pray that your body make recommendation that will prohibit overtime, if overtime must be, in excess of 8 hours per month or 96 hours in any fiscal year, and this at the punitive rate of time and one half.

Tenure of substitution.—After an employee has been on the substitution list for a period of one year, when appointed as a clerk he should be placed in the grade that he would have then been in had appointment been made at the expiration of one year's substitution.

As has been the practice in the past to make appointment on the third or fifteenth of the month, during the months of January, April, July, and October, thereby necessitating a clerk to labor 14 months plus before receiving his increase, increase should be reckoned from the first of the month in which appointment occurs.

Franked matter and surplus.—As all other departments of the Government pay better salaries and at the same time grant 30 days vacation, 30 days sick leave, half Saturday holiday, no Sunday work, no scheme study, and show a considerable surplus, making it appear according to bookkeeping methods that they are paying departments, while the work is thrown upon the Postal Service, without 1 cent expense for postage for each respective department, we suggest that in order to show, according to bookkeeping methods, that the Post Office Department is more than self-sustaining that due credit be given the Post Office Department's account for the amount of postage that these various departments would have had to pay as private firms, and charge these departments with an item of expense; were this done the amount of postage that would be received would almost be enough to grant the increase asked for by the postal employees. As it is the habit of large mailing firms to send in their mail without any street address, and in instances to individuals whose names are secured from some old directory, thereby entailing double handling besides directory service, we suggest that by imposing a penalty of 1 cent upon every letter given directory service, a fund would be accumulated that would contribute largely to paying the increases in salary for which we are asking.

As appropriations for postmasters' and assistant postmasters' salaries are made separate from that of clerks and carriers, and as the former is nearly as large as the latter, we believe that by abolishing the position of postmaster, and in fact every unnecessary supervisory position, sufficient funds could be obtained with which to increase the salaries of the men who actually perform the work. The head of the

post office, manager or director, or by any term, should be a man who has been brought up in the service, and one who is familiar with all minute details, and not as at present a business man or professional politician who receives his appointment to supervise a business of which he has not and can not acquire a knowledge of same unless he shall have been brought up from the bottom; we therefore ask that the title of postmaster and assistant postmaster be abloished and those positions be merged into one with a title of manager, and that the appointment be made after a competitive civil-service examination will have been held, and in which examination only those employees who have rendered 10 or more years shall have been eligible.

Sanitary conditions.—All the work of a post-office clerk is performed entirely within doors, in an atmosphere filled with the germs from the four corners of the earth, which are transmitted by mail pouches and sacks, not to mention those germs on the mail itself which is held during the course of distribution at a convenient distance from the nostrils, so as to permit of the inhaling of the germs. Gentlemen, this is one of the many reasons why 30-day sick leave should be granted and retirement legislation enacted.

Not a wage increase that we are asking.—The post-office clerks of the city of New Orleans, La., feel that they would be ungrateful if they failed to quote the following from a speech by the Hon. Peter F. Tague, of Massachusetts, in the House of Representatives on Thursday, March 21, 1918:

“It is not exactly accurate to say that postal clerks and city letter carriers are seeking a wage increase. A wage restoration is the more exact term. The present maximum wage standard for these groups of workers was fixed in 1907. Every upward jump of the cost of living since that time—and there have been many—has operated as a wage reduction for these men. Hence any increase in their compensation at this time would merely place them in the same status they were in a decade ago when Congress fixed the existing maximum wage standard.”

Just as the three wise men turned their eyes toward the East, so do the clerks now turn their eyes on this commission, and through this commission on Congress, and trust that tardy justice will be granted, and that a wage standard will be adopted, that though the good old United States dollar possess but 48 cents of purchasing power the schedule will be one that will enable each of us to live the same standard as when the dollar counted for 100 cents and this country was looked upon as an example for the balance of civilization to follow.

EXHIBIT No. 1.

¹ Examination not held, due to sufficient eligibles remaining from examination of previous year.
¹ Males only were admitted to last examination held Dec. 13, 1919.
¹ Papers of last examination held Dec. 13, 1919, in which were 37 male competitors, are not yet graded.

Resignations, clerks, and subclerks, 1912-1919.

	1912	1913	1914	1915	1916	1917	1918	1919
Clerks.....	1	4	2	3	8	10	14
Subclerks.....	3	6	3	2	7	5	20	17

EXHIBIT No. 2.

	Number of em- ployees in section.	Number of hours of work.	Number of hours per- formed during night hours.
Registry section.....	27	216	60
Inward section.....	92	736	221
Outward section.....	83	664	346
All other sections.....	79	632
Total number of employees in office.....	281	2,248	627

If a differential of six hours night work would be equivalent to eight hours daywork, then the 627 night hours would be reduced one-fourth, or 156 hours and to do this 156 hours of work (at night) would require 26 additional men, which would require but an increase in the force of 9 per cent, and this would be small when the benefits in health, etc., were considered.

STATEMENT OF MR. A. H. PERRY, SHREVEPORT, LA.

MR. PERRY. Gentlemen of the commission, I did not have time to prepare any speech or anything of that kind.

I have been in the Government service for twenty-one years and a half; two years and a half a soldier. I have worked in Manila; Cristobal and Balboa; Canal Zone; New Orleans; Seattle, Tacoma, and Camp Lewis, Wash., and Shreveport. I find the same conditions obtaining at all these places as I do at Shreveport.

We haven't any complaints against the postmaster with regard to these conditions. We have a new postmaster, but a good man. We have 34 clerks in the Shreveport post office, 15 subs, and 4 vacancies. At the last civil-service examination, held in June, 1919, there were 12 women and 4 men applicants. These applicants only got their ratings the 15th of December, and the office is employing subs, picking them up off the streets.

We believe in seniority. The other day the superintendent of the money-order division resigned. They took a man from the parcel-post window, with only three years' service, who had never written a money order in his life, and put him in there as superintendent. That is cutting us to the quick. Not that I care. I have had the "cushy" jobs and all kinds of positions, but I enjoy life more as one of the real workers.

Special clerks are a favoritism promotion. We want it abolished. Make them foremen and pay them accordingly. Some special clerks make the others do the work and they can slow down and get 12 or 14 hours and draw pay for it.

MR. STEENERSON. Does the special clerk get paid for overtime?

MR. PERRY. Yes, sir. They won't promote them to superintendent's or foremen.

MR. STEENERSON. The so-called supervisory employees don't get paid for overtime?

MR. PERRY. No, sir. We propose that you do away with the special clerks and make them foremen. We also want a trial board. That is not necessary now. They are not firing the men at this time. They don't have enough. The increase in the mails in Shreve-

port is more than the corresponding increase in the number of employes we have. We had 40,000 letters per day in Shreveport six months ago and now we have a hundred thousand. We also have oil in plenty; even running in the streets; the conditions there are really unusual. Up until eight months ago there wasn't a resignation in that office in nine years. One of the gentlemen who preceded me was talking about the remedy for conditions and who was to blame. I have seen so many of these investigations try to get at things that they can not bring out. The post office inspectors are as much to blame as anybody else, and if you knew the obligations a post-office inspector has to take before he takes office you would see something that would open your eyes. They are parasites on the face of the earth. I started once to take the examinations myself, but the obligations, I was told I had to take stopped me. I wouldn't do it.

Mr. STEENERSON. I suppose the obligations they take are to obey instructions, right or wrong?

Mr. PERRY. Yes. When they want to get you, they get you. To remedy these conditions, why not have a special commission look into these things at all times, instead of inspectors peeping through a hole all the time? It hasn't decreased stealing one bit since they inaugurated it. We are in favor of higher salaries for night men and distributors over day workers and "cushy" job workers. I was in the New Orleans post office here several years ago, and if they should put me back in the mailing division I would quit. I would sweep the streets first.

STATEMENT OF MR. H. W. CLARK, GULFPORT, MISS.

Mr. CLARK. Gentlemen, I am a clerk, but I represent the rural carriers, the city carriers, and the employees of the Gulfport office. The rural carrier's automobiles cost them \$60.14 every month. The life of a car is three years; then they need a new car.

Mr. STEENERSON. What brand is that that wears out in three years?

Mr. CLARK. A Ford—on account of the roads they wear out in three years.

Mr. BELL. The motors do not wear out in that length of time?

Mr. CLARK. No, sir; the car itself. Under our present entrance salary we can not get men to come into the service.

Senator MOSES. Are you a rural carrier?

Mr. CLARK. No, sir; I am a clerk in the office. We pay 60 cents an hour for substitutes, and we can not get them—the industries pay more. We want you to consider and give us a fair entrance salary and a fair salary to live on. Our rural carriers work six hours a day. They can not get any outside work to do; their schedule calls for them to leave at 9 and they get back at 3, and it doesn't leave them any time for other work. We have bad roads and storms, as you know.

The clerks want a living wage, so that we can raise our families, educate our children, and live right.

Senator MOSES. Where would you place that?

Mr. CLARK. I think it requires an entrance salary of \$1,800 to get the right kind of men in; men with the intelligence we require, and the class of men we should have. And I think the maximum should be \$2,400.

The city carriers would like to have an eight-hour-in-nine law. They could then take an hour for their dinner and finish up their work.

We also want a sick leave. We have a man that has spent years in the service and he has contracted blood poisoning and is laid up and we expect we clerks will have to pay his rent—after 25 years' of service.

We ask that we have a reasonable sick leave on a physician's certificate. I think all the other departments of the Government enjoy a sick leave, and I would like to see the Postal Service have it. As far as the sanitary conditions in our office go, we have ideal conditions. We have an ideal man for postmaster, and the conditions are congenial.

Briefs were submitted by James Reid, jr., New Orleans, La., R. E. Rushing, Monroe, La., L. M. Kaufman, Baton Rouge, La., V. A. Mapes, Dallas, Tex., P. E. Spreen, New Orleans, La., R. H. Phillips, Meridian, Miss., E. F. Lahnier and Felix X. Gueydan, jr., New Orleans, La., Carl T. Reisner, Waco, Tex., A. A. Lilly and J. Dixie Smith, Houston, Tex., and Sidney Hess, New Orleans, La., as follows:

BRIEF SUBMITTED BY JAMES REID, JR., NEW ORLEANS, LA.

I desire to say that there are, perhaps, no set of public or private employees upon whose efficiency and faithfulness all the activities of this great Nation depend as they must necessarily depend upon the postal employee, and yet no public or private employee performing similar services is so miserably compensated or so shamefully neglected.

It is needless to mention that it requires all of five years' constant study and training to equip the individual so that he or she may qualify as a competent post-office clerk, and yet they receive no consideration and no reward for this devotion to a service other than a small wage which is barely sufficient to allow them to exist—not live.

A comparison of the figures taken at random from among important industries with those obtaining in the United States Postal Service impels us respectfully to petition the commission to recommend legislation reclassifying the salaries of all clerks in first and second class offices as follows:

Post-office clerks to be divided into five salary grades ranging from \$1,500 to \$2,300, and to progress automatically from the lowest to the highest grade through annual promotions of \$200 each, but only after serving one full year in the next lower grade; and to provide for two grades of special clerks at \$2,400 and \$2,500, respectively.

If salary statistics should fail to convince you of the urgent needs of the postal employees (which it certainly can not fail to do), the alarming and unprecedented number of resignations of post-office clerks, which in the past few years have taken place in every large office throughout the country, should give rise to your sincere concern for the maintenance of the rapidly decreasing efficiency of the Postal Service.

If the Government's interests are to be considered above those of its servants, then it is in perfect consistency with this idea that I suggest the paying of materially increased salaries to all postal employees, to attract capable and more intelligent men to the service and thereby uphold, if not heighten, its efficiency.

I believe that the few facts and figures with which I have acquainted you are of such character as to preclude further argument in our plea for salary reclassification, and beg to remain, with abiding faith in the wisdom and justice of the commission.

BRIEF SUBMITTED BY MR. R. E. RUSHING, MONROE, LA

Having been selected to appear before your honorable body as a representative of the clerical force of the Monroe, La., post office, to submit data, etc., showing why our present salaries are entirely inadequate for our support, I have prepared this brief, which I wish to submit, trusting same to receive your earnest consideration.

First. I will take up the increased cost of life's necessities in comparison with the increased compensation of post-office clerks, covering the period since 1914 to the present time.

The following table of comparison in the prices of a few of the main items necessary for the maintenance of life tend to show the increase in the cost of living since 1914 that we have been compelled to meet in order to live and support our families. The prices given are what we actually paid for the items listed, in 1914, and what we are having to pay in Monroe, La., to-day:

	1914	1919
Flour, per 24-pound sack.....	\$0.85	\$1.75
Meal, per 24-pound sack.....	.45	1.35
Lard, per pound.....	.09	.29
Bacon, per pound, according to kind.....	.10-\$0.25	.30-\$0.65
Shoes, per pair.....	2.50- 4.50	5.00-10.00
Suit of clothes, fair grade.....	15.00-20.00	30.00-45.00
House rent, five rooms.....	15.00	35.00

Above items considered of good grade, etc.

The foregoing table shows an increase of over 100 per cent. While some items of minor importance have not advanced so much, yet the average percentage of increase will not fall much below 100 per cent.

To meet this increase in prices of everyday necessities, we have received by the various acts and appropriations of Congress, over and above the regular automatic promotions, a bonus averaging about 40 per cent, taking all automatic grades into consideration.

It must be borne in mind, however, that all automatic promotions were suspended during the fiscal year July 1, 1918, to June 30, 1919, which, in effect, is keeping clerks in grades 1 to 5 out of \$100 per year salary if the \$200 raise, July 1, 1918, is to be considered a straight bonus. Otherwise this \$200 raise is reduced to an actual bonus of \$100.

It must also be remembered that all these acts, etc., except the automatic raise this year are only temporary and cease to function June 30, 1920, unless perpetuated by Congress before that time, and will reduce all salaries to the old basis with the loss of one yearly promotion, or increase.

The entire increase in our salaries since July 1, 1918, counting both regular promotions and bonuses, only figures an average of approximately 48 or 49 per cent.

From the above it can be seen that with an increase in our income of only 40 per cent more than was figured to meet our requirements at this time in 1914, we have had to and are still having to combat an increase in the cost of living of nearly 100 per cent.

How have we accomplished it?

We have purchased table necessities of the most frugal kind, and in no overabundance. We have clothed ourselves and families in the cheapest clothing we could get, and in bare quantities at that; we have been compelled to forego, in a great measure, our civic, social, and church duties; and personally speaking, for myself, will state that I have been compelled to borrow money at times, some of which I still owe.

Second. I will now consider our salaries in comparison with salaries paid by private corporations and others:

Common labor, that in 1914 was paid 15 to 20 cents per hour, is now paid 35 to 45 cents per hour. Prior to the last act of Congress granting a varying scale of increase for the present fiscal year ending June 30, 1920, the lowest wage paid a common laborer was in excess of the initial salary of a post-office clerk, while the higher was almost equal to a clerk's salary who had reached the highest automatic grade after several years' hard work and study. The salary paid our highest automatic grade clerks was only about 50 cents per hour. Our last increase or bonus placed the entrance grade salary about equal to the wage paid a common laborer.

Carpenters' wages have advanced since 1914 from 35 cents an hour to 80 cents an hour, and carpenters' foremen draw \$1 per hour. Clerks in retail stores that were paid about \$85 per month, now receive from \$125 to \$150 per month, and with the privilege they enjoy of being in a position to obtain their needed supplies at wholesale prices, or with only a slight per cent added, gives them an additional \$10 to \$20 per month advantage over post-office clerks having to pay full retail prices.

Painters and paper hangers, when working for a contractor, are paid 90 cents per hour, and if working for private parties they charge 96 cents per hour. Plumbers are to-day being paid \$1 per hour.

I am not personally familiar with wages paid by all lines of private industries, so can not give exact figures in some instances, but the increase in wages granted employees in such industries affords them a salary in most cases in excess of that paid post-office clerks.

These facts do not exhibit any attraction to draw competent men into the service or to keep the older ones on the job.

A post-office clerk, being in closer touch with and serving the mass of people more so than any other class of employees, and having to devote so much of his time that he receives no compensation for acquiring greater efficiency that he may serve the public with the highest degree of accuracy, I deem it no more than his just dues that he be paid a salary commensurate with his position instead of being the most poorly paid of any class of employees where intellect is a requirement.

Third. Having now viewed the situation from the point of income against outlay as experienced by a post-office clerk, and having made a comparison somewhat of salaries, let us now look at the department's requirements of a post-office clerk.

To begin with, the department does not desire an incompetent or illiterate person on its pay roll as a clerk, so the civil service open competitive examination is brought into play which all applicants are required to take, making an average grade of not less than 70 per cent, to become eligible for appointment. From this examination an eligible register is created from which appointments are made, according to the percentage made by applicants on said examination.

Thus it will be seen, that in order to gain entrance to the service, a person must possess a fair education. He must also possess other qualifications, such as sobriety, industriousness, physical abilities, etc. He is required to pass a physical examination before being appointed.

The qualifications necessary to meet these requirements alone should be sufficient to merit an entrance salary in excess of the wage paid a common laborer.

After a clerk has entered the service he is tested at intervals for his efficiency by means of what is known as case examinations; his promotion to the next higher grade rests largely upon the result of these examinations.

In order to successfully pass these examinations, he is compelled to memorize from 3,000 to 10,000 facts and must be able to separate and put into case, labeled to represent the supply of different offices, cards, showing names only of such different offices. He is required to attain a speed in this examination of not less than 16 cards, handled correctly, per minute, and must make a grade of 95 per cent correct. He must also have a fair knowledge of the Postal Laws and Regulations, a volume of over 1,700 sections.

To accomplish all this, he is compelled to devote a great deal of his time, while off duty, to hard study, for which he receives no compensation.

I am aware of no instance in the employment by private concerns wherein an employee is required to spend his time off duty studying in order to gain greater efficiency or to further his employer's interest without receiving extra compensation for same.

I think Congress should make provisions whereby a period for study would be allowed during time on duty.

But to return to the question of salaries: If a post-office clerk's salary in 1914 could at that time be considered in fair proportion to his expenses—I do not say that it was—how can he be expected to combat the high cost of living at this day and time when the increased cost of living is fully 50 per cent more than the increase in his salary?

Summing it all up, and seeing that even unskilled labor in a great many instances is being paid a better salary to-day than trained and efficient employees in the post office of the great United States, it is plain to be seen that the present salary schedule is too unattractive to hold efficient employees or to recruit new ones.

According to a late report rendered by the Bureau of Statistics of the Department of Labor, an income of \$1,800 is required to purchase the actual necessities of life for a family of five for one year.

At first glance the increase in salaries asked for may seem out of all proportion or unreasonable; but if you will kindly review the past and compare the small increases allowed clerks with the increases granted private employees from time to time as the cost of living advanced, it should be clear to any one that the increase we are now asking for is not unreasonable and is no more than we are justly entitled to.

At the present time there are a great many clerks who like the post-office work, are loyal to the department to the extreme, and are trying to hold on to the job believing that Congress will come to their relief with a readjustment of salaries on an equitable basis in the near future, who will be forced to resign and seek other employment more remunerative should their expectations meet with disappointment. Others are leaving the service now, three of our oldest and best clerks in this office having resigned within the past 60 days.

In view of the foregoing facts, I, as a representative of the clerks of Monroe, La., in particular, and all post-office clerks in general, urgently request that your honorable body, in behalf of the efficiency of the service, as well as the living conditions of the clerks of the Post Office Department, give earnest and serious consideration to the enactment of a reclassification law for clerks and carriers, making the salary of each grade not less than the amounts stipulated herein: First grade, \$1,800; second grade, \$2,000; third grade, \$2,100; fourth grade, \$2,200; fifth grade, \$2,300; sixth grade, \$2,400; one special grade, \$2,500. Promotions following one year's satisfactory service in each lower grade to and including the sixth grade.

I hope the foregoing will enable you to see the urgent needs of a reclassification of salaries that will afford post-office clerks and carriers not merely a bare living but a salary such as they merit, and that such a measure before the proper authorities will receive your earnest recommendation and support. I respectfully submit this brief.

BRIEF FILED BY MR. L. M. KAUFMAN FOR THE CLERKS OF BATON ROUGE, LA.

Overtime excessive and burdensome. Excessive because of insufficient clerical force, a lack of substitutes to meet the unusual conditions. Burdensome because it decreases the efficiency, impairs the health, thereby detrimental to the service. Overtime for Sunday and holiday service is optional with the clerk, but living conditions compel him to take the overtime in pay on account of the small salary paid by the Post Office Department. We feel that time and a half should be paid for overtime; or in cases where this service is necessary that time and a half off be allowed the employee.

Substitute service, when available, must at all times be used to relieve congested conditions, to relieve clerks when off with or without pay.

Clerks whose employment requires scheme study should be allowed a stated period of time on duty for this study.

House rent in our community is \$25 and upward. Water, light, and fuel are an additional expense.

All business houses, firms, and factories of any consequence give substantial bonuses to all employees. A few are here mentioned: Louisiana National Bank, Union Bank & Trust Co., Bank of Baton Rouge, Fernbacher Dry Goods Co., Standard Oil Co. of Louisiana, and numerous other concerns which it would be useless to mention.

Wage scale paid by Standard Oil Co. of Louisiana.

	Salary with- out bonus.	Salary with bonus.
Still man.....	\$205. 00	\$225. 00
Assistant still man.....	177. 00	195. 00
Pump man.....	159. 00	175. 00
Watchman.....	126. 00	139. 00
Bricklayer.....	184. 00	202. 00
Pipefitter.....	160. 00	176. 00
Carpenter.....	160. 00	176. 00
Painters.....	110. 00	121. 00
Machinists.....	172. 00	189. 00
Boiler maker (calker).....	188. 00	206. 00
Boiler maker (riveter).....	176. 00	193. 00
Timekeeper (first class).....	138. 00	151. 00
Timekeeper (second class).....	122. 00	134. 00
Timekeeper (third class).....	110. 00	121. 00
Laborer (white).....	110. 00	121. 00
Laborer (colored).....	66. 00	73. 00

This company employs 3,300 men. Salaries of the employees amount to one-third of the total deposits of all banks in the city of Baton Rouge. They have had 10 increases in the past four years, 8 actual increases in pay, 1 was a change from 9 to 8 hours, and 1 a 10 per cent temporary bonus. They are allowed time and a half for overtime and double time for Sundays and holidays.

Night work is hard and laborious, and we feel that 40 minutes' night duty is equivalent to 60 minutes of daywork.

Seniority, all things being equal, should prevail.

Examinations are frequently held without male applicants; therefore it is necessary to employ inexperienced and incompetent help to fill the vacancies which occur from time to time by voluntary resignations.

Betterment of the service by increase in pay for the employee acts as an incentive for him to give better and more efficient service. This increase relieves the employee of worrying about meeting expenses, better fitting his mind to meet the needs of his position.

Thirty days' annual leave of absence with pay is necessary and is so recognized by other departments of the Government. We should also have 30 days' sick leave with pay, which is also recognized by other departments of the Government and other corporations.

An old-age retirement plan should be provided and put into operation as soon as possible by the Government, thereby eliminating the incompetent help which is caused by old age.

There should be an arbitration board before which grievances and all other differences between the employees and the department could be brought and satisfactorily adjusted to the best interest of all concerned.

Supervisory officials are required to perform as many or more hours of duty than a clerk without additional compensation.

There should not be such a marked difference in the salaries of the postmaster and his assistant; that there should be a greater difference in salaries between the clerks and the supervisory officials.

BRIEF SUBMITTED BY MR. V. A. MAPES, DALLAS, TEX.

We greatly appreciate the opportunity to come before this honorable body on behalf of the post-office clerks of the cities of Dallas and Galveston, Tex.

We would be glad to consider with you present conditions and the urgent need of postal employees, but realizing that your time is limited we will go directly into the subject matter that comes under the province of this commission.

The character and durability of a nation rests on the family and home and in reviewing the questions before this commission we will necessarily confine ourselves to the man of family.

We desire, briefly, to direct your attention to the things that are needed to satisfy the postal workers of the country, to wit: Scheme work, night work, overtime, compensation, and retirement.

It is a fact that any one of the three subjects first named is of nearly equal importance as the question of salary, and in point of fact are inseparable.

SCHEME WORK.

A great percentage of post-office clerks are required to keep "schemes" posted daily and to "throw" them two or three times a year with a high average. They are not allowed time for this work but are required to prepare when off duty. Scheme work is the most trying of any performed in the Postal Service and will demand an average of two months' time per year, thus requiring 14 months' work for the pay of 12. If clerks throwing schemes were allowed at least one hour each day, while on duty, to post and memorize schemes, it would reduce the discontent now prevalent, largely increase the efficiency of the service, and be manifest justice.

NIGHT WORK.

Night work is a necessity in all the large offices in the country. It saps the vitality of the men who are required to reverse the order of nature and are unable to sleep in the daylight hours because of excessive heat or noise. It can not be successfully contended that this work should not be paid more than daywork. There is a bill now before Congress making 45 minutes equal to one hour and giving time and one-half for overtime. We urge that this legislation is necessary and would redound for the good of the service. So dreaded is night work that, from a personal canvass of the Dallas, Tex., office, I found that a majority would choose daywork even with the above-cited bill enacted into law.

OVERTIME.

At present a vast amount of the work in post offices is being done by overtime. With 25 regular clerks added to the Dallas, Tex., office there would still be need for overtime. Under the present wage scale it is necessary for clerks to work overtime to

make enough to live. Long hours produce inanity which is the source of inefficiency. Eight hours work each day is enough, and we would ask, for the double purpose of proper compensation and as an inducement to the department to provide a sufficient number of clerks to perform the work, that we be paid double for overtime.

COMPENSATION AND RETIREMENT.

These two subjects are too closely related to be separated. That intelligent citizens of a great Republic, after a life time of toil should, in their old age, be dependents and objects of charity is unthinkable, and yet, under the present wage scale, is unavoidable. From an economic standpoint, if a person devotes his working years to the business of "labor" and that labor will not produce enough to maintain him in his declining years, then his business is a failure and life has not been worth living. The only money that it costs the Government to maintain its immense postal business is the amount of the deficit when there is one. Why so much ado about the postal deficit when that deficit is the total cost to the Government for carrying on the largest business in the world is hard to understand. Recently the deficit has been changed to a surplus of millions and these millions represent excess profit and have been wrung from underpaid and harassed employees.

We submit that postal employees must be paid enough to maintain their families in comfort and to lay enough by to sustain them in the latter years, or they must be paid enough to sustain them in comfort and be pensioned in the latter years. An addition of 10 per cent for the first proposition is not nearly enough. In fact, we believe, that at this time neither the Government nor large corporations would be either willing or able to attempt this plan. It is the more expensive way. So, for the present, we would urge an adequate present salary and a 50 per cent retirement bill to be paid by the Government. We ask you for a salary bill working automatically from \$1,800 for the first grade to \$2,200 for the sixth grade.

The subjects I have presented to you are the things universally demanded by the personnel of the service. Nothing less is justice; nothing less than justice will satisfy. The injustice of no recognition for scheme work or night hours is a constant irritant; it rankles in the hearts of the employees; it is a subject for discussion every day in every large office in the land; it acts as a pall on the entire force. A satisfied man can do more work and better work than one who is dissatisfied, even though the latter works under the compulsion of his own will. It matters not how liberal a wage scale may be adopted, so long as one works on duty only, while the other is required to do a large amount of work off duty without additional pay, there will be dissatisfaction and unrest. These things are vital to the efficiency of the service.

The wage scale of the postal worker has never been more than a meager existence—a constant striving to make ends meet. The average post-office clerk with 20 years' service has never owned more than one suit of clothes at a time and has been compelled to wear them as long as decency would permit; has worked nights, Sundays, and holidays to supplement his salary; has munched peanuts in lieu of lunches; foregone even the inexpensive pleasure of the picture show, and to-day can not send his child to college or finance a funeral except on the installment plan.

With this great Government spending millions of dollars for the uplift of humanity in foreign lands, haughtily spurning compensation for its immense outlay, we bow our heads in shame as we humbly petition for a living wage.

In every large city in the land there are old men, tottering with senility, going to the post office daily with fear in their hearts, trembling lest they be removed for inefficiency, and scarcely able to do any work at all. Why, in God's name, don't the Government give them an adequate pension and tell them to go home and rest and live in peace? With young men in their places the Government would be getting a full day's work for one-half pay. This would be both justice and economy. If only the spirit of Christ permeated the halls of Congress and the councils of the moneyed interests of this land, what a glorious country this would be. But there is a rumble, coming nearer and nearer, deep and ominous in its import. Let us take heed while there is yet time.

Only a few weeks ago a Dallas, Tex., post-office clerk stood before the court to receive sentence for the theft of registered mail. Among other things the judge said: "There is one mitigating circumstance in your case and that is that the Government placed you in a position of trust and responsibility and only paid you \$1,000 per year." What a terrible indictment against the Government from a Federal judge sitting on the bench.

Buoyancy and sanguinity are lacking in the Postal Service to-day. In their place has come a lassitude that borders on despair. Incentive is gone. The enactment into law of the points I have here suggested would metamorphose the whole system into an aggressive and efficient body.

1600

Examinations are to employ inexperienced from time to time.

Betterment of the for him to give better of worrying about his position.

Thirty days' annual other departments of pay, which is also for corporations.

An old-age retirement possible by the Government caused by old age.

There should be arrangements between the employees adjusted to the best interest.

Supervisory official clerk without additional.

There should not be his assistant; that the and the supervisory official.

BRIEF 8

We greatly appreciate of the post-office clerks.

We would be glad to postal employees, but subject matter that concerns.

The character and during the questions before man of family.

We desire, briefly, to the postal workers of compensation, and retirement.

It is a fact that any one as the question of salary.

A great percentage of and to "throw" them allowed time for this work is the most trying of any of two months' time per clerks throwing scheme-post and memorize scheme increase the efficiency of.

Night work is a necessity of the men who are required the daylight hours because contended that this work now before Congress make half for overtime. We are the good of the service. Dallas, Tex., office, I for above-cited bill enacted.

At present a vast amount 25 regular clerks added to time. Under the present

The worth of the matters here presented are too obvious to require further elaboration before this intelligent commission. The mere fact that Congress has seen fit to constitute this commission is a rift in the clouds, a ray of hope; may it prove the lodestar that leads to the amplitude of contentment.

BRIEF SUBMITTED BY MR. P. E. SPRECK, NEW ORLEANS, LA.

I desire to submit the following brief relative to night work and scheme study reference being had to letter of July 29, 1919 to you through our Senator Gay, a duplicate of which is herewith attached, and which gives detailed explanations in detail.

1. There can be no just and proper reclassification of salaries of post-office clerks without taking into consideration night work and scheme study.

2. Night work is performed by 145 of the 285 employees in the clerical force of the office, and likewise as many clerks study schemes at home.

3. Night work is detrimental to health, impairs the eyesight, is unnatural, and extra compensation should be granted, either in a lesser number of hours required for a week's work or by a salary differential, a lesser number of hours of night work and time for scheme study being, in my opinion, preferable to a salary differential. The granting of time off for scheme study would permit a prompt training of the new men and such men are now lacking in the Postal Service.

4. If six and one-half hours' work at night would be made the equivalent of eight hours of day work much unnecessary work now done at night could and would be done more rapidly, economically, and efficiently during the day.

5. The requirement of home study is a direct violation of the eight-hour law.

6. This study must be done at home, for it is known at the time a clerk is ordered to examination that there is absolutely no time to study at the office. It is a violation to giving a clerk an hour's work to take home and complete.

7. The granting of time off for scheme study would greatly benefit the service.

8. Much of this scheme study is entirely unnecessary.

9. If time were granted, no excuse could be offered for failing to qualify at a first examination.

10. If time were granted, men could be trained in a short while to perform rapid and reliable distribution.

11. As it is at present, it requires months to acquire knowledge that could be acquired in days.

12. Home study means that one half of the clerks when they leave the office have finished their work, while the other half is compelled to work at home an hour or more after they leave.

13. This study is not required the whole year round.

14. The more diligent a clerk studies and the more facts he memorizes the more valuable he is to the service and the less chance he has of obtaining permanent day work.

15. A man's knowledge of distribution, willingness, efficiency, and rapidity of work are real hindrances to his obtaining permanent day duty.

16. An hour a day for as many days as, in the judgment of the department, is required for a clerk to master these distributing schemes could be granted. For instance, if a clerk is scheduled to report for duty at 10 a. m. he could report at 11 a. m. for the number of days allotted him in which to prepare for examination. He would not have to show the results of study done at the expense of the Government.

17. This would be both a simple and economical way of compensating for home study.

18. Such time could be used, as he is paid, can not be used.

19. The error is not by being paid for home study, but by being paid for home study.

20. I consider the matter for that reason.

21. Any expense to the service is home on his own time is virtual.

22. The department, and the knowledge is an indication of his knowledge.

23. It is placed on the clerks who study at home.

24. In your consideration of our suggestions.

25. I am, Sir, very respectfully,

Very truly yours,

P. E. SPRECK.

The letter referred to follows:

NEW ORLEANS, LA., July 29, 1919.

HON. EDWARD J. GAY,
United States Senator from Louisiana,
Washington, D. C.

DEAR SENATOR. On behalf of the post-office clerks of New Orleans, La., I desire to congratulate you on your appointment to serve as one of the congressional commission authorized to investigate the salaries of all postal employees, and take this means of bringing to the attention of the Commission, through you, two things which we deem of vital importance in the interest of efficient service and for the welfare and justice of the post-office clerks of this country.

There are to-day two subjects in connection with the work of mail distributors in a post office that deserve serious consideration by the Commission and which should be remedied. One is the requirement of a clerk to study schemes of distribution at home and pass case examinations each year, and the other is compulsory night work. With regard case examinations, we will endeavor to show as clearly as possible for us to do, just what is meant by case examinations.

At the time a clerk receives a regular appointment at this office, and the same applies to all other offices, he is furnished with a distribution scheme of Louisiana or a city distribution scheme of New Orleans, and is given for the preparation of an examination on the State of Louisiana from 60 to 75 days. This examination is divided into two sections, "A" and "B," section "A" consisting at this date of 55 separations, or routes, and 594 offices; while section "B" consists of 71 separations, or routes, and 703 offices. To successfully pass these examinations, a clerk is obliged to study at home not less than one hour a day at least 60 days, and as overtime, from one to hours is very often necessary or required of the clerks, you can judge what a hardship and injustice it is to compel a clerk to acquire at his own time at home and at his own expense that knowledge which is so essential to the proper performance of his duties as distributor. As is often the case, it is impossible, because of long hours of duty, sickness at home, etc., to devote an hour or longer to this home study each day for a 60-day period, and each day lost in study requires additional time, which often exceeds the 75 days allowed. After a thorough knowledge of the distribution of mail for the State of Louisiana is acquired, which includes not only the names of post offices and routes, but train schedules and time of connection at various junctions, this clerk is furnished with a general scheme of Mississippi, which is also divided into two sections, section "A" consisting of 73 separations, or routes, and 582 cards; and section "B," 66 separations, or routes, and 662 cards. The same preparation and time required to master this scheme are necessary in the case of a general scheme of Louisiana. After a clerk is efficient in the distribution of mail for these States, which requires from two to four years of constant practice and diligent study, he is called a two-State clerk and is then furnished with a copy of one of the following general schemes, consisting of separations, or routes, and offices as herein specified:

Arkansas.—Section A, 61 separations and 962 offices; section B, 88 separations and 851 offices

Alabama.—Section A, 67 separations and 640 cards; section B, 60 separations and 684 cards.

Georgia.—Section A, 77 separations and 653 cards; section B, 98 separations and 665 cards.

Tennessee.—Section A, 67 separations and 555 cards; section B, 59 separations and 584 cards.

Texas.—Section A, 109 separations and 851 cards; section B, 104 separations and 774 cards; section C, 135 separations and 1,002 cards.

After he has perfected himself in the distribution of his three States, he is required each year to pass an examination on one of the three, with an average of 98 per cent and 16 correct cards distributed per minute, so you can see, my dear Senator, that the life of a post-office clerk is one round of study and preparedness at home, for which he receives no compensation. Nor is this all, for he has to keep these schemes corrected from general orders of the various divisions of the Railway Mail Service having jurisdiction over these States, and these corrections consist of new offices added, old ones discontinued, new routes added, old ones changed, with resultant changes in distribution, and he is required to keep corrected train schedules furnished him, in order to dispatch mail advantageously and expeditiously.

In the case where a clerk is furnished with a scheme of city distribution, he is required to prepare, as previously stated, for the following examinations:

Five-trip carriers and division separations.—Thirty-three separations and 886 cards.

Box holders.—Section A, 11 separations and 536 cards; section B, 11 separations and 547 cards.

Five-trip carriers and divisions A, D, and G.—Fifty-three separations and 600 cards.

Divisions E and F.—Forty-nine separations and 670 cards.

With the exception of the first examination, five-trip carriers and division separations, each clerk engaged in city distribution is required to pass each year a case examination on the above subjects, the average being 98 per cent and 16 correct cards distributed per minute. City clerks, too, are required to keep all schemes corrected up to date from orders issued by this office from time to time. Failing to attain the required average on these examinations during the fiscal year results in increase of salary being withheld.

As a remedial measure in connection with home study and case examination, I would respectfully suggest that time for study be allowed during the eight hours of a clerk's tour of duty, as we believe it to be manifestly unfair, unjust, and not in keeping with the spirit of the eight-hour law, to compel an employee to devote his hours for recreation in acquiring knowledge so essential to the interest of his employee, the United States Government, and which knowledge is of no benefit nor service to him in any other line of business.

The subject of night work has been one of long discussion and is very peculiar, for the reason that those clerks who are required to master schemes of distribution at home are obliged to perform also almost all night duty in post offices, as I dare say 95 per cent of night work consists of distribution of the mails, so that a double imposition and hardship are placed on distributors. Home study and night work have caused and is causing dissatisfaction, discontent, discord, and dissention among the clerks, preventing intelligent men from entering the post offices, and causing many of the highly trained and efficient distributors to leave, thereby interfering with the efficiency of the Postal Service.

It matters not just how conscientious, hardworking, and painstaking or how interested in the service a man may be, continuous home study and night work, year after year, with no prospects of a betterment of conditions in the way of permanent day duty and without additional compensation for extra work in connection with scheme study at home, are bound to breed indifference in many, and I venture to say that there is no business in the country to-day that requires such home preparation as is demanded by the Post Office Department.

Fifty-five per cent of the work in all large offices consist of distribution of the mails, and this means that 55 per cent of the men are obliged to master schemes at home, correct schemes and schedules and perform night work, while 45 per cent of the clerical force is relieved of home study and are permanently assigned to day work, although no additional remuneration is allowed for the extra work at home and night duty performed.

Because of a clerk's knowledge of distribution, patiently acquired in the hope that he will be rewarded with a day position, he is very often deprived of such assignment because of his experience and value as a distributor, and the coveted position, with day duty and without night work nor scheme study, etc., is given to some clerk without this training, and it is these things that are causing a growing sentiment against home study that are resulting in the interference with the maintenance of that high standard of efficiency so necessary and so much desired in the Postal Service.

As the position of distributor is one of importance, efforts should be made to make it an attractive one, and if this can not be done by eliminating home study and the making of 45 minutes the equivalent to an hour's night work, or in some other manner, then it should be made more desirable by additional compensation commensurate with the studies and night work performed.

Of course, less study is required as a clerk grows older in the service, but considerable home study is required each year nevertheless.

We sincerely hope, dear sirs, that your honorable body will give these subjects the earnest consideration they deserve and that you will see the justice of this appeal, and should favorable recommendations or suggestions along these lines prove successful, your commission will merit and receive the everlasting gratitude and thanks of the vast number of mail distributors throughout our great country.

Permit me to suggest that this matter, covered by sections 309 and 311 of the Postal Laws and Regulations, be brought to attention of the Comptroller of the Treasury, through the First Assistant Postmaster General, for an interpretation and ruling as to whether or not home study requirements are in violation of the eight-hour law.

With sincere thanks in advance for any consideration given these subjects, and respectfully requesting an acknowledgment of this letter, I beg to remain,

Very respectfully,

P. E. SPREEN,
Special Clerk, New Orleans Post Office.

Attached herewith is an itemized account of my expenses from August 5 to and including September 2, 1919 (statement on file with the commission). During these 29 days I spent \$118.48 and bought no medicine, shoes, tobacco, liquor, nor clothes of any kind, and practically nothing for pleasure and amusements nor car fare.

Based on this, and the fact that the cost of living is still on the increase and our recent increase in salary is only partly meeting the recent increase in price of food-stuffs, I believe that, for the present at least, the entrance salary of clerks should be \$1,800 and thereafter automatically increased \$200 per annum to \$2,400, the clerk's record justifying, in order that sufficient money may be laid aside for the proper education of a man's family.

With regard to reclassification of salaries, permit me to say that if time were allowed off for scheme study and six and one-half hours at night were made the equivalent to eight hours of day work, it is my opinion that no differential in salary should be made for distributors, and the designation of special clerk could be abolished. It was the intention, as I understood it at the time the designation of special clerk was made, that such should be given to expert distributors, but such has not been the case.

Competitive examinations among clerks for the position of supervisor should be held when vacancies occur. These examinations to be on a man's knowledge of the service, his education, executive ability, interest manifested in the service, etc., and be open to all applicants. If the Government deems it proper to hold such examinations in order to obtain the best men for Government positions, the same thing should apply in the selection of the men to supervise the conduct of the offices and to safeguard and preserve the revenues thereof. The holding of such examinations would eliminate the necessity of soliciting influence to obtain such positions and avoid much dissention and dissatisfaction as at present exists.

Seniority at all times should prevail, all things being equal.

STATEMENT FILED BY Mr. R. H. PHILLIPS, MERIDIAN, MISS.

In the matter of adequate salaries the employees of the Meridian (Miss.) post office desire to present the following facts for consideration by the honorable commission:

1. Every employee in the post office, whether clerk, carrier or rural carrier, is required to take a competitive examination and obtain a rating on eligible list, then he waits until his turn comes to be called on as substitute.

2. After appointment as substitute he is required to be at the post office whenever the authorities direct. His work at times is only for one to two hours a day. This prevents him from accepting other employment during his period of substitute service by which he could gain a livelihood. Oftentimes a substitute is obliged to wait for years before he is appointed a regular clerk. We have a carrier in this office who served for three years before he obtained a regular appointment. Up to the beginning of the holidays, this office had only one regular man substitute and that, a carrier. During the holiday period this office was forced to use noncertified substitutes because of the pay received by substitutes will not hold good men.

3. That the system of appointment and service of substitutes as now regulated practically eliminates the possibility of a married man accepting appointment. The uncertainty of the period of service and the small remuneration he will derive are the outstanding obstacles for him. Recently we had one substitute to leave this office and go to work for a newspaper at a salary of \$30 per week with the promise of promotion to \$40 a week.

4. That after serving a successful period as a substitute a man is obliged to accept a regular appointment at the lowest salary paid in the service and again work for five years before reaching the highest grade. This is wrong for a substitute is obliged to learn all the branches of work and be able to fill any vacancy that occurs in the regular force, therefore when his regular appointment does come, he is as valuable to the service as he will ever be. He should be given a salary commensurate with the responsibilities and knowledge he has acquired.

5. That the present rate of pay for post-office employee is entirely inadequate and should be raised to 80 cents per hour for substitutes and to \$1,800 to \$2,400 for regular clerks.

6. That the postal employees are entitled to 30 days annual leave for vacation with pay the same as other departmental clerks who work in Washington, D. C. This is necessary to the health and happiness of the men and needed for sufficient rest after 11 months of hard work.

7. That the Bureau of Statistics, Department of Labor, in Washington, has recently given out that the average workingman requires \$1,800 a year with which to purchase

the necessities of life, therefore the lowest grade of post-office employees should be not less than this amount. Surely no man will look favorably upon an appointment if it does not pay sufficient to provide the necessities of life for his family.

8. That the commission well knows that the cost of living has advanced over 100 per cent in the past five years but the wages of post-office employees have advanced only 25 per cent, and this is but temporary. We would therefore suggest that this salary be raised to \$1,800 to \$2,400 and made permanent.

9. That this burden is daily making it more difficult to induce men of any intelligence to enter the service. Why should they, when an unskilled laborer can receive more than a post office employee. This is having effect of getting a class of men that in the past would never have been accepted.

10. That work performed by clerks and carriers is highly essential, but it does not fit a man for any other line of work. On the contrary, after a few years of routine post-office work a man finds it hard to adapt himself to anything else. In the post office he is an asset and practically worthless out of it. In order to function properly the Postal Service must have trained men in the service, and why not pay these men who are trained and efficient now and hold them, rather than have them resign or force them to go where they can get living wages.

11. That from actual contract with fellow workers, the writer can truthfully say that 75 per cent of the employees in this office have been obliged to go in debt during the past three years in order to buy the necessities of life. This is causing a great deal of worry and undue hardship. The salaries of these men should be raised sufficiently to enable them to get out of debt and live without continual worry of how to make ends meet.

12. The postal employees should not be obliged to work for a mere living wage; they should be paid enough so that they could really save a little with which to care for themselves and family when the time arrives that they can no longer do work required of them. This is made doubly necessary from the fact that the Government has no retirement or pension system for its men. This is another phase that the commission should give a great deal of thought to. Every large corporation to-day has some form of pension for old employees. It is indeed a harsh thought for a man to think that after spending the best years of his life in the service of his Government, he must when old step aside without any consideration.

13. That the post-office employees can only get relief through legislation by Congress, therefore the employees of the Meridian, Miss., post office respectfully and urgently request the joint commission on postal salaries to report back to Congress and ask their immediate passage the following reforms and wages which we consider just and equitable and necessary for the Postal Service:

(a) Increase of salary to \$2,400 per annum and establishment of three grades, respectively—\$1,800, \$2,100, and \$2,400.

(b) The rate of pay for substitutes to be 90 cents per hour with a guaranty of \$100 per month.

(c) Establishment of a commission or a board of arbitration to hear and pass final judgment on all complaints from employees.

(d) Establishment of a 30-day annual vacation or leave of absence with pay.

STATEMENT SUBMITTED BY MESSRS. E. F. LAHNIER AND FELIX X. GUEYDAN, JR., NEW ORLEANS, LA.

As the New Orleans office is the largest exchange office for foreign mails in the South, in the event of a reclassification of clerks, we most respectfully ask that clerks handling this class of mail matter be given just consideration.

The duties are of a nature requiring the examination of mail to ascertain whether it belongs to the classes admissible to the international mails; all must be distributed accurately; if not, are liable to delay from 15 to 60 days, and the separation is made the same as domestic. For instance, the country of Chile is divided into 9 exchange offices, to which 800 to 1,000 different offices are distributed. This office exchanges mail with the whole of Central America, West Coast of South America, and some of the West Indies, in addition mails routed via New York, San Francisco, Seattle, and Chicago. The making up of these mails require able clerks; all classes of mails are weighed separately and this weight reduced to grams, from which statements are made giving steamers credit for the carrying of mails; also the register of steamer has to be stated, as American steamers are paid more than foreign register. It is also necessary to include in the letter sack for an exchange office a letter bill describing all mail sent, and a waybill must accompany the mails to steamers; all parcel post

is entered on bills. In addition to above, there are special prohibitions governing Postal Union mails, likewise parcels. For instance, it would be possible to send a cannon to Denmark by letter post, and the same article is prohibited to Great Britain by the same mail. It is also necessary for foreign clerks to be familiar with joint regulations governing dutiable articles received from foreign countries, and if care is not given it will be possible to smuggle matter which is dutiable into this country.

The foreign mails are governed by the Detail Regulation for the Execution of the Postal Convention of Rome, and comprise the following classification: Letters, post cards, printed matter, samples of merchandise, commercial papers. The parcel-post matter is governed by the individual countries interested. For instance, the country of Great Britain has no connection with the country of Argentina; also there are many intricate details that require constant study.

If the same duties and detailed information that is necessary to properly handle this kind of mail be required by a private company or corporation, the amount of salary given would be greatly in excess of that received.

BRIEF SUBMITTED BY MR. CARL T. REISNER, WACO, TEX.

The Waco post office clerks appreciate the desire of Congress to adjust the economic distress prevailing among post office clerks and herewith hand you brief for your earnest consideration.

The grave question of keeping up the efficiency of the post office service is for practical purposes, purposes as pressing perhaps as the question of doing justice to the postal employees.

Unless the pay of postal employees represents a living wage and unless it compares favorably with what able-bodied men can earn in other lines of work, the maintenance of the efficiency of the service will be rendered impossible. Employees who have long been in the service may perhaps be unable to leave it advantageously even if they should want to. In all probability a large proportion of the postal employees past 40 years of age could be counted on to stand by the service no matter if their pay no longer sufficed to give them a living wage. The loyalty of these men can be counted on with confidence and it will long sustain the department long after a private enterprise under similar circumstances might be expected to break down. But these men, no matter how faithful, can not keep up the service without the introduction of new blood, and new employees of the right sort can not be expected to enter a service which gives no recognition of loyal and painstaking devotion. Long and faithful service in the Post Office Department, because of its highly specialized character, unfits a man for ready change to new lines of work.

The efficiency of the Postal Service is at this particular time, when the United States is striving to maintain her high standard of industrial, economic, and social conditions, a very necessary step.

In view of the fact that the cost of living has advanced 100 per cent or more since 1913, and our last classification law passed 13 years ago, when economical, industrial, and social conditions were wholly different from the conditions of to-day, and in view of the fact that all other branches of industry have had substantial increases which are automatically adjusted as these changes take place, we feel that we should now receive consideration which will bring the salary of post office clerks up to and equal the salary of men performing a similar class of work in other lines of business. We appreciate the temporary increases for post office clerks and ask that we receive consideration from Congress that will give us substantial and permanent increases.

In connection with the above we do hereby declare it to be our conviction that the minimum salary of a post-office clerk should be \$1,500 with automatic increases of \$200 until \$2,300 is reached with a leeway of two grades in advance of that, to be paid for at the rate of \$2,400 to \$2,500 per annum and designated special clerks. The duties performed by special clerks are supervisory in nature and should not only receive pay above regular clerks but should be designated as supervisors.

In all cases of promotion to the special or supervisory grades, the vacancy should be offered to the senior clerk in the next grade and so on down through all the grades until the senior clerk in each grade shall have been benefitted by the promotion provided senior clerks have prepared themselves for something better by rendering efficient service in the position held by them prior to the vacancy.

There is a vast amount of work performed in post offices at night and as it is a known fact that daywork is preferable it is believed that a clerk on entering the service should be given night work with the understanding that as vacancies or promotions occur he will be given daywork. After having performed day service men always

object to night service. If conditions so exist that a long period of night work is necessary the clerk so performing such service should be compensated for by a shorter period of service.

Clerks in mailing and distributing divisions are called upon for scheme examinations at regular intervals during the year which requires study periods while not on duty. It is urgently requested that these study periods be included as a regular period of duty. Clerks in other departments are not required to furnish these examinations, hence no loss of time while off duty.

It is urgently requested that some sort of legislation be enacted by which post-office clerks may be superannuated. We have not as yet been able to overcome the thought that we must get old. Sustenance is as necessary at this period of life as at any other period during our life and while we could get along without work we seem to think that we must continue to eat and wear clothes.

Post-office clerks have no sick leave (time lost for sickness) as do other branches of Government service. It is requested that this matter be gone into.

BRIEF SUBMITTED BY A. A. LILLY AND J. DIXIE SMITH, HOUSTON, TEX.

The Postal Service touching as it does the individual lives of practically all of the citizens of the Nation should, of necessity, attain to the highest standard of efficiency and its morale and personnel should be zealously guarded.

Working conditions.—Houston, Tex., is a rapidly growing city of about 175,000 population.

Carrier routes are constantly increasing and changing and by the time a new clerk or carrier becomes sufficiently proficient to be of any appreciable value, to the service, one or more of the older employees resign. The city growing as it is, the working force is continually inadequate. Under the present system, a clerk or carrier can be compelled to work overtime. In this particular locality many are working from one to six hours' overtime each day. In addition to the actual overtime in the office he has to study different schemes in order to pass the frequent examinations he is required to stand. This requires considerable time for which he is allowed no extra pay and which impairs the efficiency of the employee. He is compelled to put in all the overtime within his power to meet the ever-increasing cost of living.

Negroes taking places of whites.—White men in this locality are, as a rule, more efficient than negroes. They also ask better living conditions than the colored man demands and, for that reason, the carrier force in Houston is rapidly changing its complexion and, as a consequence, the public is suffering by reason of the less efficient service rendered by the colored men.

Other lines of business more attractive.—Other lines of business requiring the same ability as that of post-office clerks and carriers pay decidedly higher salaries, and are attracting the attention of thinking men in the Postal Service who realize that when old age creeps upon them if they have not saved from their earnings in younger days they will be left dependent either upon the community or upon their relatives. The business of a post-office employee dies when he does, and his family has nothing as a heritage and are usually left in want. Scarcely any other line of skilled labor receives as little pay as post-office employees.

Record for honesty.—I dare say that no other class of employees throughout the country has a better record for honesty than post-office employees. They handle millions of dollars in cash and valuables each year, and, as a rule, are under only \$1,000 bonds, which bonds are written for 50 cents per thousand as an evidence of the confidence the insurance people have in them.

The exceedingly small number of pieces of mail missent and lost by the Post Office Department, would indicate and demonstrate the honesty of its employees. This, however, since 1917 is rapidly increasing, indicating that the personnel of the offices is degenerating to a considerable extent and the morale of the men seems not to be of as high a standard as prior to the year 1917.

Hours of labor.—There should be a difference in the hours of labor of a clerk or carrier who works at night and one who works in the daytime. There should also be a difference in the classification and pay of those who are required to study schemes and those who do not. The fact that there is no difference now in the classification of these employees, creates considerable dissatisfaction and uprest amongst the employees.

Night work is a much greater strain on the entire system than daywork and should be compensated either by higher salaries or shorter hours for clerks and carriers who are compelled to work at night.

Inroads made on postal service by private corporations.—We have in our city a number of corporations who have attracted to their employ clerks and carriers from the Houston post office, some of whom were the most efficient and ablest men in the service. To such instances I would especially call your attention to, is where the Texas Co. came into the post office at this most serious period of the holiday season and took away two of our most efficient distributors, providing them with a salary of \$25 per month above what they were being paid by the Post Office Department, and they are not only holding the positions with the Texas Co. at the higher wage, but are also performing four hours' extra duty in the post office at 60 cents per hour which represents a higher rate of pay than they were receiving when they resigned.

BRIEFLY SUMMING UP.

A majority of the clerks in the Houston post office work at night, or from 3 p. m. until 12 p. m. The night schedules and the day schedules are the same. The clerks who work at night are required to work the same length of time as overtime as do those who work in the daytime.

The system of seniority is used for promotion to more desirable hours and positions where all things else are equal.

The fact that a majority of the clerks working in the office prevents a number of young men from entering the service and causes the resignation of a great many men who have families. To remedy this evil to some extent, I would suggest shorter hours for those on the night shift.

Overtime.—Overtime is a burden in the Houston post office, some of the clerks and carriers being required to perform as much as six hours overtime per day. Many of the clerks being required to study schemes in addition to the overtime performed, which impairs the efficiency and, in numerous cases, the health of the employee. A larger force of employees should be employed in order to prevent this overtime. Those who study schemes are required to stand examinations at least every three months and their grades must be not less than 90 per cent. It requires at least two hours per day for a new man to perfect himself to become an efficient distributor, and the older employees, on account of the constant changing of the routes and schedules, must study on an average of one hour per day. In my opinion, the employees should be compensated for the overtime consumed in studying their schemes and should receive at least as much pay therefore as they do for their regular work.

Inadequate pay.—The post-office employees receive a much smaller wage than other skilled labor in this community, which ranges from \$4 per day for ordinary labor to \$10 per day for the average skilled laborer. Practically all of the employees of the office, numbering about 100 in all, are compelled to work overtime in order to provide a decent livelihood for themselves and their family. The employees of this office to a large extent are doing work of various kinds aside from their duties in the office.

Resignations.—There have been perhaps 50 per cent of the employees of the Houston post office who have tendered their resignations within the past four years. It requires from one to three years for an employee to become proficient as a distributing clerk in either the city or mailing divisions. The class of men who are taking the places, of the older employees who resign are not as competent as a rule as they formerly were because the salaries paid Government employees have not advanced in proportion to the costs of the necessities of life.

STATEMENT SUBMITTED BY MR. SIDNEY HESS ON BEHALF OF THE SUBSTITUTE CLERKS OF NEW ORLEANS, LA.

As we will perhaps not be permitted to appear personally before your honorable body, will try and be as brief as possible in stating the dire necessities of the substitute clerks in the Postal Service in the New Orleans post office.

Two of the greatest problems confronting the substitute clerk is compensation and appointment.

Now, if we were allowed to express our thoughts on this subject, we would like to say that an increase of 100 per cent in our hourly pay would not be too much so as to meet the present high cost of living, which has increased to such an extent, that we barely exist (not live) on what we earn.

The appointment of to-day as a first grade clerk at a salary of \$1,000 per year does not offer much of an inducement to a substitute clerk, as he will hardly be able to keep his head above the water on such a salary. Fully 75 per cent of the substitute clerks are married and have families to support, and the remaining 25 per cent have someone dependent on them for their maintenance.

The question of to-day is why should an able-bodied man work for the munificent salary of 40 cents per hour when he can carry freight on our public wharves and get from 60 to 75 cents per hour and make almost double the amount earned in working in the Postal Service, where he is placed under bond and compelled to study (on his own time) schemes for the correct distribution of mails, and any errors that he may make afterwards he is given demerits.

Now, as to real facts and figures of the substitute clerk. The average substitute clerk's time is six and one-half hours per day, and having to report for duty every day to make the sum total of \$15 per week.

Now if a sixth grade clerk can not live on \$1,500 per year, how can a substitute clerk exist on \$780 per year?

Now, as to schemes, etc., a substitute clerk is compelled to study schemes and put up a case examination the same as a regular clerk on his own time, consuming about two hours each day, and therefore has very little time for recreation, etc., and is also expected to fill in at a moment's notice when a regular clerk is sick or compensating for work performed on Sunday or holiday.

Here should be found a way where a substitute clerk would be allowed at least one hour per day (while on tour of duty) to study schemes and not be compelled to study while on recreation.

The majority of the substitutes are compelled to live in the cheap rent districts and consume from one to one and one-half hours of their time coming and going to and from their tours of duty and they are also compelled to wait until such time as the supervisor or foreman in charge puts them to work, being in the building at least 10 hours to work 6½ hours.

In conclusion we beg to state that a substitute is compelled to save a few dimes now and then to buy clothes for themselves and family, not to say anything about shoes which we are compelled to have patched, etc., as the salary that a substitute earns hardly buys the bare necessities of life and pay our car fare to and from our tours of duty.

Gentlemen of the committee we all join in praying that you will see fit to make a recommendation for our betterment in salaries and working condition in the Postal Service hereafter.

Respectfully submitted by all the substitutes of the Postal Service of the New Orleans post office.

SUPERVISORY EMPLOYEES, INCLUDING SPECIAL CLERKS IN FIRST AND SECOND-CLASS POST OFFICES.

STATEMENT OF MR. G. C. BURNSIDE, ASSISTANT POSTMASTER GULFPORT, MISS.

Mr. BURNSIDE. Gentlemen of the commission: The conditions in our office are similar to those in other offices, judging from several letters I have here. Although we are a first-class office, we only have eight clerks. My salary on the 1st of July would have been \$1,700, and because of the fact that we went to a first-class office, my salary went to \$1,800.

I have been in the service for 15 years, and up until about three years ago I was only drawing \$1,100. I have been assistant postmaster for a short time; and was acting postmaster for a few months. In an office of our size efficient service is practically up to the postmaster. We are a central accounting office, and also an office for distribution of supplies for four counties.

Senator MOSES. What are your receipts?

Mr. BURNSIDE. \$45,000.

Senator MOSES. The postmaster's salary is how much?

Mr. BURNSIDE. \$3,000.

Senator MOSES. On what basis would you fix the salary of the postmaster?

Mr. BURNSIDE. Under the old rule, with the postmaster's salary at three thousand, the assistant postmaster received half, or fifteen

hundred. Prior to the time salaries were increased, the assistant was receiving thirteen hundred and the postmaster twenty-seven hundred.

Senator MOSES. Do you think that was a satisfactory basis?

Mr. BURNSIDE. Take the salaries of the clerks in the office. They go to fifteen hundred and fifty, and during December there were three men drawing practically the same salary that I did. That was because of the fact that we had no substitutes and the men had to do overtime work. The amount of overtime they did, together with their salary, amounted to more than I was getting, and I went down at 7 o'clock in the morning and got through at 8 at night.

Senator MOSES. That is a condition that could not be remedied by law.

Mr. BURNSIDE. I had a salary of seventeen hundred and when the office went first class I was raised to eighteen hundred.

Mr. BELL. You are required to give a bond?

Mr. BURNSIDE. Oh, yes; \$3,000.

Referring back to the substitute carriers. We have had several examinations and no one has taken them. In November a carrier was sick for a day and in order to get the mail delivered I took the route out myself and then came back to the office and did my work.

Senator GAY. Mr. Burnside, your time has expired, and I congratulate Gulfport in having an assistant postmaster who can do any of the work of that office.

The next is Mr. A. Z. McChesney, New Orleans.

STATEMENT OF MR. A. Z. MCCHESNEY, SUPERINTENDENT STATION B, NEW ORLEANS, LA.

Mr. MCCHESNEY. Gentlemen, this morning, in addressing you, I wish most emphatically to urge for consideration for the superintendents of stations, first, and then the supervisors as a whole. On being appointed a superintendent of a station you are isolated from any promotions or salary considerations whatever. These superintendents of stations are mere clerks; they are forced to take the working conditions of a clerk—practically the butt end of the work. That is, to make a successfully working station. A superintendent of a station works equal and greater time than his clerks. We ask that this overtime they have to work be eliminated, or, if it has to exist, that they be given the same consideration as the clerks with regard to pay for it. We ask also that we be paid for holiday service, or be given time off for it. We ask to be compensated for any Sunday work that we may be ordered to do. We also ask that the salary of the supervisor, who represents the postmaster as his first lieutenant be considered, and that he be paid as such; that there be a marked difference between the foremen and the special clerks. We also ask, when it comes to the carrier force, that the superintendent of a station be placed on a salary basis that will put them far above any carrier's salary or any clerk's salary, plus the overtime. We also ask, as superintendents of stations, that the stations be paid for with regard to the amount of work done; that the smaller, the larger and the intervening stations be paid according to the amount of work, finances, force of carriers and force of clerks, and we would ask again that you give us some

consideration with regard to sick leave. We also ask for a better vacation—a vacation of 30 days, so that we may recuperate from our strenuous labors. Fifteen days are absolutely nothing to the men. We ask these things in an earnest way and we ask for the things that we do because we are now isolated because of working conditions.

Mr. McChesney submitted the following brief:

BRIEF SUBMITTED BY MR. A. Z. M'CHESNEY.

It will be my purpose to be as brief as possible in presenting to you some facts why the salaries of supervisory employees should have your consideration, most especially superintendents of stations.

Superintendents of stations have been appointed to their office as select men, men best fitted to manage an entire post office, selected as a reward for good service. Here it has ended. Once appointed to the position as superintendent of station you are entirely isolated from any further promotion or salary consideration. The department has time and again refused any considerations whatsoever. A most unjust and unequal basis of calculation. Why not pay in proportion to the responsibility and work attached to an office? Most especially when an office has grown in leaps and bounds from a small to a large one.

There are three stations in New Orleans, La.; all of unequal size in work and responsibility, yet the salaries are just equal. A most unfair condition. Within these stations the superintendents are compelled to work as clerks, taking the butt end of the work all of the time. This must be done to meet daily conditions, and to carry out orders received from the postmaster telling them that they will be held personally responsible for any failures, etc. These same supervisors work overtime with the working force of clerks, work on holidays, and even on Sunday, if so ordered. They are not paid 1 cent for this time, nor given time off, nor even allowed the privilege of a few hours off duty as the condition may arise, a most unjust and unequal condition to exist within our office.

A subhelper, a service without any responsibility, an unqualified service, simply a helper, is paid at the rate of 60 cents per hour. These subs generally work from 8 to 11 hours per day. Paid at the rate of \$170 per month and over, while we as supervisors are paid at the rate of \$160 per month. The very smallest worker is paid more than the highest and most responsible worker. Then again, supervisors are forced to work as long a detail as foremen and special clerks. These special clerks generally have but a single duty and actually no responsibility whatsoever. Special clerks are paid for all overtime and given time off Sunday and holidays. Rather a strange state of equal treatment. Why not pay the supervisor the same for a like work? Supervisors' salaries are entirely too small and out of proportion to the salary of foremen and special clerks. Pay us as we stand. Pay us as superintendents, qualified men, men who represent the very head of our office—the postmaster. We are his first lieutenants of the service, therefore pay us as such. Above all pay us so there will be a marked difference in the pay of a supervisor over that of a carrier. Discipline alone requires this. The overtime plus salary paid to some carriers working under supervisors who work over and with them all through these long hours of overtime, is far and above any of the supervisors, paying as much as \$140 and over per half pay. No supervisor receives any such consideration. It should not be allowed to exist. Pay us for all overtime. Pay us in time or money for holiday and Sunday work. Give us an equal vacation of 30 days as in all other departments of the United States Government. Give us a sick leave, so when illness overtakes us we will know and feel that we are not losing our very existence by being sick. It is granted in other departments, why not in the post office, where the force is called upon to give the very limit of endurance? Do not hold us without consideration as has been done. We, as supervisors of the stations, are a part of the whole post office, surely not isolated by work. We fill a position that requires as much diplomatic and executive ability and a thorough knowledge of all postal laws and regulations as any postmaster, for we are virtually a postmaster without the title or power and a lesser amount of responsibility.

Let us be equally paid, equally worked, and not isolated from any future promotions just because we are a supervisor. By the grace of God may you see this and see that all conditions are made equal.

STATEMENT OF MR. P. E. SPREEN, SPECIAL CLERK, NEW ORLEANS, LA.

Mr. SPREEN. Gentlemen: While I represent the special clerks, I do not know just exactly where I stand. In the New Orleans post office the special clerk does exactly the same work as the ordinary clerk, and I have been drifting around, wondering whether I should be classed with the clerks or the supervisory officials. I feel that I am neither fish, flesh, nor fowl. That leads me to suggest that the position of special clerk be abolished. It is causing and has caused much discontent and dissatisfaction among the men, for the reason that it is felt that the proper men do not always get the promotions and increases in salary.

Concerning the distributors, there are two things I would like to touch upon, and they are night work and scheme study. I believe you gentlemen are desirous of making a proper reclassification of our salaries——

Senator MOSES (interposing). In order to save some of your time, might I say that this question of scheme study and night work has been taken up very fully at the other places?

Mr. SPREEN. I feel that a proper reclassification is almost impossible without taking into consideration scheme study and night work. Concerning a proper adjustment of night work, I would suggest that 45 minutes of night work be made the equivalent to eight hours day work. In regard to scheme study, I would suggest that time off be given in which to study schemes. I would suggest that the clerks be allowed one hour a day of the Government's time for as many days as is necessary in which to prepare for scheme examination. As it is, a man is not allowed any time at all, and frequently, because of sickness in the family or for other reasons, it is impossible to give the time necessary to master these schemes at home.

Senator MOSES. Assuming that allowance were given, and at the end of the period the man failed in his examination. What recourse has the Government, any?

Mr. SPREEN. That would be up to the Government to say whether he was fit to remain in the service or not. Personally, I do not think he would be fit if another man has to carry him along. The men who study at home are the men who do most of the work in a post office. He works 95 per cent of the overtime, performs almost all the night work, and works on Sundays and holidays, so that a triple imposition is placed on the clerk who studies on his own time, and without compensation therefor.

I would not suggest that a salary differential be given the distributor, for the reason that he nor the department would benefit therefrom until after a certain period of years. The department needs trained men now and it would be no inducement for a clerk to study in the beginning

During the past year 41 men have resigned, 14 of them substitutes, promising young men, men mentally fit to master schemes, but as soon as they learned they would have to study, they obtained other positions. During that time we lost 10 trained distributors, and the making of a trained distributor is hard work and requires much time.

My main suggestion, gentlemen, is to eliminate the special clerk, and, in order to induce the proper men to enter the service, make the entrance salary \$1,800 and allow time off for scheme study.

I have here an itemized list of my expenses for August. I was getting \$1,500, and it cost me \$118.41 to live. That included no shoes, no clothes, no pleasures, nothing but absolute necessities of life, and on that I base my belief that a man should begin with at least \$1,800 and be increased \$200 a year, his record justifying, until he reaches the maximum of \$2,400.

STATEMENT OF MR. P. S. AUGUSTIN, NEW ORLEANS, LA.

Mr. AUGUSTIN. Gentlemen: I represent the Finance Division. I cover in my brief the receipts of the fiscal years 1917-18 and 1918-19, showing a comparison of 1917, 1918, and 1919, and the last two months of this year as compared with last year.

We have 282 clerks, 27 supervisors, 32 special clerks. The receipts for the last year, the fiscal year of 1918, amounted to \$1,600,000, in round figures; for the fiscal year of 1919, it was something like \$1,900,000. The receipts for the last two quarters of 1918, as compared with the last six months of this year—although the postage was 3 cents last year (1918)—show that we are over \$65,000 ahead in the receipts.

Mr. STEENERSON. What percentage of increase does that represent?

Mr. AUGUSTIN. Over 6 per cent over the corresponding period for last year, when postage was 3 cents as against 2 cents now. The receipts of December last year, as compared with December of this year, show that this year we are \$76,000 ahead.

Mr. STEENERSON. That would be nearly 8 per cent?

Mr. AUGUSTIN. Showing that the New Orleans post office is forging ahead. In my brief you will be able to see the disparity in salaries. There is one clerk in the office, whose stock of stamps, etc., amounts to only \$1,000, and his salary is \$1,600, while the assistant chief stamp clerk, with a stock of \$20,000, receives \$1,500.

Senator MOSES. Is there any disparity in the bond?

Mr. AUGUSTIN. One gives ten thousand (the assistant chief stamp clerk) and the other a thousand.

Senator MOSES. And the one who gives a thousand gets more salary?

Mr. AUGUSTIN. Yes. You will notice also the assistant in the money-order division, a man who has in his possession over a million dollars worth of certificates and who pays out and receives more than \$200,000 annually, receives as compensation only \$1,600 (basic salary).

Senator MOSES. Does that brief suggest a remedy?

Mr. AUGUSTIN. The only thing that I can suggest is that the salaries of the clerks in the finance division who are responsible for large amounts of money should be made somewhat above the other clerks who do not handle money. I think that the distributors and all clerks are entitled to increased salaries, but more so in the finance division where the whole thing depends on the proper handling of money and the proper making of reports.

Mr. BELL. How long have you been in the service?

Mr. AUGUSTIN. Thirty-five years.

Mr. BELL. What is your basic salary?

Mr. AUGUSTIN. Eighteen hundred, and two hundred bonus additional, and then the hundred and twenty-five.

Mr. BELL. How large a family have you?

Mr. AUGUSTIN. A wife and two sisters under my care, and a boy. I was appointed finance clerk in 1906 and never received an increase until 1917. I received no increase in eleven years, although my responsibilities were increased considerably under the two-division plan, and then, only \$100 per annum.

(NOTE.—The statistics in detail of the business of the New Orleans office, submitted by Mr. Augustin are on file with the commission.)

STATEMENT OF MR. JOS. A. VULLIET, ASSISTANT SUPERINTENDENT OF MAILS, NEW ORLEANS, LA.

Mr. VULLIET. Gentlemen, I presume you have had the high cost of living and all these other matters brought before you until you have had a surfeit. I think the best way to illustrate the position of the supervisor is to take my own case. I hope you will pardon me if it is not well placed, and, it will not take long.

In 1889 I was appointed a substitute. A few short weeks after I was appointed a regular. I have worked up through every grade in the post office. I have studied and worked and fought tooth and nail for every promotion and have at last arrived, through every intermediate stage, to the position of assistant superintendent of mails at a salary of \$1,700. My bonus brings this up to \$2,025 per annum. There is a deficit every year of \$300, as it costs me \$2,300 to live. This deficit I have made up by outside employment and the fact that within the last few months, my young daughter has become a wage earner. Gentlemen, it is not right that a supervisory employee should be placed in a position where he receives less than the supervised employee?

I know that there are clerks and substitute clerks and carriers who receive more than I do, through overtime, etc. This is not an incentive for any subordinate, to strive for promotion or to make the service his life work, as he readily understands that his financial condition would suffer if he avails himself of the opportunity to rise. I have made the post office a life study, and have given all my time to the service, with somewhat the feeling that actuated the soldier of the great Corsican: Promotion for merit was ever before me.

I believe, gentlemen, it is necessary to make the entrance examinations higher; it is also necessary to make the service more attractive so as to appeal to the better class of applicants. They therefore, should receive more, with opportunities for promotion. The supervisor's position in life is higher; through responsibility, he has more to contend with. The work is arduous; there is the night work. We have to contend with that. I have had fourteen years of it. The study is hard, but it is necessary, and I believe that the men should have time off for that study. Most craftsmen have to go through a period of study. The post-office clerk is in the same position, and I think that the salary should be commensurate. I want to read a suggestion embodied in the last paragraph of my brief. I do not wish anybody to take offense at it, but the supervisory employee must do things for the benefit of the service.

I would therefore suggest that the physical and the mental examination of the entrant into the service be made more rigorous, that the clerk or the carrier be appointed on an equal footing, and that their salaries should automatically rise on the completion of the first and of the second year; that there, as the work of the carrier requires no study, his promotion should cease, but that he be permitted on request to transfer to clerk after he has qualified. After the second year, and each year for three years, the clerk should be promoted for merit, the merit to be decided by taking the best clerk in each grade as a standard, and the written recommendation of his immediate superiors. From those clerks who have attained the highest grade, two sets of special clerks should be selected and paid accordingly, the first to be those who possess exceptional ability, but no executive ability; the second, those who possess both. The higher grades of supervisors should also be divided, the lowest to receive \$200 more than the highest special clerk. These grades should embrace salaries ranging between means \$400 apart, and be separated grade from grade by \$200. Foremen and assistant cashiers to be in the first, assistant superintendents and bookkeepers in the second, cashiers in the third, and, assistant postmasters, superintendents of finance, and superintendents of mail in the fourth. Superintendents of stations could be rated with foremen, or with assistant superintendents of mail according to the business performed or transacted. The different positions would then carry the necessary weight, and it would then be possible for the recipients to live accordingly. The service would then retain its best material, and the standard raised to a higher level.

Gentlemen, that is all I have to say.

Mr. Vulliet's brief follows:

BRIEF SUBMITTED BY MR. J. A. VULLIET.

In presenting before your honorable body the claim for a reclassification of the salaries paid the supervisors of the post office at New Orleans, La., I do not wish to burden you with a mass of statistical data of which you no doubt have a surfeit. Besides, the regulations and rules which govern other offices of like class obtain here, and the information sought does not seem to lie along these lines, but rather to be: "Does the post-office employee receive an adequate wage for his services?" "Is his remuneration such as to render him free from debt?" "If it is, can he spare sufficient to make provision for the future?" "When promoted for merit, can he improve his mode of living and enjoy the relaxations which belong to him by right of long and faithful duty?"

In 1889, 30 years ago, some of the salaries now paid supervisory officials were adopted by law. The postmaster was to receive a salary according to the receipts of his office, but not more than \$6,000 per annum. His assistant postmaster and the superintendent of mails were to receive each a percentage based on his salary. The other supervisors generally received the lesser mean accorded their grade, which, in the case of the assistant superintendent of mails, amounted to \$1,200 per annum. Then the remuneration of the clerks began, ran on down the line to \$300 per annum, \$25 per month.

We were all young then, among the first products of the civil service, and were filled with the illusions inherent to our youth. Few of us were married or held family responsibilities. We generally lived with our father and mother, who were more than willing to assist us in building up a career which seemed so promising. As time passed, however, the truth began to dawn upon many, and they turned aside. With us who remained the love of the service had laid its influence, and we were ever with the hope that Congress would awaken to the fact that its underpaid employees in the Post Office Department were working 10 and 12 hours in each 24 (there were no off Sundays) toward the upbuilding of their vast machine, and would reward them in such a manner as to preclude the possibility of indigency when the sere side of life began.

Gentlemen, I admit that a sincere effort has been made to remedy these conditions in the lower grades, and I believe that the clerks and carriers would be entirely satisfied if it were not for one thing. In the days above mentioned and long afterwards you could eat an excellent lunch or dinner at from 15 to 50 cents, buy a very good pair of shoes for \$1.50, a suit of clothes as low as \$8, fair board at \$3.50 per week, or rent a house of three rooms as cheap as \$8 per month. Now, however, the lunch or dinner is poor at 40 cents or \$1, the shoes cost \$6 up, the suit is very inferior at \$30, the board of the same quality is above \$9, and you can not rent a house for love or money. Again, eggs used to be 10 and 15 cents the dozen, good butter as low as 20 and 25 cents the pound, and you could purchase sugar 26 pounds for \$1. Where can you now procure these staple articles for less than from 400 to 600 per cent over these original values?

Craftsmen then received from \$60 to \$90 per month (a higher wage than the clerk and carrier). Now they receive \$1 per hour, and often double this amount in overtime and holidays. Under these circumstances can you blame the effort to prevent reverting to conditions which existed years ago and which even now with the temporary bonuses which have been granted makes it extremely difficult to make ends meet.

In placing the status of the supervisor, it is essential that the compensation paid and the work performed by the lower grades be taken into consideration, for it is from this body that the supervisor is selected, and of necessity his salary should keep pace with his advancement and added responsibilities. His course of training has been in the ranks, and his promotion from the ranks should prove that he is the superior clerk.

To effect delivery of local mail, the city has been divided into zones or districts, each of which is served by one or more carriers. The clerks who distribute this mail must study and memorize from books prepared for that purpose all of the residences by number in each zone or district and should give to each carrier the mail for his zone or district only; otherwise the mail is delayed. The carrier then arranges it in rotation as served, from the beginning to the end of his route or itinerary. The clerk should also distribute the mail intended for box delivery, and he must keep up with all changes. These changes are very numerous and occur from day to day. To effect dispatch of mail intended for other post offices in the United States and foreign countries, in the case of letter mail it is first faced, postmarked, and then separated to States. Then the States which require minute treatment and which are located adjacent to the State from which the mail is forwarded are respectively taken up for distribution (separation). The clerks who perform this task must study and memorize from books prepared for that purpose the name and location of each office in a particular State and the railroad or railroads from which it is supplied.

If this supply is from more than one source, he should know over which road it first arrives and also know that this routing changes from hour to hour. He obtains this from his further study of railroad schedules. As he becomes proficient more States are added to his curriculum until he has memorized at least three. There have been instances where five have been taken up. Clerks who perform this distribution of local mail or that for outside points undergo frequent examinations on their different subjects. They have not the time to study in the office but must do so at home in their off hours. Their hours of duty change from day to night, but the mail is deposited so late in the evening as to preclude the possibility of leaving the office before 8 o'clock p. m. This applies to practically 80 per cent of them. In the years that it takes to build up this knowledge these same employees learn to decide the difficult rulings, etc., as laid down by the postal laws and regulations. They also perform much manual labor in connection with working paper and package mail. They should be trustworthy, honest, and obey all rules. It is from this melting pot that the supervisor is made. Is he not worthy?

The receipts and the business of the office, as well as the expenditures for clerical, carrier, labor, and wagon hire, are under the direct control of the supervisors. A large saving in the cost of operation is only made possible through the efficiency acquired in the severe school of their past training. This training shows them when it is possible to effect a saving by taking over work performed by the Railway Mail Service, and when it is advantageous to relinquish it to the same service. It also permits them to aid the department to improve its vast and complex machine. The government of the movement of mail is in their hands. What loss in revenue and proficiency could not be incurred through their ignorance. Having actually done the work, they know the capabilities of their subordinates. How to keep up the high standard at the least cost, and above all to be humane and just to those who look to them for instruction and guidance. And for this what is their recompense? Gentlemen, in this office 85 per cent of them receive less than some of the substitute clerks. Is this proper? Is it fair?

As has often been demonstrated in no matter what profession or line of work, a man improves with application and practice. If he rises to eminence through the perfection he has attained, he enhances in value. He then capitalizes this knowledge or ability, and it becomes his stock in trade. In the commercial world he easily finds a market for what he has to offer. On the other hand, take that semiprofessional employee in the post office, the supervisor. What does his fund of knowledge and the experience he has gained in years of service amount to? Where can he sell his wares? It would be the height of folly for him to expect even an equivalent position in the commercial world. Is it justice to place him in this situation after he has devoted the best and most productive years of his life toward the upbuilding of the service? Has he not reached the stage where he can relax, and become an attractive beacon for those below who wish to attain his position? At present, what benefit is there to

be a supervisor, when the clerk's salary rivals his own? I know of several instances where promotions were declined for this very reason.

I would therefore suggest that the physical and the mental examination of the entrant into the service be made more rigorous. That the clerk or the carrier be appointed on an equal footing, and that their salaries should automatically rise on the completion of the first and of the second year. That there, as the work of the carrier requires no study, his promotion should cease, but that he be permitted on request to transfer to clerk after he has qualified. After the second year, and each year for three years, the clerk should be promoted for merit. The merit to be decided by taking the best clerk in each grade as a standard, and the written recommendations of his immediate superiors. From those clerks who have attained the highest grades two sets of special clerks should be selected and paid accordingly. The first to be those who possess exceptional ability, but no executive force. The second, those who possess both. The higher grades of supervisors should also be divided, the lowest to receive \$200 more than the highest special clerk. These grades should embrace salaries ranging between means \$400 apart, and be separated grade from grade by \$200. Foremen and assistant cashiers to be in the first. Assistant superintendents and bookkeepers in the second. Cashiers in the third, and, assistant postmasters (superintendents of finance) and superintendents of mail in the fourth. Superintendents of stations could be rated with foremen, or with assistant superintendents of mail, according to the business performed or transacted. The different positions would then carry the necessary weight, and it would then be possible for the recipients to live accordingly. The service would then retain its best material, and the standard raised to a higher level.

I trust that this will be accepted as a frank statement, and that the result of the inquiry will prove favorable.

BRIEF SUBMITTED BY MR. CARL T. REISNER, OF WACO, TEX.

The special clerks in the Waco, Tex., post office, desire to file the following brief for your very earnest attention and consideration.

Special clerks are recognized as the experts of the Postal Service; that every one of them have an envious record for faithfulness and devotion to duty, and invariable are clerks in charge or at the head of departments. We believe that these special clerks in first-class offices should be designated as supervisory employees, such as chief mailing clerk or foreman, chief distributing clerk or foreman, chief register clerk, chief stamp clerk, etc., and we believe that they should receive supervisory salaries of \$100 and \$200 in advance of special clerks.

We wish to call your attention especially to the mailing and distributing divisions in first-class offices where the clerk in charge has several men under him, special clerks in his department receive the same salary as he does under the present law and interpretation. We believe that a clerk in charge of the mailing division in a first-class post office should be given the same consideration as a clerk in charge of a railway post office; therefore we respectfully urge the commission to give this important matter dealing with special clerks your very earnest and just consideration in the reclassification and readjustment of our salaries.

In view of the high cost of living, we believe that the salaries of special clerks should be \$2,400 and \$2,500, or \$100 and \$200 in advance of post-office clerks, and that special clerks in charge of divisions or departments shall be designated as supervisors, as mentioned in paragraph 2 of this brief, and shall receive a salary of \$100 and \$200 in advance of special clerks.

For your careful consideration and adjustment.

RAILWAY POSTAL CLERKS.

STATEMENT OF MR. GEORGE SEFEROVICH, NEW ORLEANS, LA.

Mr. SEFEROVICH. Gentlemen of the commission, I would request that the brief filed with your body some time back, by myself and associates, by mail, copies of which have been furnished you, be made a part of this hearing.

Senator MOSES. Is that the printed brief that was filed in Atlanta?

Mr. SEFEROVICH. This was filed with the individual members

...the law of 1912 a clerk in the Railway Mail Service could advance more than one grade in a year, but the law of 1912 is such that only one promotion is permitted in a year. I think it should be possible for a clerk to get two or three promotions a year, if he is put on a route and meets the requirements and his work is satisfactory. I think he is entitled to promotions in such a case. Under the law it is a hardship. The law of 1912 made it so that the maximum salary of clerk in charge could only be reached after three years of service as clerk in charge. It is no inducement for a man to work. Since living conditions are continually mounting, the average salary right here in New Orleans to-day is \$1,741.44.

Mr. BELL. That includes substitutes?

Mr. SEFEROVICH. No; it does not. It takes in 144 regular posts and includes bonuses up to date. Men with dependents find it hard to meet expenses. According to the statistics of the Bureau of Labor

it requires \$2,260 a year for a health and decency budget for an average family of five. I have a wife and three children and have had a hard time for the past three years. We are not permitted to engage in any business outside of the service. In some cases men have attempted to do so and have been asked to discontinue this outside work. A clerk can not be efficient if he discontinues his studies. Expeditionary service would be impossible, and that is the function of the Railway Mail Service—to distribute the mail while the trains are in motion.

The life is irregular; the very nature of the work takes a man away from his home one-half of his life. By postal regulations and circumstances he is barred from taking part in any civic affairs; he is isolated from his fellowmen. When we get to a junction point the train crew get out and enjoy a warm lunch; the postal clerk must remain in the car, because he gets mail from that junction point and has to work on it. The work is hard and the hours irregular.

Senator GAY. How long a run do you make?

Mr. SEFEROVICH. From New Orleans to Alexandria, 194.43 miles. Prior to 1917 the run was from New Orleans to Marshall, 360 miles, but it was too long and the department reduced it. It meant 20 hours on duty, and it was reduced. It necessitated some men moving from New Orleans to Marshall. We are better satisfied with the short runs; it means more hours off duty.

I think there should be no distinction whether there is one man in a car or two or more, except as to designation of clerk in charge. The responsibility is not so great when there are three or four or more in a car together. When there is a one-man run; he has to distribute the mail and do all the work.

Another reason for dissatisfaction is that we have not fixed a standard of hours of service. Our hours of service are so flexible, so elastic. It is but natural for employees to become dissatisfied when they perform service in excess of their scheduled hours, when the number of hours varies and there is no extra compensation paid. I think we should have a fixed standard of hours of service.

Mr. BELL. Each day?

Mr. SEFEROVICH. What would constitute a day's work, based on hours and mileage. The mileage would take care of the fast trains, and the hours would take care of the slow ones. I think that is necessary. It is the accepted theory in the railroad world when an employee completes service equal to the standard that he had met the requirements, that when he performs work in excess of that standard he should receive compensation for it. Trains run late and we are not given proper consideration for the extra time, also the time that it necessitates in getting off duty at the end of the run. Then he has the home work; the study of schemes and schedules and weekly correcting of same, the verifying of his registered-mail receipts with his dispatch book, the preparing of labels for his next tour, and correspondence pertaining to service performed.

Senator MOSES. He has time off to do that, hasn't he?

Mr. SEFEROVICH. His schedule calls for a daily average of six hours and forty-five minutes road service. We are not given any credit for holidays. On Class C trains the organization is such that clerks are required to perform daily, except Sundays, approximately 6 hours and 45 minutes road service. From that up to eight hours it

is admitted is for home work. On B runs it is seven hours. There is a distinction. More service and less salary. Above that, whatever there is is credited with home work. It is acknowledged that it is necessary. The road requirements are 6 hours and 45 minutes on C runs, seven on B, and 7 hours and 30 minutes on A, and above that up to eight hours is home work, preparing for case examinations, which come continually at certain intervals and must be made with great accuracy—98 per cent and 95 per cent on postal rules and regulations. We must know correct answers to 513 questions. One of these postal laws and regulations examinations is held annually for 10 consecutive years, and after that one every three years. These case examinations are held at frequent intervals. On some runs we have clerks who make 11 different case examinations every three years. A clerk must be conversant with the space system of pay to railroad companies.

Senator MOSES. You have two minutes more.

Mr. SEFEROVICH. What we request is an adequate salary for the caliber of men the service requires. The entrance requirements have been lowered recently. We do not appreciate that very much. Let us have adequate salaries commensurate with the service performed and a single classification with five grades and a clerk in charge, as well as some standard of hours of service. At present we have not a proper standard. We get no pay for overtime; trains run late, and that is our hard luck. All trainmen receive pay for overtime, but we lose our own private time.

The brief referred to by Mr. Seferovich follows:

BRIEF SUBMITTED BY MR. GEORGE SEFEROVICH ET AL.

Whereas the Sixty-fifth Congress deemed it advisable to create your honorable body for the purpose of ascertaining facts regarding postal salaries, and has charged you with the duty of reclassifying and readjusting such salaries on an equitable basis.

We, the committee representing railway postal clerks of the twelfth division, district No. 1, New Orleans, La., submit the following compilation of facts pertaining to our work and compensation as employees of the Railway Mail Service, with a view of assisting your honorable body in arriving at a just conclusion.

WALTER J. FLOTTE,
R. G. CAMPBELL,
GEORGE SEFEROVICH,
Committee.

Subject 1—Functions of the Railway Mail Service.—The functions of the Railway Mail Service consist of the custody, care, handling, and proper routing of 90 per cent of the country's mail, and the distribution of approximately 75 per cent of this mail en route while trains are in motion.

Subject 2—Organization (supervisory).—The Railway Mail Service is under the Bureau of the Second Assistant Postmaster General. To carry on the organization of the Railway Mail Service it is necessary to maintain a supervisory force of 1 general superintendent, 1 assistant general superintendent, 15 division superintendents, an equal number of assistant division superintendents, and about 132 chief clerks and assistants.

A superintendent is in charge of each division, with headquarters located at important centers. Such additional supervisory officials and clerks as are necessary are assigned under the jurisdiction of each superintendent.

Chief clerks of Railway Mail Service are located at important centers (132), and have supervision over one or more railway post-office lines constituting a district. Such additional clerks as are necessary are assigned to his office.

Subject 3—Entrance requirements.—A copy of the application used by applicants for civil-service examination (Form 304) I wish to direct your attention to, as evidence of the rigid requirements for entrance into the Railway Mail Service. Certificate of physician, which is part of this application, requires the applicant to be both healthy

and robust, and he must submit himself for examination by the physician divested of clothing. This medical examination is as rigid as for the Army or Navy.

A copy of educational requirements showing subjects upon which applicants are examined is also on file with the commission.

Subject 4—Road service.—The custody, care, handling, and proper routing of 90 per cent of the country's mail and the distribution of approximately 75 per cent of this mail en route, while trains are in motion, devolves upon railway postal clerks. This duty is performed in railway postal cars, officially known as railway post offices, and in what is known as terminal railway post offices. Expeditious service to the public would be impossible without distribution in railway postal cars while trains are in motion. Letter mail is distributed in letter cases provided in these cars, the separations required varying in accordance with size of cars, as follows:

156 separations in a 15-foot car.

312 separations in a 30-foot car.

696 separations in a 60-foot car.

These separations provide space for making up into packages all letter mail for each local post office; packages for such other offices as quantity justifies; packages for distribution at other post offices; packages for connecting and distant lines, divided on junction points in accordance with current train schedules; and States packages as the particular distribution performed may warrant.

Second, third, and fourth class matter is assorted in sacks hung on racks provided for that purpose; large stationary overhead boxes are also used for distribution of this class of mail.

The number of such separations varies with the size of the car, as follows:

46 in a 15-foot car.

114 in a 30-foot car.

234 in a 60-foot car.

Clerks handling registered matter issue and obtain receipts for all registers passing through their hands and are personally held responsible for loss occurring through their errors or disregard of postal regulations. In handling registered matter record is made of registration number and office of origin.

Mail catcher and cranes are used for the purpose of exchanging mails between post offices and railway post offices when trains do not stop at the station. This feature requires care in delivery and receipt to prevent damage to mails and equipment and injury to person.

Railway postal clerks visit depot letter boxes and remove therefrom all matter for dispatch via their respective routes.

Railway postal clerks accept from the public all mail matter, except that of the fourth class, in excess of four ounces; all matter in penalty envelopes or bearing the frank of any person entitled thereto by law; soldiers' and sailors' letters unpaid when duly certified; and matter of the first class upon which the stamps are canceled when readdressed for forwarding.

They receive newspapers and periodicals direct from publishers when accompanied with certificate from postmaster at office of publication certifying that postage has been paid.

Clerks in charge—whether in charge of a crew or on a one-man run—are required to have on hand, at their own expense, a supply of 1 cent and 2 cent postage stamps for the accommodation of the public at the car, and such stamps are sold at face value.

Railway postal clerks are required to exercise extreme care in the handling of parcel post matter, especially special delivery, fragile, and perishable matter.

Railway postal clerks also distribute en route letter mail for large cities, to carrier routes, post-office stations, and post-office box holders. This distribution en route prior to arrival in a city advances the delivery to addresses four to five hours.

Their duties are outlined and allotted so their entire time is generally occupied in the distribution of mail in the cars.

Subject 5—Duties of clerks in charge.—Where two or more railway postal clerks are assigned to duty in a crew, one is designated as clerk in charge. He has charge of the car or cars; is accountable for all property belonging to or pertaining thereto; requires each clerk of his crew to comply with all instructions, regulations, and orders relating to the service; has to make all reports; sees that all mails are properly made up and dispatched; special care given to local exchanges; sees that registered matter is carefully handled and safeguarded; and that the clerks use their utmost endeavor to complete the distribution en route.

The remaining clerks are required to obey the orders of the clerk in charge, when given within his authority.

Correspondence relative to service performed by the crew, when practicable, is forwarded to the clerk in charge for attention and report. In addition to the supervisory duties required of him in the handling of his crew, he also performs distribution.

When a greater amount of mail is received than can be accommodated in regular authorized space, the clerk in charge must, when no transfer clerk is on duty, make request of railroad company for such additional units of space as will be necessary to accommodate same.

Subject 6—Duties of distributors.—Clerks below the clerk in charge in the same car are termed distributors. They make exchanges at local stations; lock and open pouches; pile and store mail received; are held responsible for the storage mail dispatched out of postal cars; witness the dispatch of registered matter; and properly dispose of surplus and damaged equipment.

In the absence of a clerk in charge from his run, a distributor is assigned as clerk in charge, but he never receives the salary of the assignment.

Subject 7—Duties of one-man run.—On runs where only one clerk is assigned to the car he performs all distribution and duties required of a clerk in charge and distributor combined.

Subject 8—Terminal and transfer service.—Terminal railway post offices are established generally at railroad terminals where mails can be advantageously assembled and distributed without material delay in having it reach its proper destination. The primary object of the terminal system was the distribution of parcel post mails, but this service has subsequently expanded to cover other classes of mail. The forces at a terminal railway post office may include the transfer clerks employed to supervise the handling of the mails or to transfer registered matter, and such other clerks as may be necessary.

Subject 9—Transfer clerks.—Transfer clerks are assigned at large railroad centers. They supervise the handling and transfer of mails where they are stationed; inform themselves thoroughly relative to the routes over which mails that are handled at that point should pass; keep themselves correctly informed as to the hour of arrival and departure of all trains upon which mail is carried; and issue excess space requests when the flow of mail exceeds the carrying capacity of the authorized space. They carefully observe the manner of performance of mail-wagon service and the handling of mails by railroad employees. They are examined from time to time concerning their knowledge of the current titles and numbers of trains arriving at and departing from their stations, the mails to be transferred, the correct terminal of routes, connections as shown in the current schedules of mail trains, postal laws and regulations applicable to the Railway Mail Service, regulations concerning method of requesting excess space for overflow mail, and orders relating to the service.

Subject 10—Substitutes.—After 313 days actual service, a substitute is appointed as an unassigned clerk at grade 1, \$1,100, for services actually performed. He then has to serve one year additional in that grade before he is eligible for promotion to grade 2, \$1,200.

Substitutes and unassigned clerks are paid for actual services performed, until they are given regular or permanent appointments.

A substitute is required to commit to memory and be prepared to stand a written examination on 75 questions of Postal Laws and Regulations applicable to the Railway Mail Service, within 30 days after qualifying for service. This examination must be 95 per cent correct to be satisfactory.

He must prepare for examination on location of 600 to 1,000 post offices and post-office routes on which located; junction post offices and schedules of mail-train connections, within 90 days after qualifying for service, with an accuracy of 98 per cent to be satisfactory, and a speed of 25 cards—on which the names of post offices are written—per minute, to be satisfactory. Substitutes are required to pass satisfactorily one or more examinations covering at least 800 offices during each six-months period. These substitutes familiarize themselves with actual work by traveling in mail cars with regular crews for instructions, and receive pay only when actually employed, vice regular clerks absent, or in vacancies. This causes severe hardships on very able men, who may have dependents, as remuneration is often not sufficient to cover living costs.

These entrance conditions are not appealing to well-qualified persons who are desirous of entering the service, and often cause new appointees to resign.

Substitutes are required to devote their entire time to study so as to acquire a technical knowledge of postal work.

Subject 11—Training and study.—At least three years of Railway Mail Service studies and work is necessary before a clerk becomes thoroughly proficient. All clerks are required to undergo examinations at frequent intervals, continually.

These examinations are made by casing individual cards (from 600 to 1,000), one for each post office comprising the examination, into a given number of separations (average 70), representing post-office routes and separations. These cards must be cased at a rate of 25 per minute, and the examination must be 98 per cent correct to be satisfactory. In an examination of 1,000 cards, the miscasing of 21 would not be satisfactory and would result in disciplinary action.

In connection with these card-examinations, clerks are also examined on their knowledge of mail-train schedule connections. This examination, to be satisfactory, must be 95 per cent correct. The number of cards in an examination and the knowledge of connections varies according to the clerk's distribution.

Regular clerks are required to review their whole study requirements every three years.

Examination on Postal Laws and Regulations, applicable to the Railway Mail Service, consists of a knowledge of correct answers to 513 questions. This examination is required yearly of regular clerks and must be made with an accuracy of 95 per cent to be satisfactory.

Clerks are also required to be conversant with all special and general orders relating to the conduct of the service and proper dispatch of mails issued by supervisory officials.

Since the adoption of the space system of railway mail pay to transportation companies, clerks in charge must familiarize themselves and are frequently examined on space system of pay to railroad companies.

Subject 12—Home study and home work.—The studies outlined in subject 11 are prepared during lay-off periods. In addition to these studies, the weekly correcting of distributing schemes and railway schedules in accordance with weekly published bulletins, termed "General Orders," issued by division superintendents, is also performed on lay-off periods.

Clerks also have to prepare on lay-off periods labels for pouches and sacks and address labels for packages of letters that are to be used for their next trip. All of these labels must bear the clerk's name, scheduled date of commencing run, the official title of the railway post office, as designated by the department; train number in which made up—this in order to place responsibility in case of errors in distribution—and must also bear the official title of the railway post office route with train number to which addressed and point of connection.

Receipts for registered matter handled on road tours of duty are checked up on lay-off periods, to ascertain acknowledgment and proper receipt.

Monthly reports are also made up on lay-off periods at the expiration of each month.

Irregularities pertaining to work performed as well as suggested improvements in work are taken up by supervisory officials through correspondence with clerks concerned during lay-off periods.

This lay-off period work is necessary for the good of the service.

Subject 13—Salaries limited to classification.—In accordance with established law (sec. 1549, Postal Laws and Regulations), the salaries of railway postal clerks are limited by classification of railway post offices, terminal railway post offices, and transfer offices.

The present law making appropriations for the Post Office Department for the fiscal year ending June 30, 1920, approved February 28, 1919, provides for the classification of railway post offices, terminal railway post offices, and transfer offices, with reference to their character and importance, into three classes, with maximum salary grades as follows:

	Distribu- tors.	Clerks in charge.
Class A:		
Grade 5.....	\$1,500	
Grade 7.....		\$1,700
Class B:		
Grade 6.....	1,600	
Grade 8.....		1,800
Class C:		
Grade 8.....	1,800	
Grade 9.....		1,900
Grade 10.....		2,000

Salary grades for the current fiscal year are as follows:

Grade 1.....	\$1,100	Grade 6.....	\$1,600
Grade 2.....	1,200	Grade 7.....	1,700
Grade 3.....	1,300	Grade 8.....	1,800
Grade 4.....	1,400	Grade 9.....	1,900
Grade 5.....	1,500	Grade 10.....	2,000

We believe this system of classification to be inequitable, and recommend only one classification for all lines and assignments. Although the duties in different classes are similar, compensation is not based on the work performed. Responsi-

bility is as great in a class A as that of a class C run, and oftentimes the work to be performed will require more physical force; still, the salary is not equal. The same conditions will apply to class B runs. The number of case examinations required is used more as a determining factor in the present classification of runs than the duties performed.

For instance, distributors in class C runs receive the same salary as class B clerks in charge, and they also receive a higher salary than class A clerks who perform clerk in charge duties. The hours of duty also lack uniformity, as shown by the following standard, which is the maximum requirements for the different classes:

Class C, average hours approximately 6 hours 45 minutes.

Class B, average hours approximately 7 hours.

Class A, average hours approximately 7 hours 30 minutes.

It is understood that the difference between these hours of road duty and eight hours is the credit allowed for the necessary home work. This does not leave sufficient time for the proper performance of such duties as have to be performed in preparing for next tour. The hours of duty should be so regulated that clerks of the different assignments will be allowed full credit for the time necessarily spent in the preparation of examinations on distribution and other duties incidental to the assignment.

Subject 14—Living conditions.—Clerks in the Railway Mail Service are not permitted to engage in business outside the service; therefore their only means of support is derived from the salary received as an employee of the Railway Mail Service. The restrictions of employment when off duty are not in effect against other employees of the Post Office Department.

Present salaries are such that clerks with dependents find it hard to meet expenses.

Tours of road duty are strenuous, taxing every ounce of human energy; hours and meals are irregular, causing old age to come quickly.

In reference to the increased cost of living, the following is quoted from a report submitted by the Council of National Defense to the Secretary of War, and in turn submitted by him to Members of Congress:

"According to the latest published Monthly Labor Review, that of July, 1919, the average retail prices for 22 selected articles of food, which constitute from 35 to 45 per cent of the total expenditure of typical wage earning families, had increased on May 15, 1919, to 91 per cent (this is a simple price average; the weighted index number as shown later is considerably higher) above prices on May 15, 1913. The increase since May, 1918, was greater than for any year since 1913, except the year 1916 to 1917. The increase for the four years, 1913 to May 15, 1917, was 56 per cent. In the following year, May 15, 1917, to May 15, 1918, the increase over 1913 rose to 64 per cent and for the year 1918 to 1919 this percentage of increase rose from 64 per cent to 91 per cent as above stated. The average rate of increase for these 22 commodities from April 15 to May 15, 1919, was 2 per cent, a rate which if continued for 12 months would amount to a total increase of approximately 33 per cent during the current year.

* * * * *

"Index numbers of wholesale prices, as compiled by the Bureau of Labor Statistics, show that in June, 1919, the price of cloths and clothing had increased 150 per cent. The item of clothing amounts to about 15 to 20 per cent of the expenditure of the average wage earning family."

Rents in this vicinity have increased from 12 to 30 per cent.

Subject 15—Comparative and proposed salaries.—

Prevailing average wage standard of Railway Mail Service employees in 1913 was \$1.239.

Average per cent of increase in cost of living from year 1913 to year 1919, 91 per cent.

Salaries based upon 91 per cent over average salary of 1913, to be equitable, should be approximately \$2,500 per annum.

AVERAGE SALARIES IN YEAR 1919.

Road clerks:

Class A, \$1,356.56 per annum.

Class B, \$1,540.08 per annum.

Class C, \$1,708.41 per annum.

Terminal clerks:

Class A, \$1,271.16 per annum.

Class B, \$1,250.00 per annum.

Transfer clerks:

Class A, \$1,314.41 per annum.

Class B, \$1,453.33 per annum.

The salary of a railway postal clerk is considerably less than that of an employee of the railroad company in the same train. For instance, a baggageman of Illinois Central and Louisville & Nashville through trains out of New Orleans receives a salary of \$165 per month, and he earns \$190 to \$200 a month with overtime. Train baggage-men have not the responsibility, neither do their duties make a fair comparison with what is required of railway postal clerks.

The duties of railway postal clerks require much more ability, application, study, and a higher degree of intelligence and efficiency than railroad trainmen.

The following is the percentage increase in salary of train crews of passenger trains allowed since January 1, 1918, according to General Order 27, and supplements thereto, issued by the Director General of Railroads:

	Per cent.
Engineers.....	31½
Firemen.....	43½
Conductors.....	27½
Brakemen.....	39½
Flagmen.....	39½
Porters.....	53
Baggagemen.....	40½

As compared with the following percentage increase allowed railway postal clerks who had reached their maximum salary on July 1, 1918:

	Per cent.
Clerk in charge, class C.....	17
Distributor, class C.....	20
Clerk in charge, class B.....	20
Distributor, class B.....	23
Clerk in charge, class A.....	21
One-man run, class A.....	25

Railway postal clerks who had not reached their maximum salary on July 1, 1918, have been increased approximately 8 per cent. The above increases were allowed railway postal clerks after June 30, 1918.

We are of the opinion that a single classification of railway post offices, terminal railway post offices, and transfer offices, would be more equitable, and for a readjustment of salaries we propose the following salary scale:

	Per annum.
Substitutes.....	\$1, 700
Grade 1.....	1, 900
Grade 2.....	2, 000
Grade 3.....	2, 100
Grade 4.....	2, 300
Grade 5.....	2, 500
Clerks in charge.....	2, 800

STATEMENT OF MR. L. F. REYNOLDS, SAN ANTONIO, TEX.

Mr. REYNOLDS. Gentlemen, I have been in the Government service since I was 17 years of age. I have been in every assignment from substitute to acting chief clerk. I can vouch for the statements of my predecessor regarding the conditions in the mail service as being absolutely correct. In San Antonio the living conditions are practically the same, if not worse, than they are here. The salary is inadequate. Many of us are doing other work, which is contrary to the postal laws and regulations. Some of our wives are working. My wife, after having raised a family, is now working as a census enumerator. It is an absolute necessity. I am on the road 7 days out of 9, and am at home only 2 Sundays in 60 days, and 4½ nights out of a possible 9 days, while the general impression is that we are off duty one-half our time. It is constant work, and it is almost impossible for a man when he begins to age somewhat to keep up with the physical requirements necessary. A man has to be physically perfect to start on a run—the same as a soldier.

Regarding salaries, there is no question but that they are inadequate. In connection with the numerous grades and classifications, all men perform practically the same amount of service. Many in the lower classifications bear the entire responsibility, while in the higher classifications the clerks have the responsibility divided.

Senator MOSES. How long, in your opinion, would it take a new man to become a topnotcher?

Mr. REYNOLDS. Five years. It is conceded that it takes three years to make an efficient postal clerk. From an economical standpoint, if from no other, the salaries should be raised. The continual turnover of labor is costing the Government much money.

Mr. BELL. You stated you were with your family but 2 days in 60?

Mr. REYNOLDS. Sundays. I spend 2 Sundays at home in every 60 days. Men of experience and the older heads are of the opinion that a fair, reasonable salary would be the scale submitted by the past speaker; also that consideration should be given to men who have grown old in the service; that after so many years of service they should be allowed to take the lighter runs. As it is now, regardless of the years in the service, he has to compete with the younger men. He has to do the hard physical work. He can do the other work, but the physical work is what comes hard for him after a certain length of service, and for that reason it would appear that one classification would take care of the older men, and if there is such a thing as a light run, let them transfer to it.

Mr. BELL. You wouldn't have these transfers mandatory.

Mr. REYNOLDS. No. Let the transfers be optional with the clerk, consistent with the good of the service.

Mr. STEENERSON. They would all want the light runs, wouldn't they?

Mr. REYNOLDS. They would be for the older men.

Senator MOSES. Do you think a retirement law would help the situation?

Mr. REYNOLDS. It undoubtedly would, because a man entering the service to-day has just barely got an existence ahead of him, and, as it stands to-day, a man who sees old age coming on, the salary wouldn't justify laying any thing by for old age and maintenance, and for that reason a retirement measure would have a wonderful effect on the service. Many men will not come in for just that reason.

Another unfortunate thing in the Railway Mail Service is the present system of running the men. There are men who have been on the lines for 30 years that are performing helper service to substitutes. We have a case on our own line where men have been in the service 30 years and go out as a helper to a substitute with a few months' experience. These are local conditions, I believe, and they should be taken care of locally. That arrangement of running is evidently made in order to save the salary of one man. Where 10 men would have a reasonable run, 9 men are keeping up the service by performing services on their own trains and then doubling back as helpers the next day.

STATEMENT OF MR. CHARLES BRYAN, EL PASO, TEX.

Mr. BRYAN. Gentlemen, I come from a location that is peculiarly situated; a semidesert region, where all commodities have to be shipped a great distance and possibly living expenses are greater than at other points, and I wish to say that almost without exception the clerks in that district are not receiving enough salary to pay their actual expenses, and their wives and children have got to go out and help rustle for a living. We are making nothing but a bare living at the best and there is nothing left to afford pleasures or the other things that we feel we are entitled to, and without additional outside revenue we will have to quit. Within the past two years 10 men in our district have quit, and every one of them is making a much better salary than they did in the Railway Mail Service. I have been in the Railway Mail Service for 28 years, and while I have had my ups and downs I feel that I know the conditions at the present time. The work, as you know, is very strenuous. A simple illustration of that is that the younger men begin to wear glasses almost as soon as they start in.

Mr. BELL. How old are you?

Mr. BRYAN. Fifty-two.

Senator GAY. Do you believe in a reduction of grades, as outlined by the previous speakers?

Mr. BRYAN. Yes, sir. I would like to state that I am a class B clerk on a one-man run, and I, personally, feel that all men on runs of that character should be classed as clerks in charge. My work is exactly the same as one on a class C run. I handle the same amount of registers as they do. I have the same responsibility and I perform the same amount of distribution.

Mr. BELL. Your hours are as long?

Mr. BRYAN. My hours are as long. I am a little fortunate in having a run where I am home two days and nights and away two days and nights. Most all the other branches of the service, I believe, are allowed overtime. We are not. Within the past two weeks, gentlemen, I worked 34 hours without rest or without time off or for meals. I ate a cold luncheon and ate it as I worked.

Senator MOSES. That was due to Christmas?

Mr. BRYAN. The Christmas rush; yes, sir. For that I didn't get one cent above my regular salary.

Senator MOSES. You mean you were on duty 34 hours continuously?

Mr. BRYAN. Yes, sir.

Senator GAY. There is no question but what that is wrong.

Mr. BRYAN. Most everybody has the same experience. Mine was on account of late trains, otherwise it wouldn't have been quite so bad, but it is required of us, and we are willing to do it. I do not believe there is a more loyal set of men in the service than the Railway Mail clerks. I think I know what I am talking about. I have talked with other clerks, and they raised the money to send me down here by curtailing their necessities of life, and, gentlemen, if you can do anything in the way of increasing our salaries, we will appreciate it.

STATEMENT OF MR. W. B. LOWERY, MERIDIAN, MISS.

Mr. LOWERY. Gentlemen of the commission, I am representing the clerks centering at Meridian, but I am going to confine my remarks to the entrance grade of railway-mail clerks. We are continually needing recruits. A man to enter the Railway Mail Service has to pass an examination that requires a reasonable amount of education; along with that he needs a certain amount of initiative and, too, a certain amount of pride. That is what we have been getting. But to-day we have an entrance salary of \$1,300 a year—\$3.50 a day—a salary hardly equal to that of a common laborer. As a matter of fact, a first-year man in the mail service who comes into a terminal gets 42 cents a day less than a car cleaner who sweeps out the cars. You, as business men, can readily understand that we can never hope to get good recruits at this low entrance grade salary. The young men are seeking other employment.

The effect on the service is tremendous. It is not only lowering the spirit and morale of the men in the service now, but it is resulting in poor service. These men who are coming in are not competent, consequently they are delaying the mail. We are interested not only in our salaries—a man is, of course, interested in his salary—but we are interested also in the service we are giving. We have always taken a pride and an interest in it. These recruits we are getting at \$3.50 a day are not, as a rule, giving the service.

Most any assistant chief clerk in the country will tell you his most difficult problem is manning his runs with extra men, having difficulty in getting men in. Now, if this condition continues to exist, the business public is going to suffer. For instance, if there is a line 250 miles long and one of these recruits is an incompetent man, who missends a letter at the first junction, that letter may go several days before it gets right again. This condition should be remedied.

There is a remedy, and we are asking you to use your influence or make such recommendations as will bring about this remedy that we are going to offer; that is, more pay for the entrance grades and also for the higher grades.

We are asking for an entrance grade of not less than \$1,700 a year. We believe that \$1,700 a year will be an incentive to bring better men into the service and if that is done, the clerks will not only benefit, but the public at large will benefit. You understand that we are trying to improve the service, not only our own condition, but the entire service and, as business men, you can understand how it is impossible to get competent recruits for the Railway Mail Service at \$3.50 a day. However, let me state that we are getting some men who are competent.

Gentlemen, we, the railway mail clerks, wish to extend our appreciation of being able to appear before this commission, and we are glad that the Congress has sent you to us. We hope that you will be able to raise our entrance grade and also our maximum, because we are all far below the cost of living. In fact, we are facing a 100 per cent increase in the cost of living with a 37 per cent increase in salary, and what we are asking for is only about a 50 per cent increase. I think that that can be considered within the bounds of reason.

Mr. Lowery submitted the following brief:

BRIEF SUBMITTED BY MR. W. B. LOWERY.

We, the railway mail clerks centering at Meridian, Miss., about 75 in number, through our representative, wish to present the following statistics on the cost of living in and adjacent to Meridian, Miss.

We also offer a few suggestions for your consideration in regard to the general working conditions of the Postal Service as a whole.

COST OF MAINTENANCE.

We quote below a list of articles of food, clothing, and other commodities which are absolutely daily necessities to every family in all walks of life, giving with each the amount of increase in cost during the last seven years:

Bacon, lard, flour, sugar, meal, coffee, rice, grits, potatoes, eggs, butter, milk, each over 100 per cent.

Dry goods.—Bleached domestic, bleached cambric, sheeting, ginhams, outing, each over 300 per cent.

Clothing.—Ready-made men's, women's, and children's clothing, 100 to 150 per cent; shoes, hats, 100 to 200 per cent; fuel, lights, and telephone, coal, all grades, over 100 per cent; gas, advance 14½ per cent; electricity, advance 20 per cent; stove wood, advance 100 per cent; street car fare, advance 40 per cent; telephones, advance 20 per cent; physician's rates, advance 50 to 100 per cent.

In view of the fact that the cost of the actual necessities of life have advanced more than 100 per cent during the past seven years, while during the same time our salaries were only increased 37.2 per cent, we believe that our request for more compensation is honorable and just, and one which will merit the favorable consideration of your committee.

The railway mail clerks centering at Meridian, Miss., wish to call your attention to the present entrance grade to the Railway Mail Service, which is \$1,300 per annum, or \$3.50 per day, an amount hardly equal to the average daily wage paid to unskilled labor. The fact that the entrance grade is so low is the direct cause of the shortage of substitute postal clerks at the present time. Young men who have ability will not enter the service and endure the hardships of doing extra work for \$3.50 a day, because it is much easier for them to seek other employment offering better working conditions and paying a better salary.

The clerks who enter the Railway Mail Service to-day face the difficult problem of working four years for an average salary of \$4 per day.

We wish to call your attention to the fact that if this condition continues to exist that it will not be long until the personnel of the service will deteriorate to such an extent that the public generally will suffer a poor mail service as a natural result of having the Railway Mail Service manned by an inefficient force.

It is also our opinion that the monetary cost to the Government will be much greater because of the fact that by employing men of less ability the number required to man the service will be greater than if competent men were employed.

We have given this phase of the salary question a great deal of attention and study, and as we believe that the entrance grade is the most important point which your commission will be called upon to settle, we are asking you to fix this grade at not less than \$1,700 per annum. This we believe will cause a good class of young men to enter the Railway Mail Service, and as a result the public will profit by being served by an efficient force of postal clerks.

We wish to call your attention to a great, though undeveloped, possibility of the postal organization of the United States Railway Postal Clerks, and other employees of the Postal Service look with growing alarm upon the ever-spreading unrest prevailing to-day in practically all of our industrial centers, and this unrest has to a certain extent invaded the ranks of the Postal Service. We believe that the Government has in the postal organization a medium through which it is possible to reach from one central head every man, woman, and child throughout the United States, and we further believe that if the salaries of the postal employees were adequately adjusted to the increased cost of living and the working conditions improved, that all of the present discontent would vanish from the ranks of the employees, and that this, the largest single organization in Amercia, could be effectively used as a powerful stabilizing force.

We wish to call your attention to the present system of classifying the railway post office lines. We have first-hand knowledge of a line that has been reduced from a higher to a lower class automatically reducing the pay of the clerks, although they were required to continue handling the same amount of mail and working the same as before the line was reclassified. This we believe to be unfair; therefore we ask that all railway post office lines be given a single classification.

RURAL DELIVERY CARRIERS.

STATEMENT OF MR. IRA L. POPE, FRANKLINTON, LA.

Mr. POPE. Gentlemen of the commission, I have not prepared any paper.

Senator MOSES. You may file a paper later.

Mr. POPE. You want to know the reasons why we want a salary increase. In the first place, we have to use a car on the route and the upkeep is what costs.

Senator MOSES. Are you in a country where you can use a car the year round?

Mr. POPE. Yes, sir.

Senator MOSES. How long is your route?

Mr. POPE. Twenty-five and a half miles.

Senator MOSES. How long does it take you to cover it?

Mr. POPE. The schedule says we should start at 11, but often it is 12 before we get away, and it takes me until 4 o'clock.

Senator MOSES. How many patrons are there on your route?

Mr. POPE. Six hundred.

Senator MOSES. How many pieces of mail a day?

Mr. POPE. Two hundred a day; about 5,000 a month.

Senator MOSES. How big a town is Franklinton?

Mr. POPE. About 1,500.

Senator MOSES. How many carriers?

Mr. POPE. There are four routes out of there, but one carrier has resigned and we can not get anyone to take his place on account of the salary.

Senator MOSES. How long have you been in the service?

Mr. POPE. Six years.

Senator MOSES. What salary are you getting now?

Mr. POPE. Seventeen hundred and twenty-four dollars a year.

Senator MOSES. That includes the recent increase?

Mr. POPE. Yes, sir.

Mr. BELL. How many hours does it require to make the trip?

Mr. POPE. Usually it takes seven hours; that is, in the office and on the road, too.

Mr. BELL. Do you use a machine?

Mr. POPE. Yes, sir.

Senator MOSES. He says he serves 600 people.

Mr. BELL. It isn't so much the length of the route as the number of people you are required to serve; is that it?

Mr. POPE. Yes, sir. One of the carriers kept an accurate account of what it cost to keep his car, and it cost \$63.49.

Mr. BELL. Have you calculated how many miles you get from a gallon of gasoline?

Mr. POPE. It depends on the condition of the road; I use 3 gallons a day.

Mr. BELL. How much is gasoline in your section?

Mr. POPE. Twenty-six cents.

Senator MOSES. Have you any trouble in getting a substitute to take your place in vacation time?

Mr. POPE. Yes, sir.

Senator MOSES. Is that wholly due to the matter of pay?

Mr. POPE. Not altogether. He wouldn't understand the work. If you put a man on there, it requires some practice to do this work. The rural carrier doesn't get enough pay. I have been there six years and the cost of living is going up.

Senator MOSES. How much do you have to live on after you have paid for the upkeep of your car?

Mr. POPE. I figure about eighty and some odd dollars.

Senator MOSES. You have a family?

Mr. POPE. Yes, sir.

Senator MOSES. Have you any other employment?

Mr. POPE. They won't let us work for any other person. A rural carrier does not have time from his duties to do this extra work, because I have been in the service six years and absolutely know that a carrier can not be efficient and give part of his time to other work. I have been doing other work, but found that I would have to neglect my duties as a carrier, so I give up the extra work and am only giving my time to the service, and find that I am falling behind with my obligations.

Mr. BELL. What part of the day do you devote to that work? You say you start out on your route about 12 and that it takes seven hours.

Mr. POPE. We have to report at the post office, and it takes about an hour to an hour and a half, and after the arrival of the mail it takes us about an hour to route the mail.

Mr. BELL. Then the extra work you do is in the forenoon?

Mr. POPE. Yes, sir.

Senator MOSES. Do you think the situation in your case would be met by an allowance for equipment?

Mr. POPE. Yes, sir. I would suggest \$2,100 per annum.

Senator MOSES. Twenty-one hundred dollars, including your allowance?

Mr. POPE. Salary and allowance; something like that.

Senator MOSES. You mean that would be the entrance salary; that a man should go into the service at \$2,100?

Mr. POPE. After one year's service he should get that.

Mr. STEENERSON. As it is now, he receives the same salary the first year as the last.

Mr. POPE. Yes, sir.

Mr. STEENERSON. You would be in favor of a higher salary for the second and subsequent years?

Mr. POPE. Yes, sir. A rural carrier requires a man of good character and some ability, too.

Mr. STEENERSON. Do you think he could acquire the necessary familiarity and experience with the work in one year?

Mr. POPE. Yes, sir. It takes some time to get acquainted with the people. One trouble is that maybe there are five families that get mail out of one box. A man not familiar with conditions may get some important mail in some other person's box.

Mr. BELL. Do you sell money orders, too?

Mr. POPE. Yes, sir.

Senator MOSES. Which would you prefer, Mr. Pope, to have a separate maintenance allowance, or have the maintenance included in the salary?

Mr. POPE. I believe I would rather have the maintenance allowance.

Senator MOSES. Separate?

Mr. POPE. Yes, sir. I do not know that I have any other suggestions to make. We have a vacancy in the service now, and we can not get any one to take it on account of the salary, because they can make more at something else. We had a man that applied for the place and only made 70. He has applied for it, while others who have made 90 have declined it.

Mr. BELL. Has it been offered to them, and they declined?

Mr. POPE. Yes, sir.

Senator MOSES. You think if the salary was larger they would have taken the place?

Mr. POPE. Yes, sir.

FOURTH-CLASS POSTMASTERS.

STATEMENT OF MR. R. G. HAWKINS, PALMETTO, LA.

Mr. HAWKINS. Gentlemen, I wish to speak in behalf of the postmasters of Louisiana, the postmasters of the third and fourth class, who form a large majority of the membership in our organization. These people have been on a very small salary, I might say, considering the present conditions.

Take the fourth-class postmasters. The average fourth-class postmaster's salary represents about \$40 a month. That is a very small amount to take care of a man with a family, or even if he is a bachelor. I think the Congress of the United States and the Post Office Department should, at least, allow a fourth-class postmaster for the equipment in his office. That should constitute a cabinet, an iron safe in which to keep his valuables, and the furniture necessary to the use of his office. In addition to that the postmasters of the fourth class should be allowed a reasonable amount for the rent of the buildings they occupy; they should also be allowed a reasonable amount for fuel and light. I wish to say this: That the fourth-class postmasters, while they are the lowest in point of salary, they are not the lowest in the point of training and the class of service they render. The fourth-class postmaster has to be the postmaster, the money-order clerk, the registry clerk, the C. O. D. and pre-pay clerk, a distributing clerk, and he has to be the clerk that makes up the mails.

Now, this person that makes up the mail must understand the routing of that mail to insure the safe carriage of that mail from his office and from the trains, and if he makes any mistake in the routing of this mail, and continues to make this mistake, he gets a little check from the superintendent of the Railway Mail Service showing what he has been doing. If he makes any error in his money-order account, or in the writing of money orders or in issuing money orders, or selling money orders it is charged up to him—it comes back to him. He has to know the ins and outs of the post office the same as the postmaster or employees of the larger offices.

Of course, we are very grateful for the favors that the United States Congress and our Representatives have done for us in the past and we thank them in advance for what we expect them to do in the future. I am very glad that we had this opportunity to meet this

Joint Postal Commission here in this Southern city. It is a rare thing for an event like this to happen. In fact, it is the first time I know of.

Mr. BELL. It is the first time it has ever occurred.

Mr. HAWKINS. Yes, sir; it is the first time. It goes to show the right thing is about to come about. I thank these gentlemen for the privilege of speaking to them to-day.

Mr. BELL. How long have you been postmaster?

Mr. HAWKINS. Twenty-eight years.

Mr. BELL. Of course you didn't take a civil-service examination.

Mr. HAWKINS. Not until the civil service ordered it.

Mr. BELL. What is the total of your compensation, about?

Mr. HAWKINS. About \$40 a month.

Mr. BELL. Is your office kept in a store or separate?

Mr. HAWKINS. In a store.

Mr. BELL. How much rent do you pay?

Mr. HAWKINS. \$25 a month rent.

Mr. STEENERSON. Do you have the whole store?

Mr. HAWKINS. Yes, sir.

Mr. BELL. What part of that is chargeable to the post office?

Mr. HAWKINS. About a third.

Mr. BELL. Do you conduct that store?

Mr. HAWKINS. No, sir; we rent that out.

Mr. BELL. Do you have a clerk?

Mr. HAWKINS. No, sir; I am my own clerk.

Mr. BELL. Do you furnish your own fuel?

Mr. HAWKINS. Yes, sir.

Mr. BELL. Light, and so forth?

Mr. HAWKINS. Yes, sir. If you were to ask me what, in my opinion, the fourth-class postmasters needed the most I would say an iron safe and one hour dinner time.

LABORERS.

STATEMENT OF MR. JOHN J. DAHMER, NEW ORLEANS, LA.

Mr. DAHMER. Gentlemen, before filing my brief, I have a few suggestions to make. I think we should receive the previous valuation of the dollar, which I do not believe we are receiving at the present time. Last month alone my living expenses were \$128.35, and my salary was \$103. You can see the deficiency. I have a wife and four children and can hardly exist. I must say that the majority of the laborers are men with families and I suppose they are in the same predicament as I am.

We would like to see all overtime eliminated or a differential allowed. Last month, the majority of the laborers, including myself, worked from 72 to 100 hours overtime. It is a very hard burden on us and it lessens the efficiency of the men. He can't keep up that kind of work and give efficiency.

Senator MOSES. Wherein would a differential in the rate of pay remedy that?

Mr. DAHMER. For instance, night work should have a differential allowed, six hours for eight. Either that or time and a half time, which would cut down all overtime work in the service. On the other hand, we have laborers who are compelled to work nights 9

months out of the 12, and they receive no compensation over the men who work in the daytime.

Mr. BELL. What is your work?

Mr. DAHMER. Laborer.

Mr. BELL. What is the character of the work you perform?

Mr. DAHMER. We handle all the mail brought into the office and give it the first segregation. We separate the mails and do the same work practically as a clerk. We are compelled to perform certain clerical duties and only receive a small pittance of a salary.

Mr. BELL. Did you take a civil-service examination?

Mr. DAHMER. Yes, sir. We stand almost the same examination, with the exception of a little difference in the mathematical part, as the clerks.

Mr. STEENERSON. How long have you been in the service?

Mr. DAHMER. Two years or more.

Mr. STEENERSON. Are you getting the same salary now as when you entered?

Mr. DAHMER. The same as when I came in, outside of a small bonus.

Mr. STEENERSON. How much more do you get now than when you entered?

Mr. DAHMER. About \$12 all told, but my living expenses have increased a hundred and fifty.

Mr. STEENERSON. Did you get \$150 a year under this general resolution?

Mr. DAHMER. A 5 per cent bonus, I think.

Mr. STEENERSON. That makes more than \$12 a month.

Mr. DAHMER. Considering the cost of living it is nothing.

Mr. STEENERSON. How much has the cost of living increased in the last two years?

Mr. DAHMER. I should judge in the last two years it has increased at least 60 or 70 per cent, and in some cases 100 per cent. Everything has gone up, bread, eggs, clothing—clothing has increased to my knowledge, being a buyer for myself and wife, 200 and 300 per cent. I have worn this suit for three or four years and can't get another. I am dodging my creditors.

Mr. STEENERSON. You say there has been a 300 per cent increase in two years?

Mr. DAHMER. Yes, sir.

Mr. BELL. On clothing?

Mr. DAHMER. Yes, sir. I am a man of family and know what it costs to clothe children. Shoes have increased. I have four children going to school.

The main point I want to make is the elimination of overtime, or the allowance of a differential.

Mr. Dahmer filed the following brief:

BRIEF SUBMITTED BY MR. JOHN J. DAHMER.

On behalf of the laborers of the New Orleans, La., post office, I beg leave to submit this as my statement with regard to the wages and working conditions of our group:

At the outset I desire to state that we are classed as skilled laborers, and are compelled to stand a mental as well as physical examination; we also furnish bond. We handle every pouch and sack of mail that is delivered into the office from other points, and open and segregate for distribution all second, third, and fourth class matter; we repair mail bags, perform the work of a clerk in the parcel post section by preparing

for dispatch that class of matter, and otherwise are assigned to and perform duties akin to that of the clerical force, but when so assigned after our tour of duty as a laborer is completed, we receive but the wage of a laborer, while substitute clerks performing the identical work and with whom we labor receive 60 cents per hour. We are obliged to answer reports concerning irregularities and therefore have to assume—to a certain extent—some of the responsibilities which should, in some cases, rest with the clerical force.

According to the receipts of the office, the mail has increased from 50 per cent to 75 per cent in the past four years, but no increase has been made in the laborers' force. We have received a temporary increase of 15 per cent in salary to fight a permanent increase of over 100 per cent in the cost of living, and are therefore receiving practically less than 50 per cent of what we did four years ago, and we therefore ask, gentlemen, that our wage standard be restored to its former level and purchasing power. To do this, gentlemen, \$1,500 per annum would be necessary, and then would not permit of our saving for the twilight period of our existence.

We perform night work, for which no extra compensation is paid or any differential allowed—and we say without fear of contradiction that this Government is the only employer who enjoys the distinction of not paying extra time for night duty—and request that you recommend six hours night be equivalent to eight hours day work; with but some few exceptions our tours of duty alternate quarterly, but due to influence of unknown source these few remain forever on the day, and the balance of us are compelled to labor nine months per year at night; every detail change finds one laborer held over on night duty, which means six whole months of continuous night work. Gentlemen, I might mention that one of our force, who saw actual service "over there," and in justice to him be it known that although he would have been exempt, he was a "volunteer," on returning to his position was detailed for night duty two consecutive details; he appealed for justice, and when that was denied he was compelled to claim his reward for the services he rendered his country and in the same spirit that he volunteered he manfully resigned.

Gentlemen, only recently the Daily Bulletin contained an article instructing the postmasters throughout the country to utilize the laborers to do semiclerical work, and we consider this, and believe we are correct, as an admission that we are above the average skilled laborer.

Gentlemen, the laborers' force are men of families, and believe, as all true Americans do, whether they dwell in castles or huts, that it is our duty to God, our country, and our fellow man to educate and rear our offspring—the manhood and womanhood of to-morrow—so as to maintain the standard of the glorious United States, and if we are denied the wages that are so vital as to permit of our giving an education to our beloved ones, only one result is visible, and that is deprive them of something that once they get it, can not be taken from them—education.

This is a list of the wages paid the following laborers in the city of New Orleans, La.:

Longshoremen, \$0.80 per hour, \$1.20 per hour overtime, \$2 per hour Sundays and holidays, and a limit of four hours on the Sabbath or holiday.

Street railway motormen and conductors, \$0.42 per hour, \$0.63 per hour overtime.

Street railway laborers and trackmen, \$0.38 and \$0.40 per hour, \$0.57 per hour overtime; eight-hour day.

Railroad freight handlers, \$0.47 and \$0.49 per hour; time and a half overtime and Sunday work.

Railroad car repairmen, \$0.54 to \$0.58 per hour; time and half overtime.

Foundry helpers and laborers, \$0.40 to \$0.60 per hour; double for overtime.

Building laborers, \$0.40 to \$0.50 per hour; time and half for overtime.

Shipbuilding labor, \$0.45 to \$0.60 per hour; time and half for overtime.

Teamsters and loaders, \$0.50 to \$0.72 per hour; time and half for overtime.

All the above are eight-hour day; everything in excess of eight hours is overtime.

So you can see, gentlemen, how poorly paid are the skilled laborers of the richest employer on the face of the earth, and I sincerely trust that you will make such recommendations as will permit us to live as American citizens, and in doing so you will earn the lasting gratitude of the laborers' force of the Post Office Department of the United States.

THIRD-CLASS POSTMASTERS.

STATEMENT OF MR. W. P. TARTT, LIVINGSOTON, ALA.

Mr. TARTT. Honorable commissioners and fellow coworkers, or, honorable doctors and fellow sick patients, I have a few suggestions I want to put before this commission. I know that your work is

quite arduous and that it is also quite tiresome, and therefore I am just going to make a few suggestions and will ask you to take them into consideration. [Reading:]

We consider the salaries of all third-class postmasters should be increased at least 50 per cent, for the following reasons:

1. Our rates of pay were fixed by Congress over 20 years ago when prices of necessities were much lower than they were even three years ago. During this same period wages and salaries were raised 30 per cent.

2. Since 1914 prices of commodities have again risen another 100 per cent. Wages and salaries have also again risen to keep step with the rise.

3. Our duties as postmasters have been materially increased, our responsibilities added to and the standard of our qualifications raised.

4. The third-class postmaster is usually the only representative of the Government in his town. His pay should be such as to entitle him to the respect and standing due these considerations.

For similar reasons we think the pay of our clerks should be raised too. We think the third-class postmasters should also be given additional clerk help.

1. Because the work in our offices has become much more arduous through the introduction of the Parcel Post System and its rapid growth, together with the issuing of insurance and filing of claims for lost mail.

2. Because of the Rural Free Delivery System.

3. Because of the increase of the amount of incoming mail of all classes handled, caused by the advent of the mail-order business and other causes.

4. Because from all prospects the work and usefulness of the postal system is going to be still more increased in the future by aerial and auto service and other work.

We consider the hours of labor should be reduced to 8 hours a day, and thus brought into harmony with the oft expressed policy of the Government in all its departments.

1. The hours worked now are usually from 11 to 15 a day.

2. There are at present no specified hours for a third-class office to be open for the public transaction of business.

3. We think sufficient help should be furnished and the hours of work so arranged that no one should have to work continuously over 8 hours without extra pay.

We think that post offices, besides being divided into four classes with pay depending on the receipts of the office, should also have a supplementary subdivision based on the work with additional allowances to be made obligatory and not merely optional, for instance:

1. All offices that are central accounting should be "class A," with fixed additional pay and clerk allowance based on the number of offices served.

2. All offices at railroad junction points doing transfer and separating work should be "class B," with additional remuneration.

3. Offices having star routes originating with them and supplying other offices might be known as "class C," with added pay.

4. Other offices with unusual conditions, as exacting train schedules, large number of rural routes, or with corporations using their offices but not buying their stamp supplies from them, should also have distinct classification with proper consideration.

We ask the Joint Congressional Commission, at their session at New Orleans, La., to give their favorable consideration to these suggestions.

Mr. TARTT. There was a time when a postmaster could take an afternoon off, but that time has gone. I could use three clerks besides myself, and all of us busy 10 hours daily. I go on at 6.15 in the morning. It sounds like a fish story, I know, but I go to the office and work that mail up, then I take an hour and 15 minutes for breakfast, and I eat a cold dinner, and I have eaten cold meals for over a year in my office, and then I get through for the day at 9.30. I put in 14 hours a day and then am not through.

Mr. BELL. How much was your compensation when you first took charge of the office?

Mr. TARTT. \$1,400.

Mr. BELL. How much is it now?

Mr. TARTT. Eighteen hundred. It was sixteen hundred up until the last quarter.

Mr. STEENERSON. You are allowed \$475 for clerk hire, are you not?

Mr. TARTT. No, sir; that was raised at the same time my salary was raised.

Mr. STEENERSON. It is \$1,200 now?

Mr. TARTT. Yes, sir. The war savings for my office are something over \$23,000 for past 12 months, and the money-order business has amounted to over five thousand the past month. For the past 12 months an average of over \$3,000. Gross postal receipts over \$7,600. Internal revenue and proprietary sales over \$1,000. In taking these things into consideration, please bear in mind that we are the subagents for the big mail order houses of the country. We handle an unlimited amount of the National Suit Co. business at my office. We have a college town of some 300 young ladies and they are continually sending their orders and getting their goods. Then there is the Sears, Roebuck Co., Montgomery Ward & Co. and the others.

SPECIAL DELIVERY MESSENGERS.

BRIEF FILED BY MR. R. A. DRAGAN ET AL, NEW ORLEANS, LA.

We hand you this appeal for consideration of a just compensation of the special delivery messenger, not now a recognized employee of the Postal Service although a factor in special service rendered in the delivery of mail.

On the inauguration of the special delivery letter service, 8 cents of the fee was set aside to pay for the service of delivery of such letters. At this time the service was not as exacting as at the present day. Then letters were taken out by boys on foot and bicycle.

At present a messenger is required to be in possession of a motorcycle, costing \$400 or more. He must be clothed to meet all kinds of weather to effect delivery of mail in rain and cold.

Cost.—A messenger reports for duty at a certain time and remains on duty from 10 to 12 hours. He pays for the upkeep and repair of his motorcycle, at an average cost of \$25 monthly.

Compensation comparison.—Laborers, mechanics, clerks and employees' wages and salaries have been advanced.

Services of all kinds have advanced in compensation. Rents have advanced, cost of living has advanced, clothing has advanced.

No advance.—A compensation of 8 cents per letter or package is paid now for each, no additional recompense here although at the inauguration of the special delivery letter no consideration was given to parcels, that now reach the weight limit of 70 pounds and subject to the same service.

Hazardous service.—In rain, fog and slippery weather and streets, gliding in and out among other traffic, makes the service extra hazardous and requires expert chauffeurs or riders.

Expert delivery knowledge.—To make quick deliveries required it is necessary that messengers have a thorough knowledge of all the streets, the run of numbers, and to know that he can ride his machine along many places being almost inaccessible, a motorcycle not being permitted on sidewalks by the city ordinance.

Deliveries per day in New Orleans post office.—Deliveries for from 1,000 to 1,400 special delivery letters and packages are effected daily at the New Orleans post office by messenger, without increased compensation.

Service has outgrown the use of boys.—Young men of family are rendering this service without a just compensation. Boys are finding jobs without hazard at from \$30 to \$75 per month and are not obtainable for service as exacted at the New Orleans Post Office.

Comparison of cost of service and pay.—The cost of living has advanced from 80 to 100 per cent. The cost of the necessary motorcycle and its repair have doubled, and the motorcycle's life has to be taken into consideration is summing up the cost. The average life of the machine is from 14 to 18 months.

Inadequate pay.—Your earnest consideration for a just pay of the special-delivery messenger whether in fee allowed or the assuming of supplying the machine and its repair costs.

Request for supply.—To furnish the gasoline necessary for running machines used in deliveries.

Service is a fixture.—The special delivery messenger is now a fixture in the Postal Service, as the records will prove the enormous growth in the last couple of years and deserves the inquiry of your honorable committee, and having a just cause ask your consideration, a just recompense for exacting service faithfully performed.

Persons serving have never been recognized by law.—The law enacting service has never given individual service recognition, although at this post office nearly 40 men are detailed for such service and the subcarriers seek to avoid the delivery of specials as it means a loss to them.

Respectfully submitted to your honorable committee for a just compensation, for arduous, painstaking, and exacting service.

R. A. DRAGAN,
L. GODEFROY,
O. SEHLINGER,

Committee for Special Delivery Messengers.

Senator GAY. Gentlemen, this brings the hearings in New Orleans to a close, and I want to say that it has been a pleasure to have included New Orleans in the itinerary. The commission has been to a number of the big cities in the East and Middle West. The trip South was interfered with on account of very important business before the House and Senate for a number of months past. At my request the commission included New Orleans in its itinerary, and we are glad to get the testimony of the men engaged in the Postal Service in Louisiana and the adjoining States. We sincerely hope some good will come of it, and we believe there will be legislation affording some relief. The commission is also interested in the retirement legislation before Congress, and I sincerely hope the good work in the Postal Service will continue, and we want you to know that you have friends at court.

(Whereupon at 1.30 p. m. the hearing adjourned.)

POSTAL SALARIES.

TUESDAY, JANUARY 6, 1920.

JOINT COMMISSION ON POSTAL SAVINGS,
Memphis, Tenn.

The commission met in the Hotel Gayoso at 9.15 o'clock a. m., Hon. Edward J. Gay presiding.

Present: Senators Gay and Moses and Representatives Bell and Steenerson.

Senator GAY. I regret that all of the commission could not be here, but important business in Washington has detained some of them. As you know, the Postal Salary Commission was appointed during the Sixty-fifth Congress and has been taking evidence in a number of cities throughout the country—the great postal centers—and we are very glad indeed to be here in Memphis where we can get the testimony of you gentlemen from Tennessee and the adjoining States, and without any further delay we will call on the first speaker, Mr. George Rule, of Lonoke, Ark.

CENTRAL ACCOUNTING POSTMASTERS.

STATEMENT OF MR. GEORGE RULE, JR., POSTMASTER, LONOKE, ARK.

Mr. RULE. Gentlemen of the commission:

Senator GAY. May I interrupt you to say that as there are a great many speakers, we will have to confine you to the time that has been allotted, and if you have any briefs or papers you desire to file, we will be glad to have them.

Mr. RULE. I will say first that I got permission from the First Assistant Postmaster General to prepare some questionnaires, which I sent out with the understanding that they were to be filed with the commission. I have about 200 from Arkansas, Georgia and other States, and I have prepared here an epitome of our troubles. I will read that to you. [Reading:]

I have been requested by the Central Accounting Postmasters Association to present our case to your honorable body.

We heartily appreciate the purpose of your itinerary, which gives us the opportunity of talking our matters over with you. It indicates to us a disposition which assures us of a square deal. We have always believed that the Congress would do right by us, provided they had accurate and complete information of the conditions which surround us, and were cognizant of our needs.

In presenting to you a statement of the work of the central accounting postmasters, we purpose to be free from overstatement of the work done.

We rest our case on the amount of work done compared to other postmasters who are not in our class.

We claim that we should be paid for the extra work imposed on central accounting postmasters, independent of the increased cost of living—if there had been no increased cost of living during the last few years, then we should have extra pay any how, as this is a work over and above what we were doing before, the inauguration of the system, or what other postmasters who receive as much salary as we do, have to do.

Our claim is this: If A, who is not a central accounting postmaster, receives a salary of \$2,000, then B, who is a central accounting postmaster, and receives a salary of \$2,000, should have compensation for such work.

If the amount of work done is the basis for fixing salaries, then surely the extra work of the central accounting postmaster should be taken into consideration.

This being granted your concern will be to determine the amount of labor imposed by this extra duty.

Under the new system, one office in each county is designated a central accounting office, the other offices are known as district offices and are directed to obtain all their supplies of postage stamps, war savings stamps, thrift stamps, war revenue stamps and proprietary stamps, from the central accounting office and to send to him for redemption all applications for redemption of war savings stamps and to render his report of sales of postage, war savings, war revenue and proprietary stamps.

The duties of the central accounting office are to procure enough stock from Washington to fill all these requisitions, to count the stamps into his office, count them out, pack, register, bill, and charge them to the district office, and then monthly to count all of his stamp stock and register the amount on hand.

All of this work increases the amount of labor performed, multiplies the chances of loss in count, and increases the responsibility. The fact that all district postmasters are not familiar with their duties increases the work of the central office in auditing their accounts and corresponding with them in regard to same.

At stated times all the district postmasters send to us forms containing a statement of the transactions of their offices together with a requisition for stamps to replenish their stock. We are required to audit these statements, item by item. After having done this we must count, bill, and register to them the stamps to fill these requisitions, after which we must make an inventory of these transactions and recapitulate the entire quarter's business and mail all the reports to the auditor at Washington.

In handling this business many complications arise, for instance, a district postmaster will make a requisition for postage stamps and offer in payment a mixed remittance of money and war savings stamps, which are frequently made out wrong and must be returned for correction. You must then hold his account open until you can get the stamps returned by him and later sent to the direct accounting postmaster for redemption and returns.

We are now receiving war savings stamps from the district postmasters for redemption. In handling them we must sign for the register, check the stamps with the list, count the stamps, verify the calculations, compare the signature, the dates, and then credit the amount to their accounts. They must then be reassembled, marked for collection, listed, packed, and registered to the direct accounting office, then when the remittance comes from the direct accounting office, the list must be rechecked, the amounts credited to the different district offices, and a remittance made for same.

In liability to error, complications, and responsibility, the work of the central accounting office more than doubles the work of the small second and third class office. From a written statement, though made in detail, one can not understand the work and worry the work imposes.

It has been said that most central accounting offices are of the first class, this is not true, in the States of Tennessee, Arkansas, North Carolina, South Carolina, Florida, Louisiana, Alabama, Georgia, and Mississippi, the work is being done in most cases by third and small second class offices. Eliminating a few of the big offices from the count the average salary of the central accounting postmasters of these States is \$900, whose allowance for clerk hire is very small. There are a number of fourth-class offices, which are central accounting offices.

To act as clearing house, be a supply depot, shipping clerk, and auditor for these district offices imposes a burden of work and requires a degree of skill which should be remunerated.

When note is taken that our compensation for the ordinary routine duties of postmasters is not equal to the demands of the present standard of living, that we should receive compensation for this extra work is very apparent.

We believe that a fair compensation for this work would be \$25 for each district office served.

We respectfully submit this statement for your consideration.

Senator GAY. How many offices do you serve?

Mr. RULE. Eighteen.

Senator MOSES. That, then, would be \$450, according to the scale you recommend.

Mr. RULE. Yes, sir.

Mr. BELL. I want to ask you a question: What would you think of a plan to have one central accounting officer and one central accounting postmaster in each State and take this work away from the postmasters?

Mr. RULE. I refrained from expressing myself on the system, because I did not know whether it was within my province or not to do so.

Senator MOSES. Let us have it.

Mr. BELL. You can make any statements before this commission you want to, and you are protected in it.

Mr. RULE. I think the present system is a poor one, for this reason: That we haven't the adequate facilities for handling a large number of stamps, and it is a bad one for sanitary reasons. A great many of these offices are in the smaller offices with insanitary and unhealthful conditions. For instance, when the stamps come into my office, they come in original packages—they come in packages of 10,000, that is the 1s and 2s come that way. If I receive 10,000 2-cent stamps, I have to count those stamps, and I count them with my fingers after dampening them from my tongue. For instance, if a district postmaster sends for stamps, I dampen my fingers with my tongue and count them and handle them. If I should happen to be a tubercular man, those stamps would be liable to carry the infection. If the department is going to continue the system, I think they should make a lot of smaller original packages.

One, two, and three cent stamps are sent out 10,000 in a package. Most of my district postmasters take them in smaller amounts and I am required to break them up and handle them. I think it would be far preferable to have a few big offices in each State with facilities for handling and for storage and where they can get good clerk hire when they need it. The more work we have assigned to us, the more we have to do, and it requires more hours. In the last two or three years I have put in 12 or 13 hours a day and part of Sunday. Sunday is a quiet day and I take the opportunity then to check up a lot of business that has been hanging over.

You would find if you made an examination that a great many of these stamps are kept in insanitary places and that the facilities for handling them are poor. We can not afford to keep enough stamps on hand to always have enough to supply the demand, because of the great risk. I have my little safe full and I have to go to the bank and beg room. A portion of my stock of stamps is carried right on the floor of the bank. Sometimes I run out of stamps.

Mr. STEENERSON. I don't remember how many district offices there are in one accounting office, but altogether there must be in the neighborhood of 50,000. Now, if each one is to be allowed \$25, it would amount to \$1,250,000, and when this scheme of central accounting was first proposed to the Post Office Committee of the House it was urged that it would save \$30,000 worth of accounting in the auditor's office. It seems that in order to save this \$30,000 it will be necessary to spend over a million dollars.

Mr. RULE. They saved that money at the expense of the flesh and nerve of the employees.

Mr. STEENERSON. I do not understand exactly what the necessity was for your licking the stamps that come in.

Mr. RULE. I didn't say that. They come in stacks—leaves, one on another, and it is hard to get them apart. I can not handle the stamps without touching my finger to my tongue. We have to handle them with our hands, and if there is anything unclean on your hands it might stick to the stamps and be communicated to the other fellow. You understand we must count them out to the district with our fingers.

Mr. BELL. You could use a damp sponge.

Mr. RULE. You could, but the impurities would be communicated.

Mr. STEENERSON. That would have to be done somewheres, but you think that if it was done back in Washington it would do away with that.

Mr. RULE. My stamps always arrive clean and nice. I would rather do the extra work as central accounting postmaster than to handle the stamps as district postmaster that have been handled by other hands.

Now, I am not familiar enough with all the details of this work to offer any honest criticism as to the merit of the system in all of its ramifications.

Mr. STEENERSON. It is claimed it has reduced a number of losses by burglary and theft, because if large stocks were kept in these small third and fourth class offices they would be more exposed. Do you think that is well founded?

Mr. RULE. The man who inaugurated the system thought it out in all its details, I suppose.

Mr. STEENERSON. The chief objection you make to it is that they do not pay the central accounting offices, the postmaster, for the work, and that it is unsanitary—requiring a man to count these stamps?

Mr. RULE. We should be paid for the work of shipping stamps, auditing accounts, and keeping books.

Mr. STEENERSON. Are there any other objections to it?

Mr. RULE. One objection is the extra work it imposes without any compensation.

Mr. STEENERSON. Of course we could remedy that by giving the compensation. Well, that's all I have. I don't know how the central accounting system is working throughout the United States, but my opinion is that if the system is to be continued it would be better to concentrate the business in a few big distributing centers, with better provisions made for the service and have men delegated to that work only. If the distribution is to continue from the county seats, the men who do the work and carry the responsibility should be paid for it. It's a big job in work, risk, and responsibility, which should not go unremunerated.

FOURTH CLASS POSTMASTERS.

STATEMENT OF MR. CHARLES D. EWELL, POSTMASTER, RUBICON, ARK.

Mr. EWELL. Gentlemen of the commission: Doubtless you have already received numerous resolutions and briefs stating in full terms why the old antiquated system of paying fourth-class postmasters should be abolished. So at this late hour we will not burden

you with more of the aforesaid and same, but would respectfully present to you in a concise and brief way, the demands of the postmasters of the fourth class of the States of Arkansas, Mississippi, and Tennessee.

1. We ask for the abolishment of the cancellation basis, and that the minimum salary of a fourth-class postmaster be \$300 per annum.

2. That a postmaster's commission be made permanent, or so long as he gives good satisfaction or during good behavior.

3. That fourth-class post offices be closed on Sunday except to receive mail, that may be delivered on Sunday to that office.

4. That fourth-class offices be kept open eight hours and that that number of hours be termed a day's work, instead of from 12 to 16 hours, and that postmasters have pay for overtime.

5. That fourth-class postmasters have 15 days' vacation with pay once every year and that the Post Office Department pay the substitute.

6. That fourth-class postmasters be allowed an amount equal to 35 per cent of their salary for office rent, clerk hire, fuel, and lights.

Gentlemen, I am 12 miles out in the country. We furnish our own office, our own fuel and light, and we are supposed to be on the job at all times. While possibly we are not supposed to get up after we go to bed to hand out a dun to John Smith when he thinks he is going to get a letter from his girl, still they seem to expect almost as much. It don't do to tell him there is nothing there for him. He wants you to get up and look.

Mr. BELL. Is your office in a storeroom?

Mr. EWELL. No, sir.

Mr. BELL. Is it separate and distinct?

Mr. EWELL. Yes, sir. I built a little log cabin in my yard and I also paid to have a sign "Rubicon Post Office" painted to boot.

Mr. BELL. How much is your total compensation per year?

Mr. EWELL. About what I could hire a farm hand two months for. I sell stamps, and if I can cancel a lot of them I am all right, but if they send them to the mail-order houses I don't get any credit for selling them and the postmaster at the other end doesn't get any credit.

Mr. BELL. Do you give the post office all your attention?

Mr. EWELL. Not all my attention; no.

Mr. BELL. You have other business?

Mr. EWELL. I am a farmer.

Senator GAY. Do you keep a clerk there all the time?

Mr. EWELL. I keep an assistant—some member of my family. I can not hire a clerk. In Arkansas we have Roosevelt families. I only have 13 living children.

Mr. STEENERSON. I suppose you keep this post office merely as an accommodation for your neighbors.

Mr. EWELL. Well, I am not fixing to move away from that neighborhood.

There was and has been for the last 50 years some one who would keep the post office in every neighborhood for nothing but time and men have changed. Every man and woman on earth who labors is worthy of and gets pay for his or her services and why not the fourth-class postmasters?

It is just up to our Government to pay the fourth-class postmasters a reasonable salary or a majority of them will be forced to

resign and instead of 1,600 fourth-class postmasters in Arkansas, there will be a great many less and what is true of our State, applies to every State in the Union.

Mr. BELL. Is your post office on a railroad?

Mr. EWELL. It is 12 miles from a railroad.

Mr. BELL. Twelve miles. Could that territory be successfully supplied by rural service?

Mr. EWELL. No, sir; it is too sparsely settled.

Mr. BELL. Have you any rural service in that vicinity?

Mr. EWELL. No, sir.

Mr. BELL. None at all?

Mr. EWELL. No, sir.

Mr. BELL. Your office is supplied from what point?

Mr. EWELL. Lonsdale is the railway point. Recently the mail rider there had to hire a two-horse wagon.

Mr. BELL. You need good roads there.

Mr. EWELL. We are building them. We will build the roads if you will give us better service and a few more shekels for our work.

(Mr. Ewell filed the following brief:)

BRIEF FILED BY MR. CHARLES D. EWELL.

In 1883, just 36 years ago, the salaries of postmasters of the third and fourth classes were readjusted, and with the exception of a slight increase granted last year, there has been no change made in them since. Just how well a salary basis of 1883 fits the obligations of 1919 may be more clearly appreciated by a few comparisons between the cost of living then and now, but as reliable statistics seem to show the estimate to be about 80 per cent, we will not refer to statistics just here.

We wish to call attention to the progress of our great Government since 1883 along the line of inventions that call for energy, speed, and a general hustle of humanity that was not dreamed possible 36 years ago. First, the telephone was perhaps a novelty at that time. There were no electric lights; no electric cars; no automobiles or motor trucks; no real fast trains, and certainly no airships at all. To-day all these complex inventions are so closely woven into our social and industrial life that we wonder how past generations ever survived without them.

Progress along one line calls for progress along all others as well if the general prosperity and welfare of our Government are to continue.

We have just put over the most gigantic war program the world has ever known in which the patriotism of every citizen was thoroughly tried and tested. We believe that this experience has broadened our vision, and the thorough manner in which we overcame all obstacles has fitted us for even greater achievements in the future.

Our Postal Service was perhaps one of our Government's greatest assets in building up our great war machine, excepting fighting men and raw material. We were called on for every imaginable service, from posting bills to borrowing money to pay for Liberty loan bonds and war savings stamps. If we had "laid down" at this critical time we would have stopped every wheel of industry and invited certain disaster. We simply stood to our guns, and if anyone thinks there is any fun attached to being a war-time postmaster, one trial will convince him of his error.

It is evident that postmasters are a necessity, and it is further evident that present postmasters have proved their efficiency and loyalty to the Government. The salary schedule which we present for your approval is a very conservative document when viewed in the light of the changed conditions between 1883 and 1919. If it costs twice as much to feed a horse as it did prior to the war, the owner either has to pay the cost or let the horse starve, and the same rule applies to a man. While we make no threats, we state that the Government must realize this and provide for it, or stand for the final dissolution of its greatest asset, the Postal Service. No loyal representative of our people would contend that the causes and effects of war should provide the fat of the land for some, while others are beaten down into the dust by same conditions. The responsibility of peace or war rests on all alike and must be met if we are to continue to be a leader among the nations of the world.

The humblest servant is worthy of his hire, and my mission here to-day is to show that fourth-class postmasters are very much underpaid. It must be remembered that the gross salaries of these postmasters are limited to \$1,000 per year, plus the commission on money orders and special delivery letters, which are uncertain quantities, and

in thousands of instances these salaries are far below the above limit, some amounting to just a few dollars annually. Furthermore, postmasters of this class are required to furnish rent, fuel, light, clerk hire, and equipment, while their families have to be supported on the balance.

The postmaster buys the equipment, while the present postal law applies the proceeds from this equipment as part payment of said postmaster's salary. I will leave it to any body of sane men if it would not be just as fair for the Government to apply the proceeds of the postmaster's own henroost as part of his salary. In fact, it appears that the Government expects fourth-class postmasters to be content with the honor and glory which are supposed to be attached to such positions of trust and at the same time get out and hustle up a living on the side. A man is confronted with a very serious problem in protecting his private interests when the law is so arranged as to require said postmaster to give preference to a public interest. It could only be accomplished under a kind of "public-be-damned" policy, and as such does not harmonize with the high ideals of our great Government we feel justified in asking that such tight bargaining be discarded.

We further think we should receive an allowance for rent, fuel, light, and clerk hire. This is a public service, and the wonderful progress as outlined in a former paragraph has caused it to grow to such proportions since 1883 that entire buildings are often required to conduct the service. The entire time of one person is demanded at all offices and many require two.

Our rural communities constitute the very backbone of our great parcel-post service; therefore they become an important factor when considering our Postal Service as a whole. The postage on all parcel-post matter must be prepaid at office of origin, which swells the receipts of our large postal centers and throws a vast amount of work on the small postmaster for which he receives nothing. Surely this is not fair. Take away support given by our rural communities and the receipts of our mail-order centers would fall off perhaps one-third or one-half.

While we do not wish to make any unjust comparisons, we do not appreciate drawing a much smaller salary than our subordinates, especially since we are required to devote from three to five times as many hours to the same class of work, including Sunday and holiday service. This is just another relic of 1883, because there were no rural routes in those days. It is evident our status should be readjusted. We should be granted an eight-hour day in accordance with national law, and be given time enough to eat our noon meal in peace. Thirty minutes at noon is freely granted the rural carrier and horse for refreshments. Why not allow the fourth-class postmaster one hour? Our mighty railroad engines can not be run without fuel, water, and even rest. Are fourth-class postmasters considered mightier than they? Are they looked upon as some divine product that needs neither food nor raiment? Our present salary contract puts it up to the "ravens" to feed us, and, gentlemen, we haven't even heard the flutter of their wings in the distance. This monotonous grind is telling on us. We have no time for recreation and no time for association with our families. Our entire time is devoted either to postal duties or standing "at attention" ready to serve an exacting public. They see the service no further than it affects them individually. They overlook the fact that it is a live, pulsing thing of flesh and blood, capable of feeling all the joys and sorrows that humanity is heir to.

We further charge that the law should be changed so as to release a postmaster from responsibility under his bond after a 30-day notice of resignation. At present it requires from 3 to 12 months to get released from these positions, and the consequences are very serious. No position can be secured in advance with any degree of certainty as to when we may be able to take charge of the new work; thus many opportunities are passed up that would solve our financial troubles. I say that no real democratic government should wield such a powerful club when it is shown that it jeopardizes the rights of employees guaranteed them under the Constitution of the United States. We submit that a system of promotion should be employed by our Postal Service through which an incentive for efficiency may be maintained. We further claim that we should be accorded all the privileges given employees of the service, such as 15 days vacation, with pay, and 30 days sick leave, with pay. We see no reason why we should be excluded from all retirement legislation on the technical grounds alone that we are not employees of the service. I wish to state emphatically that the Post Office Department regards us as such, and we have thoroughly demonstrated that we are during the great crisis through we have just come. When a man or woman consumes his earning power in an exacting service of his country it is a serious economical error to junk them. Private corporations have realized that it actually does not pay dividends to do so, and such corporations are accused of keeping at least one eye on the dividend end all the time.

Before concluding, I wish to call attention to those fourth-class postmasters recently known as central accounting postmasters. These postmasters have had the extra responsibility of from one to a dozen other postmasters thrown on them without the

slightest warning or additional clerk hire and equipment necessary to care for such an emergency. I suggest, out of fairness to these central accounting postmasters, that their case be reviewed separately. Perhaps there is a central accounting postmaster present who wishes to give us some data.

We submit other data showing total receipts and disbursements at several fourth-class offices which we offer as part of the record.

(NOTE.—These data are on file with the commission.)

The Government should reimburse us for amount invested in equipment. The postmaster should not be required to pay rent, fuel, light, and clerk hire from his salary, especially a salary that is limited to \$1,000 a year, and in many cases does not exceed \$50 a year.

We thank you for your attention, and entreat you to support the national league salary plan, which we present for your consideration.

H. P. COTTON, Rives, Tenn.,
LEON CARAWAY, Big Sandy, Tenn.,
Committee.

NATIONAL LEAGUE SALARY PLAN.

Third-class postmasters.—That postmasters at third-class offices shall be paid salaries in accordance with the following schedule:

Gross receipts:	Salary.
\$1,900 to \$2,100.....	\$1, 650
\$2,100 to \$2,400.....	1, 800
\$2,400 to \$2,700.....	1, 950
\$2,700 to \$3,000.....	2, 100
\$3,000 to \$3,500.....	2, 250
\$3,500 to \$4,200.....	2, 400
\$4,200 to \$5,000.....	2, 550
\$5,000 to \$6,000.....	2, 700
\$6,000 to \$7,000.....	2, 850
\$7,000 to \$8,000.....	3, 000

Third-class clerk hire allowance.—That third-class postmasters shall be granted allowances for clerk hire according to the following schedule:

Postmaster's salary:	Allowance clerk hire.
\$1,650.....	\$600
\$1,800.....	700
\$1,950.....	800
\$2,100.....	900
\$2,250.....	1, 000
\$2,400.....	1, 100
\$2,550.....	1, 200
\$2,700.....	1, 300
\$2,850.....	1, 400
\$3,000.....	1, 500

Fourth-class postmasters.—That fourth-class postmasters shall be paid in accordance with the following schedule:

At fourth-class offices the gross receipts of which are less than \$100 per annum, the salary of the postmaster shall be \$150 per annum.

Gross receipts:	Salary.
\$100 to \$200.....	\$300
\$200 to \$300.....	400
\$300 to \$400.....	600
\$400 to \$600.....	750
\$600 to \$800.....	900
\$800 to \$1,000.....	1, 000
\$1,000 to \$1,200.....	1, 100
\$1,200 to \$1,400.....	1, 200
\$1,400 to \$1,600.....	1, 350
\$1,600 to \$1,900.....	1, 500

That fourth-class postmasters shall be allowed for the items of rent, fuel, and light a sum equal to 25 per cent of their compensation.

We will request that additional allowances be made for separating mails at third and fourth class offices and that clerk hire be granted to fourth-class offices where unusual conditions exist. Also that a commission of 5 cents be allowed for each money order issued and 10 cents for the attempted delivery of each special delivery.

SECOND-CLASS POSTMASTERS.

STATEMENT OF MR. F. H. MITTS, POSTMASTER AT TUPELO, MISS.

Mr. MITTS. Gentlemen of the commission, I take it as a favor on your part that you have come into our midst to hear us on things that are vital to us. As has already been stated, I am from Tupelo, Miss., and am a second-class postmaster. I suppose you gentlemen all know where Tupelo, Miss., is.

Senator GAY. We all know it was the home of Pvt. John Allen.

Mr. MITTS. I wish Senator Bankhead were here and I would tell him that the great transcontinental highway could not cross the continent—the Bankhead Highway, I mean—could not cross the continent without going through Tupelo. We come before you, and wish to submit this brief. We want to be modest, gentlemen. I believe that postmasters and postal employees have been as faithful and as true and loyal in all of the phases of our country's duties and responsibilities as any class of people on the face of the earth.

(The brief referred to follows:)

We, the postmasters of the second class, have been appointed and are duly authorized to appear and present to your honorable commission the arguments as hereinafter set forth in behalf of the postmasters of the second-class of Arkansas, Mississippi, and Tennessee.

INCREASED RESPONSIBILITY.

Since the now existing salary table was put into effect the following duties, with their attendant responsibilities, have been added to the post office-work: The parcel post, with its insurance and C. O. D. features; city and rural delivery; war revenue and war savings sales, and in many cases the distribution of supplies to tributary offices, and in some others the distribution of postage to district offices, and the auditing of the accounts of the postmasters of these district offices.

This increased responsibility is evidenced by the fact that the bonds of these postmasters have been increased from 50 to 100 per cent.

In this connection we beg to state that the parcel-post business in all its phases has grown to enormous proportions. This carries much added work in writing insurance receipts, filling out C. O. D. tags, answering inquiries, starting tracers for lost or delayed parcels, preparing indemnity claims, to say nothing of the increased money-order business necessitated by parcel-post.

The inauguration of the Rural Free Delivery system has added greatly to the number of patrons of the post office, thus extending the range of the postmaster's work and responsibility.

EFFICIENCY.

By virtue of these complex duties a higher order of efficiency is necessary in order to properly transact the business of the second-class office; in fact, the postmaster must possess such qualifications that would fit him for the most responsible positions in business life. The Post Office Department as well as the public demands satisfactory services.

There was a time when these postmasters were not expected to give full time to the duties of the office, but were permitted to engage in outside work. Now we are required to give at least 8 hours per day to the duties of the office, and many of us have to give from 8 to 12 hours daily.

Now, since the postmaster must be efficient and give his full time to the office, we feel that he should be paid a salary commensurate with the high standard required. We do not ask this solely for our own personal gain, but that these positions be made attractive to men and women qualified and in every way fitted to fill them.

GOVERNMENT'S LOCAL REPRESENTATIVE.

The postmaster is expected by his appearance and manner of living, his interest in civic pride, municipal and county improvements, church and schools, to reflect credit on the position he fills in his town and community.

He must, in addition to answering all correspondence from the Post Office Department, make replies and furnish information to other departments, such as the Agricultural Department, Census Bureau, Department of Commerce, War and Navy, and various subagencies of the Government.

CENTRAL ACCOUNTING SYSTEM.

Many second-class postmasters are now required to keep larger stocks of postage and to distribute from this stock to district offices of his county and to audit the quarterly report of these postmasters. This work requires carefulness in auditing and filling requisitions for postage, thus placing added worry and responsibility on the postmaster.

In addition, the distribution of the bulk of postal supplies has been transferred from the department to distributing offices, from which tributary offices are furnished all their stock forms and items. With these transfers of the distribution of postage and postal supplies from the department to central accounting and distributing postmasters there has come a corresponding transfer of correspondence formerly had with the department to these central accounting and distributing postmasters, thus shifting from the auditing and other departments a vast amount of clerical work. This is treated more fully in the brief of central accounting postmaster.

CUSTODIANS OF FEDERAL BUILDINGS.

Postmasters occupying Federal buildings are by virtue of their position made custodians of said buildings and are expected and required to supervise the custodian force and preserve and protect the buildings and grounds. Such postmasters we feel should have some consideration in the readjustment of salaries for this responsible and important work.

CONCLUSION.

In view of all the facts as set forth in this brief and others not mentioned, we feel that we are in the bounds of reason and justice to ask that our cause be heard and that we be advanced proportionately with men of like duties and responsibilities in business life.

Respectfully submitted.

F. H. MITTS.
Chairman of Committee.

Mr. MITTS. I will say that I am the distributing postmaster for seven counties. All the supplies and items that go out over this territory go through this office to 86 postmasters. I am also the central accounting postmaster for two counties. I have to audit the accounts—the quarterly reports for these. I use myself as an illustration, because there are many others in the same class. That there is increased responsibility is evidenced by the fact that the bonds have been increased from 50 to 100 per cent. I suppose the increased premium on the bonds is, in itself, a matter of little significance, but it points out the increased responsibilities.

The parcel-post business has grown more rapidly than I had any idea it would grow. It is now enormous in this little office that I fill. I would like to say this in connection with the parcel-post business. We are expected and required by the department to ask every patron that comes to the window, "Do you want this insured?" and it must be stamped "Fragile," "Perishable," "Butter," "Eggs," or whatever may be the contents of that package and it goes through all the ordinary complex routine of the postmaster and his force.

Whereas we had something like thirty-odd postmasters in my county before the rural free delivery was put into effect, now we have nine, and the range of responsibility has been increased to that extent.

Gentlemen, the questions I have in mind are all questions looking to the future. All along the line clerks, carriers, supervisory officials, postmasters are quitting the work. I have lost out of a clerical force of seven, three of my oldest and most efficient men in the last seven months. They have quit the service to go into other and more lucrative businesses. That is the gist of my argument—salaries should be so adjusted as to make them appeal to these men.

Senator GAY. You have 1 minute left, Mr. Mitts.

Mr. MITTS. Referring again to the duties of the central accounting and distributing of supplies postmaster, I wish to add that with the transfer of this business from the department to these postmasters there has come a corresponding transfer of much of the correspondence formerly had by the district and tributary postmasters with the department at Washington to the central accounting postmasters.

You can imagine what character of postmasters fill many of these three, four, and five hundred dollar offices. They do not seem to anticipate their needs of such supplies as will be needed for the year and as a consequence it is an unending job in furnishing them.

I have here not only the brief which I have in part referred to, but I represent all postal employees of the first congressional district of Mississippi, and I here submit the brief setting forth their resolutions: (The brief referred to follows:)

BRIEF SUBMITTED BY F. H. MITTS.

At a meeting of postmasters and postal employees of the first congressional district of Mississippi, the following recommendations were acted upon to be submitted to the Postal Wage Commission at its meeting January 6, in Memphis, Tenn.:

1. That rural carriers on standard routes be paid \$2,000 per annum with additional mileage for above a standard route. In submitting this it is the sense of the rural carriers that a conservative estimate of the cost of maintaining equipment necessary to handle the increased parcel-post business is \$650 per year. Further, that in cases where carrier is required to handle lock pouch in addition to his regular mail that he be allowed \$150 extra for handling said locked pouch.

2. That clerks and city carriers be paid \$1,400 for first year's service, with an increase of \$150 per year for four years, based on merit.

3. That postmasters in the larger fourth-class offices be paid \$1,200 per annum, and a scale downward based on receipts. That a fair rental be allowed for equipment.

4. That third-class postmasters be paid a minimum of \$1,400 with an allowance of 50 per cent of postmaster's salary for clerical help. In like manner for each step in the schedule of salaries the postmaster be advanced \$200 with an additional 50 per cent for clerical assistance until salary of postmaster is \$1,800, then 75 per cent of postmaster's salary be allowed for clerical assistance for two clerks, part time. When the salary of postmaster of third-class office is in excess of \$1,800 then an allowance for clerical assistance of 100 per cent of postmaster's salary be allowed for two clerks, full time.

5. That postmasters of the second class be allowed an increase above present scale of 25 per cent.

6. That all central accounting postmasters be allowed \$25 for each district office assigned to his office. This latter is to cover not only the increased work, but the added responsibility.

7. We feel that we are reasonable in our petition as set forth above.

THIRD-CLASS POSTMASTERS.

STATEMENT OF MR. J. L. DONALD, TUTWEILER, MISS.

Mr. DONALD. Gentlemen, I believe that the third-class postmasters have more ground for complaint than any other class of postal employees. I am going to file my brief and tell you about it. I want to call your attention to a report the Postmaster General recently

issued. One of his statements was with regard to the appointment of first, second, and third class postmasters. He said they were required to give their personal service. The erroneous idea has gone out that we do nothing, that we hire a clerk and fish and hunt and don't do anything to get this money. But he says in his report that we are required to give this service, and he says further that we are to personally give our service for eight hours.

Senator GAY. How much salary do you get?

Mr. DONALD. Fifteen hundred dollars, and I get \$400 for a clerk, and I do not know of any better illustration to show you what we are doing than to give you a little outline of what I am doing in my own office.

We have nine mails in and out a day; nine to distribute and nine to prepare and send out. The first mail comes in at 5.15 in the morning and they close at 8.25 at night. I am required to stay there until 9 o'clock if the train is late. You can figure that out for yourselves, 6 a. m. to 9 p. m. The public wants service from the postal department and it gets it. It gets all that it is entitled to from the Postal Service.

Then, again, the Postmaster General has asked for an increase in the appropriation for rent, light, and heat. I am not criticizing the Post Office Department. I believe there is an allowance of \$500 for rent and a hundred dollars for light and fuel. My office gets \$180 for rent and \$36 for fuel and light. My table in the brief will show the rent and light and fuel advances for the past four years. However, what is the use of an allowance being increased if it is not paid. I would be very well satisfied with \$500 for rent and a hundred dollars for light and fuel, but all I am allowed is \$180 for rent and \$36 for light and fuel.

Mr. STEENERSON. Have you made an application for increase?

Mr. DONALD. I certainly have—application after application. The only way we can get it is to go like a hound dog and sneak around in the back, through our Congressman, to get it. We might get a little bone by slipping around to the back door, but we nearly always have to have our Congressman help us to get even that.

It is the same thing on clerk hire. My office should pay \$600. Only a year ago I was getting \$180. Nine mails in and out a day. This is a junction office; they transfer mails from every train, and I am allowed about 10 cents a day for this extra work of transfer, while I was entitled under the postal laws of \$600. It was \$400 before. I was entitled to \$400 and was getting \$180. In 1916 I took it up with the Postmaster General to get an increase in clerk hire. I was paying the balance out of my own salary. I pay my clerk \$60 a month and have had to change four or five times in the last two years. They can get more money at something else. I have prepared a table of salaries showing what the railroad round-house is paying in our town and the express company. These are the similar lines, and they are paying at least twice what I can afford to pay.

Another thing; if this law is amended so as to make this clerk hire available, why not pay it? If it is based on the receipts of the offices, why not pay it? If it going to be based on a certain thing, why not pay it?

Again, the Postmaster General stated he increased the salaries of the third-class postmasters \$105,500 in 1919. He did nothing of the kind. He merely paid on the amount of gross receipts. When we took this commission, the Government said they would pay us so much on a certain amount of business. In 1917 they took it away from us and kept it away from us. The third-class postmasters did not get a raise. The second-class postmasters did not get a raise in their salary, but they did in their clerk hire. The fourth-class postmasters get an increase in their cancellations. We couldn't get anything, and we didn't get anything until last July.

Mr. STEENERSON. The salary didn't go up with the increasing business of these past two years?

Mr. DONALD. No, sir; and we claim that the Government owes us that on account of its contract, based on present classification, made in 1883.

Mr. STEENERSON. That was on account of the clause in the revenue bill that the salaries of postmasters should not be increased during the term of this war-revenue postage.

Mr. DONALD. I beg your pardon, but everybody's salary was increased. The fourth-class postmasters' was.

Mr. STEENERSON. I might say that the Ways and Means Committee were the authors of that provision, and the Postal Commission did not assume any responsibility for it.

Mr. DONALD. Didn't the Postmaster General recommend that law?

Mr. STEENERSON. Undoubtedly he did, but he is in favor of economy.

Mr. DONALD. Is it your idea that the Post Office Department was instituted for the purpose of making money, or to serve the people?

Mr. STEENERSON. I decline to be cross-examined.

Mr. DONALD. We made last year for the Government and turned over to the Treasury \$19,000,000, according to the Postmaster General's report. The idea was not for the Post Office Department to make money, but to serve the people. We are certainly serving the people, and doing it at the expense of the fellows with gray hair like mine. You might ask the question, Why don't you give it up? We could, but some other fool would take it. I have \$1,500 invested in my furniture and fixtures.

Senator GAY. How long have you held the position?

Mr. DONALD. Ten years. I came up from a fourth-class postmaster. I have paid for my investment in furniture and fixtures.

Senator GAY. Your time is up, Mr. Donald.

(Mr. Donald submitted the following brief:)

BRIEF SUBMITTED BY MR. J. L. DONALD.

Having been elected to appear before you in behalf of third-class postmasters of Mississippi, Arkansas, and Tennessee, I beg permission to submit the following:

There are certain conditions to be met in order to become a third-class postmaster.

First. The educational test, or civil-service examination, that must be successfully undergone.

Second. The postmaster must be of a good moral character in order to secure bond to protect the department against any incompetency or fraud.

Third. In almost all cases the postmaster must be financially able to purchase an outfit or equipment necessary to accommodate the public.

Fourth. The postmaster must furnish all office fixtures, such as typewriters, adding machines, and safe. These items have become a necessity in all lines of work of a clerical nature.

Fifth. The postmaster must provide heaters and lights necessary for the office.

When the above items are taken into consideration you will find that almost every postmaster is forced to invest from a thousand to fifteen hundred dollars of his own funds before he can fill the position.

There is no other line of work that I know of where the person who fills the position is required to furnish office furniture and fixtures. The present basis for computing salaries of postmasters was fixed by Congress some 20 years ago. At that time there was less than half the work required of postmasters as at the present time.

In submitting this brief line of argument, it is not my aim in any way or manner to criticize or cast reflections on the Postmaster General or the Post Office Department, yet, in order to get them before your minds, it will be necessary to make some comparisons and statements that might be construed that way. It is absolutely necessary to compare salaries paid postmasters and clerks in third-class offices with salaries paid other classes of labor of a similar nature. It is also necessary to compare the cost of living now with that of several years ago, when postal salaries were deemed sufficient. It will be further essential to the cause to note some of the changes that have been made in the Postal Service in order to properly reach a decision as to whether salaries are now adequate or not. It will be necessary, too, to note what the allowances for certain things are and how near to these amounts we are receiving at this time. To properly understand and appreciate what postmasters are required to do and what responsibilities are placed on them, we must of a necessity take into consideration many of the stipulations of the Postal Laws and Regulations which have been fixed by the Postmaster General, in connection with the Congress of the United States. We therefore respectfully refer you to a few of the most important of these laws and regulations, but for lack of time many will be left unnoticed:

Postal Laws and Regulations, 1913, at page 126, section 256: Every postmaster before entering upon his duties shall give good and sufficient bond, etc.

Postal Laws and Regulations, page 130, section 269: Third-class postmasters shall embrace all postmasters whose salaries are \$2,000 and over \$1,000.

Postal Laws and Regulations, page 130, section 270: Respective compensation of third-class postmasters shall be annual salaries based on gross receipts of the office for four consecutive quarters.

Postal Laws and Regulations, page 131, section 271, paragraph 3: Readjustments shall be made annually to take effect at the beginning of the ensuing fiscal year, upon the basis of returns for the four quarters ending January 1, preceding adjustment.

Postal Laws and Regulations, page 135, section 277: Every postmaster shall keep an office in which one or more persons shall be on duty during such hours of each day as the Postmaster General may direct for the purpose of receiving, delivering, making up, and forwarding all mail matter received thereat.

Postal Laws and Regulations, page 137, section 282: Post offices shall be kept open for the delivery of mail and sale of stamps every week day during the hours the principal business houses are open.

Postal Laws and Regulations, page 139, section 283, paragraph 1: Post offices of the first and second class shall not be kept open on Sundays for the delivery of mail to the general public, etc.

Postal Laws and Regulations, page 139, section 283, paragraph 4: Post offices of the third class need not be opened on Sundays unless a mail or mails arrive between the Saturday closing hour of 6 p. m. and 6 p. m. Sunday. If such mails do arrive and the public conveniences require its delivery, the office may be open for one hour on Sunday, etc.

Postal Laws and Regulations, page 145, section 293: Postmasters shall give their personal attention to the business of their office and shall not absent themselves therefrom for a longer period than two days without the written authority from the Post Office Department.

Postal Laws and Regulations, page 135, section 275: The salaries of the postmasters as fixed by law shall be deemed and taken to be full compensation for the responsibility and risk incurred, and for the personal service rendered by them as custodians of the money-order funds and other funds of the Post Office Department.

Postal Laws and Regulations, page 318, section 320, paragraph 2: There shall not be granted for use of any third-class post office a sum in excess of \$500 for rent, nor more than \$100 for light and fuel.

Postal Laws and Regulations, page 527, section 1118, latter clause: And at all other money-order offices, meaning third and fourth class, the compensation for clerical labor in the money-order business shall be paid out of the fees received for the issue of money orders, and shall be 3 cents for each domestic and international money order issued.

Tutwiler post offices pay the postmasters \$125 per month. Assistant postmasters \$33.33. Money-order fees, which go to the postmaster, amount to \$150 a year, making

a total of \$2,050 a year. To earn this, two people are employed from 10 to 12 hours on week days and 3 hours or more on Sundays. The postmaster supplements the assistant's salary to \$60 a month. This, together with the deficiency in allowance for light and fuel, as well as other smaller items, must be paid by the postmaster out of his allowance by the department. After all deficiencies are met, the postmaster has left about \$100 a month for his services, investment, and responsibilities.

The revenue from post-office equipment in most third-class offices amount to something like \$500 a year. Deduct this from the amount of the net salary of the postmaster and you have left only from \$700 to \$800 that must be paid the postmaster out of the receipts of the office.

The express company pays a clerk \$107 a month, an assistant \$87 a month. Both based on an eight-hour day. The foreman of the machine shops receives \$230 a month.

The assistant foreman receives \$160 a month with full pay for vacations and free transportation over the company's lines.

Car repairers receive \$121 a month for 26 days and \$28 for Sundays, making a total of \$149. Common labor at the shop receive \$93 for 26 week days and \$17 for Sundays, making a total of \$110 a month. Common laborers at mills and factories are paid \$90 a month and skilled labor even as high as \$150. Farm labor is paid from \$60 to \$75 a month, and nearly all salaries mentioned are based on eight-hour days with time and a half for overtime. None of the laborers mentioned above are required to furnish anything in the way of equipment, and but very few are required to furnish bond. Very few, if any, of them could qualify for the position of postmaster, and certainly none of them would care to do so, as they receive a very much better salary than postmasters.

Comparison of operating expense.	1919	1915	Increase.
			<i>Per cent.</i>
Cost of coal, Big Muddy grade, per ton.....	\$3. 90	\$2. 25	73
Cost of oil, per gallon.....	. 18	. 09½	99
Cost of clerk hire, per month.....	60. 00	30. 00	100
Cost of rent.....	15. 00	10. 00	50
Total number of items, four; average increase.....			80½

The above are operating expenses that can not be done away with, but are necessary in the conduct of the post-office business. The freight charges are not included in the above computations. The rate of freight charges has advanced 25 per cent plus war tax.

Comparison of salaries of postmasters and clerks during the period from 1915 to 1919, inclusive.

Using the fixed classification as a basis, represented by 100 per cent, we have, for postmasters: Rate of pay during year 1915, 100 per cent; 1919, 100 per cent (no increase); for clerks, 100 per cent; rate of pay for 1915, 100 per cent; 1919, 150 per cent (increase 50 per cent).

Thus we have no increase in pay of postmasters with an increase of 50 per cent in clerk hire (by recent act of Congress). Briefs have been filed showing that amount paid for clerk hire by the department has been for the past four years 50 per cent of the actual amount allowed.

Money-order department: Rate of pay during year 1915, 3 cents for each order issued; rate of pay during year 1919, 3 cents for each order issued.

Special-delivery fees: Rate of pay during year 1915, 8 cents for each article delivered; rate of pay during year 1919, 8 cents for each article delivered.

Showing no increase in special-delivery business, notwithstanding the fact that since 1915, special-delivery privileges have been extended to all parcels and packages up to 70 pounds.

Using the above comparative table we find that there has been increases in only one item (clerk hire). Now compare this with the table of values of living costs, we find an increase in the cost of living of 146 per cent; also an increase in the cost of operating of 80 per cent.

Allowances as fixed by law: Allowance for rent, third-class post office, not over \$500; allowance for rent, light, and fuel, third class, not over \$100; total for these two items, \$600.

Average allowance at present to third-class offices by the department: Allowance for rent, \$180; allowance for light and fuel, \$36; total for these two items, \$216.

Average percentage received, as compared with allowance, 36 per cent.

Average for clerk hire will show about the same percentage as that for rent, light, and fuel.

In re appropriation for clerk hire for fiscal year 1920: The appropriation for the fiscal year 1920 has been increased 50 per cent, but unless the department actually pays the increase as provided, the amount received will probably be in most cases about 50 per cent of what could be paid under the law.

In re report of the Postmaster General: In his annual report to Congress the Postmaster General has recommended that the allowance for rent, light, and fuel be increased for rent an increase of 44 per cent, for light and fuel, an increase of 80 per cent.

These recommendations are timely, but if the increase be granted there should be some definite arrangements whereby this increase will be actually paid, so that more commodious quarters can be secured and better facilities for handling the business of the offices prepared.

In connection with the above, will say that a very large per cent of post-office quarters are far below the actual needs for the best interests of the service, being as a rule some small room or out of the way place that can be had at a cheap rental.

There seems to be a general desire on the part of the people that the department purchase suitable sites and erect ample buildings to care for the ever-increasing amount of postal business. In small towns the buildings would not necessarily have to be very expensive, and no doubt could be owned by the Government at a saving in the course of a few years.

We further urge that you make some readjustment in the money-order business that will justly remunerate postmasters for the additional work of handling the C. O. D. business that has been put into operation in the last few years, and that money-order fees not be counted in computing allowances for clerk hire.

We would ask that you carefully observe that third-class postmasters are forced to comply with every feature of the present civil-service laws without realizing any benefits therefrom, such as hours of service, leave of absence with pay, employers' compensation provisions, and retirement privileges.

We further urge that whatever readjustments of salaries may be agreed upon and recommended by your honorable body be made retroactive, effective from July 1, 1917. Further, that this legislation be formulated and presented for adoption at the very earliest date possible in order to give needed relief to third-class postmasters.

Having canvassed the postmasters in Mississippi, I find that the conditions under which they labor, in connection with the extra amount of work that has been put on postmasters and postal employees, such as the service to the Treasury Department in the sale of war and thirft stamps, revenue stamps, etc., in service to War and Navy Department in posting literature of all kinds and recruiting offices to assist in gaining additional men for the War and Navy Departments, in service to the Department of Agriculture in distributing weather signals and forecasts, in service to the Bureaus of Health and Extension in handling an enormous amount of penalty matter, covering all their spheres of activity, in service to War Department in selling surplus war supplies. All of the above-mentioned duties have been added and many others of minor nature, together with the increased cost of living and operating since the present basis of salaries was fixed.

In lieu of the above-mentioned facts an increase of less than 50 per cent in salaries of postmasters and the actual amount paid for clerk hire necessary to secure competent help will not give postmasters the relief necessary to make life comfortable and the work the paramount principle in their minds.

We therefore recommend that an increase of 50 per cent be made in salaries of postmasters and that the Post Office Department pay full clerk hire; furthermore, that the Post Office Department purchase and own all equipment in third-class offices; also that the Post Office Department pay fuel and light costs necessary for the proper and comfortable heating and lighting of offices.

We therefore ask that you adopt the above-outlined plan of increasing remuneration of postmasters and clerks, or some similar plan by which postmasters and clerks may be given their just deserts and that when these plans have been put on the statute books of the United States Government that no discretion shall be given to anyone to alter them in any way except by legal procedure.

STATEMENT OF MR. J. T. SKELTON, GOODMAN, MISS.

Mr. SKELTON. Gentlemen of the salary commission, I have been allowed a few minutes' time in which to talk to you.

I am not going into the details of the cost of living, because I presume that fact has been presented to you before by every branch

of the service, and I am satisfied that you are familiar with it yourselves, but will say that is only one of the reasons that the third-class postmasters feel that we should be given an increase in salary.

We think that the amount of work that has been added to our duties since the present basis of salaries was established years ago should be paid for on a just and equitable basis.

We all know that a great number of these additions to the service have been of great benefit to the public, but have added greatly to the labor of the smaller postmasters.

We will take the parcel-post business, which has been added and extended in recent years, while a great convenience to the public, has put an enormous amount of work on the small postmaster without adding scarcely anything to the receipts of his office on which his salary is based. Fully 75 to 80 per cent of the parcels handled by my office—and I am satisfied this will represent most all of the third-class post offices of the country—originate in the larger offices and are handled and delivered by the third-class postmaster without showing anything in the receipts of his office.

Then the C. O. D. privileges of the parcel-post service work an even greater discrimination against the small postmaster, and if you will pardon me for using my office, Goodman, Miss., as an illustration, I think I can make you understand my point. During the past year at my office I received and handled approximately 1,000 C. O. D. parcels that originated in the larger post offices, where not only the postage was paid, but the C. O. D. fee was counted in the receipts of the larger office, amounting in C. O. D. fees alone to more than \$100 besides the postage.

In the same period of time I dispatched from my office three C. O. D. parcels and collected a 10-cent fee on each, or a total of 30 cents and 15 cents in postage, making a total of 45 cents which was counted in the receipts of my office, against approximately \$300 postage and fees collected by the offices of origin on C. O. D. parcels I handled.

Going further to show you the enormous amount of work that we have to do that does not show in the receipts of our offices, I will take the second and third class mail handled at my office in a recent month, and this will give you an idea as to the discrimination against the small offices while using the receipts as a salary basis, without taking these things into consideration. In the month under consideration, for each piece of second-class mail that was dispatched from my office and postage counted in the receipts of the office, I received from other offices, mostly city offices, and delivered 709 pieces, and in third-class mail matter, for each piece that originated at my office, I received from other offices and delivered 1,750 pieces that was counted in the receipts of the other offices, yet my work on each piece was almost as great as theirs.

Then, the franking privilege that has been greatly extended, especially in the extension Department of Agriculture, while possibly a good thing, has added enormously to the work of the smaller postmasters, as in almost every county and district there is now located an agent of the department with this privilege, who is sending thousands of pieces of this matter.

Mr. BELL. That was added when?

Mr. SHELTON. It has been constantly extended within the past few years.

Senator MOSES. You mean the county agents?

Mr. SKELTON. Yes, sir.

Mr. BELL. Demonstration agents.

Mr. SKELTON. Yes, sir. We have an agricultural high school established in my town, and until recently the county agent was at that school, and he sent out thousands of pieces of mail on which I had to work. I had all the work to do, but it didn't show one cent in the receipts of my office. Now, if we are going to be paid on the basis of receipts of our offices, we think those things should be taken into consideration and that the basis of pay should be placed accordingly.

Senator MOSES. What would you do with the postmaster at Washington, where there is so much franked mail coming in?

Mr. SKELTON. I would furnish him with clerks enough to handle it.

Mr. BELL. And they do, too.

Mr. SKELTON. That is my idea. If you are going to put this work on us, furnish us with clerks to handle it.

Mr. BELL. May I ask, if you recommend increased compensation to third-class postmasters, whether you recommend a flat increase or one based upon the receipts of the office?

Mr. SKELTON. Well, as a matter of course, I think you would have to take into consideration the receipts of the office in some measure to get a reasonable and just basis to go on. I think, though, in fixing the compensation, that all these things should be taken into consideration, especially the fact that so much of the business the third-class postmaster handles originates in the city offices, where, as I understand it, ample clerk hire is allowed, or ought to be, and then we have to handle it at the other end of the line. Here the third-class postmaster has to do it himself, as there is such a small amount allowed for clerk hire that we must make out with only a part-time clerk, with longer hours for ourselves or pay the clerk hire from our own salaries.

If I might be allowed to suggest I think the third-class postmasters should be allowed a 50 per cent increase based on present basis of receipts, with ample allowance for clerk hire, which I think after taking the increased duties of the office and all the work we do that does not show in our receipts will be fully justified.

STATEMENT OF MR. L. M. BURGE, POSTMASTER, CABOT, ARK.

Mr. BURGE. Mr. Chairman and gentlemen, I am a third-class postmaster and I want to say that the third-class postmaster has got a man's job. If he is not efficient he is not going to hold that job. He can't skimp the job and hold it. I mean by that that he can't leave something undone like perhaps an artisan doing work on a building, and not be noticed. If he don't come clean, it will show; and he has got to do it from the start. If he has any self-respect, he is going to do it.

Now, that is what is confronting the third-class postmaster. He gets wrapped up in his business. He gets wrapped up in the success of his office. He applies himself to the successful transaction of that office and he realizes more and more each day that he has got to be efficient. The Government demands it and should demand it. I have no objection

manding the best service of me that I

am capable of giving. That is my business, and that is what I have taken that office for.

Now the third-class postmaster saves the Government a great deal of work and worry and trouble and time. There are many complaints that come up to him. By using tact and by approaching and handling a patron in the right way, you keep down lots of complaints. You keep lots of letters from going into the department making inquiry about this, that, and the other. All of these things come up and he has got to keep that constantly in mind in order that he may forestall all that trouble at the other end of the line.

Away back in 1883 the salaries were fixed. There was no high cost of living problem then. They took into consideration the duties a man had to perform and what they expected of him and at that time they fixed the salaries. You gentlemen well know that our country has grown; that more is expected of every public servant. A few years ago Congress raised their own salaries. They should have. I think they should get more. It demands high class, efficient service and there are lots of men in Congress who could make more money than they are making in Congress, and I think that any servant of the Government that goes at this thing in an honest, upright, intelligent way, the Government ought not to treat him niggardly. I think he is entitled to just remuneration for the service he performs, and I think he ought to receive it.

Now there is one thing that operates against efficiency amongst the third-class postmasters. That is the long hours we are called upon to serve the public. It says that we should stay open until the business houses close, and yet everybody goes to the bank and transacts his business before 4 o'clock and thinks nothing about it. He is accustomed to it. You tie the postmasters up there until dark and after dark. The public take advantage of it. You take a man that has worked a long, hot summer day and he goes home tired. He has been in there all day with no recreation. He has to be up and ready for his work fresh the next morning. I think a law should be passed that the post offices should close about 5 o'clock winter and summer. Then he could go home and work in the garden if he has one. It would give him some recreation and a good, nice rest, so that he could meet the job better in the morning.

Now there is another thing about clerk hire. They come back at you and say, you can use your money order fees to supplement the clerk hire, or, in other words, you can take some of your own salary. Now, gentlemen, it is logical—that if a clerk is worth so much and you have to pay it out of your own salary, that comes out of the postmaster's salary and cuts it down. I think if a postmaster is to have a salary of a thousand or fifteen or eighteen hundred dollars that he should get that, and not say that so much of it should go for clerk hire. I do not see any justice in that proposition where you have to supplement the clerk's salary out of your own.

There is one other thing. The other day I wrote the First Assistant in regard to post office rent. I have been paying \$20 a month and now they want \$25. The First Assistant has been very nice to me and he wrote back to raise that rent to \$25. Now, there are lots of buildings in nearly every town that could be bought for the post offices. They could be paid for in quarterly installments. In a few years the Government would own those buildings and wouldn't have any rent, and would eliminate that expense entirely.

Mr. BELL. They would be nontaxable, too.

Mr. BURGE. I think that is a wise thing to do. If I was doing it, that is what I would do; but year after year I pay the \$300 that I am authorized to pay now; \$300, when you stop to think of it, at 6 per cent, you could buy a \$5,000 building. But you wouldn't have to pay that for the ordinary building. There are lots of buildings cheaper than that that the Government could get and they could equip them, too. Yet, we third-class postmasters have to furnish our own equipment. The Government says: "All right, you come in and buy it, and then you can rent the boxes, but when you collect that rent you must turn it over to me." I think they should be relieved at least to this extent. They could buy the equipment and then let the money for the rents come back to them until they are paid back, then turn them over to the Government. The postmaster doesn't care any more about them then. It is just a piece of property on his hands, but they would serve for years and years for the Government and the Government would get the benefit. As it is now, however, he has to invest that money and the Government gets the rents. If he is put out of office he stands a chance of selling it to his successor at a reduced price, and I can't see the equity in that procedure.

Ordinarily the third-class men will have to come down to their offices and sweep out and do janitor's work and be your own wash-woman. You have to be chief cook and bottle washer from start to finish. You have got to keep your finger on the pulse of that office all the day. You have to watch the whole thing, and you take a man that starts at 6.30 in the morning and stays until 7 o'clock at night, I think it is unfair and unreasonable, and I do not think you get the most efficient service when you ask that of a man; all we ask is that you gentlemen look into this matter, and I believe you will.

We are American citizens, not beggars. Speaking for myself, I am not begging, but I am asking that I be given a square deal on this proposition, and that is what you will find in the rank and file. Through the late war they stood to a man, and lots of them need the money that they have invested in war stamps. Some of my money, money that I have worked for and accumulated, is invested, if you will pardon this personal reference, but it is typical of the third-class postmasters, and they are not cashing in, either. I have a couple of carriers who need the money, but they are standing firm and are going to stick it out.

I want to say, personally, I was sorry when Congress repealed the 3-cent postage. The people were not kicking about it. They are exacting more; they are calling for more and better service, therefore, they should pay more, and that is all there is to it. I am not in favor of going ahead and making expenditures without knowing where the money is coming from, but I think that the postage should be raised to take care of it.

Mr. BELL. The records show that the revenue has increased since the postage was reduced to 2 cents.

Mr. BURGE. Possibly so; I don't know about that. That may be true. It is true in view of the fact that the mails are being used more and more all the time. I found out this about the post office business. You have got to stay on the job and you have got to see that your accounts are correct and you have got to see that you are to invest in office ap-

pliances. You can't charge the Government with that. I have a typewriter and an adding machine and a safe, with all of which I am protecting the Government's interests. I don't charge that to the Government at all, because it also helps me. I do that to save time and try to make this thing a go and make it a success.

I want to say this: I notice that the classified clerks were given a substantial raise the 1st of July. I have a lady that helps me that works 10 or 12 hours a day. She does as much work as any clerk in a city post office, and yet there is no provision made to take care of her. I don't see the justice in that. If a person here does a piece of work to the satisfaction of the Government and of the public, and another person over there does the same work, they should both get the same wage. These are things I wish you gentlemen would take into consideration, and, as I said before, this thing of the postmaster supplementing the clerk's wages out of his own salary is another thing for you to take into consideration. I think the salaries should be made so much for the postmaster and so much for the clerk.

The postmaster comes in direct contact with the public; he should uphold the dignity of the Government; he ought to be a high-class man and able to create the impression that we are living under the best Government under the sun, which we are, and we ought to feel that way about it, and we ought to feel that America is proud of the men who serve her and serve her well, and she ought to show it.

Now, I have nothing to say about the high cost of living. No man who pays the grocery bills needs to be argued with along that line. I believe in efficiency, and I believe that a man that does a day's work ought to be paid for it. You have to pay a man enough to make him appreciate his job, and when he appreciates it you get the best in him out of him.

Gentlemen, I know you are tired, and I thank you very much. I was telegraphed by the Arkansas branch of the National League of Postmasters to come over here and I am glad to have had this opportunity.

BRIEF SUBMITTED BY OTIS E. BRANNON, POSTMASTER, KILMICHAEL, MISS.

Not being able to be present at the convening of your committee in Memphis on January 6, I am taking the liberty to write a few statements in regard to the post office at Kilmichael, Miss., and hope you will give them consideration.

The Kilmichael (Miss.) post office is third class and has been such since October, 1916. I am not allowed a clerk—that is, a salary for one—but have to keep one all the time. The work in this office could not be kept up and maintained by one person, therefore it necessitates the hiring of a regular clerk. We have four rural routes emanating from this office, and we supply two interior post offices, namely, Poplar Creek and Lodi, Miss.. Out of each of the above interior post offices there is a rural route, making the work done by the postmaster and assistant at this office the same as supplying eight rural routes or its equivalent.

My salary as postmaster is \$1,200 per annum plus the \$200 bonus allowed us by Congress, commencing July 1, 1919, and ending June 30, 1920. I am allowed \$24 per month or \$288 per annum for separating allowance for the above-named post offices. My sales for the quarter ending December 31, 1919, was \$722.35 and the box rents collected for the same quarter was \$24.93. I have spent between \$500 and \$600 in equipping the post office here and the Government receives all the box rents. The allowance for rent and fuel and light is \$175 per annum. Until coal got so high as it is now this allowance was adequate but at present it lacks about \$12 or \$15 annually of being enough.

The depot agent at this place receives from \$75 to \$100 every two weeks as salary. His clerk is allowed \$84.50 per month payable every two weeks. The bookkeeper at the bank here receives \$1,800 per annum, and so on. I could name other persons doing work for private companies and persons receiving more than the postmaster here.

it, in my opinion, will not be necessary for me to say anything about the high cost of living, as I am sure you are well aware of this fact. But in this connection I will say that the salary I receive from the department is not sufficient for my family and to save anything from it.

I think that this office could pay a salary of \$1,800 per annum to the postmaster and at least \$600 for an assistant. In my opinion, the box rents collected at post offices where the postmaster has purchased all the equipment should be given to the postmaster entirely.

The depot agent and the bookkeeper referred to above do not do any more work or on any longer hours than I am unless they are paid overtime.

I think that the postmaster at a third-class post office should be paid at least as much salary as the highest paid rural carrier in his office. We are made supervisory officers of the rural carriers and everyone of them from my office receive more pay than the postmaster. Their work, when the trip is made in an automobile, is completed in less than four hours and our work is not completed until 6 o'clock p. m. or until business is over.

I would also desire to see a law granting third-class postmasters 15 days vacation every year with pay by the Government additional, the same as is given rural carriers and other employees. This is due us. As it is now, of course we could take 15 days vacation, but we would have to pay the person that stayed in the office while we was gone instead of the Government. A rural carrier can take his 15 days vacation and receive pay for the 15 days and his substitute will also receive pay for serving the 15 days from the Government.

The \$200 bonus give us for the present fiscal year is all the increase, raise, or bonus that a third-class postmaster has received since the beginning of the war and the increasing cost of living. We have been patiently waiting for Congress to do something for us as private lines of endeavor were doing for their employees. Anything that your committee will do in our favor will be highly appreciated by myself as well as all other postmasters in my class. I am sure that your committee will investigate thoroughly and I feel that you will accomplish something for us.

STATEMENT SUBMITTED BY C. W. BOLTON, POSTMASTER, PONTOTOC, MISS.

Permit me on behalf of postmasters and post offices similarly situated as my own to present this statement of facts and not a supposition, as is shown by records from my office, with our plea for increase of salary allowances, post office allowances and fixing of hours of labor to more reasonable and shorter hours.

The following is a copy of the records as made July 1, 1919. This is a third-class central accounting post office, Pontotoc, Miss.; receipts of office year ending June 30, 1913:

Postage sales, \$4,412.08; box rents collected, \$214.32; total receipts, \$4,626.40; postmaster's salary, \$1,600; clerk's salary, \$480; total, \$2,080.

Year ending June 30, 1919:

Postage sales, \$8,836.80; box rents collected, \$430.05; total receipts, \$9,266.85; salary paid postmaster, \$1,700; assistant postmaster's salary, \$500; separating clerk, \$240; total, \$2,440.

The records show that every department of the office has more than doubled in receipts, and also there was only an increase of salaries of \$160. Since this time, however, an increase under a late congressional act gives an increase of \$125 in postmaster's salary, and some increase in assistant postmaster's salary. Since 1913 the addition of the C. O. D. department, increase in parcel post, insurance and weights, the establishing of central accounting office to handle the auditing of the many district offices, which work was formerly done at Washington, the increase in number and size of parcels handled as well as the increase in all departments has made the work very heavy, and practically impossible for the limited number of employees to handle. In addition to the other numerous duties placed upon us has been the handling of thrift, war savings, revenue, and proprietary stamps, which could only be handled satisfactorily by our best and most capable office force. To illustrate, we handled for our county the sale of nearly \$400,000 worth of thrift and war savings stamps, and are now handling several hundred dollars a month in the sale of revenue and proprietary stamps. It is true that the sale of some of these stamps was made through our local banks, we furnishing them with all needed stamps. But since then has come the redemption of thousands of dollars of these stamps, all of which has to be handled through our office, without stationary or forms being furnished for that purpose. During the war we cheerfully did this work, in addition to our

other increased duties. But the increased amount of work, without any additional help or allowances with which to procure it, has made our work very laborious. At my office the Government leases the building with heat and light, but there are many indispensable expenses which must be met and which come out of the postmaster's salary.

Until recently my assistant received only \$41 per month, and only when I notified the department that she had much better salary offered her did she get an increase to \$55 per month. My separating clerk, a girl, gets only \$27 per month from the department, which salary I have to supplement out of mine that she may have enough to live on. I employ girls who are very capable, and do their work well, for no man would accept the positions at the salaries now being paid. Girls in the local banks, doing similar work as my assistant, are paid from \$75 to \$100 per month. Girl clerks in stores, doing similar work as my separating clerk, get from \$40 to \$75 per month. It is therefore not surprising that I find it difficult to keep trained help in my office. There are many expenses connected with offices of this kind which must be paid out of the postmaster's salary, as no allowance is made for that purpose. During the months of November and December it was necessary for me to place an additional clerk, and during part of December two clerks to enable us to handle the heavy work, both of which had to be paid out of the postmaster's salary. The postmaster buys adding machines, typewriters, letter-cancelling machines, and many other labor-saving necessities to enable them to handle the work.

FIXED HOURS OF LABOR.

We believe that there should be fixed and more reasonable hours of labor. For instance, under the present existing conditions, it is necessary for me to get my breakfast and be at the office before 6 in the morning, to receive and distribute early train mail in time for the rural carriers to leave on schedule time. And, with the exception of 40 to 60 minutes at noon, my time must be continually given to the work at the office until 6.30 or 7 o'clock at night, and sometimes later. This necessitates the postmaster giving from 12 to 14 hours daily to the duties of his office, and the clerks almost as much time.

We ask that some provision be made for offices of this kind to reduce the hours of necessary labor or supply additional clerks to handle the overtime work; that more reasonable compensation be allowed employees in the office to meet the high cost of living, as is done in all other departments, both public and civil, without drawing on the postmaster's salary to pay clerks' salaries. While there has been legislation in our many departments, third-class central-accounting postmasters seem to have been left out or overlooked from any legislation granting them relief. My office has eight district offices, 18 rural routes, and two heavy star mail routes supplied through it, the handling of which demands increase in labor and accuracy.

RURAL-DELIVERY CARRIERS.

STATEMENT OF MR. R. R. RANDEL, HOHENWALD, TENN.

Mr. RANDEL. Gentlemen of the commission: We have prepared statistics on the reports gathered through the agency of a questionnaire sent out to the carriers in the State of Tennessee, and I have prepared from that a brief, which I would like to read to you. [Reading:]

1. According to the Department of Labor the rural letter carrier is short of a decent living \$818, but according to his own statement he is short \$572. We believe that every man should be paid an amount equal to a decent living for his services.

2. Any employee who serves well his employer should be in line for promotion, and without such there will be a certain amount of discontent among the employees. I know one carrier who worked six years without losing a single day, and who has never received a reprimand from his superiors in office. It seems that this character of work should be recognized.

3. The rural carrier is the only direct representative of the Government that comes in daily touch with the people of the rural districts, and as such he should be paid a salary that would gain their respect, but he is looked upon as the poorest paid man in the community now.

4. The roads over which the mails are carried should be improved so as to give the people the best possible service, which they are entitled to.

5. I heard the honorable Fourth Assistant Postmaster General say in the city of Washington that the rural carriers should work for less pay because of a war raging in Europe at that time—that was in 1914.

6. In 1914 when the basic pay was fixed for rural carriers, corn was worth 60 cents per bushel; oats, 40 cents per bushel; hay, \$15 per ton. Now corn is worth \$2 per bushel; oats, \$1 per bushel; and hay from \$36 to \$40 per ton; and everything else that we use has advanced accordingly, except our salary, which has advanced 41½ per cent.

7. The average carrier, if he should have a protracted spell of sickness, could not emerge from it financially able to pay his bills, and in view of these facts, he should be allowed an annual sick leave of at least 15 days. Private corporations and concerns allow their employees such leave. Then why not the Government?

8. It is impossible for carriers to procure substitutes to perform their duties at the pay of the regular carrier, because he is making more money than the carrier is, and will not take the place.

9. The average carrier has spent the best part of his life in the service, therefore he feels a certain delicacy in attempting to compete with the more experienced business man in other avocations, but in spite of this the number of resignations from the service seems to have increased materially, and applicants are seemingly few.

The rural letter carriers of Tennessee have data pertaining to salaries, vehicle expense account, and figures showing salaries received by us after deducting vehicle expense from original salary account for year 1919. These data were gathered through the agency of a questionnaire sent to certain points in the State, so distributed as to cover the whole State, yet necessarily limited to avoid burdening incumbent where we to have each and every carrier to respond.

The statements of 336 men here submitted show an approximate salary of \$1,475 per annum, with an average expense of upkeep of horse and vehicle of \$688.56, leaving an average amount for living expenses for the carrier and his family of \$786.44.

These figures are a revelation from the fact that they show that the expense of horse and vehicle upkeep, not purchase price, is 46½ per cent of the salary received by the rural carriers. This data was gathered in August, 1919, before we were aware of the 21½ per cent increase effective July 1, 1919, which will change these figures materially, but not enough to meet the individual needs of the carriers. It has become necessary for the rural carrier to occupy himself in other lines after he has served the Government a day's work in carrying his route, to make a living for his family. Either that or bankruptcy.

We believe that a man who performs a day's work of this character should not be required to put in a double day in order to meet the necessary expense of living.

We are working on a basic salary of \$1,200 per annum with 41½ per cent bonus, which does not compare favorably with the increased cost of living of about 100 per cent.

We believe that every employee should be given credit for his faithful service, and that his efficiency and seniority should be an asset in his favor for promotion, believing that a better class of men can be secured for the service if it is understood that they are in line for promotion, as no energetic man wants a position knowing that there is no way by which he can gain promotion by efficient and faithful service; we are required to be efficient, which is our motto, but we are not given any credit for either seniority or efficiency when we ask for promotion it seems.

Therefore in consideration of these premises we respectfully submit these figures and data, knowing that you would appreciate these facts in the case, hoping they will be of some assistance to you in reaching a just decision in behalf of the rural letter carriers.

NOTE.—The detailed figures and data referred to are on file with the commission.

Senator MOSES. What do you mean when you say in your brief, "opportunity for promotion?" You are not denied that, are you?

Mr. RANDEL. I mean that we are not in line for promotion. If we ask for a promotion we are not given any credit for our efficiency or seniority in the service.

Senator MOSES. You mean as to increases in salary?

Mr. RANDEL. No, sir; if we ask for a promotion in the service.

Senator MOSES. Into another department?

Mr. RANDEL. Yes, sir. I have been in the service for 13 years, and so far as I have been able to learn I am thought no more of by the Post Office Department than a man who came in the service yesterday.

Mr. STEENERSON. But you have been promoted.

Mr. RANDEL. My salary has been increased, but I have not been promoted.

Senator MOSES. Just what do you mean by being promoted. Do you mean becoming postmaster, for instance?

Mr. RANDEL. I mean this: The rural free delivery is not the top, nor anywhere near the top. We think we ought to get credit for service.

Senator MOSES. You can go out and run against your Congressman and seek promotion in that way any time.

Mr. RANDEL. I am not in politics. The position denies me that right.

Senator MOSES. I do not understand this question of your not getting promotion. You are getting your pay raised all the time.

Mr. RANDEL. We might want to change positions. We feel that we should be entitled to recognition for faithful service.

Senator GAY. Have you ever applied for any other place?

Mr. RANDEL. I made application for postmaster.

Senator GAY. How long ago?

Mr. RANDEL. Seven years ago, I guess.

Senator MOSES. That was before civil service; through the influence of your Congressman?

Mr. RANDEL. No, sir.

Senator MOSES. Were you indorsed by your Congressman?

Mr. RANDEL. I was not asking for any political indorsement. I was asking that I be given credit for my efficiency. There was never a black mark against me. I just felt that I was probably in line for promotion.

Senator GAY. Have you made any recent application for promotion?

Mr. RANDEL. No, sir; I have not. I became so badly discouraged that I felt there was no use. Now, the rural carrier is the only direct representative of the Government that comes in contact with the people of the rural districts. In 1914 we were paid a hundred dollars a month. The people of the community then looked upon us as well paid men with a respectable position. Since that time conditions have changed and we are earning just about the lowest salary of anybody in the community.

Senator GAY. What do you think would be a fair salary?

Mr. RANDEL. I have a clipping here. You might take that as authentic—the figures are taken from the United States Department of Labor's schedules.

Senator GAY. We have had those figures a number of times almost every place we have been. I am asking you what you think a fair salary would be.

Mr. RANDEL. According to our expenses we think we ought to have anyway around eighteen hundred dollars a year with maintenance.

Senator GAY. And you are getting now, what?

Mr. RANDEL. Twelve hundred dollars, with a 41½ per cent bonus, which makes the standard route of to-day seventeen hundred dollars, and we buy and maintain our own equipment.

Mr. STEENERSON. Seventeen hundred dollars for what?

Mr. RANDEL. Seventeen hundred dollars for a standard route of 24 miles, and then we are buying and maintaining our own equipment out of that seventeen hundred.

Senator MOSES. Do you use horses or automobile?

Mr. RANDEL. I use a horse practically all the time. My roads are not in such a condition that I can use a car. In 1914, when we were receiving a hundred dollars a month salary, we bought our corn for 60 cents a bushel, oats at 40 cents, and hay at \$18 a ton. We are now paying \$2 for corn, \$1 for oats, and \$36 to \$40 per ton for hay, and it doesn't seem to me that the increase of 41 $\frac{3}{4}$ per cent in salary, or bonus, whichever you choose to call it, is equal to that increase in the cost of living.

Senator GAY. Do you think the position ought to be paid for according to the value of the position, or do you think that the salary should be based on the cost of living?

Mr. RANDEL. I am willing to take it either way. The value of the rural free delivery service is a financial loss to the Government when you put it on the basis of dollars and cents. It doesn't pay its way, but on the whole the Post Office Department makes money.

Senator MOSES. Well, does it?

Mr. RANDEL. That is the question.

Senator MOSES. Does it make money?

Mr. RANDEL. That is my information; that the Post Office Department in the last year has laid up a handsome sum of money, but the Rural Free Delivery Service, as I understand it, has never been designed as a money-making proposition, but for the benefit of the rural districts, who receive absolutely no other agencies from the Government. When I go out on my route I come in contact with men who know absolutely nothing about the other departments of the Government. I am the only direct representative of the Government that goes into that community, and as such we feel that the position is worthy of the respect of the people, because they are looking to us for their daily mail and they have no other source from which to receive it. It seems to me that from the actual standpoint of dollars and cents it is not paying expenses, but taking the whole Post Office Department as a whole, they are making money. Am I correct in that?

Senator MOSES. Well, Mr. Burleson says so. I do not know.

Mr. STEENERSON. I would like to ask you a question about this salary proposition. You say the salaries of the carriers have been increased 41 $\frac{3}{4}$ per cent?

Mr. RANDEL. That is a bonus.

Mr. STEENERSON. The temporary increase?

Mr. RANDEL. Yes, sir.

Mr. STEENERSON. Are there any other post-office employees that have been increased that much?

Mr. RANDEL. I can not say. I am not familiar with the other positions at all.

Mr. STEENERSON. I think you are at the top of the heap. You have gotten more than anybody else.

Mr. RANDEL. I haven't gotten as much of an increase as the employees of private corporations.

Mr. STEENERSON. You say that the rural carriers who go out to visit the farmers were held in higher regard because they had a higher salary a few years ago?

Mr. RANDEL. Yes, sir.

Mr. STEENERSON. And now they are paid less in proportion?

Mr. RANDEL. Yes, sir; less in proportion than they were paid in 1914.

Mr. STEENERSON. What kind of farmers do you call on on your route; large or small?

Mr. RANDEL. Small.

Mr. STEENERSON. What is the average income of the farmers you serve on your route?

Mr. RANDEL. I couldn't say.

Mr. STEENERSON. What is the average acreage?

Mr. RANDEL. Well, some 50, some 75, and some 100 acres.

Mr. STEENERSON. Many of these farmers haven't an income of \$1,700 a year; isn't that true?

Mr. RANDEL. I think practically all of them will beat me. Practically all of them have an income of more than \$1,700.

Mr. STEENERSON. You think so?

Mr. RANDEL. Yes, sir; because they sell me their corn at \$2 a bushel; then they get their other crop in 90 days and have nine months in which to do something else.

Mr. STEENERSON. How many hours a day does it take you on your route?

Mr. RANDEL. The average carrier of Tennessee puts in eight hours and 21 minutes on his route, besides fixing his mail. He puts in 10 or 11 hours.

Mr. STEENERSON. How much would we have to raise your salary to bring your income up to the average farmer you serve on your route?

Mr. RANDEL. I couldn't say. I never figured that. I think it would have to be placed at \$1,800 a year with maintenance, because he can go out and do something else for nine months in the year.

Mr. STEENERSON. In your district the farmers only work three months in the year?

Mr. RANDEL. Practically that—in the cultivation of his crop.

Mr. BELL. Do the rural carriers have an organization in your State?

Mr. RANDEL. Yes, sir.

Mr. BELL. How many of them are connected with that organization?

Mr. RANDEL. Some five or six hundred.

Mr. BELL. Is your organization affiliated with the American Federation of Labor?

Mr. RANDEL. No, sir; it is not.

STATEMENT OF MR. A. N. POWELL, STANTON, TENN.

Mr. POWELL. Gentlemen of the commission, I am before you to represent Arkansas, Mississippi, and Tennessee.

You have heard what Mr. Randel had to say. In regard to our present salary basis, we are now getting a bonus that brings us up to \$1,748 on a 26-mile route. I am speaking from my own experience and some affidavits. The figures I am giving you were procured from some questionnaires sent out last May, and there are statistics given to these gentlemen by their postmasters, and affidavit has been made as to the statements covering the cost of expenses, and so forth.

The annual mileage in these three States as compiled from these statistics is 24.18—that is the average. These statistics were taken indiscriminately. The average cost of upkeep was \$638, according to these statistics, a year, although half of them did not give the depreciation in full for their outfit. The average number in family of these carriers was four and a half.

Now, it takes at this time at least 15 per cent more than it did at the time these figures were gathered to pay the feed bills for their stock, because all feeds have increased since that time. We are placed in this position: That we are getting pay, on a basis of the per cent for the maintenance, away below what it actually costs at the present time.

We are living all the time in anticipation of the next Congress that is to meet, and that is now in session, in the hope that they will do something to give us some help by next July, because we lose all hopes next July if there is not something done. What we want is a permanent salary. We want to be placed on a basis where we know we can live as representatives of the Government should.

Senator GAY. What do you think would be a fair permanent salary?

Mr. POWELL. I think about \$2,000 and \$700 for maintenance would be very fair for the rural carriers. I carry the mail on a route where there are 105 boxes. I deliver about 10,000 pieces of mail. I have forty some odd boxes belonging to white men and the rest to negroes, and I want to say to you gentlemen that those negroes who are renting that land out there are getting more money than I do.

Senator GAY. What do they raise; cotton?

Mr. POWELL. Cotton.

Mr. BELL. How long has that been the case; that they make more than you?

Mr. POWELL. For the last four or five years, and always they made as much. I dealt in produce and things of that sort and some fellow got envious of it and reported me, and they stopped me. I was making a living and made my expenses on carrying the mail. We can not do that now.

Senator GAY. How long ago was that?

Mr. POWELL. About eight or nine years ago, when we were getting \$720 a year. When you get up every morning at 5 o'clock and curry a horse and get him ready to go, and put in an hour and a half a day making preparations to carry the mail before you go down to the post office, and then at night when you come back with your horse all froze up with mud and sleet you have to clean him off or he couldn't go out again the next day. In the winter a rural carrier has very little time to do anything but carry the mail. In the summer time he is exhausted by the time he makes a 30-mile route in a buggy. Consequently I think the Government should take care of us along that line.

Here is the statement of a carrier with a basis of salary of \$1,240—his name is John M. Abercrombie—and with the bonus that brings it up to \$1,748.

Senator GAY. What work does he do on the outside?

Mr. POWELL. I couldn't tell you what he does, but if he is like me he doesn't have time for much. By the time you get through the

chores around your home, and you have to do them yourself, because it costs more to hire a man than you make yourself—I couldn't hire a mechanic in my town to nail shingles on my house or anything else for less than \$5 a day.

The loop routes and the star routes are something I think should be given some attention by this commission. I carry star-route mail at one office up there and I carry sometimes five or six sacks a day. I carry as much mail to that star-route office as I do on my own route. There are other carriers at my office that do not carry a greater amount of mail, but they do not carry a star route and they receive the same amount of salary that I do. I never receive a cent for carrying that and it cost the Government \$500 a year before I came there.

Mr. BELL. Have you ever asked for extra compensation for that work?

Mr. POWELL. I asked Mr. Blakeslee how I could proceed to get help, and he said he did not know. I said there was mighty little justice in it. I said there was mighty little justice in the way carriers were paid. I wrote to my Congressman and he said that I should take it up with Mr. Blakeslee, and I didn't see any use taking it up further with him. Take the city mounted carrier, the Government allows him \$37.50 a month. We are not asking for \$37 a month. We are asking for \$700 for maintenance, which we really need, and we are also asking for \$2,000 straight salary.

STATEMENT OF MR. R. E. BAKER, WINCHESTER, TENN.

Mr. BAKER. Gentlemen, I represent the rural carriers of Tennessee. I deem it unnecessary to repeat what has already been said—that we are working for an inadequate salary. I assume you are already in possession of that fact, but I do desire to call your special attention to some of the problems that confront the rural carriers to-day.

First, I want to mention the high cost of living that comes to the carrier in the support of his family; next, the rising cost of maintenance of his equipment. While food and clothing has advanced, the maintenance of equipment has advanced equally as much.

Referring to the questionnaire that was sent out by the commission to be filled out by the rural carriers, I refer to one filled out by Mr. Frank E. Pittinger—this is from my home office, and I am confining much of what I have to say to my own locality, because I am familiar with the conditions that exist there. I refer to questions 9, 10, and 11. The carrier has seven in the family all dependent upon him. His salary only allows him \$122.75 per capita per year for actual living expenses.

Now, that includes the necessary food, clothes, proper recreation, State, church and patriotic obligations and educational advantages. You can clearly see from those figures the point I wish to make as to inadequate salaries. Permit me to say that at the close of the year, this carrier's salary lacked \$500 of supporting his family, hence he was forced to do other work to augment his salary. He is secretary of the Franklin County Creamery Association, a co-operative association. He is doing that work to make up his deficit in salary. There is just one point I want to make right there.

According to the rulings of the department, for a rural carrier to augment his salary, he is not permitted to engage in any competitive business.

Mr. BELL. You have to work for somebody else?

Mr. BAKER. You have to work for somebody else, yes; and it isn't an easy matter to augment your salary just for that reason. I am augmenting my salary by keeping a set of books.

Senator GAY. How many hours a day do you devote to the service—the Postal Service?

Mr. BAKER. Practically eight hours. I wouldn't undertake to give you the exact figures, because I do not have that at hand, but we give eight hours. I have two schedules—sometimes I use a Ford car. When I use the Ford I usually consume three and a half to four hours. With the horse and buggy it runs about eight hours. That includes the work in the office. Besides that, you might be an hour and a half getting ready before you get to the office in the morning, and also in getting ready before your supper when you get back to the office at night.

From the statement which I have here I find that the average time is 8 hours and 21 minutes and the average deficit in salary is \$572.04. Let me ask you to follow these figures closely. The average maintenance of equipment is \$688.56, and the average deficit is \$572.04. Now, if the Government had allowed this maintenance of equipment, these carriers would not have suffered this deficit in salary, but would have had a little saving of \$116.52. He would have been able to lay up a little over and above his expenses. Now, every working man should be allowed a salary sufficient to meet the actual necessities of life, plus a nominal saving. It is up to him whether he saves this overplus or not, but he certainly should have the necessities of life plus a nominal saving.

Out of our home office there we have seven carriers, six of these carriers are doing outside work and the seventh carrier told me just a few days ago that he had recently sold his home, and he told me he had to sell it to pay the debts he had incurred in about the last three and a half years. He has a long route. He leaves in the morning and gets back at 7 o'clock at night and doesn't have time to do any outside work, and he tells me he has gone into debt on the proposition.

I would like to call your attention to the average time. This average time is 8 hours and 21 minutes. That is 21 minutes more than the Government works its employes, and in addition to that there is the additional work, which would be about an hour and a half, considering they must get ready in the morning and also when they come back in the afternoon or evening they have to put their equipment up and so forth.

The next point I desire to call your attention to is that rural carriers are required to carry mail for loop and star routes and, in some instances, without compensation. Here is a condensed statement of Winchester No. 4 route. In the year 1919 he wrote 1,029 money orders for loop route No. 6, carried 495 sacks of mail (these were large tie sacks used by the railway mail service). This mail weighed 23,522 pounds.

Senator MOSES. Did you say how that compared with his regular mail?

Mr. BAKER. I don't understand you.

Senator MOSES. How did that compare with his regular mail?

Mr. BAKER. That was a little more than his regular mail, I guess. I don't know how much, but that is a pretty heavy route, that loop route. It is possibly one of the heaviest routes out of that office. He carries more than 5,000 pieces a month.

STATEMENT OF MR. G. H. FULGHAM, McKENZIE, TENN.

Mr. FULGHAM. Gentlemen, I shall try not to consume your valuable time by going into unnecessary details. I shall endeavor to present very briefly for your consideration an outline of what we require, together with our principal reasons for asking greater remuneration.

In the first place, we come to you asking aid because necessity and the very nature of our position demands, as has been stated, that we maintain several points of contact with the high cost of living, in the initial purchase, in the rapid depreciation in value, and the consequent upkeep expenses of all the equipment incident to our service, and when you consider, as we are forced to consider, all these different items of expense, you are at once brought to a knowledge of the fact that in order to maintain and operate this equipment in the manner prescribed by the Post Office Department costs us, and this is not theory, but fact; it is not merely approximate, but accurate information obtained from rural carriers in my immediate territory that it actually costs us, at the lowest possible estimate, all the way from a minimum of \$2.50 to a maximum of \$4 per day, leaving us, according to the length of the month—the number of working days therein—all the way from \$1 to \$2.50 per working day with which to defray all personal living and family expenses.

Our second reason for insisting upon more adequate compensation is because the very nature of our position as a civil-service employee, considering this expense we are bound to incur in the operation of the service, and considering the amount of salary we receive, is not in keeping with the salaries paid other employees of the different departments of the service, whose duties are no more essential to the public welfare, whose labors are less arduous, less exhaustive upon the physical man, and where absolutely no investment in the way of equipment is required, and our third reason for urging further relief is that we represent an arm of the service which has grown to be absolutely vital and essential, not only to the material and educational, but in a less broad way, to the moral, social, civic, and in a still more remote way, to the religious and, in some degree, to the spiritual development and welfare of the entire country, and a service which can be, with the personnel and by the morale of the men you now have engaged in it, not only maintained in its present high order of efficiency, but, if not rendered inadequate or inefficient on account of salaries which are not commensurate with the service performed, be made to promote and contribute more and more to the upbuilding and enlightenment of our great rural districts, thereby playing its part, and no small part, in laying the foundations for an even greater and higher civilization.

It may be an erroneous conception on my part, but it seems to me that practically all the reforms, or at least the majority of them, that are instituted, have their origin, or at least the inception of the

thought and the advocacy of the principles that make their existence possible, in the great cities and then filter down through the towns into the remote parts of the country, but, if the present standard of rural delivery be maintained with its educational influence upon country life and its resultant influence upon all the various activities of the Nation, it will accomplish more than anything else toward bringing about a different order of affairs, by making it possible for these great reforms which benefit city and country alike to originate in the country and permeate the great industrial centers, thus bringing city, town, and country into closer contact where they may study each other's interests more and permitting a better understanding of each other. This will have a tendency to break down the barriers and remove the petty prejudices which exist between them, uniting them in purpose, thought, and action, welding them into one homogenous whole and thereby strengthening the fabrics of our great Republic.

Senator MOSES. How long have you been in the service?

Mr. FULGHAM. Seventeen years.

Senator MOSES. What was your occupation before that?

Mr. FULGHAM. Well, sir, when I was 17 years old I commenced teaching school in the country and I had five consecutive schools and then I was deputy postmaster at McKenzie for two years; clerk in a dry-goods store for one year, and from that I went into the Rural Delivery Service at a salary of \$50 a month, and then I made more money than I do now.

Senator MOSES. Did you find at that time this same condition the other witnesses have spoken about, namely, enhanced respect for the post-office employee?

Mr. FULGHAM. Well, sir, I think I commanded more respect as deputy postmaster in McKenzie than I do as a rural carrier.

Senator MOSES. You may have looked more dignified looking out through the wicket than you do in your cart.

Mr. FULGHAM. The position he maintains, I suppose, is that the amount of respect due a letter carrier is commensurate with the salary he receives.

Senator MOSES. That was the implication.

Mr. FULGHAM. I certainly can agree with him to some extent, because it is impossible to keep our equipment up to the standard and perform the efficient service we should without engaging in some other line of occupation which does not come in conflict with the department or with the restrictions imposed by the department.

Senator MOSES. Do you know anything about the income of the patrons on your route?

Mr. FULGHAM. That varies. Some of them are croppers, but most of them are farm owners. It would be absolutely impossible for me to say. There is a great potato-raising industry there and they make a great deal of money in that, but it is not determined what their income will be yet, because it is in its incipency, but I should say that the fact that some who have been rural carriers in my immediate vicinity have resigned their position and have gone back to the farm is the most potent argument, I think, that farm life is not only to be preferred to that of a rural carrier, but that it pays better.

Senator GAY. You have one minute left, Mr. Fulgham.

Mr. STEENERSON. When you speak about the cost of maintenance, what do you say the cost of corn is?

Mr. FULGHAM. Corn sells for \$2 per bushel.

Mr. STEENERSON. And oats?

Mr. FULGHAM. I haven't bought any oats. I can't answer that question.

Mr. STEENERSON. Do you buy those from the farmers?

Mr. FULGHAM. The way I am doing right now, I am hiring my team.

Mr. STEENERSON. But is there any reason why a carrier could not buy corn and oats along his route where they are raised?

Mr. FULGHAM. No, sir; there isn't any reason, but it wouldn't cost him less than anywhere else.

Mr. STEENERSON. The farmer will charge him up to the top price?

Mr. FULGHAM. They will charge him as much as anyone else.

Mr. STEENERSON. He could very well haul a bag of corn or oats on his way home, couldn't he?

Mr. FULGHAM. On his mail wagon?

Mr. STEENERSON. Yes.

Mr. FULGHAM. He would hardly have room with the congested condition of the parcel post.

Mr. STEENERSON. The parcel post goes out and the corn comes in?

Mr. FULGHAM. He wouldn't have room for that in his mail wagon.

Mr. STEENERSON. Do you mean to say he couldn't carry feed for his horse in his mail wagon?

Mr. FULGHAM. Not more than a feed for dinner, perhaps.

Mr. STEENERSON. I have just been looking at the market reports and I see that you are figuring that it costs you more than you can buy it for right here in Memphis. He said \$40 a ton for hay, and the highest price quoted here is \$39. Corn is only a dollar eighty-four, I think.

Mr. FULGHAM. Well, Judge Moon—I think you are Judge Moon.

Senator GAY. No; that is Mr. Steenerson.

Mr. STEENERSON. He is a friend of mine.

Mr. FULGHAM. Owing to the fact that I hire a team, I can not state to you what it costs. The livery men won't furnish me at all. A man who lives about a mile from town has been furnishing me a team simply because he would have to feed them anyhow. I am paying him \$60 for the team alone and furnishing the wagon.

Mr. STEENERSON. I think it was the other carrier who mentioned that he paid \$2 a bushel for corn, and here it is a dollar eighty-four. Isn't it true you said \$2 a bushel?

Mr. RANDEL. It is true.

Mr. STEENERSON. Then the farmers charge you more than the market price?

Mr. RANDEL. Yes, sir.

Mr. STEENERSON. Then, what is going to become of this farm-to-the table movement that was intended to remove the middleman?

Mr. RANDEL. That is quoted in carload lots, wholesale. Corn has been selling in our town for \$2 a bushel.

Mr. STEENERSON. It is important for us to know if there is anything in this theory that the parcel post will reduce the cost of living. I understand that the department claims that the rural free delivery

was inaugurated to reduce the cost of living by bringing the farmer close to the consumer. Here we have the very men that are there to perform that duty paying more than the market price.

BRIEF SUBMITTED BY J. C. WOOTEN AND THE OTHER RURAL CARRIERS OF CLEVELAND, TENN.

The rural carriers of Cleveland, Bradley County, Tenn., beg permission to submit to your honorable body the following brief in behalf of ourselves and other rural letter carriers in general:

There are a number of matters of such common notoriety that it is useless to call your attention to them, the principal one being the present high cost of living as compared with the present pay of rural carriers and the present cost of material and equipment necessary to the performance of our duties, namely, horse feed, buggies, harness, live stock, and upkeep of equipment.

Rural carriers are of necessity mounted and are the only employees in the classified civil service whose mounts are not taken into consideration. There is no fund to defray the expense of maintenance of horses in our service. The pay of the rural carrier has not been increased proportionately with the constantly increasing cost of living and maintaining his equipment. No complaint was registered during the stress of war, but the carriers loyally stood with their duties and patriotically did all within their means and power to do their full share. Now it is a case of self-preservation on the theory that the laborer is worthy of his hire, and we do not believe that the commission is willing to see faithful public servants grind out their lives for a mere pittance. We believe it the inherent right of every American citizen to rear a family and his duty to educate his children for useful lives. This he is unable to do at the present time. His standard as a citizen is lowered because he is financially unable to keep pace with the times and to give his family the necessities of life on his present pay.

In order to more clearly show what is required, a rural carrier must provide two horses and a heavy buggy or mail wagon before he can enter upon his duties, which means an expense of at least \$600. Two horses are absolutely necessary. It requires \$2 a day to feed two horses. The following table is prepared to show just what expense the average carrier is put to to maintain his equipment:

Maintenance 2 horses one year.....	\$730
Depreciation of buggy.....	80
Harness and repairs for same.....	40
Horseshoeing and buggy repairs.....	40
Total.....	890

Buggies which formerly cost \$80 are now \$160. The average life of a buggy on a rural route is two years. All other items have increased in like proportion.

There has been a marked increase in the volume of mail handled by rural carriers at this office, and we believe conditions are similar everywhere, due to the popularity of parcel post. The country people have shown an increased interest in current affairs and subscribe liberally to daily newspapers and other publications.

It is shown that the average rural carrier has an expense for equipment and maintenance in excess of 60 per cent of his salary, leaving the remaining 40 per cent to feed and clothe his family and support his home. The duties of a carrier on a standard route require his entire time, and if they did not there is a prejudice against his entering business, which he is unable to do if he were so inclined and there were no restrictions against. Many carriers have grown old in the service. The retirement of those superannuated on a liberal pension is not only a move toward efficiency but is economy, and the passage of such a measure is indorsed by the carriers of this office. We also believe that there should be an established court of appeals for employees in the classified civil service for the settlement of questions arising for adjustment. We indorse the establishment of such a body. In conclusion, we earnestly ask that your honorable body give serious consideration to the matter of salary, that we may be permitted to live in keeping with the average laborer. We believe that carriers of standard rural routes should be granted a salary of \$2,000 a year and routes of less length be increased proportionately.

SUPERVISORY EMPLOYEES, INCLUDING SPECIAL CLERKS, AT FIRST AND SECOND CLASS POST OFFICES.

**STATEMENT OF MR. E. H. KLINE, SUPERINTENDENT OF
MAILS, MEMPHIS, TENN.**

Mr. KLINE. Gentlemen of the commission, I represent the supervisors and special clerks of Tennessee and Arkansas particularly, but we also have representatives here from Alabama and from the adjoining States.

I am submitting a brief in the interests of the supervisors and special clerks. The statements contained herein are based principally upon information from the Memphis office and also that supplied by Nashville, Tenn., Little Rock, Ark., and Birmingham, Ala. In conducting your investigations in other cities you have no doubt amassed a great deal of facts and information applicable to first and second class post offices. It is therefore not our purpose to reiterate these things which you have heard elsewhere, but to inform you as to local conditions.

I want to call your attention to the fact that Memphis is not only the largest inland cotton market in the world but also the largest hardwood lumber market, and therefore the employees of the post office come in contact, in living conditions, with the employees of these large concerns, with millions of dollars invested in them.

The salaries paid to employees of these industries, as shown in my brief, are set at a very high aggregate.

Senator MOSES. How long has that prevailed?

Mr. KLINE. That has prevailed for a period of two or three years, in this section particularly. Take the cotton firms: The secretary and treasurer receives \$5,000; bookkeeper, \$2,700; cotton bookkeeper, \$2,100. The wholesale hardwood lumber companies: Salesmen receive \$6,000 per annum; bookkeeper, \$2,100; lumber inspector, \$2,100; yard foreman, \$2,400; while common labor gets \$4 per day.

In the wholesale grocery concerns in Memphis—Memphis is the third largest wholesale grocery jobbing market in the United States—bookkeepers get \$2,400, city salesmen, \$2,400; and shipping clerks \$2,400. In the woodworking plants the mill superintendent gets an average of \$2,700; the assistant superintendent, \$2,400; the inspectors, \$2,100; and the machinists get \$6 per day.

We have a great many industries in the automobile line, and auto mechanics get \$60 per week; carpenters, 80 cents per hour; and bricklayers, \$1 per hour. In the department stores the heads of departments are paid \$2,400 to \$2,600 per annum and bookkeepers \$1,800 to \$2,400.

In addition to this, most of the employees of these concerns receive substantial bonuses, sick-leave privileges, vacations, etc.

We want to call your attention to some figures covering the actual expenses of post-office clerks in Memphis during the year 1919. We are not dealing with a theory; we are not telling you what might be; what we are telling you now is what actually happened during 1919, and I want you to accept it as a fact, because we can substantiate everything I say.

One clerk with three in his family made up his deficit by working overtime, as well as using the earnings of his wife as a seamstress, and this clerk's wife at present is assisting in taking the census.

Another clerk with three in the family. This clerk worked as a janitor, sublet part of his house, and also drew all of a small income his wife had.

Another clerk with three in the family. This special clerk repaired shoes on the outside to make up his deficit.

These are all special clerks to which I am referring.

There is another clerk with four in the family. He rented a portion of his house and worked overtime in order to be able to live. Another clerk worked overtime in the office and held a clerical job on the outside with a restaurant, and also borrowed money from his father-in-law in order to get by.

I would like to call attention to two or three cases among the supervisors in the Memphis post office.

One supervisor with four in the family. He had no opportunity for outside work because of his particular employment, and he is therefore in debt.

Another supervisor—salary, \$2,025; expenses, \$2,460. His wife kept boarders to make up the deficit.

Another, with four in the family, with a similar salary, \$2,025, had expenses of \$2,520, had to fall back on a small outside income from another source.

Here is an example of a supervisor with six in the family: His salary was \$1,863 last year and his expenses \$2,630. This supervisor had to take two of his boys out of school and put them to work, and that has robbed them of their education. This supervisor further states he has been in the Postal Service for 16 years. His present rate of pay is \$1,925, and he has a married son who has been employed by a local bank less than two years, and this married son draws \$2,300.

These supervisors and special clerks have no opportunity for recreation, for amusement, or for outside education or personal advancement, and we hold that these things are legitimate; that they are natural and necessary to the well-being and healthful mental activity of the individual. Luxuries we can not have. Ordinary comforts have been denied us, and many of us have been forced into debt. No man can give the best that is in him when he is worried over the question of where and how he is going to get the money to satisfy his creditors.

These cases that I have stated are not extreme; they are simply the average cases. Many of the men in the Memphis office have held on, waiting and hoping that some action would be taken to relieve them of this financial strain, whereas if they had sought employment in the outside world no doubt they would have done better. I base that statement on these facts. Of those employees who left the Memphis office last year—

Senator MOSES (interposing). How large is the regular force?

Mr. KLINE. The regular force is 156 clerks. We have 350 employees, and the roster of our regular clerks is 156, and 43 left during the last year. One left a position in the post office that paid eighteen hundred, and during the portion of the year that he was out made over \$10,000 in contracting and building. An assistant superintendent of mails who resigned a position paying \$2,025 is now drawing between four and five thousand dollars, while a former special distributor who went to the farm, raised his income 80 per cent

by so doing. One clerk, who received \$1,600 and was removed from the service because of irregularities, is now being paid \$2,400 with a bonus. Gentlemen, it is a sad commentary when a man not considered fit to be in the service can go out and immediately raise his earnings 50 per cent.

We are not going into a repetition of what you must have heard elsewhere—the operation of the post offices and the value of the special clerks and supervisors in connection therewith.

Senator MOSES. We would be glad to have you give us something on that.

Mr. KLINE. I want to say that the receipts of the Memphis post office for the calendar year were one million and a half; the amount of money orders issued was about a million and a half; money orders paid, about three million; while we received in deposits from other postmasters \$9,000,000, but I want to call attention to the fact that in addition to the ordinary business done by post offices of this class we have what is known as a terminal, where we work from three to seven thousand sacks of parcel post and more than a quarter million letters and circulars daily, which shows you that we are handling an amount of business which requires careful supervision.

Senator MOSES. Daily, did you say?

Mr. KLINE. Yes. We receive circulars from New York; we receive seeds sent out by Congressmen from Washington.

Mr. STEENERSON. Can you state how many ordinary letters?

Mr. KLINE. The first-class letters run in excess of a hundred thousand.

Mr. STEENERSON. And the circulars, how many?

Mr. KLINE. The circulars and the matter we get from Washington, in the way of seeds, pension checks, etc., will run something over two hundred thousand.

Mr. STEENERSON. There are more of these circulars and official mail than first-class mail?

Mr. KLINE. Yes, sir; for this reason: We operate what is known as a terminal. We took it over from the Railway Mail Service four or five years ago, and this is advertising matter that comes from the large offices—Chicago, St. Louis, etc.—for redistribution to the cities in Arkansas, Mississippi, Tennessee, and so forth. That is why the circulars in this office are in excess of the first-class mail. The parcels post here runs from three to seven thousand sacks a day.

Mr. STEENERSON. How does that number of sacks compare with the number of sacks of third class and first class mail?

Mr. KLINE. Our sacks of third class will run between a hundred and a hundred and fifty sacks a day, but, you see, each one of these sacks contains an unusually large number of pieces.

Mr. STEENERSON. And how many pouches of first-class mail?

Mr. KLINE. We make about a hundred and fifty-five pouches a day out of this office.

Mr. STEENERSON. They are smaller than the sacks?

Mr. KLINE. Yes, sir. They contain a smaller amount of mail. Some of them are entirely full, but we make a lot of what are known as "express pouches," which contain a small quantity of mail.

You asked a while ago how many employees we have. We have on our roster 156 regular clerks, 110 regular carriers, and we use an average of 40 to 50 substitute clerks in this office and 15 to 20 substitute carriers.

I would like to call attention, while we are on that point, to the difficulty in obtaining help at this office, and this, in turn, bears on the work of the supervisor, because in handling men you will understand it requires twice as much supervision to manage the inexperienced kind of employee as it does ordinary help.

In 1918 we had more than 80 resignations in this office, in 1919 we had more than 40, and during the last six months alone we appointed more than 140 temporary substitutes in this office with a view to obtaining enough men to handle the work. Some of these will come and work a day; some, a week and then they will leave. The service isn't attractive to them at all. We have not been able to maintain an eligible list in this office for the last two or three years. In December, the month just passed, we had more applicants for this civil-service examination than we ever had before, and then we had less than 40 for the position of clerk, even considering the 60 cent rate now in existence for substitute clerk. That shows you clearly, gentlemen, that the post office is not attracting either competent or incompetent men. They do not want the job even at 60 cents an hour, because they can make more money on the outside in this particular section.

I want to say to you gentlemen, under the present conditions especially, when we have so much green help in the post office, that there isn't a supervisor in the Memphis post office or in any of the other large post offices in this section that couldn't save to the department annually his entire salary by careful and conscientious supervision. The amount of work done, the class of men used, and so on, is such that if the department will recognize this fact and make the salaries such as will retain the efficient men they have, they will save the salaries of these men very readily, because of their ability to produce the maximum output, and that without any difficulty. That will be established if you will consult our records for overtime and for auxiliary work, and the heavy expenditure for the latter especially.

Senator MOSES. You think, then, that the grade of special clerk is a useful one in the service?

Mr. KLINE. I do. I think it is a useful grade, because it offers the ordinary clerk in the post office who wants to make a special effort to fit himself and make himself efficient a stepping stone to a supervisory position. In a great many offices supervisory appointments do not come very often; there are not many vacancies, but the grade of special clerk allows the clerk who wants to make himself efficient to get into a grade where the pay is better and where he can, in the meantime, be fitting himself for a supervisory position when a vacancy does occur.

Senator MOSES. You think, then, that its special importance is that of a reward for faithful service and as an intermediary between a clerkship and a supervisory position?

Mr. KLINE. I do.

Senator MOSES. You wouldn't regard them as parasites?

Mr. KLINE. I would not.

Senator MOSES. They have been so characterized in some of the hearings before the commission.

Mr. KLINE. I know a great many special clerks all over the country who have been promoted for meritorious service. They are not

parasites, but one of the biggest factors we have in the post office which makes for efficient service.

Senator MOSES. Would you place any limitation on a post office as to the number to be appointed?

Mr. KLINE. I think so. I think there should be a comparatively small percentage of the force included in the special grade. I should say, just as a general proposition, that the number of special clerks should just about equal the number of supervisors in an office, which is about 1 to 10 of the force—about 10 per cent of the force.

Senator MOSES. How long have you been in the service?

Mr. KLINE. Twenty-two years.

Senator MOSES. How did you begin?

Mr. KLINE. First as a substitute railway postal clerk. Then I was taken into the office of the chief clerk of the Railway Mail Service at Indianapolis and subsequently made assistant chief clerk. I went from there to the position of post-office inspector, and I held that for eight years, and was then made superintendent of mails in the Memphis post office.

Senator MOSES. What is your salary?

Mr. KLINE. \$2,600 plus 5 per cent. I want to say in my case that you may ask me why, if I am not satisfied with that salary, I don't get out. I want to say that when I started in 22 years ago it looked attractive, and I went into it to make a life work of it. I have been in various branches of the service and I like it, and I have gotten to the point where I think I could be of some benefit to the department. I have been offered more on the outside, but I have declined, and am hanging on, hoping you gentlemen and the department are going to give us what is due us.

(Mr. Kline's brief follows:)

BRIEF SUBMITTED BY MR. E. H. KLINE.

This brief is filed in the interest of the supervisors and special clerks of the States of Tennessee and Arkansas. The statements herein contained are based directly upon facts obtained from the employees of the Memphis post office, but which are likewise true in other offices of any size in these States. Your honorable body in conducting these investigations in numerous other cities has, without doubt, accumulated a great mass of information and figures which are applicable to practically all cities having first and second-class post offices. It will therefore not be our purpose to attempt to reiterate what you have heard elsewhere regarding the character and qualifications of the men who are included in the classifications of supervisors and special clerks, nor will we attempt to repeat the ever-present arguments regarding the high cost of living and the inadequately of our salaries to cover the same. Rather will we attempt to inform you regarding the conditions which obtain in this section.

You are probably familiar with the fact that Memphis is not only the largest inland cotton market in the world but also the largest hardwood lumber market, therefore the post-office employees come in direct living competition with the employees of these two big commercial industries, in which millions upon millions of dollars are invested. Following the unprecedented prosperity of concerns in business in these lines, which predominate in this section, they have set the salary standard for employees at a high figure. Competition for labor of the better sort has consequently grown keener and salaries have advanced accordingly. Increases in rents and living costs have naturally followed. Post-office employees earning smaller salaries are required to pay similar prices in order to live. Even the common laborers employed by these industries receive such a high scale of wages that the post-office employees in this section are outclassed at every turn, whether it be in the renting of a house, the purchase of a suit of clothes, or the buying of foodstuffs.

As an example of the salaries paid in commercial lines, your attention is invited to the following figures secured from firms in the several lines of business indicated, from

which it is readily apparent that employees in various commercial lines having less responsibility, less technical knowledge, and in most cases fewer years of experience, receive much higher salaries than postal employees of comparative rank:

Cotton commission houses:

Secretary and treasurer.....	per annum..	\$5,000. (M)
Bookkeeper.....	do....	2,700. (M)
Cotton bookkeeper.....	do....	2,100. (M)

Wholesale hardwood lumber companies:

Salesman.....	do....	6,000. (M)
Bookkeeper.....	do....	2,100. (M)
Lumber inspector.....	do....	2,100. (M)
Yard foreman.....	do....	2,400. (M)
Common laborer.....	per day..	4. (M)

Wholesale grocery concerns:

Bookkeeper.....	per annum..	2,400. (M)
City salesman.....	do....	2,400. (M)
Shipping clerk.....	do....	2,400. (M)

Wood-working plants:

Mill superintendent.....	do....	2,700. (M)
Assistant superintendent.....	do....	2,400. (M)
Inspector.....	do....	2,100. (M)
Machinist.....	per day..	6. (M)

Auto mechanic..... per week.. 60. (M)

Carpenter..... per hour.. 1. (M)

Bricklayer..... do.... 1 (M)

Department stores:

Head of department.....	per annum..	\$2,400.00—\$2,600. (M)
Bookkeeper.....	do....	1,800.00— 2,400. (M)

In addition to the payment of these salaries, these employees receive substantial bonuses, vacation privileges, etc. As against the above figures, we desire to set out a few statements of the expenditures of post-office special clerks and supervisors taken at random from statements submitted by these employees covering the calendar year 1919.

Clerk A, three in family, salary \$1,675, expenses \$1,843. Deficit made up by working overtime, by the earnings of his wife as seamstress, and that she is now assisting in taking the census to earn more money.

Clerk B, three in family, salary \$1,675, expenses \$2,305. Acted as janitor, sublet a portion of his home, and drew on a small income of his wife.

Clerk C, three in family, salary \$1,675, expenses \$2,363. Repaired shoes to earn additional money.

Clerk D, four in family, salary \$1,675, expenses \$2,280. Rented portion of his home and worked overtime.

Clerk E, five in family, salary \$1,675, expenses \$2,477. Owes \$350; worked overtime and had no opportunity for recreation or amusement, as well as no money for the same.

Clerk F, five in family, salary \$1,675, expenses \$2,481. Worked overtime in office, held clerical job on outside, and secured assistance from father-in-law.

Clerk G, six in family, salary \$1,675, expenses \$2,160. Earned \$339 working overtime and owes \$600 besides.

Supervisor A, four in family, salary \$1,812, expenses \$2,274. No opportunity for overtime or outside employment; is in debt.

Supervisor B, four in family, salary \$2,025, expenses \$2,460. Wife kept boarders to make up deficit.

Supervisor C, four in family, salary \$2,025, expenses \$2,520. Had small outside income.

Supervisor D, four in family, salary \$2,025, expenses \$2,668. Had rental from small house and life insurance from death of son.

Supervisor E, six in family, salary \$1,863, expenses \$2,630. Kept his two boys out of school and put them to work, thus robbing them of their education. This supervisor further states that he has been in the Postal Service 16 years, and his present rate of pay is \$1,925, while he has a married son who has been employed by a local bank for less than two years and draws \$2,300 per year.

In this connection we respectfully urge that education, recreation, and amusements are regarded not only as legitimate, but as actually necessary to the well-being and healthful mental activity of the individual. Post-office employees must forego these, nearly all of them, for lack of money and many for lack of time, because of the necessity

for making overtime in the office or finding outside employment in order to add enough to their salaries to live.

Luxuries we can not have; ordinary comforts should not be denied us; necessities we must have. Many of our number have been forced into debt in order to provide ordinary family requirements; and this constant worry over financial matters keeps them from giving their best to the service. For no man can give cheerful and enthusiastic service or make such service 100 per cent efficient when his very soul is being eaten out by this ever-present anxiety. No man can give the best that is in him when his mind is distressed with the question as to where and how he will obtain the money to satisfy his creditors.

The foregoing instances of financial difficulties of underpaid employees are not cited as extreme cases, but are generally indicative of the condition in which most of the special clerks and supervisors find themselves. Many of them have held on, waiting and hoping that some action would be taken to relieve them of this financial strain, while, had they sought employment in the commercial world, they would, in most cases, have bettered their condition to a great degree. As examples of this, your attention is invited to a few of the cases of employees who have left the Memphis office during the past year. One such employee left a salary of \$1,800 in the post office and has already made more than \$10,000 in contracting and building. An assistant superintendent of mails, who resigned during the latter part of 1919 on a salary of \$2,025, is now earning more than double that rate. A former special clerk is now being paid \$2,400. A former distributor increased his earnings by 80 per cent by returning to the farm. And even one clerk who was drawing a salary of \$1,600 and was removed from service because of irregularities is now drawing a salary of \$2,400 plus a substantial bonus. It is a sad commentary on the Postal Service when an employee who is deemed unfit to be retained can enter a commercial pursuit and immediately increase his earnings 50 per cent.

We assume that you do not care for a repetition of what you have learned elsewhere regarding the plan of post-office organization, the duties of the various supervisory officers, nor their relative rank and value to the service. Briefly, however, we may say for your information that the receipts of the Memphis office for the past calendar year were nearly one and one-half millions dollars. There are more than 350 employees on its roster, and, aside from the regular postal business transacted in an office of this size, we perform terminal distribution, aggregating 3,000 to 7,000 sacks of parcel post and more than a quarter of a million letters and circulars daily. Because of the responsibility and the financial transactions and the large quantity of mail handled, the special clerks in this office, holding the more responsible positions, must be men of high grade and long experience; for similar reasons, the supervisors are men who must be thoroughly familiar with every phase and detail of the service, and must in addition be able to direct and supervise the various operations in connection therewith.

You have no doubt heard of the difficulty of obtaining adequate help at some of the larger offices, but we desire to call your attention to the fact that it has been impossible for the past two years to either obtain or hold competent men in this office. In 1918 we had more than 80 resignations from the regular force and in 1919 we had 43 such resignations. This does not tell the tale, however, for during the past six months alone we have made more than 140 substitute appointments in an endeavor to secure a sufficient force to handle the mails. At no time during the last two or three years have we had an eligible list sufficient to meet our needs. Only in the last examination, which was held in December, could we secure any number of applicants at all, and even then, with the attraction of a 60-cent rate of pay for substitutes, we had less than 40 applicants for the position of clerk. This shows conclusively that the Postal Service with its present rate of pay is not drawing either competent or incompetent men.

In the management of any business, if it is to be operated upon a proper economic basis, the responsibility for such operation must, as an eventuality, rest upon the shoulders of the men who direct the efforts of the workers. Therefore, if an economical administration is to be had in the post office it must come from the efforts of the supervisors themselves. Hence, as a business proposition alone, the department should pay such salaries as will not only secure men of proper fitness and equipment to administer its affairs but also offer them sufficient inducement to remain and be ever alert to render still better service. The department must recognize the fact that it is in competition with commercial industries in securing and holding its supervisory employees and be governed accordingly in the matter of fixing the compensation therefor on a basis of comparative worth. A satisfactory scale or classification is that recommended by the National Association of Supervisory Post Office Employees, at Atlantic City, in August, 1919, which we herewith approve.

which it is readily apparent that employees in various commercial lines having less responsibility, less technical knowledge, and in most cases fewer years of experience, receive much higher salaries than postal employees of comparative rank:

Cotton commission houses:		
Secretary and treasurer.....	per annum..	\$5, 000. 00
Bookkeeper.....	do....	2, 700. 00
Cotton bookkeeper.....	do....	2, 100. 00
Wholesale hardwood lumber companies:		
Salesman.....	do....	6, 000. 00
Bookkeeper.....	do....	2, 100. 00
Lumber inspector.....	do....	2, 100. 00
Yard foreman.....	do....	2, 400. 00
Common laborer.....	per day..	4. 00
Wholesale grocery concerns:		
Bookkeeper.....	per annum..	2, 400. 00
City salesman.....	do....	2, 400. 00
Shipping clerk.....	do....	2, 400. 00
Wood-working plants:		
Mill superintendent.....	do....	2, 700. 00
Assistant superintendent.....	do....	2, 400. 00
Inspector.....	do....	2, 100. 00
Machinist.....	per day..	6. 00
Auto mechanic.....	per week..	60. 00
Carpenter.....	per hour..	. 50
Bricklayer.....	do....	1. 00
Department stores:		
Head of department.....	per annum..	\$2, 400. 00—\$2, 600. 00
Bookkeeper.....	do....	1, 800. 00— 2, 400. 00

In addition to the payment of these salaries, these employees receive substantial bonuses, vacation privileges, etc. As against the above figures, we desire to set out a few statements of the expenditures of post-office special clerks and supervisors taken at random from statements submitted by these employees covering the calendar year 1919.

Clerk A, three in family, salary \$1,675, expenses \$1,843. Deficit made up by working overtime, by the earnings of his wife as seamstress, and that she is now assisting in taking the census to earn more money.

Clerk B, three in family, salary \$1,675, expenses \$2,305. Acted as janitor, sublet a portion of his home, and drew on a small income of his wife.

Clerk C, three in family, salary \$1,675, expenses \$2,363. Repaired shoes to earn additional money.

Clerk D, four in family, salary \$1,675, expenses \$2,280. Rented portion of his home and worked overtime.

Clerk E, five in family, salary \$1,675, expenses \$2,477. Owes \$350; worked overtime and had no opportunity for recreation or amusement, as well as no money for the same.

Clerk F, five in family, salary \$1,675, expenses \$2,481. Worked overtime in office, held clerical job on outside, and secured assistance from father-in-law.

Clerk G, six in family, salary \$1,675, expenses \$2,160. Earned \$339 working overtime and owes \$600 besides.

Supervisor A, four in family, salary \$1,812, expenses \$2,274. No opportunity for overtime or outside employment; is in debt.

Supervisor B, four in family, salary \$2,025, expenses \$2,460. Wife kept boarders to make up deficit.

Supervisor C, four in family, salary \$2,025, expenses \$2,520. Had small outside income.

Supervisor D, four in family, salary \$2,025, expenses \$2,668. Had rental from small house and life insurance from death of son.

Supervisor E, six in family, salary \$1,863, expenses \$2,630. Kept his two boys out of school and put them to work, thus robbing them of their education. This supervisor further states that he has been in the Postal Service 16 years, and his present rate of pay is \$1,925, while he has a married son who has been employed by a local bank for less than two years and draws \$2,300 per year.

In this connection we respectfully urge that education, recreation, and amusements are regarded not only as legitimate, but as actually necessary to the well-being and healthful mental activity of the individual. Post-office employees must forego these, nearly all of them, for lack of money and many for lack of time, because of the necessity

for making overtime in the office or finding outside employment in order to add enough to their salaries to live.

Luxuries we can not have; ordinary comforts should not be denied us; necessities we must have. Many of our number have been forced into debt in order to provide ordinary family requirements; and this constant worry over financial matters keeps them from giving their best to the service. For no man can give cheerful and enthusiastic service or make such service 100 per cent efficient when his very soul is being eaten out by this ever-present anxiety. No man can give the best that is in him when his mind is distressed with the question as to where and how he will obtain the money to satisfy his creditors.

The foregoing instances of financial difficulties of underpaid employees are not cited as extreme cases, but are generally indicative of the condition in which most of the special clerks and supervisors find themselves. Many of them have held on, waiting and hoping that some action would be taken to relieve them of this financial strain, while, had they sought employment in the commercial world, they would, in most cases, have bettered their condition to a great degree. As examples of this, your attention is invited to a few of the cases of employees who have left the Memphis office during the past year. One such employee left a salary of \$1,800 in the post office and has already made more than \$10,000 in contracting and building. An assistant superintendent of mails, who resigned during the latter part of 1919 on a salary of \$2,025, is now earning more than double that rate. A former special clerk is now being paid \$2,400. A former distributor increased his earnings by 80 per cent by returning to the farm. And even one clerk who was drawing a salary of \$1,600 and was removed from service because of irregularities is now drawing a salary of \$2,400 plus a substantial bonus. It is a sad commentary on the Postal Service when an employee who is deemed unfit to be retained can enter a commercial pursuit and immediately increase his earnings 50 per cent.

We assume that you do not care for a repetition of what you have learned elsewhere regarding the plan of post-office organization, the duties of the various supervisory officers, nor their relative rank and value to the service. Briefly, however, we may say for your information that the receipts of the Memphis office for the past calendar year were nearly one and one-half millions dollars. There are more than 350 employees on its roster, and, aside from the regular postal business transacted in an office of this size, we perform terminal distribution, aggregating 3,000 to 7,000 sacks of parcel post and more than a quarter of a million letters and circulars daily. Because of the responsibility and the financial transactions and the large quantity of mail handled, the special clerks in this office, holding the more responsible positions, must be men of high grade and long experience; for similar reasons, the supervisors are men who must be thoroughly familiar with every phase and detail of the service, and must in addition be able to direct and supervise the various operations in connection therewith.

You have no doubt heard of the difficulty of obtaining adequate help at some of the larger offices, but we desire to call your attention to the fact that it has been impossible for the past two years to either obtain or hold competent men in this office. In 1918 we had more than 80 resignations from the regular force and in 1919 we had 43 such resignations. This does not tell the tale, however, for during the past six months alone we have made more than 140 substitute appointments in an endeavor to secure a sufficient force to handle the mails. At no time during the last two or three years have we had an eligible list sufficient to meet our needs. Only in the last examination, which was held in December, could we secure any number of applicants at all, and even then, with the attraction of a 60-cent rate of pay for substitutes, we had less than 40 applicants for the position of clerk. This shows conclusively that the Postal Service with its present rate of pay is not drawing either competent or incompetent men.

In the management of any business, if it is to be operated upon a proper economic basis, the responsibility for such operation must, as an eventuality, rest upon the shoulders of the men who direct the efforts of the workers. Therefore, if an economical administration is to be had in the post office it must come from the efforts of the supervisors themselves. Hence, as a business proposition alone, the department should pay such salaries as will not only secure men of proper fitness and equipment to administer its affairs but also offer them sufficient inducement to remain and be ever alert to render still better service. The department must recognize the fact that it is in competition with commercial industries in securing and holding its supervisory employees and be governed accordingly in the matter of fixing the compensation therefor on a basis of comparative worth. A satisfactory scale or classification is that recommended by the National Association of Supervisory Post Office Employees, at Atlantic City, in August, 1919, which we herewith approve.

It is deemed unnecessary to generalize further upon this subject. It is very evident that the department and Congress must recognize the fact that the knowledge, skill, and service of post-office employees constitute a profession just as much as do a knowledge of law and medicine constitute the legal and medical professions, and that if expert service is to be obtained it must command a rate of pay commensurate with the class of service rendered. The special clerks are the experts in the various lines of post-office work and are promoted to this grade because of meritorious service. The supervisors are selected from the roster of special clerks because of their qualifications as such and the additional ability to supervise and direct. In their hands not only rests the excellence of the service to the public and the department but likewise the expenditure of millions of dollars which may be decreased or increased according to its expenditure wisely or unwisely. And we may add that there is hardly a supervisor in an office of this size who can not easily save the department practically his entire salary each year by careful supervision; and even if it were not the desire of the department to retain and encourage these postal experts by the payment of attractive salaries, it would at least be a sound business proposition to pay them sufficient to assure their cooperation in the matter of economical expenditures alone.

Recognizing these facts, we have no doubt that your honorable body will consider not only our claims for increased compensation but also the dire necessity which exists for the same under present conditions.

STATEMENT OF MR. W. J. O'CALLAGHAN, NASHVILLE, TENN.

Mr. O'CALLAGHAN. Gentlemen of the commission, I am superintendent of the Stahlman Station at Nashville. I have been in the service 30 years last October, beginning at the bottom and occupying every position in the service up to that of superintendent of mails which I had up to 5 years ago when I was reduced to superintendent of station. When I was reduced the postmaster did me the kindness to state that no one had said anything about my work. It was politics pure and simple and he was forced to make the change.

The paramount issue with us, of course, is that of compensation. I have studied this question from every angle, ever since the Nashville post office grew from a small place to what it is now. I have studied men and human nature. I am a physician as well as a clerk, and I obtained that education while working as a clerk. I have noticed this: That the cost of living has increased so that the post office man can not meet his expenses and maintain his dignity, if you choose to call it that, and I will illustrate that—I pattern after one of the men who spoke here this evening, in that there were eight children come to us, and there was always great expense in that family by way of doctor's bills. That was one of the things which induced me to become a doctor myself and save that expense. Of course, if I can't do that work myself, the ethics of my profession enable me to call in the other fellow and make him do it for nothing.

I will illustrate a predicament we got in. Owing to an increase in the family we found another room was absolutely necessary in our house. We had to borrow \$1,200 to put that room up and provide the necessary bath equipment and I am still paying interest on that. The debt is there and I am still paying interest on it. It takes \$216 a year of my salary to pay a \$5,000 life insurance policy, and I feel that I would be a criminal to carry less than that with the family I have. Three of my children are married. The oldest boy, 27 years old, went into business last summer in Atlanta. He gets \$250 a month after two years' service. I, after 30 years' service, get a basic salary of \$1,800 a year, or \$150 a month.

I would like to make this suggestion, not only for the present, but for the future needs of the service. If the service isn't made attractive to the younger men, so that they can come in and make it their life work, we can not promise it much. The young man of to-day sees nothing to induce him to come in to it with the intention of staying there. He also feels, that as he grows older, there should be some provision made for him in his old age. We find this in every profession—that some are getting up in age, and those that get up in age have to step down to make room for those who are coming in.

In the Nashville office we have a man 70 years old who does a good day's work every day, with a wife to support, and he has a hard time to meet expenses, but if he were retired on a salary of \$50 a month he would starve to death. He can't afford to quit.

The question of night work is one of great importance to the service, it should be reduced to a minimum and the clerks who must do the night work should be entitled to some special consideration. I have worked more than 15 of my 30 years on night work, that is between 2 and 10.30 p. m., or between 3 and 11.30 p. m., and a man on such a tour is a slave to his job and his family a slave to him, as they are unable to go out together any evenings. We feel that a time differential of 15 minutes should be given night clerks, that is, between 6 p. m., and 6 a. m., 45 minutes should count as an hour, we also feel that some allowance should be made the clerk who must spend considerable of his time studying schemes of distribution.

As supervisors we feel that in your classification of the service, every place should be given its proper designation, a man doing an auditor's work and having his responsibility, should not be called a bookkeeper to keep the salary down, and every position should carry the salary with it. We indorse the classification bill as adopted at the last convention of supervisors, of which you have a copy.

My observation of the thing is this, gentlemen: That the morale of the service is at a very low ebb, and as the Government spent millions of dollars, either through its own agencies, or the agencies of the Y. M. C. A. to promote and maintain the morale which they thought absolutely necessary to their success on the other side of the sea, that same thing holds good in the post office service. If I can not feel that I have got a living to begin with—if after doing hard work and conscientious work, if I can not earn a promotion and be assured I can keep it, there is no inducement for me to strive to improve the condition of myself or the service.

Senator MOSES. What do you think the general effect of a retirement bill would be on the service?

Mr. O'CALLAGHAN. If the salary was anything like enough to live on, it would improve the service. There is no question but that a young man between the ages of 21 and 35 can do at least 25 or 30 per cent more work than men past 60 years of age.

Senator GAY. I want to say in connection with that, that the Senator from Tennessee, who resides in Memphis, Senator McKellar, has been one of the most active workers to get a retirement bill through. (Applause.)

Mr. O'CALLAGHAN. We feel that in the hands of you gentlemen; that the laws that will result from your investigation and your recommendations, will depend whether the post-office employees of

the future are going to be a happy, contented lot of high morale and fine efficiency; or discontented, of poor morale and indifferent efficiency and easy prey to Bolshevism and I. W. Wism such as is going up and down the land to-day. We ask only for a square deal: that we may live happy, raise our children, contribute our prorate to the support of our churches and such institutions and feel that, after we have given our country the best service we are capable of, that she will take care of us.

(Mr O'Callaghan submitted the following brief:)

BRIEF SUBMITTED BY MR. W. J. O'CALLAGHAN.

The supervisors of the Nashville, Tenn., post office beg leave to submit the following brief in behalf of the reclassification and readjustment of their salaries upon an equitable basis:

1. Wages should be at least double what they were in 1914. The cost of living has increased 161 per cent since that year according to Government statistics. They have increased 6 per cent during the past year, notwithstanding the efforts of the administration to reduce them. To put it another way, the dollar now paid the Government employee now buys less than 40 cents worth of the necessities that it bought in 1914, or 38½ cents worth to be more exact.

The local employees of all large corporations and firms have with very few exceptions had their wages increased from 75 to 100 per cent since 1914, and they are still increasing, as in the case of the Western Union Telegraph Co., which has granted an increase of 10 and 15 per cent to all employees receiving less than \$2,500, who have been in their employment from 6 to 12 months. They have received increases for the past five years either in bonuses or increased pay. The increase drawn in 1920 will amount to \$5,000,000. All railway employees now receive practically double what they received in 1914 and contend that they are unable to meet the cost of living as it now stands. The wages of street railway employees have been increased to about double that received in 1914.

2. There should be just and equitable promotion regulations put in operation in the entire postal service which would give recognition of efficiency, experience, and length of service without regard for personal or political preference, so that all promotions would come to those who are justly entitled to them and not from having the influence of some personal or political friend of the appointing power which has in the past permitted and caused the promotion of men who have just gotten into the service and who know very little about it to be given the highest positions over men who have been long in the service and are more competent than the one chosen.

This is supposed to be a republic and every tub is supposed to stand on its own bottom and every citizen or son of a citizen is supposed to have an equal chance with every other provided they are capable, in the public service, without regard to ancestry, pull, or previous condition, and the failure to carry out this principle of equal rights to all and special privileges to none promotes the spirit of unrest and bolshevism.

3. There should be established a board or court of appeal not connected with any of the departments of the Government to pass on all reductions of grade or pay and all removals from the service, to pass finally on all cases and see that all employees are given justice and to make it impossible for an official to remove an employee without a hearing and from whose decision there is no appeal, as is now the case.

This is contrary to the spirit of American institutions and places it within the power of a single official to remove an employee arbitrarily without a good or sufficient cause and from which there is no appeal and thus without a hearing deprive an employee who has grown old in the service of the only means of earning a livelihood.

All work required after 6 p. m. and before 6 a. m. should be compensated for ~~with~~ a time differential or an increase in pay.

Night work is injurious is recognized by all and in all trades and among skilled workers is paid for by time and one-half extra and in some cases after 12 p. m., until 6 a. m. double time is paid. The main reason, however, is to cause the reduction of ~~the~~ the minimum, as there is a lot of unnecessary night work done at present ~~in the~~ of circular and other third-class matter and second-class matter other ~~in the~~ ~~in the~~

~~There should be given all of the benefits of the compensatory regulations in~~ ~~the~~ ~~in~~ Sundays and holidays and pay for all overtime.

~~The~~ ~~for~~ ~~work on Sunday and holidays to see~~ and he should have the same com.

pensation as is allowed other employees, otherwise he is discriminated against and causes dissatisfaction.

6. All employees required to study and learn schemes or do any other similar work in addition to the eight hours of duty required should be allowed a time differential or monetary consideration therefor.

First, it is but just and equitable to do so.

Second, not to do so is taking the employees' time without compensation, which is contrary to the spirit of the Postal Laws and Regulations.

Third, it is a very unjust discrimination because it compels the clerks employed in the sections where the mails are distributed to devote a large part of their time off duty to the service in addition to subjecting him to exhausting physical and mental strain when on duty, which is not required of any of the clerks in the other sections of the office.

7. A just and equitable retirement plan should be put in operation based on length of service, allowing a percentage of annual salary for each year of service or certain term of service with a minimum for retirement or else compensation should be made so that employees could provide for their old age.

This would improve the service by making it more efficient as it would provide for superannuated employees and make the others more satisfied by feeling that their future was provided for if they did their duty in the service.

8. We feel that our Government should treat all of its employees alike, we are unable to see why the employees of all other departments of the Government are allowed 30 days leave of absence and also sick leave while the postal employees are only allowed 15 days and no sick leave, and we urge that we be granted 30 days leave of absence with fifteen days sick leave.

This would promote better health, more contentment, and do away with the thought that we are discriminated against, as well as saving us financially when we get sick, the time of all times when we can so little afford to lose our pay, as well as the time our expenses are greatest.

9. We indorse the plan for the reclassification of supervisory post-office employees adopted by our national convention, held at Atlantic City, August 18, 19, and 20, 1919.

10. We urge that the designation of all positions be clearly defined and not left to the option of some official, as is sometimes done, and the place given an inferior designation to keep the pay down; for instance, we have a "bookkeeper" who is in every sense an "auditor," and should be so designated, and that a distinction be made in the position of post-office cashier in a depository office and when not a depository office, whose work and responsibility is not half that of a depository office.

11. We believe that the laws that will result from your investigations and recommendations will determine whether the employees of the Postal Service shall be a happy and contented lot, with a high morale and fine efficiency, or an unhappy, discontented force of low morale and poor efficiency.

12. We plead for a square deal; a chance to live honest, happy lives; to educate our children; to contribute our share to the support of our churches and other institutions; to enjoy a mite of recreation and amusement and then, when we have given our best years to our country, to feel that we shall not suffer in our old age.

STATEMENT OF MR. W. R. SMITH, POSTAL CASHIER, LITTLE ROCK, ARK.

Mr. SMITH. Mr. Kline has gone into the condition of the supervisory officials as a whole. I would like to take up a couple of individual cases that are pertinent to the Little Rock post office. Take my own case as an illustration. I desire to submit figures showing the growth of the office from June 30, 1911 to 1919. That is the period during which I served. [Reading:]

On June 30, 1919, the financial responsibilities were as follows:

Stamp stocks (to meet the demands of this office).....	\$297, 381. 79
Stamped paper (subagency, for shipment to other offices).....	272, 892. 98
War savings and thrift stamps.....	532, 009. 01
Internal-revenue stamps.....	313, 722. 68
Cash on hand.....	96, 660. 01
Total.....	1, 511, 894. 29

On June 30, 1911:

Stamp stocks to meet the demands of this office	\$71,810 00
Stamp stock subagency for shipment to other offices.....	166,006 24
Total.....	242,892 24

Representing an increase in standing responsibilities of more than 500 per cent:

The total amount of business handled during the fiscal year ending June 30, 1911, was as follows:

Postal receipts of this office.....	\$633,422 00
Sales of war savings stamps.....	556,962 00
Postal remittances from other offices.....	1,382,361 00
War savings remittances from other offices.....	6,403,340 00
Internal-revenue remittances from other offices.....	147,722 00
Accountable warrants received from the department.....	910,000 00
Paid war savings certificates received from other offices with request for cash.....	2,566,553 40
Transferred stock to other offices on departmental orders and direct requisitions.....	2,094,000 00
Total.....	16,901,421 00

The total amount of business handled during the fiscal year ending June 30, 1911

Postal receipts of this office.....	\$242,340 00
Postal remittances from other offices.....	406,840 00
Total.....	651,181 00

Representing an increase of nearly 2,500 per cent.

During the same period, my increase in salary, exclusive of the war bonus allowed on account of the high cost of living, was 33 per cent.

At this point I desire to call your attention to the fact that the salaries are now based on the postal receipts only (by this is meant the funds derived from the sale of stamped paper, from box rents, and from second, third, and fourth class matter mailed under permit) and that no credit is allowed for the enormous additional business occasioned by an office being designated "State depository" for the receipt of surplus funds from other offices or by being designated as the pay office for all rural carriers throughout the State. These two items necessitate the handling of sums of money many times in excess of the total postal receipts, and should be taken into consideration in adjusting salaries in the finance division of an office so designated.

Upon the shoulders of the supervisory officials rest the burden of the successful conduct of a business almost without parallel in its volume, and in view of the fact that the conditions as outlined by the above figures are by no means uncommon, I ask you in all fairness, has Congress or the department, by legislative action or otherwise, shown any real appreciation for the efficient services of this class of faithful employees? They have rather been discriminated against, in that, by being barred from participating in the overtime allowance, their rate of pay is in many instances lower than that of the subordinate clerk, while their hours of labor are much longer. As an illustration of this condition, I desire to cite my own case: During the year ending June 30, 1919, three of the distributors in the mailing division earned an average of \$1,740 each, whereas, my salary for the same period was but \$1,700. I do not mean to intimate that the salary of these clerks is too high, but use the comparison to show the injustice of paying a higher rate of pay to clerks who are responsible for nothing but their own services and are bonded in the sum of \$1,000 at a cost of 50

shut off all avenues of presenting additional claims by stating "no further recommendations will be considered."

On July 1, 1919, the position of assistant superintendent of mails, at a salary of \$2,000 per annum, was created for this office, and the department in their judgment, saw fit to instruct the recommendation of the promotion of a foreman to this position, carrying an increase of \$300, while the best that could be done for the postal cashier was an increase of but \$100. I cite this instance merely to show the relative importance that seems to be placed on the handling of the departments vast amount of finances, and I again ask; is it just; is it consistent? When the Post Office Department took upon itself that enormous task of the sale of millions upon millions of dollars worth of War Savings Stamps; what class of employes responded more nobly to this vast undertaking, than did those in the finance divisions; is their loyalty to go entirely unrewarded?

In conclusion, will say that I have endeavored to show conclusively that I am entitled to a substantial increase, entirely upon merit rather than upon the question of H. C. L. and I trust that your honorable body will be enabled to find the solution of the troubles of the supervisory officials and give to them that well earned recognition to which they are so justly entitled. By virtue of their positions they are called upon to live on a plane slightly higher than that of the common laborer so that the dignity of this branch of our great Government will be upheld, but, can they fittingly do so on their present remuneration in the face of the prevailing cost of living.

STATEMENT OF MR. HARRY O. VINCENT, ASSISTANT POSTMASTER, UNION CITY, TENN.

Mr. VINCENT. Gentlemen of the commission, I am here to represent the assistant postmasters of the second class offices of western Tennessee. There are nine employes of this class and, of course, we are all after the same thing, an increase in salary. You probably have had a lot of statistics already and I will put some in the brief that I will file later, but the most important thing we want to bring out is injustice of the basis of our salary. Our salary is based on the highest paid clerk and by that means our salary can be reduced three hundred dollars by the death, resignation, or removal of a clerk or carrier. We feel that that is an injustice. We all have practically the same work to do in these offices. We have the accounting; the financial responsibility; we have to superintend the distribution of the mails, the incoming and outgoing, and in our office we have the distribution of supplies for about 35 offices, and for this service we are only paid \$1,600 and \$150 war bonus.

Senator GAY. You are now getting a total of \$1,750?

Mr. VINCENT. \$1,750; yes, sir. We feel that we should have from \$2,400 to \$2,600 for this work, because other people, in work requiring similar qualifications and similar duties are drawing that. In our own town there are laborers drawing much more than I get, and of course they don't require the same qualifications. Their duties are not as great as mine nor their responsibilities. I suppose you have heard all this over and over.

Senator GAY. Yes, we have had a great many statistics and you may file your brief later.

(Mr. Vincent subsequently filed the following brief:)

BRIEF SUBMITTED BY HARRY O. VINCENT

I have been selected by the assistant postmasters of offices of the second class of west Tennessee to submit to this honorable commission on their behalf their argument in support of the movement for legislation to increase their salaries.

I am frank to confess that, after the extensive hearings conducted by your honorable body throughout the United States, I will probably be unable to add anything new or additional to the reasons and arguments which you have already heard. Indeed I shall content myself with discussing old matters rather than attempting to explore

into new fields for merely cumulative matters. By a reiteration of the reasons which you have doubtless already heard, the assistant postmasters will seek to do no more than to impress on this commission's mind the urgency and justice of their claims.

Much has been said but little done concerning the high cost of living so far as the salaried man is concerned; the great advances have been made to those commonly known as wage earners, but clerks and postal officials have only been allowed a temporary bonus of \$150 per annum over and above their salaries which range from \$1,200 a year to \$1,600 in the case of the assistant postmasters of the second class. Those who are disposed to be niggardly in the matter of salaries, in answer to suggestions for increases, frequently suggest that the postal officials give up their work and seek other employment if they are not satisfied with what they are receiving; this is a narrow and selfish view of the matter to take, and not grounded in common sense or reason. These fail to take into consideration the fact that an assistant postmaster may and indeed has spent some years in the service in reaching his present position; he has learned his work and devoted his time and life to it the same as a professional man does to his profession, and as a result of which he can do nothing else so well as he can his present work: in truth he has become unfitted for anything else.

We can safely assume that it has always been the policy of our Government to pay adequately for the services required of its agents and employees, but how is the Government to know our needs unless we can make them known to the legislative department through such agencies as this honorable commission? Postal officials all over the country appreciate the fact that this is the first time that Congress has taken active steps to investigate the needs and requirements of post-office employees through a commission going into all parts of the country and doing them the honor of hearing them in person.

This commission has already heard and therefore knows of the rule basing an assistant postmaster's salary upon that of the highest paid clerk in his office, and whereby in case of the death of a highly paid clerk and the substitution of a man junior in service, the assistant may suffer a drop in his salary from \$1,600 to \$1,200 a year. It would be useless to spend time arguing the injustice of such a rule, as it is self-apparent. An employee's services are worth no less because of the death of a clerk in the office; indeed he may have both his work and his responsibilities increased as a result of such a contingency, and his reward is a decrease in his salary.

The assistant postmasters receive annually from the department a questionnaire of some 15 or 20 inquiries concerning his personal appearance, his conduct in the community, his willingness to work overtime, and his manner of meeting and dealing with the patrons of his office, and his general temperamental fitness for the place. No other post-office official or employee is required to answer this questionnaire except assistant postmasters, thus recognizing their greater responsibility both to the Government and to the public. They must dress neatly and present a proper appearance in their relations with the patrons of the office, all of which costs much money with the present prices that prevail throughout the country for clothing and wearing apparel.

Assistant postmasters are required to exercise extreme care and diplomacy in fulfilling their duties to the public, especially in the handling of complaints. Frequently when the patron is wrong, yet it becomes the duty of the postal employee to handle the complaint in such a delicate manner as not to give offense to the most sensitive, and at the same time he must follow to the letter the rules and regulations governing such cases, which the patron frequently does not understand.

The assistant postmaster is really the right arm of the postmaster, indeed sometimes, on the right and left arm. He is the active executive in control over the office clerks, etc. A bond is required of him, which is a recognition of his responsibility.

Under present conditions the dollar is worth somewhere between 50 and 60 cents in purchasing power, and the result of this reduction in purchasing power has been to, in effect, decrease rather than increase our salaries.

Comparisons illustrating the inequality of pay received by employees of the Government might be made, to the disadvantage of the postal employee, but after all is said and done, all that we ask at the hands of the government is a recognition of our services, taking into consideration both the work and the responsibility with which we are burdened, coupled with the depreciated purchasing power of the American dollar. The assistant postmasters of west Tennessee would be making fairly modest requests in asking that the salary range be raised from its present standard to from \$2,400 to \$2,600, and that, too, without exceeding the highest paid clerk in the office may be receiving. The salary of the assistant postmaster would not logically affect the salary of the assistant postmasters.

The assistant postmaster has more real work to do than any other employee in the post office. He handles the regulations and rules, handle the finance, and is responsible for every other employee.

After all is said and done, the assistant postmasters must maintain themselves and families in a decent manner, in keeping with the ordinary standards of the community in which they live, and they can not do so to the degree that they should on the present salaries. To make an end of the argument, this commission is bound to recognize the fact that the same economic and war conditions making increases of pay necessary with every other class of working and salaried people affects assistant postmasters in the same manner.

The reason for one is the reason for the other.

Assistant postmasters have no way of avoiding the results of abnormal economic conditions, and they very respectfully ask this honorable commission to grant them relief, the same relief that has been granted to others in Government employment, and for the same reasons.

STATEMENT OF MR. E. L. MOSS, BIRMINGHAM, ALA.

Mr. Moss. Gentlemen, the statements I have in my brief here were gotten up by a committee from our office. We went to the banks in the city; to the two big steel corporations and to several of the local business houses and our figures are based on an average of the figures we got from these various corporations. Our own figures are based on a questionnaire sent out to all supervisory employes. The salaries of the supervisors in Alabama are only 60 per cent of the salaries of men in similar positions in corporations. The street car company pays men who have been with them two years a larger wage than the salary of any supervisor in the Birmingham post office with the exception of the assistant postmaster and the superintendent of mail. The average number of hours is eight for positions of that kind; those of the supervisors, nine. Craftsmen in Birmingham are paid as follows—carpenters, bricklayers, plumbers and tinnerns, where they work regular, \$2,200 to \$3,000 a year. The foremen in such industries make from sixty to seventy dollars a week. Specialists in every line of work, except the post office, receive from 50 to 100 per cent more than they direct. The supervisors in the banks and in the offices of the big steel corporations receive 60 per cent more than the supervisors in the post office department and the lowest paid supervisor in any of the banks except one small savings bank, and in the steel corporations, receives \$2,400 year.

Twelve of the supervisors in the Birmingham office find it necessary to work outside of their regular employment or put their children out to work; 12 of the men are paying interest on money borrowed to pay their living expenses. The supervisors should be paid enough money to give their entire time to the service, as advancement is in proportion to the time and attention given to the service by the supervisors and employees.

The average salary is \$1,875; that includes the assistant postmaster and the superintendent of mails, who are the two highest salaried men we have. Boilermakers in the big steel corporations are drawing from \$200 to \$400 a month.

Mr. BELL. Do they work regularly?

Mr. Moss. When they do work regularly they draw that.

Mr. BELL. But do they work regularly?

Mr. Moss. Some of them do, and some don't. The average number of years the supervisors have been in the service is 16; the average number of years they have been in supervisory positions is 5. The average expense of the supervisors over and above their salaries is \$495 above the salary for the last fiscal year.

The supervisors do not ask for an increase in salary in order to start bank accounts but to be able to secure the necessities of life, to educate their children, and to be able to take some part in the civic, religious, and social life of the community in which they live.

The supervisors of this district ask for the salary reclassification plan as outlined by the supervisory post-office employees at Atlantic City August 18, 19, and 20, 1919.

There is one other point that I would like to bring out. A condition exists that men are designated as foremen in the office who have no employees under them at all. They are given that designation in order to give them an increase in salary. They should be taken care of as special clerks, and we think no one should be designated a foreman unless he has an actual crew under him.

Mr. STEENERSON. Do they designate the clerks as foremen?

Mr. Moss. We have two in my section.

Mr. STEENERSON. And there is nobody for them to be foreman over?

Mr. Moss. They have no one under them at all.

Mr. STEENERSON. And the object of that——

Mr. Moss. Is to give them an increase in salary.

Mr. STEENERSON. Who does that?

Mr. Moss. It is recommended by the postmaster.

Mr. STEENERSON. And comes from Washington?

Mr. Moss. Yes, sir. We have two men in the finance division; one acts as assistant to the postal cashier.

Mr. STEENERSON. Your idea is that we should so write the law as to make such practices impossible?

Mr. Moss. Yes, sir; I think the salary of a foreman should depend upon the number of men under him and the amount of financial responsibility he has.

Mr. STEENERSON. I do not think the present law contemplates anything of that kind; it is a matter of administration.

Mr. Moss. That is the situation that exists in our office. I don't know whether it exists in any other office or not.

Mr. STEENERSON. What is your office?

Mr. Moss. Birmingham.

Mr. STEENERSON. How is your system of promotions worked out there with reference to the supervisors?

Mr. Moss. Well, they are usually taken from the special clerks. However, in the finance division we have no special clerks.

Mr. STEENERSON. Is the rule of seniority pretty well carried out?

Mr. Moss. Yes, sir; where the man is efficient.

Mr. STEENERSON. Is there any dissatisfaction among the clerks and carriers and other employees there about the way the system of promotions is carried out?

Mr. Moss. Occasionally when a promotion is made, somebody else thinks he ought to have gotten it.

Mr. STEENERSON. There is no general belief there that promotions are made regardless of merit or seniority and is due to politics or other influences?

Mr. Moss. No, sir; I haven't heard of any.

STATEMENT OF MR. W. Y. BENNETT, ASSISTANT POSTMASTER, COOKEVILLE, TENN.

Mr. BENNETT. Gentlemen, I deem it a privilege and an exceedingly high honor to have been selected by the small group of employees than whom I believe there are no more deserving in the service, to present a very brief statement of their case to-day.

I represent the supervisory officials of the Postal Service who reside in the fourth congressional district of Tennessee. [Reading:]

This district lays directly between Nashville and Knoxville, and comprises 14 counties, the majority of which are rather sparsely populated, this being duly evidenced by the fact that there are only four classified post offices within the district, and all of these are of the lower grade second-class offices, and of course the only employees that come within the classification of supervisory officials are the four assistant postmasters. The offices represented are Lebanon, Gallatin, Cookeville, and Dayton, Tenn., the offices being named in order of their importance with reference to postal receipts, etc. I am the assistant postmaster at Cookeville, and as I stated before, have been selected by the other supervisory officials of the district to represent our mutual causes in a very brief and simple presentation of facts and conditions as they now exist, and to give you a few figures for data, which of course you will need in your recapitulation of this class of employees as a whole.

The assistant postmaster in a small second-class office is peculiarly situated, and I have never heard a blanket title that would anything like cover the multitudinous functions which he is supposed to and does fill when he has fully and competently discharged the duties that are ordinarily imposed upon him. First, he must have a fair and accurate knowledge of the Postal Laws and Regulations, and if he makes a good official he must keep this knowledge rubbed to a polished finish all the time and each day must add amendments in his mind, as they appear in the daily bulletins. If he makes a good official he must have some executive ability, for it usually lies with him to discipline the other employees of the office. He must have a practical working knowledge of every department of the office from the post-marking and dispatching of mail to the rendition of the postal and other accounts, and in this day of central accounting business, he must audit the accounts and fill requisitions of a dozen or more district offices, and keep a separate account for each. The supervisors in the higher grade offices do not have to be so versatile in their accomplishments as the ones in the lower grades for the reason that their offices are allowed more clerical assistance, and a part of the routine can be shifted to other shoulders. An assistant to a purely politically appointed postmaster may have practically the whole burden, and I might say responsibility of the office upon him. The salary law as it now stands on the pages of the Postal Laws and Regulations, making the assistant's salary only 50 per cent of that of the postmaster is one of unquestioned misapportionment, and that it should be amended is universally conceded by all those who have an intimate or even general knowledge of conditions as they exist and as they have existed for years past. If the combined salaries of the two were split 50-50, the apportionment would be much fairer than it is; however, I do not wish to go on record as having advocated so radical a change.

Our Government saw fit to augment the salaries of its postal employees a year or so ago, in order to tide them over the war period, and have continued this bonus through this fiscal year. The bonus on its face is supposed to be \$200, but speaking for myself, I will state that the bonus drawn by me for the year ended July 1, 1919, was \$110 instead of \$200, and I will further state that had I counted the actual hours of overtime put in during that year for which I received nothing, the \$110 bonus for the year would not have paid my actual overtime for three months at the rate of 40 cents per hour. I do not believe, however, that a supervisory official should be paid for overtime, but I do believe that his compensation should be sufficient to make amends for the extra time he is compelled to put in, and that it should be commensurate with his duties and responsibilities.

The assistant postmaster in a second-class office has the direct supervision of all employees of the office, including rural carriers. In the offices I represent the number of employees vary from ten to twenty. The assistant has to see that the schedules are maintained, and in some instances he has to make the schedules and be responsible for their being kept. If the office force is not large enough to maintain an eight-in-ten-hour schedule for the clerks, then it falls to his lot usually to fill in the gap, for his tenure of work may extend from 8 in the morning to 10 o'clock in the evening,

and then some if necessary. Now, gentlemen, for the work that I have briefly outlined as that of the second-class assistant postmasters whom I represent, the regular salaries paid are \$1,000, \$1,100, and \$1,200 per year, just ordinary living, small-town salaries based on the cost of living a dozen years ago, when a dollar would buy as much as two dollars will to-day, and even more of some of life's necessities. Mine is the middle salary of the three named, and I believe that with my small family, my wife and two children, a fair average of the condition of the four officials named could be reckoned. My house rent and grocery bill for a month on an average is \$75; my expense for clothing for family, fuel, etc., a month, on an average is \$40; my miscellaneous expenses, such as insurance, church and lodge assessments, tuition, books, etc., are \$25; my doctor's and drug bills average per month, \$10, making a total of \$150 per month. My present salary, including bonus is \$1,450 per year, so my deficit for the year will show about \$250. This year, I have been forced to forego a vacation trip for myself and family for the reason that my salary is not large enough to justify the expenditure of even a modest trip. A part of my vacation allowance of time I am taking now, in order to present the causes of myself and my fellow postal workers, and to ask your consideration in our behalf.

The services of an efficient assistant postmaster in a second-class office (and all others should be weeded out of the service), should not be less than \$2,000, and at that, the present high cost of living would leave but little or no margin for him to practice the "rainy day" adage. I received special questionnaires from each of the officials represented, and they will bear me out in the statements I have just made.

Under the present salary scale, the department will lose many of its most efficient employees unless there are permanent relief measures passed by Congress, in the form of salary increases. Personally I do not believe in undue agitation to bring about the necessary relief, and I feel sure that the Congress of the United States will meet the emergency by giving justice and a living wage to every postal employee, and I also believe that they will recognize in a practical manner the needs of the supervisory officials of the service, on whom so much depends.

I now desire to thank you personally for the consideration shown each class of employee, and am more than willing to leave the case in your hands for such action as you may in your wisdom see fit to recommend to the Congress.

The present law, as it now stands on the Postal Laws and Regulations, that an assistant shall draw 50 per cent of the salary of the postmaster I consider all out of proportion and I think anyone at all intimate with conditions as they exist will agree with me.

Mr. BELL. What do you think it should be?

Mr. BENNETT. Well, I should say at least 75 per cent. If the combined salaries of the two were split 50-50, it would be fairer, but I do not wish to go on record as having advanced any such radical change as that.

Now the bonus was supposed to have been \$200, but, speaking for myself, I will say that I drew as a bonus for the year ending July 1, 1919, \$110 instead of \$200. If I had gotten the overtime that I had to put in during that year, at 40 cents an hour, \$110 wouldn't have paid three months of that overtime.

Senator MOSES. How did it happen that you got only a hundred and ten dollars?

Mr. BENNETT. Our office went into the second class July 1, 1917. I was paid as assistant postmaster at \$900 a year. In October I got a raise of 10 per cent under the law passed in March. I was in the post-office then and we were third class and they ruled that that applied to my case. Then, when we got the \$200 raise the following July, they took off this 10 per cent and made it only a hundred and ten dollars.

Now, with regard to salaries. In the offices I represent the basic salaries are a thousand, eleven hundred, and twelve hundred. Mine is the middle salary. I have a wife and two children. My rent, meat, and grocery bill for the year averaged \$75 a month; my expenses for clothing the family and for fuel is \$40; miscellaneous expenses, books,

insurance, lodge, and church dues, and so forth, \$25, and my drug and doctor's bill averaged about \$10, making a total of \$150 a month. My present salary, including bonus is \$1,450. This year I have been forced to forego a vacation trip for myself and family for the reason that I didn't have enough money. I contributed a part of my vacation allowance to the cost of this trip in order that I might present our case to you gentlemen.

(Briefs were submitted by John R. Warren, Memphis, Tenn.; Fred W. Perkins et al., Little Rock, Ark.; J. M. Reed et al., Chattanooga, Tenn.; J. G. Bowman, Little Rock, Ark.; and Guy Smithson, Knoxville, Tenn., as follows:)

BRIEF SUBMITTED BY MR. JOHN R. WARREN, SUPERINTENDENT OF DE SOTO STATION, MEMPHIS, TENN.

Speakers from this district have presented to you briefs, and accompanied same with oral statements regarding the wage question as effects the postal worker; however, with your kind indulgence, I desire to submit to you in writing the facts as to my own individual case.

I am 40 years of age and entered the Postal Service in February, 1902, as a substitute clerk at the rate of \$1.65 per day. I was appointed regular clerk on the 1st day of May same year at a salary of \$500 per annum. By hard work and close application, I rose from the ranks of a clerk and was made foreman in the mailing division. In November, 1913, I was selected to take charge of De Soto Station, and my salary at that time was \$1,500. With the added duties and financial responsibilities I worked until July 1, 1917, without increased compensation. On July 1, 1917, I was given an additional \$100 increase. On October 1 I was again given an increase of \$100 making my basic salary \$1,700.

Basic.....	\$1, 700
Bonus.....	200
Increase Nov. 8.....	125
Present salary.....	2, 025

Foremen under my supervision are receiving \$1,800 and \$1,925, respectively.

I have under my supervision 110 employees and the business done at my station will show by the records close to \$275,000 for the year 1919. There is no other branch post office in the South similar to De Soto Station. In October, 1915, we took over the Memphis Terminal R. P. O., and by this consolidation, effected a saving to the department of thousands of dollars annually.

De Soto Station is located in the heart of the wholesale business district and in the immediate vicinity of the Grand Central Station and the Union Station. The distribution of all outgoing mail is performed in this station and we distribute an average of 3,500 sacks parcel post matter and 300,000 pieces other matter daily.

De Soto Station is the largest branch post office in the entire South doing terminal R. P. . work.

De Soto Station distributes solid carloads of parcel post matter shipped direct and unloaded from storage cars into this office.

De Soto Station distributes solid carloads of catalogues shipped direct from New York and Chicago.

De Soto Station distributes "stuck" mail turned over by railway post offices centering at Memphis.

De Soto Station makes distribution of local mail for practically all R. P. O. lines out of Memphis.

De Soto Station distributes thousands of pieces mail matter emanating from the various departments in Washington, for southern states, such as public documents, seeds, pension checks, etc.

De Soto Station has at present 13,000 square feet of floor space. We have asked for additional space and the matter has been favorably recommended by an inspector. The additional space needed will give us more than 20,000 square feet—making possibly the largest "branch" post office in the United States.

I am closely associated with and cooperate at all times with any number of large mail-order concerns in this city, and among the wholesale concerns in the vicinity of this station I carry on a daily campaign with regard to the proper preparation of mailings of large quantities of mail matter.

I have given years of study to constructive work in this office and have worked tirelessly on matters pertaining to the handling of mails in expeditious manner and with the least possible cost. A system of alphabetical distribution is used exclusively in De Soto Station which is in itself a saving of man power and thousands of dollars annually to the department. Many original ideas have been perfected, tried out and found advantageous, and, more than once to my knowledge, this office has been complimented for the systematic manner which we were handling mails. It has been my ambition to progress for reason that I realized years ago the possibility of a man in the service if he stuck to it and kept abreast with the times, and especially since the inauguration of parcel post. From time to time I have submitted labor-saving devices and have in my files letters of commendation for my efforts along this line.

The responsibilities of a man in my position are great for reason that in addition to being held responsible for the proper conduct of the affairs of the office, responsible for the proper accounting for and protecting the revenues of the department, I am held strictly accountable by the public and have long learned that sound judgment and good common sense is necessary in the administration of affairs. I am held responsible for the individual errors and omissions of the one hundred and odd employees. I have a case in point wherein I was held personally responsible for failure on the part of a clerk who erroneously paid a money order. An inspector collected \$9, and the department ruled that notwithstanding the fact that employees had been told, both verbally and in writing, regard the matter of initialing money orders, I would be held personally responsible for their action, therefore, I am out the \$9. This happened during the year 1919. The \$9 I had to pay meant that much taken from my family, and goodness knows my salary is small enough besides taking away part of it.

The following shows my expenses for year 1919; four in family:

Rent.....	\$540	Water.....	\$12
War saving stamps.....	24	Medicine.....	25
Insurance (fire).....	7	Doctor.....	50
Fraternal.....	15	Dentist.....	75
Table.....	780	Clothing.....	350
Car fare.....	50	Cigars and tobacco.....	50
Newspapers and magazines.....	24	Coal.....	50
Telephone.....	36	Incidentals.....	94
Light and gas ¹	60	Amusements.....	25
Lunches.....	100		
Barber.....	25	Total.....	2,460
Laundry.....	48		

I do not own my home; in fact, I have not been able financially to get enough money ahead to make a cash payment on a place, therefore, I am at the mercy of landlords. I have just finished paying my last winter coal bill, and have bought another supply which has not been paid for. In case of sickness, or perchance if any operation of any consequence becomes necessary, I would be forced to go in debt. Economy is the leading word in my household; however, as much as we try to economize, I have not been able to lay aside a penny for that proverbial "rainy day." I have denied myself, this year, in order to join a fraternal organization which will at least bury me decently should I shuffle off this "mortal coil." Life insurance is an expensive proposition and is almost out of the question on my present salary.

The dignity of my position makes it almost imperative that I keep up appearances for I am associated with business men daily and must be neat and uphold the position of superintendent of one of Uncle Sam's big institutions.

During the past 18 months there has been considerable feeling of unrest among postal employees throughout the country. This condition has been felt here and the service has deteriorated no doubt. This feeling is attributed to one thing; that is, increased cost of living and the inadequate compensation of employees to meet the increased cost of living. We have lost valuable employees in this office who have left the service to enter other lines where pay is better. The class of employees coming in have been far below the standard and the result is the efficiency of the service has been materially affected. The supervisory force has been severely tried in an effort to maintain service for reason that the material we have had to work with has been of such character as to necessitate constant training and supervision. I have worked harder during the past year and one-half than at any time during my 17 years in the post office. The obstacles confronting me at times have been almost insurmount-

¹ Gas company now asking the State utility commission for an increase in rate which means more than 100 per cent increase to the small consumer.

able. Employees remaining in the service have been loyal, and, furthermore, they have been soldiers, staying at their post of duty in the face of almost overwhelming odds. We have shouldered extra burdens, which have been brought about by the war, willingly and cheerfully and have aided in all war work, and, furthermore, invested in war savings stamps and thrift stamps until it hurt.

In this office as well as other offices throughout the country it has been necessary to employ women. At one time we had more than 25 women employees in this station, and as women are not physically able to do the work of men we have been sorely handicapped for distributors. The service has been expensive. Supervisors have worked hard in an effort to move the mails and especially parcel-post mails—the force of men being limited rendered this branch of the service difficult to handle. The use of women on letter and circular distribution and the men on parcel-post work resulted in dissatisfaction. In all these things, the supervisors bore the brunt.

Since the close of hostilities a number of our employees who volunteered and were drafted have returned, and these we have placed in their old assignments. Without the return of such men I would be afraid to say what the service in Memphis would be to-day. Even with those who have returned from a victorious army our force is inadequate. It is to be hoped that the department will be more liberal in the future and place the Post Office Department on a higher plane by recognizing the true worth and value of its employees.

There appears to be a tendency on the part of some people to refer to post-office employees as being the petted and pampered Government employees; however, on my part, I want to state that I have endeavored to fit myself for the position I hold and I believe I am entitled to stay in the service, but at a living wage. I feel justly entitled to the necessities of life and at the same time I feel that I am certainly entitled to some of the luxuries and a right to enjoy recreation and amusements, and my faithfulness (if I must say it myself) to the Post Office Department should certainly entitle me to these things.

Being closely associated with the larger business houses has enabled me to feel the pulse of their business and see some of the inner workings of large mercantile establishments, and one or two representatives from firms have approached me within the past 18 months with regard to openings in their respective lines. However, I considered my knowledge of the Postal Service worth more to my country and especially during the war. Further, my loyalty to my Government would not permit my considering any change. I have always felt that the Post Office Department would at some future time recognize the ability of supervisory employees, and with that idea in mind I considered it my duty to remain in the post office.

It is a well-known fact that the Post Office Department has failed to recognize the ability and responsibility of supervisory employees for the reason that the reclassification measures which have been submitted by supervisors failed of passage more than once. My record as a clerk and as a supervisor will bear the closest investigation; furthermore, I have at all times worked hard and with one idea in view, and that to serve the public and to promulgate the wishes of the Post Office Department to the best of my ability. I am not asking for an increase in salary for the purpose of investing in automobiles and fine clothing to “joy ride” around the city, but an increase in compensation for the purpose of permitting me to feel that the department recognizes the faithfulness of an employee and furthermore to be able to take care of my family comfortably and sustain the dignity of my position.

In the convention of Supervisory Post Office Employees, held at Atlantic City, N. J., August 18 to 20, inclusive, of this year, we adopted a plan for the reclassification of supervisory post-office employees. The salary of station superintendents was agreed upon to be computed by the amount of annual receipts and the number of employees as follows: When receipts of a station exceed \$5,000 per annum, station to receive a credit of three points for the first \$5,000 and one point for each additional \$5,000; also one point for every three employees. According to this plan my salary should be \$3,600 per annum.

Statement showing amount of business done at De Soto Station for six months, ending Dec. 31, 1919.

Stamp sales.....	\$93, 575. 49
Money orders:	
Amount.....	\$72, 416. 99
Number.....	10, 977
Letters distributed.....	pieces.. 21, 832, 857
Circulars.....	pieces.. 15, 540, 732
Parcel post.....	sacks.. 416, 826
Registers handled.....	pieces.. 225, 451

War-savings stamps and thrift stamps sold for the six months are not included in stamp sales, but will run more than \$5,000.

I earnestly ask the commission to carefully consider the foregoing in an effort to correct an injustice which, I believe, is being done in my particular case, and especially as to the matter of inadequate pay.

Respectfully submitted.

JNO. R. WARREN,
Superintendent De Soto Station.

BRIEF SUBMITTED BY MR. FRED W. PERKINS ET AL, LITTLE ROCK, ARK.

Briefly stated the reasons why special clerks in the Postal Service are entitled to an increase in salary are as follows:

First. *Efficiency.*—The employees classified as special clerks are recognized as being among the most efficient clerks in the office. Being so classified is a recognition of their efficient services. It requires several years' work to become proficient enough to obtain the title "special clerk," and they are the nucleus around which the distributing force is built.

Second. *Requirements.*—We possess a large degree of technical knowledge and use it constantly, and are required to pass examinations twice or more often a year to show that we do possess the knowledge necessary to our position. We are required to make 95 per cent on these examinations and we usually average about 99½ per cent. Not only are special clerks required to do and know everything that any distributor in his division does or knows, but in addition he is supposed to and does know and do hundreds of things that are unknown to the ordinary distributor and which go to make for good service. Other employees look to them for information on the fine points of their distribution and they usually get it. They are fast and accurate, it being not uncommon for them to distribute 45 to 50 letters a minute and upward over a period lasting over their entire tour of duty. In a word, they are experts and they yield to none in their knowledge of distribution or the amount of work performed.

Third. *Length of service.*—All special clerks have been in the Postal Service 7 or 8 years and the most of them for 10 years or longer and the Post Office Department has long recognized the length-of-service principle in promoting employees. We base some claim to increased compensation on the length of time we have been in the service, but what we wish to emphasize particularly is our knowledge and skill, and the fact that we do our part of the work and more.

Fourth. *High cost of living.*—The present high prices have affected us harder than they have the average person, because our increases in compensation have been utterly inadequate and have been too long deferred. Despite the Government's campaign against high prices, the cost of a number of basic commodities increased during September, 1919, according to Government statistics. Various economic experts have predicted that high prices will continue for a number of years and that we have had our last view of the prices that existed during the prewar era. Reliable statistics show that the cost of living has advanced about 87 per cent since 1914, while salaries have advanced only about 30 per cent in the same time. These figures are approximately correct, or as nearly so as can be estimated during these days of constantly rising prices.

Fifth. *Salary.*—At present special clerks are paid from \$116 to \$125 a month with a war bonus of \$29.16 per month, which is only temporary. The present salary is about two-thirds of what it should be. A man can not provide for a family and maintain it in the comfort and decency that ordinary American standards require on this slender salary. The Government should recognize, if anyone does, our right to have the things that are necessary to decent living and the pursuit of happiness, and make it possible for them to be practical realities instead of mere theories, as they are on our present salaries. Large numbers of employees of all classes are constantly leaving the service because of unsatisfactory salary conditions, and this condition makes for inefficiency, and will cause the Postal Service to grow progressively worse unless something is done to remedy it. Ordinary unskilled employees in nearly any mercantile establishment are paid nearly as much to begin with as we are at present, and their salaries are considerably larger than ours after having served a year or so, and they possess hardly any technical knowledge.

The recent temporary increase of salary, effective November 8, which is effective during this fiscal year only, provides for an entrance wage of 60 cents an hour. Even noncertified employees receive this amount, and they know next to nothing about the Postal Service. Special clerks earn just about this amount on an average, and they have been in the service 10 years and longer, as a rule. Is this fair, and is it in

accord with that principle of justice to its citizens for which the American Government is noted both here and abroad? It is essential that this wage should be paid in order to attract capable employees and they need it to make both ends meet, but if they earn this amount, special clerks should receive much more compensation because of their efficiency, length of service, and other reasons.

We ask for and want immediate and permanent relief from the present inequitable and inadequate salary conditions. What we desire is a just and adequate salary, one commensurate with our ability, knowledge, and performance.

FRED W. PERKINS,
HAROLD J. SKINNER,
ETHEL M. GIBBS,
PERRY P. EVANS,
Special Clerks.

BRIEF SUBMITTED BY J. M. REED ET AL., CHATTANOOGA, TENN.

In presenting to you this brief statement on the subject of salaries of supervisory post-office employees we will endeavor to show you that the salaries paid us are inadequate to permit us to live in keeping with our positions, and that they do not favorably compare with the salaries paid to men occupying like positions and performing similar work in commercial and industrial lines.

In order to obtain definite information concerning the compensation of employees in commercial and industrial lines, we addressed a questionnaire to a few representative business firms and manufacturing establishments in the city of Chattanooga, requesting that they furnish us certain data concerning the annual compensation given paid employees, not stockholders, and stated to them that the information was to be used in making a comparison of the salaries paid in other lines and those paid by the Post Office Department.

Seven replies were received to the inquiry concerning the salary of the treasurers of seven different corporations and the average of the seven was \$3,671.42. The duties of these men are similar to those of the assistant postmaster of the Chattanooga office, but the average financial responsibility of these seven men was less than fifty per cent of that of the assistant postmaster, who receives a salary of \$3,000 plus a bonus for this fiscal year of 5 per cent.

Eight replies were received concerning the salaries paid to the superintendent of as many factories or mills. The average of the eight is \$3,515. The duties of these men are similar to those of the superintendent of mails, although their responsibility is considerably less, and our superintendent of mails receives only \$2,400 per annum, with a bonus of 5 per cent for this fiscal year.

The act of March 3, 1883, provides that the superintendent of mails may receive not exceeding 45 per cent of the salary of the postmaster. The postmaster at this office receives \$6,000 per annum and the superintendent of mails receives but \$2,400 basic salary.

Eight replies were received concerning the wages paid the foremen in these same establishments and the average of the eight is \$2,074.30 per annum, while the foremen in the Chattanooga office receive but \$1,600 plus a bonus of \$200 for this fiscal year.

Six replies were received giving the salary paid the bookkeepers by these same firms and the average was found to be \$2,300. The bookkeeper in this office receives \$1,600, plus a bonus of \$200 for this fiscal year.

Six replies were received showing that the salaries paid to the sales managers of these six concerns, and the average of these is \$4,282. While no position in the post office could be compared to these men so far as the nature of the work is concerned, their duties require no more business ability or technical knowledge than is required to successfully supervise the distribution, delivery, and dispatch of the mails at an office the size of Chattanooga.

In addition to the salaries paid to the men referred to above, the managers of the firms in question stated that the men were compensated in the case of illness or for absence on that account, that they are granted annual vacation with full pay ranging from 14 to 30 days, and in all cases where any employee had financial responsibility, the expense of bonding was borne by the firm.

In addition to these advantages of more pay, more vacation, provision for pay for time absent on account of illness, and for bonding at the expense of the firm, we are reliably informed, in some cases by the employees themselves, that these men have been the recipients of substantial bonuses, which were presented at the end of the fiscal year or at the holiday period.

We would also represent to your honorable commission that the emoluments mentioned are not by any means the most important advantages which the men in commercial and industrial life have over the men in the Postal Service. These men who receive technical training in these lines have a broad field open to them. If the compensation paid by the particular firm or corporation that employs them is not commensurate with their capabilities they can sell that same knowledge and training to a firm manufacturing a similar article or selling a like commodity whose business demands men of higher training or more energetic application. This is not the case with the postal employee. His field is confined to the narrow limitations of his own particular office, and those who have made the Postal Service their life's work have no opportunity of applying their knowledge and training in any other field of endeavor that would offer more adequate remuneration.

We would represent to your honorable commission that, in our opinion, no more equitable basis for compensating supervisors can be found than according to the receipts of the office in which they serve.

The receipts of the office indicate the financial responsibility of those employees whose duty it is to handle the finances and account for the revenues, and they also govern to a great extent the amount of mail handled, thereby determining the amount of work that will fall upon the employees who handle the collection, distribution, delivery, and dispatch of the mails.

In offices the size of Chattanooga; that is, with receipts between \$500,000 and \$600,000, we would suggest the following scale:

Assistant postmaster.....	\$4,200
Superintendent of mails.....	4,000
Assistant superintendent of mails.....	3,000
Cashiers.....	3,000
Bookkeeper.....	2,800
Foremen.....	2,800
Station examiner.....	2,800
Stenographers.....	2,000
Superintendents of stations.....	2,000-3,000

When the receipts of a carrier station do not exceed \$5,000 per annum, the station shall have a credit of three points, and when the receipts of a carrier station are over \$5,000 the station shall have a credit of three points for the first \$5,000 and one point for each additional \$5,000; also one point for every three employees. Table of points suggested:

10 points or less.....	\$2,000
11 to 20 points.....	2,200
21 to 36 points.....	2,400
36 to 50 points.....	2,600
51 to 75 points.....	2,800
76 to 100 points.....	3,000

On making inquiry concerning the daily wages paid in the various building trades in Chattanooga, we find the following are averages:

Blacksmiths.....	\$5. 60-\$7. 52
Boiler makers.....	6. 00- 8. 00
Bricklayers.....	8. 00
Carpenters.....	6. 00- 7. 20
Electricians.....	6. 00
Machinists.....	5. 48- 6. 00
Molders.....	7. 00
Plumbers.....	8. 00
Sheet-metal workers.....	5. 60

It will be seen that the average of these workers is well over \$6 per day, yet to attain these wages the only qualifications necessary are a rudimentary education and a three or four year apprenticeship in their chosen trade, and they are paid almost as much in wages during this apprenticeship as the postal workers receive during their first years of service. Further, they are not required or expected to maintain the standard of living expected of postal employees, especially those in supervisory positions.

At their present scale blacksmiths, bricklayers, boiler makers, or plumbers earn more than \$2,400 per year, while there are 14 of the 18 supervisors and superintendents of stations attached to this office whose annual compensation is but \$1,800 per annum.

At a number of the stations the superintendent takes all the responsibility and does all the clerical work. He is on duty 11 hours each day, therefore his hourly wage is but 52 cents, while that of the bricklayer, boiler maker, or plumber is \$1, with time and one-half for overtime.

If the bricklayer worked 11 hours, he would be paid \$12.50; and for that same time the station superintendent is paid \$5.76.

With reference to the matter of overtime, Sunday and holiday work by supervisors, we would respectfully call to the attention of your honorable commission the fact that no limit which would afford protection to the supervisor is placed on such work. During the rush seasons, especially at the Christmas holidays, it is not unusual for supervisors to be on duty from 12 to 16 hours daily for several days at a time, and if, as has been the case at this office, a supervisor falls ill as a result of long hours and overwork he loses his time unless he is fortunate enough to have vacation due him. From past experience we have found that it is not only expedient but necessary to save a large part of our vacation time for just such emergencies.

In support of our contention that our salaries are inadequate to permit us to maintain a fair standard of living, we quote you below a statement showing the expenses of one of the employees of this office. The compensation of this employee during the fiscal year ending June 30, 1919, was \$1,400. He prefaces his statement with the following remarks:

"At the beginning of the fiscal year I was practically out of debt, except for a note of \$1,500 on my home. More than 50 per cent of all the vegetables consumed by the family were grown in our own garden. Although I sold milk and butter during the year to the amount of \$185, I was compelled to negotiate a loan on June 1 to meet current expenses."

He then itemizes the expenditures for his family of six as follows:

Groceries.....	\$550. 00
Clothing and shoes.....	350. 00
Fuel for cooking and heat.....	95. 00
Lights.....	30. 00
Water.....	18. 00
Premium on life insurance (policy of \$3,000).....	135. 75
Interest on loan.....	90. 00
Books and tuition for three children.....	225. 00
Medical attendance.....	45. 00
Church and benevolences.....	125. 00
Car fare.....	50. 00
Newspapers and periodicals.....	20. 00
Lodge dues.....	7. 50
Telephone.....	36. 00
Taxes.....	112. 00
Total.....	1, 889. 25

You will note that he had no expense for rent, except the amount for interest and taxes. There is no provision for recreation. Although this man owns his own home, occasional repairs and painting are necessary.

There are numerous other instances that could be cited but as they show the same general condition it is not thought necessary or expedient to burden your honorable commission with the repetition. Other employees have been forced to go in debt and some have taken small jobs outside and work after hours to augment their income, but as you well know, this tends to undermine the health of the employee and at the same time lowers the efficiency of the service.

We know that you are so well informed as to the increase in the cost of living that we feel that it would be presumptuous for us to attempt to quote figures on the subject, but allow us to mention the fact that the statistics of the Department of Labor show that average increase in the price of foodstuffs for the six-year period from July 1, 1913, to June 30, 1919, was 85 per cent, and the statistics of the same department show that this cost was 1 per cent higher during the month of August, 1919, than it had ever been before.

We do not admit that an increase of 86 per cent will cover the additional price we have to pay. The average increase for the whole United States for all foodstuffs may be that low, but we find that the advance on the necessities, the things we must purchase and use day after day is much greater. In fact, upon making a careful survey of conditions and prices in our city and comparing them with the prices paid six years ago, we find that the cost of furnishing food, clothing, and shelter for the family

has increased approximately 93 per cent since 1913 as shown by the following tabulation:

	Per cent.
Foodstuffs.....	116
Clothing.....	125
Fuel.....	100
Housing.....	40
Miscellaneous.....	90
Average.....	93

Gentlemen of the commission, we would further represent to you that the separations from the service by resignation very forcibly demonstrate that substantial increases are necessary to avoid the loss of trained men who are so essential to the efficient postal service to which the public is entitled and which they demand. The records of the Chattanooga office show that the following employees have left the service during the past year:

Supervisors, 2; regular clerks, 7; regular carriers, 4; temporary clerks, 28; temporary carriers, 21.

And at the present time there are three vacancies in the carrier force with no eligibles to fill them.

Inasmuch as the entire force of this office is less than 150 men, it will be seen that the "turn over" in the force during one year amounts to approximately 40 per cent of the entire roster.

We petition that you fix the salaries commensurate with the responsibilities we bear; salaries that will, in part at least, compensate us for the many years of arduous labors performed; salaries that will restore to us that fair standard of living to which we as employees of this great Government are entitled.

We believe that your honorable commission will carefully and conscientiously consider the facts presented to you at this and other hearings on this subject and that you will recommend the enactment of such legislation as will secure for us an equitable classification. We, therefore, leave our case in your hands and are willing to accept your verdict.

Respectfully submitted.

J. M. REED,
R. M. GEORGE,
B. K. REYNOLDS,
Special Committee.

BRIEF SUBMITTED BY MR. J. G. BOWMAN, FOREMAN OF CARRIERS, LITTLE ROCK, ARK.

In presenting my claim for salary increase and also change in official roster title, I desire to submit the following information for your kind consideration:

I am 39 years old, have been an employee in the Little Rock, Ark., post office for 14 years, have held a supervisory position for the last 9 years. Was foreman of mailing division 4 years, and 5 years in present position as foreman of carriers.

As foreman of carriers I have 88 employees under my direct supervision, viz, 60 city carriers, 8 rural carriers, 10 substitute carriers, and 10 special delivery messengers.

My duties are as follows: Direct supervision of the office work of all carriers, including those assigned to parcel delivery and collection work, also the supervision of street work of all carriers at main office and stations, lay out and adjust the delivery and collection districts, make inspection of carriers street work, count and weigh mail, check time cards, make daily time reports, inspection of rural routes, make rural carriers monthly reports, keep record of and report on condition of all delivery equipment, furnish estimate for quarterly allowances for delivery division, make semi-annual efficiency ratings, and supervision of special delivery messengers, etc.

Little Rock, Ark., is a city with a population of 95,000, with approximately 90,000 within the city delivery limits.

I have more employees under my supervision than anyone in our office with the exception of the superintendent of mails, and receive less salary than the assistant superintendent of mails and no more than clerks who have but 8 or 10 clerks to supervise, and it frequently happens that ordinary clerks by working overtime make more than the supervisory employee who receives the minimum salary.

My salary is \$1,800 per annum and I am unable to support my family and live in keeping with my position and meet my obligations promptly, notwithstanding the fact that neither myself nor family have spent anything for pleasure or recreation during the past year. I earned more than \$200 outside of my salary which was spent, together with my salary, for food clothing and actual necessities.

My roster title should be changed from foreman of carriers, to superintendent of delivery (as it formerly was), with an increase in salary commensurate with the responsibility and duties performed. An equitable salary in comparison with a similar position outside of the post office would be at least \$3,200.

BRIEF FIELD BY MR. GUY SMITHSON, KNOXVILLE, TENN.

The supervisors, clerks, and special clerks of the Knoxville, Tenn., post office respectfully submit their statement, asking an increase of pay.

With one exception, no clerk in our office has been able to live on his salary. Many of us have acted as special delivery messengers or work when off duty in a side line in an effort to make ends meet. The following incident illustrates how the one clerk in our office lived on his salary: His son got permission to spend the night with a boy friend, and was told to come home for breakfast; the boy said "No, I want to stay for breakfast and get some nourishing food; they have meat at every meal."

I do not believe the department wants us to live from hand to mouth, as we must do on our present salaries.

It is now necessary for our wives to do all the housework, even the family washing and ironing; and the wives of several clerks in addition to doing this hard work are compelled to take in sewing to supplement the clerk's salary.

Others of us have been compelled to seek cheaper houses or confine our families to a small number of rooms and rent a portion of our homes in an effort to increase our income and prevent a deficit. We are compelled to wear old clothes and shoes, which is not done by other people in our social rank, but who get more pay than we do.

At this point I wish to call your attention to the wage scale paid in this city: Electricians, 67½ cents per hour; carpenters, 50 to 65 cents per hour; laborers, 35 cents per hour; masons, 87½ cents per hour; plasterers, 75 cents per hour; plumbers, \$1 per hour. This scale prevails now, and a demand has been made for an increase by all classes of labor to take effect on March 1, next.

Although a much higher standard of mental ability is required of us than is required of the above mentioned class, they receive higher salaries than we do.

The average wage of the retail clerk in this city, whose qualifications are not so high as ours is, receives an average of \$175 per month. The executive in a retail store, whose duties require the ability of a supervisor or a special clerk, receives an average of between \$200 and \$225 per month.

I repeat, we can not live on our present salaries and, of course, can not save for that day which comes to all—old age and inability to earn.

From this statement, which is true of all localities, it must be seen that competent men and women will not seek employment in the Postal Service; and all now in the service adapted to any other pursuit will leave the service.

In view of these conditions I respectfully ask your committee to recommend an entrance salary of \$1,800, with a maximum of \$2,400 to be reached in three years; \$2,600 for special clerks and \$2,800 for supervisors.

This is asked because the purchasing power of the dollar is equal to 50 cents, and this condition, if history repeats itself, will exist for a period of five years following a war.

CITY LETTER CARRIERS.

STATEMENT OF MR. A. R. WILSON, KNOXVILLE, TENN.

Mr. WILSON. Gentlemen, I am reminded in thus being allowed to present our case before you of a Biblical story. There was a certain noted prisoner by the name of Paul kept in chains for some time and he had hearings before a great many different men and they did not know what to do with his case. We are in bondage to old H. C. of L., and Congress does not know what to do with our case, and so it was finally put up to Agrippa, and I can say with Paul, "Oh, King Agrippa, I count myself happy because I am this day allowed to present my case before you." Because I know you have an understanding of these things, gentlemen, we are happy that you men who understand these things have been designated to hear our case, and

so, in behalf of the letter carriers of Knoxville, Tenn., and in behalf of the letter carriers of the whole country I am happy to present my case before you. [Reading:]

The letter carriers of the Knoxville, Tenn., post office, respectfully submit the following statements as to conditions under the present salary law for post-office employees and their need for an increase in salary:

The carriers in this office served as substitutes for a period of from eight months to four years and three months, or an average of a little over two years, at an average salary of about \$35 per month. They then entered regular service at a salary of \$850 per year, and until 1907 \$850 was the highest salary received. After the present salary law was enacted in 1907 it required four years more of service, and in some cases six or seven years, to reach the maximum salary of \$1,200. This remained the highest amount received until last year when we received a \$200 bonus with an additional \$100 beginning with July of this year, thus just coming into a 25 per cent increase over the maximum of 1907.

In the meantime after working for these years at a salary which would barely support the average family without laying by anything for old age, the cost of living has more than doubled, thus placing us in a deplorable condition.

From statistics gathered in our own office we find the average family to number four, while the average amount which the \$1,400 received last year lacked of supporting these families is \$181, but these figures do not tell the story of the struggle in many cases to live within these bounds. They do not tell of houses decaying and furnishings depleted, or of mothers working beyond their strength to help out the family expense.

We also call your attention to the fact that the Bureau of Labor Statistics show that all other lines of labor have received an increase in wages of from 70 to 100 per cent while we have received only 25 per cent; and that in most lines of labor the men work in comparatively cheap overalls while we must furnish costly uniforms.

In view of these conditions, and the fact that we have fallen in arrears in so many things, we petition you to give favorable consideration to a plan to make the entrance salary for letter carriers \$1,800 per year with a maximum of \$2,400 to be reached in three years instead of five years, as under the present law.

We believe that under present conditions the average family can not live in comfort for less than this, and that it is no more, comparatively, than \$1,200 was in 1907, when the present salary law was passed.

Now, gentlemen, as I stated first, if you can just remedy this condition, and I have been told that my own case would represent the limit of expenses above salary, because I have a Rooseveltian family of nine children. My expenses last year were \$2,500, because I had a son 17 years old who had to go to the hospital, with the result that I had a bill for \$200. That deficit was made up only in part and by every member of my family working. I had two of my boys in the service of our country, sending their allowance back home; my little boys carry papers in the morning and every member of my family worked. My good wife worked beyond her strength.

These figures do not represent the struggles that are taking place in our homes. As the carriers tell me, "There are my children: I would like to give them music and can not do it." Here are carpets worn out and they can not be replaced. The figures represent only the actual things we must make up and do not represent conditions as they actually exist. The strain under which I am laboring is lowering my efficiency. I have been in the service 21 years. When I was getting \$850 I saved more money; I bought a little home and paid some on it, and for the last few years I couldn't any more than pay the interest. I am still owing some on that home. I can not meet expenses under the present conditions and with my salary. My wife hasn't had any vacation in all these years that we have been struggling to the point where she can get money enough to visit her relatives in another State. She can not do it. These things, gentlemen, we ask you to take into consideration.

STATEMENT OF MR. V. E. GREGORY, NASHVILLE, TENN.

Mr. GREGORY. Gentlemen, as my fellow carrier has already said, we appreciate very much the opportunity of coming before you to present our claims. We also believe you are fair-minded and will deal justly with our case, and, as another speaker has said, we feel confident that in your hands rests the destiny of all postal employees of the United States. I suppose they number more than 250,000 men and women, and if you take into consideration our families not less than a million people are concerned in these hearings, held from city to city.

Mr. BELL. How many postal employees did you say?

Mr. GREGORY. We represent 250,000.

Mr. STEENERSON. The department, I think, estimates there are something like 300,000.

Mr. BELL. Two hundred and seventy-five thousand, I believe.

Mr. GREGORY. And we feel that unless we can get relief we are very much like I heard a man say yesterday. He said we carried more here [indicating shoulders] than we do here [indicating head]. I didn't use to think that, but the longer I stay in the service and consider the conditions in the field of my labor, the more I think he is right. I remember a little couplet that went the rounds some years ago: "Monday hired, Tuesday tired, Wednesday fired." I think that should be amended now to go "Monday hired, Tuesday disgusted, Wednesday resigned." That is largely the condition that prevails in the post office at the present time.

The foreman of substitutes called us around him sometime ago and said, "We need men for substitutes. You know we need men in the service and there are a great many soldier boys coming back from France and they need jobs. Go out after these soldier boys and see if you can prevail upon them to take the civil-service examination and enter the service." We complied with his request. How many were approached I have no way of knowing; I know there were between 50 and 60 by the carriers in the main office. How many from the stations I do not know. Of the number approached, 17 took the examination for clerk and carrier. Four of them only appeared and took the examination for carrier. I approached one young man who was in the grocery business—a clerk in a grocery store. He is a bright, capable fellow, and I asked him to take the examination. He asked, "How much do they pay?" I told him they paid 60 cents an hour for substitutes. He wanted to know how many hours they worked and I told him. Then he said, "Well, if I go in as a substitute, how long will it be before I receive a regular position?" I told him 3½ or 4 years. He said, "That's a long time to wait. How much will I receive then?" I said, if we receive the bonus, you will get 57½ cents an hour, after you reach the maximum salary. He said, "That's less than the substitutes get." Then he wanted to know how long it would be before the maximum salary would be reached, and when I told him he said he didn't think he cared to take the examination. Since then he has been promoted from the position he then held to the manager of the store. He is a most intelligent young fellow, but no brighter than a number of our carriers. The State factory inspector's report shows living expenses have advanced 90 per cent, indicating that if we were entitled to \$1,200 per annum

10 years ago, we should receive \$2,300 now. Bradstreet's estimates living expenses have advanced 131 per cent. When you take into consideration that for the past 10 years the cost of existence has been gradually climbing, and for the past 3 or 4 years by leaps and bounds, it can be readily seen that we should be entitled to a salary of \$2,400 at least.

A further consideration, however, is the consideration of the matter of uniforms and other clothing that we are compelled to furnish. For instance, the bricklayer buys him a jumper and overalls and a hickory shirt and it costs him about \$7 or \$8, perhaps—possibly \$25 in all a year. A letter carrier, to maintain the department's regulations, must purchase at least two new uniforms each year at a cost of about \$75. The ordinary man can wear two pairs of shoes 12 months. A letter carrier must have four or five or six pairs of shoes, and shoes are not very cheap in these days. There is a pair of shoes that I have on that cost me \$10. I used to pay \$3.50. It is the same brand of shoes bought in the same shop. Five years ago they would have cost \$3.50 or \$4; now they cost \$10.

Then, again, he goes out in the hot sun and is soon perspiring until every shred of his shirtwaist and underclothing is wet. It is filthy and insanitary. He should have a change of clothing every day. There is an increase all along the line until the matter of clothing represents something like two hundred to maintain a man in his everyday working clothes. Then if he goes anywhere with his wife or happens to be a young man and aspires to matrimony or religiously inclined he must have an extra suit of clothes for Sundays and Wednesday nights, or even to go to the movies. He doesn't desire to be conspicuous and attract attention to himself and advertise the fact that is a letter carrier by wearing his uniform. It will then cost him in the neighborhood of two hundred and twenty-five to two hundred and fifty dollars a year to maintain decency and respect under governmental regulations.

This would indicate then that our salaries should be above twenty-four hundred dollars. For that reason, we maintain that we should have salaries of at least eighteen hundred, twenty-one hundred and twenty-four hundred dollars—not less than twenty-four hundred dollars. The majorities of us have families. These families must be supported in decency. I maintain I have the same right to educate my boy and my girls that any other man has, because we are Americans and believe in American principles and American ideals. There is not a Bolshevist among us, I am confident of it.

We believe also that there should be some method of promotions that is better than the present method. A man serves as a substitute for three and a half or four years. Then he goes back to, say, eight or nine hundred dollars, whatever the case may be, and then he must climb up again. We have a carrier in the Nashville office that has already served 10 years and has never reached the maximum yet. He has never been demoted, and has been regularly promoted each time according to the law. Then, when a man reaches the position of carrier, he is a carrier always. He is not allowed to hold a supervisory position at all without transfer. There is no promotions at the present time, and we are trusting that something will be done to remedy this. We believe it would be an incentive to a man to give more efficient work, and it would give wider range efficient in the service and with ability to select from.

(Mr. Gregory filed the following brief:)

BRIEF SUBMITTED BY MR. V. E. GREGORY, AND PREPARED BY HIMSELF AND W. T. EASTES, NASHVILLE, TENN.

The following brief is respectfully submitted by the committee of letter carriers from Nashville, Tenn., believing that it will receive at your hands fair and just consideration.

(1) INCREASED SALARIES.

We feel that the letter carriers employed by the United States Post-office Department should be adequately compensated for their labor. That such is not the case at the present is evident, and to show that this is true we have arranged an appendix to this brief, which shows that since the year 1913 living expenses have advanced 90 per cent to the year 1919. Previous to this, living expenses had been advancing so that during the past 10 years there has been an advance of approximately 120 per cent in the necessary commodities of life. This would indicate our salaries should be advanced to a salary ranging from \$1,800 to \$2,400 per annum.

In addition to the preceding, letter carriers are necessarily compelled to purchase each year an excess of clothing over any other workmen, to present a neat appearance :

	Approximate cost.
2 or more uniform suits.....	\$75. 00
4 pairs shoes.....	45. 00
2 umbrellas.....	4. 00
1 rain coat.....	16. 00
2 pairs overshoes.....	4. 00
1 pair leggings.....	2. 00
4 suits winter underwear.....	20. 00
6 suits summer underwear.....	15. 00
6 shirtwaists.....	12. 00
3 pairs gloves.....	6. 00
1 sweater.....	8. 00
1 cap.....	2. 00
1 hat.....	3. 00
10 pairs hose.....	5. 00
Total.....	197. 00

To this, if he goes anywhere other than to work, he must have at least of citizen's clothing.

Thus, it will be seen that he must expend at least \$200 per annum for his own clothing, which is an excess over what the average workman expends of more than \$100.

Therefore, we feel that we should be receiving a salary of no less than \$2,400 as a maximum salary.

(2) RETIREMENT MEASURE.

We feel especially anxious that a retirement measure be enacted that will give the Government ample protection from indigent workmen and also afford to letter carriers protection in old age; and as it is a fact that according to Government bureau statistics, no man with a family of five can live decently with less salary than \$2,262 per annum, this retirement measure should not tax the salaries of letter carriers in excess of 2 per cent.

(3) TRIAL BOARD.

We appeal to your honorable body for a trial board. We have too long suffered from unjust rulings, from unjust decisions, simply because the department is judge, jury, and the public and supervisors star witnesses against us. We are left no appeal and no alternative but to suffer if our case comes into the hands of an unfair man.

(4) LIMIT OF WEIGHT.

Large, heavy, and unwieldy parcels are being transmitted through the mails every day. We pray that no letter carrier be required to carry without a vehicle more than 40 pounds in residential territory and 50 pounds in business districts.

(5) MISCELLANEOUS.

We serve three and one-half years on an average as substitute, and work day and night whenever called.

It takes from three to four years after being appointed to regular duty to attain the maximum salary of \$1,200 per annum, together with temporary increases.

We work in sunshine and cloud, rain or snow, wind, mud, sleet, hail, heat, and cold, and anything in the way of weather from the zephyrs of spring to the bitter winds of winter. Hence an excess of clothing required and occupational diseases contracted.

We must meet the world with a smile and courteously represent the greatest Nation on earth, a thing hard to do when our families are in need.

We receive only 15 days' furlough and no sick leave. Other Government employees no more deserving than we are allowed sick leave and vacation time also.

We are allowed no promotion without being transferred to clerical positions. Our work unfits us for other callings, and if we are disabled or discharged we can not use the knowledge acquired in any other calling.

We pray for some system of promotion that will make it possible for a letter carrier to reach the maximum salary without serving 8 to 10 years as an apprentice and then if he shall properly apply himself, have still further promotion to supervisory positions. This, together with other reforms suggested herein, will, we believe, bring the service to a high state of efficiency, hitherto unattained.

Mounted carriers are receiving barely enough to maintain their equipment, and receive nothing for the investment of four to five hundred dollars and nothing for the depreciation in value of horse and wagon.

All carriers are engaged in other work to enable them to make enough to "get by," but they are thereby forced to work long hours.

The average increase per cent of other workers is 60 per cent. Letter carriers have received only 37½ per cent.

Our rest rooms or "swing rooms" are seldom well lighted or sanitary.

We walk from 10 to 15 miles per day and serve a constituency of from 1,000 to 4,000 people, a load on our backs weighing from 10 to 75 and 100 pounds, but unlimited.

We can not, if dissatisfied, engage in strikes, nor do we wish to.

STATEMENT OF MR. R. L. JONES, FORT SMITH, ARK.

Mr. JONES. Mr. Chairman and gentlemen of the commission, I represent the letter carriers of Fort Smith, and as the entrance salary is unattractive these days, we feel that we do not get the men that can efficiently handle the postal service. The standards of the examinations have been reduced and the men coming in under these standards refuse to stay. They find that the heavy loads imposed upon the carriers are too much and we ask this commission to remedy that.

Senator GAY. Are you short of letter carriers in Fort Smith?

Mr. JONES. Yes, sir. We are short. We can not get the help. Until just recently it was impossible to get them. At the present time we have only two subs and the carriers work overtime. We think that the loads that the department require us to carry are too heavy. We have carriers who go out with as high as 90 pounds on their shoulders. That is unjust. We feel that 40 pounds for the business district, with 25 or 35 for the residence district, is sufficient for a carrier to have to carry on his shoulders.

Senator GAY. What about the pay?

Mr. JONES. We feel that it should be \$1,800, \$2,100, and \$2,400, and we feel that the postal laws should be changed with regard to section 701, where the carrier is not allowed to become a supervisor, captain, foreman, or sergeant of the other carriers. We feel there is as good material in the carrier force as in any other force in the service. We think that is unjust and ask this commission to remedy that, if it is possible.

You all know the living conditions have increased and I don't need to take up your time with that phase of it.

STATEMENT OF JOHN WHITE, JR., MEMPHIS, TENN.

Mr. WHITE. Mr. Chairman, honorable members of the Joint Commission on Postal Salaries, and fellow employees, it gives me great pleasure to have the honor and privilege of appearing before this august body in behalf of adequate salaries for the employees in the Postal Service, and their readjustment and reclassification on an equal basis. I have been selected as one of the speakers in this section of country to represent the letter carriers of the Memphis post office, not because of my excellency of speech, or because I'm an orator, but because the boys believe I'm a real talking convert on this salary question and they have sent me here to convince and convert the other brethren.

We are proud to have you, honored gentlemen, in our midst and congratulate ourselves upon the fact that the men who form this commission are some of the most ardent and staunch friends of the letter carriers, and have never lost an opportunity to lend their support to measures vitally concerning us, and we hope, honored sirs, that after you shall have heard us on this question of increased pay, that you will not let us suffer any longer from inadequate compensation. I desire to say further, gentlemen, that we prize this opportunity to reason with you and to speak for ourselves. This surely is the first fruits of the President's order granting collective bargaining which is the best way to arrive at fair and square conclusions.

Again, gentlemen, we have not come up to this meeting as a band of socialists, whose cry is "Down with the rich." We have not come as a Bolsheviki organization whose motto is, "Let the poorer classes rule." Nor have we come as a gang of I. W. W.'s or "Reds" who spread consternation in their path and desire to reap where they have sown not, but we do come as faithful, patient, honest, patriotic, and law-abiding citizens and employees of this great Post Office Department of our Government.

We desire to say further that we have not come here to demand one thing from you gentlemen, but we have come to request your most earnest consideration of our plea for a fair living wage and the reclassification of our salaries on an equal basis.

The qualifications here in Memphis to be a postal employee are set at a very high standard. He must be physically, mentally, and morally O. K. No higher standard could be set for any body of men, be they bankers, lawyers, doctors, or business men. Therefore our requirements put us above the average laborer. We must also maintain a high rating of efficiency from year to year.

Upon an investigation made by the Department of Labor, April 1, 1919, it was found that the cost of living for the six-year period, March, 1913, to March, 1919, has increased 100 per cent. It is therefore apparent that the rate of pay for postal employees was fixed under economic conditions that have long since been swept away, and there is absolutely no evidence at our command, that normal conditions as we knew them in 1913 will ever again prevail. We are living in a new era. Everything is changed. Congress granted us a temporary increase of 25 per cent to offset the cost of living many times greater. Later we received another temporary flat increase of \$150 for the present fiscal year, which helped a little, but by no means meets our needs. A dollar now is the cheapest thing on the market.

It requires twice as many dollars to buy now what one could buy in 1913 in Memphis, and at the same time the wages of employees of private industries have been increased accordingly, thereby causing our efficient men to seek higher salaries in other fields of labor. Right here in the Memphis post office some of the best and most efficient post office men to be found in the country have resigned because of poor and inadequate pay, and the sad fact about it now, gentlemen, is that the families of those who remain are living at a poor dying rate. There was a ballad on the town about six years ago, whose refrain was, "The High Cost of Living is Driving Me Mad," but, gentlemen, that time has long since changed and we are realizing daily every time we go to purchase something, that the high cost of living is driving the letter carrier mad. So it is plain, gentlemen, that being underfed we can not maintain our physical requirements and it mars our tranquillity, for who could be pleasant when hungry, or all smiles when their clothes are tattered and torn, and inadequate pay is compelled to affect the weaker man morally.

Why, unskilled labor is grinning at us, to say nothing of skilled labor and mechanics. Porters in cotton offices in Memphis get \$1,600 per year, 60 days' vacation on pay, no uniform to buy, no doctor's bill and no bond to give. A train porter, which is a mere flunky job, gets \$1,900 per year right here in Memphis, and is on the road about half the time, and had the nerve to congratulate me with a big horse grin when we received the \$150 per year flat increase.

Men right here in Memphis who have jobs that require no mental efficiency and half naked while working, are getting from 45 to 60 cents per hour. While our uniforms cost twice as much as they used to. Summer trousers formerly cost in 1913, \$3.40; now cost \$10.50. Winter uniforms formerly cost \$25; now cost \$45 and \$50. Shoes formerly cost \$3.50 per pair; cost \$10. Again, gentlemen, we are not asking so much for a readjustment and reclassification of our salaries on an equal basis because the other fellow is drawing more pay than we, but because the profiteers, if you please, are no respectors of persons, and in Memphis we, as postal employees, are up against increased house rent and property values, increased provision and fuel bills, increased clothes and shoe bills, increased insurance and street car fares, increased doctor and drug bills, increased laundry and lodge bills, increased admission to everything and even increased undertaker bills, increased church and charity contributions, and everything is still on the increase except drinking water.

Still we have struggled to meet these abnormal conditions without success. We shall never be able to come out from under the shadow of debt unless you, gentlemen, sympathize with us and recommend to Congress a fair living wage for us that we may live and also lay aside something for a rainy day. The savings banks don't know I'm in town, and it looks dark and dreary for the future. Our men in the Memphis office who have large families have to resort to outside work to keep up. We have some carriers now taking the United States census, while we talk in an attempt to convince you gentlemen that we need a readjustment and reclassification of our salaries on an equal basis. I haven't bought a suit of civilian clothes or a pair of dress shoes since they went up, and that was several years ago; am nearly threadbare and barefooted. If you gentlemen could have seen some of our summer uniforms you would have thought we were

knights of the road instead of postal employees of the great Post Office Department of our Government. I was embarrassed not so much by my uniform as I was by my salary. If my salary had been sufficient, I could have purchased a new one.

We, as postmen, are dealing with men's families and coming in contact with the public as no other set of men do, and we ought to be able from the salary point of view to look our best, feel our best, and act our best.

In conclusion, gentlemen, I have attempted to show you—

1. That the post-office service is deteriorating in Memphis because of the best men dropping out on account of not receiving a living wage.

2. That those of us who remain can not maintain that high standard of efficiency set for us.

3. That we can not recruit new employees because they can do better otherwise.

4. That we desire to have something for a rainy day after spending our lives in the service.

5. That we are thankful and appreciate the temporary relief which helped us some.

6. That it requires twice as much money to live now as it did in 1913, and we respectfully ask that you gentlemen consider our appeal worthy of your recommendation to Congress for a reclassification of all letter carriers' salaries on the following basis: Entrance grade, \$1,800; second grade, \$2,100; third grade, \$2,400.

I thank you heartily for your patience and attention to my remarks.

SUBSTITUTE LETTER CARRIERS.

BRIEF FILED BY CARL M. M'KNIGHT, SUBSTITUTE NO. 213, MEMPHIS, TENN.

It is with profound regret that I can not be with you in person this morning, since I am to represent the substitute carriers of the Memphis post office, but as I can not be with you, I thought to reduce my saying to writing, which I hope will meet your approval.

We are justly proud of this Commonwealth of ours, since it is the greatest on the face of the earth, and we are willing to do all in our power to uphold the Stars and Stripes, and we know of no better medium through which we can demonstrate our loyalty than the civil service, as in it we serve both the Government and the public.

But we are sorry to say that the present rate of pay is absolutely inadequate with which to meet the present-day demands, and as a representative of substitute carriers of the above-mentioned post office we desire to mention a few facts as follows:

1. When we first enter the civil service, we are required to provide ourselves with uniforms as per the regulations, be the season summer or winter, and since there are no provisions made for them otherwise, we must pay for them out of our earnings, which are often very meager.

2. We are greatly embarrassed when we are unable to pay for the uniforms, due to not having worked very much at times.

3. The cost of living is so high, brought about as a result of the recently closed war.

4. It costs us substitutes as much to live as it does the man that is on a regular salary.

5. We are required to report at the office every morning whether we work or not, which means that we must pay our own car fare.

6. Quite a number of us are married and some of us have large families and are unable to properly provide for them because of the conditions with which we are confronted.

Now, gentlemen, may I say that in view of the above-mentioned facts, and when we realize that the purchasing power of the dollar is just one-half what it was a few years ago, we can not see in it a living for us at the present rate of pay. We are truly grateful to the commission for having given us the 50 per cent raise, but when we consider that we average about \$50 per month (there being about twenty substitute

carriers in the Memphis post office), you can readily see that the present rate of pay is entirely inadequate.

Because of the above-mentioned facts, several of the substitute carriers have resigned from the above-mentioned office within the past few months, and unless something is done along the line of better pay there will, in all probability, be several more resignations within the next few months.

We hope not to become "obnoxious", nor to be seen in a bad light; we only wish the commission to see us as we really are, and we hope we are not asking too much when we ask that the substitute carriers be paid more, as in so doing it will have a tendency to raise the standard of efficiency and proficiency in the Postal Service.

Finally, may I say, that when we consider the scarcity of work during the dull season, and that coupled with the low rate of pay that we are receiving, we are often to undergo quite an embarrassment with our creditors, as we sometimes have to go to them and ask for an extension of time, which is not so easy to do at all times.

Senator GAY. There will be a recess until 2 o'clock.

AFTER RECESS.

STATEMENT OF MR. W. S. McKINSTRY, NASHVILLE, TENN.

CLERKS IN FIRST AND SECOND CLASS POST OFFICES.

Mr. McKINSTRY. Gentlemen, so many different phases of the subject has been covered that I thought I would go into conditions that exist in the service; conditions that govern the men engaged in the work.

Senator MOSES. May I suggest to you and all the other gentlemen who speak this afternoon that from the time the commission held its initial hearing in New York City down to to-day we have been fed up with the high cost of living and the conditions under which the work is performed. We know that clothes and house rents and doctors' bills are expensive. We know that in many of the post offices, probably all, there is an insufficient force and that they work under very bad sanitary and industrial conditions. Now, in the closing days of these hearings, we would like to get some practical suggestions from the men other than that of an increase in pay. If there are conditions in the service which might be remedied by promotions or a different organization of the groups you represent—and I say that with reference to all organizations—we would like to have some practical suggestions along those lines. I know how expensive flour is, because I buy it myself, and I know how expensive shoes are, because I wear shoes, but what we would like to hear are some practical suggestions with reference to a reorganization of the service, so that both the service and the men may be benefited.

Mr. McKINSTRY. That is what I was going to attempt to give you.

Senator MOSES. I beg your pardon.

Mr. McKINSTRY. This is a paper that was compiled from a special questionnaire sent out to the clerks in the Nashville post office, in which we endeavored to get at this from a different angle. We tried to keep up with your other hearings and hoped that we would be able to put the matter before you according to your apparent desires. For instance, we found out that 40 per cent of all the hours worked by post-office clerks were after 6 p. m. and before 6 a. m.

Senator MOSES. We have heard that before.

Mr. McKINSTRY. Did you hear that 62 per cent of the tours were all or partially night work?

Senator MOSES. Yes.

Mr. McKINSTRY. That 50 per cent of the clerks complain that younger men in the service are holding preferential positions over them?

Senator MOSES. We haven't heard that.

Mr. McKINSTRY. That is one of the questions on the questionnaire sent out. Fifty per cent of the men claim that younger men in the service are holding preferential positions over them; that four years is the average length of time served at night work before getting day-work; that 75 per cent of the clerks declare they wouldn't stay in the service on night work for an indefinite period. Some of them propose remedies along that line. I believe that is what you had in mind.

I got these questionnaires in and reduced them to a percentage basis, and 50 per cent of the men believe that if only first-class mail were worked between these hours of 6 p. m. and 6 a. m. that this question of night work would be relieved. Fifteen per cent believe in a 15-minute differential and think that if that were allowed it would correct it. Eight per cent believe that the public cooperating, by early mailing, would be a corrective measure, and 19 per cent failed to answer that question.

Fifty-three per cent of the clerks state that overtime is a burden. The average overtime put in by the clerks per month was about 20 hours apiece. Some worked very much overtime and some none at all, but the average was about 20 hours a month. Now, they offer these remedies. Ten per cent believe higher salaries will correct it; 25 per cent believe in time and a half time for overtime; 43 per cent believe that more regular clerks, additions to the service, would correct it; and 22 per cent failed to answer the question.

Now as to the question of scheme study, they claim on an average they put in 156 hours a year on scheme study. Fifty per cent of the clerks declared that their scheme study allotment was more than necessary, and they ask that they be paid, given time off, or in some other way be allowed 175 hours for scheme study.

Senator MOSES. Yet the average reported was only 156 hours.

Mr. McKINSTRY. They wanted to raise it a little so that it would not be so hard on them.

Now, 55 per cent of the clerks in that office are holding outside positions to supplement their insufficient wage; they are engaged in different branches of business—55 per cent of the clerks are engaged in outside work. They are engaged in gardening, dairying, farming, newspaper work, salesmen, theatrical employees, real estate, civil engineering, law, physicians, dentists, the ice business, teaching, motor-vehicle business, and stenographers. That is the way they have answered that question.

Of course you are interested in the number of men leaving the service and things of that kind. We have 104 clerks in that office, and in the last two years and a half 26, or 25 per cent, have resigned. I get figures from the Little Rock office to the effect that as high as 44 per cent have resigned. It runs higher with substitutes. They resign quicker and more often than the regular men. Then the temporary substitutes are just coming and going all the time, which you are familiar with. The average time served by the substitute clerks was seven years and three months from initial day to time he

reached maximum salary in the Nashville office, according to the records of the last two years. The frequency of examinations is every three months. A great many decline the positions after taking the examinations, and it is said by the officials that the men taking the examinations are not thought to be up to the required standard. as we had in the past.

With regard to the substitute clerks, we in Nashville and this particular section of the country are of the opinion that substituting should be limited to a period not to exceed one year, and that they be paid not less than 70 cents per hour, with a guaranty of a hundred dollars a month, and that after one year's service as a substitute that they should become a regular appointee at the initial salary.

We are also of the opinion that in the assignment of clerks to the preferred positions, the day positions, which the post-office clerks think a great deal of—positions without scheme study, and day work—positions in the money-order division, in the registry division, or any of the preferential positions to those involving scheme study and night hours, that the senior clerk should be given preference, and that promotions to the supervisory positions should be made from the senior men. If this plan is carried out and faithfully executed, it will result in great benefit to the service, and will give every man an incentive to better himself. There will be some mistakes, of course, but this plan will lessen the faults found in the present method of making promotions. Of course, it will be understood that any clerk retains the right to waive any promotion offered him.

Senator MOSES. You wouldn't make seniority the inflexible rule, would you? If the senior man was not efficient you wouldn't necessarily promote him.

Mr. McKINSTRY. I would. That is our idea about it. Put it up to him and give him a trial, and if he don't make good, give the next man a chance.

Senator MOSES. You spoke about the younger men in the service getting the preferential positions. How is that brought about?

Mr. McKINSTRY. I have always noticed in the Nashville office, to be frank with you, that when the Republicans were in power those of that political persuasion had the better positions or the opportunity to get them, and that when the Democrats were in power the promotions went to them. [Applause.]

Mr. STEENERSON. Is that still true?

Mr. McKINSTRY. It has always been true.

Senator MOSES. Then this field is wholly bipartisan?

Mr. McKINSTRY. No. No; we have some fellows there and we can not tell just whether they are Republicans or Democrats. They seem to be on top all the time.

Mr. STEENERSON. They can change as quickly as the party; is that it?

Mr. McKINSTRY. Election night they are on the side that wins.

I would like to say a word about scheme study. Scheme study has always been an unpleasant but necessary burden on the distributing clerks. We understand that we have to study these schemes. It is part of the business. In many offices men are required to study schemes in excess of the actual requirements just to please some overexacting supervisory official. Every once in a while

you will find one of these officials, and I don't care what your rules are, some of these supervisory officials make them study more schemes than is necessary. In some places a supervisory official will pick out a fellow he don't like; maybe he is a Democrat or a Republican, or it may be for some other or personal reason. He will go down the line and put more study on him. He will single him out. Such cases have been known. For that reason, we would like to have some limitation placed on scheme study, to protect those men. To protect those men a limit of 2,000 names or offices should be fixed by law as the maximum required. This is just an opinion from the Nashville post office that we put up to you for what it is worth.

Now, as to efficiency ratings. You know, the efficiency rating at Nashville—there is no sense to the thing. Absolutely no sense to the thing at all. [Applause.] It is a system by which you start out at the first of the year and you are granted 100 per cent, and from that time on for everything that goes wrong with you, no matter what it is, in your work, you get demerits for it, and that cuts your 100 per cent down continually until the finish of the fiscal year you do not know where you are going to come out. If you are fortunate, you may get enough to get your promotion, but if you are unfortunate—the man that does the real work, has the most responsibility stands the biggest chance to get the demerits. It is like playing baseball—the man taking the most chances will make the most errors, but, unlike baseball, you do not have a chance to overcome those errors by making good plays.

Once your efficiency is impaired, you never have a chance to come up. That is what we object to. We don't care if you tax us with what goes wrong in the service if you will only give us a chance to come back and overcome them. The inauguration of a system that will allow a clerk to redeem his record once it has been impaired, will serve as an incentive for a clerk to make good.

Senator MOSES. Have you any suggestions as to how the efficiency record should be kept; whether there should be a separate board from the employees of the office?

Mr. McKINSTRY. No, sir; I hadn't thought of that. I don't suppose that could possibly be inaugurated. It is carried on by the supervisory officials. I do not see how there could be a separate board.

Mr. STEENERSON. You could frame new rules whereby the supervisory officials could make more perfect ratings.

Mr. McKINSTRY. I would like to have rules whereby we could have a fair trial. Let us get on a basis where the fact that the Republicans are in and the Democrats out, or vice versa, will have no effect on the men and their promotions. It happens on both sides. What we want to do is to give the fellows an opportunity for defense by a fair, outside board—a court of appeals on the outside.

Mr. STEENERSON. That is really a distinct proposition from the rules and methods by which efficiency is determined. I understand the present procedure is ineffective. Well, then, what procedure would you suggest?

Mr. McKINSTRY. I have nothing to suggest, except that we don't care how much you tax us if you give us a chance, by perfect and meritorious work to get merits as well as demerits.

Mr. STEENERSON. In other words, you want a rule of procedure that would reward you or give you a credit mark for something well

done, and under the present system there is only black marks all the time. They give you 100 per cent, and you have a whole year in which to wipe that out.

Mr. McKINSTRY. Yes, sir; for instance, a man that is regular in attendance should get several good marks for that. A fellow that is punctual in getting up his examinations—for instance, suppose I am to be ready on a certain day, if I am ready a week before, give me a couple of good marks to help overcome the demerits.

Mr. STEENERSON. The system in effect now is simply a system of penalties.

Mr. McKINSTRY. Yes, sir.

Mr. STEENERSON. It reminds me of the complaints of the farmers with reference to the grading of wheat; there were 96 ways of degrading it, and no ways of getting it up.

Mr. McKINSTRY. I would like to say a word about sick leave, if you are interested.

Senator GAY. We are interested in all the subjects that pertain to the service.

Mr. McKINSTRY. I would say that many of the employees in the departments at Washington are favored with a 30-day sick leave, but if you will just start in by giving us 15 days sick leave for the actual days we are sick, where we can prove it by a physician's certificate, I think the boys will be satisfied for a while, and then, after awhile, of course, we would like 30 days the same as those fellows in Washington, but I think we would be reconciled to 15 days, if we can get it, for a starter.

Mr. STEENERSON. Well, do you expect to get that whether you are sick or not?

Mr. McKINSTRY. No, sir.

Mr. STEENERSON. Those clerks at Washington don't get it unless they are sick.

Mr. McKINSTRY. We personally do not expect sick leave unless we are sick.

Mr. BELL. Sometimes they do in Washington.

Mr. McKINSTRY. We think we ought to get it.

Mr. STEENERSON. I would not be in favor of taking that as a precedent; granting sick leaves to people who are well. I don't think that would be right.

Mr. McKINSTRY. Of course, we are going to be honest about it.

Mr. STEENERSON. You are advocating genuine sick leaves?

Mr. McKINSTRY. Yes, sir.

Mr. STEENERSON. Not fictitious sick leaves?

Mr. McKINSTRY. No, sir.

Now, with regard to night work. About 70 per cent of the clerks are required to work all or part of their tour of duty during the night hours. Night work is injurious, unpleasant, and a detriment to the health.

With regard to retirement. The Postal Service is not different from any other concern that employs men to labor and who grow old in their service. At this time all progressive corporations, firms, and manufacturing establishments of the magnitude of our Postal Service has seen the wisdom of retiring their old men, not only because it is an act of justice to those faithful old employees but it has been proven to be a matter of economy. The old men in the Postal

Service deserve this just consideration, and a little research work and comparative data on this subject will prove to the Government that it not altogether is an act of charity but a fair and just retirement measure, such as we find in the Lehlbach bill will prove a profitable investment.

Senator GAY. Mr. McKinstry, your time has about expired. There are some other men here to be heard.

Mr. McKINSTRY. I would like to say one word about fumigation of sacks; not only sacks but pouches and other equipment, which is never cleaned from the day it enters the service until it is taken out, and when you take into consideration that we are hauling parcel post and trying to put into effect this farm to the table movement, and you take into consideration that these sacks and pouches lay around the terminals and everybody spits on them, and that they are dragged along the ground, being too heavy to be lifted when heavy laden, you can easily see how they will become filthy and decidedly insanitary. We recommend that they be fumigated and laundered from time to time, which will be easy enough to accomplish in the basements of the large post offices scattered all over the country.

Senator GAY. That is a very valuable suggestion.

(Mr. McKinstry submitted the following brief:)

BRIEF FILED BY MR. W. S. M'KINSTRY.

We, the post office clerks of Nashville, Tenn., in answer to your honorable body's request to appear before you with oral and written statements, do hereby file with you this brief on the subjects of inadequate salary and unjust working conditions affecting post-office clerks.

Examinations.—All applicants for the position of post office clerk are required to take an open competitive examination from which the eligible register for appointments are made up according to percentage.

Appointments.—Appointments are made in rotation to the position of substitute. Substitutes are paid at the rate of 60 cents per hour for the actual time they are employed. Their average pay is about \$90 per month and their average time served as a substitute is about three years.

Regular position.—After receiving a regular position at the lowest salary they start on a five-year tour before they reach the maximum salary, making an average service of eight years from his entrance in the service as a substitute until he reaches the maximum salary.

Increased cost of living.—During the last six years the cost of living has increased 90 per cent on the average, and 140 per cent in the necessities. During these same six years the post-office clerk's salary has only increased 37½ per cent and it will take at least an additional 50 per cent to overcome this great difference in increased cost of living and help us to pay the burden of debt that rests on our shoulders as shown in exhibit attached hereto.

Impaired efficiency.—Present salaries and conditions are a barrier to the competent young men from which our ranks were recruited in the past. In our desperate efforts to move the mails we are now working the school boys and old men and industrial cast-offs.

Young men leaving the service.—Competent young men not only refuse to be recruited but that same type within the service is being lured away by the sugar plums of better salaries offered by the industrial world.

Salary.—There is but one way to overcome this crisis and that is for the Government to meet the salaries offered by the industrial world and induce competent young men to enter the service. Just what that salary should be, we may not agree, but a careful analysis of salary tables from different cities throughout the country, covering all classes of man who labor both physically and mentally, have caused us to suggest a minimum salary of \$1,800 and a maximum salary of \$2,400 per year. Promotions every six months, in multiples of \$200.

Substitutes.—That substitute service be limited to a period not to exceed one year; that substitutes be paid at the rate of 70 cents per hour, with a guarantee of not less than \$100 per month, and that after one year the substitute automatically becomes a regular appointee at the initial salary.

Seniority.—That in the appointment of clerks to preferred positions, viz, day work, positions without scheme study, stations, money order, registry division, or any preferable position to that of scheme study and night hours, that the senior clerk be given the choice, and promotions to supervisory positions be made from the oldest clerk in the maximum grade, and let seniority prevail throughout the supervisory position to the highest place. If this plan is carried out in detail and faithfully executed it will be a guarantee of satisfied employees and an efficient supervisory force. There will be some mistakes made, but this plan will lessen the evil as practiced in making promotions at the present time, granting the clerks the right to waive promotion.

Scheme study.—Scheme study has always been an unpleasant, but a necessary burden on distributing clerks. In many post offices men are required to study schemes in excess of actual requirements just to please some over-exacting supervisory official. To protect these clerks, a limit of 2,000 names should be fixed by law as the maximum requirement in the official life of that clerk, but where by consent of both clerk and supervisory official concerned, and it becomes necessary for good of the service to learn more names or facts, that said clerk be paid a bonus of 25 cents per name for every one learned over the original 2,000.

Efficiency rating.—A uniform, just, equitable, and common-sense efficiency rating would do much to bring about a better understanding between clerk and official, the present system is absolutely without merit, produces friction, and does not promote efficiency, but to the contrary I fear it is a morale destroyer. It is in part a system of punishment, absolutely offering no reward for meritorious service and this point alone would destroy the effectiveness, even if it were otherwise without fault. The inauguration of a system that will allow a clerk to redeem his record once it has been impaired will serve as an incentive for a clerk to make good.

Sick leave.—Many employees of the Government are favored with a sick leave. The post-office clerk, too, is deserving in this respect, and we ask your earnest consideration for a 15-day annual sick leave for post office clerks.

Night work.—About 70 per cent of all post office clerks are required to work a whole or part of their tours of duty during the night hours. Night work is difficult, unpleasant, and injurious to ones health, therefore we ask your honorable body to consider in your deliberation of our case a 15-minute differential for each hour for those who are required to work between the hours of 6 p. m. and 6 a. m.

Retirement.—The Postal Service is not different from any other concern that employs men to labor, and who grow old in their service. At this time all progressive corporations, firms, and manufacturing establishments of the magnitude of our Postal Service has seen the wisdom of retiring their old men, not only because it is an act of justice to those faithful old employees, but it has been proven to be a matter of economy. The old men in the Postal Service deserve this just consideration, and a little research work and comparative data on this subject will prove to the Government that it not altogether is not an act of charity, but a fair and just retirement measure, such as we find in the Lehlbach bill, will prove a profitable investment.

Fumigation.—Sacks, pouches, and other equipment used in conveying the mail is never cleaned from the day it enters the service until it is discarded. The magnitude of the filth gathered by the canvas conveyers as they are dragged over ground, on trains, in post offices, can only be comprehended by the clerk whose duty it is to handle them. This equipment should be fumigated and laundered at certain intervals to prevent them from spreading disease among the clerks and other men whose duty it is to handle them.

Occupational diseases.—The above condition is one of the causes of one of the occupational diseases prevalent among post-office clerks—tuberculosis. This disease is also caused by insanitary floors, cuspidors, and poorly ventilated offices. Almost all clerks are affected with impaired eyesight caused by night work, excessive scheme study, and continual reading in execution of their duties.

Varicose veins.—Varicose veins and fallen arches of the feet are occupational diseases that are the results of long hours of standing before a letter case or paper rack. The use of stools will help to overcome this malady, and if a policy is adopted working nothing but first-class mail after 6 p. m., thereby lessening the night work, it will be beneficial to the men's eyes as a whole, because it is easier to perform the work of a clerk by light of day than by an electric light.

Overtime.—One of the hardest burdens placed on the post-office clerk of late years is overtime. It has at times, because of the inadequate salaries, been a blessing, because of the opportunity to earn extra money to help keep body and soul together. When your honorable body fixes an equitable and livable salary, you should also take steps to limit the excessive overtime now required of the rank and file, and let this work fall to the substitute, who is calling for it, and to whom it justly belongs, but it is being denied him.

Time and one-half for overtime.—When it does become necessary for the regular clerk to put in time in excess of his regular eight-hour tour, he should be paid at the rate of time and one-half for all such overtime.

Double time for Sunday work.—No work should be performed on Sundays and legal holidays except that which is for service absolutely necessary, and the clerk performing such work should be compelled to take time off some day during the following six days for all time under eight hours, and be paid at the double rate of his salary for all time in excess of eight hours.

Women.—Women should be on an equal footing with the men in the service, and under the right of seniority be considered for all promotions, even to that of the highest paid supervisor.

Stenographers.—Stenographers in the post-office service should receive the same rate of pay as clerks. To this end we invite your kind consideration:

Supervisors.....	28
Clerks (regular).....	104
Substitute clerks (civil service).....	26
Temporary substitute clerks.....	18
Resignations since July, 1917, regular clerks.....	25
Resignations since July, 1917, regular sub clerks.....	36
Resignations since July, 1917, temporary sub clerks.....	41

Average time they remain in service, 7 months and 3 days; frequency of examination, about every three months; great many decline position after they have stood the examination. Quality of men taking examinations are not thought to be up to the required standard.

Some facts gathered through the instrument of a questionnaire about employees and conditions in the Nashville, Tenn., post office:

Forty per cent of all hours worked by clerks is after 6 p. m and before 6 a. m; 62 per cent of all clerks' hours is all or partial night hours; 50 per cent of all clerks complain that younger men in the service are holding preferential positions over them; four years is the average served on night work before getting day work; 4½ per cent is the average of men being promoted over men now holding positions not classed as preferential; 75 per cent of the clerks declare they would not stay in the service on night duty for an indefinite period.

Remedies to cut down night work, in opinion of clerks, are offered in the following table:

Fifty per cent believe that only first-class mail should be worked after 6 p. m.; 15 per cent believe that a 15-minute differential in night hours would be effective; 5 per cent believe that time and one-half for night work would be the proper remedy; 8 per cent believe that the public cooperating by early mailing would be a corrective measure; 19 per cent failed to express an opinion; 53 per cent of the clerks state that the overtime is a burden; 20 hours is the average overtime per month in the opinion of the clerks.

The following remedies are offered as corrective measures of the overtime evil:

Ten per cent believe that higher salaries will correct; 25 per cent believe time and one-half for overtime will correct; 43 per cent believe that more regular clerks will correct; 22 per cent failed to express an opinion; 156 hours per year on scheme study was the average time declared devoted to that duty; 50 per cent of the clerks declared their scheme study allotment was more than necessary; 175 hours per year was the average opinion of number of hours that should be granted clerks engaged in scheme study; 55 per cent of all clerks hold outside employment to supplement their insufficient wage, engaging in the following different branches of business: Gardening, farming, dairying, chickens, newspapers, bookkeeping, salesmen, theatrical, real estate, civil engineering, boarding house, law, dentist, physician, preaching, ice, teaching, automobile, motor cycle, stenography.

It is important to bear in mind the fact that post-office clerks can not properly be compared with the ordinary clerk in other business, with few exceptions. To be specific, money order, registry, station and postal savings clerks and distributors, which takes in most of the average post-office clerks, are specialists in their particular line, and this training which they acquire and the constant study of mail schemes and schedules, the knowledge of foreign exchange and the conversion of money and with like financial responsibilities required of them in order to qualify for their respective positions, should be paid for as in other special lines, particularly the skilled trades who are paid by private employers for the training which it is necessary for them to possess in order that they may qualify as members of any particular line of occupation. Unlike men in the skilled trades and professions requiring experience, study, and special training, the postal employees can not use to advantage the experi-

ence and knowledge gained in the Government service. If for any reason he should become separated from that service, we know of no other trade or profession where an employee is required to regularly take periodically mental examinations of subject studies and details in connection with routine work and maintain a grade above an average of 95 per cent in order to secure and guarantee his salary grade position and employment.

Our classification laws passed 13 years ago, when economic and industrial conditions were wholly different from to-day, provide an entirely unscientific and inequitable scheme of compensation.

The post-office clerks of this country have been patient with time that seems to pass so slowly, hoping to arrive at a day when your honorable body will announce its program to Congress, with the faith of little children in your honesty of purpose, your ability to analyze our case, and the statesmanship to apply a fair and equitable remedy for our numerous ills, especially a salary commensurate with the cost of living at the present time, we pass our case to the jury.

STATEMENT OF MR. J. J. WELSH, MEMPHIS, TENN.

Mr. WELSH. Gentlemen of the commission, I first want to say that the investigation and testimony have taken a somewhat different turn from the way I anticipated, and I had some remarks mapped out that now wouldn't fit in, perhaps.

Senator GAY. You may make your statement in your own way, Mr. Welsh.

Mr. WELSH. May I ask Senator Moses, then, if he is convinced that we should have more money? If I mistake not, it was he who suggested to a previous speaker the airing of some of our other needs.

Senator MOSES. I thought my action on the emergency legislation would show my position with reference to postal salaries. [Applause.] Of course, I can take the oath of allegiance again, if you think it is necessary. [Applause.]

Mr. WELSH. I do not, Senator, and I must say that was my blunder, because I should have known our friends better, but I should like to know if you are convinced that the service has deteriorated because of the department's not being able to get good clerks due to the poor salaries. If so convinced, my prepared talk along such lines would be superfluous. Is it the sense of the commission that that is the case?

Mr. STEENERSON. We are not authorized to speak for the commission. You will have to make your speech in your own way without trying to get the commission to commit itself.

Mr. WELSH. I have here a brief on the seniority system, which I can file, if you have any other questions to ask me.

Senator GAY. I would suggest that you file whatever papers you wish to file and just make your statement in your own way, because the time is limited.

Mr. WELSH. Well, my statement would simply be a résumé of the brief.

Senator GAY. Well, then, you might file the brief, because the time is so short that we might bring out some other points from the other witnesses.

Mr. WELSH. Do you wish to ask anything about the efficiency rating system employed in the Memphis office?

Mr. STEENERSON. Yes. Tell us all you know about it.

Mr. WELSH. Well, I would say that in this office the system employed does not meet with the approval of the men.

Mr. STEENERSON. What is the matter with it?

Mr. WELSH. You see we have no uniform departmental rating system and, in the absence of such a rating system, the local superintendents of mails may devise their own, which in their opinions are all right. We clerks in this office feel that the one in force here is not one that is suitable from the standpoint of real justice. Under the Memphis system, absolute justice could not be done a man, no matter how square the supervisors would care to be.

Mr. STEENERSON. You can state the substance of your ideas without reading it.

Mr. WELSH. I should like to get a memorandum that I seem to have mislaid. I did not expect to touch on this needed reform. I had these papers here to show to one of our members who had written me about the Memphis efficiency system, he having meant to take up such matters with you. He is, unfortunately, not here.

Mr. STEENERSON. I think you can make it just as plain by telling it from memory.

Mr. WELSH. I will, while incidentally giving as a typical instance my own particular experience. I kicked, as the term goes, one time to our superintendent for giving me what I deemed to be an insufficient rating average. He then asked me to propose to him a rating system which in my judgment was good and I did so, unprofitably. I can show, too, that there is, due to the general absence of a trial board, no guaranty that a man is going to get a square deal in any irregularity or misdemeanor of which he is suspected or charged with in an office, and that penalization generally is left to the absolute will of some supervisor, who often clothes himself with plenary power.

Senator GAY. You may file your paper, Mr. Welsh.

Mr. WELSH. This is some personal correspondence between the postmaster, the superintendent of mails, and myself, and it is rather unwieldy to be filed as a brief.

Mr. STEENERSON. It had better not be filed, if it is not to the point.

(NOTE.—Copies of the correspondence referred to are on file with the commission.)

Mr. WELSH. Maybe I can give a comprehensive idea from this. This will show how arbitrary a superintendent can be, or the one who has the inflicting of demerits on a "culprit," so-called. I was reported and, of course, such could happen to any man—but I am intimate with my own case, and am only citing it because a specific example is best. I was reported by the superintendent of the De Soto station for talking to a resigned substitute clerk—saying good-bye to me—and these reports are generally couched in such language that we have to be very wary lest we commit ourselves in answering. Here is the report of the superintendent of the De Soto station. It is directed to me. He says:

On this date, at 10.05 a. m., substitute clerk Basham visited you while you were at work preparing slips and the two of you engaged in conversation for quite a long period. In fact, a 30-minute conversation was carried on. The writer personally observed the extent of the conversation and allowed same to continue to ascertain, for my own satisfaction, just how long same would continue. After 30 minutes, as above stated, had been consumed, during which time you continued to fold slips, as well as engage in conversation, I decided it was time to call a halt, and walked over to remind you both that the conversation had been carried on a sufficient length of time. No doubt you can readily see that the method of rating clerks on habits of weight—

I will interrupt myself here to state that I had just had, the day before, a talk with our supervisors on account of what seemed to me to be a poor rating of myself—

and should be duly considered. Therefore, when you submit your plan of rating to Supt. Kline, give this particular feature the necessary thought. In connection with this matter to-day, it is desired that you make such explanation as you may have regarding this, as same can not be passed unnoticed for the reason that the example set other clerks in this office will naturally be followed if we permit conversations to be carried on indiscriminately.

Now, I answered that——

Senator GAY. You have three minutes left.

Mr. WELSH. Well, I couldn't give you an insight into the rating system, as I want to bring it out, in that length of time. I wanted to show the woeful lack of a fair rating system whereby the clerks of the country could get a square deal in rating. Also, why a trial board is needed. With only that purpose in view, I will try to condense such points in some way. Either file these papers with you for your perusal, or I will try to make some sort of a résumé of this occasion of my being reported and how I finally was given 25 demerits, even after proving that I was not culpable in this instance. How I departed from the beaten path and placed all the papers in case in the postmaster's hands. The postmaster revoked the 25 demerits, after his going over the case, but if it had not been for him, I should have had no redress, and if he had cared to be arbitrary, I could not have gotten redress then, and I could go no higher, you see. A clerk, under that system, may be reduced or dismissed for a fictitious low rating. We need a trial board, gentlemen. I don't know what I would suggest, unless it is something like the railroad employees now have in effect, which would suit us very well. You are familiar, of course, with that system, or could easily obtain details concerning it.

We should have a seniority system in effect too, and I will file this seniority brief with you, and I will further place with the commission, if you will permit me the opportunity, something with regard to the rating system, as well as a trial board. In the absence of such protection, service is plainly kept low.

Senator GAY. You can condense that, Mr. Welsh, and file it with the Secretary and it will be printed as part of the hearings here in Memphis.

Mr. WELSH. Yes, sir; thank you, gentlemen.

(Mr. Welsh filed the following brief:)

BRIEF SUBMITTED BY MR. JOHN J. WELSH.

Seniority system of promotion to apply to post office clerks:

1. Promotion shall be on ability, merit and seniority; ability and merit being sufficient, seniority shall govern, except, however, that this provision shall not apply to personal secretaries of postmasters, superintendents, and other officials. It shall not apply to positions superior to that designated as forman except as hereinafter provided.

2. Employees declining promotion shall not lose their seniority.

3. Employees accepting promotion shall have 30 days in which to qualify and, failing, shall be restored to former position without loss of seniority.

4. Each new position or vacancy shall be bulletined and each employee shall be given an opportunity to accept or reject the same. The senior qualified employee shall be assigned thereto, under the provisions of section 3, and with the further understanding that the position in question may be filled, temporarily, for a period of

thirty days, pending the qualification of the senior applicant. Ample opportunity shall be given the senior applicant for practice necessary to such new position.

5. The postmaster shall be the judge of the applicant's fitness, but the right of appeal from such decision is granted under the following provisions:

A. A senior applicant for a new or vacant position who is debarred from such position in the scores of merit and ability shall have the right to appeal from such decision and to a hearing upon his case, and shall be furnished a statement in writing, from the official responsible for such adverse decision, of the reasons for the same.

B. This hearing must occur, except under unusual conditions preventing the same, within seven days of the date of appeal. In case of a postponement the affected employee shall receive a written statement of the cause of such postponement.

C. The employee affected shall have the right to be represented by a committee of employees or by one or more representatives designated by the employee.

D. The right of appeal is granted, through the various grades of officials, to the Postmaster General.

6. Clerks, on entering the service shall be assigned to night duty in the division of mails, to be construed as either the outgoing or city division. The exact tour designated shall be a matter of local agreement.

7. Promotions shall be made from this primary assignment to more desirable tours and duties as vacancies occur or as new positions are created, the senior qualified employee who desires such change to be designated. This shall apply to all grades to and including that of foreman except that assistant foreman and foreman shall not be chosen except from the ranks of men with at least three years' experience in the line of work they will be called upon to supervise.

8. Promotions to positions of superior class to that of foreman shall be made from the ranks of the foreman, the principle of seniority being waived except as to the above qualification. The fitness of foreman to further promotion shall be determined by the result of an examination suited to the restitution in question. This shall be uniform for all applicants and duplicate papers shall be furnished all applicants.

9. In changing from one division to another the employee so changing shall retain seniority from date of appointment as a regular clerk.

10. For the purpose of administering this system, the postmaster of each office shall prepare and post a seniority roster of all clerks in the office. After the correctness of this roster has been established it shall be periodically corrected so as to be a current statement of the force.

11. This shall not apply to change existing schedules, whether permanent or rotating, unless at the desire of the clerks and by agreement with the postmaster.

STATEMENT OF MR. W. C. McDANIEL, LITTLE ROCK, ARK.

Mr. McDANIEL. Gentlemen, it is a privilege to be permitted to come before this commission. I represent 48 hard, faithful workers in the Little Rock, Ark., office, all receiving \$1,650 or less, every one of whom, had the conditions been such to permit, would have been pleased to be here to represent themselves, but due to the limited compensation received for their services and the high cost of living, that was impossible. They have remained at their places of duty in order to provide for themselves.

It is my purpose merely to remind you of the conditions existing to-day and to offer a few suggestions, suggestions that I believe, if carried out, would be for the betterment of the service, as well as of ourselves.

Briefly we wish to call attention to the conditions which prevail. It is the desire of the clerks in this office to petition the commission to recommend legislation that will bring about just and fair classification and a real basis for salaries that would be in harmony and keeping with the present cost of living.

Permit me to call your attention to the fact that there are a number of clerks in our office that have been in the service from 10 to 25 years who receive \$1,400 and less, plus the temporary bonus.

I would like to picture to you the life of a clerk in that office who has been 18 years in the service. He entered the service at \$500 a

year and received annual promotions of a hundred dollars until he reached the maximum salary of \$1,200. To-day he has served the public faithfully 18 years, 3 years by working an all-night schedule, and he receives only \$1,400 with the \$250 temporary bonus. On the other hand, a man who entered the post-office service about the same time having worked three years in the service, resigned to accept a position with a wholesale grocery company and to-day he receives \$225 a month with \$300 Christmas bonus, and we say that the vast difference received by the post-office clerks as compared to those on the outside is causing the service to suffer, and it causes the loss of many valuable men. With such a picture before you, can you expect any conscientious man to enter the service? Eighteen years of service, resulting in a maximum of \$1,400. Can you expect men to enter the service with the intention of remaining a lifetime? I should say not.

During the past 12 months in the Little Rock post office 35½ per cent of the clerks have resigned, handed in their resignations and gone out into other lines. Some have become farmers, painters, builders—a number have taken up farming because they can get greater compensation.

In regard to the high cost of living, I will touch but lightly upon that, because you know all about it. The post-office clerks in Little Rock have felt most keenly this high cost of living. Perhaps more so than in most sections of the country. Every article in the family budget is perhaps above that in the average city, due to the fact that we have to import everything we use. We have no manufacturing in Little Rock. Everything in the way of clothing, etc., is shipped in to us, and we feel perfectly safe in saying that the cost of living in Little Rock since July, 1914, has increased practically 100 per cent.

We wish to make mention, too, at this time, of the basic method of pay for overtime. When a man works an hour in excess of his eight hours, he is paid one-eighth of his day's pay extra. A number of our clerks are frequently called upon to work overtime and receive for that a compensation of 55 cents, or less, according to their rating, whereas the department will go out on the street and bring in a man with absolutely no experience and pay him 60 cents an hour. While a man who has been in the service a number of years and had the experience and made the necessary preparations is worth twice as much as a man you bring in off the streets, nevertheless he receives only 55 cents an hour while the other man receives 60. Now I claim that the man you bring in off the street is worth 60 cents an hour, but that the man who has had the experience is worth more. The Government evidently realized the fact that it was necessary to pay these men 60 cents in order to secure their service.

I told you that 35½ per cent of our clerks quit last year. That means that we have a continual stream of new, inexperienced men coming into our service, which is causing the department, and our local office, to be criticized severely because they are not capable. They are criticizing both the department and the local office.

MR. STEENERSON. Is this overtime voluntary on the part of the clerks and carriers?

MR. McDANIEL. In most cases it is.

MR. STEENERSON. Not in all cases?

Mr. McDANIEL. Not in all cases. That is, in many cases our clerks are willing to work overtime, but if they were not willing, in many cases, it would be necessary to make it compulsory.

Mr. STEENERSON. The work has to be done?

Mr. McDANIEL. The work has to be done, and it has to be done at a certain time.

Mr. STEENERSON. And under those circumstances there is a certain amount of pressure brought to bear on them to make them work overtime, whether they really desire to work or not?

Mr. McDANIEL. Yes, sir.

Mr. STEENERSON. And they are paid less than the new men?

Mr. McDANIEL. Yes, sir. Now, in cases where the old men of experience can be brought in and worked on that overtime, it is far better for the service than to have it worked by the men brought in off the streets.

Again let me emphasize the need of a just classification, calling attention to the fact that it should make no difference what a man's assignment is, if he is efficient and performs his duties satisfactorily to the public, he should share and share alike with those who have some other assignment. All clerks are servants of the same public; they are working for the same purpose and they are paid from the same funds and should receive the maximum salary.

Frankly, I might state to you that in this section of the country the post-office clerks represent the Post Office Department, the greatest department of the country. We feel that the department should furnish us an adequate compensation to enable us to properly support ourselves and those dependent upon us for support, so that we may have the necessities of living and may be able to meet every legitimate obligation; that we may meet with the public and mingle with it, and that we may feel that we are really true American citizens.

In conclusion, I want to say that I agree with the men who have just preceded me that so far as the present merit system is concerned, there is nothing to it.

STATEMENT OF MR. F. M. ROBERTSON, SHEFFIELD, ALA.

Mr. ROBERTSON. I think the field has been pretty completely covered, but there is one thing about which I wish to speak and upon which I will file a brief, and that is the efficiency record. I do not know whether you have ever looked at one of these blanks or not, but it provides that you take the best clerk in the post office and give him 100 per cent—that is, at the end of the year when you come to make up the recommendations for increases in salary—give the best clerk a hundred and rate the others accordingly. The clerks and carriers who set the standard for the office with respect to quantity of work should be rated 100 per cent; that is, at the end of the year. That is the way it is done usually in the small, second-class offices. I know of instances where a supervisory official has used this system to try to compel some of the clerks to like him, personally. In other words, instead of appealing to a man's sense of justice to compel him to work and do right, he would say; "If you don't do it, I will give you so many demerits." We are all Americans and are not going to submit to things like that. The

system is not fair. It can be abused. You can not drive a man to do things. You must appeal to his sense of fairness. I have known supervisory officials who did not know how to boss, as the saying goes, who did not have the sense to approach a man in the right way to get the work out of him, and he used this demerit system instead to try to force the men to do things as he wanted them done.

My understanding of the demerit system is that it is to be used to make men do better work and not to be held over them as a whip to make them obey the whims of some little two-by-four official. Under that efficiency rating record I have had mistreatment. I have been assistant postmaster and I know what it means. One can not use it as it is and be fair. I did just as little of it as we could get by with. We have been checked by the Post Office Department for not using this system. We do not use it much because we did not think it was the right thing to do.

Now, gentlemen, if you are going to have a rating system, have the right kind. I have not studied this question as to what we should have, but some of these men who have studied it can provide a better system than we have.

In my brief I have touched on the subject of old-age pensions, and that subject has been discussed pro and con here, and so have nearly all the other subjects, and I do not want to take up your valuable time with the high cost of living and all those things pertaining thereto. I have that in my brief.

I just want to say a little bit along sentimental lines. I have been in the service 18 years and have tried to get out after I had served four years. I have resigned and come back; I have resigned and gone into different business and tried to stay out. Right now I have an offer of nearly twice my salary, and I just loathe to leave, because I think we are going to get something better. You know an old post-office clerk or carrier, after he has been there three, four, or five years, has a peculiar love for the service—he is attracted to the service; he is unduly held in some way—I don't know how it is. Railroad men are the same way. I have gone out and been out of the service two years, and yet I came back. I don't know why. I just love it. I reckon. It is just like Mr. Kline says. He has been in the service, and he could command a salary of \$5,000 easily elsewhere—I have known him 15 years—and yet he stays here at a salary of \$2,600 a year. Why? I don't know. He is held there by the attractiveness of the service, I suppose. Now, we fellows who have stayed in the service so long can't do anything else. We go into other channels and are failures.

Why? Because we have learned the post-office business—and it is a business. It takes every bit a man has in his whole being to be a good, efficient post-office clerk or carrier. It has been brought out here this morning that a postal clerk has to be a good lawyer, a good judge of human nature—oh, I don't know the attainments—there are so many qualifications that a post-office clerk has to have. He has to meet all kinds and classes of people. And sometimes your very soul is tried; meet everybody with a smile, and hold up his standard of efficiency. It takes a real man to stay in the service as long as they do, and it is just that fascination of the service that holds them. We have men who have been offered \$7.50 and \$8 a day who stay in the post office at \$4 a day. We have a man who is worth thirty-five

or forty thousand dollars through some real estate deals he has happened to make. He has been offered a pretty good job on the outside, yet he stays in the post office and writes money orders at \$1,650 a year. Fascination of the service holds him.

I say, gentlemen, if you will give us an adequate compensation we will continue to stay and get along happily and you will retain those efficient men who have been in the service for years and years, and it will be a stimulus to the whole business everywhere, because we do touch every business. The post office establishment is peculiar. It goes into every line of business there is.

No governmental establishment is closer to the public than the post office establishment.

I believe better compensation will result in more efficiency among the post-office employees and the public will be benefited as well.

Mr. Robertson filed the following brief:

BRIEF FILED BY MR. F. M. ROBERTSON.

Efficiency is one of the greatest things to be found in any endeavor and it is needed at no other place more than in the post-office work. For one to be at his best, to be the most efficient, he should be happy and contented. He should not have family worries and financial worries.

To be content and happy, and therefore efficient, one must necessarily feel and know that his family is well provided for and that his children have a chance to obtain an education. He should feel that he is saving up for a rainy day and for a home. Most of all he should feel that he is justly compensated commensurate with the service he renders.

No one can be efficient to his highest degree while his mind is harassed with the knowledge that he is getting deeper in debt with no prospect of a chance of paying out. This tends to make the best of us grow careless, grouchy, indifferent, and sometimes insolent. These are the things which make men go on strikes and forget themselves. These are the things which make men inefficient.

The present rate of pay of post-office employees goes a long way in making them inefficient.

The patrons of post offices desire efficient service from the employees and they are entitled to the best service the Post Office Department can give them, hence to give the employees an increase in salary will count for better service to the patrons and will tend to make the lives of the employees sweeter and happier.

This line of talk may seem sentimental, but I wish to call attention to the fact that no national establishment is so closely related to the people sentimentally or otherwise as the Post Office Establishment. When you lose a man's mail and he finds it out, he becomes a very demon, as it were; he becomes unreasonable and not a great business man as he should be. He is very sentimental.

One can not measure the happiness among the post-office employees, although it was noticeable when they received the last bonus of \$150 to \$200 per year. I tell you it was a great stimulus and was felt throughout the whole establishment. We thank you.

Employees of the Post Office Department are wholly dependent upon congressional enactment for relief. They can not, nor do they wish to strike. They are too loyal. They know there is too much at stake, as the mails must move.

After a clerk has served several months in a post office, there seems to be born within the clerk a sense of duty and devotion to the service that is peculiar and interesting.

Post-office work has such a fascination that it holds one to the service, and where one does break loose and get out of the service for a while he soon yearns to return and does if a good opportunity presents itself. This is one reason why so many post-office employees stay with the service until they can not do anything else in life. They are failures anywhere else.

I have several instances where employees have made some money with investments, more than they can use during their lives, but they never leave the service, because they seem lost if not at their old places of service.

I am trying to show you that the post-office employees as a class are a steadier and more dependable class of employees than can be found in most any other endeavor,

and were it not for the devotion to duty there would be continual resignings and replacements that are so costly to any business and would work havoc with the postal business.

I make this as one strong point why we should have better salaries. I think one should be shown an appreciation of his loyalty to duty and patient service.

From a study of the following you will note that all of the nine employees of the Sheffield (Ala.) post office had a deficit except one and she is a girl living with her father. All of them worked outside jobs to help boost their salaries except this one.

The worst part of it is that most of them are in debt because the salary and their outside income was not enough to meet the merest family expenses.

I believe it is estimated that the dollar is worth about 65 cents as compared with its purchasing power before the war and if this is true a comparative statement of the real value of salaries now paid the postal employees is in order and I herewith hand you this comparison: Present entrance salary of \$1,000 is equal to \$650; \$1,100 is equal to \$715; \$1,200 is equal to \$780; \$1,300 is equal to \$845; \$1,400 is equal to \$910; \$1,500 is equal to \$975; \$1,600 is equal to \$1,040; \$1,700 is equal to \$1,105; \$1,800 is equal to \$1,170; \$1,900 is equal to \$1,235; \$2,000 is equal to \$1,300.

Highest grade for clerks and carriers, \$1,500, which will buy \$975 worth of living; hence it would take a salary of \$1,700 to equal the highest salary of clerks and carriers before the war, which was \$1,100 in second-class post offices. I think we should have as entrance salary \$1,400 with a \$200 raise each year until a salary of \$2,000 per year is reached. Then I think we should have special clerks at \$2,200, \$2,400, and, \$2,600. and these places acquired by examination. I think all examinations, annually or otherwise, should be along the line of work in which the clerk or carrier is employed. I can see nothing gained by a clerk taking a State examination when he does distributing for city routes or does registry work.

Conditions existing at the Sheffield Ala., post office during the year 1918.

Salary.	Total income.	Total expense.	Deficit under salary.	Deficit under income.	Surplus over salary.
\$1,300	\$1,500	\$2,000	\$700	\$500
1,000	1,500	1,800	800	500
1,000	1,300	1,140	140	\$140
1,000	1,200	1,500	500	300
1,200	1,500	1,600	400	100
1,100	1,100	1,300	200	200
1,400	3,200	2,000	600
1,000	1,000	1,000
1,100	1,100	1,500	400	400
10,100	13,400	13,840	3,740	2,000	140

Less night work.—We believe that so much night work is unnecessary and could be avoided were the schedules rearranged. Night work takes an awful toll of eyesight and often causes permanent disability. Tours of duty at night should be alternated with those of day tours so that no employee will work more than one month at night before he alternates for a day tour. All night work should be paid at a rate 50 per cent higher than day work.

Old-age pensions.—It is time that legislation should be enacted to care for aged and indigent employees. It is believed that a fair outline is given here: An employee who has a service record of 40 years, retired at full rate of pay for life; an employee with a service record of 35 years, optional retirement of three-fourths pay; an employee with a service record of 30 years, optional retirement of one-half pay; an employee with a service record of 25 years, optional retirement of one-fourth pay.

It is sad to see an old gray-haired man tottering down the street to work, and it is heart-rending to know that he has given the best years of his life to the service at a small salary; that he has been faithful, loyal, and true and at last he finds himself facing poverty, illness, and old age at a time when he should be free from cares and happy. "A nation that cares for its aged citizens shall not perish from the earth." By all means, gentlemen, give the old fellows happiness in their declining years.

We believe postal employees should be granted leave of absence with pay while actually sick not exceeding 30 days each year.

STATEMENT OF MR. LOGAN MITCHELL, FLORENCE, ALA.

Mr. MITCHELL. I have prepared a lengthy set of statements, but am not going to take the time of this commission to read more than a couple of them. Last year there were 15 changes in the city delivery service at our office. We have six carriers. You can figure how often they changed.

Mr. Mitchell's brief follows:

BRIEF SUBMITTED BY MR. LOGAN MITCHELL.

The postal employees at Florence, Ala., wish to present the following at this hearing of your commission:

By way of introduction will say that Florence, Ala., is located in the Tennessee Valley in the extreme northwestern part of the State. It is a city of about 15,000 people and is the site of the well-known Wilson Dam that is now under construction. The great nitrate plant erected by the Government at Muscle Shoals is at our door, just across the river from Florence.

During the fiscal year ended June 30, 1919, the post office at Florence, Ala., did postal business sufficient to produce about \$42,000 in gross postal receipts. About 50,000 domestic money orders were issued that amounted to almost \$500,000. More than 12,000 letters and parcels were registered and more than 10,000 parcels were insured. Florence is the central accounting office for Lauderdale County, having eight fourth-class offices and one third-class office. This office also distributes general supplies of books, blanks, etc., to 27 offices in this and adjoining counties.

Our office has an assistant postmaster, 10 regular clerks, 6 regular city letter carriers, 6 rural carriers, 3 auxiliary clerks, and 2 auxiliary carriers. In all there are 27 of us, besides the postmaster, who are trying to earn a living in the postal service at this office.

During the fiscal year ended June 30, 1919, and continuing up to the present date the conditions at this office have been peculiar, owing to the construction of the nitrate plant across the river from us and the beginning of the construction of the Wilson Dam at this place. In spite of increased forces that the Post Office Department has allowed this office almost all employees have been compelled to work an unusual amount of overtime. One clerk did 770 hours of overtime during the year ended June 30, 1919, for which he was paid \$332.19; another 532 hours, for which he received \$239.26; another 698 hours, and was paid \$316.61 for it. All others made similar overtime. The city carriers were so heavily loaded that they frequently could make only one round trip per day instead of the two they were scheduled to make.

During the year there were 15 changes in the city delivery force, the pay of postal employees being so much less than that of other work in and around the city. None of the clerical force resigned, as they were very loyal to the service and met the hardships with the hope that they would be properly repaid in the future by increased compensation. One clerk remained in the service who was offered \$7.50 per day, solid time, if he would leave and accept other work. His pay as clerk was only \$1,000 per year at that time. Another who was receiving \$1,300 per year refused an offer of \$150 per month for similar work.

This office has one city carrier, one rural carrier, and three clerks who have been in the Postal Service for more than 14 years. These years have given them efficiency that makes them valuable post-office employees. They have given the best years of their lives to the service and some of them feel that they are past the age when it would be possible for them to leave the postal service and begin anew in the business world. Therefore we all urge that your commission consider the proposition of service pensions for those who have grown old in the service. If pensions can not be considered now it is respectfully recommended that some plan of retirement be taken up. None of us want to be retired on part pay until we get too old to properly perform a day's work, but we would like to be assured of a comfortable old age where we would not be dependent upon our children or charity.

Due to the high cost of maintaining proper vehicles and motive power it is very difficult to keep good men for rural carriers. During the past year a large number of changes were made in the rural delivery force at this office. We urge that your commission consider a salary of \$1,500 per year for rural carriers on standard routes with \$36 per mile per year for each mile or fraction thereof. Also an allowance of not less than \$500 per year for maintenance of vehicle and equipment.

At a recent meeting of the postal employees of this office it developed that all of them had been compelled to borrow money from friends or banks during the past year to meet the necessary living expenses. It further developed that most of them had been compelled to dispose of their Liberty bonds for the same reason. By the most careful handling of our salaries we find it almost impossible to meet the necessary expenses of supporting our families.

We have been compelled to neglect the proper education of our children to some extent, and most of us have been forced to neglect the proper support of our churches. We have all been unable to do our part in supporting civic and patriotic movements.

We urge that your commission recommend to Congress a reclassification of salaries of all post-office employees. We respectfully suggest that the grades of clerk and city letter carrier begin with \$1,400 and that said employees be promoted at the end of each six months of satisfactory service to the next higher grade until the \$2,000 grade is reached. We urge that in the event such a law is enacted that provision will be made to give clerks and carriers now in the various grades increases of \$300 to \$500 at once. That is, a clerk now in the \$1,400, which is next to the highest, be promoted to \$1,800 at the beginning of the next fiscal year. Other grades to be given similar promotions. This is to help the present employees offset the "lean months" that they have been passing through for the past year or two.

For your information will give a few instances where other employees in this city are much better paid than postal employees are. The pay of a house painter equals \$1,872 per year, that of a carpenter \$1,910 per year, and a bricklayer gets pay at the rate of \$2,180. Bank clerks who have been in the service as long as the \$1,300 and \$1,400 clerks in this office get \$140 to \$175 per month.

We recommend that the grade of "special clerk" be retained and that clerks in such grades be given suitable increases. But in no case should their salaries be in excess of that of the assistant postmaster.

We recommend that the salaries of assistant postmaster be fixed at three-fourths of that of the postmaster but in no case to less than \$100 per year more than the highest paid clerk or city letter carrier.

We recommend that all overtime be paid for at the rate of time and one-half. That the work on Sundays and holidays be reduced to the very lowest minimum. That night work be reduced where it is possible and that the older employees be relieved from night duty when possible.

In view of the facts that substitutes are called upon to work at various times and in various places, we recommend that they be paid not less than 50 cents per hour. We further recommend that all substitutes who are on the roll and report every day be paid not less than \$25 per month whether they work any or not. That is unless they are given at least 50 hours duty at 50 cents per hour during the month they are to receive \$25 for the month if they have reported for duty each day.

We also urge that the services of substitutes be discontinued where they are putting in seven or eight hours per day and regular employees be assigned to the work. By making these places regular the employee who fills them will get benefit of vacations with pay, etc.

We recommend that 10 cents be paid for the delivery or attempted delivery of each special-delivery piece.

We are very grateful for the laws that Congress has passed in the years gone by that have given us better pay and improved our conditions. We thank you for giving us this chance to present our case and assure you that the postal employees have been and are yet to classed among the most loyal and whole-hearted supporters of the Government.

Briefs were submitted by George Forbes et al, Chattanooga, Tenn.; Joseph Durham, Fort Smith, Ark.; M. Louise Guidice, Natchez, Miss.; John T. Cupit, Jackson, Miss.; and W. Y. Bennett, Cookeville, Tenn., as follows:)

BRIEF SUBMITTED BY GEORGE FORBES, ET AL CHATTANOOGA, TENN.

We realize that in presenting this statement of conditions in the Postal Service to your honorable body we must be brief and point out to you facts that will appeal to you from your point of view. We also realize that your chief object is to improve the Postal Service, while at the same time doing justice to the employees.

With this object in view, we wish to call your attention to the fact that some of the most efficient clerks have left the service in the last two or three years; also to show you why it is impossible to replace them with clerks just as good under present con-

ditions. And to prove this we have written to several of them and asked for a statement giving their reasons for leaving the service, so we would be able to show you by their own statements what remedy will be necessary to prevent the service from being depleted of its best men.

The original letters from several ex-post office clerks, all of whom have left the service in the last two years, are on file with the commission.

The reasons given by all of them are practically no opportunity for advancement, as the position of supervisor under the present conditions is far from desirable. We have seen supervisory jobs go begging in this office for six months and then a competent man would have to be practically conscripted for same.

Night work: Clerks are usually required to work night work about five years, and possibly longer, as few shifts are created on the daywork and they must depend upon vacancies to be incurred in the various ways. It also constitutes about two-thirds of all work done at a post office, and is the cause of death to a large number of clerks who die in the service. We have had several examples very recently in this office of such cases.

We believe six hours' night work should be equivalent to eight hours' day work, and that an absolutely iron-clad seniority system whereby a clerk would not have to serve on night work after his turn for day work (which is one of the happiest days in the life of a post office clerk) had arrived. Nothing is more discouraging to a night clerk, who has served faithfully and well for several years, put up good case examinations, lost sleep and health on night work, than to see his much coveted day turn go to some clerk, who has done practically no night duty, for this or that reason.

Scheme study: We are examined on about 2,200 cards annually from scheme study. The average amount of time spent in preparing these examinations is about one hundred hours. No compensation for such study has a natural tendency to drive the most efficient clerks from distributing departments, and the new clerks coming into the service naturally seek departments where no scheme study is required.

As the distributing departments are so important to the efficiency of the service, we think a fair recompense for scheme study would be a great uplift to the service. As one ex-clerk said in his letter, he realized that if he could put up a civil-service examination and would devote as much time to study of some other line of endeavor as he was required to do off duty on scheme examinations, he could qualify for something better, and he did, as his record shows that he made more the first year away from the post office than the salary of the assistant postmaster of this office.

Inadequate pay: This of course was the prime motive of almost all the resignations. We herewith submit a list of comparative wages paid in this section with increase since 1913:

	1913	1919	Increase.
			<i>Per cent.</i>
Sheet metal workers.....per hour..	\$0.32½	\$0.70	116
Machinist.....do....	.32½	.70	116
Carpenters.....do....	.40	.75	87.5
Railway clerks.....per month..	73.00	140.00	91.9
Bricklayers.....per hour..	.50	1.00	100
Electric workers.....do....	.40	.75	87.5
